He has adorned every position which he has touched. He is a scholar, a gentleman, an author, a preacher, a philosopher, a theologian, a Christian of the very highest order in the land, and so acknowledged even by those not always agreeing with his views.

He has not forgotten his birth-place or the scenes of his boyhood, though leaving the place when eleven years old and visiting it but twice since that time.

He remembers his old family physician, Dr. Cowdry; Deacon Silas Hosmer, one of the officers of the church, who died at the age of eighty-four; the two Fletchers, Deacon John and his brother James; the Faulkner mills, where there were about a dozen houses when last he saw it; East Acton, the place where he went to take the stage, upon the main road, when great journeys were to be made; Wetherbee's Hotel and some fine old elms, which he hopes are still standing; Deacon Phineas Wheeler and his grist-mill, to which he often carried the grist; the Common in Acton Centre, now covered with fine shade-trees, where there was not a single tree of any kind when he played ball upon it in his boyhood; those inscriptions upon the grave-stones around the monument which he used to read when a boy in the old cemetery; the huckleberry and blueberry bushes still growing in the same rough pastures, where he has picked many a quart.

He is now in his seventieth year, but there are some still living who recall his early days on the street and at the parsonage. He was a model youth, and had in him at the start elements which all recognized as the promise of his future career, if his life should be spared.

The following tributes to the memory of his father and mother were received in a letter from him dated December 23, 1889: "My father lived to the great age of eighty-five, dying in Hillsborough, N. Y., in 1872. After leaving Acton he was never settled as a pastor, but for many years, until age and infirmities prevented, he preached to the feeble churches in the region, and did a great and good work in the moral and religious up-building of society. My mother died soon after our family removed to Northern New York, which was in October, 1831. She departed this life in February, 1833. I was only twelve years of age, but the impress she made upon me in those twelve years is greater than that made by any other human being, or than all other human beings collectively."

In the same letter he gives this record of his two brothers—younger than himself—whom several old schoolmates, now living in Acton, remember with interest. Marshall died in Hillsborough, N. Y., in 1879, in the Christian faith and hope. The younger brother, Henry S., is living, and for more than twenty years has been connected with the post-office in this city (New York).

The Acton town records give the following dates of birth: William G. Thayer Shedd, son of Marshall and Eliza Shedd, born June 21, 1820; Marshall, born April 11, 1822; Henry Spring Shedd, born February 21, 1824; Elizabeth Thayer Shedd, born September 9, 1825. In his last brief visit to Acton several years ago he said in conversation: "The old scenes and persons in Acton come back from my boyhood memories with outlines of distinctness more and more vivid as the years go by."

REVOLUTIONARY PRELIMINARIES.—At a special meeting in January, 1768, the town voted "to comply with the proposals sent to the town by the town of Boston, relating to the encouragement of manufacture among ourselves and not purchasing superfluities from abroad."

In September of that year Joseph Fletcher was chosen to sit in a convention at Boston, to be holden on the 22d of that month.

ACTON OF THE TOWN ON THE MEMORABLE 5TH OF MARCH, 1770.

"Taking into consideration the distressed circumstances that this Province and all North America are involved in by reason(s) of the Acts of Parliament imposing duties and taxes for the sole purpose to raise a Revenue, and when the Royal ear seems to be stop against all our humble Prayers and petitions for redress of grievances, and considering the Salutary Measures that the Body of Merchants and Traders in this province have come into in order for the redress of the many troubles that we are involved in, and to support and maintain our Charter Rights and Privilege and to prevent our total Ruin and Destruction, taking all these things into serious Consideration, came into the following votes:

"1st. That we will use our utmost endeavors to encourage and support the body of merchants and traders in their endeavors to retrieve this Province out of its present Distresses to whom this Town vote their thanks for the Constitutional and spirited measures pursued by them for the good of this Province.

"2. That from this Time we will have no commercial or social connection with those who at this time do refuse to contribute to the relief of this abused country—especially those that import British Goods contrary

to the Agreement of the body of merchants in Boston or elsewhere, that we will not afford them our Custom, but treat them with the utmost neglect and all those who countenance them.

"3. That we will use our utmost endeavors to prevent the consumption of all foreign superfluities, and that we will use our utmost Endeavors to promote and encourage our own manufactures.

"4. That the Town Clerk transmit a copy of these votes of the Town to the Committee of Merchants of inspection at Boston.

"A true copy attested.

"FRANCIS FAULKNER,
"Town Clerk."

A committee of nine of the principal men of the town was appointed to consider the rights of the Colony and the violation of said rights, and draft such votes as they thought proper.

In January, 1773, the following report of the Committee was accepted and adopted:

"Taking into serious consideration the alarming circumstances of the Province relating to the violation of our charter rights and privileges (as we apprehend) by the British administration, we are of opinion: That the rights of the Colonists natural, ecclesiastical and civil are well stated by the Town of Boston.

"And it is our opinion that the taxing of us without our consent—the making the Governor of the Province and the Judges of the Supreme Court independent of the people and dependent on the Crown, out of money extorted from us, and many other instances of encroachments upon our said charter rights are intolerable grievances, and have a direct tendency to overthrow our happy constitution and bring us into a state of abject slavery.

"But we have a gracious Sovereign, who is the Father of America as well as Great Britain, and as the man in whom we have had no confidence is removed from before the Throne and another in whom we hope to have reason to put confidence placed in his stead, we hope that our petitions will be forwarded and heard, and all our grievances redressed.

"*Resolved*, also, that as we have no member in the house of Representatives, we earnestly recommend it to the Representative Body of this Province that you gentlemen, inspect with a jealous eye our charter rights and privileges, and that you use every constitutional method to obtain redress of all our grievances, and that you strenuously endeavor in such ways as you in your wisdom think fit, that the honorable judges of the Supreme Court may have their support as formerly agreeable to the charter of the Province.

"*Resolved*, That the sincere thanks of the Town be given to the inhabitants of the Town of Boston for their spirited endeavors to preserve our rights and privileges inviolate when threatened with destruction.

In March, 1774, resolutions were passed with reference to paying duty on tea belonging to the East India Company.

In August, 1774, three of the principal citizens of the town were appointed delegates to a County Convention to be holden in Concord the 30th of that month.

In October of the same year two of the three delegates referred to above were chosen to sit in a Provincial Congress, which was to assemble at Concord soon, and at the same meeting a Committee of Correspondence was appointed.

In December, 1774, £25 was voted for the use of the Province, and a vote was passed to indemnify the assessors for not making returns to the British government. It was also voted to join the association of the Continental Congress, and a committee was appointed to see that all inhabitants above sixteen years of age signed their compliance, and that the names of those who did not sign should be reported to the Committee of Correspondence. Samuel Hayward, Francis

Faulkner, Jonathan Billings, Josiah Hayward, John Heald, Jr., Joseph Robbins and Simon Tuttle were chosen a committee for that purpose.

In November, 1774, a company of minute-men was raised by voluntary enlistment, and elected Isaac Davis for their commander. The company by agreement met for discipline twice in each week, through the winter and spring till the fight at Concord.

In January the town voted to pay them eight pence for every meeting till the 1st of May, provided they should be on duty as much as three hours, and should attend within half an hour the time appointed for the meeting.

In the winter of 1774-7 the town had two militia companies, one in the south and one in the east.

In 1775 Josiah Hayward was twice chosen a delegate to the Provincial Congress at Cambridge.

In June, 1776, a vote was passed giving the following instructions to the representative of the town:

"To Mr. Mark White:

"Sir,—Our not being favored with the resolution to the Honorable House of Representatives, calling upon the several towns in this Colony to express their minds with respect to the important question of American Independence is the occasion of our not expressing our minds sooner.

"But we now cheerfully embrace this opportunity to instruct you on that important question.

"The subverting our Constitution, the many injuries and unheard of barbarities which the Colonies have received from Great Britain, confirm us in the opinion that the present age will be deficient in their duty to God, their posterity and themselves, if they do not establish an American Republic. This is the only form of Government we wish to see established.

"But we mean not to dictate—

"We freely submit this interesting affair to the wisdom of the Continental Congress, who, we trust, are guided and directed by the Supreme Governor of the world, and we instruct you, sir, to give them the strongest assurance that, if they should declare America to be a Free and Independent Republic, your constituents will support and defend the measure with their lives and fortunes."

In October, 1776, when a proposition was before the people that the executive and legislative branches of the Provincial Government should frame a Constitution for the State, the town of Acton committed the subject to Francis Faulkner, Ephraim Hapgood, Samuel Hayward, Ephraim Hosmer, Joseph Robbins and Nathaniel Edwards, who reported the following resolutions, which were unanimously accepted:

"1st. *Resolved*, that as this State is at present destitute of an established form of Government, it is necessary one should be immediately formed and established.

"2. *Resolved*, That the Supreme Legislature in that capacity are by no means a body proper to form and establish a constitution for the following reasons, viz.:

"Because a constitution properly formed has a system of principles established to secure subjects in the possession of their rights and privileges against any encroachments of the Legislative part, and it is our opinion that the same body which has a right to form a constitution has a right to alter it, and we conceive a constitution alterable by the Supreme Legislative power is no security to the subjects against the encroachments of that power on our rights and privileges.

"*Resolved*, that the town thinks it expedient that a convention be chosen by the inhabitants of the several towns and districts in this State being free to form and establish a constitution for the State.

"*Resolved*, That the Honorable Assembly of this State be desired to recommend to the inhabitants of the State to choose a convention for the above purpose as soon as possible.

"Resolved, that the Convention publish their proposed constitution before they establish it for the inspection and remarks of the Inhabitants of this State."

At a meeting in February, 1778, "the United States Articles of Confederation and Perpetual Union," after being twice read, were accepted by the town.

In May, 1778, a Constitution and frame of government for the State, which had been formed by the General Court, was laid before the town for consideration, and was rejected by a vote of fifty-one to eighteen.

The instrument was so offensive to the inhabitants that in May, 1779, an article being inserted in the warrant, "to see if the town will choose at this time to have a new Constitution or frame of government," the constitution was rejected.

The proposition, however, though rejected by this town, was accepted by a majority of the people, and in July, 1779, Francis Faulkner was chosen a delegate to sit in a convention in Cambridge to form a Constitution, and the result was that the present Constitution of this Commonwealth was laid before the town for consideration on the 28th day of April, 1780, and it being read, the meeting was adjourned for consideration till the 15th of May.

On that the articles were debated, and at a further adjournment on the 29th of the same month every article was approved by a majority of more than two-thirds of the voters. These simple records show heroic grit, combined statesmanship and patriotism worthy of those olden dates and worthy of any dates since or of any that are to follow.

THE FAULKNER HOUSE (South Acton).—This is the oldest house now standing in Acton. You go from the railroad station south across the bridge and ascend the steep hill, and you at once approach the ancient structure. It has on its face and surroundings an impress of age, which strikes the eye at first glance, and the impress deepens as the eye tarries for a second look.

Colonel Winthrop E. Faulkner, who died March 25, 1880, aged seventy-five years, used to say that they told him when a child it must have been 150 years old then. No tongue and no records fix the original date of this ancient landmark. It is safe to call it 200 years old, some parts of it at least.

It was a block-house, and in the early Colonial times it was a garrison-house where the settlers in the neighborhood would gather in the night for protection against the assaults of the Indians.

Enter the southwest room. It will easily accommodate 100 persons. It is a square room neatly kept and furnished with antique mementos. Raise your hand and you easily touch the projecting beams of dry hard oak, which the sharpest steel cannot cleave, eighteen inches solid. The space between the beams of the sides of the room are filled with brick, which make it fire-proof against the shot of the enemy.

You notice the two small glass windows as large as

an orange in the entering door of this room. They were for use in watching the proceeding of the courts which once were held here by Francis Faulkner, the justice.

Measure the old chimney, nine feet by seven, solid brick furnished with three large fire-places and an oven below and an oven above in the attic for smoking hams, large enough to accommodate all the neighbors and hooks attached in the arch where the hams could remain suspended till called for.

Mark that fine photograph on the wall. It is the life-like face of Colonel Winthrop E. Faulkner. Give him a royal greeting, for he was the lue of the village and town in childhood's days and in later years, and there comes his aged widow, still living and gracing the old homestead and guarding the precious relics, now in her eighty-third year.

Mrs. Lottie Flagg, her daughter, the veteran and successful school-teacher, who does a noble work in helping the outfit and hospitality of this historic site. Note her words as she repeats the tale of this rallying centre on the morning of the 19th of April, 1775.

Francis Faulkner, Jr., a boy of fifteen years, was lying awake early in the morning, no one yet moving and listening to the clatter of a horse's feet drawing nearer and nearer. Suddenly he leaped from his bed, ran into his father's room and cried out, "Father, there's a horse coming on the full run and he's bringing news." His father, Colonel Francis, already had on his pantaloons and his gun in his hand. The fleet horseman wheeled across the bridge and up to the house, and shouted, "Rouse your minute-men, Mr. Faulkner! The British are marching on Lexington and Concord," and away he went to spread the news.

Mr. Faulkner, without stopping to dress, fired three times as fast as he could load and fire—that being the preconceived signal to call out the minute men.

"And so, through the night, went his cry of alarm
To every Middlesex village and farm;
A cry of defiance, and not of fear;
A voice in the darkness, a knock at the door,
And a word that shall echo forever more."

Being the chairman of safety and colonel of the Middlesex Regiment of Militia—the men were to assemble at his house. Almost immediately a neighbor repeated the signal and the boy Francis listened with breathless interest to hear the signal guns grow fainter and fainter off in the distant farm-houses. Signal-fires were also lighted, and every house awoke from its slumbers to the new era. By this time the family were all up in the greatest commotion—the younger children crying because the British would come and kill them. Very soon the minute-men began to come in, every one with his gun, powder-horn, pouch of bullets and a piece of bread and cheese, the only breakfast he proposed to make before meeting the enemy of his country. Some came hurrying in with their wives and children in the greatest excitement, to get more certain news and to know what was to be

done. Word came from Captain Davis that he would march as soon as thirty should come in. In the mean time they were busy in driving down stakes on the lawn and hanging kettles for cooking the soldiers' dinners. They brought from the houses beef and pork, potatoes and cabbages. The women would cook the dinner, and some of the elder boys, of whom Francis, Jr., was one, were designated to bring it along packed in saddle-bags. By the time these preliminaries for dinner were made Lieutenant Hunt took command of the West Militia Company, Capt. Faulkner having a few days before been promoted to the position of colonel of the Middlesex Regiment.

The line was formed on the lawn south of the house, and they marched amid the tears of their families. Colonel Faulkner accompanied them to take command of the Middlesex Regiment, as the other companies would come in at Concord. Uncle Francis, the boy, waited with great impatience for the dinner to be cooked and packed. Every woman wanted to prepare the dinner complete and separate for her husband or sons. But after much discussion it was agreed to pack all the beef and pork, bread and vegetables, each kind by itself, and let the men themselves divide it. At length, after some hours of talking and boiling and packing, the horses were loaded, and the boys started off.

I asked Uncle Francis why in the world they did not take a wagon, and one horse would be enough for the whole. Didn't they know enough to do that? "Oh, yes—they knew too much to do that," he said. The British soldiers might have the road. If we saw a red-coat we were told to give him a wide birth, or he might get us and our dinner. We could quietly topple over a stone wall or take out a few rails and escape through the fields and find our men wherever they might be. To the great surprise of the boy he found the Acton men in the highest spirits. They had made the red-coats run for their lives.

This house is so associated with the history of the Faulkner family, and this family is so blended with the history of the town, that a brief family record is here appended.

Francis Faulkner, the father of Ammiruhammah, and the grandfather of Col. Francis Faulkner, was a resident of Andover, Mass., and married Abigail Dane, daughter of Rev. Francis Dane, the second minister of Andover, a woman of noble character and exemplary piety. She was accused of witchcraft, tried and condemned to death. She passed through the terrible ordeal with unshaken firmness, and the sentence was revoked.

Ammiruhammah Faulkner, son of Francis, came from Andover and settled in "Concord Village," in 1735, at the "great falls," of the "Great Brook," where he erected the mills which have since been owned and occupied by his descendants, where he died Aug. 1, 1756, aged sixty-four.

Col. Francis Faulkner, son of Ammiruhammah,

was born in Andover, Mass., Sept. 29, 1728, and died in Acton Aug. 5, 1805, aged seventy seven. He married Lizzie Mussey April 29, 1756. He was a member of the Provincial Congress held in Concord, 1774, and represented the town of Acton in the Legislature of 1783-4-5. He had a military commission under George III., but the oppressive and arbitrary acts of Great Britain induced him to renounce his allegiance to the crown. In 1775 he was elected major of a regiment organized to "oppose invasion."

On the morning of the 19th of April, 1775, he marched with the Acton patriots to the Concord North Bridge, where he engaged the British, and with his men pursued them to Charlestown. He was several times engaged in actual service during the war, being lieutenant-colonel in the Regiment Middlesex Militia called to reinforce the Continental Army at the occupation of Dorchester Heights, in March, 1776. He was in service when Burgoyne was taken, and commanded the regiment which guarded the prisoners on that occasion. He was a courageous officer, an able legislator and an exemplary Christian. He built the mills which for a century and a half have been known as the Faulkner Mills, now of South Acton. They were first only a saw and a grist-mill, the two most indispensable agents of civilization and comfort in a new country. To these was added in due time a fulling-mill, which was among the very earliest efforts at the manufacture of woollen cloth in this country.

There was first a carding-machine, which changed as by magic the wool into beautiful rolls. They were distributed to many houses to be spun and woven into rough woollen cloth and returned to the mill. Here the cloth was fulled under stampers with soap, which made it foam and helped cleanse and thicken it up. The process of raising nap with teazles was exceedingly interesting. The teazle was a product of nature and seemed expressly and wonderfully created for that very purpose. Then came the shearing off inequalities by the swift revolving shears and the final finishing up into cloth. When the wool was of fine quality and evenly spun the result was a passable broadcloth of great durability.

In order to encourage wool production and skill in using it, prizes were offered for the finest specimen of home-made broadcloth—that is, the wool, the spinning and weaving were of home; the rest was of the fulling-mill. This spinning and weaving were the fine arts of our grandmothers and great-grandmothers, and noble women were proud of the prizes they won. A prize to a spinster was sure to attract the most flattering attention and take her speedily out of spinsterhood.

Colonel Faulkner was not only an active, energetic "clothier," but also a leading citizen in all public interests. For thirty-five successive years he was chosen town clerk, and the records are kept with neatness, clearness and order. (See Cyrus Hamlin's

Historical Sketch, read before Historical Society at Lexington.)

Winthrop Faulkner, the son of Francis, was born in Acton March 21, 1774, and died in Acton March 17, 1813. He received a justice's commission at the age of twenty-three. He was a man of cultivated mind and sound judgment, and his advice was generally sought for all important town matters. He was one of the original members of the Corinthian Lodge of Masons in Concord.

COLONEL WINTHROP E. FAULKNER.—He was the son of Winthrop Faulkner, born April 16, 1805, and died March 25, 1880. He was initiated into the Corinthian Lodge of Masons in 1854. He married Martha Adams Bixby, of Framingham. He was noted in all the relations of life. He was an enterprising miller, an enthusiast in music, dancing, military, civil, social and parish activities. He was a pushing man, forward in all enterprises for the public improvement. He was one of the prime movers in projecting the Fitchburg Railroad, and but for his enterprise in controlling the first plans, the road would have gone in another direction. He was for a long run of years one of the most active directors.

THE ROBBINS HOUSE.—Returning from the Fletcher homestead to the main road, and proceeding direct by the cemetery and beyond till we reach nearly the brow of the hill on the left, we come to the site of what was for so many years called the Robbins House. The land on which it was located was purchased of Captain Thomas Wheeler, whose house (the first in Acton) was located a few rods to the south, near the little brook before described in this narrative. When the latter house was taken down the timbers were found to be in good condition, and were used in the construction of the L part of Nathan Robbins' house.

It was an historic structure from the start, and was emphatically so after the 19th of April, 1775. "Before light on that eventful morning, hours before the British entered Concord, a horseman, whose name was never known, going at full speed (they spared neither horseflesh nor manflesh in those days), rode up to this house, then occupied by Captain Joseph Robbins, the commissioned officer in the town of Acton, who lived nearest North Bridge, and struck with a large, heavy club, as they thought, the corner of the house, never dismounting, but crying out at the top of his voice, 'Capt. Robbins! Capt. Robbins! up, up! The Regulars have come to Concord. Rendezvous at old North Bridge! quick as possible alarm Acton!'"

His only son—afterwards a venerable magistrate—John Robbins, Esq., was then asleep in the garret—a lad ten years old.

But "those rappings"—and there was no sham about them—and that cry brought him to his feet *instantly* and every other living man in that house. It waked the babe in the cradle. In a few minutes

he was on "father's old mare," bound for Captain Davis's, not a mile off, who commanded the minute-men, and then to Deacon Simon Hunt's, in the west part of the town, who commanded the West Company as first lieutenant, Captain Francis Faulkner having, a few days before, been promoted to be major, and the vacancy not having been filled.

"The hurrying footsteps of that steed
The fate of a nation was riding that night."

The locality where this house stood is easily recognized from the indications on the ground. It was a two-story building. The barn was struck by lightning in the year 1830, and was rapidly consumed. The citizens rallied to save the building, or at least part of it, but Esq. Robbins shouted out with his stentorian voice: "Boys, save your fingers. There is plenty of timber in the woods where this came from!" He knew how to shout, for he was often moderator of the Acton town-meetings, which gave him a good chance to drill in that line of practice. The house stood afterwards for years unoccupied, but at last it yielded to the destiny of flames, supposed to have been an accidental fire, from the carelessness of transient occupants. The old door-stone still remains in position, battered somewhat by relic-hunters, who have chipped from it for the sake of a memento. A tablet memorial will some day be erected on this ground befitting its historic interest.

The report of this house having been haunted in former years is easily credited by the superstitious, but denied by the more phlegmatic crowd. That those April rappings should have reverberations long continued is credible, and any one going by of an imaginative and appreciative turn of mind can hear them still ringing in his ears.

CAPTAIN DAVIS' ROUTE TO THE NORTH BRIDGE.—The 19th of April, 1775. It was a bright, genial morning. The sun was up at a good, cheery height of an hour and a half. The birds were chanting the very best songs of the opening spring. The men were drawn up in line. The captain at last gave the word "march." Luther Blanchard, the fifer, and Francis Barker, the drummer, struck at once the stirring notes of the "White Cockade," and forward they moved with a quick, brave step. They soon reached the homestead of Parson Swift. They could not stop for the greetings or the partings of the good man, but on they pressed, with their faces set for Mother Concord. They moved along over the old and only road leading from the present site of Deacon W. W. Davis' crossing in a straight line through to the meeting-house on the "knowll."

The road struck the other road just below Dr. Cowdry's barn, where now stands Deacon John Fletcher's barn, just relocated by Moses Taylor, Esq. The old road-bed was found when recently digging the cellar for the barn.

They could not stop for the silent benedictions of the old church, but the prayers and blessings of the

pastor they could hear, and march all the faster for the memory. The handkerchiefs waving from the Brooks Tavern doors and windows helped the thrill of the hour. Down the hills they moved by the present site of Mr. McCarthy, up the ascent to the right, over the heights on the road path, now closed, but still a favorite walk down the hill, across the Revolutionary Bridge, west of Horace Hosmer's present site, the road leading by the spot where the elms south of his house now stand.

This bridge stood very near the spot where the railroad bridge now stands. Some of the stone which formed the abutments of the old bridge were used in the construction of the railroad bridge. The bridge, a few rods to the south of the original, has been sketched by Arthur F. Davis, Acton's young artist, and it is a favorite landscape etching on sale in the cities.

Up the hill they hasten and turn to the right, going by Mr. Hammond Taylor's present residence, the old Brabrook homestead, on the south side, which was then the front side, the road on the north being a comparatively new opening; there they left the main road, struck through the woods, taking a bee-line to their destined point. After passing the woods, the march is by the Nathan Brooks place, now owned and occupied by Mr. H. F. Davis. The passage then was by the nearest way to Barrett's Mills, as then called, not far from the North Bridge.

LUTHER BLANCHARD.—He was born within the limits of what is now Boxboro', a part of Littleton at the time of the Concord Fight. He was a favorite young man, tall, straight, handsome and athletic. He was living at the time with Abner Hosmer, a mason, whose residence was the site of Mr. Herman A. Gould, on the South Acton road, from the West, making him a near neighbor to Captain Davis. He was learning the mason's trade. He was a notable fifer, and his skill and zeal on the morning of the 19th had much to do with the spirit of the whole occasion. The scene was just adapted to wake the musical genius to its highest pitch, and if there were any white feathers around they soon changed to fiery red at the signal from Luther's fife. When they began firing at the bridge, the British at first used blank cartridges. Captain Davis inquired if they were firing bullets. Luther said "Yes," for one had hit him and he was wounded. "If it had gone an inch further one way it would have killed me, and if an inch in the opposite direction it would have not have hit me at all." He followed on in the pursuit of the British on their retreat to Boston, fifeing with all the vigor of his manly strength, which grew less as the excitement of the day began to tell upon his wasted forces. The wound, which he did not think serious at first, grew worse as he proceeded, and on reaching Cambridge he was obliged to be taken to a hospital, where he died.

Mrs. Jonathan B. Davis, a daughter of Simon Hos-

mer, often told these facts to Mr. Luke Blanchard, now living. It was the statement of Mr. Luke Blanchard's father, who was always careful in what he affirmed, that Luther died from the effects of his wound. Luther Blanchard's brother Calvin died from the fall of a tree. He helped tear down barns to build the fort on Bunker Hill. He would carry one end of the timber while it would take two men at the other end to balance.

Luther and Calvin Blanchard's father was in the fight at Quebec, and lost his life on the Plains of Abraham. There must have been patriotic gunpowder in the very blood of the Blanchards at the original start.

Aaron Jones was near Captain Davis when he fell, and followed in pursuit of the British on their retreat. He never could forget that morning or speak of it without a changed tone and face. He thought much of Luther Blanchard as an associate on that eventful day, and of his fifeing march. He named one of his sons Luther Blanchard in memory of the martyr fifer. As the first blood shed on the 19th at Concord antedated the fall of Davis, in the person of Luther Blanchard, there ought to be a tablet, somewhere, memorizing the fact.

THE JAMES HAYWARD HOUSE.—The house in West Acton, formerly the residence of Hon. Stevens Hayward and in later years known as the Leland Place, now occupied by Mr. Kraetzer. Mr. Woodbury, in his legislative speech, thus relates the circumstances of James Hayward's fall on the 19th of April, 1775:

"At Fiske's Hill, in Lexington, they had, as some, thought, the severest encounter of all the way. The road ran around the eastern base of a steep, thick-wooded hill. James Hayward, who had been active and foremost all the way, after the British had passed on, came down from the hill and was aiming for a well of water—the same well is still to be seen at the two-story Dutch-roofed red house on the right from Concord to Lexington, not two miles from the old meeting-house. As he passed by the end of that house he spied a British soldier, still lingering behind the main body, plundering. The Briton also saw him and ran to the front door to cut him off. Lifting up his loaded musket he exclaims, 'You are a dead man.' Hayward immediately said, 'So are you.' They both fired and both fell. The Briton was shot dead, Hayward mortally wounded, the ball entering his side through this hole," holding up the powder-horn, "driving the splinters into his body. He lived eight hours; retained his reason to the last.

"His venerable father, Deacon Samuel Hayward, whose house he had left that morning in the bloom of vigorous manhood, had time to reach Lexington and comfort him with his conversation by reading the Scriptures and prayer. 'James, you are mortally wounded. You can live but a few hours. Before sunrise to-morrow you will no doubt be a corpse.

Are you sorry that you turned out?" "Father, hand me my powder-horn and bullet-pouch. I started with one pound of powder and forty balls, you see what is left,—he had used all but two or three of them,—‘you see what I have been about. I never did such a forenoon’s work before. I am not sorry. Tell mother not to mourn too much for me, *for I am not sorry I turned out.* I die willingly for my country. She will now, I doubt not, by help of God, be free. And tell her whom I loved better than my mother—you know whom I mean—that I am not sorry. I never shall see her again. May I meet her in heaven.’

“Hayward had lost, by the cut of an axe, part of his toes on one foot, and was not liable to military duty. He ‘turned out’ that morning as a volunteer in the strictest sense—as hundreds did. He was one of the earliest at Davis’ house, belonged to the same school district and born and bred by the side of him, their fathers being next-door neighbors. He was twenty-eight years old, one of the most athletic, fine-looking, well-informed, well-bred young men in town. He had been a schoolmaster, he knew the crisis, he knew what he was fighting for and what was to be gained. He came early to Davis’ house and acted with his company. He was seen to go to grinding on the grindstone the point of his bayonet there. On being asked why he did it, ‘Because,’ said he, ‘I expect, before night, we shall come to a push with them and I want my bayonet *sharp.*’”

A fine stone tablet has been erected by the town of Lexington opposite the house where Hayward fell, in honor of the man and the event.

ABNER HOSMER HOUSE.—Abner Hosmer, a private in Davis’ company of minute-men; only twenty-two years old; unmarried; the son of Dea. Jonathan Hosmer, of the Acton Church. A friend and neighbor of Davis fell dead at the same volley—shot through the head. He lived where Mr. Gould now lives, half-way between South and West Villages, nearly a mile from either.

MRS. MEHITABLE PIPER (Acton’s centenarian).—She was the daughter of Joseph Barker (2d) and wife of Silas Piper; born Jan. 24, 1771. She died March 25, 1872, at the age of 101 years and two months. Her funeral took place at her residence on the 28th. The house was filled with relatives and friends. After prayer and touching words of consolation a solemn funeral procession followed the remains to the church at the Centre. The house was filled in every part. Rev. Mr. Hayward, Universalist, and Rev. F. P. Wood, Orthodox, officiated.

Her existence was contemporaneous with that of the nation itself. She saw her mother weep in her father’s embrace when he tore himself from the bosom of his family to take the part of a patriot in the Concord fight. She was living at the time where Moses Taylor, Esq., now lives, and went up to the top of Raspberry Hill, back of Rev. F. P. Wood’s present

residence, to see or hear something from Concord. She had seen every phase of her country’s wonderful growth, and to perpetuate and promote it had sent her descendants into the War of 1812 and through the streets of Baltimore to the terrible War of the Rebellion.

She was the last of the devoted band of Puritans who had worshiped God in the town at the time when religious differences were unknown. She was the relic of other days and the wept of many hearts. Though older than the nation, she did not live long enough to make a single enemy, and her friends were those who at any time had known or seen her. She was buried in Woodlawn Cemetery by the side of her partner.

Some of her ancestors were remarkable for their longevity, her father being upwards of ninety-nine years of age at his death.

She lived eighty years in one spot. She had twelve children, forty-two grandchildren, seventy great-grandchildren, and two children of the fifth generation. Her father stood beside Captain Davis after he fell, and exclaimed to his comrades, “*Boys, don’t give up!*”

REV. J. T. WOODBURY’S SPEECH.—Who was Captain Isaac Davis? Who was Abner Hosmer? Who was James Hayward? And what was Concord fight? What did they fight for, and what did they win? These were Massachusetts Province militiamen; not in these good, quiet, piping times of peace, but in 1775, at the very dark, gloomy outbreak of the American Revolution.

Let us turn back to the bloody annals of that eventful day. Let us see, as well as we can at this distance of three-quarters of a century, just how matters and things stood.

General Gage had full possession of this city. The flag that waved over it was not that of “the old pine-tree”; nor that one, with that beautiful insignia, over your head, sir—with the uplifted right hand lettered over with this most warlike and, to my taste, most appropriate motto in a wrongful world like this, “*Euse petit placidum, sub libertate quietem.*” No, no! It was the flag of that hereditary despot, George the Third!

And if there had been no Isaac Davis or other men of his stamp on the ground in that day, the flag of the crouching lion, the flag of Queen Victoria—due successor to that same hated George the Third; first the oppressor, and then the unscrupulous murderer of our fathers! Yes; I know what I say—the unscrupulous murderer of our fathers—would still wave over this beautiful city and would now be streaming in the wind over every American ship in this harbor. Where, in that case, would have been this Legislature? Why, sir, it would never have been; and my conscientious friend from West Brookfield, instead of sitting here a good “Free Soil” man, as he is, would have been called to no such high vocation as making

laws for a free people—for the good old Commonwealth of Massachusetts; voting for Robert Rantoul, Jr., or Charles Sumner, or Hon. Mr. Winthrop to represent us in a body known as the United States Senate, pronounced the most august, dignified legislative assembly in the civilized world. Oh, no! Far otherwise! If permitted to legislate at all, it would be done under the dictation of Queen Victoria; and if he made laws it would be with a ring in his nose to pull him this way and that, or with his head in the British Lion's mouth—that same lion's mouth which roared in 1775—showing his teeth and lashing his sides at our fathers.

This city was in full possession of the enemy, and had been for several months. Gen. Gage had converted that house of prayer, the Old South Church—where we met a few days since, to sit, delighted auditors, to that unsurpassed election sermon—into a riding-school, a drilling-place for his cavalry. The pulpit and all the pews of the lower floor were, with vandal violence, torn out and tan brought in; and here the dragoons of King George practiced, on their prancing war-horses, the sword exercises, with Tory ladies and gentlemen for spectators in the galleries.

At the 19th of April, 1775, it was not "*Ease petit placidam, sub libertate quietem.*" "*Sub libertate!*" It would have been, rather, "*Sub vili servitio*"—sub anything—rather than liberty under the British Crown!

Information had been received from most reliable sources that valuable powder, ball and other munitions of war were deposited in Concord. Gen. Gage determined to have them. Concord was a great place in '75. The Provincial Congress had just suspended its session there of near two months, adjourning over to the 10th of May, with Warren for their president, and such men as old Samuel Adams, John Hancock, John Adams and James Otis as their advisers. Yes, Concord was the centre of the brave old Middlesex, containing within it all the early battle-grounds of liberty—Old North Bridge, Lexington Common and Bunker Hill—and was for a time the capital of the Province, the seat of the Government of the Colony of Massachusetts Bay.

And Concord had within it as true-hearted Whig patriots as ever breathed. Rev. Mr. Emerson was called a "high son of liberty." To contend with tyrants and stand up against them, resisting unto blood, fighting for the inalienable rights of the people, was a part of his holy religion. And he was one of the most godly men and eloquent ministers in the Colony. He actually felt it to be his duty to God to quit that most delightful town and village, and that most affectionate church and people, and enter the Continental army and serve them as chaplain of a regiment.

What a patient, noble-hearted, truthful, loyal, confiding, affectionate generation of men they were. And remember, these were the men, exasperated beyond all further endurance by the course of a deluded

Parliament and besotted ministry, who flew to arms on the 19th of April, 1775. These were the men who then hunted up their powder-horns and bullet-pouches, took down their guns from the hooks, and ground up their bayonets, on that most memorable of all days in the annals of the old thirteen Colonies—nay, in the annals of the world—which record the struggles that noble men have made in all ages to be free!

Yes, to my mind, Mr. Speaker, it is a more glorious day, a day more full of thrilling incidents and great steps taken by the people to be free than even the 4th of July, itself, 1776.

Why, sir, the 19th of April, '75, that resistance, open, unorganized, armed, marshaled resistance at the old North Bridge—that marching down in battle array, at that soul-stirring air, which every soldier in this house must remember to this day, for the tune is in fashion yet—I mean "the White Cockade"—was itself a prior declaration of independence, written out not with ink upon paper or parchment, but a declaration of independence made by drawn swords, uplifted right arms; fixed bayonets ground sharp, crackling musketry, a declaration written out in the best blood of this land, at Lexington first, and finally all the way for eighteen miles from Old North Bridge to Charlestown Neck, where these panting fugitives found shelter under the guns of British ships of war riding at anchor in Mystic River ready to receive them; a declaration that put more at hazard, and cost the men who made it more, after all, of blood and treasure, than that of 1776.

It cost Davis, Hosmer and Hayward and hundreds of others, equally brave and worthy, their hearts' blood. It cost many an aged father and mother their darling son, many a wife her husband, many a Middlesex maid her lover.

Oh, what a glorious, but oh, what a bloody day it was! That was the day which split in twain the British empire never again to be united. What was the battle of Waterloo? What question did it settle? Why, simply who, of several kings, should wear the crown. Well, I always thought, ever since I read it, when a boy, that if I had fought on either side it would have been with Napoleon against the allied forces. But what is the question to me, or what is the question to you, or to any of us, or our children after us, if we are to be ruled over by crowned heads and hereditary monarchs? What matters it who they are, or which one it shall be?

In ancient times three hundred Greeks, under Leonidas, stood in the pass of Thermopylae and for three successive days beat back and kept at bay five million Persians, led on by Xerxes, the Great. It was a gallant act, but did it preserve the blood-bought liberties of Greece? No. In time they were cloven down, and the land of Demosthenes and Solon marked for ages by the footsteps of the slave.

We weep over it, but we cannot alter it. But not so, thank God! with "Concord fight," and by "Con-

cord fight," I say here, for fear of being misunderstood, I mean by "Concord" all the transactions of that day.

I regard them as one great drama, scene first of which was at Lexington early in the morning, when old Mrs. Harrington called up her son Jonathan, who alone, while I speak, survives of all that host on either side in arms that day. He lives, blessed be God, he still lives; I know him well, a trembling, but still breathing memento of the renowned past; yet lingering by mercy of God on these "mortal shores," if for nothing else, to wake up your sleeping sympathies and induce you, if anything could, to aid in the noble work of building over the bones of his slaughtered companions-in-arms, Davis, Hosmer and Hayward, such a monument as they deserve. Oh, I wish he was here. I wish he only stood on yonder platform, noble man!

"Concord fight" broke the ice. "Concord fight," the rush from the heights at North Bridge was the first open marshaled resistance to the King. Our fathers, cautious men, took there a step that they could not take back if they would, and would not if they could. Till they made that attack probably no British blood had been shed.

If rebels at all, it was only on paper. They had not levied war. They had not *vi et armis* attacked their lawful king. But by that act they passed the Rubicon; till then they *might* retreat with honor; but after that it was too late. The sword was drawn and had been made red in the blood of princes, in the person of their armed defenders.

Attacking Captain Laurie and his detachment at North Bridge was, in law, attacking King George himself. Now they *must* fight or be eternally disgraced. And now they did fight in good earnest. They drew the sword and threw away, as well they might, the scabbard. Yesterday they humbly petitioned. They petitioned no longer. Oh, what a change from the 19th to the 20th of April. They had been, up to that day, a grave, God-fearing, loyal, set of men, honoring the king. Now they strike for national independence and after a seven-years' war, by the help of God, they won it. They obtained nationality. It that day breathed into life; the Colony gave way to the State; that morning Davis and all of them were British colonists. They became by that day's resistance either rebels doomed to die by the halter, or free, independent citizens. If the old Pine Tree flag still waved over them unchanged, they themselves were changed too, entirely and forever.

Old Middlesex was allowed the privilege of opening this war; of first baptizing the land with her blood. God did well to select old Middlesex, and the loved and revered centre of old Middlesex, namely, Concord, as the spot not where this achievement was to be completed, but where it was to be begun, and well begun; where the troops of crowned kings were to meet, not the troops of the people, but the people themselves,

and be routed and beaten from the field, and what is more, stay beaten we hope, we doubt not to the end of time.

And let us remember that our fathers, from the first to the last in that eventful struggle, made most devout appeals to Almighty God. It was so with the whole Revolutionary War. It was all begun, continued and ended in God. Every man and every boy that went from the little mountain town of Acton with its five hundred souls, went that morning from a house of prayer. A more prayerful, pious, God-fearing, man-loving people, I have never read or heard of; if you have, sir, I should like to know who they are, and where they live. They were Puritans, Plymouth Rock Puritans, men who would petition and petition and petition, most respectfully and most courteously, and when their petition and petitioners, old Ben. Franklin and the rest, were proudly spurned away from the foot of the throne, petition again; and do it again for more than ten long, tedious, years; but after all they would fight and fight as never man fought, and they did so fight.

When such men take up arms let kings and queens take care of themselves. When you have waked up such men to resistance unto blood you have waked up a lion in his den. You may kill them. They are vulnerable besides on the heel, but, my word for it, you never can conquer them.

At old North Bridge, about nine o'clock in the forenoon, on the memorable 19th of April, 1775, King George's troops met these men; and after receiving their first fire fled, and the flight still continues—the flight of kings before the people.

Davis' minute-men were ready first and were on the ground first. They were an *élite* corps, young men, volunteers, and give me young men for war. They must be ready at a moment's warning. They were soon at Davis' house and gun-shop. Here they waited till about fifty had arrived. While there some of them were powdering their hair just as the Greeks were accustomed to put garlands of flowers on their heads as they went forth to battle, and they expected a battle. They were fixing their gun-locks and making a few cartridges, but cartridges and cartridge-boxes were rare in those days. The accoutrements of the heroes of the Revolution were the powder-horn and the bullet-pouch, at least of the militia.

And Concord fight, with all its unequalled and uneclipsed glory was won, by help of God, by Massachusetts militiamen. Some were laughing and joking to think that they were going to have what they had for months longed for, a "hit at old Gage." But Davis was a thoughtful, sedate, serious man, a genuine Puritan like Samuel Adams, and he rebuked them. He told them that in his opinion it was "a most eventful crisis for the colonies; blood would be spilt, that was certain; the crimsoned fountain would be opened, none could tell when it would close, nor with whose blood it would overflow. Let every man gird himself

for battle, and not be afraid, for God is on our side. He had great hopes that the country would be free, though he might not live to see it." The truth was, and it should come out.

Davis expected to die that day if he went into battle. He never expected to come back alive to that house.

And no wonder that after the company started and had marched out of his lane some twenty rods to the highway he halted them and went back. He was an affectionate man. He loved that youthful wife of his and those four sick children, and he thought to see them never again and he never did. There was such a presentiment in his mind. His widow has often told me all about it and she thought the same herself, and no wonder he went back and took one more last lingering look of them, saying—he seemed to want to say something, but as he stood on that threshold where I have often stood and where, in my mind's eye, I have often seen his manly form, he could only say, "Take good care of the children," the feelings of the father struggling in him and for a moment almost overcoming the soldier. The ground of this presentiment was this: A few days before the fight Mr. Davis and wife had been away from home of an afternoon. On returning they noticed, as they entered, a large owl sitting on Davis' gun as it hung on the hooks—his favorite gun—the very gun he carried to the fight—a beautiful piece for those days—his own workmanship—the same he grasped in both hands when he was shot at the bridge, being just about to fire himself and which, when stone dead, he grasped still, his friends having, to get it away, to unclinch his stiff fingers.

Sir, however you may view this occurrence or however I may, it matters not; I am telling how that brave man viewed it and his wife and the men of those times. It was an ill omen—a bad sign. The sober conclusion was that the first time Davis went into battle he would lose his life. This was the conclusion, and so it turned out. The family could give no account of the creature and they knew not how it came in. The hideous bird was not allowed to be disturbed or frightened away, and there he stayed two or three days sitting upon that gun.

But mark: with this distinct impression on his mind did the heart of this Puritan patriarch quail? No; not at all, not at all. He believed in the Puritan's God—the Infinite Spirit sitting on the throne of the Universe, Proprietor of all, Creator and upholder of all, superintending and disposing of all, that the hairs of his head were all numbered and not even a sparrow could fall to the ground without his God's express notice, knowledge and consent. He took that gun from those hooks with no trembling hand or wavering heart, and with his trusty sword hanging by his side he started for North Bridge with the firm tread of a giant. Death! Davis did not fear to die. And he had the magic power, which

some men certainly have. God bestows it upon them to inspire every one around them with the same feeling. His soldiers to a man would have gone anywhere after such a leader.

After about two miles of hurried march they came out of the woods only a few rods from Colonel James Barrett's, in Concord, and halted in the highway, whether discovered or not (this road came into the road by Barrett's some twenty rods from Barrett's house), looking with burning indignation to see Captain Parsons and his detachment of British troopers with axes break up the gun-carriages and bring out hay and wood and burn them in the yard.

They had great thoughts of firing in upon them then and there to venture. But Davis was a military man, and his orders were to rendezvous at North Bridge and he knew very well that taking possession of North Bridge would cut off all retreat for this detachment of horse and they must be taken prisoners.

In a few minutes more he wheeled his company into line on the high lands of North Bridge, taking the extreme left of the line—that line being formed facing the river, which was his place, as the youngest commissioned officer present in the regiment—a place occupied a few days before by him at a regimental muster of the minute-men.

A council of war was immediately summoned by Colonel James Barrett and attended on the spot, made up of commissioned officers and Committees of Safety. The question was, What shall now be done? The provincials had been talking for months, nay, for years, of the wrongs they had borne at the hands of a cruel motherland. They had passed good paper resolutions by the dozen. They had fired off their paper-bullets, but what shall *now be done*? Enough had been said. What shall now be done? What a moment! What a crisis for the destinies of this land and of all lands, of the rights and liberties of the human race. Never was a council of war or council of peace called to meet a more important question, one on the decision of which more was at stake. Their council was divided. Some thought it best, at once, to rush down and take possession of the bridge and cut off the retreat of Captain Parsons; others thought not.

Here were probably found in battle array over six hundred troops standing there under arms. Colonel Smith and Major Pitcairn were in plain sight, with their red coats on, their cocked-up hats and their spy-glasses inspecting from the old grave-yard hills the gathering foe, for they came in from all directions suddenly, unaccountably, like the gathering of a summer thunder-cloud. Of course it was admitted on all hands that they could take possession of the bridge, but it was to be expected that this skirmish must bring on a general engagement with the main body in the town. The Provincials would be in greater force by twelve o'clock M. than at nine. And if the whole British Army of eight hundred men

should take the field against them in their present number most undoubtedly the men would run—they never would “stand fire.” Their officers thought so; their officers said so on the spot. They gave it as their opinion, and it is probable that no attack at that hour would have been made had it not happened that, at that moment, the smoke began to rise from the centre of the town—all in plain sight from these heights—the smoke of burning houses. And they said, Shall we stand here like cowards and see Old Concord burn?

Colonel Barrett gave consent to make the attack. Davis came back to his company, drew his sword and commanded them to advance six paces. He then faced them to the right, and at his favorite tune of “The White Cockade” led the column of attack towards the bridge. By the side of Davis marched Major Buttrick, of Concord, as brave a man as lived, and old Colonel Robinson, of Westford. The British on this began to take up the bridge; the Americans on this quickened their pace. Immediately the firing on both sides began. Davis is at once shot dead through the heart. The ball passed quite through his body, making a very large wound, perhaps driving in a button of his coat. His blood gushed out in one great stream, flying, it is said, more than ten feet, besprinkling and besmearing his own clothes, these shoe-buckles and the clothes of Orderly Sergeant David Forbush and a file leader, Thomas Thorp. Davis, when hit, as is usual with men when shot thus through the heart, leaped up his full length and fell over the causeway on the wet ground, firmly grasping all the while, with both hands, that beautiful gun; and when his weeping comrades came to take care of his youthful but bloody remains, they, with difficulty, unclutched those hands now cold and stiff in death. He was just elevating to his sure eye this gun. No man was a surer shot. What a baptism of blood did those soldiers then receive! The question is now, Do these men deserve this monument? One that shall speak?

Davis' case is without a parallel and was so considered by the Legislature and by Congress when they granted aid to his widow. There never can be another. *There never can be but one man who headed the first column of attack on the King's troops in the Revolutionary War. And Isaac Davis was that man.* Others fell, but not exactly as he fell. Give them the marble. Vote them the monument, one that shall speak to all future generations and speak to the terror of kings and to the encouragement of all who will be free and who, when the bloody crisis comes to strike for it, “are not afraid to go.”

THE BIRTH-PLACE OF CAPTAIN ISAAC DAVIS.—Captain Isaac Davis was the son of Ezekiel Davis and Mary Gibson, of Stow. He was born February 23, 1745, at the place in West Acton known as the Jonathan B. Davis House, where Mr. George Hagar now lives. He was baptized, June 23, 1745. He

married Hannah Brown, of Acton, October 24, 1764. She was born in Acton in 1746. On February 10, 1765, he covenanted with the church.

CAPTAIN ISAAC DAVIS' HOUSE AT THE TIME OF THE CONCORD FIGHT.—It lies about eighty rods southwest from the present site of Deacon W. W. Davis, at Acton Centre. We pass through the lane from Deacon Davis', still traveled as a private way, but at that time the old road; then go through the pastures, then strike the avenue leading to the residence of Mr. Charles Wheeler. His present house now stands very nearly where Captain Davis' house stood in 1775.

The two fine elms in front on the opposite side of the road, if permitted to stand, will help the antiquarian to locate the grounds, destined, as the years go by, more than ever to be the centre of Acton's local interest. The house in which he lived, has been replaced by another and that one repaired and enlarged. It was for many years the residence of Nathaniel Greene Brown, from 1812. It was occupied by Joseph Brown many years before 1812. It was known for some time as the Ward Haskell place, who reconstructed the building in later years, a noted carpenter. Elias Chaffin occupied the place in 1812. The original house was two story in front, and the back sloped down to one, the kitchen in the lower part.

An old apple-tree, a few years since, stood seven rods from Mr. Wheeler's house in his present orchard. This was the shooting mark of Captain Davis in his gun practice. The scars made by the bullets had been healed over, and what seemed like burrs covered the body of the tree when cut down. Mr. Wheeler now regrets that the wood of this tree was not at the time made into small memorial blocks, as keepsakes in memory of the noted marksman. Such relics are more in demand now that the days of the newness have passed, and the oldness has come instead.

This site must ever have a historical value, as the house of Davis, on the morning of the 19th of April, 1775, where his company gathered, ready for battle, and where the funeral took place, of the three martyred soldiers, Mr. Swift officiating, and where the yeomanry of this surrounding country met on that epoch day, to join with the widow and the breaved public in solemn rites of burial. The antique flat stepping-stone at the ell door of Mr. Wheeler's house is the same trodden by Captain Davis and family, and consecrated by the remembrances of that funeral occasion.

CAPTAIN ISAAC DAVIS' WIDOW AND FAMILY RECORD AND LATER RESIDENCE.—The children of Isaac and Hannah (Brown) Davis were: Isaac, born in 1765, a bachelor. He gave his father's sword to Concord. Another son whose name is not known. Hannah, born in 1768, and married Amos Noyes in 1793. She had a daughter, Harriet, who married Mr. Simon Davis, the father of Harriet and Simon Davis. Amos Noyes was the grandfather of Lucian Ephraim,

born in 1773, settled in Maine. Mary, born in 1774, married Noah Fitch in 1796.

The widow married for *second* husband Mr. Samuel Jones, a man of property, July 30, 1782. She had by Mr. Jones, Samuel and Eliza. Samuel was a lawyer and built the house adjoining the monument house, one story, where he had a law-office.

The building was built upon the stumps of the trees, without a cellar. These old stumps were found years afterwards when digging the cellar. This house was afterwards more recently raised to two stories by Simon Davis.

Samuel also built the house owned and occupied now by Mr. John E. Cutter, and the house now owned and occupied by Rev. F. P. Wood, and where for a time Mr. Jones himself lived.

Elijah married a Mr. Waite, and lived in Groton, Massachusetts, and afterwards moved to Albany, New York. She taught school and was highly educated. She secured on one of her visits to Acton a fine oil portrait of her mother in later life, which was much admired and must be a valuable painting if still preserved as an heirloom.

For her *third* husband she married a Mr. Francis Leighton, of Westford, November 21, 1802. After his decease she lived with her granddaughter, Mrs. Simon Davis (Harriet Noyes) occupying the house now owned by Mr. Lucian Noyes, the grandson of Amos Noyes.

There she was living when Rev. Mr. Woodbury called upon her in company with his brother Levi. When asked by Mr. Levi how she managed to live so long, she replied, "I have always lived on the best I could get."

She was a good-sized woman, well developed, and with marked features. She is well remembered by many still living in Acton.

Mr. Woodbury, in his legislative speech, thus refers to her: "These buckles were given to me by Davis' widow, when ninety years old, under very affecting circumstances. I had rendered her aid, in procuring an annuity of fifty dollars from the Commonwealth, and that being insufficient, two hundred dollars more from the United States. Before these grants she had nearly come to want. The money arrived. We were all delighted at the success almost unexpected, for advocating which before the House of Representatives I am under greater obligations to my eloquent friend on my right (General Caleb Cushing), then a member of the House, than to any other man, and to Honorable Daniel Webster in the United States Senate, for which, with all his recent sins on his head, I must love him as long as I live. He never employed his gigantic mind in a nobler cause."

On receiving the money, "Take your pay, Mr. Woodbury," said the old lady.

"I am fully paid already," I said; "but, if you have any Revolutionary relic of your husband, Captain

Davis, if nothing more than a button, I should like it right well. She took her cane and hobbled along to her old chest and drew out these shoe-buckles.

"There," said she. "I have lost everything else that belonged to him. These I had preserved for his children, but if you will accept them they are yours."

Precious relics! seventy-five years ago bathed in the heart's blood of one who, in the name of God and oppressed humanity, headed the column of the first successful attack in modern times of people resisting kings, of ruled against rulers, of oppressed against oppressors. Yes, the very first in these years of the world, but by the grace of God, who has declared himself the God of the oppressed, *not the last!* no, by no means. When I have done with them I will hand them over to my children as worth their weight in gold. By these buckles I would swear my son, as Hamilear, that noble African prince, swore his son Hannibal, "never to give up to Rome." I say, by these shoe-buckles, would I swear my son *to be faithful* unto death, as Davis was in the cause of human liberty, and the just rights of man. Handle them, sir! handle them! How at the touch of these, patriotism, like electricity, will thrill through your bones:

"And one was safe and asleep in his bed,
Who at the bridge would be first to fall,
Who that day would be lying dead,
Pierced by a British musket ball."

REVOLUTIONARY WAR.—January 20, 1776, Middlesex County was ordered to raise a regiment of 571. Acton's quota was thirteen.

A new organization of militia was made in February, 1776, and Acton was assigned to the Third Regiment, Francis Faulkner, of Acton, being made Lieutenant-colonel. The officers of the Acton company were Simon Hunt, captain; John Heald, Jr., first lieutenant; Benjamin Brabrook, second lieutenant. A regiment raised in September, 1776, commanded by Eleazer Brooks, of Lincoln, was in the battle of White Plains. Rev. Moses Adams, of Acton, was chaplain. The Acton company was in the engagement, Thomas Darby being killed. The regiment behaved bravely.

Of a company of eighty-nine men at Dorchester, in the fall of 1776, Acton furnished five.

Thirteen Acton men were of the 670 Middlesex men in the three months' New York Campaign, beginning in November, 1776.

A company sent to Rhode Island in the summer of 1777 had for its first lieutenant Daniel Davis, of Acton. In October, same year, a volunteer company of sixty-three men from Acton and Concord left Concord for Saratoga, arriving there on the 10th and encamping two days. On the 13th they went to Fort Edward. On the 14th and 15th they went on a scout, and on the 16th brought in fifty-three Indians, several Tories and some women. They returned to Saratoga on the 16th, and had the pleasure to see the whole of Burgoyne's army "parade their arms," and march out

of our lines. They guarded the prisoners to Cambridge. Captain Simon Hunt, of Acton, commanded the company that was of the guard at Cambridge, November 28, 1777.

Acton furnished five men for the army April 20, 1779; four more between April and June; eleven, September 1st; eleven June 5, 1780; ten December 2d; and eight June 15, 1781.

List of the Men of Acton in the War of the Revolution.

Isaac Davis; Capt. Davis lived on the Ward Haskell farm, about one mile west of the meeting-house. John Hayward, Lieut., grandfather to Ebenezer Hayward, lived on the Swift Fletcher place. John Heald, Ensign, entered the Continental army and rose to be Captain; lived on John Nickles' place, and after the war kept tavern on the Westford and Concord road, under the great elms, where John Heald died a few years since, and where his son William now resides. His daughter Lydia gave me a letter of Ensign John, dated at Ticonderoga, March 20, 1776, for his wife, directed to Lieut. John Heald, his father, who was out also in the Revolutionary war. Joseph Piper, clerk, uncle to our Silas Piper; David Forbush, Orderly Sergeant, died 1803, aged 85, uncle to Captain Forbush, covered with David's blood when shot; Oliver Emerson, Sergeant, died in 1818, aged 43 years; George Mayfield, Sergeant; Seth Brooks, Sergeant, grandfather of Esquire Nathan Brooks; Luther Blanchard, fifer; Francis Baker, drummer; Joseph Braker 2d; Ephraim Billings, out in most of the war; Oliver Brown; Joseph Chaffin, out in most of the war; Ezekiel Davis, brother to Captain Isaac; David Davis; Elijah Davis; John Davis, Mr. Luther Conant's uncle; Reuben Davis, at the taking of Burgoyne; Jacob Gilbert; Dea. Benjamin Hayward, out in most of the war, brother of James; Abner Hosmer, killed; James Law, Reuben Law, Joseph Locke, Philip Piper; Joseph Reed, out in most of the war, our William R.'s father; Stephen Shepherd, out in most of the war; Solomon Smith, at the taking of Burgoyne; Jonathan Stratton; William Thomas, a school teacher, well informed; Thomas Thorp, Ord. Sergeant several years in the Continental army, and was during all the war; died, 36 years old, at Acton; Jonas Hunt, he was Francis Tuttle's uncle; Abraham Young; Stephen Hosmer, brother to Abner, who was killed; total of Capt. Davis's company, Joseph Harris (alive in 1831, 81 years old) said the true number was 38; James Hayward, an exempt, acted with them as volunteer; A. F. Adams, John Adams; Benjamin Brabrook, deacon; Joseph Brabrook; Joseph Barker 1st, our Joseph's grandfather; Samuel Barker, John Barker, William Barker; David Barker, died at Ticonderoga in 1776; James Billings; Jonathan Billings, died 1821, at the age of 85; Joseph Brooks, Daniel Brooks, Silas Brooks, Paul Brooks, George F. Brooks, Elias Barrow, David Brooks; Joseph Brown, Captain during the war, fought at Bunker Hill and Saratoga, and received a ball at Bunker Hill, which lodged in his body and was afterwards skillfully extracted and Brown shot it back at Saratoga; Stephen Chaffin; Elias Chaffin, died in 1832, aged 77; David Chaffin, Simon Chaffin, John Chaffin; Francis Chaffin, alarmed Joseph Reed, went into Continental army and died of small-pox; Robert Chaffin, Esq., Robert's father, died 1828, aged 76; John Cole, William Cutting, Silas Conant, Josiah Davis (Isaac's brother), Stephen Davis, Jonas Davis, James Davis, Ephraim Davis, A. C. Davis, Samuel Davis, Amos Davis; Daniel Davis, Captain, and father to Ebenezer, was at the taking of Burgoyne; Flint Davis; John Dexter, brother to Timothy; Ephraim Dudley; Thomas Derby, killed in battle; Col. John Edwards, Nathaniel Edwards, John Faulkner, A. Faulkner, Nathaniel Faulkner; Col. Francis Faulkner, at the taking of Burgoyne, and was Col., grandfather to Col. Winthrop E. Faulkner; James Faulkner, Ephraim Forbush, Samuel Fitch; James Fletcher, father to Dea. John Fletcher, took part in the Concord fight at sixteen years of age, as a volunteer in Davis's company, afterwards enlisted and served through the war, and died, from the fall of a tree, at 53, without pay and before pensions; Peter Fletcher, Jonas Fletcher, Col. Joseph Fletcher, Daniel Henry Flint, Samuel Fitch, Jude Gilbert; Titus Hayward, colored man, hired by Simon Tuttle; Simon Hayward; Dea. Samuel Hayward, father of Jonas; James Hayward, killed, acted as volunteer in Davis's company; Samuel Hayward, Jr., Josiah Hayward, sons of Samuel; Stephen Hayward, father of Hon. Steven Hayward; Ephraim Hapgood, father of Nathaniel; John Hapgood, John Hapgood, Jr.; Jonathan Hosmer, Esq., Simon's father, died in the army; Abraham Hapgood, father of James; Col. John Heald, father of John H.; Ephraim Hosmer; Samuel Hosmer, father of Dea. Silas Hosmer; Simon Hunt, Lieut., commanding West Company of common militia from Acton, Capt. Faulkner

having been promoted to be Major; lived on Bright place; Captain in the war; a good officer; Jonas Hunt; John Hunt, his brother, on Coffin place; Paul Hunt, son of Simon; Nathan Hunt, son of Capt. Simon; Simon Hunt, Jr., son of Capt. Simon; Oliver Houghton, Jonas Heald, Israel Heald, Titus Law, Thomas Law, Stephen Law, Jr., John Litchfield, John Lumpson; Aaron Jones, father to Capt. Abel; Oliver Jones, Samuel Jones, Jonas Munroe, Nathan Marsh, Thomas Noyes (Lieut.), Josiah Noyes, John Oliver, Abel Proctor; Samuel Piper, at Ticonderoga in 1776; Samuel Pailin, Asa Pailin, Esq., Nathan Pailin, Josiah Parker, Jonas Parker, John Prescott; Benj. Prescott, Jos. Robbins, Captain of East Company, lived near old graveyard; Joseph Robbins 2d, also Captain; George Robbins, John Robbins, John Robbins, Jr., Jonathan Robbins, Philip Robbins, Robert Robbins, Ephraim Robbins, James Russell (Captain in the French War), Amos Russell, Moses Richardson, Jonas Shepherd, James Shurland; Samuel Temple, served during the war, a very good soldier, died 1826, aged 71; Samuel Tuttle; Simon Tuttle, Esq., Francis' grandfather; Eleazer Sawtell; Edward Wetherbee, Edward's father, gave the alarm up to Simon Tuttle's road to Littleton; was at the taking of Burgoyne; Oliver Wetherbee, Ammi Wetherbee, Roger Wheeler, Thomas Wheeler, Sampson Wheeler, Ezra Wheeler, Hozekiah Wheeler, John Proctor Wheeler, Oliver Wheeler, Timothy Wheeler, Samuel Wheeler, Jude Wheeler, John Wheeler, Daniel White, Mark White, Ebenezer White, Moses Woods, Abraham Young, Samuel Wright, John Willey, Lemuel Whitely, Nehemiah Wheeler.

The list is, no doubt, incomplete. Probably forty or fifty more names ought to be added; here are one hundred and eighty one.

JAMES T. WOODBURY.

Supplies were furnished for the army as needed and called for.

Revolution Items.—Samuel Hosmer, father of Deacon Silas, was in the Revolution. He went down to Rhode Island, lived upon horse flesh and berries. He was a born fisherman.

Ezekiel Davis, a soldier of the Revolution, brother of Captain Isaac Davis, in his company. Wounded in the hat at the Concord fight. Died February 15, 1820, aged sixty-eight.

John Cole, captain in Colonel Robinson's regiment; served in Rhode Island from July, 1777, to January 1, 1778.

Simon Hunt, captain in Third Regiment Militia.

Benjamin Brabrook, second lieutenant; died January 14, 1827, eighty-five years, six months.

Thomas B. Darby, killed at battle of White Plains, 1776.

Fifteen Acton men were in that battle.

East Acton Company: Captain, Joseph Robbins; Israel Heald, first lieutenant; Robert Chaffin, second lieutenant.

Littleton, February 19, 1776.—Jonathan Fletcher was a minute-man at Lexington, April 19, 1775. He enlisted in Captain Abijah Wyman's company, William Prescott's regiment. He was at the battle of Bunker Hill, at which Colonel Prescott's regiment suffered such severe loss of life. At the siege of Boston, on Winter Hill, January, 1776, as fifer from Acton. He was lieutenant and captain until the close of the war—five years. Eighteen years old when enlisted. Son of Major Daniel.

Colonel Francis Faulkner and Captain Simon Hunt were in the battle of White Plains, Colonel Eleazer Brooks' regiment; behaved finely on this occasion.

Ralph Waldo Emerson's Address.—At the second centennial anniversary of the incorporation of the

town of Concord, September 12, 1835, ten of the surviving veterans who were in arms at the Bridge on the 19th of April, 1775, honored the festival with their presence; four of the ten were from Acton—Thomas Thorp, Solomon Smith, John Oliver, Aaron Jones. Ralph Waldo Emerson, the orator of that day, thus speaks of these men :

"The presence of these aged men, who were in arms on that day, seems to bring us nearer to it. The benignant Providence which has prolonged their lives to this hour, gratifies the strong curiosity of the new generation. The Pilgrims are gone; but we see what manner of persons they were who stood in the worst perils of the Revolution. We hold by the hand the last of the invincible men of old, and confirm from living lips the sealed records of time. And you, my fathers, whom God and the history of your country have ennobled, may well bear a chief part in keeping this peaceful birthday of our town. You are indeed extraordinary heroes. If ever men in arms had a spotless cause, you had. You have fought a good fight. And having quit you like men in the battle, you have quit yourselves like men in your virtuous families, in your corn-fields, and in society.

"We will not hide your honorable gray hairs under perishing laurel leaves, but the eye of affection and veneration follows you. You are set apart, and forever, for the esteem and gratitude of the human race. To you belongs a better badge than stars and ribbons. This prospering country is your ornament, and this expanding nation is multiplying your praise with millions of tongues."

THE FRENCH AND INDIAN WAR.—Acton has preserved its record as a gunpowder settlement from the start. Before its separate organization as a town, during the Colonial period, there are proofs which show its preparations for self-defence, in case of attack from the Indians or any other foes. After that date the town records show the same. March 21, 1744, the town voted to procure powder and bullets as a town stock. At a later date the town voted to replenish the stock of ammunition.

The town had an important part in "the French and Indian War," 1756-63.

There is a tradition that Captain Gershom Davis led out a company from Acton in 1759, and that Captain J. Robbins led another company four years later near the close of the war.

Major Daniel Fletcher was born within the present territorial limits of Acton, October 18, 1718. He was a lieutenant in Captain David Melvin's company from March to September in 1747, and was stationed at Northfield. He was a captain of a company of foot in his Majesty's Service, in a regiment raised by the Province of Massachusetts Bay for the reduction of Canada, whereof Ebenezer Nichols, Esq., was colonel, in which expedition he was wounded and taken prisoner. Enlisted as captain March 13, 1758, to November 28, 1758. He was captain in Colonel Frye's

regiment, and in the service in the Province of Nova Scotia, after the 1st of January, 1760, and at the time of their discharge.

In 1768 he was a member of the House of Representatives of His Majesty's Province of the Massachusetts Bay in New England. On June 26, 1776, he was elected by ballot by the Massachusetts Assembly, major for the Third Battalion destined to Canada. He died in the fifty-ninth year of his age. See his epitaph in the record of Woodlawn Cemetery. He had nine children, all born in Acton,—Daniel, Charles (died young), Peter, Sarah, Ruth, Joseph, Charles, Jonathan. His oldest son, Daniel, married Ann Bacon, of Acton, September 11, 1760. They had one child, Ann, born November 12, 1769, married May 27, 1788, to James Law. Peter married Martha Farrar, of Acton, and they had several children. Ruth married Joseph Barker, and they had several children. Joseph married Abigail Bacon, of Lincoln, Massachusetts.

THE SECOND MEETING-HOUSE.—The town had much difficulty in locating this house. At one time they voted to build at the junction of the road leading from West Acton with the road leading from Ensign Josiah Noyes to Moses Richardson, near a flat rock at that point, supposed to be the one lying east of the Puddle hole, on Joseph Reed's land, and west of Francis Barker's, now occupied by Mr. Maurice Lane.

This vote was afterwards reconsidered, and they finally left it to a committee to decide, consisting of Joseph B. Varnum, of Dracut, John Whitney, of Lancaster, and Walter McFarland, of Hopkington. The committee decided that the house ought to stand upon the site now occupied by the present town-house.

Their report was accepted by a vote of 73 to 59. After the house was located it was thought best to have it face a Common, and for this purpose the following purchases of land were made: Of Deacon Joseph Brabrook, 25 rods at \$200 per acre, \$31.40; of John White, a little over an acre, Mr. White to remove his house and fruit trees, \$460; of Paul Brooks, one-half acre and 27 rods, \$80.40. In addition to these the following gifts of land were made to the town: By James Fletcher, father of Deacon John, 9 rods; Samuel and James Jones, 1 acre and 27 rods. The town seems to have been especially indebted to him for its Common. He was a prominent man at that time and represented the town in the General Court that year, and he was doubtless a moving spirit in the matter. He was a lawyer, and had an office in the north end of the house lately occupied by A. L. Noyes, of the Monument House. He built and resided in the house now the home of Rev. F. P. Wood. He constructed a turnpike over the hill by his house upon the elevation of land over which it passed, but he became financially embarrassed and left for New Orleans to escape imprisonment for debt.

In connection with the building of the second meeting-house was the following vote:—"At a meeting, November 3, 1806, it was propounded whether the committee shall at the sale of the pews give the people any spirituous liquors at the expense of the town—passed in the negative." This prohibition idea seems to be no new notion in the history of the town:

"September 4, 1812.

"To know if the town will provide any refreshments for the companies in this town on muster day, and pass any vote or votes the town may think proper upon the above article.

"Voted to provide some refreshments for the companies on muster day.

"Voted to raise forty-six dollars.

"Voted to choose a com. to provide the following: 200 w. beef; 50 D. O. cheese; 3 bushel of meal made into bread; 2 D. O. potatoes; 200 pickles; 10 gallons of W. I. Rum."

This muster was to be on Acton Common, September 1, 1806. The town voted to choose a committee of five persons to make a draft of such a meeting-house as they shall think proper for the accommodation of the inhabitants, and report to the town at that next meeting. Voted to choose said committee by ballot. The following persons were elected for the purpose: Aaron Jones, David Barnard, Winthrop Faulkner, Phineas Wheeler, Captain David Davis. The dimensions of the building subsequently reported by this committee were fifty-seven feet long and fifty-five wide, with a projection of fifteen feet in front. Voted, to accept and build the meeting-house as reported. Voted, to build the year ensuing and have said house finished January 1, 1808. Voted, that the committee who drafted the plan be the committee to have charge of the building.

It was for the times a generous appropriation, and the structure was successfully completed and was universally admired as a model in its design. It had an elevated tower for the belfry and above the belfry another ornamental circular story, supported by high posts, with a circular and graceful roof, rising from whose centre projected the elevated iron shaft for the support of the vane.

The internal arrangements were in harmony—a spacious vestibule, with three doors from the outside and the same from within; square pews, with rising seats; an elevated pulpit, approached by long, winding steps on either side; a gallery, high and ranging on three sides, curving in front; a ceiling, high and arched overhead.

The artistic effect from within on the Sabbath, when the whole town was supposed to be present, and the great choir joined with the pastor in giving effect to the service in prayer and song, and all the congregation stood with reverent mien, was impressive to any one participating. The Sabbath in those days had an interest, civil, social and religious, beyond the ordinary routine of later dates.

The sacrifices made in constructing this costly temple intensified the appreciation by the people of its beauty and its uses. There was timber enough in this building to construct a good-sized village,

spread lightly around according to modern style. It was of the best quality and furnished in lavish abundance.

The first bell, which was mounted high up in the tower, cost \$570, and when it swung out its peals on Sabbath morn it was a missive to all the households in the town. It meant business as well as worship to get all things in readiness and reach the steps of the church before the last stroke of the tolling bell.

There must have been at one time at least thirty horse-sheds ranged in lines in the rear of the building and giving an impressive outlook to its surroundings, especially on the Sabbath and town-meeting days, when they would all be occupied.

John C. Park, Esq., grandson of Parson Adams, writes to Hon. John Fletcher from Boston, February 6, 1874, acknowledging the receipt of the *Acton Monitor*: "Some of the happiest days of my childhood were spent at Acton, and many pleasant memories are revived. I must come and see for myself, for I cannot realize the burning of gas in a village where I helped my grandmother and aunt to make 'dips.' Speaking of Hosmer, one of my earliest recollections is my childish admiration of the great 'H,' a silver-plated letter on the back of the chaire which brought Deacon Hosmer to meeting. Do you remember it? Do you remember how we used to turn up the seats for prayer in the old church, and the clatter it made letting them down at the close, and how one naughty little boy (John C. Park) used to keep his to the last?"

Persons connected with this church so far as obtained: Deacons: Simon Hunt, Benjamin Hayward, Josiah Noyes, John Wheeler, John White, Phineas Wheeler, Daniel Fletcher Barker, Silas Hosmer, John White 2d.

Pew-holders (left body pews): Mrs. Simeon Hayward, David Barnard, Esq., Stevens Hayward, Esq., Deacon John White, Luther Conant.

Right body pews: Simon Hosmer, Esq., Silas Holden, Levi Waitt, Deacon Benjamin Hayward, Seth Brooks.

Choristers: Winthrop Faulkner, Silas Jones, Luther B. Jones, Daniel Jones.

Players on musical instruments: Bass viol, Jonathan Billing, Abraham B. Handley; double bass viol, Eben Davis; violin, Winthrop E. Faulkner, Henry Skinner; clarionet, Elnathan Jones, Samuel Hosmer.

Singers: Polly Davis, Ellen Jones, Lucy J. Jones, Abigail Jones, Jerusha Brooks, Ann Piper, Captain Abel Jones, Simon Davis, Seth Davis, Benjamin Wild, Amasa Wild, Edward Wetherbee, Oliver Wetherbee, Jedidiah Tuttle, Rebecca Davis, Susan Davis, Catharine Wetherbee, Lucinda Wetherbee, Polly Wetherbee, Susan Piper, Lucinda Piper, Mary Faulkner, Charlotte Faulkner, Catharine Faulkner, Susan Faulkner, Clarissa Jones, Amasa Davis, Jessie Pierce, Fria Foster, Abden Fuller, Jonathan Piper, Dr. Harris Cowdry.

Rev. Mr. Adams, the second minister, enjoyed the advantages of this spacious and elegant church during the last eleven years of his pastorate and of his life; Rev. Mr. Shedd during the eleven years of his pastorate. The building stood for over fifty years as an attractive centre for civil and religious uses. By the decision of the courts the building came into the possession of the First Parish, and this parish deeded it to the town June 4, 1859.

In the great fire of November, 1862, which took in the barn of the hotel and which consumed the hotel, the tailor's shop building, occupied by Samuel Despean as a tailor-shop and by Daniel Jones as a store, the shoe factory of John Fletcher & Sons, and threatened at one time the whole village; a blazing shingle was wafted on high across the Common and struck the highest roof of the church tower, became fixed and soon ignited the steeple. The people below stood helpless and appalled, as nothing could be done to stay the raging flames. The whole building with all its massive timbers were in one brief hour a heap of smouldering ashes. This earthly structure went up as in a chariot of fire and was translated to the third heavens by the order of Him to whom it was originally dedicated. The building has gone, but its memories of pastor and choir and congregation abide.

WILLIAM D. TUTTLE.—The time when the very first settlements were made on the present territory of Acton is a matter of some uncertainty. It is evident from the town records that the town was pretty well settled over at the date of its incorporation. People were living in all parts of it at that time. The Indians had withdrawn to other hunting-grounds, and had ceased to be a cause of fear or annoyance.

The first public enterprise was the building of a meeting-house for public worship, being one of the conditions of the act of incorporation, and the next was to construct roads by which the people could get to it.

These were little more than bridle-paths cut through the forest from one homestead to another and connecting them all more or less directly with the meeting-house and the mills. That it was the day of humble beginning and of many privations and hardships we can well believe.

For lack of bridges, streams were crossed at what were called ford-ways. Forests were to be felled, houses to be erected, fences to be built, which required the strong arms of a sturdy race of men. Life was real and earnest to the men and women of that time. If their home life was barren of many of the luxuries and conveniences of modern days, there was in it a large element of downright sincerity, hearty good cheer and mutual helpfulness.

The church was then the centre of the social as well as the religious life of the people. It must have been an interesting sight to see the people on Sunday coming up from all parts of the town on horseback or on foot, for carriages, whether spring or otherwise,

were not yet, to attend divine service at the ancient church.

It was here that neighborly courtesies were exercised, mutual acquaintances and friendship formed, many of which developed in after years into more intimate relations. The town-meeting—that nursery of statesmen—was also another of the educators of those days. Four or five times in a year did the inhabitants come together as a body to discuss their local affairs, to choose their town officers and to make regulations for their mutual welfare. If any one had a grievance, if his taxes pressed too heavily, if his accommodations in the way of roads were insufficient—whatever might be the cause of his complaint, here was a tribunal of his peers, where he could be heard and where justice was usually done.

From its first settlement to the present time Acton has been mainly an agricultural town. The first settlers depended for their livelihood on what they could get from the soil and from what grew above it. They had cattle, horses, sheep and hogs, the latter being permitted for many years to run at large and pick up their living in the woods.

Their agriculture was a varied one; money was scarce and hard to get. Everything that could contribute to the support and sustenance of a family was included in the farmer's course of husbandry. Wool, flax, Indian corn, rye, oats, beans, turnips, beef, pork and the products of the dairy were the principal products raised. Clothing was largely of home manufacture and the noise of the spinning-wheel and loom was heard in every well-appointed household.

They had plenty of apples, all natural fruit (the finer varieties being of later introduction), and nearly all the large farms had a cider-mill, which was kept busy during the months of October and November in producing a beverage all too common in those days.

From a census return made in 1790, it appears that no large number of cattle and horses was kept compared with what is usual at present, and but little English hay cut; the natural meadows being relied upon to a great extent for the supply of hay for stock.

Coming down to a later time, to the year 1800, a period of sixty-five years, we find the town's people in comparatively easy circumstances. Many had accumulated a fair estate for those times. More pretentious houses were erected and an era of general prosperity seems to have dawned.

In 1807 the town built the second meeting-house at an expense of nearly or quite \$10,000, paid for by the sale of pews and a town tax of \$1151, all of which was accomplished without apparent difficulty.

The manufacture of bellows was carried on extensively by Ebenezer Davis, senior and junior, for many years in the east part of the town.

A large and well-appointed flour and grain mill was erected on an ancient mill site by Daniel Wetherbee, in 1840, which, under the management of himself and son, has continued to the present time.

The pencil manufactory of Henry M. Smith, East Acton, was built in 1848, by Ebenezer Davis, Esq., and has been occupied successively since that time by Benjamin Davis, sash and blind manufactory; by William Schouler, print works; by A. G. Fay as pencil manufactory, and by its present occupant also in the manufacture of lead-pencils.

Among the various industries pursued for many years in the early part of the century, was the coo-pering business, from fifteen to twenty thousand barrels annually having been manufactured. The little coo-per-shops, so numerous in all parts of the town, in which many of the inhabitants found employment in the winter season, is conclusive proof that the business was a source of very considerable income.

The indenture of Gill Piper March 25, 1790, copied from the town papers is here inserted as a specimen of the times and the business then popular.

THE INDENTURE OF GILL PIPER.

March 25, 1790.

This indenture witnesseth, That Francis Faulkner, Aaron Jones and Jonas Heald, Selectmen of the town of Acton, Mass., Middlesex Co., put and bind Gill Piper, a minor, now under the care of the Selectmen aforesaid, unto Paul Hunt, and Betsey, his wife, to learn the coo-per's trade; after the manner of an apprentice to dwell and serve from the date hereof until he, the said Gill Piper, shall arrive to the age of 21 years; during all which term the said Gill, his said Master and Mistress worthily and faithfully shall serve, their secrets keep close, their Lawful and reasonable commands Readily obey and perform; damage to his said Master and Mistress he shall not do, or suffer to be done by others without informing his said Master or Mistress of the same; tavern he shall not frequent; at cards, dice, or any other unlawful game he shall not play; matrimony he shall not contract, or fornication commit with any person; but in all things behave himself as a good and faithful apprentice until his fulfilment of his years or term above mentioned; and the said Paul Hunt, for himself and his heirs, do covenant, promise and agree with the said Francis Faulkner, Aaron Jones, and Jonas Heald, selectmen of the said town of Acton, and their successors in said trust, in this manner following, that is to say, that said Paul Hunt will teach or cause to be taught the said Gill Piper to read and write and cipher (if capable to learn) by giving him one month's schooling in each of the first two years of his service and one month in the last two years of his service, and will find and provide for the same Gill Piper good and sufficient meat, drink, washing and lodging, and also sufficient apparel suitable for one of his degree and calling, during the said term, and at the end of said term to dismiss the said Gill Piper with two good suits of Apparel, one suitable for Sabbath days, the other for working days. In witness whereof, the parties set their hands and seals to this indenture, the 22d day of March, 1790.

(Signed)

PAUL HUNT.

FRANCIS FAULKNER.

AARON JONES.

JONAS HEALD.

Signed, sealed and delivered in the presence of

JOSEPH BAKER, JR.,

JOHN F. BROOKS.

Middlesex, ss:

March ye 25th, 1790.

The above indenture considered and approved of by

SILAS TAYLOR,

FRANCIS FAULKNER,

two Justices of Peace.

Gill Piper has not been heard from since so far as the town records go. We may infer with this start in life, that he became a worthy citizen. Nothing to the contrary has come to eye or ear.

Many hop kilns were erected, but in a few years the prices received were so fluctuating and unsatisfactory as to deter many from embarking in it and the busi-

ness at length became so unremunerative that their culture was abandoned altogether.

CENTRE VILLAGE.—Previous to the time of the building of the second meeting-house there was no considerable village in the town. There were, at that time a very few dwelling houses in the Centre, probably not more than a scant half-dozen in all. At this time there was, beside the first meeting-house, the old tavern, kept by Daniel Brooks, his widow Caroline and his son Paul, and afterwards occupied by Nathaniel Stearns; the well-known parsonage built by Moses Adams, sometimes called the Bullard place; the house of Benjamin Brabrook, situated a little easterly from the residence of Edward Tuttle; the house of John White, blacksmith, a little westerly of the present town-house; a cottage-house, where Francis Hosmer now lives, and one where Eddie F. Conant resides.

The building of the second meeting-house gave an impetus to building operations in this village; and about this time, 1807, the tavern first occupied by Henry Durant, afterward by Silas Jones, for many years and others later, was built, as also the house now occupied by T. F. Noyes; L. B. Jones' house now occupied by Rev. F. P. Wood; one on the site of that occupied by William D. Tuttle; one by John and James Fletcher, lately removed to make room for the Memorial Library. The house so long occupied by Stephen Weston, now occupied by John F. Davis, and the Cyrus Dole house now occupied by J. E. Cutter and the Edward Tuttle house.

The large mansion west of the town-house, long the residence of Hon. Stevens Hayward, was built about this time by Doctor Peter Goodknow. A store was kept on the site of the library building by James and John Fletcher, which was burnt. At a later date the store now occupied by M. E. Taylor, was built and kept by Joseph W. Tuttle, Francis Tuttle, James Tuttle, Rufus Holden, Daniel Jones, J. E. Cutter and many others, almost continuously to the present time. Samuel Jones, Esq., had a law-office for a short time where the house of A. L. Noyes stands. Samuel Jones, Sr., married the widow of Captain Isaac Davis, and resided on the place now occupied by Rev. F. P. Wood. To his public spirit we are largely indebted for Acton's beautiful Common.

In 1806 the town bought of Captain Paul Brooks 197 square rods of land at the east end of the Common, and in 1807, of John White 154 rods, northerly and westerly of the second meeting-house.

In 1806 Samuel Jones, Esq., in consideration of the good-will and respect he had for the inhabitants of Acton, deeded to the town about one and a quarter acres of land extending along the south side of the present Common, from near the house of A. L. Noyes to the house of Luke Smith, to be used as a town-common. The town also purchased of Joseph Brabrook thirty-one rods of land in 1808, on the north-erly side of the Common, extending from the Robert Chaffin place to the town-house.

At this time there were not so many houses where the thriving villages of West and South Acton now stand. The latter was universally called Mill Corner, and had three dwelling-houses within a radius of a quarter of a mile, the Ammirubamah Faulkner House, the tavern and store owned and occupied by Samuel Jones and his son Captain Aaron, the cottage-house, nestled under the hill owned by Captain Abel Jones, a son of Aaron; and the mills consisting of a saw and grist-mill and a fulling-mill, where cloth was dressed and fullled. Many now living can remember the time when these, with a few out-buildings, were all that made up the village of Mill Corner.

Where the enterprising village of West Acton now stands there was less in the way of building and business. Bradley Stone built the brick house on the corner in the centre of the village. He established a blacksmith and wheelwright-shop, near where the house of Varnum B. Mead now stands, and carried on the business for some years. He also built the first store in West Acton, which was first opened by Sidney and Henry Bull, and afterwards kept by Burbeck & Tenney.

The building of the Fitchburg Railroad, in 1844, marks an important era in the history of the town. Entering the limits of the town at the southeast corner and passing westerly and northerly through the south and west parts of the town, a sudden impetus was given to the growth of these villages, which has continued ever since.

Before this time a communication with our commercial metropolis, Boston, was slow and difficult. The country trader's merchandise had to be hauled by means of ox or horse-teams from the city. Lines of stage-coaches indeed radiated in all directions from the city for the conveyance of passengers, but so much time was consumed in going and returning by this conveyance that a stop over night was absolutely necessary if any business was to be done.

Instead of being whirled rapidly in an hour's time or less into Boston, and having ample time for the transaction of business and returning at night with equal ease and rapidity to our homes, a visit to Boston before the era of the railroad was something to be planned as a matter of serious concern. All the internal commerce between city and country necessitated stage-coaches and teams of every description, and on all the main lines of road might be seen long lines of four and eight-horse teams conveying merchandise to and from the city.

As a matter of necessity, taverns and hostleries were numerous and generally well patronized. Thus in the east part of Acton, on the road leading from Boston to Keene, there were no less than four or five houses of public entertainment. With the advent of railroads all this changed. The Fitchburg Railroad was completed to West Acton in the autumn of 1844, and that village became a distributing point for the delivery of goods destined for more remote points above.

Two names may be mentioned in connection with the location of this road through the limits of this town,—Colonel Winthrop E. Faulkner, of South Acton, and Bradley Stone, of West Acton.

Public-spirited and powerfully impressed with the importance of securing the location of the road through their respective villages, they labored untiringly until this was secured, positively and beyond a doubt. No personal effort was spared and no obstacle was suffered to stand in the way, until the coveted end was gained. Who will say that their ambition was not a worthy one, and has not been amply justified?

The April meeting warrant for 1840 contained this article: "To see if the town will take measures to have trees set out on the Common." On this article the town granted leave to set trees on the Common, and chose a committee of seven to say where they shall be placed. Francis Tuttle, John Fletcher, Winthrop E. Faulkner, John White, Nathan Brooks, Simon Tuttle and Rufus Holden were appointed as this committee.

The said trees were to consist of rock maple, button-wood, elm and white ash. As the result of this action of the town, the committee extended a general invitation to all the inhabitants to bring in suitable trees for transplanting, of the kinds mentioned, on the 19th of April. As the 19th came on Sunday that year, the trees were set on the following day under the direction of the committee. The people responded nobly, and from all parts of the town the citizens came into the village on the morning of the 20th loaded with trees; nearly all lived and grew well. Most of the rock maples were set out at a later date, 1859.

Our notice of the village of the Centre would be incomplete without the mention of the name of one prominent in the business history of the town for years. John Fletcher, at first a country trader in a small way, began the manufacture of boots and shoes in 1815. Finding a ready sale for his goods, he continued to enlarge his manufacturing facilities until his boots and shoes were well and creditably known far and wide. He associated his two sons, John and Edwin, with him under the firm-name of John Fletcher & Sons. The firm did a successful business for many years.

THE GREAT FIRE.—In the evening of Oct. 24, 1862, occurred the greatest fire Acton has ever known. Beginning at the stable near the hotel, the shoe manufactory of John Fletcher & Sons, the hotel, and store occupied by Daniel Jones, and finally the town hall, formerly the meeting-house, built in 1807, all were in a short time consumed.

The incendiary had done his work but too well, and had left, as he had threatened, a black mark in the Centre Village. Looking over the scene of desolation, it seemed as though the place was doomed to extinction. Good friends, however, came to the rescue. In

the November warrant for town-meeting an article was inserted to see what action the town will take in regard to building a new town-house. At this meeting it was voted to choose a committee of six persons, one from each school district, to obtain plans, specifications and estimates to report at a future meeting.

On Tuesday, the 2d day of December, another meeting was called to hear the report of the committee. At this meeting it was voted not to build a town-house. Another meeting was called on the 15th of the same month. In the warrant was inserted the following: "To see if the town will build a house suitable for a town hall and armory for the Davis Guards."

At this meeting it was voted that when the town build a town-house it be built on the spot where the old one stood. Also voted to choose a committee of seven, by ballot, with full powers to build a town-house with an armory in it suitable for the town within the next twelve months. This committee consisted of Daniel Wetherbee, Samuel Hosmer, James Tuttle, Cyrus Fletcher, David M. Handley, Artemas M. Rowell and Luther Conant.

This was erected the next year, as also the large shoe manufactory of John Fletcher and a new hotel by John E. Cutter. Thus, in a measure, was replaced Acton's great loss by fire.

Among other noted residents of the village for many years was Jonas Blodgett, blacksmith and auctioneer. He came to Acton about the year 1830, and carried on his trade until failing health and eyesight obliged him to retire.

WEST ACTON.—The brick house on the corner was built by Bradley Stone. He also built the first store at the corner in 1837, where Mead Brothers are now, occupied formerly by Burbeck & Tenney, then Sidney and Henry Ball.

In 1858 Charles Robinson moved that building to where it now stands, occupied by George Conant, blaine manufactory, and built the present store. The hall now used by Isaac Davis' Grand Army Post was built by Mr. Robinson for the use of the Universalist Society, and was used by it for ten years.

The first meat market was opened by John R. Houghton under the tin-shop of L. M. Holt, and was occupied by him until he built his present market. A blacksmith-shop was built by Bradley Stone where the house of V. B. Mead now stands. When this was burned he built a new shop near the site of the old one, and where it now stands, occupied by Samuel A. Guilford. The shop was run for awhile by Enoch Hall, who in 1865 transformed a barn standing near it into the present wheelwright-shop of Herbert F. Clark.

The New England Vise Company in 1868 erected a building for its business which proved unsuccessful. The Butter and Cheese Factory Company was incorporated about 1873, and ran three or four years.

This venture proved unprofitable, and the building erected for the company is now occupied by William H. Lawrence, blacksmith, and Waldo Littlefield, carriage manufacturer.

A part of the ground now occupied by the refrigerator and apple-house of A. & O. Mead & Co. was a building put up by the West Acton Steam Mill Company in 1848, which was burned in 1852, and, as the business had not been satisfactory, was not rebuilt. The building for the manufacture of overalls and clothing was put up by Charles H. Taylor in 1886.

Soon after the railroad was built through West Acton a tin-shop was built by Henderson Rowell, who occupied it until his death, in 1860. Since then it has been carried on by various persons in the same place, and is now run by Lorenzo M. Holt, who does a large and increasing business.

About 1858 a shoemaker's-shop was built, and was occupied by Oliver C. Wyman until his death, in 1885. The business since then has been carried on by William Mott.

In 1845 Shepley & Davis built a house, which was occupied by a Mr. Page and called Page's Tavern. After a few years it was purchased by Adelbert and Oliver Mead, and reoccupied by them for a dwelling-house a number of years. Since then it has been occupied by various tenants.

In 1848 Dr. Reuben Green opened an office. In 1852 he was bought out by Dr. Isaiah Hutchins, who still occupies the building erected by Dr. Green. In 1848 a post-office was opened in Dr. Green's office, in which building it remained until Dr. Hutchins, in 1854, resigned, whereupon it was transferred to the store, where it remained until the Cleveland administration, when Hanson Littlefield became postmaster, and the office was removed to his store. In 1889 Charles B. Stone, the present incumbent, was reappointed, and removed the office to the room specially built for it.

The grain and grist-mill and cider-mill of E. C. Parker & Co. was built in 1868, burned in 1869 and rebuilt in 1870. The cigar-factory of Frank R. Knowlton was over the store of Hanson Littlefield until the new factory was built in 1889.

Tubs and Pails.—B. F. Taft began the manufacture in the building and was succeeded by Samuel Sargent. Sargent was succeeded by Enoch Hall, who, with his sons, now carry on the business. The business has become an important source of thrift. It was started seventeen years ago and has been steadily increasing.

The lumbering business has been introduced and enlarged; wood lots and farms have been bought in the neighboring towns with reference to the lumber supply. Tubs, chnrs and pails are manufactured in large quantities and sent for market in all directions, as far as Australia, South America, California and Europe. Twenty-five men are employed through the year, with extra help in the winter. Estimated average sales per year, \$50,000.

¹ Items furnished by A. A. Wyniau, Esq.

Mrs. John Hapgood, the mother of Mrs. Nash, a few weeks before her death, when enjoying unusual clearness of mind, though over eighty years old, wrote out carefully these items from her own personal recollections, and the original copy in her handwriting is now with the town clerk. The statements have since been corroborated by Deacon Samuel Hosmer, over eighty-six years old, whose memory is quite clear and retentive.

H. A. Gould's Place.—Deacon Jonathan Hosmer was the first settler on the place that is now owned by Mr. Gould; he had four sons—Jonathan, Stephen, Abner and Jonas. Abner was the one that fell, April 19, 1775, at Concord Bridge, with Captain Davis. I remember of hearing my aunt Sarah Hosmer, sister of N. D. Hosmer and wife of Samuel Hosmer, when she was very young, say that her grandfather went out to see if he could hear any news on that day, and when he returned he groaned when he passed their window to go into the front door. What sorrow was then experienced!

Stephen Hosmer, one of the sons of Deacon Jonathan Hosmer, settled on the homestead with his father (at Gould's place). His sons were three—Stephen, Nathan Davis and Jonathan. Nathan Davis Hosmer, son of Stephen Hosmer, bought the place, the homestead, and built the new house which is now occupied by Mr. Gould.

The old house was pretty large for those days, two front rooms with entry between, upright back part with two rooms below. The back chambers were low and unfinished.

Aaron Hosmer, son of Nathan D. Hosmer, had made arrangements to keep the place, the homestead, as his own; but he died a few months before his father died. If Aaron Hosmer had lived, the place would probably have been in the Hosmer name now, which would have been the fourth generation.

Jonathan Hosmer, son of Deacon Jonathan Hosmer, bought and settled on the place now occupied by Mr. Neil, the Simon Hosmer place. It is the first house beyond the Kelley place toward Acton Centre. He had but one son, Simon Hosmer, Esq. He bought the place and lived there most of his lifetime. Afterwards it went into other hands. Francis Tuttle owned it at one time.

Noyes & Barker Place.—Ephraim Hosmer owned the farm that is now occupied by Noyes & Barker. He was a nephew of Deacon Jonathan Hosmer; he had a number of children, but buried two or three by the dreadful disease of malignant sore throat. My grandmother, Sarah Davis, wife of Stephen Hosmer, said that one of the girls told her she was hungry but she could not swallow—a terrible disease to get into a family. He had two sons that lived, Joel and Samuel, father of Deacon Silas Hosmer.

Joel kept the home place, but when the turnpike was being made, he thought it would be important to have a hotel or tavern, as it used to be called, and he

built the large house for that purpose now owned by Joseph Noyes and Joseph Barker; but custom failed, it did not meet his expectation, and after a few years the farm had to be sold, a very great disappointment to him and all of his family.

Frank Knowlton's Place.—Samuel Hosmer, brother to Joel Hosmer and son of Ephraim Hosmer, bought the place that Frank Knowlton now owns. He lived in a small house, but had quite a large barn. He was the father of Deacon Silas Hosmer, who succeeded his father on the home farm and built the large two-story house since remodeled by F. R. Knowlton, who is the husband of Emma, daughter of Deacon Silas Hosmer.

Handley Place.—Mr. John Tuttle owned that place in 1800 and was called a very wealthy man. It has been owned by many different persons since—Jacob Priest, Reuben Handley.

Isaac Reed's Place.—William Reed was the first owner of the farm, living there during his lifetime. Then his son William bought and lived there during his life. The present owner is his son, Isaac Reed.

Andrew Hapgood's Place.—It was owned by a widow Brooks. Ephraim Hapgood and Nathaniel Hapgood, two brothers, bought it of her, Ephraim keeping the old house and Nathaniel building a new one just above it. Ephraim Hapgood and Nathaniel Hapgood were sons of Ephraim Hapgood.

Ebenezer Smith's Place.—Mr. Smith bought the farm when he was quite a young man (do not remember the person); the house was an old one, but they lived in it a number of years, then built a new one; it was called nice in those days. After his death Edwin Parker owned it, living there several years, then sold it to the present owner, Amasa Knowlton.

Ephraim Hapgood's Farm.—Ephraim Hapgood thought it would be a good plan to go to Maine and take up a large tract of land and settle there, as he had several boys. Accordingly, one summer, he went to see about it. The next summer he took two of his sons and went to Maine, to a place called now Norridgewock, and worked all summer, intending to take his family the next year.

When the time came for them to start for home Ephraim, grandfather of Mrs. Nash, one of the sons, said he would walk home instead of going by water, and by that means saved his life, for the vessel was shipwrecked and the father and son were both drowned.

Ephraim Hapgood gave up all idea of going to Maine after the death of his father and brother, bought the home-place, took care of his mother, living there his lifetime. After his decease his two youngest sons, John and Benjamin Franklin, bought the farm, keeping it together several years. Then Benjamin F. bought out his brother John and lived there until his death. He was killed at the crossing of the Fitchburg Railroad, near Andrew Hapgood. Nathaniel Hapgood was also killed at the same time. The farm was afterwards bought by Cyrus Hapgood. He kept

it a few years then sold it to a Mr. Prescott. The house was burned not a great while afterwards. The land is now owned by individuals—only a small house upon it, owned by Mr. Blanchard, for the accommodation of hired help.

Simon Blanchard's Place.—Abraham Hapgood, brother of Ephraim Hapgood, and son of the one that was drowned, bought the place and lived there during his life.

James Hapgood, his only son, bought the place, keeping it several years, afterwards sold it to Alvin Raymond. He kept it a few years, then sold it to Mr. Jonathan Fletcher. After his death Simon Blanchard, the present owner, bought the place; married for his first wife Elizabeth Fletcher, daughter of Mr. Jonathan Fletcher.

Mr. Hager's Place.—Elias Chaffin lived on this place a number of years. The next owner was Jonathan B. Davis. He kept it a good many years, then sold it to the present owner, Mr. George Hager.

Leland Place.—It was the home of Captain Stevens Hayward, the father of Stevens Hayward, Esq. Mr. Hayward living there during his life, then his son Stevens owned it many years, afterwards he sold it to Benjamin Lentell. He lived there several years and sold it to Mr. Leland.

A. A. Haynes' Place.—It was the home of Deacon Benjamin Hayward. He had three sons—Moses, Aaron and Luke. Moses was accidentally shot by his own son. His home then was the late Cyrus Hayward's place. Apron Hayward after the death of his father settled on the homestead, but died when quite young.

Alden Fuller Place.—Nathaniel Faulkner in the olden time lived there; he owned the place; he had several sons. Nathaniel kept the home-place and lived there during his life. His daughter Sarah married Alden Fuller. He bought the home-place and lived there during his life.

Houghton Place.—Oliver Houghton bought that place, living in a very old house for a long time. There have been two houses built on that place, the low one built first. Levi Houghton succeeded his father and built the new house. Since his death George H. S. Houghton, a nephew, owns the farm and is living on it.

Mrs. Hapgood's Place was formerly owned by the Faulkners. A widow lived here who had three children. The son's name was Moses. There must have been two generations before it went into other hands. It has been owned by Brown and a Wilson. Daniel Wetherby bought it afterwards, then John Hapgood bought it.

Coffin Place.—Deacon John Hunt owned this farm for many years, for Mother Hapgood said (Molly Hunt, daughter of Deacon J. Hunt) when she was very small she remembered the 19th of April, and looked out of the window and saw James Hayward walking along as fast he could, with gun in his hand. He

seemed to be in a great hurry. It was the morning of the day he was killed in Lexington. Jotham Hunt, son of Deacon J. Hunt, became owner of the place, lived there many years, then sold it to Porter Reed. Afterwards it was owned by George Coffin.

James Hayward's Place.—Samuel Hosmer, brother of Deacon Silas Hosmer, built that house, occupying it several years. Some other families lived there before Mr. Hayward bought it. There was a Mr. Hayward, the father of Jonas Hayward, who died when he was a young man. Samuel Hayward owned the farm that William Reed owned and lived there during his life. It was the place that Joseph Cole carried on several years and died there two or three years ago.

James W. Wheeler Place.—The old house that stood near that elm-tree was owned by Samuel Wheeler. His son Nathan succeeded him and still occupied the old house during his life. James W. Wheeler, his son, after a few years bought the farm and built a new house, owned by Octavius Knowlton.

Elisha Cutler Place.—Deacon John Wheeler, brother of Samuel Wheeler, owned this farm, living there during his life. Joel Whitecomb owned it awhile.

Simon Hunt was a brother of Deacon John Hunt, and his home was what was called the Bright Place, the next house beyond the late Cyrus Hayward's place as you go towards Stowe.

A. & O. W. Mead & Co.—The history of this firm has such relations to Acton that a brief account of its record is here given.

O. W. Mead was born in Roxboro' Oct. 19, 1824. Worked on his father's farm until he was twenty-one years of age. His education was limited to the district school until of age. He afterwards attended academy in Lunenburg three terms, and taught school in Lunenburg and Littleton, one term each.

At twenty-three years of age he went into the marketing business with his brother Adelbert, and drove a horse team to Boston weekly with all kinds of produce.

He moved to West Acton in 1840, and there continued his business with his brother successfully, transporting their freight over the Fitchburg Railroad to Boston. In 1867 his brother Adelbert, Varnum B. and himself leased store No. 35, on North Market St., and carried on the produce business under the name of A. & O. W. Mead & Co. Their business has been varied and extensive to the present time.

Their lumbering interests in New Hampshire and Maine have been large, in cattle and lands in Iowa, Minnesota and Territories considerable.

They built in West Acton the first refrigerator for storing fruit—in this country—which proved very remunerative for many years.

The first house has been supplanted by several larger and more costly buildings.

The firm has expended large sums of money in West Acton in buildings and otherwise, which has done much towards the adornment and general pros-

perity of the village, and have always taken a lively interest in the welfare of the town of their adoption.

O. W. Mead was an active director in the American Powder-Mill for twenty years, has been intrusted with the settlement of several estates, three years a director in the Florida Midland Railroad, been one of the directors of the Board of Commerce, is now a director of the First National Bank of Ayer, one of the trustees of the North Middlesex Savings Bank, also president and manager of one of the largest herds of cattle in the Territory of Wyoming.

The business of this firm extends into millions yearly.

Their father's name was Nathaniel; their grandfather Deacon Oliver Mead. Their mother was Lucy Taylor, daughter of Capt. Oliver Taylor.

Luke Blanchard—He was born in Boxboro' Jan. 17, 1826, and lived there until he was twenty-four years of age.

He was the son of Simon, and moved into Acton in 1852. He married Jerusha M. Noyes April 8, 1858, and had the following children: Mary Florence, born Aug. 8, 1859, died in two years and four months; Anna Maria, born Oct. 7, 1862; Arthur F., born Jan. 21, 1864; Mary Alice, born Dec. 21, 1867, died Feb. 2, 1889.

He has been a prosperous business man, accumulating successfully through his own exertions. His business has been largely marketing and trading. His property is distributed in several towns, but his chief local interest has been for several years in West Acton.

He is grandson of Calvin Blanchard, who was at Bunker Hill, and helped build the breastworks preparatory to the fight, and was at the Concord fight April 19th.

He is the grandnephew of Luther Blanchard, who was the fifer at the Concord fight—in Capt. Davis' company—and a brother to Simon, grandson of Calvin.

HISTORICAL MAP OF ACTON.¹—Old road from Capt. Davis' house to 1st Meeting-House:

Capt. Isaac Davis, 1775; Joseph Brown, 1813; Ward S. Haskell, Nathaniel G. Brown, 1825; Charles H. Wheeler.

Rev. John Swift, 1740; Dea. Josiah Noyes, 1780; David Barnard, Esq., 1800; Josiah Keyes, Ehab Grimes, Jonathan W. Teele, Dea. W. W. Davis.

Captain Phineas Osgood, 1741; Edward Harrington, 1800; Thomas E. Lawrence, 1872; Rev. James T. Woodbury, Capt. Daniel Tuttle.

The old Parsonage;

Josiah Piper, 1735; Rev. Moses Adams, 1810; Rev. Marshall Shield, 1841, Isaac Bullard.

The old School-House north of the Parsonage, 1798:

The Centre Village.—Edward Tuttle, Joseph W. Tuttle, Charles Tuttle, Dea. Joseph Bradbrook.

First Store.—Dea. John and James Fletcher, his brother, Rev. James Fletcher, Memorial Library.

Peter Goodnow, M. D., Hon. Stevens Hayward, Mrs. Elizabeth Blood, Benjamin Wilde, Jr., Timothy Hartwell, Silas Jones.

Store.—Stephen Weston, John F. Davis.

James Jones, Widow Leighton, Dea. John Fletcher, Cyrus Dole, Henry M. Smith, John E. Cutter.

THE DAVIS MONUMENT—The citizens of Acton believing that the name of Captain Isaac Davis, the first officer who fell in the struggle for independence, and also the names of his two brave townsmen, Abner Hosmer and James Hayward—one of whom fell by his side on the famous 19th of April, 1775, at the old North Bridge in Concord, and the other in the pursuit at Lexington on the same day—were deserving of a better fame than history had usually awarded them, and a more commanding and enduring structure than ordinary slabs of slate to tell the story of their martyrdom and mark the spot where their dust reposes, passed the following vote at a large town-meeting bolden on the 11th November A.D. 1850.

“Voted, That the town of Acton erect a monument over Captain Isaac Davis, Hosmer and Hayward, and that their remains be taken up and put in some suitable place on Acton Common, if the friends of said Davis, Hosmer and Hayward are willing, and that the Selectmen and the three ministers in the town be a Committee to lay out what they shall think proper or petition Congress and the State Legislature for aid in erecting said monument.”

A petition for this object was presented to the Legislature early in the session by Rev. J. T. Woodbury.

The committee consisted of Ivory Keyes, Luther Conant, James Tuttle, selectmen; James T. Woodbury, Robert Stinson, Horace Richardson, ministers, in behalf of the town.

The joint committee of the Legislature or the Militia to whom this petition was referred, unanimously submitted a report in favor of the project. The matter was fully discussed, and after the eloquent address and appeal of Mr. Woodbury, the resolve was passed by a large majority.

Two thousand dollars were appropriated, to be joined by an appropriation of five hundred dollars by the

town of Acton, to be expended under the direction of the Governor, George S. Boutwell, and a joint committee of the town.

There was a difference of choice by the committee as to where on the Common the monument should stand. The decision was finally left with the Governor, who decided upon the present site, a spot not suggested by any one before, but which all agreed was just the place for it as soon as mentioned by the Governor.

Another question decided, was whether it should be made of rough or hewn granite. "Let it be of God's own granite," said Mr. Woodbury, "and let it be from the Acton quarry nearest to the site." Most of the granite was taken from the hill in the rear of Mr. Woodbury's residence, less than a mile from the Common to the north, and given by him for the purpose.

The model finally approved by the committee has been universally admired for its beauty, simplicity and impressiveness. It is seventy-five feet high; the top is four feet four inches square; a square shaft, reaching upward from a finely-proportioned arch on each side at its base. The base is fifteen feet wide, and extends eight feet into the earth, and is of good, split, heavy blocks of granite. Through the centre of the cap-stone projects upward a wooden flag-staff, twenty-five feet in length, from the top of which a flag is kept floating, at the expense of the town, on all public days of patriotic import.

In a panel on the side facing the main avenue the inscription reads as follows:

"The Commonwealth of Massachusetts and the town of Acton, co-operating to perpetuate the fame of their glorious deeds of patriotism, have erected this monument in honor of Capt. Isaac Davis and privates Abner Hosmer and James Hayward, citizen soldiers of Acton and Provincial Minute-men, who fell in Concord Fight, the 19th day of April, A.D. 1775.

"On the morning of that eventful day the Provincial officers held a council of war near the old North Bridge in Concord; and as they separated, Davis exclaimed, 'I haven't a man that is afraid to go!' and immediately marched his company from the left to the right of the line, and led in the first organized attack upon the troops of George III. in that memorable war, which, by the help of God, made the thirteen colonies independent of Great Britain and gave political being to the United States of America.

"Acton, April 19, 1851."

The old gravestones, which stood for seventy-five years to mark the resting-place of the three patriots in Woodlawn Cemetery, have been laid on the sides of the mound at the base of the monument. They are very ancient in appearance, and bear the following interesting inscriptions:

"MENENT MORO.

"Here lies the body of Mr. Abner Hosmer, who was killed at Concord April 19th 1775, in ye defence of ye just rights of his country, being in the twenty-first year of his age."

Hayward's is even more interesting, containing, in addition, this poetry:

"This monument may unborn ages tell
How brave young Hayward like a hero fell,
When fighting for his country's liberty
Was slain, and here his body now doth ly—
He and his foe were by each other slain,
His victim's blood with his ye earth did stain.

Upon ye field he was with victory crowned,
And yet must yield his breath upon that ground,
He expressed his hope in God before his death,
After his foe had yielded up his breath,
Oh, may his death a lasting witness lye
Against oppressor's bloody cruelty."

This contains the story of his death. After the defeat of the British he stopped at a pump to drink, when a British officer, who came out of the house, exclaimed, "You're a dead man!" Both aimed, fired, and both fell mortally wounded, the officer dying a few seconds before young Hayward. The powder-horn worn by Hayward was pierced with the ball, and is now preserved, having been silver-mounted by Edward Everett.

The third stone is that of Captain Davis, which is headed, "I say unto all, watch!" and then, after a record of his death, this is added: "Is there not an appointed time to man upon ye earth? Are not his days also like the days of an hireling? As the cloud vanisheth away, so he that goeth down to the grave shall come up no more. He shall return no more to his house; neither shall his place know him any more! Job 7: 1, 9, 10."

The dedication of this monument was a day to be remembered by every loyal citizen of the town; indeed, by every one present true to the flag of the Union. It occurred October 29, 1851. The monument was surmounted by the stars and stripes, and from each side of the apex was extended a line of streamers and flags. Across the principal streets were also lines of flags, which were tastefully grouped and arranged by Mr. Yale, of Boston.

The day was cloudy and lowering, but still favorable for the ceremonies—no rain falling until they were all concluded.

The attendance of the citizens of the surrounding towns was quite large. Five thousand persons were judged to be present, mostly the hardy and intelligent yeomanry of Old Middlesex, and their wives and daughters.

The ceremonies of the day consisted of a procession, an oration by His Excellency, Gov. Boutwell, a poem by Rev. J. Pierpont, of Medford, and a dinner, which was succeeded by speeches from several distinguished gentlemen, among whom were Robert C. Winthrop, of Boston, Hon. B. Thompson, of Charlestown, Col. Isaac H. Wright, of Lexington, and Hon. Charles Hudson, of Lexington. A thousand plates were set for the dinner, under a mammoth tent, erected by Mr. Yale, of Boston, a few rods to the north of the monument.

The procession was formed on the Green about

noon. The military escort, which made a fine appearance, was under command of Col. James Jones, of the First Artillery, with Major I. S. Keyes and Adjutant E. C. Wetherbee as staff. The following companies composed the battalion: The Concord Artillery, Capt. James B. Wood, accompanied by Flagg's Boston Brass Band; the Prescott Guards, of Pepperell, under command of Alden Lawrence, first lieutenant; the Sudbury Rifles, Captain Ephraim Morse.

Following the escort was the civic procession, under command of Col. W. E. Faulkner, as chief marshal, assisted by Ed. W. Harrington, A. L. Hutchinson, Simon Davis, Henderson Rowell, Henry Brooks, George G. Parker, A. J. Clough and H. L. Neal, mounted aids, and Messrs. L. Gilman, Marshall Parker, V. Lintell and Lowell Stearns, on foot to escort the ladies; the Governor and aides, consisting of Colonels Heard, Chapman, Williams and Needham; the President of the Massachusetts Senate, invited guests, the president, vice-presidents and committee of arrangements of the various towns, composed the second division. The third division embraced No. 1 Division of the Order of United Americans, and the "O'Kommakamesit" Fire Company, No. 2, of Marlboro'. The fourth and fifth divisions were composed of citizens from Lexington, Concord, Littleton, Boxboro', Sudbury, Westford, Stow and Acton. Several of these towns carried appropriate banners. That from Lexington was a large, white banner with a red fringe. On the front was the inscription, "Lexington, April 19, 1775. O, what a glorious day for America!" On the reverse—"Freedom's Offering!" and the names of Parker and other patriots who fell in the fight at Lexington.

From the Green the procession proceeded towards the Old Burying-ground, southeast part of the town, where the remains of the patriots Davis, Hosmer and Hayward were deposited, awaiting their removal to the monument.

The bones, which were disinterred some days before, were nearly entire, and were enclosed in an oblong, black walnut box, highly polished and studded with silver nails. The remains were enclosed in different compartments, each marked upon the cover by a silver plate bearing the name of the old patriots. The cheek-bone of Hosmer showed the trace of the ball which caused his death, entering just below the left eye and coming out at the back of the neck.

The box was placed in a hearse, and under the escort of the "Davis Guards," First Lieutenant Daniel Jones in command, met the procession at the junction of the two roads leading to town. Here both parties halted—the military escort in open order, and with arms presented awaited the approach of the sacred remains—the Lowell Band, which accompanied them, playing a beautiful dirge, composed by Kurick. Flagg's Brass Band, which accompanied the escort, then performed the dirge, "Peace, trou-

bled;" after which the escort fell into position and the procession, including the remains, proceeded to the monument. Eight venerable citizens of Acton, all of them over seventy years of age, appeared as pall-bearers. They were: Joseph Harris, Dr. Charles Tuttle, each eighty-two years old; Nathan D. Hosmer (nephew of Abner), eighty; John Harris, Daniel Barker and James Keyes, each seventy-six years; Jonathan Barker, seventy-four; and Lemuel Hildreth, seventy. The hearse was driven by John Tenney.

Upon arriving at the monument the box containing the remains was placed upon a stand in the street, which was covered with a black velvet pall. The box was opened and an opportunity given to all who wished to look upon the remains. The box was then closed and deposited in the monument in the place designed for it. The procession was then again formed and proceeded to the tent, under which the remaining scenes of the day were to take place.

The tent was hung around with streamers festooned and in the centre was the beautiful flag which had recently been presented by the ladies of Acton to the "Davis Guards." The tent was reached about one o'clock. Rev. J. T. Woodbury, president of the day, called upon Rev. Mr. Frost, of Concord, to invoke a blessing on the table and the day. An original hymn composed by Rev. Henry Durant, of Byfield, a native of Acton, was sung to the tune of "Hamburg." The first and sixth of the seven stanzas are here given

"O God, we give the praise to Thee,
The honor of our nation's birth;
It was Thy power that made us free—
The power that guides the rolling earth.
As on this pile, beneath those skies,
The peaceful light of heaven shall play,
So the Heroic Past shall rise
And meet the glories of that day."

The oration, poem and speeches then followed, which were eloquent and stirring with patriotic sentiment and fully appreciated by the responsive crowds in attendance.

The closing words of Governor Boutwell.—"To-day the Commonwealth of Massachusetts and the town of Acton dedicate this monument to the memory of the early martyrs of the Revolution and consecrate it to the principles of liberty and patriotism.

"Here its base shall rest and its apex point to the heavens through the coming centuries. Though it bears the names of humble men and commemorates services stern rather than brilliant, it shall be as immortal as American history.

"The ground on which it stands shall be made classical by the deeds which it commemorates, and may this monument exist only with the existence of the republic: and when God, in His wisdom, shall bring this government to nought, as all human governments must come to nought, may no stone remain to *point* the inquirer to fields of valor, or to remind him of deeds of glory.

"And finally may the republic resemble the sun in his daily circuit, so that none shall know whether its path were more glorious in the rising or in the setting."

Judge Hoar's sentiment (of Concord).—"The memory of Davis and Hosmer and their brave companions in arms: The men who *fell* at the Old North Bridge, of Concord, and the men who *avenged* their fall: the first who *received* the enemy's fire, and the first officer who *returned* it. One in purpose, one in patriotism: separated by the fortunes of that day—united forever in the gratitude and admiration of their countrymen."

Rev. Mr. Pierpont, the poet, gave this as his sentiment, alluding to the slight interruption by the noise of knives and forks near the close of his poem, and saying that, having pitted his tongue against a bullock's, and been most terribly worsted, a speech could not be expected of him.

"Let Poets learn at dinner to be brief,
Else will their tongues be beaten by the beef."

Daniel Webster's sentiment, forwarded from Marshfield.—"Isaac Davis: an early grave in the cause of liberty has secured to him the long and grateful remembrance of his country."

The Davis Monument was honored by a visit of the State Military Camp, of Concord, under the command of General Benjamin F. Butler, in the fall of 1870. The noon hour in camp was a scene of bustle in preparation for the afternoon march to Acton. While dinner was yet in a state of service at division quarters, the drums of the First Brigade were heard in the far distance to the right and the long line was marked by its dust, wending its way by a circuitous route to the review field. In half an hour the other brigades were on the march and at quarter of two o'clock five thousand men were in line. The infantry were on the right and centre, and the whole artillery and cavalry were massed on the right.

Promptly at two o'clock General Butler, mounted on a white horse, and with his fnil staff, took his place at the head of the division and rode out at the north corner on the Concord Road. He wore no plume. The marching column was about a mile and a quarter in length. The road from Concord to Acton was largely the same as the Acton troops took in the Revolution, the division marching in column of fours. At frequent intervals groups of men, women and children were gathered to witness the pageant.

The head of the column reached Acton at ten minutes after four o'clock. The selectmen, W. W. Davis, Ellbridge J. Robbins, Jr., and Charles Robinson, with a committee of citizens and ladies, headed by John Fletcher, Jr., had made ample preparations to welcome the troops. Houses were decorated and barrels upon barrels of lemonade and apples had been got ready.

The monument was elegantly decorated and also the town hall adjacent. The streets were crowded

with people in holiday attire. W. W. Davis, chairman of the Board of Selectmen, addressed General Butler in an eloquent and earnest manner. The general responded: "In behalf of the soldiers of Massachusetts gathered here in your good old town, I thank you for your earnest welcome and for your offered hospitality. It seems most pleasant to us to find so beautiful a resting-place after our long and weary march. You have referred to the services of the militia in the late war, and you will allow me to say that the character and conduct of Co. E, of Acton, evidenced that the spirit of the Revolutionary sires has not died out of the good town of Acton.

"You have the honor of having erected the third monument of the War of the Revolution, and of having suffered among the first in that struggle. You have earned the right to say that the sons will, by deed and work, keep green the memories of this historic spot. You and they have made a noble record, and, as it has been in the past, so may it be in the future.

"I doubt not that the sight of this monument, and the thought that we stand on the ground made sacred by the ashes of heroes, will be of value to the Military of Massachusetts, in increasing in their bosoms the holier emotions of patriotism, and inspire them to be able defenders of the institution for which Davis, and Hosmer and Hayward fell.

"We rejoice that we are able to be here and thank you again for the welcome and the bounty with which you greet us. We propose to close our response by a salute of thirteen guns, which will be fired by one of our light batteries, as a further tribute of respect and affection for the men of Acton living and dead." The event was a lively one, and a feature of the week that will long be remembered by those who participated in it, and by those who witnessed it.

THE WAR OF 1812.—The War of 1812 was not popular in this part of the country, but in the beginning of the war several men were enlisted in the army. In 1814 the military company called the Davis Blues was ordered into service as a body and was despatched to Boston to assist in the defence of that place against a possible attack. Hon. John C. Park, of Boston, a native of Acton, and a grandson of Rev. Moses Adams, thus writes, describing the event:

"I well remember the commotion in Acton on the day when the Blues met to take up their march to Boston. We boys were wild with excitement, but when the large doors of the meeting-house were thrown open and it was understood that the company would have prayers offered for them, we were sobered at once. I thought the prayer was very earnest and appropriate, and was indignant when afterwards, among the gathered knots of men in front of the porch, I heard some criticising it as being too much tinctured with the good old minister's anti-war sentiments. In a few days the fifer returned and

gave glowing accounts of their enthusiastic reception and the march of the Blues through Boston. It seems that at every street-corner the men and the boys would cheer, and the drum and fife were expected to respond with a triple roll and salute. The poor fifer was so exhausted with his untiring efforts, to pipe shrill for the honor of his corps and the town, that he was taken with spitting of blood and had to return home. This I believe was the only blood shed during the campaign."

The enemy kept away from Boston, otherwise the "Davis Blues" might have patterned after the style of the Davis minute-men thirty-nine years before at Concord. John Fletcher, afterwards captain of the company, was then clerk and went to Boston as clerk. Silas Jones, the son of Aaron Jones, was the captain. His company was the first to report at headquarters (after receiving the orders) of any in the regiment. Three times since the existence of the nation a company from Acton has been summoned at the outbreak of war,—the Revolution, the War of 1812 and the War of the Rebellion—and in each case has been the first to appear on duty.

A list of Acton Davis Blues who went to South Boston in the War of 1812, whose names have been copied from the original-pay roll, in the handwriting of the clerk of the company, Deacon John Fletcher, now in possession of Deacon Samuel Hosmer:

Captain, Silas Jones, son of Aaron Jones; 1st Lieutenant, James Jones; 2d Lieutenant, Aaron Hayward; Ensign, Jonathan Hosmer, Jr.; Clerk, John Fletcher; Samuel Conant, John Hendley, Silas Piper, Jr., fifer; Paul Conant, bass drum; Abner Wheeler, small drum; Luke Hayward, James Fletcher, Jr. (brother to the clerk); Jonathan B. Davis, James Hayward, Josiah H. Adams, Joseph Barker (2d), Jonathan Billings, Jr., Ephraim Billings, Josiah Bright, Jr., James Conant, Joel Conant, John Conant, John Chaffin, Joseph T. Chamberlain, Ezekiel Chamberlain, Ebenezer Davis, Luther Davis, John S. Fletcher, Abel Forbush, Silas Hosmer, Moses Hayward (shot accidentally), Nathaniel Haggood, John Harris, James Keyes, George Robbins, Joseph Robbins, George W. Robbins, John D. Robbins, William Reed (3d), Allen Richardson, Jonathan Wheeler, Samuel Whitney, Oliver Wetherbee, Nathan D. Hosmer.

SCHOOL-HOUSES.—There was a movement in 1740, soon after the town was organized, to obtain an appropriation for school purposes, but the movement failed. At a meeting in 1744 the town voted that a reading, writing and moving school be kept for six months.

This early action in favor of a school on wheels shows that the idea is not original with the present generation.

In 1743, at a special meeting in December, the town voted £18, old tenor, for a reading and writing school and to divide the town into three parts.

This division continued until 1754, when the districts were increased to six, in 1771 another was added for a few years.

From 1790-1800 there were five districts, then four for nearly thirty years, when the present division into six districts began. When there were only four districts the inhabitants of the southeast part of the

town received their school money from the town and united with certain inhabitants of Sudbury and Concord, and had a school in a house which was just across the Sudbury line. This was called the School of the Three Friends. At this time the North and East Districts were one. Previous to the organization of the town there were buildings erected for school purposes at private expense, and the schools kept according to the circumstances then existing in different localities.

The first schoolmasters were mostly residents of the town. As late as 1771 there were four school-houses which were private property. The first appropriations for schools were very small—not more than £12.

But few studies were taught and the teachers but poorly paid. The schools were called reading and writing schools, and none but the simplest rudiments of knowledge were taught before the present century.

A master in the winter received but little more per week than a day-laborer, and the teacher of a "woman's school" but little more than a servant girl.

In 1760 an order was drawn to pay a master fifteen shillings for keeping school two weeks and a half, and another drawn for his board for half that sum.

An aged resident of the town said that when she was a girl the lady teacher had one dollar per week for her services and her mother received one dollar per week for boarding her. The grant for schools was greatly supplemented by donations and subscriptions by the citizens for private schools.

For several years a private school was supported in the autumn at the Centre of the town. Rev. Asa D. Smith, D.D., late president of Dartmouth College, was one of the teachers of that school.

The town records give the following items: "October 14, 1796, it was voted that there shall be five districts in this town, and the school-houses shall be built on the same places that was agreed upon by a former vote of the town, viz.: One of the said houses to be built near Mr. John Dexter's Paster bars on the road leading from the meeting house to Dr. Abraham Skinner's.

"One on the hill West of Jonathan Tower's house.

"One on the crotch of the road West of Samuel Wheeler's house (where Mr. Cyrus Wheeler's house now stands nearly).

"One where the school house near Samuel Tuttle's now stands (in the East District, near Horace Hosmer's present residence). The other house to be built where the school-house now stands near John Harris.

"January 21st, 1797. To see if the town will agree to build a school-house to accommodate the District where the school-house was consumed by fire.

"To see if the town will agree to form themselves into a certain number of school districts and provide each District with a school-house and divide the school money into so many equal parts."

In 1797 a town-meeting was called "to see if the town will reconsider all former votes respecting building school-houses, if any there be on record, and see if the town would build a school-house in the district that had the school-house burnt," (This house that was burnt stood at the turn of the road beyond Mr. Charles Tuttle's site leading to Mr. Thomas Hammond, in the south corner).

"Voted to reconsider all former votes respecting districts for seven years past. Voted that there be a committee of five men to fix a place for a school-house in the North District to which Lieutenant Noyes belongs, and that Jonas Brooks, John Edwards, Esq., Aaron Jones, George Robbins and Edward Wetherbee be the Committee.

"Then voted fifty pounds to build said house and that said committee build such house as they think proper for said District and the best way they can."

In November, 1798, the committee appointed by the town reported they had "attended to the service and soaled four of the oald school-houses, viz.: one by Mr. John Adams, Jr., one by Oliver Jones, one by Hezekiah Wheeler's, and one near the meeting-house. The whole of which was soaled for Fifty-five dollars and approved notes given to the Town Treasurer for the same payable within nine months from the date."

The school-house located and built by this committee, of which Jonas Brooks was chairman, was the old red school-house which stood for the next forty years a few rods north of the parsonage, then newly built, on the same side of the road. The frame of this school-house is now the substantial part of Mr. Cyrus Hale's house. It stood on rising ground facing the east. It was well built, square, with a high desk in the centre of the west side and rows of double desks rising on the north and south sides, the highest row on a level with the windows, styled the back seats, where the oldest scholars sat. This was the model for the school-houses built at that time.

It answered the purpose of a grand amphitheatre for the development of the muscle and brain of Acton's near future.

Here the Tutties, Taylors, Joneses, Fletchers, Hosmers, Conants, Stearnses, Richardsons, Davises, Parlins, Handleys, Browns gathered for their daily tilt with themselves, their mates and their masters.

They came in groups from all parts of the district, ranging out a mile and a half and numbering in some winter terms nearly a hundred, all grades in charge of one teacher. The elements which collided and harmonized in this arena during a single day, and day after day, was a miniature picture of Acton's liveliest town-meeting.

The story of this one-school-house would fill a volume, but we have no space for the romance here,—

"Beside you straggling fence that skirts the way
With blossom'd furze, unprofitably gay,
There in his noisy mansion, skilled to rule,
The village master taught his little school."

A man severe he was and stern to view—
I knew him well, and every truant knew."

BY-WAYS AND NOOKS OF ACTON.¹—There is a deserted farm lying to the southeast of Nagog Pond which many years ago was the home of a family named Chamberlain. The house and other buildings are now gone, but their location may be determined by the remaining well and cellars.

This place suggests the stanza in one of Miss Chandler Moulton's poems:

"The cowslips spring in the meadow,
The roses bloom on the hill
And beside the brook in the pasture
The herds go feeding at will."

It exactly answers to all the particulars. If the stanza had been written especially for this place, it could not have come nearer to reality.

There is a profusion of cowslips in the meadow, an abundance of old-fashioned damask roses on the hill near the well and a pretty brook, and almost always there are cattle pastured there.

The house, if it was still standing, would add greatly to the quaintness of the place. It is a quiet nook, away from all traces of civilization. There is an abundance of wild fruits in their season, and a rare place for boating or fishing on Nagog Pond.

In a northerly direction from Strawberry Hill is where the Indians, once inhabitants of this and the neighboring towns, used to go to manufacture their arrow-heads. They would never tell the early settlers definitely where they went, but would indicate that direction. Some years ago a hunter's dog while digging for a rabbit or a fox, cut his paws badly. His master found he had dug into a great quantity of very small sharp-edged, flint-like rocks, which, without doubt, were the remains left by the Indians from making their arrow-heads.

Probably the first settlers of South Acton were Nathan Robbins and wife, who came from East Acton and located at a site now owned by Mr. James Tuttle on the road to Stow, called the Bright's House. They started from their home beyond the cemetery in East Acton. Mr. Robbins drove the team loaded with the household goods and the wife took charge of the baby and also the family pig. In her journey she came to the big brook, which the pig would not cross. He seemed to have some premonitions of his fate and that of his descendants, should he head for that part of the country, but the woman was as resolute as the pig. She landed her most precious freight across the stream first, and then returning, pigged it over all safe, and at last reached their new home. The story is that Mrs. Robbins and freight reached the spot first. At any rate, for some unexplained reason, the ladies in that part of the town have always been a little ahead.

THE OLD CHESTNUT-TREE.—If you have not seen that chestnut-tree don't miss the next chance. It is

¹ By Bertha H. Hosmer.

one of the original settlers of the town. Its birth record is not on town-books, but some think it is well on to two hundred years old. It was in a flourishing condition when Captain Davis and his company passed that way in 1775. It was a large tree when Simon Hapgood, father of Benjamin, was a child.

Thoreau and his sister came up from Concord to visit it before he died, and he made it twenty-two feet in circumference then. It is now more than that. The interior of the tree is hollow. The cavity is circular, sixty inches in diameter and twenty-five feet in height, through which one may look and see the sky beyond. An opening has recently been cut at the bottom and entrance can be easily made. There are worse places for a night's lodging. A good crop of chestnuts is yearly produced by its living branches. The town should get possession of this luscious tablet of the by-gones and see that no ruthless axe take it too soon from the eyes of the present generation. If you wish to find it, go to the residence of Benjamin Hapgood, on Strawberry Hill, turn in from the road to the southeast from Mr. Hapgood's barn a few rods to a piece of woods, and you will easily find the venerable specimen.

GEOLOGIC SKETCH OF ACTON.¹—Acton, unlike some of the neighboring towns, owes the principal part of its natural scenery to the irregular surface of the rock strata which form its foundation. The contour, through the action of the various atmospheric agencies, had nearly reached its present form before the glacial period, and it was but slightly modified by the action of the ice during that period. Rising to its greatest elevation near the centre of the town, the slope to the northward received the greatest force produced by the motion of the ice toward the south, which resulted in grinding down and polishing the surface of the rock and in making the slope to the north more gentle, while the slope to the south was left steep and often ragged.

The rock is a micaceous gneiss, often merging into mica schist firmly stratified, with a strike north 60° east, and a very steep dip to the northwest. This rock is a member of that crystalline series which forms the oldest portions of the earth's crust. Above this solid rock is the loose material known generally as earth—that is, the accumulation of gravel, sand, clay, loam, etc., which was brought to its present position and deposited by the agency of the ice sheet. Portions of this material were accumulated under the ice in a comparative thin layer over nearly the entire surface of the country. In certain places, however, it was built up, by a process not yet understood, into lenticular masses, with their longer axes parallel to the motion of the ice or nearly north-south. This gave rise to a prominent feature in our topography, the class of hills known as drumlins, and of which the

hill just west of West Acton Village, the two south of South Acton, and Strawberry Hill, toward the northeast part of the town, are typical examples. On the surface of the ice and throughout its mass was a large amount of earth and rock, which was scattered over the surface of the country as the ice disappeared. This being in loose form, and easily acted upon by the floods produced by the melting of the glacier, was washed over and separated into distinct areas of sand, gravel and clay. These washed-over portions naturally accumulated in the lower levels, giving rise to the sand and gravel plains which extend along the courses of Nashoba and Fort Pond Brooks, and to the southeast merge into the larger areas bordering the Assabet River. Another and very peculiar feature of the washed-over material is the kame. This was formed by the small boulders and pebbles accumulating in the channels of rivers running upon the ice, and which, upon the disappearance of the ice sheet, were deposited upon the surface of the country, forming long, narrow, winding ridges of coarse gravel. A very fine example of this occurs in Acton, extending from the extreme southeast corner of the town, near the powder-mills, with occasional gaps by the cemetery near the Centre, and thence nearly parallel to and just west of Nashoba Brook, nearly to Carlisle line.

The streams which flow through the town still follow generally the valleys formed by them before the advance of the ice sheet, but in a few cases their courses have been slightly changed by the accumulations deposited by the glacier. The larger ponds occupy pre-glacial valleys; but the smaller ponds, like Grassy Pond in the north and Sinking Pond in the southeast, simply occupy small depressions in the surrounding sand plains.

THE ARTIST'S VIEW OF ACTON.²—The surface of Acton, like that of most Middlesex towns, is sufficiently broken and varied in its character to possess a fair share of picturesque localities. With the neighboring towns of Westford and Littleton, it forms an elevated range of hill country similar to that formed by Harvard and Bolton, only of lesser height. Within its boundaries and those of its neighboring towns are found some of the largest ponds of Middlesex. Although unlike Concord or Sunbury, which are flat and meadowy, and which have the benefit of a river to supply their most beautiful points, this town may be said to possess a landscape not inferior to them.

From a picturesque point of view, the near vicinity of running water is most favorable for producing interesting places. The variety of tree forms found in such localities, with the different crops on the cultivated lands adjoining, are enhanced by the winding course of the stream. Though without a river, this town has two mill streams which in a great degree replace one. Two sections of the town are crossed by

¹By George Barton, a native of Acton, and geologic teacher in the School of Technology, Boston.

²By Arthur F. Davis, resident of the town.

large brooks. Both West and South Acton are traversed by Fort Pond Brook, and the frequent dams erected for mill purposes create a succession of charming ponds.

The finest stretch of this stream is perhaps that from South Acton Village to the road leading to Concord Junction at Hanson's. There it bends and twists its way through a fine succession of rocky and woody hollows, with here and there an interruption in the shape of a mill. In this section we are sure it is equal to any similar water-course in Middlesex in beauty. Through West Acton it creates by its wayward course many interesting places, but is not so picturesque as the locality just mentioned.

As one comes along the highway leading from East Acton to the Centre, he crosses a stream converted by a mill-dam just below into a long, shallow pond, which extends northward some distance. This is Nashoba Brook, and, although smaller than the other, is the most picturesque stream within the town.

Nashoba, from its source in Westford, comes down a long, winding valley into the meadows of East Acton. Where it enters Acton it is a quiet stream, flowing unnoticed through stretches of low land until it reaches the first mill, some two miles from its head-waters. At this place, where is a saw-mill, are found some rare bits, considered from a painter's point of view.

Three tributary brooks enter Nashoba within the territory of Acton. The first enters near the Carlisle boundary; the largest, Nagog Brook, the outlet to Nagog Pond (this name is not Magog, but Nagog. The old Indian name is a good one) joins it a mile or so below the first mill-dam. Just below this is a smaller rivulet, which drains the meadows north and west of the Centre. The territory which lies between the first and third mills embrace the finest and most picturesque spots on the stream.

The old Jonathan Wheeler place, which is in this neighborhood, is particularly notable as being one of the most beautiful localities in the town. Just below the third mill the brook is crossed by a bridge a few rods south of the old Revolutionary bridge (now gone), over which the minute-men marched to Concord *via* the Strawberry Hill road and the fields. Still farther down the stream is the long pond first mentioned, with its wide reach of intervals on either side and picturesque surroundings of the old mill and dam which creates it.

Both our Acton brooks are tributary to the Assabet River, and unite their waters with it just over the Concord line. Although, like other streams, ours are perhaps the most attractive in the spring and fall, yet no season will be found unattractive about them. Each has its peculiar charm, which, if noticed, can never fail to give pleasure to the observer. Each nook and corner in their vicinity will amply repay the effort made to visit them, and a spare hour spent about them is looked back upon with interest.

The pond region belonging to Acton is not extensive. There are only two small ponds—Grassy and Sinking Ponds—which are entirely within the town limits. Grass Pond is unique in having a singular sedgy growth about its margin, and is a pretty little sheet of water, famed for its lilies with pink-tinted leaves, which grow in great profusion.

Sinking Pond is a minute reproduction of Walden, as it used to be before the building of the railroad and the advent of the modern pic-nic ground. The water of this pond, which has no visible outlet or inlet, is very clear and pure. Scarcely any vegetable matter appears about its borders, and it is surrounded by a high ridge of scrubby sand-hills.

Nagog, of which Acton possesses the larger part, is the first lake in this section in point of size, its length being about two miles and its width one mile. Its waters are quite clear and deep, and are broken only by one small island near the southern end.

There are many fine groups of trees about this southern end, which is wild and woody. Here are the greatest number of choice spots in early spring days, when the young leaves of the birches first green the wood, and the brilliant oriole hangs her nest on delicate pensive limbs over the water.

The shore on this side is fringed by quantities of blueberry bushes and is rocky, without a beach. Back from these the hills rise up in broad bush-grown swells to the highest point of Acton—Nagog Hill, as it is called.

The most vital and peculiar feature of our Acton landscape is found in its apple orchards. These are the most interesting part of the natural scenery here. Other towns, doubtless, share with Acton in this respect, but in none of them, in Middlesex at least, does the apple-tree reach such a picturesque state. The farmers do not think, many of them, that the chance and irregular groups of wild apples springing up beside the road, side wall, or in corners in the pastures, are worth consideration. However, there is no more beautiful combination of color in the landscape than that offered by these trees in the time of their bloom.

Wild apples are proverbially famous for the delicacy and fragrance of their bloom, which is also of richer color than that of the cultivated varieties. Cultivated orchards, of course, are in greater number than these wild trees, and are rightly paramount in commercial importance. Although planted as they are in checker-board form for economy of space and ease of cultivation, nature early asserts her magnificent arrangement and leans the trees in different directions. There is nothing commonplace about the apple-tree wherever found. Its limbs are crooked and full of surprising twists, and its spray, though coarse, is full of characteristic kinks. With the possible exception of a few varieties, it never forms a regular cylindrical head, but with its growing years increases in the beauty of its irregular outline. The

orchards are, in short, most typical of our rocky, hilly country, and are its crowning beauty.

The magnificent blooming tree is a perpetual reproach to those who only consider it after its fruit is packed away in a cellar or in barrels ready for market. The abundant growth of wood and orchard afford the birds sufficient protection and food to enable them to multiply without molestation in Acton. Consequently, our ornithological list embraces most of the species found in inland New England, with the exception of the sea birds, a few of which visit our ponds and brooks in the early spring or fall. The large family of wood warblers in particular thrive here; the catalogue often comprises upward of twelve species and, doubtless, a more practical observer might extend the list.

In the flora, too, Acton offers particularly rich opportunities. The varied character of the country affords protection to a surprisingly wide variety of plant growth. Among the trees we have nearly all found in Massachusetts. One, however, the true paper or canoe birch, is well-nigh extinct here, only a few scattered specimens remaining in town.

GAME IN ACTON.—The hills, woods, brooks and ponds of Acton have been noted from earliest dates for the frequent visits of the disciples of the gun and rod. The Indians for generations had the first chance on these grounds. We need not go to the books to be sure that they were in goodly numbers and in trim for luck among the furs, the furs and the feathers.

The apostle John, when he went on his missionary tours among the Indians, had to come to these parts, for he was sure to find an audience along the Nashoba waters and the "big brook." These Indians could sing. Eliot had good success in that line. Wilson relates that at their meeting "the Indians sung a Psalm, made Indian by Eliot in one of our ordinary English tunes melodiously." In 1689 there were twenty-four Indian preachers. In 1676 there were 567 praying Indians at Nashoba plantation.

James Spear, with his Indian choir, sung Psalms at one of Eliot's meetings May 14, 1654. There has always been something in the atmosphere or in the ground or in the spot in this vicinity congenial to music. We have heard fish and game stories among the veterans of our own day, and have heard them sing and whistle and blow their horns on their homeward beat; but those red men of the past, if they could speak, would easily silence these modern tongues.

The earliest records show that the brooks were once stocked with some varieties not now common.

Captain Daniel Tuttle's mother, Harriet Wetherbee, sister to Edward Wetherbee, Senior, used to go down to the brook, below the dam, and throw out shad and alewives in her day. They had at one time, on the Assabet, at Southeast Acton, a fish warden and fish weirs.

As early as 15th of February, 1739, there was an

article in the town warrant "to know whether the town will insist on Mr. Faulkner's opening his dam 30 days in a year, as ye law directs, where alewives and other fish pass in great plenty."

There used to be a deer's man appointed by the town to look after the deer and decide upon questions relating to the matter, which shows the deer were here. There have always been self-appointed private wardens to look after the deers, but these were bona-fide deer.

Men who hunt and fish for sport are noted for their quiet, modest ways, and it is difficult to get any statement from them on their luck, but by hard pressing, a few items have been secured, which may be of interest to the public. Worse records even than these could be had, if the right men could be interviewed by the right man. They did not intend to have their names mentioned, and so are not responsible for the publishing of the inglorious tale of their life record:

Elnathan Jones: pickerel, 3000; perch, 3000; trout, 200; bass, 100; largest pickerel, 6½ lbs.; largest bass, 5 lbs. At one lucky trip the average weight of the perch, 1½ lbs., several weighing 2 lbs.; foxes, 30; gray squirrels, 200.

Hiram Haggood in ten years: bass, 20; pickerel, 200; perch, 400; pouts, 100; crows, 1.

J. K. Wetherbee: bass, 10; pickerel, 1000; perch, 2000; pouts, 2500; gray squirrels, 500; raccoon, 1; hawk, five feet across from tip to tip.

Swift Fletcher: pickerel, 3000; the largest number at any one time, 167; pouts, 2500; bass, 100 (three weighing over 4 lbs., not one over 5 lbs.); foxes, 100; raccoons, 7; ducks, 30; gray squirrels, 600; sold 105 skins one year for a robe for Captain Whitcomb; partridges, 2000; rabbits, 1000; pigeons, 400; Otter, 1.

Fifty years ago pigeons were abundant in the woods, and during some seasons made it lively for the huntsmen, who would have great sport in shooting them upon the wing as they flew in flocks over certain localities.

The pigeon-stands were quite common, where, by nets and proper baiting, they could be caught in large numbers.

The stocking of Nagog Pond a few years since by the town with bass has introduced a new variety in the fishing sport.

On the 1st of July, when the permit is issued for trying the luck on these delightful waters, there is a decided fish smell in this vicinity. The most sober men in town—deacons, ministers, lawyers, justices of the peace, senators and representatives—doctors—the moderator himself—may be seen rigging their poles and reeling to and fro—with their lines, if perchance, they may strike the spot where they are sure of a prize.

Just watch the justice a moment. He is leaning over the boat. He hears the click of the reel as his line spins out through the rutled waters. What are all his cases in court now? There is only one case on the docket just now, and that must have all the nerve and muscle. You may laugh at him and call him a fool, and off his base; but the question fairly holding the court is, *bass or no bass*.

THE 19TH OF APRIL, 1861.—Again the historic day returns, rich with its patriotic memories. We hail its presence as we would that of an old and endeared friend come back to the family hearthstone. It recalls events which should never be forgotten while the government remains or its annals stand upon the imperishable record.

In the War of the Revolution, without the 19th of April, there might never have been the 17th of June, and without the 17th of June there might never have been the 4th of July, and without the 4th of July the stars and stripes would never have floated o'er land and sea to the joy of many generations. To the citizens of Acton and vicinity this day has been for over a hundred years, of all other days in the year, the most marked. Its yearly advent has been celebrated with new and old rehearsals of what occurred at the North Bridge at Concord, with the ringing of bells, the firing of salutes, the parade of military, orations, bonfires and general glorification. The old patriots who were at the bridge in 1775, when Captain Davis fell at the head of his command, have told it to their children and their children's children. The monument which stands upon the village green is but an embodiment, in solid native granite, of the sentiment which has thus been alive among these hills and valleys for over a hundred years.

When the telegram came to Captain Daniel Tuttle, on the evening of April 15th, to have his company report the next morning at Lowell, armed and equipped for war service, it found a response prompt and earnest from every man.

Though scattered in different towns, and not expecting the summons, the bells were rung in the night, messengers sent in all directions post-haste, equipments forwarded, carriages procured, overcoats provided—for it was a cold, cheerless April night—and at 7.30 o'clock on the morning of April 16th, Captain Tuttle was able to report to Col. Jones, of the Sixth Regiment, his whole command ready for duty.

Farms, shops, stores, homes, families, friends, plans, had been left behind in an instant, and they were on their way to destinies which none could foretell. They had played the soldier on the parade-ground in peaceful days, in holiday attire. It now meant business. The country was in a death-struggle all at once. Its very capital was in danger of capture or destruction by rebel hands.

Captain Daniel Tuttle was born February 14, 1814, on the heights which overlook the village and town, one of the oldest of a large family of children. His father, Francis Tuttle, Esq., was for a long time an officer and influential citizen of the place. The captain was elected to command the Davis Guards in the years 1855, 1857, 1859, 1861. He was twice postmaster. He was forty-seven years old at the outbreak of the war, and exempt by age from military duty. He was a Breckenridge Democrat in the preceding canvass for the Presidency against Lincoln. He had at

the time a large farm on his hands, a wife and numerous children—some of them young.

At the opening of a new season, and with all his cares so pressing, it seemed impossible for him to leave; yet when the summons came there was but one decision. When seated in his wagon, just as he was about to leave, he said to family, neighbors and townsmen, as a parting word, "God take care of you all."

In those dark, ominous moments of suspense, the appearance of the old Sixth Regiment in Boston, in the early morning after the evening's summons, and its steady march down Washington Street, with knapsacks, overcoats, flashing bayonets and beating drums, on their way to the seat of war, and the cheering and almost frenzied crowds which accompanied every step, was a scene which it is worth a life to witness. No one not present can know the enthusiasm of that occasion.

Their march down Broadway, New York, was a repetition of the same scene, only on a grander scale, and in a city whose citizens were not supposed to be so largely in sympathy with the soldier. The appearance of the old Sixth Massachusetts in their streets, made up of all parties, and with each man's life offered for sacrifice, united the divided city, and they became as one man in saying "The Union shall be preserved." The passage through Philadelphia was in the night, or there would have been another repetition of the same *boundless cheer* and God speed the right, from the surging crowds of that ever loyal city.

Baltimore was reached on the 19th of April. It was the North Bridge of division between the contending sections of the land. The city overflowed with bitterness, and cursing against the Union, and the men who came to defend her.

"On this morning," says the historian, "the streets were filled with a scowling, angry mob, as the cars, eleven in all, containing the Sixth Massachusetts Regiment, rolled into town. The cars were drawn by horses across the city from one railroad to another. As they penetrated farther into the city the crowd became more dense, and the faces grew blacker with hate. Stones, brickbats and all kinds of missiles were thrown through the windows of the cars. At first the soldiers bore it patiently and without resistance, until all but two of the cars reached the station. These two, separated from the others, were surrounded by a yelling crowd, that opposed their passage. The officers consulted and concluded to disembark the men and march them in solid column to the station. The brave fellows went on through a shower of stones, bricks and scattering shots.

"At last, just before they reached the station, the colonel gave orders to fire. The soldiers discharged their guns among the crowd and several of the mob fell dead or wounded. The troops reached the station and took the cars. The scene that ensued was terrific. Taunts, clothed in the most offensive language, were

hurled at the troops by the panting crowd, who, breathless with running, pressed to the windows, presenting knives and revolvers and cursing up into the faces of the soldiers. Amid such a scene the Massachusetts regiment passed out of the city, having had four of their number killed and thirty-six wounded.

"On this very day, the 19th of April, eighty-six years before, the first blood shed in the war of the Revolution had stained the grass in front of Lexington meeting-house, and on the Concord plains.

"On the second anniversary, long to be remembered, the first blood in the Civil War flowed in the streets of Baltimore, shed from the veins of the descendants of these early patriots."

THE DAVIS GUARDS received at home, on their return, Aug. 10, 1861. The Davis Guards arrived at South Acton at about 8.30 o'clock, Saturday morning. A large crowd had collected to welcome them home. After cordial greetings a procession was formed and proceeded to the Centre in the following order: Col. W. E. Faulkner, chief marshal, assisted by Henry Wilder, James Wetherbee and John H. Sanborn; National Band of Worcester; Union Guards, Capt. A. C. Handley, 50 men; Liberty Guards, Capt. S. Willis, 40 men; Drum corps; Hayward Guards, Capt. Daniel Jones, 62 men; Lowell Brigade Band (this band barely escaped with their lives at Baltimore); Davis Guards, Capt. David Tuttle, 52 men; Concord Artillery, Capt. Prescott, 54 men; Detachment of Concord Artillery, with field-pieces, Capt. M. Hobson, 12 men; Chief Engineers of Concord Fire Department; Hook-and-Ladder Co., Charles Stowell, foreman, 10 men; Independent Engine Co., Jonas Melvin, foreman, 60 men.

A little out of the village a procession had been formed, under the direction of Samuel Hosmer, Esq., of the citizens of Acton and the adjoining towns, awaiting the arrival from South Acton.

Upon the arrival of the military they formed in the rear, and were thus escorted into town. Upon the arrival of the procession in town it gathered around the speaker's stand, when prayer was offered by the chaplain, Rev. Alpha Morton, after which Dr. John M. Miles, in behalf of the town, welcomed them in an eloquent address. This was responded to in behalf of Capt. Tuttle, by Dr. Harris Cowdrey.

Col. Faulkner made a brief address to the audience. About 12.30 o'clock the companies formed into line, and marching to the monument, three cheers were called for and heartily given for the American flag, and at the same time a new, beautiful banner was run up to the top of the monument by Willie Boss, from which point, as if by magic, it sprang into the air, the band playing the "Star Spangled Banner." Hon. Charles Hudson, of Lexington, then delivered a very able address.

After an intermission of an hour, sentiments were offered by the toast-master, O. W. Mead, Esq. Brief addresses were made by Rev. James Fletcher, of Dan-

vers (a native of Acton), Hon. E. W. Bull, George Stevens, Esq., John White (a member of Davis Guards, who fought under the stars and stripes in Mexico, who is an Englishman, but when the order for marching came, volunteered to go with the Davis Guards), Hon. James M. Usher, of Medford, George M. Brooks, Esq., of Concord, Capt. Phelps, of Lexington, and Lieut. Bowers, of the Concord Rifles.

There were about three thousand people present. The route of the procession was handsomely decorated with flags and mottoes, as was also the new store of James Tuttle & Co., at South Acton. Over the armory, "Davis Guards not afraid to go;" in the town-house, "God defend the right;" on the monument, "Union, Davis, Hosmer, Hayward;" at Capt. Daniel Jones', "Welcome home;" at Lieut. J. Blodgett's, "Honor to the brave;" at Hon. John Fletcher, Jr.'s, "First to go;" at E. S. Buffum's, "Safe return;" over J. Fletcher & Sons' store, "Through Baltimore."

A detachment of the Concord Artillery fired a national salute on the arrival of the Guards at South Acton, also as the procession reached the centre of the town.

THE CIVIL WAR.—The existence of a military company in Acton at the outbreak of the Rebellion was of great advantage to the town.

In 1850, on the seventy-fifth anniversary of Concord Fight, a union celebration took place at Concord, in which the inhabitants of Acton took part. A large company from Acton represented the minutemen of the Revolution, officered by Colonel Winthrop E. Faulkner, as captain, and Daniel Jones, the son of Captain Silas Jones, who commanded the Davis Blues in Boston in the War of 1812, and James Harris as lieutenants. They wore a flannel blouse and carried canteens with 1775 stenciled on them as uniform, and armed with guns of no particular standard, though some of them looked old enough to have been at the original Concord Fight; but the contents of some of the canteens, judging of its potency, was of a later period.

The marching of this company elicited warm encomiums from military men present, and the result was a reawakening of interest in military matters in Acton and the permanent organizing of Company E, Sixth Massachusetts Regiment, known as the Davis Guards, the following winter.

Colonel Faulkner was the first captain of this company, and its other commanding officers till the outbreak of the Rebellion are here given: Captain Daniel Jones, Rufus Holden, Captain Moses Taylor, Captain Daniel Tuttle, Captain Aaron C. Handley, and again Captain Tuttle who was still at its head in 1861.

In obedience to General Order No. 4, issued by Governor Andrew, January 16, 1861, requiring the militia of the State to be forthwith put into a state of efficiency, this company practiced at drill every

¹ From an address by Luther Conant, Esq., before the Grand Army.

week during the winter and recruited its ranks to be ready to answer any call. On the 19th of January, at a meeting of the field officers and company commanders, at the American House in Lowell, it was unanimously voted to tender the services of the Sixth Massachusetts Regiment to the Governor and Legislature when such services shall become desirable for purposes contemplated in General Order No. 4.

On the 23d of January the Legislature proffered to the President of the United States such aid in men and money as he may require to maintain the authority of the National Government. This resolution was forwarded the same day to the President.

The result of this act of volunteering was that the Sixth Regiment was the first regiment called, and General Butler was the first to receive a commission as a general officer of volunteers.

Many have never been able to understand how a regiment from Massachusetts should have reached Washington in advance of nearer States.

The circumstances of the transmission of the order are given somewhat in detail. The proclamation of President Lincoln calling for 75,000 men, and convoking an extra session of Congress was dated April 15th, but did not reach Boston until the 16th and was not received at Albany until the 17th, receiving from the Governor of New York on the 19th the response by telegram to the President that the Seventh would start for Washington that evening.

On the 15th of April Governor Andrew received a telegram from Senator Henry Wilson announcing the call for troops.

The Governor at once issued his Special Order No. 14, commanding the colonels of the Third, Fourth, Sixth and Eighth Regiments forthwith to muster their commands in uniform on Boston Common, and sent it by special messengers. Colonel Jones, who was in Boston, received his order first, took it to Brigadier-General Butler for regular transmission and issued his orders the same day by telegraph to the Lowell and Lawrence companies of the Sixth and took the four o'clock train on the Fitchburg Railroad to carry the order to the companies in Acton and Groton to assemble in Huntington Hall in Lowell on the morning of the 16th at seven o'clock—uniformed and ready to proceed to Washington.

Colonel Jones, on his trip to Groton, met Captain A. C. Handley in the railroad station at South Acton, who immediately started with the order to Captain Tuttle.

Late in the afternoon of the 15th Captain Daniel Tuttle was chosen in town-meeting to an important office. On being requested by the moderator to be sworn as usual, he declined for the reason that he was liable to be sent out of the State with his company any day.

In a little more than an hour the summons came. Captain Tuttle started immediately for Lowell and messengers were sent at once to rally the absent men.

Captain A. C. Handley went to Leominster to notify the Wilder Brothers and returned with them on time.

Other messengers were sent in different directions, and at two o'clock in the morning of the 16th the bells of the town-house and church were rung, calling the people of Acton to witness the departure of that military company which was the first in this or any other State to leave their homes in response to the President's call.

The company reached Lowell before the hour named, 7 A.M. on the morning of the 16th, and with the other companies of the regiment were dispatched to Boston during the day. Its departure to Washington was delayed somewhat by reason that it was late on the morning of the 16th that Governor Andrew decided to attach to the Sixth Regiment Companies L and R, from Stoneham and Boston.

The regiment left Boston about sunset on the evening of the 17th, and reached New York the next morning and Philadelphia the next afternoon. It left Philadelphia at one on the morning of the 19th, and, had there been no delay, would have passed through Baltimore early in the morning and probably without opposition; but the train carrying the Sixth was a very long one, and the passage of the Susquehanna (then made by ferry) consumed so much time and the slow rate of speed owing to the length of the train delayed its arrival at Baltimore until ten o'clock in the forenoon.

At that time each separate car was drawn through the streets of the city by strings of horses, and thus the different companies of the regiment became separated.

The first six companies, including Company E (Davis Guards), passed through without serious molestation, but the remaining five companies were attacked by the mob, through which they gallantly forced their way, though not without thirty-six of the men receiving gun shot wounds and the loss of four soldiers killed.

In the long procession of fallen patriots who were to pass forward and onward to eternity from the battle-fields of the Rebellion, these four Massachusetts soldiers led the way.

Leaving Baltimore about two o'clock the Sixth reached Washington—forty miles distant—late in the afternoon, and were received by General McPowell, of General Scott's staff, and were assigned quarters in the Senate chamber in the Capitol, where they remained about twelve days.

The regiment, aided by a part of the Eighth Regiment and a battery, the whole under the command of General Butler, then went back and re-opened the route through Baltimore, staying there some ten days, and were detailed to guard the junction of the main track of the Baltimore and Ohio Railroad at the Washington branch, at the Relay House, where they remained till the expiration of their service.

At this time detachments were sent to Baltimore—

one to arrest Marshal Ham and another to capture a noted rebel who was wanted at Fortress Monroe.

The regiment was mustered in at Washington April 22d, and discharged August 2d, being absent from home about 115 days. The term of service, though brief, is assured a high place in history. This regiment was the first to leave home and the first to be attacked. It received a vote of thanks from the first session of the Thirty-seventh Congress for the alacrity with which they responded to the call of the President, and for the bravery and patriotism which they displayed on the 19th of April in fighting their way through Baltimore on their march for the defence of the national Capitol.

In his order dismissing the regiment Governor Andrew said: "Its gallant conduct has reflected new lustre on the Commonwealth, and has given new historic interest to the 19th of April. It will be received by our people with warm hearts and generous hands." Of the fifty-two men who went out under Captain Tuttle, twenty-seven are now living.

Shortly after the return home of the Sixth Regiment, Colonel Jones commenced to recruit a regiment of three years' men, to be numbered the Sixth Massachusetts. It was not till the ranks were full and it was nearly ready to leave for the seat of war that Governor Andrew decided to retain the old Sixth as a militia regiment, to be called upon in cases of special urgency.

The new regiment was numbered the Twenty-Sixth. Most of the officers and many of the men of the old Sixth had enlisted for three years, and were enrolled in the Twenty-sixth. Captain Tuttle's health not permitting him to return to the war, William H. Chapman, lieutenant of Company E, old Sixth, became captain of Company E, Twenty-sixth Regiment, and twenty members of the old company enlisted in the new one. This regiment was mustered into the service of the United States October 18, 1861, and left the State November 21st, same year, taking passage on the steamship "Constitution" to Ship Island, on the coast of Louisiana, and remained at Ship Island about four months.

At that time the fleet under Commodores Farragut and Porter, bombarded Forts St. Philip and Jackson, on the Mississippi River, and the Twenty-sixth Regiment moved in rear of the forts in readiness to assault, but the surrender of the forts avoided the necessity of an attack, and saved many valuable lives.

After the surrender the regiment garrisoned the forts about four months, and then was ordered to New Orleans for provost duty. It remained there about a year, then started with General Banks on the expedition up the Red River as far as Opelousas; then ordered back to New Iberia, where about three-fourths of the company re-enlisted, and were given a furlough, commencing April 4, 1864, of one month, to visit their friends at home. Upon the expiration of the furlough the regiment was ordered to return to

New Orleans, La., which journey was made on steamship "Cahawha" and arrived at its destination May 20th.

After occupying Carrollton and Morganza, it returned to New Orleans, and on July 11th embarked on steamer "Charles Thomas" for Bermuda Hundred, Va., which place was reached the 21st of July. On the 28th the regiment marched to Deep Bottom, Va., where considerable picket firing took place, but no casualties happened. Subsequently the regiment was ordered to Washington, D. C., and then marched through a portion of Maryland to the valley of the Shenandoah River, reaching Winchester on the morning of the battle of September 19, 1864. The battle commenced about 10 o'clock in the forenoon and lasted till 5 P.M., when the enemy retreated. The regiment, being in the lead, advanced too far without proper support, and found itself with the enemy not only in front, but on both flanks, and, being thus exposed to a severe cross-fire, suffered severely, Company E having seven men killed or mortally wounded. Of the four months' men who went into the battle, at its close only twenty-three were fit for duty. The battle of Fisher's Hill took place three days later.

On October 18th the three years' term of service of that portion of the regiment that did not enlist having expired, the regiment was consolidated into a battalion of five companies by Special Order No. 64, and those whose term of enlistment had expired were separated from their comrades who had re-enlisted. In the battle of the following day, let it be said to the credit of many of those discharged men, though under no obligation to do so, they gallantly again entered the ranks, fought all day and helped to change a temporary defeat into a glorious victory.

I am sorry to say that this voluntary act of patriotism cost some of these noble men their lives. Corporal Loker tells me that after the fight he helped to bury two men killed in the action whose term of service had expired before the battle.

On October 19th the rebel army surprised the Union troops at Cedar Creek, driving them back four miles in confusion. This was the scene of Sheridan's famous ride from "Winchester, twenty miles away," though, as a matter of fact, the Union troops had made a stand before his arrival. The remarks he made to his men greatly inspired them, though it is not probable that these remarks will ever take a place in polite literature.

The results of the battle of Cedar Creek were the capture of nearly all of the rebel baggage-train and field artillery, and the complete dispersion of Early's forces. The battalion remained at Winchester during the winter, were ordered to Washington May 2d, and one month later were sent to Savannah, Ga., where they remained until August 26, 1865, when the battalion was mustered out of service; left Savannah September 12th, and reached Boston September 18th; were sent to Gallop's Island for final payment, and

reached Acton the evening of October 21, 1865, after an absence of four years and three days.

In the narrative of Company E, Twenty-sixth Regiment, I stated that Governor Andrew decided to retain the Sixth as a militia regiment to answer sudden calls. In response to such a call it left the State August 31, 1862, to serve for nine months under Colonel Albert S. Follansbee, of Lowell. Company E, of Acton, was officered as follows: Aaron C. Handley, captain; Aaron S. Fletcher and George W. Rand, lieutenants; Dr. Isaiah Hutchins, hospital steward for the regiment.

Captain Handley had commanded the Davis Guards some years before the war. His grandfather had served in the Revolutionary War and his father did military duty in the War of 1812.

The regiment was ordered to proceed to Suffolk, Virginia, near Fortress Monroe. It assisted in the construction of Forts Nansemond and McLellan. The regiment was detailed for guard duty in the forts, afterwards for scouting duty and destroying rebel railroads, among which were the Norfolk and Petersburg Railroad and the Seaboard and Roanoke.

The regiment took part in several battles and skirmishes. Among these may be mentioned the Deserted House, Carrsville and Ludlow Lawrence's home. In these actions the Sixth had twenty-seven men killed and wounded. No casualties in Acton company, though that company lost three men by disease. The regiment was mustered out June 3, 1863.

The services of the old Sixth were required for the third and last time during the war, for a term of enlistment of one hundred days, commencing July 18, 1864.

Col. Follansbee again led the regiment, and Co. E, Davis Guards, of Acton, was under the following list of officers: Frank M. Whitcomb, who was orderly sergeant during the nine months' term of service in 1861 and 1863, was captain, with George W. Knight and Isaiah Hutchins as lieutenants. The regiment was ordered to proceed to Washington, D. C., and marched to Arlington Heights and performed fatigue duty in front of Fort Stevens for two or three weeks. This fatigue duty consisted in leveling the ground and felling trees to give greater range and efficiency to the great guns of the fort. After this time it was ordered to garrison Fort Delaware and to guard the rebel prisoners in the fort. After a useful but uneventful term of service it was mustered out, Oct. 27th, and returned home.

Of the one hundred men in Captain Whitcomb's company, twenty-nine were from Acton. No casualties or deaths occurred during this enlistment.

The official military record of the town of Acton reports as sent to the army during the War of the Rebellion 215 different men, including twenty commissioned officers. The adjutant-general's report for 1865 states that at the close of the war she had answered all calls required to fill her quota, and had a surplus of thirty

men to her credit. The number of commissioned officers was exceptionally large. No Acton-born soldier, credited to her quota, deserted, or failed to receive an honorable discharge.

The recruiting committee of the town were the selectmen: James E. Billings, J. K. W. Wetherbee and Jonas K. Putney, with an assistant committee of three: Daniel Wetherbee, Capt. A. C. Handley and Varnum B. Mead.

Four brothers enlisted from one family, and the head of that family a widow, Mrs. Abram Handley. Though one of these brothers (Frank) died early in the war, and another (George) was discharged for disability, their combined terms of service were more than ten years.

Mr. Wheeler's three sons all enlisted. In six other cases, two brothers were in the ranks together, and in one both father and son, William and William B. Reed, were in the service at the same time.

Luke Smith was credited three times to the quota of the town, whose father, Solomon Smith, marched over the same road under Captain Isaac Davis to the old North Bridge that his son, Luke, followed in part under Captain Daniel Tuttle, eighty-four years later. Mr. Smith was the oldest soldier credited to Acton's quota, having at his last enlistment (for one hundred days) in 1864, reached the age of more than fifty years.

Thomas Kinsley, Jr., was the youngest recruit, being but fifteen years and two months old at the time of his enlistment.

Of the 216 men credited to Acton, eighteen died while in service, either killed in battle or victims of disease. This does not include natives or residents of Acton, who were credited to other towns, who died in service.

MEMORIAL LIBRARY.—This memorial structure, just completed, stands upon the north side of the Main Street at the Centre, nearly opposite the Davis Monument. It has an ideal location, partially shaded by the elms and maples, which give it a classic repose even at the start.

Its approach is by an easy ascent from the east, south and west, over concrete walks. It is a few rods northeast of the Town House, with which it is connected by concrete and a fine lawn, a site known for over sixty years as the Fletcher Homestead. It is the most unique and costly building ever erected in town, and is destined to be the centre of culture for many generations to come.

The style of architecture is Romanesque. The external appearance and the internal arrangements and furnishings are in harmony with this idea, and can be properly judged only from that standpoint. The architects are H. W. Hartwell and William G. Richardson, of Boston. The building is composed of red brick and brownstone.

Its extreme length is sixty-six feet six inches and its depth thirty-two feet and ten inches from south to

north. The principal entrance opens upon the south and through a large, solid freestone arch, which has rich mouldings and carved spandrels, within which are to be placed memorial tablets to the soldiers in the War of the Rebellion, of which this town furnished a large number. On entering the building, a reading-room, called the Memorial Room, sixteen by twenty-five feet, is found at the left. It has heavy beamed ceiling, a large antique brick fire-place and decorated walls. Above the fire-place is a handsome brown-stone tablet, with this carved inscription:

"THIS BUILDING A GIFT TO HIS NATIVE TOWN BY
WILLIAM ALLEN WILDE."

The room has rich oak tables, settees and chairs, all in the olden style. Opposite the reading-room, and at the right, is the book apartment, thirty-two feet six inches long, twenty-four feet six inches wide, twenty feet high. Along the sides of this are arranged book alcoves, two stories high, having light connecting galleries for the second tier, reached by stairs at the right and left of the desk occupied by the librarian. The desk is so located that the person in charge of it can command a view of the book-room and the reading room also, this latter opening into the central reading space by a large open archway. Located at the north of this central hall is the room devoted to the library trustees, thirteen by fifteen feet, with a northern light, richly furnished. Opening out of this is a fire-proof vault, where articles of value and the archives of the town can be stored. In the opposite corner is a toilet-room, fitted up with all modern conveniences. All the spaces and rooms are brilliantly lighted from chandeliers, and heated by two large furnaces in the cellar, which is by itself quite an institution—cemented, drained and plastered. The water arrangements are quite a specialty, embracing a tank in the attic, which can be easily filled by a force-pump connecting with a well that belonged to the estate, seventy-five feet deep, the bottom of which is a solid ledge, containing an unfailing spring of the purest and coolest water.

The corporators of the library under the charter are Luther Conant, Adelbert Mead, Moses Taylor, Hiram J. Hapgood, Delette H. Hall and Daniel James Wetherbee. These are constituted trustees for life, with power to fill vacancies in case of death or resignation of any one of their number. Three additional trustees are to be chosen by the town, one for three years, one for two years and one for one year.

In the future, after the organization, the town is to elect by ballot each year one trustee of the three, elective for three years.

Mr. Wilde's letter presenting Memorial Library Building to the town of Acton:

"MALDEN, MASS., Feb. 27, 1890.

"To the Selectmen of Acton:

"GENTLEMEN,—For a long time past it has been my intention, if ever I was able to do so, to remember my native town by the gift of some mem-

orial to the memory of those brave and patriotic men of Acton who so freely gave time, strength and health—and many of them their lives—in the War of the Rebellion, 1861–65.

"To carry out this plan in what seemed to me the most advantageous and permanent method possible, I have purchased the estate of Rev. James Fletcher, adjacent to the Town-House, and erected thereon a Memorial Library, placing upon its shelves some four thousand volumes, more or less, and I beg the privilege of presenting this property to the town as a free gift, only stipulating that it shall forever be kept as a Memorial Library, and free to all the citizens of the patriotic old town of Acton, which I shall always love and be proud of.

"If it shall please the town to accept this gift I shall be glad to pass all necessary papers for the transfer of the property to whom and at such time as the town shall direct.

"I am, gentlemen, yours truly,

"WILLIAM A. WILDE."

Upon reading this letter, by Mr. Howard B. White, chairman of the Board of Selectmen, to the citizens of Acton, in town-meeting assembled, March 3, 1890, Rev. James Fletcher presented the following resolutions, which were unanimously adopted by the town, to be forwarded to Mr. Wilde in response, and to be placed upon the town records:

"WHEREAS a charter of Incorporation has passed the Legislature and been signed by his Excellency Gov. J. Q. A. Brackett incorporating the Memorial Library, and Hon. William A. Wilde, a native of Acton—now a resident of Malden—has signified his readiness to deed to the town the Memorial Library Building just completed at his expense, and the land on which it stands, and all the appurtenances thereof, including books already selected, the Memorial Room and the town-vault for the archives of the town,—

"Resolved 1st, We, the inhabitants of the town of Acton, in town-meeting assembled, do accept the trust and authorize the Selectmen, in behalf of the town, to sign all papers and perform all acts necessary to complete the transfer of the property to the care of the trustees.

"Resolved 2d, In passing this vote we wish to express to Mr. Wilde—in behalf of the present inhabitants of the town; in behalf of all future generations who may be resident here, and participants in the benefits to be enjoyed, in behalf of the soldiers of the War of the Rebellion, whose memory and valor he has so tenderly cherished in the name and arrangement of the structure—our profound appreciation of his generous gift."

"We assure him of our hearty thanks for remembering the place of his birth by a memento so enduring and so befitting the past history and future needs of the town.

"We assure him of our cordial co-operation in doing what in us lies to perpetuate the intentions and possibilities of the trust.

"We tender to him, his companion and his children our best wishes for their life, health and prosperity, and our prayer that the donation, in which they each have a personal share and honor, may contribute to their mutual and lasting enjoyment."

The selectmen and the whole Board of Trustees were authorized to make all necessary arrangements for the dedication of the building.

The trustees chosen by the town at the March meeting, 1890, are the following: William D. Tuttle for three years, James Fletcher for two years, Howard B. White for one year.

Mr. William Allen Wilde, the donor, was born in Acton, Mass., July 11, 1827. He is now resident in Malden, Mass., and does business as a publisher, his office being at 25 Bromfield Street, Boston. His father, Joseph Wilde, lived in Southeast Acton, married Sarah Conant, of Stow, sister to Abraham and Simeon Conant, of Acton. He died in Acton, in the eighty-second year of his age. Their children were: Mary, now living in Moultonboro', N. H.; Silvia, deceased; Sarah, living with Mary; John, who was drowned;

Joseph, living in Natick, with seven children and prospering in business; William A.; and George, living in Somerville.

Benjamin⁴, the father of Joseph Wild⁵, died when fifty-six years old, of yellow fever. He married Silvia Thayer, of Boston. She died two days after her husband and was buried in Acton. Her daughter, Silvia, died of yellow fever two days after her mother and was buried in Acton.

William Wild³, the father of Benjamin⁴, lived in Randolph, Mass., and died when eighty-seven years old.

William², the father of William³, lived in Braintree, Mass., and died in his eighty-seventh year.

William Wild¹, the father of William², landed from England in 1632, and lived in Randolph, Mass., which was then a part of Braintree.

William A. Wilde⁶, the son of Joseph Wild⁵, married, first, Loise A. Mace, of Pepperell, Mass., without issue. Married, second, Lydia Jane Bride, of Berlin, Mass. *Children*: Jennie, born September 7, 1854, deceased at sixteen years of age; Carrie, born October 12, 1856, deceased at seven years of age; William Eugene, born in Acton September 12, 1858, married, in 1885, Effie Jean Dresser, of Portland, Me. Married, third, Celestia Dona Hoyt, of Wentworth, N. H. *Children*: Alice Elizabeth, born June 12, 1869; Allen Hoyt, born April 29, 1874.

Mr. Wilde was educated at Groton and Pepperell Academies. He has taught school twelve years, been superintendent of the schools of the city of Malden; five years chairman of the Water Board when large and expensive water-works were being constructed.

He represented Malden two years in the Legislature, and was chairman of the House Committee of Education. He has been trustee of the Malden Library eight years, and is now one of the Prison Commissioners of the State of Massachusetts.

OUR HONORED DEAD (Tablet List).

BY JULIAN TUTTLE.

Luke W. Bowers; he enlisted in Aug., 1862, Co. E, 33d Mass. Reg.; died of wounds May 1, 1864, at Resaca, Georgia.
Albert Conant, enlisted Dec., 1861, in Co. F, 30th Mass. Reg.; he died at sea Jan., 1864, on the voyage home.
Elbridge Conant, enlisted Aug. 18, 1862, in Co. E, 6th Mass. Reg.; died Feb., 1863, at Suffolk, Va.
Eugene L. Hall, enlisted Feb., 1864, in Co. E, 26th Mass. Reg.; killed Sept., 1864, at Winchester, Va.
Frank Handley, enlisted Sept., 1861, in Co. E, 26th Mass. Reg.; died July, 1862, at Fort St. Philip, near New Orleans, La.
Augustus W. Hosmer, enlisted Sept., 1861, in 26th Mass. Reg.; band; died Nov., 1861, at Acton, Mass.
Eli Huggins, enlisted Sept., 1861, in Co. A, 26th Mass. Reg.; died Oct., 1863, at New Orleans, La.
Samuel C. Hanscom, enlisted Dec., 1862, in Co. A, 2d Mass. Cavalry; killed July, 1864, at Aldie, Va.
James P. Hanscom, enlisted May, 1861, in Co. E, 1st Minnesota Reg.; died Nov., 1862, at Portsmouth Grove, R. I.
John A. Howard, enlisted Aug., 1862, in Co. E, 26th Mass. Reg.; died Dec., 1863, at New Orleans, La.
John S. Harris, enlisted June, 1861, in Co. F, 11th Mass. Reg.; killed May, 1863, at Chancellorsville, Va.
Francis Kinsley, enlisted Sept., 1861, in Co. E, 26th Mass. Reg.; died April, 1864, at Acton, Mass.

Thomas Kinsley, Jr., enlisted Feb., 1864, in Co. E, 26th Mass. Reg.; died Nov., 1864, at Washington, D. C.
George Warren Knight, enlisted Oct., 1862, in Co. E, 53d Mass. Reg.; died April, 1863, at New Orleans, La.
Henry W. Lazell, enlisted Sept., 1861, in Co. E, 26th Mass. Reg.; died Aug., 1863, at New Orleans, La.
James R. Lentell, enlisted Sept., 1861, in Co. E, 26th Mass. Reg.; died Nov., 1862, at New Orleans, La.
William H. Loker, enlisted in Sept., 1861, in Co. E, 26th Mass. Reg.; died April, 1863, at Acton, Mass.
Marivan Miner, enlisted Aug., 1862, in Co. I, 26th Mass. Reg.; died Feb., 1863, at New Orleans, La.
Matthew McKinney, enlisted Aug., 1863, in Co. E, 26th Mass. Reg.; died Sept., 1863, at Bowwick City, La.
William B. Reed, enlisted Aug., 1862, in Co. E, 26th Mass. Reg.; died Jan., 1864, at Franklin, La.
Warren R. Wheeler, enlisted Sept., 1861, in Co. E, 26th Mass. Reg.; died July, 1862, at Fort St. Philip, near New Orleans, La.
James M. Wright, enlisted Nov., 1861, in Co. B, 32d Mass. Reg.; died Sept., 1862, at Philadelphia, Penn.
John H. P. White, enlisted Sept., 1863, in Co. E, 26th Mass. Reg.; died July, 1863, at New Orleans, La.
Samuel E. Wilson, enlisted in 1854, in Co. K, 7th California Reg.; died Feb., 1866, at Fort Yuma, Cal.
Daniel A. Lovering, enlisted Aug., 1862, in Co. H, 13th Mass. Reg.; killed June, 1864, at Cold Harbor, Va.
Luke Robbins, enlisted in Boston, Mass., June, 1864, as a seaman for two years; served on board the "Ohio" and "Seminole"; was killed on the "Seminole" at Galveston, Texas, May, 1865.
Frank J. Barker, enlisted in Co. C, 118th Ill. Reg., Aug., 1862; died at Milliken's Bend, La., April, 1863, aged 19.
Eben Barker, enlisted in Co. F, 50th Ill. Reg., Aug., 1861; died at Quincy, Ill., Jan., 1862, aged 22.
Cyrus E. Barker, enlisted July, 1861, in Co. H, 13th Mass. Reg.; discharged Jan., 1863, for disability; afterwards enlisted in Co. C, 50th Mass. Reg. He was at the battle at Weldon Railroad; was taken prisoner, and after seven months was exchanged; died at Annapolis, Md., April, 1865, aged 22.

The names of Acton men who served in the War of the Rebellion, and who survived that war:

Colonel, William H. Chapman; Captains, Aaron C. Handley, Daniel Tuttle, Frank H. Whitcomb; Lieutenants, Silas P. Blodgett, Henry Brown, Aaron S. Fletcher, Elias E. Haynes, Isaiab Hutchins, George Willard Knights, James Moulton, George W. Rand, William F. Wood; Privates, Frank W. Ames, George T. Ames, George E. Barker, John F. Blood, Charles H. Blood, George F. Blood, William H. Boss, Henry L. Bray, Daniel R. Briggs, Charles A. Brooks, Samuel R. Burroughs, Hiram Batten, Patrick Callahan, George Fay Campbell, Waldo Chaplin, William Chaplin, Jr., William D. Clark, Robert C. Conant, Simon T. Conant, J. Sherman Conant, John Conway, George B. Cran, John B. Cran, Waldo G. Dunn, Oscar Dwyer, Abel Farrar, Jr., Daniel H. Farrar, Winthrop H. Faulkner, James W. Fiske, John W. Fitzpatrick, Charles W. Fletcher, Aaron J. Fletcher, Ephraim B. Forbush, Channey U. Fuller, Meldon S. Giles, Henry Gilson, Nathan Goss, William B. Gray, William H. Gray, Delette H. Hall, George Handley, Charles Handley, William S. Handley, Abram Handley, Charles A. Hanscom, Marshall Hapgood, Henry Hapgood, Francis E. Harris, Forestus D. K. Hoar, J. Sherman Hoar, Walter O. Holden, Gihman S. Hosmer, Judson A. Huggins, Eli Huggins, Jr., Sylvanus Hunt, Loring M. Jackson, Mortimer Johnson, George A. Jones, Edwin A. Jones, Charles Jones, George Jones, Richard Kinsley, Jonathan W. Loker, Emory D. Lothrop, Lewis J. Masten, William Morrill, Charles Morse, Charles H. Moulton, Albert Moulton, Augustus P. Newton, George B. Parker, Henry D. Parlin, George E. Peck, George N. Pierce, George M. Pike, Michael Powers, Oscar E. Preston, John Putnam, William Reed, Levi H. Robbins, Joseph N. Robbins, Elbridge J. Robbins, Luke J. Robbins, Varanau F. Robbins, Albert Rouillard, George Rouillard, George W. Sawyer, Andrew J. Sawyer, George H. Simpson, Benjamin Skinner, Dennis Shelton, Luke Smith, George D. Smith, Silas M. Stetson, Emory A. Symonds, Edwin B. Taft, Edwin Tarbell, Daniel G. Taylor, Warren L. Teel, Daniel L. Veasey, Robert Wayne, John Wayne, James Wayne, Hiram W. Wetherbee, Addison B. Wheeler, Lincoln E. Wheeler, Everett Wheeler, William F. B. Whitney, Samuel E. Wilson, James H. Wood, Eben F. Wood, Charles H. Young.

THE CONGREGATIONAL CHURCH.—This church and society was launched upon its mission amid great religious commotion. The times were full of sharp and heated controversy upon doctrinal points. The lines were rigidly drawn, and neutrals were at a discount.

The worship was first in a chapel, built for the purpose, now occupied by Mr. Julian Tuttle. This was the scene of many earnest gatherings. It was where Mr. Woodbury began his most effective preaching, and it being a time when all this section of country was marked by great religious awakenings, the events are easily recalled by those still living, contemporaneous with those early dates.

The church was organized by a council March 13, 1832, and a house of worship fifty by forty-four feet, built the next year. Many of the important members of the old church united with the new in its first formation. Rev. James Trask Woodbury was ordained and installed March 13, 1832. After preaching twenty years, he was dismissed at his own request June 23, 1852, and was afterwards settled in Milford, Massachusetts, where he died January 15, 1861, aged fifty-eight years.

Rev. Benjamin Dodge, of Wilton, Maine, was his successor. He was installed October 28, 1852, and dismissed April 17, 1855.

Until September, 1855, the church was supplied by Rev. Messrs. Alvord and Francis Horton.

Rev. Charles Rockwell then commenced his labors as a stated supply. On his leaving in July, 1856, Rev. Martin Moore, of Boston, and others, supplied the pulpit until January, 1857, when Rev. Joseph Garland was hired two years.

From January, 1859, to May of the same year the pulpit was supplied by various clergymen.

Rev. Alpha Morton was then engaged for four years successively, resigning May 1, 1863, to accept an engagement with the church at West Auburn, Maine.

Rev. George Coleman was ordained and installed November 12, 1863, and was dismissed in May, 1869.

The Rev. Franklin P. Wood was ordained July 24, 1871, and installed as pastor October 10, 1872, and dismissed December 17, 1874.

During Rev. Mr. Woodbury's pastorate two houses of worship were erected.

The following is a description of the present house as found in the church records in Mr. Woodbury's handwriting:

"1847, January 1st. The new meeting house erected on the spot where stood the former one was duly dedicated to Almighty God, Son and Holy Ghost, Dec. 16, 1846, Wednesday at one o'clock p.m. House 75 feet by 50, with a basement story of stone with 82 pews; Cost about \$6000, exclusive of the fresco painting of the interior and the cushions, carpets, lamps, clock, communion table and chairs, Bible and hymn books which all cost \$700, and were all absolute gifts to the church and the house, not to be put upon the pews.

"The building Committee were—Pr. J. M. Miles, Samuel Hosmer (d.), Simon Tuttle, John P. Buttrick, Col. Winthrop E. Faulkner, and they did their duty faithfully and are entitled to the lasting gratitude of the church."

More than six hundred different persons have been members of this church.

Some repairs and alterations were made in the early part of 1867, and a fine organ introduced at a cost of \$1320. The deacons and officers of this church, have been as follows: Deacons Silas Hosmer and Phineas Wheeler, died in 1838, aged sixty-five, chosen at the organization; Deacon Hosmer died in 1872, eighty years old; Deacon Stevens Hayward, chosen April 3, 1835, died in 1868, aged eighty-one; Deacon John Fletcher, chosen December 7, 1838, died in 1879, aged eighty-nine; Deacon Abraham Conant, chosen February 3, 1843, died in 1861, aged seventy-seven; Deacon John White, chosen February 3, 1843, died in 1860, aged seventy-five; and Deacon Samuel Hosmer, Albert Hayward, William W. Davis, and Joel F. Hayward, chosen January 1, 1864.

March, 1885, William Davis Tuttle chosen. He has been superintendent of the Sabbath School, also Deacon Davis.

Rev. George M. Stearns is the present pastor, installed September 23, 1887.

Deacon Silas Hosmer was clerk of the church from its organization to his death.

Rev. James T. Woodbury was born in Frances-town, New Hampshire, May 9, 1803, and died at Milford, Massachusetts, January 16, 1861, aged fifty-eight. He married Miss Augusta Porter, of Medford, daughter of Jonathan Porter. His father, Honorable Peter Woodbury, was a pioneer merchant, and for many years a practical farmer in the upper division of old Hillsborough County. His father was distinguished through his whole life for his strong, plain, common sense, great energy of character, as well as for his uncompromising integrity. He was for a great many years a member of one or the other branches of the New Hampshire Legislature, commencing almost with the first session after the adoption of the Constitution by that State and being at the time of his death a member of the Senate. His father and his mother, whose maiden-name was also Woodbury, were of different distantly related families of Beverly, of this State, and they could both trace their origin to the ancient town of Woodbury, in Devonshire, England. His mother was a woman of rare ability. James T. Woodbury was a younger brother of Honorable Levi Woodbury, an eminent jurist and popular and able public officer, for years a judge of the United States Supreme Court. There were twelve children. James T. was graduated at Harvard University in 1823. He began a course of legal studies under the direction of his distinguished brother at Portsmouth, New Hampshire; was admitted to the bar in his native state in 1826. He at once opened an office for practice as a lawyer in Bath, Grafton County, New Hampshire. No young man for many years had come to the bar with fairer prospects. With a thorough education, with talents of the highest order, with an unblemished character, with great natural physical and in-

tellectual powers, married to an amiable and highly accomplished wife, beloved by a large circle of friends, all looked that he should rival the fame of his elder brother, who had even then reached the highest honors within the gift of his native State. But in the midst of his apparent worldly prosperity his ambition was suddenly checked and his whole course of life was suddenly changed. Under the preaching of the Rev. Mr. Sutherland, a Scotch clergyman of Bath, familiarly known as Father Sutherland, he became a sincere convert to the religious creed in which he had been educated by his pious and excellent mother. After a long struggle with himself, and against the advice and remonstrances of many friends, he relinquished his profession as a lawyer, and all his hopes and dreams of future greatness and worldly glory, and devoted himself to a course of theological studies. As soon as this course was completed he was ordained over the Evangelical Church in Acton, where he remained from 1832 to 1852, when he became a pastor of the church in Milford, and remained a pastor till the time of his death.

No person could stand for twenty years in any community, holding the relations which were held by Mr. Woodbury in Acton, without making a deep impression upon the public mind. He had a personal presence, traits of character, mental peculiarities and forces, which took him out of the ordinary line of influence, so that when he left town, not the parish simply, but the whole community and neighboring towns felt the change.

By a large majority this change was lamented and is to this day, even by some who were his opponents while here.

As a preacher Mr. Woodbury was especially noted. Why so noted? It was not because of his rare theological training. In this he was confessedly deficient, and at times even boasted of the fact that he had not been to Andover, or any of the other celebrated schools of the day. It was not because he had a natural theological acumen, which would supplement the deficiency of school discipline. His most ardent admirers admitted this, and some were glad of it. It was not because of his labored preparations for the Sabbath effort. Few have carried into the pulpit preparations apparently so meagre. His discourses were seldom written, and when partially so, were for some cause the least effective. He had simply the lawyer's brief, a small bit of paper, which none but himself could decipher, and he with difficulty at times.

But he had a large, commanding person—a characteristic of the Woodbury family. He had a clear-ringing, variable voice, which he could modulate to any circumstances, grave or comic, to any audience-room, large or small. He had a quick, susceptible nature which flooded his face with tears, sometimes of tender sympathy and sorrow, of sudden humor or contagious passion. He would cry when others had no thought of it. It was all the same to him. He had a rare gift

of descriptive narrative. Not often did he finish a discourse, however impressive, without telling some anecdotes which, told in his blunt, quaint style, would raise a smile through the house and cause one to look to his neighbor as if to say, "That is just like him and nobody else." He had a fondness for nature in all her varied forms, human nature not excepted, which, bubbling up like water from a living spring, gave a freshness to his words and sentiments and bearing before an audience.

There was a frankness and boldness and what some would call a rashness in uttering his convictions which provoked approval and opposition, and he did not seem to care which. People gave him credit for meaning what he said, even if they did not agree with him.

His emotional conception of every subject which he treated, whether in the pulpit or on the platform, gave him a power which he wielded with wonderful effect on great occasions.

The monument which stands upon our village green never would have graced the spot nor extended the patriotic fame of the town but for his memorable address to the Legislature.

His only enkindled emotions transferred into the membership of the House thrilled them for a moment into a patriotic ecstasy.

They could hear again the rattle of the musketry at the North Bridge, and the shriek of Captain Davis as he fell at the head of the advancing column.

The 19th of April was back with all its paraphernalia of stir and fire and blood.

In this gush of excitement it was easy for them to vote *yea* when they had thought and purposed to vote *nay* on the appropriation.

As a reformer Mr. Woodbury's gifts were conspicuous on the platform. His humor and pathos and passion and wit, his bluntness, quaintness and oddities, his independent honesty and high purpose gave him at one time a foremost rank as an anti-slavery and temperance advocate.

In all the region around about and in many distant places his efforts when in happiest moods will be remembered as sparkling with telling points and a burning oratory.

The whole town revived under his manly strokes. The houses and farms and shops and roads and schools, which had languished under the blight of intemperance now took on a new lease of prosperity.

Many a man healed for the drunkard's grave reversed his steps, thanks to Mr. Woodbury's eloquent appeal. Peace be to his ashes!

His oft-repeated wish to be buried in Acton, with the dear people to whom he had ministered in the buoyancy and strength of his best years, has been gratified. He sleeps in Woodlawn Cemetery, by the granite shaft which he erected in memory of his beloved son, James Trask, Jr., by the side of his Augusta, as he was wont so fondly always to call her,

the companion, stay and grace of his entire married life.

Extracts from an ordination charge by Mr. Woodbury to a young pastor :

"My Son, I have begotten you in the Gospel, so I call you my son.

"My Son. 1st. Get your sermons from the Bible, the closet and the fields.

"2d. Be brief. You are a short man and the people will not expect long sermons from you, my Son. Unless you deem yourself a very eloquent man. Be brief! be brief!

"3d. If it rains, *let it rain!* The rain may do good. If you try to stop it, it may rain so much the harder. My Son, *let it rain!*

"4th. Throw physic to the dogs! They may not like, but they might as well have it as you. You don't need it. Air, exercise, good food and plenty of it, are better than physic. Let the dogs have it.

"5th. Trust in God and keep your powder dry. If your powder is wet it will not be of any use. Trust in God, but you must have dry powder or your shooting will not hit the mark. My son, God bless you and your people. AMEN."

Reminiscences.—One hot summer morning in July, quite early in the day, there was heard a loud shouting from a carriage which had stopped in the street opposite: "I say! I say!! I say!!!"

Hurrying to the door, Mr. Woodbury, of Acton, some thirty miles distant, was recognized sitting in the carriage alone, stripped all but his pants and shirt. He was not expected. His first salutation was, "I say! *have you any milk?*" other questions followed, but the first thing to be settled was *milk*; he was thirsty.

Why Mr. Woodbury liked to live outside the village. "Because," he said, "he could shout as loud as he pleased without disturbing his neighbors."

Why he wore a broad-brimmed hat, loose-fitting coat and pants of blue color, carried a blue umbrella, instead of black, had boots with sole leather projecting a half-inch beyond the upper leather, drove his oxen through the village in a farmer's frock, with pants in his boots. Because he had a mind to.

Why he liked the Acton choir. Because it was a large choir and made up of ladies as well as gentlemen, and *Augusta* stood for years a prominent and graceful singer among them. He got tired of this all gander music when in college.

Deacon John Fletcher was born in Acton July 21, 1790, and died July 16, 1879, in his ninetieth year. He was the son of James, the son of Timothy, the son of Timothy, the son of Samuel, the son of Francis, the son of Robert, who came from England to Concord, Mass., in 1630, when thirty-eight years of age. He was at the time of his death the oldest person in Acton. He was nine years of age when George Washington died, and remembered distinctly the sensation which that event made throughout the country. In his boyhood all the territory west of the Hudson was a wilderness.

He married Clarissa Jones, the youngest of eleven children, all but one of whom lived to mature life, whose father was Aaron Jones. She died in her seventy-sixth year (February 8th), after being married over fifty years, the mother of seven children. He

united with the church, together with his wife, November 3, 1833, and was for many years one of its deacons.

In his early life he was captain of the Davis Blues, and was familiarly called Captain Fletcher. He was clerk of the company when it went to Boston in the War of 1812. He held the office of special commissioner for Middlesex County for several years. He was for a long period of years the veteran boot and shoe manufacturer of this region, and in company with his sons, John and Edwin, carried on the business up to the time of his decease. He was conscientious in his dealings with his patrons, stamped his name upon his work, and made it good, if at any time there was a failure. He was largely interested in the general appearance of the Common, in the planting of the noble elms which now give dignity and beauty to the village, and but for his exertions and those of Francis Tuttle, Esq., they would have perished in the severe drought of 1840, after they were set out. He was interested in the erection of the public buildings of the Centre.

After his former shoe-factory and the old church, which was used as a town hall, were burnt, he encouraged the town to rebuild on the old site a new and commodious structure, offering to rebuild a shoe-factory which should be an ornament to the place, which he did as promised.

As early as 1815 he began an industry in the town, which, till within a few years, was of great advantage to the material interests. He early espoused the temperance cause, and became an earnest advocate of the principles of anti-slavery. His ardent support of the temperance cause cost the loss of a valuable orchard in 1843—destroyed by the girdling of his trees—and the same was repeated upon him a few years afterwards. When he became convinced that a certain course was right he gave himself to it heart and hand, with but little regard to the consequences to himself. In 1828 he, with his brother James, built the homestead, which till recently remained on the site now occupied by the Memorial Library.

Simon Hapgood died in Acton December 21st, aged eighty-six years and ten months. He was one of the original founders of the Congregational Society, was for nearly forty years an exemplary member of the church, and for many years a teacher in the Sabbath-school; was one of the earliest advocates of temperance and emancipation, and was always identified with that which is for the best good of the community and the world at large.

Deacon W. W. Davis was born in Harvard March, 1824; came to Acton April, 1861. He married Martha Taylor, of Boston, April 7, 1853. She died December 8, 1868. Children: William and Ada. He has taught school eighteen terms. In 1861 he represented the towns of Boxboro', Littleton, Carlisle and Acton in the State Legislature, being what was called the War Session. August 3, 1882, he married Abby

R. Worthiley, of Andover. He has been selectman of Acton, two years; School Committee superintendent, three years; Sabbath-school superintendent, fifteen years; deacon of the Congregational Church since 1862. In politics the deacon has been uniformly a Republican. He has been a hard-working man, greatly improving his farm and lifting from himself burdens which at the beginning he had to assume.

Hon. John Fletcher was the son of Deacon John Fletcher; born in 1827. He was of the firm of John Fletcher & Sons till his father's death, in 1879. Since then he has been in the firm of S. T. Fletcher & Co., with his son, Silas Taylor, at 77 Clinton Street, Boston. The business is that of butter and eggs commission store. Though retiring in his habits, he has taken an active interest in public affairs, in parish, town and country. He has been chorister twenty years; representative to General Court in 1862; in the State Senate two years (1870-71); a director in the Lowell and Nashua Railroad; president of the Schubert Choral Union since its organization; superintendent of the cemeteries; on the Executive Committee of the village improvement, and prominent in his activities for the home support of the Civil War. He married Martha Taylor, daughter of Silas Taylor.

UNIVERSALISTS.—The following extracts from an able sermon preached by Rev. I. C. Knowlton, D.D., at the dedication of the new meeting-house at South Acton (1878) are given. In a recent note from Dr. Knowlton he adds, "I send you the missing links in your sketch of our folks in Acton. I spent much time and labor in preparing the sermon from which you copy; I cannot go over the ground again. I think its statements are all correct."

The first Universalist sermons were preached in Acton by Rev. Hosea Ballard as early as 1814 or 1815.

January 19, 1816, the first Universalist Society of Acton was organized, consisting of eleven members.

In 1821 and 1822 Rev. Dr. Benjamin Whittemore preached one-half the Sabbaths in Acton in halls, school-houses and private residences.

January 27, 1821, the First Universalist Society of Acton was legally incorporated. It consisted of fifty paying members, two years after of sixty-one and eventually of over eighty paying members.

December 17, 1833, a church of thirty-nine members was formed as the result of the labors of Rev. Joseph Wright, who, that year, became pastor of this society.

October 4, 1834, the Boston Association of Universalists met at Acton. During the next six years the religious services were in the First Parish Church and well attended.

June 29, 1836, Rev. Isaac Brown became the resident minister of the society and continued in this relation three years.

July 4, 1837, Rev. Isaac Brown was formally installed as pastor of this church with appropriate services.

In 1842 an attempt was made to resuscitate the First Parish by uniting all the elements not affiliating with the Evangelical Church. At about this time there was a Methodist Church organized and there was Methodist preaching for a few years.

About 1850 our interest there, at Acton Centre, peacefully expired.

From 1850-58 there was no regular Universalist preaching in Acton. In 1858 halls were provided in South and West Acton, and Rev. J. M. Usher preached in these two places for a period of six years. The parishes in South Acton and West Acton, although entirely separate, were started at the same time and have always worked together in perfect harmony. The same pastors have officiated in each place. Rev. J. M. Usher, an energetic and well-read man, was really the founder of both.

After the retirement of Mr. Usher, in 1864, Rev. Edwin Davis became pastor of both these societies and continued until April, 1872; Rev. W. W. Harward, three years; Rev. N. P. Smith, one year. Rev. I. C. Knowlton, D.D., assumed his charge in October, 1875, fifteen years, and is still occupying the pulpits, with acceptance, in his seventy-first year.

In 1868 the West Acton Society built, furnished and paid for a very pretty and pleasant meeting-house, which it has used and greatly enjoyed ever since.

In 1861 the South Acton Society moved into Exchange Hall, a large and handsome auditorium, where it worshiped for seventeen years.

In the spring of 1876 a church of more than thirty members was organized at West Acton. Present number of members, about sixty in all.

On February 21, 1878, a handsome and completely furnished church edifice was dedicated, with appropriate services, at South Acton.

Each parish, at the date of this writing, though depleted by the removal of many of its young people to city centres, is enjoying a fair state of prosperity. Each meeting-house is pleasant and convenient, kept in good repair and occupied every Sunday.

THE BAPTISTS.—The Baptist Church is located at West Acton. It was organized July 10, 1846, with a membership of twenty-three persons. The present membership is over one hundred; the average congregations 200. The Sabbath-school has always been a flourishing adjunct of the church, now numbering one hundred and fifty. They have an attractive meeting-house, located centrally in the village, with all the modern contrivances to promote the interest and profit of the worshippers. They have a large and instructive library connected with the society, adapted to give general culture as well as religious instruction. The following is a list of the pastors and the length of their pastorates: Rev. Horace Richardson, seven years; Rev. W. H. Watson, seven years; Rev. Jacob Tuck (2d), three years; Rev. W. K. Davis, five years; Rev. J. C. Boomer, four years; Rev. J. R. Haskins.

Rev. C. L. Rhoades came to the West Acton Baptist Church, as its pastor, from the Lexington Church. He was a man of great enthusiasm, and during his pastorate of four and one-half years his hands were filled with work. He resigned in January, 1888, to go to the Fourth Street Church, of South Boston.

Rev. Frank A. Heath came direct from Hamilton Theological Seminary and was ordained June 7, 1888. He is now in the midst of his work, with able and liberal assistants in active co-operation, and with high hopes of a success in the future exceeding any record of the past. Their first meeting-house, dedicated July 19, 1847, was burned July 2, 1853; their second meeting-house was dedicated September 19, 1854.

DANIEL WETHERBEE, Esq. (East Acton).—Few men have held a more prominent position in Central Middlesex. From his youth he was acknowledged as a leader. His early education commenced and was continued in the old tavern situated on the "Great Road" from Fitchburg to Boston, of which he became proprietor in later years. Wetherbee's Tavern was known from the Canada line to our metropolis, and was a temporary Mecca of drovers and drivers of baggage-wagons for more than half a century preceding the advent of railroads.

The small stream running through his ancestral domains he at once improved and enlarged, till Wetherbee's Mills comprised one of the most important points in the illustrated map of the county. Of public life he had his full share. He was town clerk, assessor and selectman for many years, and five years a representative to the Legislature. He was largely instrumental in establishing the State Prison at Concord Junction. He became one of the originators of the Lowell and Framingham Railroad, and a permanent director. He married Clarissa Jones, daughter of Abel Jones. He died July 6, 1883, aged sixty-eight years, leaving a widow and seven children.

THE AMERICAN POWDER-MILLS.—These mills, incorporated under the laws of Massachusetts, having their business office in Boston, are located in the corner of four towns—Acton, Sudbury, Maynard and Concord. They cover an area of 401 acres. The capital is \$300,000. The annual production is in the range of \$240,000.

These mills were started by Nathan Pratt, in 1835, and they were run by him till 1864; then the property was sold to the American Powder Company, and that company was formed by the union of Massachusetts Powder-Mills, located at Barre, Mass., and incorporated under the name of the American Powder Company, 1864.

They did a very successful business, and went out of business in 1883, and were succeeded by the American Powder-Mills. About sixty men are employed at the present time. They are doing a large and successful business.

The patriotic emergencies of Acton have always

had at hand a bountiful supply of the very choicest quality of powder, and at reasonable rates.

SOUTH ACTON.—Fifty years ago the principal business at South Acton was done at the Faulkner Saw and Grist-Mill.

The houses within a quarter of a mile of the depot were those of the tavern, for many years the residence of Aaron Jones; the house of Abel Jones, his son, across the road opposite, on the hill, and that of Col. Faulkner.

Besides these there was a small school-house, a few barns, cooper-shops, stables and out-buildings. Now there are over a hundred pleasant residences, a number of mills, stores and factories, a fine church, assembly hall, chapel, a commodious school-house, large store structures, railroad facilities for traffic and travel, and a village noted for its comfort and neighborly and social culture.

Tuttle, Jones & Wetherbee.—On the rise of ground facing the Fitchburg Railway track stands the central structure of the vicinity—the hub of trade for years of this section of country. This firm is composed of these gentlemen, in the order of their connection with it: James Tuttle, Varnum Tuttle, sons of Francis Tuttle, Esq.; Elnathan Jones, a grandson of Aaron Jones, and J. K. W. Wetherbee, each marrying sisters of James and Varnum. No other than these have ever been in the partnership. The present name was adopted February 8, 1867, when Mr. Wetherbee was admitted. Mr. Jones joined about 1852, and between these dates it was James Tuttle & Co. From 1843 to 1852 it was J. & V. Tuttle. James Tuttle began trade on his own account in 1839. A year or so here and three at Acton Centre, and he was ready to start with his brother at the South Village, which had just been reached by a railroad from Boston. Then the lower part of the building now occupied by jeweler Baldwin was constructed, a single story, with its basement, for the beginning of these operations. The house of Mr. James Tuttle is to the rear of this enlarged structure. These young men of twenty-five and twenty-one started with good pluck and with a will to succeed, but with little idea of the possibilities of their future. The railroad terminus was then at West Acton. All things seemed at the time to favor that village. Long after they started no little trade went past them to the prosperous concern of Burbeck & Tenney. That was then called Horse-power Village, and this nothing but Mill-corner, where merged a half-dozen roads from Box-boro', Acton Centre, Westford, Sudbury and Stow. That was a stage, this only a saw and grist-mill centre.

In a few years they won the good start which is half the battle.

In those early days they did a business of \$25,000 per year. This gradually grew until it reached a quarter of a million, with appliances to match the growth. In 1850 they moved to their new store on

the site of the present grocery. This building consisted of basement, a full story above and an attic floor. Shed, carriage-house and barn stretched from it back along the Concord pike.

James Tuttle has always been a shrewd and jolly helmsman, and when he set his craft on these waters he was bound to steer straight to the destined port. This store was burned January 20, 1866. Within a year the restored building was ready for a new launch, and it has floated safely on its way ever since.

The large dry-goods store on the hill was built in 1860. It is 70 by 38, and 60 feet high, with a central tower on front.

Exchange Hall, up three flights from the ground at front, has been devoted to public uses from the outset. The Universalists worshiped there until the new church was occupied in February, 1878. Every sort of gathering and entertainment has been held within its walls. Its dances, socials, concerts, lectures, campaign meetings, caucuses and conventions have made it well and widely known.

The prosperity of the firm rests upon its equity, Yankee sagacity and thrift. The gentlemen connected with it, many and various, stand high in the regard of their fellow-townsmen. The senior, Mr. James Tuttle, has been selectman, assessor, overseer of the poor, chairman of committee for building school-house, church and other public buildings. Mr. Jones has been prominent in town affairs. Mr. Varnum Tuttle has been a stanch pillar of the chapel enterprise. Mr. Wetherbee has been for fifteen years postmaster at Acton, town treasurer for years, which office he still holds; selectman for many years, and trustee and executor of many private estates.

J. W. Tuttle & Sons.—Mr. Joseph Warren Tuttle, brother to Francis Tuttle, Esq., was the senior member of this house, and lived in one of the finest mansions at South Acton. The business is a wholesale commission-merchant's for the sale of all kinds of country produce; office, No. 16 and 18 Clinton Street, Boston. An honorable and successful career of forty-five years has given the house a high standing in the great thoroughfares of trade. The business was founded in 1843 by J. W. Tuttle.

In 1848 Mr. George W. Tuttle was admitted to partnership, in 1874 Charles Jones, in 1875 Charles H. Tuttle, and 1883 Herbert A. Tuttle.

J. A. Bowen.—The shoddy enterprise at South Acton, now in charge of Mr. Bowen, is one of importance. The privilege and land were first obtained of Abel Jones for a woollen-mill during the war, by S. S. Richardson, by whom the first dam was erected. The amount of the shoddy and extract productions for a year is now estimated in the vicinity of \$100,000 per year. The business has been profitable and employs over thirty hands. Mr. Bowen, the proprietor, is a gentleman of quiet habits, of enfeebled health, yet an intelligent, reputable and liberal citizen of the vil-

lage, whose enterprise in the successful management of the interest, and whose generous contributions in the way of public improvement are appreciated by the community.

Charles Augustus Harrington.—He was born in Shrewsbury, Worcester County, Mass., December 22, 1814, where he lived the first thirty years. He married, May 31, 1866, Mary J. Faulkner, daughter of Colonel Winthrop E. Faulkner. He came from Wisconsin to Acton in 1867, and has resided in town most of the time since. Though interested in public affairs he has never sought or held official positions of responsibility except to act as assessor for Acton four years. He is an earnest Republican in politics and liberal in his support of enterprises for the benefit of the community. He has been largely instrumental in giving to South Acton its new impetus towards a prosperity exceeding all previous records. He built his own elegant mansion which overlooks towards the west, the Faulkner house and the water scenery of the "Big Brook," and the fine mansion recently built on the western and northern slopes of the village; the retreating low-lands of the New England settlement are also seen in the distance, with clusters of comely dwelling-houses.

The thirty daily incoming and departing trains which pass on the Fitchburg Railroad help the effectiveness of this panorama of beauty as seen from the windows of Mr. Harrington's home. He has rebuilt and enlarged the Faulkner Mills, put in an ice-house, store-house, barn and an elevator for the flour and grain business at an expense of \$17,000. He rebuilt the piano-stool factory which was burnt November 9, 1886, putting in steam at an expense of \$10,000. The estimated productions of this factory, run by Mr. Chadwick, annually are \$75,000, which are shipped to all States east of the Mississippi and to Canada.

At the grain and flour-mills, now in charge of F. J. Hastings & Hezleton, a very heavy business is now carried on. No place in this region has a more complete stock for feed, fertilizing, garden seeds, farming tools; flour comes in and goes out by the car-load. It is the heaviest grain business between Waltham and Fitchburg; estimated annual amount, \$150,000.

THE ACTON LIGHT INFANTRY was organized in 1895 and then consisted of forty-one members, including officers. The following gentlemen previous to 1830 commanded this company: Paul Brooks, Simon Hosmer, Abijah Hayward, Silas Jones, James Jones, Aaron Hayward, Jonathan Hosmer, John Fletcher, John Handley, Jr., Simon Davis, Abel Furbush, George W. Tuttle and Thomas Brown.

The following is the list of town clerks: Thomas Wheeler, 1735-36; Simont Hunt 1737-43; Jonathan Hosmer, 1744-55; John Davis, Jr., 1756-57; Jonathan Hosmer, 1758-61; Francis Faulkner, 1762-96; Aaron Jones, 1797; John Edwards, 1798-99; David Barnard, 1800-07; John Robbins, 1808-17; Joseph Noyes, 1818; John Robbins, 1819-20; Joseph Noyes,

1821; Abraham Conant, 1822; Francis Tuttle, 1823-27; Silas Jones, 1828; Stevens Hayward, 1829; Francis Tuttle, 1830.

Deacon Ephraim Robbins and Asa Parlin, Esq., were of Carlisle when it was a district of Acton.

Captain Daniel Fletcher was chosen a delegate to the convention in Boston, 22d September, 1768; Francis Faulkner and Ephraim Hapgood to the Provincial Congress in Concord, October, 1774; Josiah Hayward to Cambridge, February, 1775, and again in May; Francis Faulkner to the convention in Cambridge, for forming the Constitution, September, 1779; Captain Joseph Robbins to the convention in Concord, to regulate the prices of articles of produce, etc., October, 1779; Simon Tuttle and Thomas Noyes to Concord 23d of May, 1786; and Asa Parlin to the convention in Boston in 1788, to ratify the Constitution of the United States.

REPRESENTATIVES.—Nathan Brooks, 1836, 1837, 1838, 1840; Phineas Harrington, 1841-42; Ivory Keyes, 1843, 1846; Daniel Wetherbee, 1844, 1845, 1848, 1853, 1857; Rev. James T. Woodbury, 1850-51; Moses Hayward, 1852; Joseph Noyes, 1854; Aaron C. Handley, 1855, 1863; William D. Tuttle, 1856; John Fletcher, 1861; Luther Conant, 1866, 1886; George W. Gates, 1870; George C. Wright, 1873; Moses Taylor, 1881; Charles Wesley Parker, 1884; Aaron C. Handley, 1889; Daniel Fletcher, 1768; Josiah Hayward, 1774-75; Mark White, 1776; Simon Hunt, 1780; Francis Faulkner, 1782, 1785; Thomas Noyes, 1787, 1789; Ephraim Robbins, 1790; Jonas Brooks, 1791, 1802; Asa Parlin, 1803; Jonas Brooks, 1804; Samuel Jones, 1805-06; Jonas Brooks, 1807-11; Stevens Hayward, 1812; Joseph Noyes, 1813-18; Joseph Noyes, 1821; Francis Tuttle, 1823-27; Steven Hayward, 1828-29; Francis Tuttle, 1830-31.

Forty-four years during the ninety-five since incorporation the town was not represented in the General Court.

SENATORS.—Stevens Hayward, 1844, 1845; Winthrop E. Faulkner, 1853, 1854; John Fletcher, 1870, 1871.

TOWN CLERKS.—Francis Tuttle, Esq., 1830-32, 1834, 1835; Silas Jones, 1832-33; J. W. Tuttle, 1836, 1838; Daniel Wetherbee, 1839-54; William D. Tuttle, 1855.

GRADUATES OF COLLEGE.—Nathan Davis, son of Samuel Davis, born November 30, 1737; graduated at Harvard College 1759; ordained minister at Dracut 20th November, 1765; dismissed in 1785; removed to Boston and was appointed chaplain at Fort Independence, and a review officer; died March 4, 1803, aged 65.

John Swift, born November 18, 1741; graduated in 1762; settled as a physician in Acton; died in 1775.

Asa Piper, son of Josiah Piper; graduated in 1778, and was ordained at Wakefield, New Hampshire, 1785; was a retired pastor in that place after leaving his pastoral charge.

Solomon Adams, son of Lieutenant John Adams; born March 18, 1761; graduated in 1788; ordained pastor at Middleton, October 23, 1793; died September, 1813, aged 53.

Daniel Brooks, graduated in 1794; settled as a trader in Westmoreland, where he held the office of justice of the peace; died at Springfield, Vermont.

Thomas Noyes, son of Thomas Noyes, born February 5, 1769; graduated in 1795; ordained pastor of Second Church in Needham, July 10, 1799; dismissed in 1833, after a faithful discharge of his official duties thirty-four years. To his clerical brethren he set an example of diligence, punctuality and perseverance. As a preacher he was respectable, grave and sincere, practical rather than doctrinal. He brought beaten oil into the sanctuary. He was a descendant of the Puritans and a consistent Congregationalist.

Luther Wright, born April 19, 1770; graduated in 1796; ordained pastor of the First Parish in Medway, June 13, 1798; dismissed September, 1815; installed at Barrington, Rhode Island, January 29, 1817; dismissed July 5, 1821; he resided at Holliston afterwards.

Moses Adams, son of Rev. Moses Adams; born November 28, 1777; graduated in 1797; settled as a physician in Ellsworth, Maine, and was sheriff of the county of Lincoln.

William Emerson Faulkner, son of Francis Faulkner, Esq.; born October 23, 1776; graduated 1797; read law with his brother-in-law, the Hon. Jabez Upham, of Brookfield, with whom he formed a partnership in business; he died October 1, 1804, aged 28, and left a most worthy character.

Josiah Adams, son of the Rev. Moses Adams; born November 3, 1781; graduated in 1801; read law with Thomas Heald, Esq.; was admitted to the bar, June, 1807, and settled in Framingham. He delivered the Centennial address in 1835.

Luther Faulkner, son of Francis Faulkner; born May 7, 1779; graduated in 1802; was a merchant in Boston.

Jonathan Edwards Scott, a native of Nova Scotia; a resident in Acton before he entered college; graduated in 1802; commanded a vessel at sea.

Joseph Adams, son of Rev. Moses Adams; born September 25, 1783; graduated in 1803; settled as an attorney in West Cambridge; died June 10, 1814.

John Ruggles Cutting, son of William Cutting; graduated at Dartmouth College, 1802; ordained at Waldoborough, Maine, August, 1807; dismissed March, 1812, and was afterwards a teacher of youth.

Henry Durant graduated at Yale College, 1828; was a tutor in Yale; all these, excepting the two first and the last, were prepared for college under Rev. Mr. Adams.

Rev. James Fletcher.—He was born in Acton, September 5, 1823, and was the son of Deacon John and Charissa Jones Fletcher. He fitted for college at

Leicester Academy, Massachusetts, and New Ipswich Academy, New Hampshire. He graduated at Dartmouth College in 1843, at Andover Theological Seminary in 1846, and was a resident licentiate a year; pastor of the Maple Street Congregational Church, Danvers, fifteen years; principal of the Holten High School, Danvers, five years; of Lawrence Academy, Groton, six years; of Burr and Burton Seminary, Manchester, Vt., three years. He has taught forty-nine terms in all; been committeeman eighteen years and superintendent of schools six years. He married in Andover, Mass., October 10, 1849, Lydia Middleton, daughter of Rev. Henry Woodward, missionary to Ceylon, granddaughter of Prof. Bezaleel Woodward, of Dartmouth College, and adopted daughter of Hon. Samuel Fletcher, late of Concord, New Hampshire.

George G. Parker.—He was born in Acton, June 19, 1826. He was the oldest son of Asa Parker and Ann Margaret (McCaristone) Parker. He fitted for college at Lawrence Academy, Groton, and Appleton Academy, New Ipswich, N. H. He taught school in Acton and elsewhere. He graduated from Union College, New York, in 1852; studied law at the Albany Law School, New York, and was admitted to the bar of that State.

In 1856 he settled in Milford, Mass., and was admitted to the Worcester Co. bar, where he has since practiced. For many years he has been chairman of the Board of School Committee of Milford, senior warden of the Trinity Episcopal Church, Milford. In politics he was a Republican, but joined the Greeley party in 1872, was a member of the Cincinnati Convention of that year, and represented the Democratic party in the Legislature in 1876. December 26, 1854, he married the eldest daughter of Rev. James T. Woodbury, Augusta. Their child, Margaret Augusta, died at Milford in 1861.

William M. Parker, M.D.—He was born in Acton, June 15, 1828, son of Asa Parker and Ann Margaret (McCaristone) Parker. He acquired a thorough academic education, and entered the Berkshire Medical Institution at Pittsfield, and graduated in 1853. He practiced in Shutesbury about five years. He there served as a member of the School Committee. From 1856 to 1860 he was surgeon of the Tenth Regiment of Massachusetts militia. In 1858 he removed to Milford, and there followed his profession till his death, March 1, 1883. He was a member of the Massachusetts Medical Society and of the Massachusetts Medico-Legal Society, and at the time of his decease was State Medical Examiner in Worcester County. He was married June 25, 1872, to Miss Emma T. Day, whose death preceded his own by about six months. He left his only child, Lillian Blanche, to Mr. and Mrs. George G. Parker, by whom she was adopted. The Milford historian, Mr. Ballou, speaks of his social standing as being in accord with the doctor's eminence as a physician and citizen.

Hon. Henry L. Parker.—He was born in Acton. He was the son of Asa Parker and Ann Margaret (McCaristone) Parker. He graduated at Dartmouth College in 1856. He was admitted to the bar of Worcester County in 1859, and commenced the practice of law at Hopkinton, Mass., and was trial justice for about three years; removed to Worcester in 1865, where he has been in practice since.

In 1886 and 1887 he was representative to the General Court from Worcester. In 1886 he was a member of Committee on Probate and on Drainage. In 1887 he was chairman of Committee on Probate. In 1889 and 1890 he was Senator from the First Worcester Senatorial District. In 1889 he was member of Judiciary Committee and chairman of Public Service. In 1890 he was appointed chairman of the following Committees: Judiciary, Rules, Election Laws and Special Elections. In Worcester was six years a member of the School Board. For the past two years he has been president of the Worcester County Horticultural Society and senior warden of St. Mark's Episcopal Church, also member of the Board of Associated Charities.

Rev. Ephraim Hapgood, son of John and Clara Hapgood, graduated at Brown University in 1874, pursued theological studies at Newton Theological Seminary; was settled in Seward City, Nebraska.

Rev. Josiah W. Brown graduated at Dartmouth and Andover Theological Seminary.

Edward F. Sherman.—Born at Southeast Acton, graduated at Dartmouth College in 1843, and practiced law in Lowell. The mills at Southeast Acton called the Sherman Mills.

Luther Jones, M.D.—He was the son of Silas Jones, and graduated at Dartmouth College in 1841.

Eben H. Davis.—He was born in Acton, 1840. He was the son of Eben Davis. He graduated at Kimball Union Academy in 1857, and at Dartmouth College in 1861. He took a course at the Harvard Law School, and then entered upon his life-work, that of teaching. He was principal of the Belmont High School, and was then elected, in 1869, superintendent of the schools in Nashua, N. H., where he remained a year and a half, when he resigned and became the superintendent of the schools in Woburn, which position he held for thirteen years, and has been superintendent of the schools in Chelsea six years. He has made a specialty of primary methods in teaching, has written for educational magazines, both in the South and in the Northeast, has lectured in several States at Institutes, and is now editing a series of readers, in behalf of the Lippincott Publishers.

Julian A. Mead, M.D.—He was born in Acton; the son of Oliver W. Mead. He was fitted for college at Exeter, N. H.; graduated at Harvard College and Harvard Medical School: studied over two years in the medical schools and colleges of Europe, and is now in active practice in Watertown, Mass.

George Herman Tuttle, son of George Tuttle; pre-

pared for college at Concord High School; graduated at Harvard, 1887; has been one year at the Medical University of Pennsylvania; one year at Harvard Medical School.

Frederick Brooks Noyes, son of T. Frederick Noyes, has graduated from Andover Theological Seminary, and nearly completed his course at Harvard University.

PHYSICIANS.—*Dr. John Swift*, son of the minister, was the first physician.

Dr. Abraham Skinner was from Woodstock, Conn., and commenced practice in Acton in 1781, where he died, April 16, 1810, aged 53. He married Sarah, daughter of Francis Faulkner, Esq., 1788.

Dr. Peter Goodnow was from Bolton; commenced practice in Acton 12th October, 1812; left February 18, 1827, and was afterwards a merchant in Boston.

Dr. Bela Gardner resided here from 1823 to 1828; removed to Vermont.

Dr. Harris Cowdry, born at South Reading; graduated at the Berkshire Medical Institution, 1824; commenced practice in October, 1826.

Paul C. Kittridge, from Littleton, commenced practice in Acton August 30, 1830.

Harris Cowdry, M.D., was born at South Reading (now Wakefield), Mass., September 23, 1803. He studied with Dr. Hunt, of that place, and graduated at the Berkshire Medical School, Pittsfield, Mass.

At eighteen he applied himself to the vocation of a nurse, and in this work he acquired a taste for the medical profession. He entered upon this pursuit with the greatest enthusiasm. He grappled bravely with the obstacles that met him at the outset of his profession, and soon took a front rank.

In choosing a field for practice, several places were in mind. The fruits which abounded in Acton, even at that early date, attracted his notice, and here he determined to locate. Possibly, other attractions may have helped his decision, for, in due time, he found a helpful companion in Miss Abigail Davis, daughter of Eben Davis, a native of Acton. Here he practiced his profession for nearly half a century—nearly the average life of two generations.

The country in Acton and the adjacent towns is but sparsely populated, and his rides were long and fatiguing.

As a physician he was faithful and conscientious to all—both rich and poor. With the latter he was attentive and sympathizing, and in his charges lenient. The case of each patient he made an especial study. He was continually gathering up improved methods of practice from medical works and from the experience of friends, not allowing his mind to run in ruts.

As a general practitioner he excelled. Others in the profession may have been his superiors in some special branches, but for the varied work to which he was called, few have been his equals. As he entered the sick-room he brought a cheerful countenance and

a happy style of conversation, inspiring confidence, both in the patient and attendants. He was fond of children, and apt in discovering and treating their ailments.

He was an early member of the Evangelical Church of Acton, and its firm supporter to the end. He was a reformer, zealous in the cause of temperance and anti-slavery.

He was interested in education; a superintendent of the schools sixteen years, and chairman of the School Committee at the time of his death. He was fond of music, and, however pressing his professional cares, seldom was he missed from the village choir, seldom even from the rehearsal.

He was an ardent patriot. As a specimen of the man at the outbreak of the Rebellion, his letter to Captain Daniel Tuttle, dated May 1, 1861, is here given:

"You can't tell what an anxious night we spent after the telegraph had flashed it up to South Acton that the Sixth Regiment had been attacked in Baltimore. We are proud of you, and, more than that, we are glad the friends of freedom the world over know of your noble bearing.

"We know if the South don't back down, and there comes a fight, the Davis Guards will do their duty bravely and well.

"If prayers and tears can help you, be assured you have them all. You never saw such a town-meeting as we had last Saturday. We are ready to do anything for the soldiers."

He was one of those few men who never grow old. He was in his seventy-third year during that last winter campaign. His locks were silvery, but his step was elastic, his eyes flashed with the fire of early manhood, and he dashed through the streets, on his way to the sick, whether the call came by day or night, in sunshine or storm.

He died, as he wished, with the harness on. That Centennial Day at old Concord, April 19, 1875, was too much for him. The severity of that raw, chilly day gave him a fatal attack of influenza, from which he died, after a short but painful sickness, May 6th.

More died from the exposures of that day than from the original 19th, a hundred years before, and Dr. Cowdry was one of these patriotic martyrs.

He had two children: Arthur H. Cowdry, a successful physician in Stoneham, Mass.; Mrs. Helen Little, widow of Charles Little, M.D., whose active professional life began in Acton in 1866, and his marriage to Dr. Cowdry's only daughter soon after, and his death at the age of thirty-three, after a promising but brief professional career.

Charles Little, M.D.—Dr. Little was born in Bos-cawen, N. H.; graduated at Dartmouth College in 1860, and received his medical degree in the same institution in 1863; died November 16, 1869, thirty-two years old. During the same autumn he entered the navy as assistant surgeon, where he remained until

the close of the war. Unwilling to enter upon a private practice without a more thorough preparation for his work, he passed the winter of 1865-66 at the College of Physicians and Surgeons, and at the hospital in New York. He commenced his active professional life at Acton in the spring of 1866, and soon after married the only daughter of Dr. Harris Cowdry, of Acton.

Dr. Little was a good classical scholar, and had an excellent knowledge of the minutiae of his profession. His practical career, though short, was long enough to give him a place in the confidence of the people, and betoken a useful and successful career. He was modest in his manners, but outspoken for the right. In the home circle he was best appreciated. He was a genial husband, brother and friend. His end was peaceful and like a summer's cloud.

John M. Miles, M.D.—He was born in Temple, N. H. His father was a minister in Temple for several years, where he died. He married a daughter of Josiah Taylor, of Temple. He was educated at a medical college. He practiced in Boxboro' and Littleton and settled in Acton in 1843, and practiced here until his death, March 22, 1865, aged sixty-three years and five months.

Isaiah Hutchins, M.D.—He was born in Westford, Middlesex County, Mass., September 23, 1829; lived on his father's farm in Groton till eighteen years of age. His education was in the public schools and Lawrence Academy at Groton. He entered the office of Dr. Walter Burnham, of Lowell, as a student in the study of medicine, and graduated from the Worcester Medical College in 1852, and the same year began the practice of medicine at West Acton, and for most of the time since has continued in it at the same place.

He was in the Union army during the nine months' campaign, acting assistant surgeon most of the time in the same regiment, Sixth Massachusetts, during 100 days' campaign as second lieutenant Company E. He married a daughter of Alden Fuller, West Acton.

Charles Barton Sanders, M.D., born in Lowell, Mass., February 19, 1844. He received his early education in the common school at Berwick, Me., and at Berwick Academy, South Berwick, Me. Enlisted as private August 11, 1862, in Rollingsford, N. H., and served with the Thirtieth New Hampshire Volunteers (being promoted to corporal) until March 1, 1864, when he was discharged by orders of the War Department to receive commission as first lieutenant in the United States colored troops, and was assigned to the Thirtieth Regiment; was through the Wilderness campaign and was taken prisoner July 30, 1864, at the battle of "Crater," front of Petersburg, and was confined in a rebel prison at Columbia, S. C., seven months. Mustered out of service December 10, 1865, having served as adjutant of regiment from 1st of June, 1865. Received medical education at Harvard and Bowdoin

June 1, 1869. His early years of practice were in Lowell. In July, 1875, he located at Acton Centre. September 4, 1878, he married Elizabeth Taylor, daughter of Moses Taylor, Esq.

LAWYERS.—*Samuel Jones, Esq.*, resided here as an attorney in 1805-06, but left the town and died in the South.

Erdinand Adolphus Wyman, Esq.—He was born in Waltham, Mass., December 28, 1850. He is a practicing lawyer, resident in Hyde Park, which place he represents for the second term in the Massachusetts Legislature. He was educated in the schools of West Acton. He was assignee of T. Shaw & Brothers, the extensive leather manufacturers, and as assignee or trustee has settled other large estates. He was admitted to the Suffolk bar in 1886. He is a member of the House Committee on Railroads.

A. A. Wyman, Esq.—Mr. Wyman's full name is Alphonso Adelbert Wyman; he was born in West Acton January 29, 1862. He was educated in the common schools of Acton and Lawrence Academy, Groton; he entered Phillips Exeter Academy, 1875; graduated at the head of his class of thirty in 1879. He was president of the Golden Brand, a literary society founded in 1817. He was managing editor of the *Eronian*, a school paper, and he was class historian by unanimous choice of his class. In 1879 he entered Harvard College, from which he graduated with honors in 1883. He was one of twenty-five in a class of 200 elected to the Phi Beta Kappa, holding the highest rank in scholarship. In December, 1883, he began the study of law in the office of Henry W. Paine and William Varen Vaughan, 20 Washington Street, Boston, and was admitted to the Suffolk bar in June, 1885, since which time he has been engaged in the practice of his profession in Boston and West Acton. On July 28, 1886, he was married to Laura Aldrich, and his residence has been in West Acton.

Francis C. Nash, Esq., a native of Maine, graduated at Tufts College, 1863; admitted to practice in Maine in 1866, and was in active practice in the Maine courts for several years. He opened an office in Boston (54 Devonshire Street) in 1880, residing at West Acton, at the homestead of Mr. John Hapgood, whose daughter Clara he married. He has been on Board of School Committee as chairman and superintendent of schools in Acton, and held other positions of trust.

Mrs. Clara Hapgood Nash, daughter of John and Clara Hapgood, was admitted to practice before the Supreme Judicial Court of Maine, October, 1872. She was the first lady admitted to the practice of the court, in which she was for several years in co-partnership with her husband. She was, before her law practice, a teacher in public schools, was for a time an assistant principal of the Danvers High School.

Charles B. Stone, Esq.—He was admitted to the Suffolk bar February, 1890.

FROM SHATTUCK'S HISTORY OF CONCORD.—A post-office was established in 1828, and Silas Jones, Esq., was postmaster.

Appropriations :

Object	1750.	1760.	1770.	1780.	1790.	1800.	1810.	1820.
Minister	£50	£52	£70	£3562	80	353	353	630
Schools	13	12	24	2000	49	333	450	450
Roads	26	70	61	800	120	400	500	600
Incidental	20	12	80	1000	100	500	10,000	1400

In 1826 the aggregate time of keeping schools was 28 months, attended by 412 pupils, (227 males, 185 females); 139 under 7 years, 160 from 7-14 and 113 from 14 upwards.

In 1825 there were 2 carding-machines, 2 fulling-mills and 4 saw-mills; valuation, \$862,928.

Barrels were the staple production of the town, 20,000 estimated as the annual production.

The population in 1764 was 611; in 1790, including Carlisle, 853; in 1800, 901; in 1810, 885; in 1820, 1047; in 1830, 1128.

In 1821 there were 140 dwelling-houses, 230 other buildings, 513 acres of tillage land on which were raised 705 bushels of rye, 932 of oats, 5833 of corn, 75 of barley, 140 of beans; 1527 acres of mowing land, producing 956 tons of hay; 2026 acres of pasturing, keeping 939 cows, 196 oxen; 2055 acres of wood, 3633 acres of unimproved, and 1311 unimprovable; 240 used as roads and 500 covered with water.

It then had 3 grist-mills.

MISCELLANIES.—The dark day, so called, was May 19, 1780. Joseph Chaffin died in 1836, eighty-four years of age. Solomon Smith, the father of Luke, died July 25, 1837, aged eighty-four. One hundred and thirty-two dwelling-houses in South Acton in a range of a mile from the centre of the village; 109 in West Acton; 60 in the centre. Seventy thousand barrels of apples are shipped from West Acton per year. Between eight and nine thousand barrels are raised within a mile of Acton Centre and of the choicest quality and variety.

QUARRY WORKS IN NORTH ACTON.—This enterprise has opened under the management of David C. Harris and John Sullivan, with encouraging prospects. They already do an extensive business, sending their granite as far west as Nebraska, and as far south as Pennsylvania. The granite has a peculiar merit in its tint, fineness of grain and durability, and gives a growing satisfaction to those who have tried it.

It most resembles what is known as the Concord, N. H., granite, though in some respects it is thought to be superior to that.

The granite has been known for quite a number of years.

A part of the monument at Lexington came from this quarry, and was drawn by oxen.

THE GREAT BLOW—It came Sept. 23, 1815. From "Our First Century," by R. M. Devens, in the article relating to the gale, is the following statement :

"In the little town of Acton the damage amounted to forty thousand dollars.

"This gale was severe at the Centre, blowing down several of the horse sheds around the meeting-house. It came from east and went to the west. It was especially severe among the forests on Myers hill opposite the residence of Charles Robbins, in the east part of the town. It is remembered by several now living, and they have never forgotten the scene of falling forests."

The area of Acton is 12,795 acres. Its valuation in 1886, \$1,286,089. Its population by the last State Census in 1885 was 1785; dwelling-houses, 413. The number of children between the ages of 5 and 15 in 1889 was 267. In 1885 there were 190 farms, the product of which was \$209,533. The product of the dairies, \$77,065. Hay, straw and fodder, \$50,132. Vegetables, \$19,417; 29,756 fruit trees, 1467 neat cattle, 240 horses. Aggregate of goods in 1885, \$332,345. Valuation in 1888, \$1,310,947. School property, \$22,600. Two thousand volumes in the West Acton libraries; 4000 volumes in William A. Wilde's Memorial Library. The general healthfulness of the climate is well established by the records of the past. Fatal epidemics have been rare. Seldom have the years been marked with prevailing sickness.

The average longevity for the last 26 years including those dying in infancy, has been 44 years and 6 months. This may be taken as an approximate average for the entire history of the town. Longevity has always been a feature of the locality.

During these 26 years the average number of deaths in town has been 30; the total, 789. Those reaching 60 years, 289; those reaching 70 years, 211; those reaching 80 years, 98; those reaching 90 years, 14. The highest age reported is that of Mrs. Mehitahle Piper, 101 years and 2 months, March 25, 1872. She was the wife of Silas Piper.

From Shattuck's "History" we learn that during the twenty years subsequent to 1800 there were published 208 intentions of marriages, and there occurred 161 marriages, 344 births, 302 deaths, of whom 72 died under one year old, 32 were 80 and upwards, 8 were 90 and upwards and one lived 99½. The average number annually was 15, about one in 70 of the whole population. The mean average age was 35.

LONGEVITY.—The causes explaining this longevity are not obscure. They may be found in the frugal habits of the people; in the tonic air of the hills; in the pure water of the springs; in the excellent drainage of the low lands, by means of running brooks and larger streams; in the variety of the soil, fertile enough to encourage a diligent culture; in the landscapes ever present and ever shifting to accommodate the moods of the resting or laborious hours; in the vicinity of the ocean, near enough to enjoy its cooling baths in the heat of summer, and distant enough to escape the extreme chill of the more vigorous months.

RESIDENCE OF MRS. MARY SKINNER,
ACTON, MASSACHUSETTS.

Henry Thimble

DEATHS OF THE OLDEST PERSONS.

Benjamin Brabrook, April 27, 1744; James Brabrook, died at Nova Scotia, Fort Lawrence, May 8, 1756; Samuel Brabrook, died at Rensford Island, July 14, 1756; Francis Baker, 1815; Isaac Davis, Sr., 1740; John Davis, died in Littleton, Oct. 6, 1753; Ebenezer Davis, died March 5, 1755; John Edwards, died Sept. 25, 1760; Nathaniel Edwards, April 6th, about 1800, 80 years old; Dea. Joseph Fletcher, Sept. 1, 1746; Ammi Faulkner, Aug. 4, 1756, 64 years; Jonathan Hosmer, Jr., Oct. 1, 1777; Ephraim Hapgood and Nathaniel, lost in a vessel at sea coming home from Maine, Nov. 1, 1780; Samuel Jones, Nov. 29, 1796; Phineas Osgood, on Daniel Tuttle place, Dec. 27, 1752; Samuel Prescott, July 25, 1758; George Robbins, July 24, 1747; Nathan Robbins, June 7, 1764; Thomas Smith, May 10, 1758; David Stimson, Sept. 25, 1746; Daniel Shepherd, Sept. 15, 1785; William Thomas, Sept. 26, 1796; Joseph Wheeler, June 27, 1756; Ensign Mark White, Oct. 5, 1758; Abraham Wood, Feb. 26, 1759; Jacob Wood, March 7, 1759; Hezekiah Wheeler, May 5, 1759, supposed to be grandfather to Josiah D. Wheeler; Joseph Woolley, June 24, 1787; 1823, James Billings, on Perkins' place, 74 years; 1824, John White, 54; David Forbush, May 19, 1803, 85; Titus Law, Feb. 16, 1801, 84; Dorothy Robbins, widow of Nathan, July 9, 1802, 93; Joseph Piper, Dec. 19, 1802, 85; Sarah, widow of Samuel Jones, Dec. 29, 1802, 86; Simeon Hayward, June 5, 1803, 48; Lieut. John Adams, Oct. 30, 1803, 87; Stephen Law, Nov. 7, 1784, 77; Francis Faulkner, Esq., 77, Aug. 5, 1805; Widow Sarah Cutting, Dec. 25, 1805, 97; Lucy Hunt, wife of Dea. Simon, March 31, 1808, 71; Esther Piper, widow of Joseph Piper, April 27, 1810, 85; Catharine Davis, widow of Simon, Jan. 3, 1810, 81; Dr. Abraham Skinner, April 17, 1810, 54; Lieutenant John Heald, Oct., 1810, 90; Thomas Wheeler, Nov. 17, 1810, 55; Ephraim Hosmer, Nov. 17, 1811, 89; Rebecca Faulkner, widow of Francis, Esq., 76, April 3, 1812; Deacon Joseph Brabrook, April 28, 1812, 73; 1813, Phillip Robbins, Feb. 6, 73; 1813 Samuel Wright, March 2, 87; 1813, Captain Joseph Brown, Aug. 9, 61; 1813, Roger Wheeler, Dec. 30, 77; 1814, Lieut. Simon Tuttle, April 21, 80; 1814, Lieut. Henry Durant, May 6, 40; 1814, Capt. Zedekiah Smith, in the Army, May 13, 45; 1814, Silas Brooks, Aug. 11, 68; 1814, John Harris, Nov. 26, 80; 1815, David Davis, Sept. 16, 72; 1816, John Hunt, April 4, 78; 1816, John Shepherd, May 27, 64; 1800, Capt. Joseph Robbins, March 31, 1816, Capt. Daniel Davis, Dec. 7, 67; 1817, Samuel Wheeler, April 5, 82; 1817, Capt. Stevens Hayward, Oct. 6, 56; 1817, John Handley, Dec. 12, 81; 1819, Benjamin Wild, in Boston, Aug. 2, 56; 1819, Thomas Law, March 20, 78; 1819, Abraham Hapgood, April 6, 66; 1820, Ezekiel Davis, Feb., 68; 1820, Dea. Simon Hunt, April 28, 86; 1820, Oliver Jones, Aug. 11, 82; 1820, Daniel Brooks, Aug. 25, 82; 1821, Joseph Barker, April 12, 99; 1821, Nathaniel Faulkner, July 2, 85; 1821, John Robbins, Dec. 31st, 60; 1821, Dea. John Wheeler, 56; 1822, Josiah Bright, 63; 1822, Jonathan Hosmer, July 10, 87; 1822, Smith Foster, 67; James Marsh, 71; 1822, Lieut. Thomas Noyes, Nov. 19, 82; 1824, Joseph Brooks, 74; 1824, David Barnard, 64; 1824, Samuel Hayward, 82; 1824, Jonathan Billings, died in Concord, 85; 1824, John Wheeler, 64; 1825, Stephen Chaffin, 65; 1825, Jonas Brooks, 78; 1825, Joel Willis, 44; 1826, Samuel Temple, 74; 1827, Benjamin Brabrook, 85; 1827, Israel Robbins, 82; 1827, Samuel Parlin, 80; 1827, Quarts the colored man, 61; 1827, William Reed, 85; 1828, Ephraim Forbush, 72; 1828, Nathan Wheeler, 57; 1828, Robert Chaffin, 76; 1829, Nathan Brooks, 56; 1829, John Lanson, 89; 1829, John Hunt, 61; 1829, Theodore Wheeler, 52; 1830, Joel Hosmer, 60; 1830, Reuben Davis, 76; 1831, Seth Brooks, 91; 1831, Calvin Houghton, 78; 1831, Joseph Barker, 87; 1831, John Reed, 73; 1831, James Fletcher, 43; 1832, Elias Chaffin, 77; 1832, Jonathan Davis, 80; 1832, Elijah Davis, 82; 1832, John Hayward, 69; 1833, Thomas F. Lawrence, 52; 1833, Daniel Holden, 60; 1833, Abel Conant, 87; 1834, William Cutting, 80; 1834, Ephraim Billings, 83; 1834, Aaron Hayward, 48; 1834, John Faulkner, 73; 1835, Capt. Seth Brooks, 91; 1835, Moses Fletcher, 50; 1835, Lemuel Dole, 54; 1836, John D. Robbins, 58; 1836, Jonathan Fletcher, 64; 1836, Aaron Jones, 82; 1836, Joseph Chaffin, 84; 1836, John Robbins, Esq., 74; 1836, Daniel Taylor, 65; 1836, Luther Wright; 1837, Moses Woods, 87; 1837, Solomon Smith, 84; 1837, Amos Noyes, 72; 1838, Deacon Phineas Wheeler, 65; 1838, Ebenezer Barker, 73; 1838, Silas Piper; 1838, Benjamin Hayward; 1839, Nathaniel Faulkner, 73; 1839, David Barnard, 45; 1839, Peter Fletcher; 1839, Jonathan Powers; 1840, Capt. John Handley, 54; 1840, Simon Hosmer; 1840, Daniel F. Barker; 1840, John Oliver; 1841, Jonathan Billings, the clock maker, 64; 1841, Reuben Wheeler; 1841, Joseph B. Chamberlain; 1841, Daniel White; 1841, Ephraim Brooks; 1841, Peter Hayes; 1841, Hannah Leighton, 92; 1842, Jonas Wood; 1842, Abel Proctor, 87; 1842, John Wheeler; 1843, Paul Conant; 1844, Luther Robbins, 41; 1844, Samuel Hand-

ley; 1844, William Stearns; 1845, Moses Faulkner; 1846, Ammi F. Adams, 79; 1846, Charles Handley, 87; 1846, Wilham Reed, 68; 1847, Danforth Law, 44; 1847, Amos Handley, 55; 1847, John Chaffin, 68; 1848, Samuel Hosmer, 86, Revolutionary soldier; 1828, Amos Law, 51; 1848, John S. Fletcher, 67; 1848, Ebenezer Robbins, 60; 1848, Jonathan Wheeler, 61; 1849, Ephraim Hapgood, 67; 1849, Allen Richardson, 63; 1849, Nathaniel Stearns, 61; 1849, Joseph Barker, 74; 1849, Thomas Thorp, 94; 1850, Joseph Brown, 44; 1851, Nathaniel G. Brown, 70; 1851, Nathan Wright, 60; 1851, Ebenezer Davis, 74; 1852, Tilly Robbins, 79; 1852, Silas Holden, 58; 1853, Daniel Wetherbee, father of Phineas, 66; 1854, Daniel Barker, 79; 1854, Nathan D. Hosmer, 83; 1854, Joseph Harris, father of Daniel, 85; 1854, Henry Woods, 79; 1855, Ebenezer Barker, 53; 1855, Jonathan Barker, 78; 1855, Asa Parker, 63; 1855, Luther B. Jones, 67; 1856, Dr. Charles Tuttle, 87; 1856, Abijah Oliver, 86; 1856, Ebenezer Smith, 81; 1856, John Handley, father of David M., 93; 1856, Solomon Smith, 61; 1858, Reuben Barker, 72; 1859, Paltiah Brooks, 77; 1859, Eli Faulkner, 79; 1859, Silas Piper, 67; 1860, Francis Piper, son of Josiah, 80; 1860, Dea. John White, 75; 1861, Silas Jones, 74; 1861, Edward Wetherbee, 79; 1861, Jedidiah Tuttle, 67; 1861, Abraham Conant, 77; 1862, Cyrus Wheeler, 59; 1862, Joel Oliver, 84; 1863, John Harris, 88; 1863, Joseph Brabrook, 83; 1863, Reuben Wheeler, Josiah D.'s father, 81; 1863, Joel Conant, 75; 1863, Abel Robbins, 71; 1864, Simon Tuttle, 71; 1864, James Keyes, 89; 1864, William Reed, father of Moses' father, 83; 1865, Dr. John M. Miles, 63; 1865, George W. Robbins, son of Philip, 84; 1865, Charles Robbins, 79; 1866, Luther Conant, 80; 1867, Ivory Keyes, 62; 1868, Hon. Stevens Hayward, 81; 1868, Jonathan B. Davis, 78; 1868, Luther Davis, 81; 1869, Dr. Peter Goodnow, died in Boston, 80; 1870, Cyrus Putnam, 72; 1870, Amos Handley, 70; 1872, Melntable Barker Piper, 101-2-4, March 25; 1872, Abel Jones, 88; 1872, Dea. Silas Hosmer, 80; 1872, Jonathan Hosmer, 86; 1872, Simeon Knights; 1873, James Harris, 68; 1873, Abel Farrar, 76; 1874, Elnathan Jones, 78; 1863, William Reed, 69; 1874, Silas Taylor, 80; 1874, Nathaniel Hapgood, 89; 1874, George Robbins, 90; 1874, Simon Hapgood, 86; 1875, Alden Fuller, 77; 1875, Dr. Harris Cowdry, 72; 1876, Idunaur Parker 78; 1876, Amos Cutter, 88; 1876, Oliver W. Dew, M.D., 78; 1876, Mrs. Eliza, wife of Elnathan Jones, 79; 1876, Samuel T. Adams, 79; 1876, Mrs. Susan Abel Forbush, 76; 1877, Francis Tuttle, Esq., 86; 1877, Rufus Tenney, 82; 1877, Dennis Putnam, 82; 1878, Mrs. Harriet Tuttle, widow of Francis Tuttle, Esq., 82; 1878, Nathan Chaffin, 77; 1878, Thomas Taylor, 72; 1878, Silas F. Bowker, 83; 1878, Miss Submit Wheeler, 75; 1879, Daniel Jones, 66; 1879, Dea. John Fletcher, 89; 1879, Mrs. Sarah B. Stearns, 85; 1879, Jeremiah Hosmer, son of Amos and Susan, 85; 1879, Mrs. Harriet Davis, 82; 1879, Levi Chamberlain, 72; 1879, Ruth Dole, 96; 1879, Mrs. Myra T. Miles, 74; 1880, Ebenezer Wood, 87; 1880, Jonathan Wheeler, 89; 1880, Peter Tenney, 81; 1880, Col. Winthrop E. Faulkner, 74; 1880, Mrs. Ruth Hager, 91; 1880, Mrs. Lucy Noyes, 66; 1880, Mrs. Betsey Chaffin, 87; 1880, William Davis, 89; 1881, Nathan Brooks, 81; 1881, Mrs. Ruth C., wife of Joseph P. Reed, 73; 1881, Abel Forbush, 84; 1881, Mrs. Betsey H. Adams, 86; 1881, Aaron Fletcher, 80; 1881, Joseph P. Reed, 73; 1881, Jonathan A. Piper, 73; 1881, James W. Wheeler, 69; 1882, Joseph Wheeler, 85; Jonas Blodgett, 71; 1883, Tilly Robbins, 81; Daniel Wetherbee, 68; 1884, Simon Hosmer, 84; 1887, Robert Chaffin; 1888, David M. Handley, 86; Cyrus Barker, 85.

BIOGRAPHICAL.

HENRY SKINNER.

We are fortunate in being able to secure this memento of the past, in the portrait of Mrs. Skinner's husband. It is an excellent presentation of the man as he appeared in early manhood. He was a genial, cultured gentleman; fond of reading, though not a graduate of college; moving in the choicest circles of society; quiet in his style, but buoyant and active.

He went to Brookfield, when a youth, to act as clerk in a store. The storekeeper told him never to find fault with the butter which the customers brought

for barter, but simply, upon examining its quality, to tell them how much he would give them.

His father, Dr. Abraham Skinner, died in 1810, when Henry was obliged to return to Acton, and, in company with his brother, Francis Skinner, for awhile had charge of the farm. The homestead and farm were afterwards owned by Charles Tuttle.

Dr. Skinner built the house on this site in 1794, which, in its day, like that of Mrs. Skinner, built about the same time, ranked among the most elegant in town.

The wife of Dr. Abraham Skinner was a Miss Coit, from Marlboro'. He had a large medical practice for years. Dr. Skinner's father was noted as a violinist. He could play on the violin and jump through a window and not break the time or the tune.

Francis Skinner, the brother of Henry, was a noted merchant in Boston, and became quite wealthy in trade, and was generous in his treatment of his brother's widow.

Mrs. Skinner tells this anecdote of her husband, after locating in business in Andover: "A friend of Mr. Skinner, Mr. Kidder, said to him, one day, 'Now, Skinner, you ought to be married; and I wish to make you this proposition: If you will get married within a year you shall have my house, rent free, for a year; but if you don't get married within a year, you shall give me one of your best carpets for my new house.' Upon this," Mrs. Skinner said, "he came right over to Acton and got married. He could not afford to lose the rent of that house a year, any way," said Mrs. Skinner, smilingly.

Mr. Skinner was noted, while a trader in Andover, for his earnest temperance principles. He was in full sympathy with Dr. Edwards, of Andover, who was, at that time, stirring the whole community with his appeals for a reform.

Among his papers is this quaint agreement, signed by Mr. Skinner, showing his style of work in this line:

"*This is to Certify, That Henry Skinner agrees to give Rogers Blood cloth to make a good coat, providing he does not drink any rum, gin or brandy, wine or any kind of intoxicating spirits, for twelve months from this day (Andover, July 20, 1828), and Blood is to forfeit ten dollars if he does not abide by this agreement. Signed in presence of John Berby, who promises to make the cloth into a coat for Mr. Blood if he obtained it in the aforesaid way.*"

The autograph appended to the portrait of Mr. Skinner, here presented, was cut from this agreement.

Mr. Skinner dying before the fulfilment of this obligation, there is this additional statement:

"ANDOVER, April 10, 1830.

"Received of Josiah H. Adams, administrator, six dollars, in full the within obligation by me.

ROGERS BLOOD."

Mr. Skinner was active in exertions to repress the liquor traffic in Andover, urging the rum-seller to stop, and in some cases securing pledges to that effect. His early death was a great public calamity as well as a private grief.

JOSEPH BRABROOK.

He was the father of George, Alfred, Sarah and Benjamin. His fine engraving, presented to the public in this history of Acton, is that of a man who had some notable features of character worthy of special remembrance. He was an honest man. So all the records prove; so all the reminiscences of the man reported by his most familiar contemporaries affirm. He was honest in large trusts; his honesty went down also into the minutiae of life equally sure. If he had made the mistake of a cent in trade with the store-keeper anywhere in town, his first steps were directed back to the man with whom the mistake had been made, and his conscience was uneasy till full satisfaction had been given. The witnesses who rise up in judgment on the man all agree. Says one: "If there ever was an honest man in the town of Acton, Joseph Brabrook was that man."

His integrity was impressed upon the memories of his fellow-townsmen as vividly as the clear outlines of the beautiful eminence on which has stood for nearly a century and half the Brabrook homestead. Thanks to his son George, we have a permanent reminder of all the good qualities of his father and family and ancestry associated with that structure in the life-like engraving of the artist. It is a fitting tribute of a loyal son to a worthy father. The noble elm to the left in the landscape is of the same age with Alfred, another son. This cluster of elms around the Brabrook house, like the other notable elms in town, are typical illustrations of the nobility of the men who planted them and lived and died under their shade.

The house itself, though built in 1751, was put together from cellar to ridgepole with Brabrook thoroughness, and it stands to-day unrocked by the roughest winds that sweep over the heights.

Mr. Brabrook was a cooper and made barrels in the winter, and the Brabrook stamp was enough to carry them forthwith into and out of the market. He raised hogs, and there were no cleaner or better hogs in town. He did not let them revel in their trough after dinner, but invented an arrangement for lifting it at once out of their reach till the next meal was ready. He raised peaches, and they were of the best quality and had the real Brabrook flavor. The canker worms at one time made their raid upon his peach orchard. He met them at their first outset, and said, "Those worms are not to eat my peach orchard," and off went the branches. A new and better growth soon repaid for the trimming.

He was a man of moderate size; not large, nor tall, not demonstrative, not loud spoken on the streets or elsewhere, but efficient in bringing about sure results. He lost no time at the loitering places of the village. If he took his oxen to the blacksmith's to be shod and Blodgett said, "Please wait a few minutes, and I will attend to your case shortly, Mr. Brabrook," he at once started them on their homeward beat, saying, "I will come again," and he would do it, a second

EAST ACTON, MASSACHUSETTS.

Bradley Stone

and a third time if necessary. He was a peaceable, careful, reverent man. He kept up his habit of asking a blessing at the table in his latest life, even when his voice could scarcely be heard by him who sat nearest at the table. Silas Conant, Sr., heard one of his last utterances. It was this: "O God, we thank thee for this food that is set before us; we thank thee kindly for Christ's sake."

He was devoted to his family. He had an efficient, worthy companion in his wife, whose energy and wisdom aided him essentially in accomplishing the grand issue of his life-work.

His quiet, faithful ministries in her last painful and prolonged sufferings are remembered, and have endeared his name to a large circle of appreciating neighbors. His children rise up at the remembrance of his life on the Hill and call him blessed. He died February 15, 1863, aged eighty-three years and six months. His wife, Sally, died December 17, 1847, aged sixty-five years and six months.

Two Brabrook's brothers were here as early as 1669.

Thomas married Abigail Temple, daughter of Richard Temple, in 1669, and died in 1692. Joseph, from whom those bearing the name descended, married Sarah Graves, in 1672, and had one, Joseph, who married Sarah Temple, and died in 1719. He was father to Benjamin and grandfather to Deacon Joseph.

Second, John, who died a soldier at Lancaster, in 1705. Several daughters.

James, died at Fort Lawrence, in Nova Scotia, in 1756.

Benjamin Brabrook, the father of Deacon Joseph Brabrook, was second lieutenant of Company 5, Third Regiment of Militia, March 7, 1780. John Heald, first lieutenant; Simon Hunt, captain. He died January 14, 1827, aged eighty-five.

Joseph Brabrook was chosen deacon September 29, 1775, and died April 28, 1812, aged seventy-three, holding the office thirty-seven years. Anna Brabrook, widow of Deacon Joseph, died March 2, 1816, aged seventy-five.

Joseph Brabrook, the son of Benjamin and Dorcas, was born March 24, 1738. Benjamin, son of Benjamin, was born July 12, 1741. Benjamin Brabrook, son of Benjamin, was married June 6, 1773.

Joseph Adams Brabrook, son of Joseph, Jr., and Sally, was born November 18, 1806. Benjamin F. Brabrook, son of Joseph, Jr. and Sally, was born September 15, 1809. Sarah Appleton Brabrook, daughter of Joseph and Sally, born November 29, 1826. George, son of Joseph, and Sally, born November 9, 1828. Alfred.

Benjamin was a Baptist minister, and preached with efficiency, but died young.

BRADLEY STONE.

He was born Sept. 4, 1801, in Chesterfield, N. H. His father's name was Joel and his grandfather's Peter. He came to West Acton when a young man, and established himself as a blacksmith and soon exhibited an originality and versatility of talent which inspired great hopes of his future success.

Sept. 29, 1828, he married Clarissa Hosmer, daughter of Nathan and sister of Mrs. John Hapgood, recently deceased. She was born March 11, 1804. She has been a bold, patient, cheerful helper and companion all his days. She lived with him uncomplainingly in the little school-house at the cross-roads till he built the brick house on the corner, where they lived ten years. She was efficient in house-keeping, cooking at one time for thirty men when the railroad was in process of construction. She looked after the sick of the village during the long period of its growth, still caring for the same after her strength failed.

They have journeyed happily together for more than sixty years, and are now stepping down the declivities with sprightliness, hand in hand, ready for the Master's call. They must be the oldest couple in town, the husband in the eighty-ninth and the wife in the eighty-sixth year.

The names of their children are here given: George Henry, born in Concord, June 1, 1829, died June 24, 1856; Mary Ann H., born in Acton, May 2, 1831; Edwin, born Dec. 31, 1834, died April 27, 1886; Nathan Hosmer, born Oct. 4, 1838, died March 1, 1874; Clara E. Stone, born Aug. 27, 1842; Charles Bradley Stone, born July 17, 1848.

From the very construction of his mind he has been an enthusiast in every line of work or improvement which he has undertaken. He has watched with zest signs of progress in the village of his adoption. He built the first store, and when the merchandise came too tardily from the metropolis, he projected the Fitchburg Railroad. His genius and pluck, combined in sharp rivalry with that of Col. Faulkner at the South, insured the success of the enterprise.

His first thought was a new route and road-bed to the city, but this finally yielded to a railroad charter from the Legislature, which was carried by the combined forces of the projectors. Then the question was—which village shall have the depot? This was at first decided in favor of the South, then the decision reversed in favor of the West, then the compromise by which both secured the advantage. The West was, however, for quite a period, the distributing centre for the country beyond in all directions, far and near.

The fire still kindles with its old lustre in the eye of Mr. Stone as he tells the story of this railroad contest, in which he was so conspicuous a figure.

He has been, from the beginning, a warm advocate of the temperance cause, of the schools and of the gov-

ernment. His first vote, Democratic, was cast for General Jackson as President, but during the Fugitive Slave Bill excitement he became a Republican, on which side he has voted most of his public life. He watches with an old man's eagerness the recent developments of growth in his vicinity, and is sure of a future for the village and the town as a whole which will rival all the past.

GEORGE CLEAVELAND WRIGHT.

He was born Jan. 7th, 1823, in Bedford, Mass. His father, Joel Wright, lived in Boxboro'. His mother, Dolly H. Reed, was born in Littleton, Mass., and afterwards taught school in Boxboro'. George lived in Boxboro' from the age of fifteen to nineteen years, when he learned the shoemaker's trade, at which he worked for nine years, the first two years in the employ of Deacon John Fletcher, of Acton, and the rest of the time in business for himself at West Acton.

December 31, 1846, he married Susan H. Davis, daughter of Jonathan B. Davis, granddaughter of Simon Hosmer and grandniece of Captain Isaac Davis, who was killed at Concord fight.

Four of their children lived to grow up, born as follows: Estella M. Wright, December 20, 1849; George S. Wright, July 13, 1857; Effie R. Wright, June 13, 1860; T. Bertha Wright, June 5, 1866.

At the age of thirty-one, after being in the milk business in Charlestown and Boston two years, he engaged in the coffee and spice business as a member of the firm of Hayward & Co., which, after twenty-five years of successful business, united with Dwinell & Co., and soon afterwards with Mason & Co., making the firm of Dwinell, Hayward & Co., the largest coffee and spice-house in New England. Though always an equal partner in every respect, he has never asked to have his name attached to the firm-name.

For the past thirty years he has been the coffee buyer of the firm, and his frequent trips to the New York markets have made him personally known to most of the prominent coffee men of this country.

As a coffee buyer he has few equals and no superiors. With the courage of his convictions, backed by a most thorough knowledge of the statistical position of the article in question, he has shown his right to the foremost position in his department of the business; notably so in the rise of 1886-87, when the Brazilian coffees advanced in one year more than 250 per cent. in value.

From small beginnings the firm of Dwinell, Hayward & Co. has seen a healthy and legitimate growth, and to-day distributes the products of its extensive factory, located at the corner of Batterymarch and Hamilton Streets, Boston, in almost every State and Territory this side the Rocky Mountains.

Mr. Wright is strictly a self-made man. Without rich or influential friends to help, he has won for himself a position in the business world that any

man might envy and few attain, and he bids fair, at the age of sixty-seven, to enjoy for many years the competency that he so well deserves.

Early in his successful career, 1861, he secured for himself a worthy home on the brow of the hill overlooking the village of West Acton, and which commands a glorious view of the surrounding country. Here his children grew up and here he still resides.

He has been prominently identified with the Universalist Parish in West Acton, and was one of three to contribute a large sum toward the erection of its present meeting-house.

In all village and town improvements Mr. Wright has always shown a lively interest and a generous help.

Lyceum and temperance, school and library, have found in him a firm friend and a most liberal patron.

In the Legislature of 1874 he represented the towns of Acton, Wayland and Sudbury as a Republican, with credit to himself and with satisfaction to his constituents.

Though a Republican in politics, Mr. Wright has never hesitated to work and vote for *principles*, not party—for men, not *machines*.

MOSES TAYLOR.

He was born in Acton April 16, 1822. He was the son of Silas Taylor and Sophia Hapgood, who were married April 11, 1820. She was the daughter of Ephraim and Molly Hapgood and was born February 13, 1792, and died March 10, 1869. Silas Taylor came from Boxboro' to Acton, and bought of Moses Richardson the estate situated where Moses Taylor now lives. The house then standing was unpainted, with a roof running down in the rear. There was a well-sweep and an oaken bucket in front. The chimney was made of flat stone, laid in clay and twelve feet square. It stood on that site for over a hundred years. The new house was built by Mr. Silas Taylor. The old site was known as the Barker place, Joseph Barker, (2d) originally.

Mr. Silas Taylor, the father of Moses, was a man of rare sense and wit, of great physical power and endurance, a laborious and saving man, and accumulated for those times great possessions. He was a soldier of the war of 1812, and served at Sackett's Harbor on Lake Erie, receiving a pension for the same in his later life. He was kind to the poor, and in his quiet way befriended many in embarrassed circumstances. He was favored in the companionship for forty-nine years of a woman of rare modesty, judgment and grace.

The grandfather of Moses Taylor was Silas Taylor, a resident of Stow, formerly of Watertown. He commanded a company from Stow in the battle of Bennington, Vermont, August 16, 1777, and was present at the capture of Burgoyne. He was for many years a justice of the peace in Stow, and town clerk, and did most of the marrying and other town business.

Geo. C. Wright

Moses Taylor

Simon Marchet

The sword which he carried at Bennington, as also the sword carried to South Boston by Captain Silas Jones in 1812 war, have recently been presented to the Memorial Library of Acton, by Moses Taylor.

He was educated in the common schools of Acton, and in addition attended the academy at Ashby two terms. He had the offer of a liberal education by his father, but chose rather the homestead farm, whose acres he still cultivates to the full measure of his strength and beyond measure.

June 18, 1846, he was married, by Rev. James T. Woodbury, to Mary Elizabeth Stearns, daughter of Nathaniel Stearns, of Acton, formerly of Waltham. She was born in Littleton November 5, 1825. Her mother was Sophia Hammond, the daughter of Mary Bigelow, of Weston—of the old Bigelow stock.

Mr. Taylor, though a busy, hard-working man upon the farm, has ever taken a deep personal interest in public affairs, having earnest convictions upon all subjects which engaged his attention. In politics he has been a Whig and Republican. In 1882 he was elected by his district of towns including Acton, Concord, Littleton, Stow and Boxboro', as a Republican, to the Legislature. He has been justice of peace thirty years in succession, beginning in 1840.

He has been an ardent friend of the military, having held commission in the Davis Guards as fourth, third, second, first lieutenant and captain, which he resigned 1857. Otherwise he would have been in position to command at the outbreak of the Rebellion. He was deputy marshal to enroll soldiers during the Rebellion. He took the United States census of Littleton, Stow, Boxboro', and Acton in 1870.

He built or remodeled the following houses at the Centre. Dr. Sanders', the parsonage, Mrs. Rouillard's, Reuben Reed, Lyman Taylor's, the two new structures at the east of the Common, formerly the Fletcher homestead, where the library now stands.

When the project of building the library was pending in the mind of Mr. Wilde, rather than have the project fail, Mr. Taylor came forward with his thousand dollars and cleared the grounds for the structure. He has been parish collector at times, and on the Parish Committee for over forty years, and a member of the choir, with his wife and children, most of the time. He is the oldest member of the Board of Trustees of the Memorial Library, having been selected by Mr. Wilde as a member for life in the charter of incorporation.

Mr. Silas Taylor, the father of Moses, died January 28, 1874, aged eighty years and seven months. Sophia Taylor, sister of Moses, born March 8, 1821; died August 5, 1839, aged eighteen years, four months and twenty-seven days. Martha Taylor, sister of Moses and wife of Hon. John Fletcher, born March 8, 1829, and died August 14, 1882, aged fifty-three years and five months. Silas Taylor, Jr., brother of Moses, born April 2, 1825, and died March 18, 1844, aged eighteen years and sixteen days.

Children of Moses and Elizabeth: Silas Hammond Taylor, born March 25, 1847, married Mary Thompson, of Oxford, Nova Scotia. Children of Hammond and Mary: Mary Elizabeth Taylor, Moses Taylor, Martha Taylor, Marion Celeste.

Moses Emery Taylor married Clara Tuttle, daughter of Edward Tuttle. Children of Emery and Clara: Carrie Elizabeth, Wilmot Emery, Simon Davis.

Lyman Cutler Taylor married Addie Tuttle, daughter of Capt. Daniel Tuttle. Children of Lyman and Addie: Grace Evelyn, Eula Sophia.

Lizzie Sophia Taylor married Charles B. Sanders, M.D. Children of Lizzie and Dr. Sanders: Ralph Barton, Richard Stearns, Helen Elizabeth.

Mary Etta Taylor married Charles Pickens. Children of Mary Etta and Charles Pickens: Carl Pickens, Effie Eloise Pickens. Mrs. Pickens married, after the decease of Mr. Pickens, Edward Wetherbee Conant, son of Winthrop F. Conant.

Simon Davis Taylor, son of Moses and Mary Elizabeth, born November 2, 1855; died. Arthur William Taylor, born November 13, 1863. Charles Carlton, son of Moses and Mary Elizabeth, born October 4, 1868.

SIMON BLANCHARD.

He was born in Boxboro' January 29, 1808. He was the son of Simon, who was the son of Calvin, who was the son of Simon. He married, April 23, 1849, Elizabeth Dix Fletcher, daughter of Jonathan Fletcher. She died July 28, 1874. The children by this marriage are here given: William, born April 3, 1840, died February 15, 1877; Ellen Ann, born September 13, 1851, married January 1, 1873, Calvin M. Holbrook; Elizabeth Fletcher, born October 31, 1856, married Amasa Knowlton; Mr. Blanchard, April 15, 1877, married his second wife, Susan Wheeler, daughter of Abner Wheeler.

Mr. Blanchard lives on one of the choicest landscapes of the northwest corner of the town, towards Littleton, in a comfortable two-story farm house. It is in a neighborhood of well-cultured farms and orchards. He has occupied the same site for fifty-one years. His steady, industrious habits have made their impress upon the homestead and all the surroundings. If he has not held commissions and moved in circles of public notoriety and struck the pavements with his dashing steeds he has maintained his integrity, deserved titles which he might have had for the asking and reached a venerable age, receiving the confidence and regard of the community among whom he has lived in peace these many years.

Mr. Blanchard has been a Whig and Republican in politics, a Baptist in his religious faith and a man of order, sobriety and good sense in all his public and private relations. His countenance beams with intelligence and good fellowship and is itself a benediction which we are happy to have where it can be of service to the public.

CHAPTER XVI.

ASHBY.

DESCRIPTIVE.

BY THAMAR B. SAWFELLE.

ASHBY is situated in the extreme northwest corner of the county, bordering upon New Hampshire, and is bounded on the north by Mason and New Ipswich, on the east by Townsend and Lunenburg, on the south by Fitchburg, and on the west by Ashburnham. The central village is forty-seven miles northwesterly from Boston, thirty-one miles nearly north from Worcester and four hundred and twenty-six miles northeasterly from the city of Washington, in latitude $42^{\circ} 40'$ north and longitude $4^{\circ} 16'$ (very nearly) east from Washington. The area of the town is about twelve thousand and three hundred acres, containing only a small portion either of ledges, ponds or plains. The surface is hilly and diversified. The outlines of the landscape are majestic and grand. Many of the elevations are bold and rough, while others are gracefully rounded and some of the elevated swells of land are fertile to the summit. The soil is that common to the hill towns in this vicinity—comparatively stubborn and rocky, yet mostly arable and productive. The subsoil is of the nature of clay, which holds the moisture, and springs of the purest water are abundant.

The town is well watered. All its streams flow easterly either into the Souhegan, the Squannicook or the Nashua Rivers. The stream running through the northwest corner of the town, and draining the northeast part of Ashburnham through Ward Pond and Watatic Pond and thence onward through New Ipswich, is really the south branch of the Souhegan River.

WILLARD'S STREAM, made up at first from the drainage of Nemoset and Russell Hills in Ashburnham, passes out of that town and soon falls into the Ashby reservoir and thence on northeasterly through the entire breadth of the town; it joins the Squannicook in Ash Swamp, in Townsend.

TRAP FALLS BROOK, having its origin in the southern slope of the hills in New Ipswich, takes a southeastern direction through the town, and after receiving the waters of several small brooks and leaving the meadows easterly from the town's Common it hurries on, rattling and foaming over the rocks till it leaps into the whirling and hissing water of Willard's Stream.

LOCKE BROOK comes from the hills in the northeast part of the town, running southeasterly. For a considerable distance before leaving Ashby it flows through deep gorges, entering Townsend at the head of the Ash Swamp, and onward, joining Willard's Stream only a short distance from its confluence with the Squannicook. Near the southern border of the

town a nameless brook, flowing through "Wright's Ponds," takes a southeastern course till it comes near to the corner of the town, where it falls into Pearl Hill Brook, which then makes a detour to the left, running nearly north, leaving Ashby and thence onward through Townsend till it joins the Squannicook in Ash Swamp.

WATATIC MOUNTAIN (sometimes in old records spelled Watahook and Wettetook or Wateticks) is situated in the northeast corner of Ashburnham, and in the northwest corner of Ashby, the town line passing over its northeast slope cutting off about one-third of it and leaving its summit in Ashburnham. It has an altitude of 1847 feet above the level of the sea, and according to a map of Ashby delineated and published in 1831, it is 829 feet higher than the Unitarian Church. It must have been a conspicuous landmark for the Indian in his warlike expeditions, and a resort for the white man for the purposes of observation in traveling from the seaboard to the Connecticut River.

On its summit is a pile of stones which has been collected in obedience to an Indian legend, that every one who visited the summit must add a stone or become unlucky for life. From this standpoint, near at hand, the bold outlines of the hills, with their intervening ponds and villages, keep the observer spell-bound; while in the distance the fast-moving railroad trains, the shimmering lakes and rivers, many church spires and prominent buildings are brought to view.

NEMOSET HILL (called in the town records *Prospect Hill*, and known as *Blood Hill*) is situated in the west part of the town, part of it being in Ashburnham. The view from its summit nearly equals that from the Watatic. A large part of this hill is rough and rocky, but there are nice soils and excellent farm buildings crowning its southeastern slope. The last snow-drifts of spring linger, diminish and then fade away from its eastern crest.

JEWELL HILL, in the southwest part of the town, viewed from the school-house yard, near the reservoir dam, surrounded with nice grazing lands, with its rough and precipitous outlines sharply drawn against the sky, contrasts beautifully with the water seen at its base.

JONES HILL, a little west of the centre of the town, is wild and rocky on its south side, but on the north is easy of ascent. It has a cave or "Indian house," as it is often called, which is an object of some curiosity.

PINE HILL and BATTERY HILL range along the eastern border of the town, overlooking the valley around the Squannicook River.

The arborial productions of Ashby are not particularly different from those of the adjoining towns. In the banks of the cuts made in grading the roads may be seen pine stumps, which, considering their great size, must have supported gigantic trees. Tradition

says that the south part of the town was covered with an exceeding heavy growth of pine when the settlers began to break the wilderness. Various kinds of deciduous trees, including the oak, maple and birch, have usurped the places of these monarchs of the forest. Many acres are covered with a young growth of thrifty trees, among which the sapling pine grows rapidly, promising an abundant supply of building timber for the oncoming generations.

The wild animals that roamed over these hills, and occasionally caught the eye of the settler, were those common in this latitude. In 1789 the town voted to pay a bounty on wolves; but a town of more than six hundred inhabitants would not at that time have many animals of this species. Deer were protected by officers chosen for that purpose. The fox remains with us, causing the poulturer some trouble, but affording the sportsman great excitement in the chase through the first snow-fall of winter. Our brooks attract the angler for the trout, while other disciples of Isaac Walton occasionally take good-sized strings of perch and pickerel from the reservoir. The roads in the early history of the town were merely "bridle-paths," running through the woods and over the hills, winding around and making the traveled distance between two places much greater than what it is now. Traveling on horseback was the custom. Besides, there were so many roads contemplated, that it was impossible for the settlers to make even bridle-paths of many of them.

ROADS.—Between 1734 and 1745 the Townsend proprietors deeded a large number of tracts of land situated in Ashby. In every one of these conveyances may be found this reservation: "There is also an allowance for a road whenever the town shall think it necessary."

The old Northfield road, running from the middle of Lunenburg westerly through the south part of Ashby and on through Ashburnham and Winchendon, had Northfield for its terminus. This road was made in 1733, and is the oldest road in town. At present different parts of it are used as a public highway. Northfield was a frontier town for a long time, and had suffered greatly during the Indian wars, many of its citizens being killed. In 1690 the settlement was broken up by the Indians, but again commenced in 1713, at which time the town was incorporated. The sympathies of the people of Concord, Groton, Lancaster and Lunenburg were so excited in behalf of their friends at Northfield, that they made this road that they might more easily assist them in their skirmishes with the Indians.

A road, alluded to in the Townsend records as early as 1742, but of which there is no record of its being laid out, was called the "Ashuelot Road," which entered Ashby at the same place where the old road is now traveled, and followed the same a short distance and then turned to the left and went over Trap Falls Brook, and then turning to the right, winding over

and around the hills to the northwest, till it passed out of the corner of Ashby and over the north side of Watatic Hill. Daniel Adams and Ephraim Jones, of Concord, cut a bridle-path and marked the trees for this road from Willard's Stream to Keene, N. H., and petitioned the General Court to pay them for doing the work, which the Court refused to do. These are the earliest roads in the town known to the writer. Ashby has been very fortunate in its choice of town clerks. Every entry in the entire six volumes of records has been made in a neat and scholarly manner. It may, with propriety, be remarked that more pages in these first four volumes are given to the subject of roads than any other single matter, which shows that the voters had learned that the distance around a hill was about the same as over it, and that roads made to accommodate a few must intersect at just the right place with those more traveled highways which converged to their house of worship.

OLD SETTLERS.—It is not known beyond a doubt who were the first settlers in town. Samuel Stone and James Locke, who lived on Battery Hill, were the first settlers in the Townsend part of Ashby.

Samuel Stone built and lived in the house now owned by Francis S. Wheeler. James Locke's house stood in the garden just north of where the old, aristocratic, unpainted Locke mansion is now situated on the westerly side of the road to New Ipswich, nearly a mile northerly from the house of Samuel Stone. The fear and dread of Indian incursions hindered the settlement of pioneers in this vicinity till about 1750. Persons who located at considerable distance from several neighbors built block-houses or "garrison houses," as they were called, for their protection. These houses were made of pine logs of convenient length hewed on two sides and set close together in the ground. The roof consisted of timbers laid across the top of the body of the structure, upon which dried bark, either of birch or hemlock, was laid in courses, overlapping each other to protect from the rain, with port-holes on each side. There were three houses of this kind on the land now in Ashby, between 1739 and 1750. One was situated near the Locke place, above described; another was built north-westerly from the central village and another on the rise of ground in the corner made by the road north-westerly, and nearly opposite to the brick house now owned and occupied by Paul Gates.

John Fitch owned and occupied the last-named garrison, which he made in 1739, when he and his wife and two children moved there from Bradford, and from which, on the 5th day of July, 1748, he and his family were taken by the Indians, and carried to Canada. Between the years 1740 and 1748 the Indians kept the inhabitants in the frontier towns in a state of constant alarm. England was waging war with France, and her colonies suffered dreadfully from the incursions of the savages, who were instigated by

the French in Canada. The French government paid a large bounty for English scalps, and a larger one for English prisoners. Indian scouts were frequently seen in and around Lunenburg, and fears were daily aroused from a consciousness of insecurity. The savages had lurked around this locality, taking their observations from the summit of Rollstone Hill, for some time before making their attack on Mr. Fitch's garrison. The inhabitants in Lunenburg and vicinity, apprehensive of an attack, assisted Mr. Fitch in fortifying his house, and early in the year 1748 four soldiers were stationed within the garrison. Mr. Fitch had traded considerably with the Indians, and his frontier position was well known to them. They were resolved upon his capture, knowing that he was a man of much force of character and that his friends would contribute liberally for his release from captivity. Accordingly a party of them, not far from seventy in number, on the morning of the day above mentioned, stealthily approached his abode during the absence of two of his soldiers, and suddenly fell upon him and his two remaining companions, who were a short distance from the garrison. One of the soldiers named Zachæus Blodgett was instantly killed. Mr. Fitch and the other soldier named Jennings, escaped within the house, where they exchanged shots with the foe for an hour and a half, when Jennings received a fatal wound in the neck from a shot through a port-hole. The wife of Mr. Fitch loaded the guns while her husband continued his efforts to drive away the assailants. At length the Indians distinctly told him that if he persisted in continuing the fight he and his family should perish in the burning of his cabin, but if he would surrender they promised to spare the lives of all in the house. He then surrendered, and his house and pens for his animals, with the fences, were immediately burned by the Indians, and Mr. Fitch with his wife and five children were started on their dismal journey towards Montreal. The wife of Mr. Fitch carried an infant in her arms about five months old, the ages of the other children varying from four to thirteen years. The news of this capture did not reach Lunenburg until about daylight the next morning, when the alarm (three muskets heavily loaded, discharged with a certain interval between each report) was immediately fired. Soldiers arrived in an incredibly short period from Groton, Lancaster and even from Westford. They quickly put themselves under command of Major Hartwell and started in pursuit. The Indians proceeded along the south side of Watatic Mountain, and made their first stop at the meeting-house in Ashburnham. The inhabitants of that place had given up and abandoned their settlement only a short time previous. Somewhere in the township of Ashburnham the soldiers in pursuit discovered a paper fastened to a tree containing a few lines written by Mr. Fitch imploring his friends not to attempt his rescue, as the Indians had promised to spare all their lives if unmolested,

but threatened instant death to himself and family if his friends attempted to deprive them of their capture. The pursuing party then returned. After enduring the severest hardships in their long journey through the wilderness in captivity, the family were ransomed by their friends in Bradford. They returned by way of New York, Providence and Boston. The wife of Mr. Fitch, after enduring bravely her captivity, was taken sick while returning and died in Providence, December 24, 1778, almost six months after the date of capture.

Some of the incidents connected with their journey to Canada are worthy of record. When the prisoners left the smoking ruins of the garrison one of the Indians, among other things plundered, took a heavy draft chain and carried it on his shoulders to Canada, and then sold it for a quart of rum. Catherine, aged thirteen, and John, eleven years, walked along with their parents. The two boys, under six years of age, were each strapped to the back of an Indian and carried along. The younger one, then four years old, suffered much; his legs became dwarfed and much deformed on account of the tightness of the deer-skin thong which bound him to the back of the savage. Susanna, the infant prisoner, endured the trials of captivity with less unhappiness than any one of the family. She married Joshua Chase, of Shirley, in June, 1770, and surviving her husband, she died in Shirley July 10, 1827. After the return of Mr. Fitch with some of his children to Lunenburg (now Ashby), he again made himself a home at or near the same place where the garrison was burned. In 1772 he moved to Rindge, N. H., where he owned several lots of land, and after living there several years he moved back to Ashby. He lost his property in his old age, his mind being somewhat impaired, and he became an object of charity. In 1793 the town record has the following: "*Voted*, that the selectmen provide for Mr. Fitch in the best manner they can at their discretion." From that time until his death the town supported him.

He was born in Billerica in 1708, died at Ashby April 5, 1795. In January, 1749, soon after his return home, he sent the following petition to His Majesty's Governor and Council and House of Representatives:

"To the Honorable Spencer Phelps, Governor-in-chief of the Province of Massachusetts Bay, in New England, for the time being; to the Honorable, His Majesty's Council and House of Representatives in General Court assembled;

"John Fitch humbly shows that in the year A.D. 1739 he purchased about one hundred and twenty acres of land, about seven miles and a half above Lunenburg meeting-house, and about three miles and a half above any of the inhabitants, on the road leading from Lunenburg to Northfield, and there by industry built him a house, and improved so much land as to raise provision for his growing family and some to spare, whereby he entertained travellers, and being a carpenter, was furnished with some tools necessary for that business, and being distant from neighbors, was obliged to keep the chief of his tools and live within himself, and had husbandry utensils and household stuff, and that upon the war breaking out, although he had no near neighbors to join with him in a garrison, yet divers of the inhabitants of Lunenburg,

knowing the great security that a garrison at his place might be, urged him to build one; and many of the inhabitants assisted and helped him in it, after which the several officers appointed over the soldiers and scouts ordered a quota to that garrison, and it was a place of resort and refreshment to town scouts and for large scouts from Northfield, Townsend, Ashuelot and other places. And your petitioner received and entertained them, and in the year A.D. 1748 the scouts from Lunenburg and Townsend were ordered to meet there once every week, and he had four soldiers allowed to keep said garrison, and on the 5th day of July in the same year, by reason of bodily infirmity, there were but two soldiers with him, although others with the scouts were to come that day. On that day before noon, and before the scouts came, the Indian enemy appeared and shot down one soldier upon being discovered, and immediately drove him and the other soldier into the garrison, and, after besieging the same about one hour and a half, they killed the other soldier through the port-hole in the flanker; and then your petitioner was left alone with his wife and five children, soon after which he surrendered and became a prisoner with his said family, and the enemy took and carried away such things as they pleased, and burnt the house and garrison with the rest, and then we entered into a melancholy captivity, with one small child on the mother's breast, and two more became sucking children in the way for want of provisions, which, with other hardships, brought my dear wife into a bad state of health and languishment, and in our return, being by New York, Rhode Island and Providence, there in December last she departed this life, and when I, with my five children, arrived at this province, we were objects of charity for food and raiment, which some charitable people bestowed upon us. Yet your petitioner's family are dispersed by reason of poverty, and must so remain unless some charitable help may some way or other be bestowed, for your petitioner is utterly unable to put himself again into suitable circumstances, and to bring home his dispersed and melancholy family, having his substance burnt as aforesaid and fences also; and your petitioner begs leave to inform you that he is utterly unable to build, furnish and fence and maintain his dispersed family, two children being a continual charge since our captivity, only being under the doctor's care ever since. Your petitioner also lost his only gun, worth thirty pounds, and an ox at the same time, and his stock of cattle are chiefly gone, having no hay last year, and is under very pitiable circumstances, and begs relief in some way or other, as this Honorable Court shall think best, as in duty bound shall ever pray."

This petition bears the following endorsement:

"In the House of Representatives, April 9, 1750. Received and ordered that there be allowed out of the Public Treasury to the petitioner eight pounds, in consideration of his sufferings within mentioned, and to enable him to resettle himself and family on his plantation. Sent up for concurrence. THOMAS HUBBARD, Speaker *pro tem*."

"In council April 9, 1750. Read and concurred."

SAMUEL HOLBROOK, Dept. Sect."

"Consented to, S. PHIPS."

The following petitions show that the Indians were in considerable force, and that some of them did not leave with the captives after the burning of Fitch's little garrison:

"To His Excellency, William Shirley, Esq., Governor, with the Honorable Council of the Province of Massachusetts Bay assembled: The petition of the inhabitants of Lunenburg and Leominster humbly sheweth that, *Whereas* the Indian enemy have very lately been among us in considerable numbers and with unusual boldness, and have destroyed one of our garrisons, killing and captivating the inhabitants, and as we have no more than ten soldiers allowed by the government for our protection (who are all in Lunenburg), and though in Leominster we have a small scout of our inhabitants, the circumstances are so weak and exposed that the commanding officers can hardly think it prudent to send them into the woods; so that we are forced to look upon ourselves in a very hazardous, as well as distressed, case to such a degree that we cannot many of us labor on our farms or abide in our houses with tolerable safety, but ourselves and families must be in danger of suffering much, either by penury or the direct insults of a cruel and barbarous nation, or both of them. It is, therefore, may it please your Excellency and Honors, our humble and earnest prayer that you would grant us for our protection such a number of soldiers as in your great wisdom and fatherly compassion you shall deem requisite for the preservation of our estates, our liberties and our lives. Such kindness and tender care in

your Excellency and Honors we shall ever with sincere gratitude remember, and your petitioners shall ever pray."

This petition was signed by fifty-eight of the citizens of Lunenburg and Leominster, and is dated July 8, 1748, three days after the surrender of Mr. Fitch.

Remonstrance of the Commissioned Officers and Selectmen of Lunenburg.

"The humble remonstrance of the commissioned officers and the Select Men of Lunenburg sheweth that on the fifth day of this instant, July, the enemy beset and destroyed one of the outmost garrisons of the town aforesaid, killed two soldiers and captured a family, consisting of a man, his wife and five children, and that on the seventh day of the month they discovered themselves in a bold, insulting manner three miles further into the town than the garrison which they had destroyed, when they chased and shot at one of the inhabitants who narrowly escaped their hands, since which we have had undoubted signs of their being among us. Several of the garrisons built by order of the general court are already deserted for want of help, and several more garrisons of equal importance, that were built at the cost and expense of particular men, are deserted likewise. For three days in four the last week the inhabitants were necessarily rallied by alarms and hurried into the woods after the enemy, and thus, we have just reason to conclude, will be the case, frequently to be called from our business, for almost daily the enemy are heard shooting in the woods above us, and to be thus frequently called from business in such a season must impoverish us, if the enemy should not destroy us; and what we greatly regret is, our enemies, having a numerous herd of our cattle to support themselves with and feast upon, among which they have repeatedly been heard shooting, from which we conclude that there may be great slaughter among our cattle,

" EDWARD HARTWELL, JONATHAN WILLARD, JOSIAH DODGE, JACOB GOULD, BENJ. BELLINGS, JONATHAN BRADSTREET, BENJ. GOODRICH, JOHN GRANT, BENJ. FOSTER.	} } } } } } } } }	Commissioned officers. Selectmen of Lunenburg.
--	---	---

"July 12th, 1748."

After the Indian wars were ended, and the war between Great Britain and France was closed by treaty, the settlers in the frontier towns of the Province gave their attention particularly to religious matters, among which was the nearest and best way to attend public worship. The language in the charters of most all the towns in regard to territory, without fixing the boundaries, expressly gives the grantees an area "not exceeding six miles square;" but in some way when the surveyors and sworn chairmen, attended by interested parties, finished their work and submitted the plan, their lines inclosed, in many instances more than one-third more acres than were granted. This was the case with Lunenburg, chartered in 1728, and with Townsend, chartered in 1732. The distance from Lunenburg meeting-house to its western boundary was about eight and one-half miles. The distance from the meeting-house in Townsend to Ashburnham line was about eight miles. From A.D. 1750 to 1765 the number of inhabitants living in the territory which is now comprised within the limits of Ashby increased considerably. The people of Townsend had located more in their western border. The excellent land in the northwestern part of Lunenburg was settled with neighbors at convenient distance. The northeast part of Ashburnham, containing an industrious colony of Germans, was only a

short distance from the present Common in Ashby. All these people were anxious to have a town of their own and an easy distance to a meeting-house. Until 1764 the territory included within the present towns of Townsend, Lunenburg, Ashburnham, Fitchburg and Ashby was embraced by the three towns first named. In 1764 Fitchburg was set off from Lunenburg, and at that time included the southern part of Ashby. In 1765 Ashburnham was incorporated without changing any town lines.

On the 5th day of March, 1767, the town of Ashby was incorporated from the west part of Townsend, the north part of Fitchburg and about twelve hundred acres taken from the northeast part of Ashburnham. It will thus appear that John Fitch and his neighbors, living, in 1763, in the southern part of Ashby, were citizens of Lunenburg; in 1764 they were in Fitchburg; and 1767 they were in Ashby. In the brief space of three years, without changing their domicile, they were voters in three different towns and attended town-meetings in each of them.

The petition for the incorporation of Ashby was before the General Court for more than two years before it was acted upon. Neither Townsend nor Fitchburg objected to giving up the portions of their territory asked for by the petitioners, but Ashburnham became much excited, because so many of its citizens owning so much territory in that township were anxious to join in making up Ashby. There were several town-meetings called on this subject and the record of one of them contains the names of the remonstrance of sixteen of the voters against granting the petition. After the matter was fully explained to the General Court, only about one-fourth part of the proposed area was severed from Ashburnham. James Locke, Jr., of Townsend, John Fitch, of Fitchburg, and Jacob Schoff, of Ashburnham, constituted the committee which appeared before the General Court in behalf of the petitioners. They were in attendance at the Court sometimes collectively, sometimes singly, at different times, and within a few months after the creation of the town an amount of money was voted to pay their expenses.

There has been only one alteration in the boundary lines of Ashby since its creation. There was, however, a slight alteration in the line between Fitchburg and Ashby, made by the General Court, March 3, 1829. Some of the citizens in the northeast part of Ashburnham, in 1791, who did not succeed in being annexed to Ashby in 1767, remembering their disappointment for twenty-five years, and not being in full sympathy with a majority of the town in matters of religion, were determined to make another effort to get away from that town. When a new meeting-house was proposed at that time the desire to leave was much greater. They gave Ashby to understand that they wanted to be annexed to that town. Ashby, with much promptness, "Voted to receive Isaac Whitney, James Pollard, James Bennett, Joseph Damon, Jeremiah Ab-

bott, John Hall, Daniel Brown, John Abbott, Amos Brooks, John Shattuck and others, with their lands, together with the non-resident land within the bounds of a plan that they shall exhibit to the town if they can be legally annexed to this town." This movement caused a sharp controversy among the citizens of Ashburnham, more bitter, if possible, both in and out of several town-meetings, than that of 1767. The dispute was carried to the Legislature, where two of the most influential men of the town, with Jacob Willard, who was the Representative, made an earnest effort against the measure, but the petitioners accomplished their object and the act was passed November 16, 1792. The act in part is as follows:

"Be it enacted by the Senate and House of Representatives in General court assembled, and by the authority of the same, that John Abbott, James Bennett, James Pollard, John Shattuck, Joseph Damon, Isaac Whitney, Jeremiah Abbott, John Hall, Amos Brooks and Daniel Brown, with their families and estates, and also the lands contained within the following lines (excepting the lands now owned by Henry Hall) to wit: beginning at the northeast corner of Ashburnham at the line between the states of Massachusetts and New Hampshire, and running westerly by and with said states lines 504 poles to the land of James Spaulding; thence running southerly in a straight line by land of said Spaulding 145 poles to land of Capt. John Moor. Thence running southerly in a straight line 870 poles to Ashby line at a stake and stones; thence running by Ashby line 753 poles to the corner of Ashburnham first mentioned be, and hereby are, etc."

By this excision from Ashburnham Ashby acquired about six hundred acres of land and fifty inhabitants. The language of the grant is quoted here in account for some angles in the town-line not mentioned in the report of the selectmen of both towns, dated October 16, 1793, when the line was established. This line was not made according to the grant, but according to the needle of Matthias Moseman, who was the surveyor.

As before stated, Fitchburg was willing that John Fitch and others living in that part of Fitchburg which is now in Ashby should be set off into a town or parish. In September, 1764, Fitchburg "voted that two miles on the westerly line of this town, beginning at the northwest corner, and half a mile on the easterly line, beginning at the northeast corner on Townsend line, then running a straight line from one distance to the other, be set off to Mr. John Fitch and others in order to make a town or parish among themselves." Mr. Fitch was popular in Fitchburg, having been first on the committee which was active in getting the charter of the town. Three years after this Ashby entered the sisterhood of towns. The act of incorporation empowered James Prescott, Esq., of Groton, to call the meeting for the municipal organization of the town, and he drew his warrant, dated March 23d, directed to John Bates, requiring him, "in his Majesty's name," to notify and warn the inhabitants of Ashby qualified to vote in town affairs to assemble at the house of Peter Lawrence "att nine o'clock in the forenoon." The house where this meeting was held was burned. It stood on the foundation where a cottage-house now stands on the south-

erly side of the main street running through the central village, and about one-third of a mile westerly of the Fitch Monument. Peter Lawrence was the son of Jonathan Lawrence and Tryphena Powers, born in Townsend October 14, 1742, died in Ashby October 21, 1798. His house was probably built just before his marriage, of which there is no record, but his first child was born May 25, 1766.

The second meeting of the town, and the first under its own organization, was held at the house of Jonas Barrett. From the proceedings at this time it appears that the house of Peter Lawrence was fixed upon as the place where their civil and religious meetings were to be held. Twenty pounds were appropriated "to hire preaching" and a committee chosen to expend the same. Measures were also taken to secure a suitable place to bury the dead. The first valuation was made in 1768, which gives the names of forty-three of the fathers of the town, with the account of their estates. Like other people in a newly-settled town, they were poor in this world's goods but rich in all the elements of manhood and patriotism which came down from the pilgrims of 1620.

Before the town had passed one year of its municipal existence, Lieutenant Amos Whitney, of Townsend, was chosen a delegate to a convention called by the inhabitants of Boston, to discuss the critical condition of the Colonies in relation to Great Britain, and the selectmen were instructed to communicate to him the sentiments of the town, which were as follows: "As there is a prospect of some of His Majesty's troops arriving in this Province, we judge it may be of importance, if they should arrive, that proper measures be taken that their order may be discovered before they are suffered to land, and the province receive notice of the same; and if, upon discovery of the same, they appear to be manifest infringements of the natural rights of the people, or upon our Charter Rights, of this Province in particular, that all proper and prudent measures may be taken to defend and secure the Province."

For the next few years the efforts of the citizens of Ashby were mainly directed to securing a place of public worship. In March, 1769, the town voted to build a meeting-house and decided on its dimensions, but it was more than two years after that before the frame was covered and the floor laid so that a town-meeting could be held within its walls.

In the month of March, 1772, the arrangement for finishing the pews on the lower floor of the house and building a pulpit was completed and the work done. In 1774 the house, except finishing the pew ground in the gallery, was considered by those who were to occupy it as finished; and although it was not an elegant structure, only a mere shell where two or three hundred people could be seated, it undoubtedly held within its walls as sincere worshipers as were the contemporaries of David who exclaimed, "How amiable are thy tabernacles, O Lord of Hosts."

The town records are silent in regard to the dedication of this building; neither is the date given when it was opened for religious services. June 4, 1772, by vote of the town, was observed as a day of fasting and prayer. Five ministers from the neighboring towns were invited to be present, and it may be that it was dedicated at that time. The first money appropriated for schools was in 1773, when four "squadrons" (districts) were formed, each of which was to draw its portion of what it paid from the eight pounds assessed for that purpose. The same year the town appropriated thirty pounds to support preaching.

As the town records come down nearer to the opening of the Revolutionary War we find the opinions of the citizens of Ashby, entered on these records more bold and outspoken. When the citizens of Boston resolved that the tea of the East India Company should be sent back to the place from whence it came, their action was quickly responded to by the citizens of Ashby, and the message went back "That it is the opinion of this town that the proceedings of the town of Boston at their meeting in November last respecting the East India Company's tea imported to, and intended for sale in America, is agreeable to reason and the natural rights of this free people, and the same appears to have been necessary at that time." July 11, 1773, the town ordered the selectmen to offer to all persons in town for their signature the "Solemn League or Covenant, to suspend all commercial intercourse with the mother country, and neither purchase nor consume any merchandise imported from Great Britain, after the last day of August," and the selectmen were instructed to act as a Committee of Inspection to see that the covenant was fully observed. October 4, 1774, Captain Samuel Stone was chosen to represent the town in the Provincial Congress, which met at Concord and adjourned to Cambridge. In the warrant for this meeting His Majesty's name was omitted and the call was made "By Virtue of our Charter Rights," thus ignoring the royal prerogatives and taking the first step towards independence.

On the 13th of October the Provincial Congress advised the several constables and collectors throughout the province, having money in their possession, payable to the order of Harrison Gray, to retain the same; on the 28th Henry Gardner, of Stow, was named as treasurer and receiver by the Congress. December 29th the town instructed the constables to pay the amount in their hands to Henry Gardner, and that his receipt should discharge them from any obligation to the town. June 16, 1774, the town "voted to instruct the selectmen to procure thirty hogsheds of salt for the use of the town." Their stock of ammunition and arms was also replenished, and when the crisis came they were able to lend to their neighbors. February 24, 1775, in accordance with the recommendation of the Continental Congress, the Solemn League and Covenant was dissolved

and the resolution passed September 30th in respect to the importation and exportation of any goods from or to any of the ports of Great Britain was adopted, and a Committee of Inspection chosen.

The 19th of April, the day on which the troops of Great Britain and her Colonies first came in hostile collision, had dawned. The British troops reached Concord at seven o'clock A.M., and the "Alarm" which aroused the Ashby minute-men was fired at about nine o'clock. There are good reasons for the belief that the "Alarm" was fired in front of Lieutenant Jonas Barrett's house. He was an inn-holder and the second in command of the "minute-men" who must have had some rendezvous for their arms and equipments, which were kept in readiness for instant action. Within a short time this company of forty-six men, under the command of Captain Samuel Stone, shouldered their muskets and hurried on towards the scene of action. Before the Ashby men had reached Concord, the enemy hurried back and had arrived at their quarters by the tide-water.

"A muster Roll of the minute company under the command of Captain Samuel Stone in Colonel William Prescott's regiment enlisted April 19, 1775: Samuel Stone, Captain; Jonas Barrett, First Lieutenant; James Bennett, Second Lieutenant; Abijah Wyman, Sergeant; Benjamin Spaulding, Sergeant; Isaac Brooks, Sergeant; Amos Wheeler, Sergeant; Ephraim Gibson, Corporal; Peter Lawrence, Corporal; William Flagg, Corporal; John Meede, Corporal; Samuel Stone, Jr., Fifer; Timothy Stone, Drummer.

"*Soldiers*.—Joseph Davis, Caleb Nuss, Salmon Dutton, Oliver Wright, James Spaulding, Joseph Goodrich, Nathan Davis, Thomas Dutton, Benjamin Newton, Jonathan Barrett, Benjamin Barrett, Samuel Winch, George Newell, John Lawrence, Walden Stone, Stephen Patch, Benjamin Hodgman, Nathan Barron, Joshua Barron, Jacob Wheeler, Elisha Davis, Thadens Smith, Isaac Stearns, Joseph Wheeler, William Walker, Jonathan Daby, Solomon Coleman, Jonathan Gibson, Jonathan Stone, James Jones, Jonathan Lawrence, Jr., John Stone, John Wheeler."

The time of service of these men was short, varying from five to thirty days. Lieutenant Barrett served forty-four days. They were paid the usual wages and for one hundred miles travel. April 20th the militia, under command of Captain John Jones, enlisted and hurried on to join the Provincial forces in the field.

"Muster Roll of Ashby men in Colonel James Prescott's Regiment of militia who marched on the 20th of April, 1775: John Jones, Captain; Stephen Gibson, First Lieut.; Jonathan Locke, Second Lieut.; Samuel March, Sergeant; Joseph Walker, Sergeant; Benjamin Walker, Sergeant; Abraham Gates, Sergeant.

"*Soldiers*.—Joseph Wheeler, Samson Hildreth, Benjamin Hodgman, Jacob Upton, David Locke, Timothy Emerson, Asa Walker, Samuel Fletcher, Asa Shedd, Rufus Wilder, Jacob Lewis, Isaac Gregory, Samuel Howard, Ira Bennett, John Dunsmore, John Gibson, Joseph Barker, Silas Brown, John Foster, Jonathan Foster, Jacob Damon, John Read, Joseph Damon, Aaron Coleman."

This company remained in and around Cambridge and Charlestown till April 29th, when its members were paid for seven days' service and for one hundred miles' travel. These two rolls are copied from Volumes XII, and XIV, in the State archives, which are indexed, "Military Rolls, Lexington Alarm."

The Provincial Congress, considering the necessity of a stronger military force, on the 23d of April re-

solved to raise 13,000 troops from Massachusetts, and in order to promote enlistments as fast as possible, those who raised companies or regiments were promised commissions. Under this arrangement Abijah Wyman, who was first sergeant in the company of "minute-men," raised a company, twenty-four members of which were Ashby men, eight were from Captain Stone's company and four from Captain Jones'. Second Lieutenant Thomas Cumings and ten men were from Westford and others were gathered from different places. First Lieutenant Isaac Brown was one of the selectmen at that time. He was wounded at the battle of Bunker Hill. John Gibson, of Fitchburg, and Caesar Bason (colored), of Westford, were killed. Amos Wheeler, of Ashby, was wounded and died on the 21st of June. Benjamin Bigelow, of Ashby, and Oliver Stevens, of Townsend, were taken prisoners and died in the hands of the enemy. Ezekiel Bigelow was severely wounded. John Meede fell on that day.

Forty-three of the citizens of Ashby participated in the siege of Boston and the organization of the little army of Washington. Seven of her townsmen joined in the terrible campaign in Canada and passed through privations and sufferings almost unparalleled in modern warfare. They probably marched with Arnold through the wilderness of Maine, for Lieutenant Brown states in his return, made October 3d, that John Campbell was detached from the company September 7th, and given a command in Quebec.

At a town-meeting held on the 1st day of July, 1776, "Voted, That if the Honorable Congress, for the safety of the Colonies, should declare them independent of the Kingdom of Great Britain, the inhabitants of Ashby will solemnly engage with their lives and fortunes to support them in that measure."

On the 24th of July, 1776, fourteen men enlisted for five months, and served at or near Ticonderoga, and Ezekiel Bigelow and William Walker were killed in this campaign. At about the same time three men enlisted for three months and served at or around Boston.

In September, 1776, eight men joined "Company No. 7," consisting of sixty men from Townsend, Pepperell, Ashby and Groton, in a regiment organized by Brigadier-General Oliver Prescott, of Groton, with Captain Thomas Warren, of Townsend, who were on duty at New York. In December seven more enlisted for three months and served at the same place. In some one of the engagements occurring there Simon Patch was wounded, and died on his way home. August 2, 1777, five men were drafted to serve three months at the westward, and on the 14th of the same month, by an additional draft, five more were required to report for duty for three months at or near Bennington. On the 30th of September, 1777, in compliance with an order from General Prescott, seventeen men were detached from the militia company, to serve for thirty days after they arrived at the camp of General Gates,

and marched the next morning. This company, consisting partly of volunteers, contained sixty-six men, rank and file—James Hosley, of Townsend, captain; Asa Kendall, of Ashby, first lieutenant. In the roll may be found the names of "Privates William Prescott, Esq., formerly Colonel; Henry Woods, Esq., formerly Major; Samuel Stone, Major in the militia." When veterans like these join the ranks, no wonder that the over-confident Burgoyne was compelled to surrender.

The year 1778 opened with a call for eight men to perform guard duty at Cambridge, who were promptly furnished. May 18th three men enlisted for nine months in the Continental Army. October 29th five men were detached from the militia and ordered to the frontier, distant 180 miles. In addition to these oft-repeated calls the town was required to fill her quota of three years' men for the Continental Army. From this record of enlistments it must be evident that Ashby made every possible effort to redeem the solemn pledge made July 1, 1776.

The first town war-rate made in 1778 to cover its liabilities was £1245 14s. 7d., but this sum not being sufficient to meet its obligations, the people were obliged to tax themselves the second time, in the same year, to the amount of £934. The town was required, by the General Court, to furnish many articles of clothing, shoes and blankets for soldiers during the war, which it found difficult to procure, but which were vigorously exacted by those in authority. Here is a receipt for some things sent:

"CONCORD, October ye 10th, 1778.

"Then received from Mr. Asa Walker, one of the selectmen of Ashby, fourteen pairs of shoes, fourteen pairs of stockings, twenty eight shirts, agreeable to the resolve of the General Court of the 7th of June last.

"JOSEPH BOSMER, agent for Middlesex."

It appears from the town record of August 7, 1776, that one man was suspected of being a Tory, but as nothing is recorded further concerning this matter, the presumption is that he uncovered before the assembled dignity of the town and made satisfactory apologies. *Article in the warrant*: "To see if the town will take under consideration the case of Oliver Blood concerning toryism, together with the proceedings of the committee of safety." Twelve of the citizens of Ashby were in sympathy with the ill-advised and irrational revolt known as the Shay's Rebellion. Most of them were good soldiers in the long War of the Revolution, and all of them were much-respected townsmen. The town records show that they all, at different times (from 1787 to 1791), appeared before some magistrate or the town clerk and "took the oath of allegiance and delivered up their arms." From the fact that some of them took the oath before Oliver Prescott, Esq., of Groton, it may be presumed that they were in Job Shattuck's company. Names of these men: William Stacey, George Darricott, Earl Stone, Benjamin Barrett, Jr., Elijah Houghton, Jr., Isaac Gregory, Stephen Patch, Charles Lawrence,

Jonas Barrett, John Lawrence, Benjamin Adams and Eleazer Shattuck. It may be well to allude to some of the causes which induced some of the men of Massachusetts to enter upon an open and armed revolt against their government. After the declaration of peace, in 1783, a general stagnation of business ensued. The united Colonies owed a debt of about \$40,000,000, without any means of paying it. Congress, under the confederation, had power only to advise the Colonies to adopt certain measures to meet the wants of the times. No uniform system could be agreed upon to pay this debt or even the interest accruing upon it. The whole body of the people became alarmed and all confidence was destroyed. Even the certificates of the public indebtedness lost their credit with the people, and many of the officers and soldiers of the late army, who were poor, were obliged to sell these certificates at greatly reduced rates. These soldiers naturally hoped and expected that if they could gain their independence and a government of their own be established, that public and private prosperity would certainly follow and everything move on pleasantly. In this they were greatly disappointed. The war had stopped the introduction of gold and silver money into the Colonies, and paper money was worth only about two shillings on the pound. There was no business, no way for the people to earn any money, and money-lenders were in a panic and commenced suits against all who were indebted to them. This state of affairs afforded a rich harvest for the sheriffs and lawyers. Never were the services of the lawyers in greater demand or the courts filled with so much business. The patience of the people was entirely exhausted on seeing their property seized on executions issuing from these courts. They knew not the origin of the evils, but supposed that there was some defect in the laws—that there were too many or not enough. A lawyer on one side and a sheriff on the other, with poverty in front staring a man in the face, will cause him sometimes to resort to desperate measures to extricate himself. Under these circumstances a large number in Worcester County and from the towns of Groton, Pepperell, Shirley and Townsend participated in what was known as the "Shay's Insurrection." From this it will be understood why such men as Jonas Barrett, Deacon John Lawrence and others were obliged to take "the oath of allegiance and deliver up their arms."

After the inauguration of Washington, in 1789, Ashby gave strict attention to the improvement of the condition of the schools. The militia was as well organized then as before the war, and there was much interest taken in its general good appearance at the fall musters. In 1797 the town chose a committee and instructed them "to procure two horses and a wagon, to be under Captain Kendall's direction, to go to Concord; also to provide, at their own discretion (to be paid for by the town), bread, meat and

cider; also one pint of rum per man, for all the militia, both foot and troop, who were obliged to muster at Concord on the 26th of September, instant."

CHAPTER XVII.

ASHBY--(Continued).

MECHANICAL INDUSTRIES.

THE numerous seats of power along the courses of the brooks, with their precipitous banks, invited the people to leave the cultivation of the soil, and temporarily to engage in mechanical pursuits. There are twenty-three mill-sites in Ashby, where the water at some time previous has been or is now utilized to drive machinery. Some of the primitive mills were simple in the extreme, having only an "up-and-down" saw, which, with slow progress, cut out boards, joists and timber for building purposes. These, however, were absolutely necessary for the progress of the settlement. Not many of these have contributed much towards the wealth of the town, being in use only a part of each year, and through neglect they were at an early date allowed to fall to the ground. There has been no effort made to particularize all the mills and mill-seats in town. The first grist-mill was built about 1750, by James Locke, and it stood a short distance below the bridge, over the Locke Brook, in the road from Greenville, N. H., to Fitchburg. This mill was burned (date unknown), and one of the run of the stones was broken in the fire and remains on the spot at the present time. One of the substantial contributions, coming from Ashburnham, at the incorporation of Ashby, was a mill, standing on the brook which comes from Ward Pond, situated on the southwest side of the road leading from the west cemetery to New Ipswich. This mill was built by Moses Foster, Jr., and Zimri Hayward in 1756, and it was used in various industries for more than a century. During its existence it was enlarged, repaired and utilized for grinding, sawing, threshing and driving lathes for the manufacture of tubs and pails. Some of the owners, since the Germans were proprietors, were Richard Richardson, Calvin and Newton Wood, Lewis Whitney (made chairs), Cushing Burr, Joel Balcom, Alvah Stacey, F. W. Wright and Abram M. White. Joel Balcom was killed in this mill by a circular saw April 25, 1845. A part of the old stone dam and a neglected building, once a paint-shop, are all that remind us of the days of yore.

The next mill above, on this young Souhegan, which has had many proprietors, is occupied by S. M. Buxton, who uses modern machinery for sawing all kinds of building lumber. Mr. Buxton also makes a large amount of cider, his customers not having the

fear of the prohibitionists before their eyes coming from all directions. A short distance above this is another mill owned by Mr. Adriel Jefts, which at present is not used. The next mill up stream, situated near the town-line, is owned by Mr. Levi E. Flint. This is a large and commodious building, and is used in the manufacture of boards and shingles, and stock for making tubs and pails. All the appliances here, for this business, are first-class so far as room, power and machinery are concerned. A set of tub and pail lathes have recently been put into this mill. On a brook, which is an affluent of the Souhegan, draining the easterly slope of the Watatic, and its surroundings, is a mill that was built at an early date at the side of the New Ipswich road. Here is a strong stone dam holding in its grip a nice little privilege, and the mill, owned by Mr. Asa Holt, is in fair condition considering its age. Besides being used as a saw-mill it has been a chair factory, and Colonel George Waters used it for a starch factory as long as that business was remunerative. At present there is no business done here. There was a saw-mill on Trap Falls brook, called "the Ralph Hill mill," near where Perley Gates died, before the town was incorporated.

About 1804 Samuel Whitney and Asa Wright built a saw-mill on Willard's Stream, situated just below the bridge next below the Sheldon bridge. This mill was carried away in 1856 by the breaking of the reservoir dam. Before 1791 Captain Abijah Wyman built a saw-mill on Willard's Stream, a short distance above the Sheldon bridge, which has been gone for a long time, but a part of the stone foundation and mud-sill still remain to mark the location. On the next mill-site above this, a mill was burned, in which Benjamin D. Lawrence, William Lawrence and Martin Allen, in 1831, made the first tubs and pails which were made in Massachusetts, which were turned in a lathe. James O. Kendall in 1846 built the mill now standing here, which is used in sawing, turning and planing, owned Mr. Harry Wilder.

The next mill above this is the tub and pail factory of Alonzo A. Carr. This mill also was built by James O. Kendall in 1847. It was used for a saw-mill till 1853, when Abram M. White bought it and put in tub and pail lathes, and from that time to the present it has been used in this manufacture. This factory has always been a source of wealth to its owners. Mr. Carr employs from twelve to fifteen men and his annual sales amount to about twenty-five thousand dollars. About 1780 Benjamin Lawrence built a grist-mill which stood about one hundred feet below where the present grist-mill at the South Village now stands, which was in existence till about the beginning of the present century, when Ephraim Hayward bought it, tore it down, and built the mill now in operation. This property has passed through the hands of several owners. Joseph Kendall, father of James O. Kendall, who owned it soon after it was

built, probably had the largest amount of custom in grinding the cereals which were raised in Ashby, at a time when a part of the grain was taken in payment for grinding. The present proprietor, William O. Loveland, is doing considerable business in grinding Western corn and in the sale of grain and meal. With the new road just finished and the improvements lately made in the saw-mill, this establishment must be a source of profit to the owner. In the south-east corner of the town, on the Pearl Hill Brook, and near the Fitchburg line, Daniel Ware has a saw-mill which is run a part of each year in the manufacture of that kind of coopering stock which is worked by hand. Two mills, on this brook, one above Ware's mill and the other below, called "the Lord mill," have gone down. The Lord mill was made for wool-carding, cloth-dressing and coloring, by a man by the name of Holt, from Fitchburg, in 1827 or 1828. It was not used much for lack of proper management. In 1810, Joseph Kendall built the antique-looking mill which is situated a short distance above the Carr tub and pail factory. He put in machinery for carding wool, fulling, coloring and dressing the woolen cloth which the farmers' wives and daughters spun and wove by hand. This mill was rented for this business to Paul Gerrish for a term of years, who, after the expiration of his lease, located in the same business at Townsend Harbor. It was of great benefit to Ashby and the adjoining towns all along till the spinning jenny and "the power loom" took the places of the "patent-head" and the hand loom of "the mothers." Austin Hayward is the present owner, who does something in this line of wool-carding for the few who can spin or knit.

Jabez Lawrence, in 1824, built a mill for the manufacturing of starch, which was situated on the road from Lunenburg to Ashburnham, on Willard's Stream less than a mile below the reservoir. The manufacture of potato starch at that time was a very profitable business. Potatoes were easily raised in this vicinity then; the farmers had large families and stalwart boys capable of doing good work.

Samuel Abbot, an educated man, of Wilton, N. H., originated the idea of making starch out of this product of the soil. In 1811, Ezra Abbot, brother of Samuel, erected a building about twenty feet square, the lower story for a horse to turn a shaft connected in the second story with machinery for washing and grating the potatoes, and also having an apparatus for cleansing and drying the starch. The building and its contents did not cost six hundred dollars. Months passed before the machinery was all in, during which time there was much wonderment in the neighborhood concerning what was to be done here, as Abbot kept his own counsel, and never gave anything but evasive answers to the questions of the curious. The first year of his experience in this industry showed a manufacture of 6000 pounds of starch, at the rate of eight pounds of starch to each

bushel of potatoes. For a market he made repeated visits to the cities on the tidewater, selling some and leaving some to be sold on commission. He sold at eight cents a pound, and traders often put the price as high as twenty cents a pound. It was used in families for making puddings, and otherwise, and was recommended by druggists as a delicate food for invalids. Soon after the practicability and profitability of this business was learned, these two brothers entered largely into this manufacture. Farmers found a ready market for their "long reds," and there was some rivalry among them as to who could raise the largest crop for the Abbots. The price of potatoes, at that time, varied from fourteen to twenty-three cents a bushel, according as the season was favorable or unfavorable for the production of the crop. About this time a starch-mill was established in Mason, and another in New Ipswich, and another in Jaffrey, owned by the Abbots. The success of the Abbots, presumably, was the incentive which caused Jabez Lawrence to build his factory for this work in Ashby. The building was large and convenient, and the power sufficient to do the amount of work required, but the business did not prove to be as profitable as was expected, and it was not used in this manufacture for many years. It was afterward converted into a sash and blind factory, and run in this business till 1840, when it was burned.

In 1853 five mill-owners—John Burr, Joseph Foster, Hiram Aldrich, James O. Kendall and Abram M. White—built the reservoir dam and adjusted the damage done to the owners of the land which the dam caused to be covered with water. On the 11th of April, 1856, this dam broke away, and the valley below was flooded, and considerable damage was done. There was a heavy rainfall for nearly thirty hours before the accident occurred; and when the clouds lifted, a brisk wind from the southwest set in, sweeping across the pond and driving the waves against the dam. Soon a small, but continuous, stream flowed over the top of the dam on the southeast end of it. The current at that point plowed deeper and deeper every moment, until the dam yielded to the force of the escaping water. A mounted courier was dispatched down the valley to notify interested parties of the approaching danger. The flood dashed rapidly down the bed of the stream in its work of destruction. The old dam which Jabez Lawrence made to obtain power for his starch factory was swept away; arriving at the grist-mill at the South Village, the current spread out on both sides of the building and washed the earth and stones away clean down to the ledge, leaving the mill standing, but carrying away considerable lumber and other property.

The first bridge below where Carr's tub and pail factory now stands was washed away. On reaching the Sheldon bridge, that yielded to the mighty force of the water. The mill which stood just below the next bridge down stream, built by Lemuel Whitney

and Asa Wright, was suddenly lifted to the top of the waves and scattered in the fury of the flood. From this point the wrathful current went dashing down stream on a steeper grade between two precipitous banks, lifting great boulders from their beds and howling and seething with increased velocity till it reached the more level land in Townsend, where two or three cellars were filled with water, and from whence quite an amount of wood and lumber was carried down into Ash Swamp. The town was obliged to pay large bills for the repair of roads and bridges caused by this washout. The bill for rebuilding the Sheldon bridge was over \$450. The owners of the reservoir, not disheartened at their loss, soon after employed James O. Kendall, one of their number, to reconstruct the dam, which he did in a workmanlike, substantial manner, completing the job in the month of the following July.

Three citizens of Ashby—Abraham Edwards, Alexander T. Willard and Philander J. Willard, two brothers—were considerably noted as clock-makers. The clocks made by them were put in cases a trifle more than six feet in height, were metallic and would run for eight days without winding, their dials being nearly one foot in diameter. From 1780 to 1840 this kind of a clock was very much in use. This is the time-piece that dukes and people of mawkish sentimentality are so anxious to possess. These gentlemen accumulated considerable wealth in this trade, as many of their clocks were made to order and the price was fixed accordingly. Mr. Edwards' place of business was in a building which stood on the ground on or near where Francis W. Wright, Esq., now lives. The Willards owned and occupied the premises where Lysander Willard now resides. About 1815, Cushing Burr put in tan-vats and erected buildings convenient for tanning and currying leather, which were situated a little west of where the Post-Office now stands. This gentleman and those who succeeded him in this branch of industry were successful in that trade till about 1840, when the combined capital in places like Woburn and other large towns, made it impossible for those doing a smaller business to place their goods in the market at the prices then paid. Levi Burr and Jackson Burr were in this business when it was discontinued. Cushing Burr, Jr., was interested here part of the time.

Perhaps Jonas Prescott Whitney excelled all other Ashby men in mechanical ingenuity. While working at the carpenter's trade in Boston, he bought a small reed organ to gratify his musical taste, upon which he learned to play. On looking it over he concluded that he could make an instrument superior to the one he had. Soon after he moved to Ashby and commenced organ-building in the house now occupied by Miss Clara Mansfield. He made every part of his organs: the keys, the reeds, the bellows and stops; he made cases and sawed the veneering, getting his power from a wind-mill on top of his house. He

painted and finished his instruments and tuned them so nicely that they became celebrated. Some church organs made by him sold as high as \$1500. Presumably he did not get rich in this enterprise, but his son, Andrew Whitney, who went to Fitchburg, owns about as large a part of that city as any one man. He has followed the advice of the Avon poet:

"Say less than thou knowest,
Have more than thou showest."

A half a century ago the mothers and daughters of Ashby were engaged in braiding palm-leaf hats. The traders furnished the leaf to the workers, who made it into hats and returned them to the stores and took their pay in goods. For some time hats of this kind nicely made, were worn here, but most of them found a market south of Mason and Dixon's line. In 1837, 59,989 hats of this kind were made in Ashby, valued at \$7751.50, and this was about the annual average.

CHAPTER XVIII.

ASHBY—(Continued).

ECCLESIASTICAL AFFAIRS.

THREE years before the incorporation of the town the people levied a ministerial tax upon themselves and hired itinerant preachers, holding their meetings at private houses, generally at the residence of Peter Lawrence. This custom was continued until their meeting-house was in a condition to accommodate them. The interests of the town and those professing religion were one and inseparable. From these facts it will be easily seen that in this dual arrangement the town held a controlling influence in all its religious interests. In 1771, "voted not to hire Mr. Lancaster any more." This gentleman is the first minister named in the records. The town was not successful in securing the services of a pastor who pleased the people, or, if one was found whom they liked, he could not be induced to settle with them. Before a church was organized three reverend gentlemen had each received a formal "call" to become their pastor. One of them was Rev. Joseph Goodhue, of Dunstable, who gave as a reason for not accepting that he "distrusted his ability in making the town united in approval of his services." Different ministers supplied; the names of some of whom are not on record. Rev. Abraham Fowler was dismissed 1777. That is all that is said of him. About this time Rev. Jabez Fisher supplied the pulpit for a short time (there was a pulpit in town then), but he did not prove a lucky "fisher of men." In 1788 a call was given to Rev. Samuel Whitman (born in Weymouth, March 1, 1751; Har. Col., 1775), which was accepted, and he was ordained as the town's minister. From

the commencement there appears to have been a lack of unanimity between the church and the town. In 1781, at their annual town-meeting, this article was in the warrant: "To see if the town will pay Mr. Whitman his salary for two years." The town voted to pay him, but four of the citizens "ordered their dissent to be placed on record." It was with considerable difficulty that the money was collected to pay his salary the next year.

In 1783 he was obliged to sue the town before his salary was paid. Soon after this he was dismissed. In 1784 Rev. Joseph Langdon (Dart. Col., 1783) supplied the pulpit for a short time, and in 1786 Rev. David Hascoll and Rev. — Bailey were the preachers. In 1792 the name of the preacher was Gideon Dorranel. For the next four years they had a variety of ministers as usual. On the 14th day of June, 1797, Rev. Cornelius Waters was installed. He was born in Sutton, May 6, 1749; graduated from Dartmouth College 1774; married Sibyl Gardner, of Brooklyn, N. Y.; died at Ashby, July 30, 1824. He was dismissed February 14, 1816, having a pastorate of nineteen years. He was a man of average ability. The town voted to print his sermon delivered on February 22, 1800, on the death of Washington. During the latter part of his pastorate sectarianism and doctrinal differences began to disturb the people. Soon after, the town extended a call to a person whom the church would not accept, which caused a tedious controversy. In 1818 an *ex parte* council was convened which advised the church to withdraw and worship separately from the town; but it was more than a year before a large majority of the church finally left the town's meeting-house and held services by themselves. A part of the people of the town went with the church. At that time the church had one hundred and ten members, all but nine of whom left—one male and eight females. After the separation in 1819, the church and minority of the town worshiped for more than a year in the house of Fred Estabrook. From 1819 till 1885 the church was connected with an ecclesiastical society known as the "Calvinistic Congregational Society." On the 17th of April, 1885, by an act of the Legislature, it took the name of the "Orthodox Congregational Society in Ashby." In 1820 this society built a meeting-house located on land which at present is covered by a thrifty apple orchard at the east side of Charles C. Green's house.

For fifteen years this building was quite well filled on the Sabbath, near the end of which time it was considered too small for vestry and Sabbath-school accommodations, and was sold to a number of gentlemen, who moved it to a lot facing the east end of the Common, and fitted it for an academy—now Watatic Hall. This building is now owned by the town. The first story is used as a town-house, the second for the High School and the basement contains the selectmen's room, with the archives of the town. The meeting-house now used by the Or-

thodox was built in 1835, and dedicated January 1, 1836.

Under the new arrangement, after the withdrawal from the town, the first pastor was Rev. John M. Putnam, who was ordained and installed December 13, 1820; dismissed December 13, 1825. This gentleman was here just five years, and he had the pleasure of receiving forty-six members into the church during the second year of his pastorate.

The next man was Rev. Albert Barlow Camp, born in Northfield, Vt., February 16, 1797 (Yale College, 1822, Andover 1826); ordained and installed January 24, 1827; dismissed March 28, 1832.

The next pastor was Rev. Orsamus Tinker, born in Worthington November 5, 1801 (Williams College 1827, Andover 1830), installed January 1, 1834; died October 13, 1838.

Rev. Charles Wilkes Wood, born in Middleborough June 30, 1814 (Brown University 1834, Andover 1838); installed October 30, 1839; dismissed January 7, 1858.

Mr. Wood is a well-balanced man of amiable and exemplary character, besides being a preacher who secured the attention of his audience by the clearness and force of his arguments. During his pastorate of more than eighteen years he was much respected. He was popular as a school superintendent. He was the orator at the Ashby Centennial, September 4, 1867. At present he resides at Middleborough.

The successor of Mr. Wood, upon whom his mantle fell, was Rev. James M. Bell, born in New York City February 25, 1833 (Union College 1854, Andover 1827); ordained and installed July 21, 1858; dismissed June 21, 1864. He was genial and prepossessing in his manners, an excellent scholar, always knowing what he wanted to say, and always saying just enough. He now has a pastorate at Lisbon, N. H.

Rev. Horace Parker, who was graduated from Amherst College in 1860 and studied theology with Rev. J. C. Webster, of Hopkinton, was installed May 18, 1865; dismissed April 1, 1870. A correspondent says of him: "Mr. Parker did good work here; not a great scholar, but quite original—rather blunt in his way." During his ministry forty-five were added to the church.

Then came Rev. James Monroe Bacon, who was installed November 2, 1870, and his labors were closed by death March 5, 1873.

Rev. George F. Walker (Amherst College 1844) was installed June 11, 1873; dismissed November 18, 1875.

Rev. Azro A. Smith, a graduate from Andover, supplied the pulpit from January 4, 1877, till July 11, 1878.

Rev. Frank E. Mills, born in Charlestown April 8, 1847 (Andover 1878), was ordained and installed November 13, 1878; dismissed May 24, 1882.

Rev. Melvin J. Allen, born in Cincinnati, N. Y., May 7, 1852 (Amherst 1879, Andover 1882), ordained and installed November 8, 1882; dismissed 1889.

From what has been gathered from the records the inference is that religion in Ashby, among all its inhabitants, is a great improvement on that of one hundred, or even fifty years ago. Now a man of one faith can look at another of different views without calling forth a shudder or a scowl from either party. Harmony and "good-will" between the Arminian and the Calvinist have become substitutes for discord and bitterness. Some of the people of Ashby have been slightly irritated, however, from the fact that the Orthodox pastors in their church manuals, and at all times, when alluding to the history of their church, have invariably represented that their church was *the church* which was gathered in 1776.

It is difficult for any one who is perfectly disinterested to understand it in any other way than that there was a great difference of opinion between a large part of the town and a small part of the church on one part, and a large majority of the church and a small part of the town on the other part; that the last-named part, angered at not having a controlling influence, seceded and established a church of their own, and called it the "Calvinistic Congregational Church." The decision of the Court at Concord, in 1822, whereby those who withdrew from the town's meeting-house in 1819 were compelled to return certain property to the town and church, shows conclusively that the church organization was perpetuated by the nine members and the congregation which worshiped with them.

In 1809 the first meeting-house, which was built in 1770, was torn down, and a new one was erected by the town on the same location. This is the house now in use by the First Parish. Joseph Kendall and Darius Wellington, of Ashby, did all the carpenter's work on this building. In 1841 the First Parish remodeled this house by making a floor across, on a level with the gallery floors, supported by strong insulated pillars, thereby making a commodious auditorium on the second flat, with a large hall below, which is used for secular, social and literary purposes. The funds for the purchase of the bell were raised by subscription, headed by Lewis Gould, a number of gentlemen following his example and giving twenty-five dollars. In 1843 he was a donor to the town of \$300, given expressly for the purpose of buying the town clock, to be placed on this church, and in 1847 he contributed \$100 towards defraying the expense of the Fitch monument, now on the Common.

"The Congregational Church in Ashby," with the majority of the town sympathizing in its behalf, anxious to secure the services of a spiritual adviser, extended a call to Rev. Ezekiel Lyander Bascom to become their pastor. He was born in Gill, August 29, 1777 (Dartmouth College, 1798); on the 24th of

September, 1800, he was married, and ordained the same day at Phillipston, where he was pastor of the First Congregational Church for twenty years. He was installed in Ashby June 2, 1821. He was a man of scholarly attainments, a good extemporaneous speaker, and was highly appreciated by his parishioners. He retained his relation with his people till his death, although he was unable to perform the active duties of his office. He died at Fitzwilliam, N. H., April 20, 1841, and was buried in Ashby. His colleague during the last six years of his life was Rev. Reuben Bates, who was so much appreciated that he was chosen as his successor. Mr. Bates was born in Concord, March 2, 1808; Harvard College, 1829; Harvard Divinity School, 1832; dismissed August 14, 1845; died December 1, 1862.

On the 14th of January, 1846, Rev. William Pitkin Huntington (Harvard College, 1824), was installed and was dismissed on the 20th of the following November. Mr. Huntington was succeeded by Rev. Theophilus Pipon Doggett, born in Taunton, January 20, 1810 (Brown University, 1832; Harvard Divinity School, 1835); installed February 24, 1847; dismissed April 23, 1853; died May 7, 1876. He had pastorates in Bridgewater, Ashby, Barnstable and Pembroke, where he performed pastoral duties for more than thirty years. He had a ministerial ancestry. His biographer says of him: "He was a faithful and devoted worker in his various fields of ministerial service."

Rev. John Stillman Brown, born in New Ipswich, April 26, 1806 (Union College, 1834), supplied the pulpit from April 1, 1855, till April 27, 1857, and was followed by Rev. Nathaniel Gage, born in Andover July 16, 1800 (Harvard College, 1822; Harvard Divinity School, 1827); installed June 5, 1858. He did ministerial work in Nashua, N. H., Haverhill, Peterham and Westford before he came to Ashby. He was a man of attractive personality, never spoke harshly of other denominations, and was much respected. As a preacher he was considerably above mediocrity. He died in office, much lamented, May 7, 1861.

November 1, 1861, Rev. Charles Bugbee, who graduated from Meadville Theological Seminary, Meadville, Pa., 1853, was called to supply the place thus made vacant, but on the 7th of July, 1865, he, too, passed over "the peaceful river," leaving sorrowful friends behind.

Rev. William Tait Phelan, a graduate from Meadville Theological Seminary, 1862, supplied the pulpit for two years, from March, 1866.

On the 18th of July, 1868, Rev. George Stetson Shaw received a unanimous call to settle with the parish, which he accepted. Mr. Shaw was born in Bristol, R. I., April 8, 1838 (Meadville Theological Seminary, 1862); married Miss Mary E. Gates, of Ashby, June 1, 1869. Mr. Shaw is courteous and unassuming in his intercourse with his fellow-men,

and his pastorate, which has extended nearly through a quarter of a century, has been an era of concord and good-feeling.

CHAPTER XIX.

ASHBY—(Continued).

THE GREAT CIVIL WAR.

On the breaking out of the slave-holders' Rebellion, at a legal town-meeting held May 1, 1861, the following action was taken by the town :

"Resolved, That we pledge ourselves and our posterity to sustain the Constitution, the freedom and the rights bequeathed to us by our fathers, and that we will defend them to the last.

"Resolved, That the town raise two thousand dollars, and that fifteen hundred dollars be loaned to the State, and made payable to the order of the Governor of Massachusetts."

At a town-meeting held July 22, 1862, it was

"Resolved, That in view of the sacrifices which men must now make in being called from their business at this season, and in view of the perils and hardships they are called to undergo, it is just and proper that additional pecuniary inducements should be offered to those who shall enlist to constitute the quota from this town."

In consequence of this vote the treasurer was ordered to pay one hundred dollars to each volunteer for the service of the town when he should be mustered into the service of the United States, and by a subsequent vote in 1864, the bounty was increased to one hundred and twenty-five dollars. At a town-meeting on the 3d of April, 1865, "voted, that the selectmen be authorized to procure recruits in number sufficient to make the surplus credited to the town fifteen." During this war Ashby furnished one hundred and nine soldiers, eighteen of whom lost their lives either from being killed in action, from cruelty and starvation in captivity, or the usual casualties of war. John Mayo, Eliab Churchill and David Wares fell dead at Lookout Mountain; Albert Davis, at Fredericksburg; Daniel Daily and Amos Eastman, at Antietam; Henry Rice died from cruelty and neglect in Andersonville prison; Daniel D. Wiley, at Baltimore; Albert Shattuck, at sea; Lyman W. Holt, John Gilson and Benjamin H. Bigelow, at New Orleans; Daniel Coffe and James Sullivan, in Louisiana; John R. Wilder, at Baton Rouge; Morton Gilson and John Savin at home, from disease contracted in the army; George A. Hitchcock passed five months at Andersonville, and one or two others thirty days; Lieutenant Henry S. Hitchcock was badly wounded at Petersburg; Sanders, at Fredericksburg; Wares, in the battle of the Wilderness; Morgan and Ferguson, at Dallas, Ga; and Davis, in some one of the many engagements during the war.

It will thus seem that Ashby did its honorable part by contributing both men and money. The

votes of the town were earnest and patriotic in maintaining the Union, while the mothers, wives, daughters and sisters at home bravely and faithfully did their part to assist those in the field by sending them food, clothing, medicines and home comforts of every description, and by keeping up the home farms and households. When the news of the surrender of Lee (on April 15, 1865) reached Ashby, there was great rejoicing. Every one was anxious to tell somebody that the war was ended. The church bells rang out their merry peals, which reverberated among the hills. They were used to

"Ring out the old,
Ring in the new,
Ring out the false,
Ring in the true."

And the only cause of sadness was the tender recollection of "the loved and lost," who, during "this cruel war," were put into "that dreamless sleep that knows no waking."

CHAPTER XX.

ASHBY—(Continued).

MISCELLANEOUS.

THE TURNPIKE.—At the commencement of the present century the turnpike mania raged about the same as the railroad excitement did forty years afterward. After the debt caused by the Revolutionary War was paid, and the country had felt the influence of peace in accumulating wealth, a moderate amount of capital began to be collected in the hands of a few men in most every town, and trading and trafficking was on the increase. Better facilities for travel and freight between the larger towns and centres of trade had become necessary when turnpikes began to be built and controlled by private corporations. Towns situated on the lines of these thoroughfares were greatly benefited. Taverns, stores and blacksmith-shops became more numerous, all of which were, to a great extent, dependent on these roads for patronage. In 1801 the town of Ashby "voted to measure the route from Stone's tavern in Townsend to Milliken's tavern in Jaffrey." At that date the turnpike from Keene, through Peterborough, New Ipswich, Townsend and on through Groton, had just been completed. In 1803 the town "chose a committee to look after a turnpike." It will thus be seen that the town was in earnest in its efforts to have as many improvements as were enjoyed by its neighbors over the line in New Hampshire. The desired turnpike from Keene, through Rindge, Ashby and Groton, was incorporated in 1807 and finished in 1811. It intersected with the road leading from the west part of Townsend to New Ipswich at a short distance from

Ashby line, and is now the traveled road between Townsend and Ashburnham, leaving Ashby a short distance from Watatic. It had two toll-gates in Ashby, one at each border of the town. This road, like all others of this class, did not receive the patronage required to return any dividends to the stockholders, and, after an existence of about fifteen years, was given up and assumed by the towns through which it passed. Stockholders of comparative wealth were financially ruined, and the hard-earned dollars of those in moderate circumstances were sunk in the general crash. The prominent and wealthy men in Ashby suffered considerably, among whom were Alexander T. Willard, Abraham Edwards, Cushing Burr, the Wymans, the Kendalls and others in affluent circumstances, besides those who invested on a much smaller scale. But if from a financial standpoint turnpikes were failures, they were of great benefit in encouraging the growth of the country, in turning trade into channels heretofore unused, and particularly in setting the example of a well made road-bed.

From the time that this turnpike was completed till the advent of railroads there was a great amount of travel from the southern part of New Hampshire and Vermont through Ashby. Long lines of teams and much travel for pleasure passed over this road. Heavy wagons, drawn by four, six and sometimes eight horses, loaded with agricultural products for Boston market, which returned with full loads of goods for the country stores, were continually going and coming. The four and six-horse stage-coaches, which passed daily each way, were always objects of interest to everybody. There was life and activity when they arrived and when they departed. The landlords at the taverns answered the calls of many guests, while their servants and hostlers grew weary in their constant labor and attendance.

November 6, 1826, the owners of the turnpike released and quit-claimed their right to and interest in the land over which their road was built to the town for \$600, which might have been fifteen per cent. of the cost of the land added to the making and fencing it.

CEMETERIES.—Most of the older towns, many times by gift, secured eligible locations for the burial of their dead on land joining their first meeting-house, in order that the departed might repose beneath the shadow of these sacred temples. In 1770 Mr. Jonathan Lawrence, who came from Woburn to Ashby in 1758, sold to the town two and one-half acres "for a cemetery." After the town had taken a title to this land, it was found that the frontage on the main road was less than was desirable. This tract comprised the west part of the Common and a part of the "church-yard." A meeting-house was in contemplation, and a larger lot being the desideratum, Mr. Joseph Davis, who owned land joining on the east side of this two and one-half acres, in 1771, gave the town one and one-half acres, which is now the east part of

the Common and cemetery. When the meeting-house was built, six years afterward, in order to have a spacious Common, it was located so far back from the road that the smaller part of the four acres was left for a cemetery. This burial-place contains the usual number and variety of moss-covered slate stones. "With uncouth rhymes and shapeless sculpture decked," interspersed with nicely-polished marble tablets and costly monuments. In 1802 the town "Voted to fence the burying-ground bought of Benjamin Willington." There is nothing further on record concerning the cemetery in the west part of the town to which allusion is made by this vote. Tradition says that a small part of the east end of this narrow belt of land was bought of Mr. Benjamin Willington, and that the west end was given by Mr. John Wright. Quite a number of graves are here which have no head-stones. The oldest date on any stone is "1800." As has before been stated, the Germans living in this vicinity did not associate cordially with the Ashburnham people, who, at that time, had but one cemetery. From the fact that this spot occupied a central location in their large domain, and that some Germans lie buried in a separate place in Ashburnham, outside of the town's cemetery, it may reasonably be inferred that these unmarked graves are those of "ye Dutchmen," and that later, others were buried here, until finally it was accepted by the town.

The Glenwood Cemetery.—In 1850 there was an effort made to have a new cemetery. At a town-meeting a committee was chosen and instructed to purchase a suitable tract of land for that purpose, and in the discharge of its duty this committee bought a lot of land and the town took a title to it. On reflection, not being quite satisfied with the location, and without much excitement, at a subsequent town-meeting the town, by a large majority, voted to sell this land. The citizens, who were particularly in favor of a new cemetery, induced others to share equally with them in the purchase of four acres of land which they had in view, to be used for this purpose. The number of proprietors was forty, who paid ten dollars each, and became mutually interested in the ground where some of them now repose. This "city of the dead" is conveniently located and pleasantly situated in plain view from the main street. The proprietors have made liberal appropriations in grading, opening avenues, and improving the natural surface of the ground, and it contains many chaste and substantial works of monumental art. "It was consecrated with appropriate religious services, and solemnly dedicated as a resting-place for the dead" on the 30th day of September, 1851. Address by Rev. Charles W. Wood. Consecrating prayer by Rev. Theophilus P. Doggett.

SOCIAL ORGANIZATIONS.—The citizens of Ashby, as an aggregate body, have for the last thirty years been noted for their free intercourse and familiarity

with each other. There is no aristocracy of wealth here to excite the envy of any one. At the meetings of their different organizations, all assemble and "a good time" is the result. They put their money into their enjoyment. No matter what the occasion may be,—at the dance, at the grange, at the farmers' supper, at their literary entertainments,—their exercises are conducted in a friendly and enjoyable manner. The first instance of an organization of a social nature in this town may be learned from the following extract taken from the records of the Grand Lodge of Masons in Massachusetts:

"GRAND LODGE, 12th March, 5798.

"A petition was received from Elias Wellington and others praying for a charter to hold a Lodge in the town of Ashby, county of Middlesex, by the name of Social Lodge, was read by the Grand Secretary with the papers accompanying the same—and being properly recommended, voted that the prayer of the petitioners be granted."

Abijah Wyman, the Wellingtons, the Kendalls, Cushing Burr, Sr., and others, not a large number, constituted the members of this fraternity at that time. During the last nine or ten years of its existence Rev. Ezekiel L. Bascom was its chaplain. This gentleman was also Grand Chaplain for six years, between 1804 and 1826, of the Grand Lodge of Massachusetts. This lodge met at Oliver Kendall's house, near the place where John Fitch was taken captive by the Indians. In a quiet way this fraternity did some good till about 1830, when anti-Masonry went into politics and a great excitement spread throughout the country, caused by men who had "a zeal but not according to knowledge."

About that time the temperance cause began to be agitated by the people here, and large audiences assembled at the First Parish Hall to listen to the harangues of the reformed drunkards, the Washingtonians and the Goffs of that period, some of whom were eloquent. Then the pledge was passed around and pleasant intercourse followed.

Coming down to the present time, we notice the May-day gatherings of veterans who were once "the boys in blue," who bear in the place of arms, flowers, to be placed upon the graves of those who gave up their lives in the defense of the nation many years ago. In those battle years, which seem so near but are so far away, these men went at their country's call, and steadily, sometimes wearily, but never doubting, went forward in their path of duty. From some of them the stalwart vigor of manhood has departed, and it is well for them to have these annual gatherings to clasp each other's hands, to call to mind again the scenes and incidents of a soldier's life; to talk again of bivouac and battle; to recall fast-vanishing recollections and, saddest of all, to mark the changes which the hand of time has wrought among them. The exercises of Decoration Day are witnessed by the town's people of all ages and conditions, and it has become one of the social holidays of the year.

Perhaps "The Ashby Farmers' and Mechanics'

Club" has had as much influence during the last decade in leveling off differences of opinion, causing kindly feelings and exciting a love of home as any other association in town. This club was organized February 12, 1880, with the following officers: President, Francis W. Wright; Vice-President, Rev. George S. Shaw; Secretary and Treasurer, Jonas P. Hayward; Committee, Joel Foster, Edwin K. Johnson, Ivers H. Brooks. Mr. Hayward, the secretary, an excellent fruit-grower, has since deceased. The preamble to the constitution then adopted sets forth the object in forming the organization in manner as follows: "We the undersigned unite in forming a Club for the discussion of questions pertaining to farming and other material interests of the town." It is an old maxim that he who needs advice concerning any trade or business, should ask it from a person who earns his living by that business. Now these discussions before this club are engaged in by men who know what they are talking about. The market gardener, the man who sold grapes recently for two dollars a pound, the cultivator of small fruits and berries, the man who has the best hoed crop, the men who raise grapes and cucumbers under glass, in fact, men who cultivate most everything that is produced in this climate, are in this club and give the result of their experience. The meetings of the club through the winter months are held every two weeks, and they are fully attended by those who enjoy the discussions. Occasionally, literary and musical entertainments take up the time of an evening. "The club has received and paid out over \$2000, much being to members as premiums; has been the means of establishing the Ashby Creamery; has held a number of field meetings and two institutes, which were of unquestionable benefit to the farmer and all concerned. Reports of the Amherst Experimental Station are received by the secretary and distributed each month, also the crop reports sent out by the State Board of Agriculture." Since its organization there have been twenty-three lectures delivered before this club by persons of considerable distinction, among whom are Carroll D. Wright, Mrs. Mary Livermore, ex-Congressman Edward Burnett and others.

Ashby has another organization in the interest of the husbandman, called The Grange, which has been here for a short time and has become quite an enjoyable institution. It is a congener to the Farmers' Club and does not differ materially from it, except that a larger number of the gentler sex are connected with it, who hold certain offices and participate more freely in its exercises. Every member is required to contribute something, within certain stated times, for the instruction, amusement or literary entertainment of the association. Most of the male members are interested in the Farmers' Club.

ASHBY MUSICAL ASSOCIATION.—For a town of its size (numerically considered), Ashby has always boasted of a more than average number of people of

musical abilities. The early settlers of the town must have given the matter some attention, or else the pure air of the hills developed a natural talent for music, for their descendants have always been musically inclined. The record of their doings previous to the present century is unknown to the writer, but doubtless one exists. "In 1818 Jonas Barret taught instrumental music in New Ipswich." In 1826 the Calvinistic Congregational Parish "Voted to pay the expense of the singers at the ordination of Mr. Albert B. Camp." In 1827 "Voted to pay \$10 for singing books, Deacon N. D. Gould's collection, and that Isaac Patch take charge of them." In 1828 "Voted \$25 for singing, to be laid out by the discretion of the assessors." If these sums seem small for these purposes, it may be noticed, in passing, that the minister's salary for 1828 was only \$450, and that "Capt. Jona" Blood undertook to open and sweep the meeting-house for one year for \$2." He had no fires to build, for the society had just "voted not to have a stove in their meeting-house." At a meeting held soon after the musical fund was, however, increased to \$50. In 1829 "voted to consent to have the *organ* stand in their meeting-house." This was probably the organ built by Mr. Whitney, referred to in another paragraph. About the year 1827 Deacon N. D. Gould, a noted teacher of vocal music, taught a singing-school in Ashby; and he was followed in later years by Isaac Wright, Peter H. Clark, David Wares and Messrs. Fuller, Partridge, Kimball and others. In 1857 a glee club, composed of eighteen young persons, under the leadership of Myron W. Whitney, did some good singing and enjoyed many pleasant hours, the memory of which will linger in the hearts of those who participated in it while life lasts. For many years the musical services of the Second Parish were in the care of Mr. Paul A. Hayward, who was organist and director. He was assisted by his wife, who possessed a soprano voice of rare strength and purity, and in later years by his daughters also. Since 1875 Mr. Homer J. Hayward has served as choirster. The Unitarian Society will long remember with gratitude the services of Mrs. Perley Gates, now deceased, and of her daughter, Mary Gates, now the wife of Rev. George S. Shaw, in the cause of sacred music.

Ashby boasts of having furnished to America the finest basso, in the person of Mr. Myron W. Whitney, that this country has ever produced. As a representative of oratorio music he has probably no equal. Mr. Whitney now resides in Watertown, and a sketch of his life, accompanied by a steel engraving, may be found in this history in that part thereof relating to Watertown.

"The players on instruments" have not been lacking. Of those who achieved marked success in this direction may be mentioned Mr. Edward A. Wright, of Boston, leader of Wright's Orchestra, of whom it has been said, "he can play any musical instrument

he sees." His specialties, however, are the cornet and violin. Since the beginning of the present century several brass bands have been organized in Ashby, which, in their time, did some good work, but were not long-lived.

At present Ashby has a cornet band, composed principally of young performers, but already it gives promise of a successful future. Its members are prompt in their attendance at its meetings, and, although they have not enjoyed a long practice together, "discourse sweet music."

Frederick A. Willard, leader, b cornet; William O. Loveland, second leader, e cornet; Willis G. Spaulding (business manager), tuba; Harry F. Bingham, b tenor; Oscar A. Hubbard, b clarinet; John J. Piper, e alto; George H. Piper, baritone; Willis B. Hayward, b tenor; Herbert P. Hayward, b clarinet; Frank A. Foreman, e tuba; John C. Elliott, b bass; John A. Willard, e alto; Curtis Huckins, b tenor; Clifford W. Davis, e alto; George Wright, snare-drum; Charles A. Porter, bass-drum; E. Monroe Bennett, e cornet.

The centennial of Ashby was celebrated September 14, 1867. On that pleasant autumn day a large assembly was gathered on the Common. The principal address was made by Rev. Charles W. Wood. It embodied what may be called the domestic history of the town, military, religious and material, and must have cost a great amount of patient, plodding research. It was delivered well and was received with much relish. After the usual exercises on such occasions, there was a spontaneous movement for the mammoth tent, which had been improvised, under which long tables, laid with plates sufficient to accommodate seven or eight hundred persons, were covered and loaded with culinary delicacies, such as farmers' wives and daughters only know how to prepare. The rich viands, the tempting fruits and fragrant bouquets had rivals in the forms and faces of the fair ones who moved around among them and waited upon those at the feast. The day will long be remembered by those who were in attendance.

SCHOOLS.—At the annual town-meeting in 1773, "Voted to raise eight pounds for the support of schools. This was the first appropriation made here for school purposes, and about the same amount was raised "to hire preaching." The money thus raised for both of these objects, when changed into our currency would be about thirty dollars, and yet these small appropriations would compare well with sums raised in the neighboring towns at that time for similar purposes. At a town-meeting on the 13th of May following, "Voted to have but four squadrons. One squadron at the centre of the town, one in the south side, two in the north side of the town and that each man shall give their names to the selectmen by the first day of July next of what part or squadron they will be of, and each party to draw their proportionable part of the taxes they pay." The word squadron was

first used in this sense in those towns which had been surveyed and laid out into ranges and quadrangular lots, and the territory contained in a certain number of these squares, which itself was square, constituted a district. In some towns at this time the word "diocese" was used instead of district. For the next four years ten pounds were raised, and in 1778 the town raised fifty pounds for schooling. In 1785 the town "Voted to build school-houses in the four squadrons in town, the money to be provided to each squadron according to their pay, and chose a committee to see the houses built, and chose in the centre squadron Captain Wyman, Lieutenant Damon and L. Barrett; South, Stephen Barker, Amos Putnam, Stephen Patch; Northeast, First Division, Major Stone, Benjamin Adams, Jonathan Foster; Second Division, Jonathan Locke, David Locke, Timothy Emerson; Northwest squadron, John Yaquith, William Rice and Timothy Stone. Voted to raise 120 pounds for the above purpose and chose the following committee to expend the same: Jonathan Locke, Abijah Wyman and Deacon Lawrence. Voted that the assessment of the school-house money be suspended till the town rate is assessed." At that time they must have had private schools or they would not have given to their sons and daughters the amount of learning which we know they had. The town records during the time from its incorporation to the end of the century were as well kept as at any other period. The amount of matter on record, changing one man from this district to that, and altering different district boundaries, shows that there was much interest in schools at that time. And again in 1792, when the town received additional territory and almost fifty inhabitants from Ashburnham it went through the excitement of making another school-house in a new district at the extreme northwest part of the town.

Presumably no person in Ashby can tell where more than one of the school-houses of 1785 stood, and the location of some of those of a more modern date, where the ferule has been applied to the disobedient, and where the "lads and lasses" enjoyed themselves at the evening spelling-schools and in going home, cannot be pointed out. From the beginning of the present century until now Ashby has made liberal appropriations for the public schools, and from that time to the present the best men of the town have served on the School Committee. The reports of the Board of Education for the last twenty years show that the Ashby schools have had a good average attendance. In 1868 there were only thirteen towns in the state that had a better average attendance. In 1875 there were twenty-four towns which stood better than Ashby; and in 1880, among the three hundred and fifty cities and towns in this Commonwealth, Ashby stood first in its average school attendance.

In 1842 the town "voted to raise one hundred and thirty-five dollars for the purpose of establishing a library in each school district." The town received

from the State just the same amount, which was added to this appropriation, and the books were bought and put into the schools. In 1864 the town raised two hundred and fifty dollars for the support of a high school, and since then larger appropriations have been made for the same object.

In 1836 the meeting-house built by the Orthodox Congregationalists in 1820 having been abandoned for more than a year, some of the public-spirited people of the town suggested that it should be used for an academy. This idea met with a favorable response from its owners, and accordingly the building, including the land, was sold at auction, May 11, 1836, for five hundred and twenty dollars, to Amos Wellington. The pew-owners gave their interest in the house in order to have an academy. A subscription was taken to collect money "for the purpose of fitting up the meeting-house lately occupied by the Second Parish for an academy, provided eight hundred dollars is raised for the said purpose." Ezekiel Coleman headed the list of twenty-one subscribers to this document, in which the sum of \$774.50 was pledged for the accomplishment of this object. The ladies very soon collected the sum required to make the original subscription binding. The building was soon moved to its present location, September 1, 1836. Amos Wellington sold this house to the five trustees of this academy—"Rev. Orsanus Tinker, Deacon Paul Hayward, Deacon Ephraim Hayward, Mr. Ezekiel Coleman and Amos Wellington, Esq."—for \$420. November 14, 1836, an examining committee of eleven men, eight of whom were clergymen, from this and the adjoining towns, was appointed for this academy, which commenced August 4, 1836, with Worcester Willey as teacher, who was to receive all the tuition money for his services. The next year he was paid \$400 for the same work, and he was the only teacher who continued two years in office. There was no deficiency in numbers on the board of trustees, as it appears that, in 1838, fifteen gentlemen were added to the five who were chosen two years before. In 1840 Luke Wellington and others and their successors, by an act of the Legislature, were made a corporation by the name of "The Proprietors of Ashby Academy," with the power to hold personal and real estate to the amount of \$15,000. This school did not receive the patronage which it appeared to deserve, perhaps on account of its proximity to New Ipswich Academy, or from the popularity of older and more richly endowed institutions of its kind. It was discontinued at the close of the summer term of 1860, but there is no doubt that the good influences emanating from this academy are still guiding many of those who availed themselves of its privileges. Ashby has a public library of 1584 volumes, with which its inhabitants have a pleasant and profitable acquaintance. The Unitarian Sabbath-School Library, 783 volumes; the Orthodox Sabbath-School Library, 300 volumes; Ladies' Library, 230 volumes.

HOTELS AND STORES.—When the town was incorporated there were three inn-holders in Ashby, who, on a small scale, sold spirituous liquors and occasionally gave hospitable reception and entertainment to travelers. There was not much drunkenness in those days; but the fact that the town at an early date put a set of stocks on the Common is sufficient proof that, at least on public and social occasions, the place was not entirely free from those who loved strong drink. Capt. Samuel Stone, living in the east part of the town, was an inn-holder. Jonas Barrett, who built and lived in the house now owned by Jonas Curling, kept a house of this kind; and, before the town was incorporated, James Coleman kept an inn in the westerly part of the town, on the road leading from the West Cemetery to the old turnpike, only a short distance from the "friendly guide-post" which points toward Ashburnham. He was the most popular man among the Germans who became citizens of the town when it was created. The foundation of the house may still be seen, over which the flip was drunk and the merry jokes passed around. John Abbot kept a tavern, in the beginning of the present century, in the northwest part of the town, on the old county road, in the house now occupied by Mrs. Amanda Kendall. He had ample room, both in the house and at the stables, and he gave strict attention to his business, having a large acquaintance, and was deservedly popular. For a long time Stone's tavern, at the foot of the hills, in Townsend, and Abbot's tavern were the favorite stopping-places on the road. Capt. Abijah Wyman built his house, about 1780, at the southwest corner of the Common. It constituted what is now the south end of the main building which faces the Common. Two or three additions have been made to this building; besides, stables and sheds have been added, and now the many roofs cover a number of square rods of land. It is not probable that this house was built for a tavern, but the location was so eligible that it eventually was used for this business. John Wyman, a son of Capt. Abijah, was landlord here for a short time; but whether he was the first man who kept a tavern here is unknown to the writer. In 1809, when the Unitarian meeting-house was being built, the town voted to hold the town-meeting "at the house of Nathaniel Adams." Chester Mann was landlord here for several years, and his house was extensively patronized by guests and his stalls were well filled. Besides these men, the house has had two or three other landlords, among whom was Francis Wyman, a grandson of Capt. Abijah Wyman. The house did a paying business till the railroads were made, or till about 1850.

Joseph Kendall, Sr., in 1862, built the house and out-buildings where Joel Foster lives expressly for a hotel. Thomas Rice was either the first or one of the earliest landlords. Those who succeeded him were Leonard Patch, Josiah Prentice, Owen Willard (who was a favorite landlord, and kept the house a

long time) and Abel Walker, who remained here till the house was closed to the public for want of patronage.

Stephen Adams kept a tavern near Townsend line, and had considerable custom, more than fifty years ago, at the place where John Butterfield now lives. "The pledge," which was strictly kept by many from 1830 to 1850, and the railroads, which diverted travel from the main roads and thoroughfares, proved fatal to many of the country hotels of New England. Population of Ashby in A. D. 1830, 1240; 1840, 1246; 1850, 1298. Since that date the population has decreased each year in a small degree.

The names of all the traders who have done business in this town cannot be given, but it will interest some people to learn something concerning the men, the places where and the dates when stores were kept here. William Green, grandfather of Charles O. Green, was a trader here at as early a date as any except perhaps Captain Abijah Wyman. He came from Pepperell about 1795 and he had a small stock of groceries in the building which stands just west of the post-office. This building was afterward converted into a nice cottage-house. He did not continue long in trade, but sold out to Abijah Wyman, with whom he could not compete in business. Wyman's store was at his dwelling house, situated nearly a quarter of mile westerly from the Common. Nathaniel Adams had a store in the tavern on the corner of the Common, at the same time that he kept a public-house there. Noah Start built a store in 1820, which stood between C. O. Green's house and the house on the corner of the street; and he traded there until about 1828, when he sold out to Nathaniel Adams. Mr. Adams was followed by Spooner & Kendall, these men by Nathaniel Whittemore, and he by White & Adams. The length of time that these men and firms traded here cannot be ascertained, but the building in 1862 was moved to Fitchburg and converted into a dwelling-house. A notice of Lewis Gould and his store is in another part of this work. The following named gentlemen have traded in the store "on the hill:" Andrews Edwards, F. W. Wright, 1844; Martin Howard, 1846 and 1848; George E. Rockwood, J. M. J. Jeffs and Edwin Whitney. Commencing about 1840, Abram M. White and Winthrop White (brothers) had a store on the road leading northerly and not far from the Common. Their room was small, but they had a good share of the trade. They carried the first blueberries from Ashby to the Boston market. About 1820 Alfred Spaulding came from Townsend to the South Village and put a stock of goods into the building which is now the dwelling-house of W. H. C. Lawrence, and opened a store there. He carried on coopering in that village and continued in trade six or seven years, and then sold out his business to James Bancroft, another Townsend man. Mr. Bancroft continued the business for a few years, and then sold out to Ephraim

Hayward, who was the last person who had a store at the South Village. The following named gentlemen and firms have been in trade in the store in which the post-office is now located. The date following their names is the year or about the time when each of them commenced: Burr & Balcom, 1840; Burr & White, 1843; F. W. Wright, 1846; Toleman, Millikin & Co., 1851; Cushing Burr & Co., 1853; Burr & Wallace, 1856; Burr & Green, 1860; Charles O. Green, 1865; and Mr. Green has continued in business at this location during the last twenty-five years, and in connection with dealing in wood and lumber he does an extensive business.

Gates, Joel Foster, John T. Carr; Representative, Horace S. Brooks.

MAGISTRATES.—There was no person appointed here as a justice of the peace by royal favor during the eight years of existence which Ashby had under the reign of His Majesty. After the adoption of the Constitution the duty of appointing these officers devolved upon the Governor. One hundred years ago there was much dignity attached to this office. The salutation on meeting would invariably be "Good morning (if that was the hour), Esquire Smith." Esquire Smith, always instead of Mr. Smith, was the prefix used. There has been a great change within a quarter of a century, and now men holding this office do not enjoy the distinction that once attended the position.

The following is a list of the Ashby justices of the peace, giving the dates of their appointment and the dates of their death:

Jonathan Locke, commissioned 1788, died August 29, 1808; Allen Flagg, commissioned 1798, died October 7, 1815; Abijah Wyman, commissioned 1802, died November 24, 1804; John Locke, commissioned 1802, died August 24, 1855; John Wyman, commissioned 1808, died May 9, 1816; Alexander T. Willard, commissioned 1811, died December 11, 1830; Ezekiel Coleman, commissioned 1813, died December 10, 1834; Stephen Wyman, Sen., commissioned 1827, died April 30, 1852; Amos Wellington, commissioned 1830, died November 20, 1857; Luke Wellington, commissioned 1833, died January 26, 1868; Isaac Patch, commissioned 1833, died April 26, 1847; Alfred Hitchcock, commissioned 1833, died March 30, 1874; Cushing Burr, commissioned 1838, died February 6, 1866; Francis W. Wright, commissioned 1848; Stephen Wyman, Jr., commissioned 1850, died February 13, 1868; Leonard French, commissioned 1858; Martin Howard, commissioned 1859; Benjamin W. Seaman, commissioned 1860, died November 16, 1866; Zenas Allen, commissioned 1863, died May 20, 1887; James M. J. Jeffs, commissioned 1864, died December 22, 1886; Dennis Fay, commissioned 1865, died February 22, 1880; Francis Tinker, commissioned 1866; Benjamin F. Wallis, commissioned 1867; Alonzo A. Carr, commissioned 1874; Charles O. Green, commissioned 1874; Jonas P. Hayward, commissioned 1874, died November 29, 1887; Samuel R. Damon, commissioned 1875; S. Joseph Bradley, commissioned 1884.

The last named gentleman has the power to issue warrants and take bail; and the office was given to him because Ashby is situated about seventeen miles from a Middlesex District Court.

CHAPTER XXII.

ASHBY—(Continued).

POST-OFFICE, PHYSICIANS, AGRICULTURAL, PERSONAL NOTICES.

POST-OFFICE.—A post-office was established in Ashby in 1812, soon after the turnpike was finished. The following list of postmasters, with the dates of their appointments, was furnished by the Post-office Department at Washington:

Alexander T. Willard, appointed January 27, 1812; Lloyd Hall, appointed October 1, 1839; William Weston, Jr., appointed May 21, 1847; Martin Howard, appointed May 31, 1848; Nathaniel Whittenmore, appointed July 8, 1849; George L. Adams, appointed April 12, 1856; Abram White, appointed December 19, 1856; Samuel M. Allen, appointed May 8, 1860; Benjamin W. Seamans, appointed August 15, 1861; Perez C. Burr, appointed March 23, 1864; Charles O. Green, appointed October 31, 1867; George Handley, appointed November 24, 1885.

Mr. Willard held the office twenty-seven years, eight months and seven days. At first the office was kept by Nathaniel Adams, at the tavern on the corner of the Common. A part of the time it was kept at the Start store. Mr. Hall was a shoemaker, and he had the office in the west wing of C. O. Green's store. Since 1860 the office has been kept at its present location.

PHYSICIANS.—*Dr. Thomas Carver* was the first disciple of Galen, who had the courage to commence in the practice of his profession in Ashby. He settled here in 1774, seven years after the incorporation of the town, but nothing is known concerning his birth-place, or where he received his education. His name does not appear on the town records more than once or twice when he was chosen on a committee. The fact that he remained in practice here for nearly forty years furnishes sufficient evidence that his professional services were appreciated here. He was a skillful physician and an honorable man. He died October 7, 1815.

Dr. Allen Flagg came to Ashby in 1798; his previous history is also unknown. He opened an office and shared the practice with Dr. Carver. While here he built the house which stands on the east side of the road from the post-office to the South Village, just after crossing the rivulet, the next house south of the Goodnow house, built by Lewis Gould. He had an extensive practice, sometimes riding beyond the limits of the town, and he was a much-respected citizen. He was the second person in Ashby who received the appointment of justice of the peace. The

next year after he came here he was elected town clerk, and with the exception of two years he held the office till his decease. He died October 15, 1815, just one week after the death of Dr. Carver.

Dr. Abraham Haskell, Jr., soon after the death of Dr. Flagg located in Ashby, and practiced medicine here about three years, when he sold out to Dr. Moses Kidder and removed to Leominster, where he was in practice for some time, but he returned to Ashby and bought out Dr. Kidder, and remained here till his death, April 23, 1851.

Dr. Moses Kidder was born in Billerica, July 25, 1789. He entered Williams College two years in advance, and spent the junior year (1810) in that institution, but he did not proceed further in a collegiate course of study. He studied with Dr. Stickney, of Antrim, N. H., during 1811, and with Dr. Matthias Spaulding, of Amherst, N. H., during 1812. In 1813 he was a surgeon stationed at Fort Warren, where he remained until the close of the war. He was a self-made man, quick of apprehension, and remarkable in regard to his power of memory. He was not a healthy man, and for this reason while he was here at different times he had two men of his profession with him as assistants. He was skillful and faithful to his patients. He left town about 1825, after which time he was in practice at Townsend, Littleton and Dublin, N. H., a short time in each place, and at last he removed to Lowell, where he died.

Dr. George Haskell was the successor of Dr. Kidder. There is nothing particular in tradition concerning this gentleman. He remained here about five years when he removed to Alton, Illinois.

Dr. Daniel B. Cutter was born in Jaffrey, N. H., May 10, 1808; graduated from Dartmouth College in 1833, from Yale College Medical Department 1834. He came to Ashby in 1834, and remained here two years and then he moved to Peterborough, N. H., where he not only became popular as a physician, but he was a prominent citizen, holding the most important offices in the gift of the town, and where he died in 1889.

Dr. Alfred Hitchcock was born at Westminster, Vt., October 23, 1813. In 1831 he went to New York City and spent three or four months to be cured of stammering, which was a great annoyance to him and an impediment from which he suffered greatly during his youth. He returned partially relieved, but he never entirely overcame the embarrassment. His early education was acquired at the "People's College," the common school, although he pursued his studies at the academy at Bennington, Vt., and at Phillips Academy, Andover, a short time at each place. His health failed him so that he was unable to study; and from Andover he went home and passed a long time under the care of a doctor. In 1834 he commenced the study of medicine in his native town with a physician of considerable note, with whom he remained a year or more. He graduated from Dart-

mouth College Medical Department in 1837, and commenced the practice of medicine in Ashby the same year. In the beginning of his practice fortune seemed adverse, and it is said that for the first six weeks he had no business. His merits, however, soon began to be appreciated, and it was not long before he entered upon a sphere of usefulness which attended all his labors as long as he lived. Through his influence Ashby, though a small town and surrounded by able physicians, became a centre of medical practice. Young men resorted thither to avail themselves of his teachings, particularly in anatomy. He represented Ashby in the General Court in 1847, and was one of the selectmen in 1848. During the next two years he was invited and importuned even, by the influential people of Fitchburg to remove to the town. He went to Fitchburg in 1850. In 1851 he attended medical lectures in Paris during a visit to Europe. In 1861-62-63 he was a member of Governor Andrews' Council. His death, which occurred March 30, 1874, was caused by angina pectoris, which was exceedingly distressing at times, and at a partial relief of what proved to be the final paroxysm his last words were, "Now I will rest."

Dr. Leonard French, son of Leonard C. and Nancy (Hutchinson) French, was born in Bedford, N. H., Nov. 11, 1817. Fitted for college at Gilmanton (N. H.) Academy; graduated from Dartmouth, 1843; took his degree of M.D. from the same college in 1846. April 1, 1847, he came to Ashby and entered into partnership with Dr. Hitchcock, with whom he remained three years. He then located in Fitchburg; but for some reason, known only to himself, he only remained there three months, and then returned to Ashby, and continued the duties of his profession until November, 1861, when he removed to Manchester, N. H., where he now stands at the head of the medical profession. While he was here he had an extensive practice, was consulted in difficult cases from the adjoining towns, and was much respected. He was one of the counselors of the Massachusetts Medical Society. He has two sons, both of whom were born in Ashby, who are practical physicians and surgeons. *Dr. L. Melville French*, born July 26, 1849, commenced the study of medicine at home in 1869, afterward attended lectures at the University Medical College, New York, through a course, and in 1873 graduated from Dartmouth College Medical Department. He is now in practice at Manchester, N. H. *Dr. Henry M. French*, his second son, was born April 1, 1853; graduated from Dartmouth College in 1876; took his degree of M.D. in 1879, from the same institution. In 1880 he attended a course of lectures in New York City, and afterward was connected with the hospital at Flatbush, N. Y. He is at present in practice at Concord, N. H., where he is a successful physician and surgeon.

Dr. Charles Davis followed Dr. French soon after he left. *Dr. J. S. Andrews* was in Ashby a short time.

Dr. James Emerson was born in Barnstead, N. H., in 1817; graduated from the Dartmouth Medical School in 1857; was in practice at Ashby from 1862 to 1865; resided in Gardner since that time until he died there, January 18, 1890.

Dr. Josiah M. Blood, son of Ebenezer and Betsy (Abbott) Blood, was born in Hollis, N. H., July 3, 1832. He fitted for college at Worcester Academy, but did not pursue a collegiate course. He graduated from University Medical College, New York, in 1857. An alumnus of this college says of him, "He was one of the six best scholars in his class of one hundred and twenty." He commenced practice in Temple, N. H., and remained more than two years in that town. From Temple he removed to Townsend and practiced his profession until the commencement of the Civil War, when, in 1862, he was appointed assistant surgeon in the United States Army. He remained in the service until the close of the war. He came to Ashby in 1865, and for a quarter of a century he has held, and now holds, the confidence of its citizens. He is a modest man, skillful, cautious, prompt to an appointment, and his record compares favorably with any of his predecessors who have practiced medicine in Ashby.

AGRICULTURAL.—The farming interests of Ashby, compared with that of the adjoining towns appear to good advantage. The last decennial census (1885) gives the number of farmers as 157, number of farm laborers as 191. The population of the town at that time was 871—number of males, 436; number of females, 435. Number of boys in the public schools, 60. The aggregate of the farmers, laborers and boys was 376, leaving 118 males including those who were either too old or too young for labor, who are engaged in every other industry. Of this 118, 43 are represented as either retired or at home (children under ten years), leaving only 75 males in town who *do not* work at farming. These workers produce annually on their farms over 3000 tons of hay, about 12,000 bushels of potatoes, about 3000 bushels of Indian corn, about 1000 bushels of oats, about the same quantity of barley and other grains and vegetables in about the same proportion. From their orchards, in every "odd year," they gather about 13,000 bushels of merchantable apples besides the fruit not fit for market, which is made into cider amounting to about 12,000 gallons. They have 584 milch cows, and a creamery, operated by a small engine, the annual product of which is 40,000 pounds of butter. Quite an amount of dairy products does not go through this creamery, but is used at home. A large amount of milk is put on the cars for Boston market and some retailed in Fitchburg. Besides these sources of income they have large grapeeries and acres of land covered with vineyards, which (except an occasional year when frost comes too early) pay them well for their labor. One man sold twenty-six pounds of grapes recently for fifty-two dollars. And then the peaches, the straw-

berries, and other small fruits, receive an equal amount of attention, and pay equally as well for the trouble of cultivation.

If the farmers in this climate can accomplish as much and do as well as is above represented, it certainly shows a lack of good judgment for so many young men in New England to leave the old homestead and begin anew in the land of cyclones at the far West. One thing is certain beyond dispute: it will be long time before any real estate agent will make a fortune on commissions in selling farms in Ashby. Its citizens love their homes and do everything they can to induce their children to be attached to the town, by approving of all innocent amusements, by giving them excellent advantages in schooling, and by supplying them abundantly with those newspapers and magazines which reflect the thoughts of some of the keenest minds of this nation. The people of this town have a good amount of wealth, and their buildings are kept up with neatness and good taste. They enjoy good air, good water and delightful scenery, and best of all, they are "not slothful in business," but "given to hospitality."

The person who named the town is unknown, but it is known that its name has for a long time and still is pronounced wrong by many. It is not Ashbøye, but Ashbee, the last syllable sounded like bee. In no other State or nation is it pronounced Ashbye, but it is Ashbee. No one ever heard of General Canbye—pronounce it Canby and the Indian fighter flashes before the mind.

PERSONAL NOTICES.—*James Locke*, a very enterprising man, came from Hopkinton in 1749, and bought two lots of land of Amos Whitney, situated on Battery Hill, and commenced a settlement on it the same year. This land was taken into Ashby at the incorporation of the town, and it lies on both sides of the road leading from Greenville to Fitchburg. This was the next year after John Fitch was captured by the savages, and for self-preservation he built a strong garrison-house near the log cabin in which he lived. Tradition has it that he was a man of great physical strength and endurance, and very industrious. He was first in the list of church members, and he built a grist-mill, situated on the Locke Brook, about a quarter of a mile easterly of the spot where the large, unpainted house now stands on what was his homestead. He died September 1, 1782.

James Locke, Jr., born in Hopkinton in 1729, came to Townsend with his father, and they lived together for some time, until he married, and then they were near neighbors. He made great exertion to get a good common education. When the petition for a new town (which resulted in the incorporation of Ashby) was before the General Court, he appeared at Boston at two or three different times as representative of that part of the petitioners belonging to Townsend. At the first and second town-meetings under the charter he was chosen town clerk, and for the

next two years he was moderator of the annual town-meetings. He served on the Board of Selectmen four times, and was on the committee for building the meeting-house. In 1773 he moved from Ashby to Townsend, and lived on a farm situated about a mile northerly from the harbor, and it was at that place where the sheep were sheared and his wife and daughter spun the wool, wove it into cloth, and made a suit of clothes for one of the family who was drafted into the army at so short a notice.¹ He was second lieutenant in Captain James Hosley's company of minute-men, who responded to the call of the 19th of April, 1775. From 1774 to 1787 he was clerk of the Townsend proprietors, and the records he made, both in chirography and language, are equal to those made at the present time. In 1777 and 1778 he represented Townsend in the General Court.

Jonathan Locke, Jr., born Dec. 7, 1737, a brother of the former James Locke, Jr., came to Ashby from Hopkinton in 1772, at the solicitation of his father to care for him, as he had become old and well stricken in years. He was then thirty-five years old, and he inherited the activity and energy of his father. He was town clerk in 1782 and 1785, and one of the selectmen five times from 1777 to 1785. He was on important committees several times. He was second lieutenant in Captain John Jones' company, which marched at the alarm on the 19th of April, 1775. He was the first man in Ashby who held the office of justice of the peace appointed by the Governor. In proof of his enterprise and force of character, we have only to look at the set of farm buildings, which have resisted the force of the elements for more than a century, now standing on the place where he lived and died, and which he built. The farm is now owned by Isaac B. Hayward. He died August 29, 1808.

Captain John Jones, son of Thomas and Mary (Miles) Jones, was born in Concord December 7, 1730. He married, October 24, 1754, Phebe Brewer, of Weston. He lived in Concord until 1762, when he settled in the northeast part of Dorchester Canada (now Ashburnham). He was a selectman of Ashburnham in 1766 and 1767. In 1767 Ashby was incorporated, and his farm was a part of the new town. At the first town-meeting of Ashby (1767) he was elected a selectman, and also for the years 1768, 1773 and 1778. He was constable 1771 and town treasurer in 1768 and 1771. He wrote a fair hand and gave evidence of an education beyond that of a majority of his time. He commanded the company of militia which marched on the memorable 19th of April. He became one of the original members of the church, and in town affairs was often chosen on important committees. The location of his house and land gave the name to "Jones' Hill" in the westerly part of the town. He died December 18, 1811.

Major Samuel Stone, son of Jonathan and Chary

¹ See Sawtelle's "History of Townsend," pp. 201, 202.

(Adams) Stone, was born in Lexington, June 10, 1727. He moved to Ashby in 1770, and soon after built the house where Francis S. Wheeler now lives, near Townsend line. He was an inn-holder here for several years. His grandson, Captain Prentice Stone, of Ashby (now an old gentleman), has the sign which hung in front of his house, on which is painted a man on horseback with the word "entertainment" underneath. The Stones from whom he descended were among the early settlers of Lexington, and "were quite numerous in the town, so much so that they were, in many instances, in the Lexington records, designated by their geographical position as John Stone, *east*, and John Stone, *west*, and Samuel Stone, *east*, and Samuel Stone, *west*." He bought, in addition to his first purchase, four or five lots of land which were sold for non-payment of taxes in 1772, so that he had a large amount of land. He built the first mill on the site where Stickney's mill now stands, at the base of the Ashby Hills, in Townsend. At an early date he had a brick-kiln near Trap Falls Brook. He commanded the minute-men who responded to the call, April 19, 1775. In 1776 he was chosen major in the militia. From 1772 to 1782 he served six times on the Board of Selectmen. In 1777 he served as a private, side and side with Colonel William Prescott, of Pepperell, and Major Henry Wood, of Groton, in a volunteer company of sixty men, most of whom belonged to Townsend, commanded by Captain James Hosley, of Townsend, which went to the assistance of General Gates, and they participated in the battle which resulted in the surrender of the over-confident General Burgoyne. No other battle of the Revolution except that at Bunker Hill, was of so much importance to the patriots. Major Stone died in Ashby, December 15, 1806.

Captain Abijah Wyman, son of Abijah and Abigail (Smith) Wyman, was born in Lancaster August 9, 1745. No Ashby man except John Fitch ever had so eventful a life as he passed. On the 14th of August, 1758, he was impressed into Captain John Carter's company for a drummer-boy. This company marched on an expedition to Fort William Henry and returned the following November. In 1762 he voluntarily served in Captain James Reed's company in the same capacity. This experience on the rough side of life, added to the few weeks in each year passed at the common school until he arrived at majority, was the extent of his education. With his father, in the manufacture of brick, he accumulated some money, and at the age of twenty-six he came to Ashby. In 1773 he bought a farm of 130 acres of Deacon Jonathan Lawrence, situated northerly and westerly of the Common and joining land, at that time, of Joseph Davis on the east. In 1772 the province laid a tax on all non-resident land in Ashby, and empowered the assessors to sell all the land on which the tax was not paid, to collect the money due the town. At these sales he bought four lots of land for a small sum of

money. Soon after he bought three other tracts of land in Ashby, one from Abijah Wyman, of Woburn, making him owner of nine lots of land in town, some of them joining each other. He was first sergeant in Captain Stone's company before mentioned. When that company returned, under a provincial call for men he enlisted a company consisting of citizens of Ashby and other towns, of which he was appointed captain. His company was in Colonel William Prescott's regiment and was engaged in the battle of Bunker Hill, in which two of his men were killed and two taken prisoners, who soon after died of their wounds received in the action. He married Bettie Stearns, of Billerica. After the war ended he industriously applied himself to the improvement of his real estate and the general prosperity of the town. He served on the Board of Selectmen five years, and was moderator of nine of the town-meetings, from 1774 to 1801. He was one of the charter members of Social Lodge of Free Masons, and for a short time he was landlord at the tavern which adjoined the southwest corner of the Common. He died in Ashby, November 24, 1804.

Hon. John Locke, son of Jonathan and Mary (Haven) Nichols Locke, was born in Hopkinton February 14, 1764. He was not a brilliant scholar, but he had much patience, and while engaged in teaching school through several terms he, for the most part, fitted himself for college. He graduated from Harvard College in 1792. In 1796 he was admitted to the bar, and commenced the practice of law in Ashby. He held the responsible offices in the gift of the town, and took much interest in its welfare. He represented Ashby in the General Court in 1804, 1805, 1813 and 1823. In 1820 he was the member for Ashby in the Constitutional Convention. In 1823 he was elected a member of Congress for the North Worcester District, Ashby being then in that Congressional District, and was twice re-elected, making a six years' service in Congress. As a lawyer he was not an eloquent advocate, but as a judge of law and as a counselor he stood in the front rank in the profession. In 1804 he built the dwelling-house on Main Street, now owned and occupied by Mrs. Willard, which has been kept in excellent condition since he left the town, and it is decidedly the most substantial and elegant dwelling-house in Ashby. He lived a few years in Lowell, but the latter part of his life he spent in Boston, where he died August 24, 1855.

Cushing Burr, son of John and Emma (Cushing) Burr, was born in Hingham January 21, 1759. He settled in Ashby about 1788. He carried on a farm a part of the time; besides being interested in the tannery, he was engaged in making wooden dry-measures, consisting of those holding from half a bushel to quart-measures. He was a man of action rather than of words; very decided in his opinions, although always courteous towards every one. He was much respected by his townsmen, being one of

the selectmen fifteen times between 1801 and 1825, and moderator of the annual town-meetings thirteen times between 1800 and 1825. He accumulated a large amount of property for his time, the appraisal of his estate at his decease amounting to over \$16,000. He died September 19, 1838.

Lewis Gould (I have been unable to learn the names of his parents) was born in Franklin October 16, 1771, was graduated from Harvard College 1797, and tradition says that he pursued a course of theological studies with the intention of entering the ministry. Little is known concerning him prior to 1804, when he came to Ashby and opened a store in a building which stood where Austin Hayward's house now stands. He always dressed in a scrupulously neat manner with the ruffle shirt accompaniment of his time; was eccentric, and sometimes his language would be in bad taste for a man holding his position in society. But under a somewhat rough exterior he carried a warm heart, and in all his dealings he was strictly honest, courteous and obliging. During the long time in which he was in trade here he must have acquired a small fortune, as his family expenses were light and he was prudent, but not miserly. In 1846, after a residence here of more than forty years, he wrote a polite letter "To the Inhabitants of the Town of Ashby," in which, on certain conditions, he offered to give three hundred dollars with which to buy a town-clock. The town acceded to his wishes, which were in regard to the tower on which it was to be put and the care that should be taken of it. After the object was accomplished the town, not willing to be outdone in etiquette by the donor, chose a committee to draft suitable resolutions to be spread on the town records concerning the matter, of which the following are a copy:

"Resolved, That the town tenders to Mr. Lewis Gould their respect and gratitude for his very much needed and useful donation of \$300 for the purchase of a Town Clock.

"Resolved, That in accepting Mr. Gould's donation and complying with his wishes in presenting a Town Clock, we have a beautiful and enduring memento of his judicious taste, public spirit and benevolence.

"HOBERT SPENCER,

"ALFRED HITCHCOCK,

"Committee."

Mr. Gould, as has before been stated, gave the town-clock, the Fitch Monument on the Common to the town, and twenty-five dollars towards the bell on the church of the First Parish. He died in Ashby April 14, 1851, and was buried at Mount Auburn Cemetery.

Benjamin, Elias, Amos and Liberty Wellington, sons of Benjamin and Lucy (Smith) Wellington, were born in Brookfield. Benjamin in 1764, Elias in 1766, Amos in 1770, and Liberty in 1774. They came to Ashby between 1786 and 1790, and settled on farms in the northwest part of the town, some of them on the northerly brow of Jones Hill. They were carpenters and bricklayers, and well adapted to make themselves homes in a newly-settled town. They made large and commodious dwelling-houses, brought many acres of wild

land into a good state of cultivation, and set out large orchards, which they enclosed with stone walls. They and their descendants were much-respected citizens. Benjamin died November 9, 1817; Elias died January 28, 1824; Amos died November 20, 1857, and Liberty died April 24, 1851. Amos was town clerk, 1810, 1812; representative in 1812; selectman six times between 1805 and 1813, and moderator at the annual town-meetings seven times in the same length of time. His son, Amos Wellington, Jr., represented the town in 1852. Liberty served on the Board of Selectmen for five years, and was chosen on several important committees.

Cushing Burr, son of Cushing and Emma (Cushing) Burr, was born in Ashby October 24, 1791. He was decidedly a business man: engaged in a tannery, in storekeeping and in the lumber business. November 21, 1821, he married Miss Hulda Wright, and lived and died in the house which is the present residence of Charles O. Green. He was a popular and useful citizen, was moderator several times, and town clerk for thirteen years between 1840 and 1857. He was one of the selectmen for seventeen years, between 1824 and 1852, and he served on the most important town committees. He represented Ashby in the General Court in 1832, 1833 and 1835. He died in Ashby February 8, 1866, and was buried with Masonic honors.

James O. Kendall, son of Joseph and Mary (Haynes) Kendall, was born in Ashby January 4, 1821. He is one of the successful men who were born in this town. In his youth his time was divided between an attendance at the district school and working with his father at the carpenter's trade. On his arrival at manhood he began in the manufacture of tubs and pails at the South Village. He built two of the mills now in operation there. In 1853 he married Miss Phebe H. Denny, of Leicester. He was one of the five mill-owners who built the reservoir. In 1856 he moved to Hartford, Wisconsin, where, for a few years, he had liberal pay for his services as a mill-wright. In 1860 he bought an interest in the Hartford mill property, including the water-power, saw-mill and flouring-mill at that place, situated on the Milwaukee and Saint Paul Railroad. The firm with which he is connected does business under the name of J. O. Kendall & Co. The business of this firm increased so rapidly that, in 1873, they built an extensive brick flouring-mill, known as The Hartford Mills. In 1883 the firm remodeled the mill into a complete roller-system, and now the firm handles from 125,000 to 150,000 bushels of grain annually.

Francis Tinker, son of John and Philena (Francis) Tinker, was born in Worthington January 3, 1816. He acquired a good education at the academy in his native town and at the academy at Ashby. He learned the harness-maker's trade, and while here he worked at it for some time, which is good evidence that he had a sensible parentage. Men who graduate

from the benches of the New England mechanics generally carry with them the best equipment to enter the battle of life. He came to Ashby in 1842, and remained here until 1853, when he removed to Leominster, and while he was there, in 1860, he was elected one of the three representatives to the General Court from the Sixth Worcester District. In 1865 he removed back to Ashby and was four times elected as town clerk and has served on the School Committee in a very acceptable manner. In 1866 Ashby chose a committee "to compile incidents and facts in regard to the early history of the town," consisting of "William Sheldon, Joel Hayward, Stephen Wyman, Jonas Patch, George S. Hitchcock and Francis Tinker." Generally the gentleman first named on a committee has "to bear the heat and burden of the day." Not so in this instance, as Mr. Tinker worked faithfully and was the only active member of that committee: and just here I wish to acknowledge my indebtedness to him for most of the facts and incidents relating to the part taken by the citizens of Ashby in the Revolutionary War and in the War of the Rebellion. He is author of "History of Norwood" in the "History of Norfolk County," edited by D. H. Hurd. At present this gentleman resides at Norwood, where he has held the office of town clerk since 1872, when that town was incorporated, where, like mine, his

"May of life

Is fall'n into the sere, the yellow leaf."

Francis Walter Wright, son of Abiel and Martha (Baker) Wright, was born in Nelson, N. H., September 27, 1819. He worked on his father's farm while he was not at school, until he was twenty years old. Like many New Hampshire young men who have amounted to something, he took his turn at teaching school. He was a trader in Marlow, N. H., for about a year. He came to Ashby in 1844 and opened a store in the building which stands next west of his dwelling-house. After being in trade here for some time, he exchanged his stock of goods for an interest in a tub and pail factory, which stood in the north-westerly part of the town. This business required too much of his personal attention and interfered with his taste for general speculation so much that he sold out, and since 1848 he has been trading in neat stock, horses, real estate, and, in fact, most everything that could be bought and sold at a profit. He has shipped many car-loads of horses from Canada and sold them in this vicinity. He has held nearly all the town offices. He has served as moderator of thirty-one annual town-meetings since 1850, besides holding the same office many times at special town-meetings, and has held the office of justice of the peace since 1848. He represented Ashby in the General Court in 1879, and he pays the most money in taxes of any citizen of Ashby.

BIOGRAPHICAL.

MYRON W. WHITNEY.

The subject of this sketch was born in Ashby September 5, 1835. He is descended from John Whitney, who lived in Isleworth, near London, in the early part of the seventeenth century, and who embarked at London for New England in April, 1635, in the "Elizabeth and Ann," Roger Cooper, master, with his wife, Elinor, and five children—John, Richard, Nathaniel, Thomas and Jonathan. At the date of emigration John Whitney was thirty-five years of age, his wife thirty, and the sons were eleven, nine, eight, six and one, respectively. Soon after his arrival Mr. Whitney settled in Watertown, where he bought sixteen acres of land which had been granted by the Massachusetts Colony to John Strickland. These acres were, however, only the nucleus of a much larger estate of which he was the possessor at the time of his death. Mrs. Whitney died May 11, 1659, and her husband married, September 29, 1659, Judith or Judah Clement, whose death was followed by that of Mr. Whitney June 1, 1673, at the age of seventy-four. Three sons—Joshua, Caleb and Benjamin—were born in Watertown, and there, with the exception of Caleb, all the other brothers were living at the time of their father's death.

John Whitney, Jr., son of the ancestor, was born in England in 1624, and married Ruth, daughter of Robert Reynolds, of Boston. He was a prominent man in Watertown, and served on the Board of Selectmen from 1673 to 1679, inclusive. He had ten children: John, born September 17, 1643; Ruth, April 15, 1645; Nathaniel, February 1, 1646-47; Samuel, July 28, 1648; Mary, April 29, 1650; Joseph, January 15, 1651-52; Sarah, March 17, 1653-54; Elizabeth, June 9, 1656; Hannah (date of birth unknown), and Benjamin, June 28, 1660. Of these children Benjamin married, March 30, 1687, Abigail Hagar and a second wife, Elizabeth, and remained in Watertown. His children were Abigail, born May 3, 1688; Benjamin, baptized July 10, 1698; Ruth, baptized July 10, 1698; John, born June 15, 1694; David, June 16, 1697, and Daniel, July 17, 1700. Of these children David settled in Waltham and married a wife, Rebecca. He was an ensign in the navy, and died before April 30, 1745, the date of the division of his estate. His children were Rebecca, born in November, 1721; David, September 25, 1723; Anna or Hannah, August 8, 1725; Ruth, February 23, 1728-29; Josiah, November 22, 1730; Jonas, June 25, 1733, and Jonathan, February 10, 1735. Of these children Josiah lived in Waltham, and married, June 15, 1762, Sarah Lawrence. He died December 3, 1800, and his children were Sarah, born April 18, 1763; Josiah, June 23, 1765; Rhoda, August 22, 1768; Jonathan, May 8, 1772; Annie, baptized April 2, 1775, and Lucy, baptized July 28, 1776. Of these

M. W. Whitney;

Edwin K. Johnson

Josiah married Mary Barrett, of Ashby, to whom he was published January 10, 1794. His children were Josiah, born in Waltham March 20, 1791; Sally, born in Waltham March 19, 1792; Jonas Prescott, born in Waltham September 22, 1793; Mary, born in Waltham September 14, 1796; William, born in Lincoln July 20, 1798; John born April 7, 1801; Nancy, March 29, 1803, and Alice, December 17, 1805. He was, with his wife, dismissed to the church in Ashby November 24, 1799, and in that town the death of his wife occurred, August 23, 1841, followed by his own, December 24, 1842. Of these children William lived in Ashby and married Fanny Lincoln, a native of Marlboro', N. H. He is the father of Myron W. Whitney, the subject of this sketch, and is still living (June, 1890) in his native town at the advanced age of ninety-two.

Myron W. Whitney, until the age of sixteen, attended the public schools of Ashby, and then removed to Boston, where, at the age of twenty, having developed musical and vocal talents of great promise, he began with E. H. Frost to study for the profession in which he has won distinction, and soon became a member of the well-known Tremont Temple Choir, of which Mr. Frost was director. During his membership in the choir, which continued several years, he sang with marked success in oratorios and concerts; but, conscious of powers which needed a better education than Boston could afford, he went to Italy in 1869 at the age of thirty-three, and availed himself of the instruction of the celebrated Vannucini, of Florence. After leaving Florence he went to London, and, with Signor Randegger, the distinguished oratorio teacher, perfected himself in that department of musical art. While in England his singing of *Elijah* with the Birmingham Festival Choral Society won for him a reputation which opened the way for a brilliant reception and career on his return to his native land. After his return he sang in oratorios, concerts and festivals until 1873, when he again visited England, under a contract with the distinguished soprano, Madame Rudersdorf, to sing with her in a concert and oratorio tour through England, Ireland and Scotland. The reputation which he had acquired at his earlier appearance in England was enhanced by his later efforts, and the power and compass of his voice, ranging from low C to high F, gave him a universally acknowledged claim to a place in the front rank of the basses of his day.

In the autumn of 1873 he sang at Covent Garden Theatre in London during six weeks in concert and oratorio, under the direction of Sir Arthur Sullivan, Sir Julius Benedict and other celebrated directors, and returned home in the spring of 1874 to fill engagements at various American festivals, and made a tour of the United States with Theodore Thomas and his unequalled orchestra. In 1875 he again visited England under a contract with Novello, Ewer & Co. for a three months' season of oratorio and concert in

Royal Albert Hall, London. This engagement was unusually brilliant and successful, and at its close Mr. Whitney sang almost nightly in the larger cities of Great Britain until his return to America, in the spring of 1876, which was hastened by an urgent invitation to take part at the opening of the Centennial Exposition in Philadelphia of that year. Mr. Whitney was on that occasion the only soloist of the celebration. The immense space in front of the art building was filled by a crowd estimated approximately at 100,000, and the voices of the speakers failed to reach the ears of more than one-tenth part of the multitude. Far within the circumference of the audience the voices of even the chorus were indistinct, but over and beyond the limits of the great congregation the grand notes of Mr. Whitney cut their way with a power and clearness which excited the wonder and admiration of all who were present and heard them. No human voice was ever subjected to such a test, and no test of far less magnitude was ever by the human voice more triumphantly met.

Since 1876, though frequently urged to repeat his visits to England, he has confined himself to engagements at home, which have been arduous and unremitting. He has sung in all the large festivals of the country, with the Handel and Haydn Society in their Boston oratorios, in eight of the nine festivals in Cincinnati and in New York, Chicago, Cleveland, Pittsburgh and Indianapolis festivals. He probably has the most extensive *repertoire* of any basso in concert and oratorio, while his later efforts have given him an enviable *repertoire* in grand opera also. His operatic experience, extending over a period of ten years, and including two seasons with the American Opera Company through the United States, has crowned a reputation as basso which no other singer of our country has ever attained. His success in the grand rôle of *King*, in "*Lohengrin*," no American audience has ever seen surpassed, if even equaled.

Among the more celebrated artists with whom Mr. Whitney has sung may be mentioned,—Parepa Rosa, Christine Nilsson, Adelina Patti, Annie Louise Carey, Clara Kellogg, Campanini, Charles Adams, Candide and Gorg Henschel in the United States; Madame Titens, Madame Lemmens Sherrington, Madame Trebelli, Madame Patey, Antoinette Sterling, Sims Reeves, Vernon Rigby and Julius Stockhausen in England; and Madame Rudersdorf and Edward Lloyd in both the United States and England. As conductors he has sung under Sir Michael Costa, Sir Julius Benedict, Sir Arthur Sullivan, August Manns, Signor Randegger and Sir Charles Halle in England; and Theodore Thomas, Carl Zerrahn, Gericke and others. During the present year of 1890 he has sung in the festivals of Boston, Springfield, Cincinnati, Mansfield, O., and Pittsburgh, and his engagements end only with the advent of summer.

Mr. Whitney married, May 4, 1859, Eleanora Brea-sha, of Boston, in which city he held his residence

until December, 1888, and has three children,—William Lincoln, Lizzie Gertrude and Myron W., Jr. In 1888 he removed to Watertown, where he bought an estate which he has since occupied, and which he has discovered is a part of the estate owned by his ancestor, John Whitney, during his residence in that town. In 1880 he bought land on the shore of Long Pond, in the town of Plymouth, on which he built a house which he occupies as a summer residence. The pond on whose margin his house stands, and the large number of other ponds in the vicinity, afford him abundant opportunity for the indulgence of his taste for fishing during intermissions from his professional labors. His skill with the rod is only surpassed by his musical attainments, and it is a matter of doubt whether he is not less proud of his reputation as an artist than of the feat he has performed of landing a trout weighing twenty-five pounds and fourteen ounces with an eleven-ounce rod.

Mr. Whitney is in the prime of life, with health unimpaired, and with a voice promising still greater triumphs than it has ever yet achieved. During his summer residence in the native town of the writer of this sketch he has won hosts of friends, and not the least of his successes was the part gracefully accepted by him at the celebration of the completion of the National Monument to the Pilgrims on the 1st of August, 1889. On that occasion the beautiful hymn of Mrs. Hemans, "The Breaking Waves Dashed High," as sung by him before an audience of 2000 persons, was one of the most interesting features of the day.

EDWIN K. JOHNSON.

Edwin Kendall Johnson, son of William and Betsey (Wright) Johnson, was born in Ashby October 5, 1827. He married Lucy M. Thayer, of Lebanon, Maine, July 19, 1866. She died in Ashby October 19, 1870. No children. He is descended in the fifth generation from Captain Edward Johnson, born in Herne Hill, Kent, England, in 1599. He came to New England in 1637, and settled in Charlestown in that part thereof which is now Woburn. He is known as the author of the remarkable historical work entitled "Wonder-Working Providence of Sion's Saviour in New England." He was a joiner, a prominent military man, and deputy from Woburn to the General Court many times. He died in Woburn April 23, 1762, and his sons were the leading men of that town. William was a favorite Christian name in the Johnson family, and every paternal ancestor of the subject of this sketch since the time of Captain Edward had that name. His grandfather lived in Acton, was a prominent man there, a soldier in the Revolution under General Arnold, was in the battle at Saratoga when Burgoyne surrendered. He saw Major André executed and testified to his attractive personality and his quiet submission to his fate. He moved to Ashby in 1791 and settled beneath the evening

shadow of Nemosit Hill, known also as Prospect Hill and Blood Hill. Edwin K. distinctly remembers his grandfather, and when not at school he worked with his father on his farm. He attended the academy at Hancock, N. H., one term, was at New Ipswich Academy three terms, and at the Ashby Academy most of the time for two years. He learned the mason's trade, and after he became master of the business he went to Boston, where he made a specialty of setting boilers, ranges and furnaces, and he followed this occupation successfully for twenty-one years. He attended strictly to his business, saved his money and invested it with good judgment. For the last twenty years he has lived on the ancestral homestead, where he cared for his parents in their declining years and to some extent has improved his farm. He has never coveted office, although he has served as moderator at the annual town-meetings and has been on the School Committee several years. He is a Republican in politics, having voted for every Republican candidate for the Presidency since that party was formed.

CHAPTER XXIII.

WOBURN.

BY WILLIAM R. CUTTER.

INTRODUCTION.

WOBURN, according to a recent authority, is one of the older towns of Massachusetts, having been settled in 1642. Its growth, however,—it continues,—was slow, and it is only in recent years that it has attained to marked importance. This indeed is true; still, Woburn has, nevertheless, quite a history, and in the past has faithfully performed her part in the State and country. In the earlier days, when the fathers were slowly and broadly laying the foundation of the privileges and advantages her present sons enjoy, many of her sons were sent to adorn and benefit other municipalities, where their careers not only gained credit for themselves but increased the renown of the places they had selected for their adopted homes. The same is true of her daughters; and the careers of these, and of the others whose lives have been spent on their natal soil, in very many instances have shown commendable examples of worth and usefulness, sobriety, industry, good sense and abounding activity in all common employments. Due regard has also been paid to all religious, educational and moral and pecuniary obligations. The financial credit of the town and city in its corporate capacity has always been good; and its bills have always been paid with commendable promptness. The place has also contained among its inhabitants many public-spirited citizens, both male and female, who have given generously of their time and means for its so-

cial advancement and the improvement of the mental and physical condition of its inhabitants. Those of our native population who have traveled, or have found homes elsewhere, have felt, wherever they have been, that Woburn has been a place good to hail from. For ourselves we are proud to say that we are native to Woburn; that our birthplace was here on its goodly soil; that its people were our earlier and later friends; that within its bosom rest the remains of our beloved parents; many of our earlier friends rest in its soil with them—peace to their ashes! We are not ashamed of Woburn's past, and have no fears for its future. From a natural love of the work we have made the history of the town the study of a lifetime. This has been partly an inherited taste. Our advantages in the prosecution of the task have been great, if not unusual. We are thankful to all who have aided in any way in helping with special or general information. The response has always been faithfully met. In the following pages we have attempted to show the results of a few of our researches. In this undertaking we have had the sanction of the members of the Rumford Historical Association and the assistance of his honor, Edward F. Johnson, the first mayor of the city of Woburn, and of the Rev. Leander Thompson, both natives of Woburn; the latter gentleman for a long series of years having made the history of the town, its churches and the genealogy of its people a special and favorite study.

If with all these advantages the writers have failed to meet the reasonable expectations of the public in these sketches, it is hoped that their failure may be attributed to their want of ability, rather than to their want of zeal in the prosecution of their researches. The mass of material before them from which to select is immense, and the subject is one that possesses, besides, a great variety of aspects; to select judiciously is a task of no small difficulty, and opinions may differ on the wisdom of their choice. But it has been determined to rest generally on the decision of their own judgment, governed to some extent by the custom usual in such matters. It has been their determination to present their facts in the most compact language at their disposal, to avoid disquisitions, and to confine themselves to a clear statement of facts, letting the facts carry their own weight of interest and importance, believing that the serious student will find in them much of value and usefulness, in spite of possible or positive defects.

THE SKETCH IN THE "SOCIAL STATISTICS OF CITIES."—The town assumed sufficient importance, even before its incorporation as a city, to form the subject of a chapter in the "Social Statistics of Cities," a report of the United States Government, published in connection with the census of 1880. In this sketch

the population in the aggregate, from 1800 to 1880, is given, with 1228 inhabitants in 1800; 6287 in 1860; 8560 in 1870, and 10,931 in 1880, the latter numbers illustrating the period of its greatest growth. Its latitude, 42° 29' north; longitude, 71° 9', west from Greenwich, are given; also an outline map, showing its distance and direction from five neighboring cities—Boston, Salem, Haverhill, Lowell and Waltham, Mass.; also statistics of its population by sex, nativity and race, at census of 1880; and its financial condition, followed by an historical sketch, another map and statistical accounts collected by the census office to indicate the condition of Woburn in 1880, as to location, railroad communications, topography, tributary country, climate, streets, waterworks, gas, public buildings, places of amusement, cemeteries; sanitary authority with features of Board of Health, infectious diseases and municipal cleansing; police, Fire Department and public schools. On the larger map are shown the location of the "four villages," of greater or less size, comprised within its limits; the area occupied by its "small rural population," and the situation of its nearly "75 miles" of streets;¹ also the principal pond—Horn Pond—the principal elevations, such as Horn Pond Mountain, Mount Pleasant, Rag Rock and Whispering Hill, with other general features, such as streams and railroads. On the whole, giving a very good general idea of the character of the town. The historical sketch is comprehensive, beginning with the settlement in the wilderness, which then stretched to the west and northwest, broken only in one or two places by small settlements, while the nearest incorporated towns were Rowley and Ipswich on the north; Salem and Lynn, northeast; Charlestown, east; Cambridge, southeast and south, and Concord, southwest. The territory roundabout had then been but very little explored. Two-thirds of the sketch, which in the main is quite accurate, is devoted to the period previous to 1700, and an account is given of the leather industry, which has been for many years the leading manufacture of the place. This is the latest extended account of the town (1886), which we have seen published. Since the facts on which it was based have been collected the growth has been considerable, and by 1892—the year of its two hundred and fiftieth anniversary—the population, it may be supposed, may be increased in number by at least one-half, if former years are a criterion of judgment on which to base a calculation of such importance.

NOTE.—*Cf. Encyc. Britannica*, 9th ed., xxiv. 625-626; *U. S. Census Report on the Social Statistics of Cities* (Wash. 1886), pt. I, 330-334.

¹ An elaborate article on the streets of Woburn is published in the appendix of Mayor E. F. Johnson's inaugural address, Jan. 6, 1890. The actual length in miles is, however, 63.1 miles.

CHAPTER XXIV.

WOBURN—(Continued).

CIVIL HISTORY TO 1800.

THE civil history of Woburn to the year 1800 is much like that of other towns of equal age; town-meetings were held, officers were chosen, common lands were distributed, ecclesiastical and secular matters pertaining to the jurisdiction of a town were properly attended to, and till 1730 the town and parish were practically one in the effect of their action. Wilmington had been set off from Woburn in 1730, and in the same year the remaining portion of the town was divided into two parishes for religious purposes—the First, or Old Parish, including the present territory of Woburn and Winchester, and the Second Parish, or Woburn Precinct, as it was often called, including the part later set off as the town of Burlington. Town-meetings after this period were often held alternately in each parish. This is evident from the entries to be found in the records and in the contemporary diary of Samuel Thompson, Esq., a gentleman long identified with the town as a public and parish officer. The extant result of this business—besides the gradual effect of measures and duties consecutively performed upon the welfare of the public—is a series of handsomely written and well-kept records, well preserved and well cared for, of which, as a whole, the place has no cause to be ashamed, but cause for congratulation in the choice of her early clerks and the excellent handwriting of the greater part of them. Good ink and a large hand was the rule, and Woburn has in this series of books a priceless treasure, which we hope no fire will destroy or vandals purloin or mar.

In the course of events unusual transactions have occurred which possess a general interest, and attention is directed to a few. First and foremost, the facts in relation to the settlement of the town set forth in the first volume of the town records, which volume has been published. The discovery of the territory was accomplished with difficulty, and the inducing of settlers to locate on the lots already laid out by the parent town, or on lots to be laid out, or to stay afterwards, was a matter of still greater difficulty, and subjected the leaders to periods of discouragement. The courageous persistence of a few accomplished the work. Second, in the ordination of their first minister, some proceedings esteemed irregular by the authorities occurred, which excited the attention of that time and some interest later until the present age. This matter belongs to the ecclesiastical history of the town. Third, when once established, the community prospered, and with the exception of the loss of a portion of her territory and people to form another town, increased in population and resources till the opening of the war of the American Revolution. This

contest imposed burdens which impaired the prosperity of her people, and when recovery had commenced the loss of nearly half her territory and much of her population to form the town of Burlington, in 1799, crippled her prosperity to a considerable degree. The principal dependence for wealth to that date had been agriculture, and the town was a large farming community, in comparison with similar communities in the State. After the beginning of the present century the leather industry began to assume important proportions and became the principal production. The town suffered no further loss of her territory till the separation from her limits of the town of Winchester in 1850. Fourth, such matters of great interest to the fathers, but now of little importance, as the Mistick or Medford Bridge controversy and the extinction by mismanagement of the loan funds acquired from the Province, and the sale of the town's two thousand acres in 1734,—matters which were before the public for a long series of years,—having been fully treated in the already published history of the town, it seems needless to go over them again; and the same might be said of the arbitrary proceedings of Sir Edmund Andros in Woburn in 1687-88, which belong especially to the account of the life of William Johnson. The greatest injury the prosperity and growth of the town received before 1800, was the separation from it of two towns and the consequent loss of territory and population. The losses of the Revolutionary War were partly supplied by the sale of some public lands.

NOTE.—The particulars of the settlement are given in Sewall's *Woburn* chap. i.; customs of the settlers for the first fifty years described, chap. ii.; proceedings of Andros in Woburn, chap. iv.; Medford Bridge and loan business, chap. iv., vi. and ix.; separation of Wilmington as a town, and the part now Burlington as a precinct or parish, chap. viii.; embarrassment of the town by debt after the Revolution, chap. xiii.; incorporation of Burlington, ditto. Mr. Champney (*Drake's Middlesex County* ii. 530) treats the Medford Bridge and the loan matters (532-533). The main points of the history of the town are concisely stated in a brief sketch by Dr. B. Cutter, in catalogue of First Church, published in 1841. The substance of this statement was that Woburn anciently included the major part of the present towns of Wilmington and Burlington within its bounds, and for more than ninety years had but one church and one place of public worship for all its inhabitants. In 1730 Wilmington was set off; and the remaining facts are ecclesiastical in their nature. These facts are repeated in the church catalogue of 1852 and 1871.

In the following pages it is purposed to treat, under separate headings, various topics connected with the civil history of the town before 1800. We shall make use of such light as recent discoveries afford, and some of the topics will be:—The origin of the name; the early settlement, and certain contemporaneous incidents; the earthquake of Oct. 29, 1727, concerning which much material is extant; the history of the ancient public burial-grounds, etc.

ORIGIN OF THE NAME.—The reason why Woburn was named for the Woburn in Bedfordshire, England, is a recent discovery. Captain Edward Johnson, in some curious lines at the beginning of the first volume of the Woburn town records, says in line four of this

unique production, in which the town is supposed to be speaking in the first person:

"Nowell, Symmes, Sedgwick, these my patrons were."

These were influential names. Nowell, was Increase Nowell, a well-known magistrate and leading citizen; Symmes was Zachariah Symmes, the minister of Charlestown, the parent town: while Sedgwick was Robert Sedgwick, a military officer of eminence and one of the distinguished men of his time. Nowell and Sedgwick were then both residents of Charlestown; and while much has been written in the past concerning Nowell and Symmes, developments of recent date place Sedgwick in an interesting light as the individual to whom the New England town of Woburn owes its name. This discovery was first made public by E. F. Johnson and W. R. Cutter in the first issue of their publication of the Woburn records in the *Woburn Journal* for May 18, 1888: the former is a lineal descendant of Captain Edward Johnson, and the first mayor of the city of Woburn. Cutter having read in the number of the *New England Historical and Genealogical Register* for April, 1888, a statement that Maj.-Gen. Robert Sedgwick, of Charlestown, was baptized at Woburn, Bedfordshire, England, investigation was immediately made to see what intimate connection that fact might have with his relation to the Woburn in New England. The line above quoted from Edward Johnson in the rude poem at the beginning of the Woburn records, and designed to memorialize, if not to immortalize, the facts relating to the origin of Woburn, shows that he was one of the three principal patrons of the enterprise; and the fact noted by Savage (*Gen. Dict.* iv. 18) that Sedgwick was "a neighbor" of Johnson when the latter resided in Charlestown, and the latter mentioning Sedgwick, in the "*Wonder-working Providence*," as "the first Sergeant-Major chosen to order the Regiment of Essex [equivalent to the present colonel], stout and active in all feats of war, nursed up in London's Artillery garden, and furthered with fifteen years' experience in New England exact theory; besides the help of a very good headpiece, being a frequent instructor of the most martial troops of our artillery men," etc. (*W. W. Prov.*, ed. 1867, p. 192), and the first mention Johnson makes of him in the Woburn records being in the words "Noble Captain Sedgwick," shows he was held in high estimation by Johnson. The Woburn records show Sedgwick's part in the work of exploring the lands at the time of the settlement of the town, and the influential position he had in selecting the present site for the village, or the spot where the meeting-house should be. He was also the chairman of the committee of thirteen appointed by Charlestown, Nov. 4, 1640, to set the bounds between the two places and select the site for the new town. This was the first important action on the part of the parent town in a corporate capacity, in regard to the setting apart and settling of Woburn.

A biographical sketch of Sedgwick is given in the number of the *New England Historical and Genealogical Register* already referred to. He was the son of William Sedgwick and Elizabeth Howe, who were married, according to the registers of St. Mary's Church, at Woburn, Bedfordshire, England, April 10, 1604. His father, William, was a warden of that church, and was buried there July 25, 1632. Robert Sedgwick was baptized at Woburn, Bedfordshire, England, May 6, 1613. The family was one of distinction in England. After a distinguished career in New England, he was sent by his friend and commander Cromwell to Jamaica, where he was high in office, and died in 1656.¹

The fact that Sedgwick came from Woburn, Bedfordshire, England, was the reason why the name of the place of his origin was given to the Woburn in New England, in whose founding he took such a leading part; to say nothing of the influence of Johnson, the father and projector of the infant settlement, in imposing such a name on the town, in honor of its principal patron. It is not so stated in the records; but it is evidently true. The matter of naming a New England town in the seventeenth century from the leading man, either layman or pastor, is mentioned by an excellent English writer, Doyle, *English Colonies in America*, iii. 7; and he says, "The town was named, not after the individual, but after his former abode; thus Duxbury, Groton and Haverhill commemorated the birthplaces of Standish, of Winthrop, and of Ward."

The theory in Sewall's *Woburn*, p. 539, which has been widely copied, therefore, has no force. The honor conferred on Richard Russell in this matter was misplaced. He came, also, from Hertfordshire, where none of the English Woburns are placed. There are three of these in England: Woburn, Bedfordshire; Woo-burn, Bucks; O-burn, Dorset. All three spellings were used by the early settlers of New England, but which was our namesake was unknown. It was not known till this discovery that any person connected with the settlement of this Woburn had any relation with the English Woburns. From the statements made the matter is now clear, and Woburn, Bedfordshire, is the place whence our town derived its name.

NOTE.—For local articles on the subject of Woburn, Bedfordshire, see *Our Paper* (1875) 34, and (1876) 54, 59, 62; also *same*, vol. 2 (1876) 6, 10, 11, 12, 67; *Woburn Journal*, Oct. 25, 1879, Oct. 3, 18, and Dec. 5, 1884, and Aug. 5, 1887. It would be easy to add more. Natives of Woburn, New England, have from time to time visited Woburn, Bedfordshire, England, notably Edward F. Johnson, who gave a lecture on his experiences before the Rumford Historical Association on April 9, 1889, published in the *Woburn Journal*, May 2, 1890; and Ephraim Cutter, M.D., who gave a description of his visit in a letter published in the *Woburn Budget* for July 18, 1862. Also Leonard Thompson, trustee and vice-president of the Rumford Historical Association, who gave an account of his visit in a letter published in the *Woburn Journal*, July 26, 1889.

THE EARLY SETTLEMENT.—On the first page of

¹ Cf. Frothingham's *Charlestown* (1846), 135-139, which cites a quotation from Carlyle's *Cromwell*, ii. 198, regarding Sedgwick.

the first volume of the town records are the following lines, composed by Captain Edward Johnson, intended to be a sketch of the history of the settlement of the town.¹

*Pandispor Poet*²

In penniless age, I, Woburn town, began,
Charlestown first moved the count my lines to span;
To view my land place, compiled body rear,³
Nowell, Symmes, Sedgwick, these my patrons were,
Some fearing I'll grow great upon these grounds,
Poor, I was put to nurse among the clowns,
Who being taken with such mighty things,
As had been work of noble queens and kings—
Till babe 'gan cry and great disturbance make—
Nurses repent they did her undertake,⁴
One leaves her quite⁵—another he doth hire
To foreign lands, free from the baby's cry,⁶
Two more of seven,⁷ seeing nursing prove so thwart,
Thought it more ease in following of the cart,⁸
A neighbor by,⁹ hoping the babe would be
A pretty girl, to rocking her went he,
Two nurses, less indignant than the rest,¹⁰
First houses finish; thus the girl 'gan dress'd,
It's rare to see how this poor town did rise
By weakest means;¹¹—too weak in great ones' eyes,
And sure it is, that metal's dear extraction¹²
Had never share in this poor town's erection,
Without which metal, and some fresh supplies,
Patrons conclude she never up would rise,
Hence she 'mongst ladies have a station,
Say 'twas from parents, not her education,
And now conclude the Lord's own hand it was
That with weak means did bring this work to pass,
Not only town, but sister church too add,
Which out of dust and ashes now is had,
Then all inhabit Woburn town, stay, make
The Lord, not means, of all you undertake!¹³

¹ Though the records begin in 1640, these lines were supposed to be composed in 1642, from the allusions to events of that year. They are published with the crudity of their original spelling by Sewall (*Hist.* 530-1), Poole (*W. W. P.*, 1867, LXXVI.), and Frothingham (*Hist. of C.*, 168-9).

² *Lat.* "I have lived for a short time," or I have been a little while.
³ "I" meaning the town.

⁴ Meaning "my compact body to rear."—Frothingham.

⁵ "The distinguished patrons of Woburn, fearing it would one day rival Charlestown, discouraged the enterprise, and gave it to those they regarded of a lower grade in society, or as the 'clowns.' But difficulties discouraged them also, and they 'repent they did her undertake.'"—Frothingham.

⁶ Ezekiel Richardson, supposed. Others have thought Sedgwick the person referred to.

⁷ Thomas Graves, the admiral, evidently. For biog. sketch, see Frothingham (*Hist. of C.*, 139-40), and Sewall (*Hist.* 68-71); also see *Winchester Record*, ii, 397-8.

⁸ The number of the commissioners for the founding of Woburn.

⁹ The two were the brothers Samuel and Thomas Richardson, evidently.

¹⁰ Edward Johnson, "the author of the metre in the text."

¹¹ Edward Converse and John Munsall.

¹² Or from the humblest circumstances imaginable.

¹³ A phrase signifying gold or silver money, mainly the latter.

¹⁴ The preliminary quotation is from Plautus (*Is.* 1, 1, 36). "Comedy of the Lord," *quasi solitudinis herba, pandispor fuit*. "As a summer's flower, I have lived for a short time,"—true as to the existence of Woburn in 1642. The ascription of glory to the Lord for what had been accomplished, the failure of patrons to encourage or aid, the opposition of Charlestown, the consignment of the undertaking to "the clowns," the absence of supposed solid means, the difficulty of the enterprise of opening a new settlement in a dense wilderness, all this, as expressed in Johnson's verse, truthfully shows, it may be supposed, the meagreness of the means at the outset. The enterprise was finally conducted by the common people in their own way.

At the present day one can little conceive the obstacles that surrounded these persons. The difficulties to be met in the forest were to be overcome by men with hard muscles, long inured to severe toil, and such as the hardiest alone could stand; work of a kind to be accomplished by laborers of the roughest sort—the "clowns" of Johnson's verse—rustic and ill-bred, but full of determination to win and overcome natural obstacles of a most disheartening character. They toiled, says Johnson, their leader, with much difficulty, traveling through unknown woods and through watery swamps; sometimes passing through thickets where they were forced to make way with their hands for the passage of their bodies, and their feet clambered over crossed trees, from which if they missed their footing they sunk into an uncertain bottom in water and waded up to their knees; they tumbled, sometimes higher and sometimes lower, and wearied with this toil, at the end would meet with a scorching plain; yet, in the quaint phrase of Johnson, it was there not "so plain," or easy, for the ragged bushes of the place manifested their presence by scratching the explorers' legs "foully." The sun also cast such a reflecting heat in such places from the sweet fern, whose scent was very strong, that some of the party were very near fainting from it, although they had very able bodies to undergo such hardship and travel—the toil of a new plantation being like the labors of a Hercules—never at an end.

See a reference to the above extract from the *Wonder-working Providence*, in the *Winchester Record*, iii, 18, 23; also for a farther quotation from Johnson, *ibid.* i., 49.

A publication entitled *Good News from New England* (London 1648), reprinted in *Mass. Hist. Soc. Coll.*, 4th s., et. i, 201, 212—refers to Woburn thus: "Woo-burn, Wickham [meaning Wenham] Redding [Reading] built with little silver mettle [metal]." The "Good News" being a relation partly in rhyme, a comparison of Johnson's verse-making with that writer's shows that the work of one is about the same as the other; and a mixed relation in verse and prose appears to be a common feature of the literary productions of the day, particularly in descriptions of New England.

A second reference to Woburn in this production of 1648 is the following, referring to Thomas Carter as minister (*M.*) of the town, and to his salary of £60 (60*l.*) in a list of towns and ministers: "Woo-burn: *M.* Tho. Carter, 60*l.*"

The territory called Woburn, says Frothingham ("Hist. of Charlestown," chap. xiii., A.D. 1846) was regarded in 1640 as remote land, whose roads were Indian pathways, with crevices of rocks and clefts of trees for shelters. To explore it, or occupy it, was viewed as a great labor, and not to be accomplished without danger. The Woburn records note every step. This author, with characteristic ability, gives each important incident in the history of Woburn to

the death of Rev. Thomas Carter, in 1684. Of some of the features of the town orders, he remarks—"small things, some may think . . . but let them not be despised; for such are the fibres of our national tree!" The history of the town's settlement, he says, is "minutely detailed by the early authorities"—referring mainly to the writings of Captain Edward Johnson—and it afforded a "good illustration of some of the peculiarities of the times, and of the way in which towns were organized." The town, he said, shared largely in the early dangers, and "partook of the prosperity of the country."

The peninsula which is known to us to-day as Charlestown was the site of the original settlement of that municipality, and territory was added to that small tract till the area of many present towns was covered by the name of Charlestown. The town of Woburn was the first to be set off. Shorn of this external territory in the course of years, Charlestown has again shrunken to her original limits, and has lost her name also in that of Boston.

Posterity owes a great debt to the perseverance of the first settlers of Woburn and to Edward Johnson, the leader, who patiently recorded the story of their labors. No fuller account of the origin and settlement of a town of equal age has been given in the annals of New England. His history is now the basis of many writers on historical and political science, when treating of the New England people. Frothingham called him "the father of Woburn." He was a native of Kent, of the parish of Herne Hill, in England. He was connected intimately with a place called Waterham, in that parish in the old country, where he left possessions mentioned in his will. Captain Johnson was a citizen of Charlestown after 1630, and returning to England, brought over on his second passage from that country his family, consisting of his wife, his seven children and three servants. This is supposed to be about 1636 or 1637. At Charlestown, says Frothingham, "he lived in Bow Street," anciently Crooked Lane, the location of his houses and gardens being verified in Hunnewell's *Century of Town Life*, plans, pp. 108, 129. "Yet," says Frothingham, "it is strange that the name of so noted a civilian and religionist is not found in the church records at all, nor on the town records before 1640, except in divisions of lands and in a description of his property, where he is styled captain." As we have intimated, he was "the author of the very curious work entitled *Wonder-Working Providence of Zion's Saviour*" (Lond. 1654), "a relation of the first planting of New England." From the outset he took a leading part in the settlement of Woburn, and at the first meeting of the commissioners for the purpose presented a plot of the contemplated town and was chosen its recorder or clerk. He was active in founding the church and was the first captain of the military company at Woburn. He was a man of much

influence in the Colony at large, held many offices, and died April 23, 1672.¹

Edward Converse, another citizen of importance among the settlers, was the first ferryman at Charlestown, and a selectman there from 1635 to 1640. At Woburn he built and occupied the first house erected in the town and was the owner of the mill. These buildings were at what is now Winchester Centre. He represented Woburn in the General Court in 1660 and died Aug. 10, 1663. Frothingham states that he left an estate valued at £827 5s. 6d. to his wife, his three sons and daughter. He was of Charlestown in 1630. (See Frothingham, *Hist. C.*, 78.²)

Thomas Graves, the rear-admiral, was a prominent character among the settlers also. His farm was located in North Winchester, near present Montvale. The celebrated John Harvard or Mrs. Harvard had a lot laid out near (120 acres) which was sold to Thomas Graves.—*Winchester Record*, ii, frontispiece, and pp. 15, 21.

The names of the seven commissioners for the founding of Woburn were: Edward Johnson, Edward Converse, Thomas Graves, John Mousall, and the brothers, Ezekiel, Thomas and Samuel Richardson.

NOTES.—THE COUNTY OF KENT WHEN CAPTAIN EDWARD JOHNSON CAME IN ENGLAND.—The obligations of New England to the county of Kent is the subject of an address by George F. Hoar, before the *Amer. Antiq. Soc.* (Worcester), 1885. Kent, from the earliest historic period, says this writer, was the "England of England," and remarkable for the courage and warlike quality of its people, for their tenacity in clinging to their own customs and for the part their customs have

¹ Edward Johnson was probably the best known citizen of the town in his time in the Commonwealth. His fame extended even in his lifetime to England, where an English squire printed in London his unique and valuable "History of New England" as his own production. For many years the fraud upon the labor and brains of our worthy town father passed unrecognized; but posterity now recognizes its true source, and his name and fame are assured as the author of that early New England history. He was a pioneer explorer of the forest, and in connection with one expedition his initials were cut in a rock at the outlet of Lake Winnepesaukee, and are still to be seen. As a deputy from Woburn in the General Court he was appointed to serve with the most distinguished men of the Colony on important committees, and it would be easy to enumerate from the colony records a long list of his services. This has been already done by the present writer in a lecture before the Rumford Historical Association, on April 8, 1887, a copy of which lecture in manuscript is in the archives of that society. Johnson was a lieutenant, 1611, and captain, 1650. After his decease the General Court pronounced an opinion on him as a local historian, by mentioning his name with others of the highest repute. There is no stone to mark his grave and the spot is forgotten. For early sketches of Johnson, see *N. H. Hist. Soc. Coll.* (Concord, 1834), iv.; *Columbian Centinel*, June 16, 1849, copied, with a few alterations, into *Farmer and Moore's Coll.* (1822), article by John Farmer. Also among a great many other notices, one in the *Winchester Record*, i, 41-47.

² Edward Converse and two others, in 1635, made the first exploration authorized by Charlestown, into the country. His ferry was where Charles River Bridge now is, and was established in 1611. He was a member of Woburn Church from the beginning and a deacon in it, one of the first two till his death. Selectman from the first choice, 1641, till his decease. He was evidently a power in all these early enterprises. Cf. Frothingham, *Hist. of C.*, 65, 94-5; Sewall's *Woburn*, 72-3; *Winchester Record*, i., 224-13, 217-39; ii., 208-22. For criticism of genealogical position in *ib.*, ii., 208-22, see *N. E. Hist. Gen. Reg.*, xli., 311. Some curious minor references to Converse, before 1642, are found in *Colony Rec.*, vol. i. and ii.

played in the history of liberty. Blackstone has said, "When liberty dies out, it will give its last groan among the yeomen of Kent!" The county of Kent is the home of the original Yankee, and the people who emigrated thence to New England were the "Yankees of the Yankees." The following persons connected with the early history of Woburn were certainly from Kent, and their names were of Kentish origin: Edward Johnson, Thomas Graves, John Mousall, Isaac Cole, Zachariah Symmes, Daniel Cookin and Simon Willard. Thus three of the seven commissioners for the settlement of the town were from Kent.

EARLY EXPLORATIONS AND MAPS.—The first recorded exploration of this vicinity was in 1621, when an exploring party from Plymouth entered Boston Harbor and made an excursion into the interior in the direction of the present localities of Medford and Winchester. It is doubtful if they quite reached the latter place, although their explorations extended to the vicinity of Mistick Pond. Cf. on this subject the *Mem. Hist. of Boston*, i. 63, etc., and the authorities there mentioned. It is probable, also, that the few white settlers scattered about the site of Boston from 1623-24 to 1629 (see account in the *Narr. and Crit. Hist. of America*, iii. 311) had an acquaintance, more or less superficial, with this neighborhood. The principal immigration from England was between the years 1630 and 1640, and after 1630 the knowledge of the territory adjacent to the principal settlements increased and was becoming considerable by 1633, from the evidence shown by two maps of this section of that date, one being recently discovered, *i. e.*, the Winthrop map, the other being Wood's map. The Winthrop is evidently the older, and Wood's was apparently made from it. Gov. John Winthrop was the namesake of one and William Wood, author of *New England's Prospect* (Lond. 1634), of the other. Wood's work is the earliest topographical account of Massachusetts. The Winthrop map is minutely described in the recently published *Narr. and Crit. Hist. of America*, iii. 381, which expresses the opinion that the topography corresponds with Wood, if both are not drafted from an earlier map, the result of a previous survey. They are crude drawings. Spot Pond, Mistick Pond and Horn Pond are named on both maps. Horn Pond is the name given to a pond which is plainly Spy Pond, in Arlington, and the true Horn Pond is not represented. The use of its name, however, shows that the cognomen is of greater antiquity than the town itself and older even than the year 1638, when it was used in the description of the Waterfield lots. The map-makers of 1633 evidently did not have an intimate acquaintance with the actual pond, or they would not have left it out of their maps. It is presumed that the whites had by that time penetrated to it and named it. Horn Pond Mountain, though unnamed, is shown as a hill in Winthrop's map, and three small ponds are represented near, intended to be the ponds in Winchester, known as Wedge and Winter Ponds. The Mistick Pond is stated on the Winthrop map to be sixty fathoms deep; Fresh Pond, Cambridge, forty fathoms deep. On that map is a stream representing the Aberjona River as unnamed and as leading into the country.

Spy Pond, in Arlington, has been called by that name since 1656, and references to it by that name are frequent in that century. On Aug. 15, 1716, news was brought that the celebrated Cotton Mather, while fishing on Spy Pond in a ticklish boat, fell into the water, but was not hurt from the bath. See *Narr. and Crit. Hist. of Amer.*, iii. 347; *Sewall's Diary* (*M. H. C.*), 5th ser. i. 482, ii. 15*, iii. 98; *Cutter's Arlington*, 9, 20.

EXTRACTS FROM THE FIRST VOLUME OF THE CHARLESTOWN RECORDS RELATING TO THE EARLY PLANTATION OF WOBURN.¹

1633. Any of the inhabitants have liberty to go without the town neck to build, and grounds are allowed to three individuals, and another tract to one of them, provided he plow it up in four years. The parties were Nowell, Beecher and Wade.

1635. Edward Converse, William Brackenbury and Mr. Abraham Palmer were desired to go up into country upon discovery three or four days, for which they were to be satisfied at the charge of the town. Cf. *Frothingham's Charlestown*, 65; *Charlestown Records*, i. 18, 23, 24, etc. In this year an order was passed adverse to granting house-plots outside the neck. The order of the General Court is copied that Charlestown bounds shall extend eight miles into the country from their meeting-house.—*Col. Rec.*, i. 168; the order was dated March 3, 1635-6. The following year (1636) grants were made to the brothers Ezekiel and Thomas Richardson, and to Thomas Pierce, outside the neck and near Cambridge line. Five hundred acres were also reserved to further the flax trade.

1638. Other lands to the amount of three hundred acres were reserved outside the peninsula's limits, and among them the Waterfield lots above Mr. Cradock's farm, or Medford, "to remain in the town's hands for the supply of such as may come with another minister." In this year Edward Converse and Ezekiel Richardson were desired to lay out a highway over the meadow at the head of the North River, on Mistick Side, Malden, and a record was taken (1638) of all such houses and lands as were possessed by the inhabitants, including the Waterfield allotments, or the locality now covered by Winchester and Woburn. These were divided among them "by a joint consent, after the General Court had settled their bounds by granting eight miles from the old meeting-house into the country Northwest-northerly, and the bounds of the said town lying or being betwixt Cambridge, *alias* Newton, on the West-south-west and Boston land on the east, as it appears upon record by the several grants of General Courts to all aforesaid bounds." The Boston land is that on the Malden side, or more properly that adjoining Chelsea and Revere—by Malden, Everett and Malden are meant. Waterfield is explained by a map and de-

¹From the abstracts executed 1853-54, by Thomas B. Wyman.

scription in the *Winchester Record*, ii. (1886) where the approximate location in 1638 of the lots granted to the Charlestown residents in the limits of Woburn is shown, four years before the incorporation, and two years at least before the actual settlement of the town was begun. Some remarks on this subject are published also in the same volume of the *Record*, 394-98. Waterfield, therefore, meant Woburn, or a locality in ancient Charlestown embracing the vicinity about Horn Pond and the greater portion of Winchester. The name does not appear of long continuance. E. F. Johnson, first mayor of Woburn, in his inaugural address, 1889, alludes to Waterfield, as follows: "In ward one were laid out fully four years before the incorporation of the town, the Waterfield lots, so called, which were the first possessions of civilized man within the present limits of the city."

So the votes go on through 1638 and '39, and Edward Converse is a figure in them. The "Rocks" are mentioned as a locality in 1640. On the 4th of the 9th month, 1640, the committee appointed to set the bounds betwixt Charlestown and the Village, afterwards called Woburn, and to appoint the place for the village, was chosen by the body of the freemen. The number of this committee was thirteen. It included the following names: Captain Robert Sedgwick, Thomas Lynde, Edward Converse, Ezekiel Richardson, John Mousall, Mr. Thomas Coytemore, Samuel Richardson, Francis Willoughby, Abraham Palmer, Mr. Thomas Graves, Ralph Sprague, Edward Johnson and Robert Hale. These on occasion were to advise with Mr. Nowell, the magistrate, and the elders or ministers, in any difficulties they meet with.

It is a noteworthy fact that the name of Captain Robert Sedgwick, in whose honor Woburn was named from his abode or birth-place in the old country, should head the list of this committee to select the site, and determine the bounds of the new town in 1640. It is also significant that this committee headed by him should select the spot for the village (Nov. 17, 1640) near the site where the meeting-house was afterwards erected, or the present Woburn Centre. Thomas Graves and others were in favor of a site at the easterly side of the town, at present Montvale, and secured a favorable recognition of their plan to the extent of laying the spot out (Feb. 10, 1640-41), but a Charlestown committee headed by Nowell and Sedgwick advised (Feb. 29, 1640-41) "to remove the house lots and place for the meeting-house" to the place that the original committee had selected, or Woburn Centre. Sedgwick, therefore, was again influential in assuring this site for the town's village. He was a moving spirit in the enterprise always, and the town was fitly named in his honor. Edward Johnson, whose lands were at the extreme westerly side of the town, was also more favorable to the centre site, than to one so

distant. These facts are ably presented in the *Winchester Record*, ii. 397-98. On the 8th of the 10th month, 1640 (Dec. 8, 1640), a committee was chosen to join with the villagers, on Charlestown's behalf, to "compound any differences" that may occur. The members of this committee were Mr. Nowell, Thomas Lynde, Abraham Palmer, Richard Sprague, Ralph Sprague, Robert Hale, Francis Willoughby, Ralph Mousall, William Stilson and Robert Sedgwick.

The further references to Woburn in volume one of the Charlestown records relate to the bounds (1643, 1650), to land grants (1643, '47, '48, '49, '50, '52), and to the laying out of a highway from Woburn to Mistick Bridge, or Medford. With modernized spelling, this extract is as follows:

1660. Vol. i, p. 137. The 11th day of the 11th month, 1660. We, whose names are hereunto subscribed viz., from Charlestown, Solomon Phips, Richard Lowden and William Symmes; from Medford, Thomas Eames; from Woburn, Michael Bacon, Josiah Converse; being deputied by the several places whereunto we belong, a committee to lay out a country highway, viz., from Woburn to Mistick Bridge. We do unanimously determine the highway to be as followeth: viz.—That highway which hitherto hath been used commonly near Woburn meeting-house,¹ that now is to Edward Converse's mill,² to be full four poles in breadth, and so to remain where it hath been unto the parting of the ways of the Converses and Richardsons to their now dwelling-houses;³ and the way to run along upon a brow⁴ until you come to a bridge⁵ made at a place called Halfway Swamp,⁶ holding four poles breadth from the trees marked⁷ on the southwest side; and from the fore-mentioned bridge to run east and by south as doth appear by trees marked on the south side, until you come to a valley,⁸ where the highway is bounded by a way formerly used,⁹ until you come to a pine tree, which standeth in the middle of the way, as by the marks on each side¹⁰ doth appear. And thence to run south, and by east until you come to the highway now used, that is, by the mill-pond to the mill;¹¹ where is a white oak marked, north and south, being in the middle of the way. And thence in a way [that] hath commonly been used, over a place called ——— Bridge,¹² From which bridge, still to keep the old way and the fore-

¹ On the common at Woburn Centre.

² At Winchester Centre, site of the present Whitney mill.

³ On to the corner of Cross Street, or its equivalent, the main highway being Main Street from Woburn Common to that point. Cross Street was the way to the Richardsons (on Richardson's Row, or Washington Street, Winchester), and the ways to the Converses (at Winchester Centre), were by some equivalent of present Main Street, or by a way through Pond, Cambridge and Church Streets (Winchester)—the last two being "Plan Street" and "Driver's Lane." To Cross Street the way appears to be an old one in use from the beginning of the first settlement (probably the one laid out in 1616, the report being lost), and from Cross Street the way onwards to Winchester appears in some parts to be new (1660).

⁴ Description of its present passage through Cutter's Village.

⁵ Evidently over the outlet of Horn Pond at that village.

⁶ Halfway Swamp is the low tract at Winchester Centre, now and for many years past covered by water by the raising of Whitney's dam.

⁷ Marked or "blazed" trees; practically a forest path. "On the southwest side," means, on the southwest side of the highway, i. e., the marked trees, in this instance, stood on that side of the highway.

⁸ Evidently near the present bridge over the outlet of Wedge Pond.

⁹ "Improved" is the word in the original. This is evidence that an older way formerly existed on this route, from Cross Street to the present centre of Winchester.

¹⁰ That is, by the marks [on trees] on each side of the highway.

¹¹ Converse's mill.

¹² Blank Bridge in the original. This bridge is supposed to be over the outlet of a pond which existed on the site of the present Sanderson's store.

¹³ Crossing Main Street at right angles, it ran back of the houses of Messrs. P. W. Swan and Edmund Sanderson.—*Winchester Record* (1885), 2, 286.

mentioned breadth, until you come to an inclosure, pertaining to Edward Converse, where by a tree marked southward, the way runs directly from that tree unto the easternmost corner of his old orchard, and thence over the mill-dam, east and by south, until you come to a tree marked southwest; and then to run southerly in the way formerly used, until you come to the highway leading to 'Notom's Weir (Weir);¹ and thence to run east and by south, until you come to a place called Bare Hill,² the foot of that hill bounding the [highway]; [p. 138] and thence to a tree marked west; and so along to a place called Elbow Hill,³ the foot of which hill, on the easterly side bounds the way westward. And thence to run along over the swamp called Halfway Swamp,⁴ between two ways formerly improved, as by marked trees is manifest. From the swamp, until you come to Mistick Bridge, the way, from one end unto the other, [is] agreed to be four poles in breadth; and accordingly bounded on the north with marked trees.

[Report signed by] Solomon Phips, Richard Lowden, William Symmes, Thomas Eames [mark : T. E.], Josiah Converse, Michael Bacon.

This was evidently the re-laying out of an old way, which had existed for some time. The account of a former laying out is preserved in the Woburn records, i. 9, but no report appears with it. On September 14, 1646, it is stated that Edward Converse and Samuel Richardson were appointed by Woburn "to lay out a highway between this town and Mistick Bridge"; they "being joined" in the work "with some of Charlestown and some of Mistick Homes," or Medford. This committee was constituted in the same manner as the later committee of 1660. There can be no doubt that they performed their duties, and that the highway had existed before 1646—even so early, probably, as August, 1641, when a bridge was built with great pains over the Horn Pond River, evidently the one referred to in the document above presented.⁵

¹ Menotomy, now Arlington. The weir referred to was located on the Mistick River at the point where the road from Medford to Arlington passes. The bridge here being called the Weir Bridge for a long period. Here in ancient times vast quantities of fish were caught. The highway above described was probably a shorter cut to present Grove street.

² The long height extending across the easterly side of Winchester, and lying partly in Stoneham.

³ Elbow Hill, a neighboring height of the former. Supposed to be the height latterly called Ridge Hill,⁶ but now mostly dug down. The Winchester Unitarian Church edifice occupies a part of the spot.

⁴ The location of this part of Halfway Swamp is already described in the last part of the preceding paragraph as the low tract of ground below Symmes's corner, now occupied for agricultural purposes by Marshall Symmes. The way from this point to Medford or Mistick Bridge, was by the street called on the present maps by the name of Woburn Street, and thence by High Street in Medford to present Mistick or Medford Bridge. Another way to accomplish the same object was a longer route by present Grove Street. This was the ancient way mentioned in the Symmes plan of 1705, as the "county road to Cambridge." It was also the way to the Weir Bridge, between present Medford and Arlington, also to Menotomy, or Arlington itself; Arlington being originally a part of Cambridge principally, the part of that town nearest Mistick River and Pond being a portion of Charlestown,—the two parts together formed a district named Menotomy, from the Indian name of the river separating Arlington and Cambridge.

⁵ The appearance of the spot where this way once led in Winchester, is much changed. A body of water now covers a large portion, which was then dry land. The water was then confined to the channel of the Aberjona, and to the channel of two streams, the outlet of Horn Pond and Wedge Pond. These smaller streams united in one stream before they entered the Aberjona River, across which Converse's dam was built.

Some help is gained in tracing this way on Thompson's road-map of 1797. The points shown on these comparatively recent maps demonstrate that the situation in 1794 and 1797 was practically unchanged from 1660. There is a good description of Main Street in the Winchester portion, in the *Winchester Record*, i. 280, and a number of important historical facts are there stated. The author of that description has furnished valuable aid in locating for our use the channels of these streams. Further aid in showing the old channels is found on a plan of the Abel Richardson farm, by Loammi Baldwin, Jr., 1835. The same situation of the channels is also shown on a much smaller scale in the plans of the town made for the first and second State maps of 1794 and 1832.

PLANS illustrating the present centre of Winchester, showing the past position of the streams and main road. The first two are loaned through the courtesy of Mr. Arthur E. Whitney, as they illustrate the history of his mill privilege, and were copied by his direction for that purpose.

1. Plan of the Abel Richardson Farm, Woburn, owned by S. S. Richardson, contains 39 acres. Surveyed and drawn by L. Baldwin, Jr., October, 1835.

2. A second plan, undated, of the same spot, including Wedge Pond, drawn about 1863, shows the manner of entrance at that date of Horn Pond River into Wedge Pond, a former inlet into the outlet of Wedge Pond from Horn Pond outlet being at that time obliterated (see plan under 1); the channels of Aberjona River and of the streams easterly of the present roadway of Main Street being obscured by the height of water, which covers nearly as much territory as it does now.

3. A plan of Woburn, surveyed in "October and September," 1794, on the scale of 200 rods to one inch, by Samuel Thompson, surveyor, see *fac simile* in *Winch. Rec.*, ii. 286. This was the plan of the town made for the first State map of 1794.

4. Plan of the town of Woburn, on a scale of 100 rods to one inch, in compliance with a resolve of the Legislature passed on the 1st day of March, A. D. 1830. Surveyed by Bartholomew Richardson, 1831—see *fac simile* in *Winch. Rec.*, ii. 417. This was the plan of the town made for the second State map of 1832.

5. A road map by Samuel Thompson, Esq., of date about 1797, entitled, "Road to Woburn: plan of road, two routes (through Woburn); one from Charles Bridge (Boston) to Billerica line." The other route begins at the "Powder House" (in Somerville), and passes through present Arlington (the part formerly a part of Charlestown), the westerly parts of Winchester and Woburn, and into Burlington by present meeting house to Billerica line also. The distances are given in rods. The original is in possession of the Woburn Public Library—Thompson Plans.

6. A plan of Symmes Farm, 1705, by Joseph Burnap, surveyor. On this is the following inscription: "These plans contain Captain William Symmes's farm in Charlestown; his Bare Meadow; his marsh at Menotomy; and a parcel of swamp that joins the farm, now in the possession of John Francis, (also) the lines of Mrs. Mary Torrey's thirds of the several parcels of land as they were set off. . . . The marsh may be drawn too near the farm, yet it hath at Menotomy by old Mr. Fillebrown's and Mr. Nathaniel Cutter's. Finished 3d July, 1705. Joseph Burnap, surveyor." On the plan of the farm proper are shown such well-known landmarks as the river (Aberjona), the county road, road to Charlestown, county road to Cambridge, road to Mr. Gardner's, Mr. Gardner's corner, Mr. Gardner's farm, the upper end of Mistick Pond. The county road from Woburn Centre is seen crossing a part of this farm, from the junction of present Main and Washington Streets in Winchester to present Symmes's corner. The county road to Cambridge is seen branching off from this road at Symmes's corner in a way analogous to Grove Street, while the road to Charlestown crossing a plot called Mr. Symmes's swamp, continues on in the direction of Medford Village to Charlestown. The Bare Meadow plot would imply a connection with *Bare Hill*. The marsh at Menotomy, near old Mr. Fillebrown's and Nathaniel Cutter's, is, as implied in the inscription, at some distance from the farm, being located in present Arlington on the ancient Menotomy River or present Alewife Brook.⁶ The swamp that joined the farm,

⁶ Cf. *Winch. Rec.* i. 111, 208. The name was extant in 1706.

⁶ Cf. Cutter's *Cutter Family of New England*, 35, 376; Cutter's *Arlington*,

called in the plan Mr. Symmes's swamp, located below Symmes's corner in the direction of Medford—on the north of the highway to Medford or Charlestown from that point,—is the low ground denominated a part of the Halfway swamp in the description of the Woburn and Medford highway in 1660, being considered a part of the low tract called Halfway swamp covering a large part of the present centre of Winchester, as described in previous pages.

In 1640 the General Court, on petition of the town of Charlestown, granted, on May 13th, "two miles at their headline, provided it fall not within the bounds of Lynn Village," and they "build within two years"; in other words, lay the foundation of a new town, which was called Woburn. Another grant was made October 7th, in addition to the former, "of four miles square, to make a village"; 500 acres of this to be given to Mr. Thomas Coytemore. In these grants "Cambridge line" was not to be crossed, nor were the bounds to "come within a mile of Shawshin River." The "great swamp and pond" were to lie in common. This, according to the records, was intended "to accommodate such useful men as might settle and form a village for the improvement of such remote lands as are already laid out." Three thousand acres also were laid out at the head of the new grant, betwixt Cambridge line and Lynn bounds, "to remain as their upper land, to accommodate with farms there, such as they shall have occasion." Frothingham mentions the repeal of an existing law, providing that no immunity should be granted a new plantation, but we fail to find the verification of this statement in the published records of the General Court. This, if true, was evidently for the sake of affording this particular enterprise substantial encouragement on the part of the general government. Immunity was, however, granted to "Charlestown Village," afterwards Woburn, "for two years' exemption from public rates," on such stock as they had there "only."—*Cf. Frothingham's Charlestown*; vol. i. of the *Charlestown Records*, 41, 51-2; *Colony Records*, i. 290, 306, 329, 330.

The bounds between Charlestown and the Village, it was determined, should be from the "partition of the ponds" to the northwest corner of Mr. Cradock's farm (Mistick or Medford) and thence to that part of Lynn Village (since called Reading) that turns from Charlestown headline by a straight line; provided that this line should be half a mile from the lots in the nearest place. That the lands of the village bordering upon the Common may have "benefit of common" for milch and working-cattle. The village was to allow, also, so much land "as shall be taken in," more than the straight line; besides "the 3000 acres." Also that the place of the village meeting-house should be "above the head of the old bounds, near against Robert Cutler's." This agreement from the Charlestown records was assented to in part, but "afterwards denied." It was the action of the com-

mittee of thirteen, originally chosen to conduct the affair of establishing the bounds "betwixt Charlestown and the Village, and to appoint the place for the village."

The foregoing matter calls for a few words of—

EXPLANATION.—The "partition of the ponds." Mistick Pond, in its division or separation from the upper ponds, such as Wedge, Winter and Horn Ponds. This line was also the "head of the old bounds," and the line of division between Woburn and Charlestown till 1842. It was a little north of the Winchester and Arlington line (1850 to present time), a part of West Cambridge, now Arlington, being taken to form the town of Winchester.

Reading bounds. The line here turned at Charlestown headline, or uppermost bounds, and continued by a straight line, which is in part the bounds between Woburn and Reading to-day, across the present Wilmington, till five miles were accomplished in a north-westerly direction, and Andover line was reached. This line was to be located half a mile from the nearest lots, the space between being reserved as common land; and such land as should be taken in, more than the straight line allowed, should be added by the village to the common lands.

Robert Cutler's lot, near where the meeting-house was to be, being above the head of the old bounds, or the bounds before the new grants were made, would be near, and the meeting-house where the present Common is at Woburn Centre. This lot was a large one, just north of that spot, according to the map of the Waterfield grants of 1638. The present Common is included apparently in George Bunker's lot on that map. Bunker afterwards gave his lot, a very large one, to the town, and this gift was the origin of the town's title in part to the Common, to Meeting-house Hill and other lands adjacent. He was the person after whom Bunker's Hill on the Charlestown peninsula was named, and we think that Common street in Woburn should be changed to the name of Bunker street, in honor of this early benefactor. The phrase, moreover, that the location of the meeting-house should be "near against" Robert Cutler's lot, which it would certainly be in the position on the present Common, further confirms the idea that its location was intended to be on an adjacent lot, which lot, as we have shown, happened to be Bunker's lot, on which it was eventually built and stood till 1672. This site was also the choice of Sedgwick and his committee, and the spot where the meeting-house stood was also the location of the village of the town.

The matter of the Woburn line not coming within a mile of the Shawshin River in Billerica, is treated in the lately published history of that town, whose author infers that Woburn was eager to obtain for herself the tract between the line and the river; but his inferences, we think, were not those of the founders of the two settlements.

The "great swamp," mentioned in the early grant,

was the great Cedar Swamp in Wilmington; and the "pond" was Horn Pond. Both were to lie in common, or in other words, to be public property from the beginning.

The 3000 acres at the head of the new grant, so called, were located in Wilmington. This remote territory bore the name of "Nod," or the "Land of Nod," and though belonging to Charlestown, was under the jurisdiction of Woburn. Frothingham, *Hist. of C.*, under the subject of Woburn, gives a history of this tract, which was appropriately named, as it was neither remarkably fertile nor valuable.

Coytemore's grant of 500 acres was laid out against the Billerica line, and was eventually added by purchase to the Wymans' farm in the same locality, which, containing the same amount of land, was a source of agitation to the Wymans and their neighbors in Billerica; the Wymans being forced, from the nearness of their situation to that town, to pay dues for the maintenance of Billerica as well as for their own town of Woburn. Cf. Sewall's *Woburn*, 35, 36.

Cambridge line, which was "not to be crossed," embraced in 1640 the lines in the direction of Woburn of the present towns of Billerica, Bedford and Lexington.

Lynn Village of 1640 was soon called Reading, and, so far as the present bounds of Woburn are concerned, is the present Reading. The town of Wilmington, incorporated 1730, was formed of parts of Woburn and Reading. The former boundary line extended through it in a northwesterly direction, and about two-thirds of its territory was originally included in Woburn.

The position of Charlestown head-line. This was the limit of Charlestown's boundary, and her 3000 acres were located outside it. The position was determined by the fact that Charlestown's lines or bounds should extend eight miles into the country from the Charlestown meeting-house (1635), or eight miles into the country northwest-northerly, from their old meeting-house. This line was sometimes mentioned as the eight-mile line, and its termination showed the position of the head-line. This head-line, as thus determined, was at the limit of the two-mile grant; and to this the four-mile square grant was added; and 3000 acres additional were laid out at the head of that, adding another two miles to the six already granted. The head-line was an extension of the head-line of present Stoneham across the original territory of Woburn. The head or eight-mile line, however, came a little above or beyond the present centre village of Woburn, in passing across the town from east to west. It would include, therefore, all the lots shown on the map of the Waterfield lots; and the two-mile grant would with propriety be called Waterfield, and be the Waterfield of the fathers.

In the description of the bounds between Woburn and Lynn Village, now Reading (1644), they were to

begin at the little brook in Parley Meadow, where it begins to turn upward toward the northeast, and so (or thus) it says, to abut upon "Charlestown head-line;" and thence the line ran north and by west into the country (*Col. Rec.* ii. 75). The 3000 acres of land "out of the bounds of Woburn," i. e., at the northern extremity of the four-mile grant, were to begin (1650) "at the uttermost corner northerly next Reading line, and so to run southerly along two miles deep on the east side of Shawshin line, till the full extent of the 3000 acres be out."—*Charlestown Records*, i. 91; see also Sewall's *Woburn*, 28-30, where the agreement from those records, i. 90-91, is reproduced entire.

A. The two-mile grant of Waterfield.
B. The four-mile square grant.
C. The 3000 acres, or "Nod."
a-b. Charlestown head-line.
c-d. Original bounds. Two miles (2 M.): The two-miles boundary line of the 3000 acres grant.

FIG. 1. Woburn and its relation to Charlestown, from Osgood Carleton's map of Massachusetts, published by order of the General Court in 1801.—See *Mem. Hist. Boston*, in 8, 9. The section also shows the towns formerly a part of Charlestown. Medford, located in their midst, was never a part of Charlestown. The appearance was much the same in 1829. The change in the relation between Charlestown and Woburn boundaries occurred in 1842.

N. B. The upper number in each town is the distance from Boston, the lower the distance from the shire town.

In 1642 a committee of the General Court was appointed to take the length of Charlestown eight-mile line by exact measure and to set the bounds between the two villages, which were afterwards named Wo-

burn and Reading. See MISCELLANY. These facts all go to show its exact location, which is given on the accompanying map. (See Fig. 1).

In 1642, also, Governor Winthrop writes: "The village at the end of Charlestown bounds was called Woburn."¹

The heavy lines on this map of 1801, the earliest general map we have found, represent the two-mile grant and the four-mile square grant and the 3000 acres grant of 1640; also the position of Charlestown head-line, so called, in that year.

THE STORY AS TOLD IN THE FIRST VOLUME OF THE WOBURN RECORDS.—These records have already been published, and our citizens, therefore, have an idea of their nature and value. The volume contains an account of the early settlement of the town, and the facts there given illustrate our previous statements.

May 14, 1640. The "true record" of the proceedings of the committee "chosen by the church of Charlestown," for the erection of a church and town, now called the town of Woburn, commenced, their duty in establishing the church and town having been performed "by great labor." There is internal evidence in this paragraph that the original was written after the period to which it relates, or probably in 1642.

In 1640, also, was granted by the General Court, the "two miles of land square, to be added at the head-line of Charlestown, which accordingly was granted, and afterwards was increased to four miles square." The evidence of this paragraph would lead to the belief that the two-mile grant was included in, and a part of the four-mile square grant, based on the Charlestown head-line, which extended from the northerly bounds of present Stoneham head-line across Woburn to present Lexington line. See map (Fig. 1). We believe that the position taken in the map is right, for the following reasons:

The exact language of the record is this: Charlestown is granted their petition, that is, two miles

at their head-line, provided it fall not within the bounds of Lynn Village, and that they build within two years" (*Col. Rec.* i. 290). "Charlestown petition is granted them the proportion of four-miles square, with their former last grant, to make a village, whereof 500 acres is granted to Mr. Thomas Coytemore, to be set out by the Court, if the town and he cannot agree, in which they shall not cross Cambridge line, nor come within a mile of Shawshin River, and the great swamp and pond to lie in common" (*Col. Rec.* i. 306). The italics are ours. It will be noticed that the two-mile grant was *at* the Charlestown head-line; and that nothing is said about its being beyond or this side that line; also that the second grant was the proportion of four-miles square, "with their former last grant," making a grant of six miles (4+2) of land; and also that nothing is said in the record about the first grant being a "two-miles square" grant.

May 15, 1640, seven citizens of Charlestown, with an artist or surveyor, examined the land lying within the "two-miles square," whatever that meant, evidently the two-miles wide grant, where the village was afterwards located. We do not wish to appear wiser than the fathers, but there was evidently some confusion on this point of dimensions and bounds even in their day.

Sept. 6, 1640, Captain Sedgwick and others went to view the bounds between Lynn Village (Reading) and this town. Like Jacobites [Gen. 28: 11] when night drew on, laying themselves down to rest, they "were preserved by the good hand of God, with cheerful spirits, though the heavens poured down rain all night incessantly." On this occasion they were subjects of a "remarkable providence—never to be forgotten." Some of the company lying under the body of a great tree; it lying some distance from the earth; when the daylight appeared, no sooner was the last man come from under it—when it fell down, to their amazement; the company being forced to dig out their food, which was caught under it; the tree being "so ponderous," that all the strength they had could not remove it.

Sept. 30, 1640, the parties aforesaid met at Lynn, and remained there all night; and, on the next day, when accompanied by Lynn men to the "confines of their bounds," they endeavored to point out to those persons the divisional line between their "new town" (Reading) and "this." On Nov. 9 the discoverers were lost "in snow;" having gone to discover the land about the Shawshin River, the party, being lost, were forced to lie under the rocks, while the rain and snow did "bedew their rocky beds." Dec. 18, 1640, after certain details of municipal action, the first regular meeting of the company to accomplish the settlement was held, when Edward Johnson was chosen their recorder, and town orders were adopted; a day of fast was held on Dec. 22, at the house of one of their number, the wives of the members of the company also being present. Other meetings follow-

¹ *History New England* (ed. 1853), ii. 101 (volume paging). James Savage, the editor, in a note illustrating the text, gives a considerable account of Thomas Carter, the first minister, and the church. The same, ii. 310, contains a reference to Mr. Carter's abilities in a letter of 1642. On April 30, 1660, a committee was appointed to settle the "North and by West line" between "Reading lands and the lands of this town of Woburn." They agreed "to run five miles from the corner bounds at Parley Meadow, according to the order of Mr. George Cooke and Mr. John Oliver, to run the north and by west point;" accordingly the committee of both towns "run the five miles, want fifty poles;" which fifty poles were afterward "run out" by Captain Edward Johnson and others, "and so completed the five miles."—*Woburn Records*, i. 25.

For some time uncertainty appears to have existed as to the precise position of the bounds, and in 1665 John Sherman, a surveyor employed by the town, certified that he had measured the bounds of their grant of four miles square, and stated that he could not affirm that they had any more land in quantity than the circuit of "four miles square;" not accounting in it "the 3000 acres on the north side of Reading;" and a committee from the town had accordingly settled the bounds of Woburn on the sides of Ambover, Reading and Billerica.—*Woburn Records*, i. 31. The bounds with Charlestown had been settled on another occasion, after considerable delay (1650).

ed, and the details of the settlement were soon under way.¹

¹ A word in relation to these "town orders," so called. J. A. Doyle, M. A., in his *English Colonies in America* (New York, 1887), vol. iii. (ii. of the Puritan Colonies) p. 10, gives an account of the settlement of Woburn, under the general title "Creation of a Town," in which he has selected Woburn as an example. "The author of the Wonder-Working Providence," he says, "has left a minute account of the manner in which his own town, Woburn, came into being. A tract of four miles square was set off by the General Court, and vested in seven men on the understanding that they would build houses and create a town. To this end they were empowered to grant land to individuals. Sixty families were soon gathered together. The seven grantees were allowed to exercise a certain amount of choice, excluding all who were 'exorbitant and of a turbulent spirit, unfit for civil society.' Each inhabitant received two plots of land—one, the home lot of meadow in the neighborhood of the meeting-house; the other, of 'upland,' further off, to be cleared and tilled. Nearness to the meeting-house was held to enhance the value of a home lot, and those who were less favored in this matter received a larger share. The corporation, as represented by the seven trustees, acted as a landlord and received from the original settlers a rent of six pence per acre, and from those who came in afterwards a shilling. The town itself was not allowed to spring up according to the fancy of the inhabitants, but was methodically laid out in streets by the trustees."

This is the substance of the important articles of the "town orders," and Johnson's description of 1652 very properly and correctly stated by this Oxford writer. He continues:

"In this case civil union came before ecclesiastical. But before the trustees took any steps towards acting on their powers as a corporation, a minister was chosen, a meeting-house built at public cost, and a church formed under a covenant binding its members 'to walk together in the ordinance of the Gospel and in mutual love,' and 'to renounce all errors and schisms and by-ways contrary to the blessed rules revealed in the Gospel.' The seven trustees formed the nucleus of the church as of the township. But the two corporations were distinct. The church never professed to be co-extensive with the town, but only received from time to time such citizens as of free choice attached themselves to it."

The "town orders," without the preamble, were as follows:

[May 13, 1640. First order. For sixpence an acre.] "For the carrying on common charges, all such persons as shall be thought meet to have land and admittance for inhabitants, shall pay for every acre of land formerly laid out by Charlestown, but now in the limits of Woburn, sixpence; and for all hereafter laid out, twelpence."

[Second order. To return their lots if not improved in 15 months.] "Every person taking lot or land in the said town shall, within fifteen months after the laying out of the same, build for dwelling thereon, and improve the said land, by planting, either in part or in whole, or surrender the same up to the town again; also they shall not make sale of it to any person but such as the town shall approve of."

[Third order. About fencing.] "That all manner of persons shall fence their cattle of all sorts either by fence or keeper; only it is required all garden plots and orchards shall be well enclosed, either by pale or otherwise."

[Fourth order. About inmates.] "That no manner of person shall entertain inmate, either married or other, for longer time than three days, without the consent of four of the selectmen; every person offending in this particular shall pay to the use of the town for every day they offend herein, sixpence."

[Fifth order. About timber.] "That no person shall fell or cut any young oak like to be good timber under eight inches square upon forfeiture of five shillings for every such offence."

[These persons subscribed to these orders.] "Edward Johnson, Edward Converse, John Monson, Ezekiel Richardson, Samuel Richardson, Thomas Richardson, William Larned, James Thompson, John Wright, Michael Bacon, John Sears, John Wymen, Francis Wymen, Benjamin Butterfield, Henry Jettis, James Parker, Mr. Thomas Graves, Nicholas Davis, Nicholas Francis, John Carter, James Converse, Daniel Bacon, Edward Winn, Henry Baldwin, Francis Kendall, John Todd, Henry Tottingham, Richard Lowden, William Green, John Russell, James Britton, Thomas Cullen."

NOTE.—Of the 32 subscribers to the town orders of Woburn, 1640, twenty-seven had died before 1700.—Two died in 1700—Richard Lowden, at Charlestown, in his 88th year, and Henry Jettis, at Billerica, aged about 55—and three survived that year. One of the latter, James Parker,

Between 1640 and 1642 the following public works were accomplished by the community: Feb. 10, 1641 [1640-41], the first bridge was laid over Aberjona River, at a spot "over against" Edward Converse's house: This bridge was called Cold Bridge, and its location was at the present Winchester Centre. Feb.

died at Groton, in 1701, aged 83; another Francis Kendall, died at Woburn, 1708, aged 88; and the last survivor, James Converse, died at Woburn, 1715, "in the 95th year of his age," according to the record upon his gravestone still standing in our first burying-ground.

A striking connection of the period of 1640 with the present is made through the person of a lineal descendant of the last named—the centenarian, Joshua Converse, of Woburn. The latter individual was born in Woburn in 1767, and died in his native town in the year 1868, aged 101 years and 16 days. A brother of his, Jesse, died in 1864, when he lacked but a few months of being 100 years old. By means of the lifetime of an individual who knew both Joshua Converse and his ancestor, James Converse, the last survivor of the subscribers of 1640, a connection may be formed through three or four persons between that period and the present. When the modern centenarian, Joshua Converse, had attained the age of twenty-four years, Mrs. Rebecca Russell, a granddaughter of Francis Kendall, died in Woburn (1791) aged 96½ years—the records say 99 years, and another authority "about 98 years." She was 20 years old in 1715, the year when James Converse died, and 13 years old in 1708, the year when her grandfather, Francis Kendall, the next longest survivor of the subscribers to the original orders, died. She, therefore, was old enough to have known both these men well, and to have heard intelligently the story of the original settlement of Woburn from their lips. She also could have received an account from them, had she asked, of the personal appearance of Captain Edward Johnson, and the other leading worthies who took part in the first settlement, and this she could have communicated in her old age, had he wished, to Joshua Converse, and he, had opportunity occurred, could have communicated the facts of such interesting nature, to some of us. But the connection, such as we have mentioned, was never known to have taken place, and the opportunity is now forever lost!

Another person, a grandson of John Carter, one of the subscribers to the town orders of 1640, died in Woburn in 1787, aged 92, or 96 according to the records—the year when Joshua Converse was twenty years old. This was Samuel Carter, generally known as Captain Samuel Carter, and who, residing on the Winchester Hills in the westerly part of the town, was a comparatively near neighbor of James Converse, the last survivor of the subscribers of 1640. As he belonged to a family of considerable prominence in this vicinity, he must have been well known to Joshua Converse, and from the nearness of the neighborhood an intimate acquaintance of the veteran, James Converse, who died in 1715, when the above said Samuel Carter was 20 years old.

The same remarks made in the other case apply to this. But the opportunity is lost.

After 1774, when Joshua Converse was seven years old, no less than 70 persons died in Woburn who were alive in 1715, the year when James Converse died. Of this number more than a dozen had reached their majority in that year. Many of the latter died at a great age. Four of them, containing the names of two of the oldest, do not bear the long-standing Woburn names, and died here during the war of the Revolution, being probably brought here from other places during that period. What traditional information these persons might have imparted is probably now all lost or scattered, and this less magnifies the importance of the publication of the records.

A final curious instance of longevity in the person of one who was alive apparently in 1715, but too young then to have known the elder Converse intelligently, may be cited in the case of Prince Walker, a black man, who died at the almshouse in Woburn, in 1825, at the age of 115 years. His birth is not discovered on the records, but the fact that he was thrown on the town of Woburn for support in his latter days, shows that he originated in Woburn and was probably a native of the town. He had been a slave of the Rev. Timothy Walker at Concord, N. H., and having obtained his freedom about 1784 went to Andover, Mass., to live, and eventually returned to Woburn again. That he was interviewed by the local antiquaries is evident from the fact that one of them, the late Colonel Leonard Thompson, was told by him, that he (Prince) remembered the Rev. Edward Jackson (of Woburn, 1723-1754) hearing him repeat the catechism. [See *Woburn Journal*, June 13, 1884, and *Hist. of Woburn*, p. 518.]

16, following, there was more laying of bridges, forty persons coming to the place where the new village had been located on the Feb. 8, previous. These persons spent their time in marking trees and laying bridges, but with many of them—"the way being so plain backward—divers never went forward again." On Feb. 8 a place for the village had been selected "on the east end of the land" granted to the town. This had been accomplished after a two days' search. The decision was the selection of a majority, but not a unanimous choice; on the 10th the laying out was finished. Two of the principal men, Sedgwick and Johnson, were evidently opposed to the site. On Feb. 29 a committee, by Charlestown appointed, consisting of Nowell, Sedgwick and others, advised "to remove the house-lots and place for the meeting-house" to the place where the village has been ever since. March 6, 1641 [1640-41], lots were first laid out in the place thus appointed, or at the present centre village; and on May 13, 1641, more lots were laid out.

In August, 1641, while things were "going heavily on," and many obstacles were in the way, on the 26th inst., a bridge, called Long Bridge, was made over Horn Pond River; and in spite of the boggy condition, and the absorption of much wood before it could be made passable, it was finished and named, as above said. The location of this bridge has been a matter of controversy [Winchester Record, ii. 426, iii. 16]; but it may reasonably be supposed to have been at Winchester, near Cutters' Village, where a bridge existed previously to 1660, crossed by a highway in use in 1646, if not before 1641.

FIRST SERMONS.—On November 21, 1641, the Rev. Zachariah Symmes, of Charlestown, preached his first sermon—if not the first sermon—at this town, from Jer. 4: 3. Mr. Carter, first minister, preached his first sermon in Woburn, December 4, 1641, from Gen. 22: encouraging to trust in the Lord for the means.

OTHER EVENTS.—On March, 1, 1642 [1641-42], the minister's house begun by the people—"means very weak." The church was gathered August 14, 1642, and on November 22, following, the first minister was ordained. [The precise time when the first meeting-house was built, has not been transmitted; the probability is that it was finished about the time of Rev. Thomas Carter's ordination in 1642.—Sewall's Woburn, 77.]

After this period the entries are of the nature of a regular town record.

INCORPORATION.—The town was incorporated September 27, 1642.¹

Two remarkable events, exciting public interest, occurred at this period.

manus of the General Court. The error in the date assigned for the incorporation of the town was noticed by Frothingham, *Hist. C.*, 1846, p. 167. He gets nearer to the truth, but gives the wrong date, or September 8, 1642. Poole, *W. W. Prov.*, introd. xci. 1868, corrects the date, referring, as does Sewall, *Hist. Wob.*, 1868, p. 23, to the *Udony Records*, Bost., 1853, ii. 28. There is no reference to the date of incorporation in the early Woburn records.

Description of Woburn in 1652, by Captain Edward Johnson. From his *Wonder-working Providence* (Lond., 1654). Ten years had now elapsed since the incorporation. "The situation of this town is in the highest part of the yet peopled land; near upon the head springs of many considerable rivers or their branches, as the first rise of Ipswich River and the rise of the Shawshin River, one of the most considerable branches of the Merrimac, as also the first rise of Mistick River and Ponds. It is very full of pleasant springs and great variety of very good water, which the summer's heat causeth to be more cooler, and the winter's cold maketh more warmer. Their meadows are not large, but be in divers places to particular dwellings, the like doth their springs. Their land is very fruitful in many places, although they have no great quantity of plain land in any one place, yet doth their rocks and swamps yield very good food for cattle; as also they have must and tar for shipping, but the distance of place by land causeth them, as yet, to be unprofitable. They have great store of iron ore. Their meeting-house stands in a small plain where four streets meet. The people are very laborious, if not exceeding, some of them."—*W. W. Prov.*, quoted in Sewall's Woburn, 32-35.

Again, "this town, as all others, had its bounds fixed by the General Court to the contents of four miles square, beginning at the end of Charlestown bounds."—*Ibid.* The balance is abridged. The grant was to seven men, having power to grant lands to dwellers in the precinct without respect to persons. Such as were unfit, they rejected. The seven ordered and disposed of the streets. Those nearest the place for Sabbath assembly had a lesser quantity of land at home, and more further off for corn. Men were not refused for their poverty, but were aided, when poor, in building their houses and in the distribution of land, according to the ability of their helpers. The poorest had six or seven acres of meadow and twenty-five of upland or about. "Thus was this town peopled to the number of sixty families." Not till they came to hopes of a competent number to maintain a minister, did they establish themselves as a separate community: "it being as unnatural for a right New England man to live without an able ministry, as for a smith to work his iron without a fire."

"Not rashly running together, to gather themselves into a church, before they had hopes of attaining an officer to preach the word."

The people having provided a dwelling, built at the charge of the town, welcomed their minister with joy. By 1652 the church had increased from seven (1642) to seventy-four.

Description of Woburn in the year 1660. From Samuel Maverick's *Description of New England* (1660). "Woburn," says this writer, "is four or five miles above Malden, west," and is a "more considerable town," where "they live by furnishing the sea towns with provisions," such as "corn and flesh," and also "furnish the merchants with such goods to be exported." Item extracted from an official report to the British government, on the condition and resources of all the New England towns in 1660. The distance of the village from Malden is not correctly stated, while the direction is given more accurately. The particulars as to its size, and the principal occupation of its inhabitants may be better relied upon. The impression given is that of a prospering and enterprising agricultural town; furnishing the "sea towns," or the home market, with fresh provisions, and raising also a sufficient quantity for exportation. A spirit of thrift evidently prevailed, and since the statements are derived from a source unfriendly to the principles of the puritan settlers, they are probably devoid of exaggeration. A phrase of Captain Edward Johnson's, at this period, was an allusion to early New England as a wilderness, and he brings in various changes of this sentiment, such as "may it please this honorable court to vouchsafe some help to our town of Woburn in dividing a lump of this wilderness earth;" "Helping on in this wilderness work;" "this vast wilderness;" the "wilderness condition," etc.; but the descriptions of the state of the town in 1652 and 1660 show that a reasonable growth, had occurred, and that the "wilderness condition" was in a fair way of being appropriated to the advantage of the settlers and that its original rigors had sensibly diminished.

¹ Note on the incorporation of the town. On September 27, 1642, Charlestown Village was called Woburn—*Ctbl. Rec.* ii. 28. The date was September 27, O.S., or October 7, 1642, N.S., or according to the present style of reckoning. Sewall, by mistake, p. 23, gives this last date, October 6th. Chickering, *Diss.*, 1809, p. 1, gives the original date wrong (May 18, 1642), the manuscript records not being so clear on the subject, as the more recent printed ones. Sewall, *Amer. Quar. Rep.*, 1839, xi. 187, perpetuates the error, and it was continued till 1888, in the

I. THE PETITION OF THE CHURCH AND TOWN OF WOBURN, 1653, ENTITLED THE MEMORIAL FOR CHRISTIAN LIBERTY.—The petition to the General Court, dated Woburn, August 30, 1653, and signed by twenty-nine persons, and called by antiquaries the "Woburn memorial for Christian liberty," appeared in print in 1825—see *Massachusetts Historical Society Collections*, 3d ser. i. 38, reprinted in 1846. No allusion to this is made by the town historian, and the document is remarkable now, mainly for the display of courage it evinced on the part of a number of the early citizens in taking a stand, contrary to current opinion, on a question of little, if any, present consequence. The question had reference to the privilege of a lay brother to conduct public religious services in the absence of a regular minister, a privilege pertaining to the sparsely-settled districts of the country, where the services of a regular minister were with difficulty secured; the petitioners sensibly pleading that if such "as exercise at such beginnings," be brethren approved by the church of which they were members, and which best knew "their abilities," that there was no practical difficulty in the case. The petition is lengthy, and the subject one of greater interest to the fathers than to the present generation. It shows, however, that a courageous disposition prevailed in the young town towards independency in religious, as well as in secular concerns. The petition was the production probably of John Russell, afterwards a lay preacher or elder among the Baptists.

The petition begins: "We, the humble petitioners of the church and town of Woburn, with such whose names are underwrit [ten], do show," etc. The signers' names, alphabetically arranged, are as follows: Daniel Bacon, James Britton, Thomas Chamberlain, Allen Converse, James Converse, Josiah Converse, George Farley or Farlow, Thomas Fuller, Ralph Hill, Francis Kendall, John Knight, Joseph Knight, Isaac Learned, John Munsall, Miles Nutt, Abraham Parker, James Parker, John Parker, Bartholomew Pearson, John Pierce, Robert Pierce, John Russell, John Seers, Richard Snow, James Thompson, Simon Thompson, John Tidd, Henry Tottingham, John Wyman. Some of these names were of persons who settled at Chelmsford, about 1653, and the petition might have had reference to the plan they desired to adopt there, regarding religious ordinances.

These persons have been called the "bold petitioners for liberty of prophecy." Scientifically stated the position was this: August 30, 1653, "Woburn inhabitants and church members petition the General Court in relation to an order, 'that no person within this jurisdiction shall undertake any course of public preaching or prophesying without the approbation of the elders of four of the next churches, or of the county court.'" (*Cf. Savage, Gen. Dict., 2d chron. table, Mass. Hist. Soc. Coll., 3d ser., x. 253*). The petition was unsuccessful.

NOTE.—Mr Sewall, *Hist. Woburn*, chap. v., gives an account of the early Baptists in Woburn. The date he assigns for their appearance is 1671. The principles enunciated in the petition above would show that their views had weight in 1653. The denial of the petition probably fostered the troubles which later arose regarding the citizens who became Baptists, and may account for some of the "troubles" in the Woburn Church, alluded to at that period by contemporaries. The early records of the church are lost to posterity. A remembrance also of the difficulty experienced in procuring their first minister, might have influenced some who signed the petition. There were two John Russells, a senior and junior. They are confounded by some writers. Both were Baptist elders, and the junior a pastor of the Boston Baptist Church.—Sewall's *Woburn*, 158-61; *Mass. Hist. Coll., 3d ser., i. 44*, note. Palfrey's *Hist. N. E.*, iii. 94, refers to the controversy with the Baptists, about 1670, and mentions John Russell, of Woburn, where there were five Baptist brethren near, that could meet with him, "a first days," when they could not attend the regular meetings at Noddle's Island, or Boston; more converts at Woburn then were expected to join them. "The new Woburn church, it seems, had its share of threats and vexations, but still not of the most aggravated kind." This so-called "persecuting spirit" was, as this writer justly observes (*ibid.* 92), a "pet prejudice" of the age, and the sect were not long in living down their ill-repute. Another matter in connection with this controversy was this: John Russell, the preacher, being a shoemaker, Samuel Willard, a distinguished minister of the day, wrote a tract, entitled, "No Sutor ultra crepidam."—Let not the shoemaker go beyond his last. Referring to the estimation he placed upon the performances of such a man as a preacher and expounder of doctrines.—Palfrey, iii. 92; Sibley, *Harv. Grad.* ii. 17; Frothingham, *Hist. of C.*, 172.

Among the events of the year 1653, Captain Edward Johnson's *Wonder-working Providence* was in the course of publication at London. Nathaniel Ward, a distinguished minister, from whose writings a preface to the Woburn town orders was adapted, died.

2. EDWARD CONVERSE AND HIS TROUBLE CONCERNING THE KING'S LETTER, 1662. In other words, "Edward Converse acquitted of disrespect to the King." A tempest in a tea-pot of other days (*Cf. Mass. Col. Rec., iv. (ii.) 72-74*; also Palfrey, *Hist. N. E.*, ii. 531; Frothingham, *Hist. of C.*, 155.)

A constable and a selectman of Woburn were presented for having refused to "publish the king's majesty's letter," and "spoken of said letter to be popery, etc.;" but the court did not find sufficient evidence for their conviction.

May 27, 1663, act of the Council, the secretary made his return of what he had done, in obedience to order, Boston, March 5, 1662. Several informations being given that Isaac Cole, constable of Woburn, "had refused to take and publish the king's majesty's letter, and also to serve attachments in his majesty's name, and that some one of the selectmen is informed to have spoken of said letter to be popery, etc., the council judgeth it meet to order that the secretary send forth his warrants by order of this council to convene the accuser and witnesses before him, and, on due evidence, to send for the accused, binding the accuser to prosecute, and the accused to answer for his high misdemeanors to the next General Court, taking security for the same."

Dutton complaint against Isaac Cole. Warrants issued March 12, 1662, and on March 19th, Thomas Dutton, as accuser, was bound, and Isaac Cole, constable, and Edward Converse, one of the selectmen, as accused, were respectively bound to prosecute and make answers, as the order above directs. The warrants and bonds were on file at the time the

parties appeared before the General Court, who "having heard what Thomas Dutton could say in way of accusation against the said Isaac Cole, constable of Woburn, for his refusing to take and read his majesty's letter and serve attachments, and considering of the evidences produced, which are on file, ordered as underwrit, etc."

Idem against Edward Converse. The court having considered what the said Dutton could say against Edward Converse, etc., it was put to the question, "whether there be anything contained in the testimonies of Thomas Dutton and William Simonds against Edward Converse which doth reflect on his majesty's letter." It was resolved in the negative.

The court granted the said Thomas Dutton his bill of costs (sixteen shillings) to be paid by the treasurer of the country, and also ordered that Isaac Cole be dismissed home at present till the court ordered his appearance again.

NOTE. Frothingham says, "Some feeling was manifested at Woburn on reading this letter. Isaac Cole refused to read it, and Edward Converse openly declared," etc. The letter was read in the town-meetings.

Thomas Dutton was a party in a difference between Captain Edward Johnson, Ensign John Carter and himself, 1658-59, about land. The case was decided against him, and he was subjected to the payment of money; and for "clamorous abuse" of Ensign John Carter, was required to make public acknowledgment in a full meeting on the Lord's day, that he had "wrongfully abused said Carter." In default, he was to pay 40 shillings. *Col. Rec.* iv. (i.) 353, 373, 497-8.

There is also in the records above cited the following reference to Captain Edward Johnson in connection with His Majesty's letter.

Committee about His Majesty's letter. The court on long and serious debate of what is necessary to be done in reference to His Majesty's letter, and there having been much time already expended thereabouts, the court intending to break up speedily, in answer to His Majesty's pleasure, for the satisfaction of all persons concerned, ordered that certain gentlemen, including Captain Edward Johnson, be a committee to consider said letter, and prepare an answer to be presented at the next session of the court.

CONTRIBUTION FROM IRELAND IN 1676.—In 1676 the Massachusetts Colony received from Ireland a contribution in aid of the sufferers by the Indian war. This was named the "Irish Charity," and was distributed through the towns in proportion to their losses. In a list taken January 22, 1676-77, Woburn is named as a recipient from this benefaction of £6 9s., to be distributed among eight families numbering forty-three persons. *Cf. Frothingham's Charlestown*, 180.

GREAT COMET OF 1680.—"The middle of December, 1680, appeared a very great blazing star, to the wonder of the world."—*Woburn Records*, i. 105. This was the great comet of 1680, commonly called Newton's comet, the most remarkable for brilliancy, probably, of any of which there is accurate account. It is described by Increase Mather, of Boston, *Discourse concerning comets, wherein the nature of blazing stars is enquired into* (Bost., 1683). Its first appearance was on the evening of December 10th, when the blaze only, and not the star, was visible. On December 12th the blaze was red and fiery. Its head was discerned December 14th. On December 16th its appearance was "terrible," and the blaze ascended

above sixty degrees, "almost to its zenith." It grew continually broader from its head, was brightest at both ends, and the middle was considerably darker than "either of the sides." It became smaller soon afterwards, and about the middle of February vanished "out of sight." *Cf. Mem. Hist. Boston*, iv. 491, for mention of I. Mather's researches on comets.

MISCELLANY.—An examination of the Colony records reveals some facts of special interest concerning Woburn. For instance, in 1636 the churches gathered were placed during the initial ceremony under the control of the magistrates, which accounts for the presence of Increase Nowell, magistrate, as the presiding officer when that ceremony was first performed at Woburn, 1642. Early in the founding of the Colony cavalry corps were encouraged by a rebate on taxes, etc.; the town was well represented in that arm then and afterwards. On June 14, 1642, legislation of a minor character occurred on account of Woburn. A committee on the "difference" between Charlestown Village and Lynn Village was appointed to view the place, and to take the length of Charlestown eight-mile line by exact measure, also to set the bounds between those two villages. Our village is mentioned in connection with the grant of Shawshin (or Billerica) to Cambridge. On September 27, 1642, the town was incorporated (ii. 28). On May 10, 1643, Edward Converse, Ezekiel Richardson and others were appointed to lay out the highway from Cambridge to Woburn. A "partition agreement" was made between Woburn and Lynn Village (called Reading) on May 29, 1644, the line to begin at the "little brook in Parley Meadow," and extend north-westerly into the country (ii. 75). In 1659 the town was regarded by the General Court as somewhat "remote" (iv., pt. i. 382). In the same year the answer of the court was given to the petition of three Carters—Thomas, Joseph and Samuel—in relation to the orphans of William Green (iv., pt. i. 404), action having been taken at earlier date (1653) on the petition of Mary Carter and that of the brothers, Thomas, Samuel and Joseph, her sons, relative to her grandchildren's inheritance (iii. 329). In 1664, at the beginning of the troubles with the home government about their charter, which the colonists resisted as infringements on their liberties, a manifesto to the General Court, from Woburn and other towns, subscribed by "very many hands," was received and noted. This was a testimonial of the people, signifying their "content and satisfaction" in the "present government," and offering the services of the towns in assisting and encouraging it. In 1664, in answer to petition, 2000 acres of land were granted to Woburn¹. From 1666 to 1668 the difficulties respecting

¹ In the State Archives, vol. 5, p. 6, is a plan of these 2000 acres granted to Woburn, entitled, "This plan contains 2000 acres laid out for the town of Woburn, lying about N. by W. from Lancaster, joining to the North corner of Nashaway new grant, *Lucasperiodook* Pond excluded. Being about eight or nine miles from Lancaster town. Taken by Joseph Burnap, surveyor, May 23, 1717."

the Woburn and Billerica bounds were adjusted, and those respecting the two Wymans' farms near the Billerica line; also the long standing grant of 500 acres to Thomas Coytemore or his heirs, in Woburn, was adjudicated and located at the farm of the two Wymans—Francis and John—near the Billerica line, in Woburn bounds, and next adjoining their land, "where their houses stand." Much concerning the two Wymans and their farm and troubles on its account is found, *Col. Rec.*, iv. pt. ii. Cf. Hazen's *Billerica*, Sewall's *Woburn*, 36. In 1667 an order was passed by the General Court about Woburn's common lands. An investigation having revealed some disorder touching the manner of keeping their records, the entries in their town-book concerning the common lands not being clearly expressed, the court confirmed the grants already made and settled the matter. In 1672 the Mistick Bridge question appeared. Previously, in 1662, in a case between the artillery company of Suffolk, plaintiff, and Michael Bacon and William Simonds, both of Woburn, defendants, in an action of trespass on land of the said artillery, the court found for the defendants, costs of court. See *Genealogical Sketch of William Simonds*, by E. F. Johnson, p. 14. In 1684 Israel Reed, desiring the favor of the General Court to grant him a license to keep an ordinary or inn in Woburn, in answer to his petition the license was refused, the number appointed already being considered sufficient (v. 460).

A list of all the heads of families in Woburn in 1680 is preserved in the records (ii. 153-54). The names are grouped under their respective tithingmen (cf. i. 108). The list was printed in connection with the publication of the first volume of records in the *Woburn Journal*. Cf. Sewall's "*Woburn*," 49, note; *Winchester Record*, i. 276-77. The leading names are Richardson (with six families); Carter, Converse, Pierce, Snow and Walker (four families each); and Brooks, Johnson, Reed, Simonds, and Winn (three families each). Further are Cleveland, Green, Hamlet, Houghton, Kendall, Knight, Polly, Wilson, Wright, and Wyman (two families each); and Bacon, Baker, Baldwin, Blodget, Brush, Buck, Burbeen, Butters, Clarke, Cragin, Dean, Farrar, Flagg, Fowle, Fox, Glazier, Hall, Henshaw, Jaquith, Lepingwell, Locke, Monsall, Rice, Roberts, Sawyer, Seers, Stevens, Summers, Thompson, Tidd, and Waters (one family each); the number of families in all being ninety-two. This number shows an increase in 1680, over the number of sixty families reported in 1652. A rough enumeration by families comprises all the statistics of population we have of that early period.

The northerly side of the grant measured one mile, sixteen poles; the easterly side two miles, twenty-eight poles, and one length on the westerly side was one mile, 212 poles. The name of the pond on the map itself is spelled "Unchehewoluk Pond." The proper spelling of this name would appear to be *Unchehewoluk*. Cf. *Early Records of Lancaster*, index; and this pond is now in the limits of Lunenburg.

The increase of the names in the tax rates and the number of men enrolled for military service show a corresponding growth in the town; but the actual population can only be guessed at. The grouping of the families under the names of their respective tithingmen also conveys an idea of the locality of their residence, so that it can be readily determined whether they lived in Winchester, or Woburn, or Wilmington, or Burlington. For this feature our readers are referred to the list as printed in the *Woburn Journal* (Woburn Records, i. 108, note).

The births exceeding the number of deaths would also, to some extent, show the rate of increase. The number of births recorded in Woburn from 1641-1701 was 1313; and the number of deaths recorded for the same period (1642-1701) was 340. The effects of immigration and emigration during the same period on the town itself were probably small, in view of the main cause of the growth of population being the large birth-rate, and the small death-rate above mentioned. It is known that the birth-rate is high in new countries, owing to the large proportion of young men there, and an unusually large number of the women there being young also, or of the child-bearing age. Old people being the exception in such communities. Sewall (*Hist. Wob.* 241) has undertaken to show that the rate-payers of 1700 were only 187, against 305 in 1725. He also shows that in 1708 Woburn was the fourth town in Middlesex County in the point of numbers and wealth. Charlestown, Cambridge and Watertown exceeded her, and Concord and Medford were behind her. The number of her polls in that year was 225, and her real estate was estimated at £22 8s. 3d.

Occurrences before 1700.—The captain of a military company at Charlestown was ordered (Aug. 22, 1686) to impress twelve men from the two companies of that town "to appear at Woburn," at noon, "the 28th." There was trouble at that time with the Indians. About this period a farmer of Woburn was called to an account by the authorities for his wife's extravagance in dress,—the powers that be having vainly endeavored to suppress the love of dress inherent to the female sex. This honest farmer answered, "That he thought it no sin for his wife to wear a silk hood and silk neck [? neckerchief]; and he desired to see an example before him!" Frothingham, *Hist. of C.*, 226. The anecdote is given by Frothingham, *ib.* 210, who refers to Rev. Samuel Sewall as his authority for it.

The First Church Records of Roxbury [*N. E. Hist. Gen. Reg.* xxxiv. 301; rept. in 6th *Bost. Rec. Comr.'s Rept.*], kept by Rev. S. Danforth, mention "a sad accident at Woburn" about Nov., 1670, where three men who were digging a well were met by a calamity in the earth's caving in, and burying two of them alive; the third hardly escaping the same fate. This one was dug out; his head fortunately not being covered with earth. Under date of Sept. 8, 1671, this

statement was entered in the same records: "An Indian executed and hung up in chains for murdering an English maid at Woburn." Fixing the year of a murder, which is described in Sewall's *Woburn*, 120, being one not committed in a time of war, as was usually the case. The diary of Samuel Sewall, of Boston, mentions a few items, such as, there being a considerable quantity of snow, a warm rain swelled the waters, so that Woburn and other places suffered by the damage done, Feb. 9, 1682-3. There is a maid at Woburn possessed by an evil spirit, Jan. 21, 1685-6, a rumor. The Woburn church is "under much disquiet," another rumor, Aug. 19, 1687. One year afterwards, Aug. 19, 1688, the lieut.-gov. "goes" to Woburn to secure some Indians engaged in gathering hops. This severe measure was caused by the news of the slaying of five English persons by Indians at the westward. Before their arrest, it appears that these Woburn savages had met together for religious worship, and were "praying" when secured, or shortly before. Dr. Increase Mather, *History King Philip's War*, ed. 1862, 160, relates an incident occurring at Woburn, which he regards as a solemn providence upon certain people for holding opinions partial to the sentiments of the Baptists, if such opinions were not influential among the causes which brought on that war as a judgment upon them for that sin. The incident he relates was the birth of a child, accounted a monstrosity, to the wife of Joseph Wright, at Woburn, Feb. 23, 1670, which was born without a breast and back-bone, and with other serious deformities of body, the head and shoulders being natural. The event occasioned some excitement, and a description was testified to, before Deputy-Gov. Francis Willoughby, on March 2d following, by a number of persons belonging to Woburn, all of whom had seen the child. These were Mrs. Johnson, the mid-wife, Mary Kendall, Ruth Blodgett, Lydia Kendall, Capt. Edward Johnson, Lieut. John Carter, Henry Brooks, James Thompson and Isaac Cole. This misfortune to some apparently worthy people, Mather believed, "bore witness" against the "disorders of some in that place," meaning Woburn, and the activity of those who had imbibed the principles of the Baptist sect, of which there were several in the town, including the Wrights. This theory was imparted to Mather's editor by the Rev. S. Sewall, the historian of Woburn, and Wright had been presented by the grand jury to the court, with others, Dec., 1671, for his connection with the practices of the Baptists. The wife of Joseph Wright was Elizabeth Hassell, and though a married woman with a husband living, and apparently well able to support her, she taught school in Woburn in 1673. One of her eleven children was Sarah, born Feb. 25, 1669-70, according to the Woburn records, and of this child we find no further date, and it appears to be the one referred to by Mather. The father, Joseph Wright, afterwards became reconciled to the tenets

of the Woburn First Church, of which he was a deacon, 1698-1724, and signer of a declaration of principles by that church, 1703. He was a selectman, a soldier in Philip's War, a lieutenant of the militia, 1693-1700, and held other offices. *Woburn Journal*, Jan. 12, Feb. 16, 1883; *Savage's Gen. Dict.* iv. 658; Sewall's *Woburn*, 151-56, 175; *N. E. Hist. Gen. Reg.* xxxvii. 76-7; also Mather's *Hist. Philip's War*, 160, already cited.

The accident to Samuel Converse, son of Edward Converse, who was killed by the water-wheel of his father's mill, February 20, 1669-70, was an event the mention of which was omitted in the local records, but a full account is found in the Middlesex Court Records, file 20, 1670, No. 3, in the "verdict on his death." Two persons—Isaac Brooks and James Thompson—being in the corn-mill belonging to the Converses at Woburn, on a sudden heard a voice at the mill-wheel, saying, "Stop the wheel." Thompson ran to the mill-gate, and looking towards the wheel, saw, as he thought, a man thrown down; and being related to the victim of the accident, cried out, "My uncle is killed!" Brooks also, in the meantime, ran to the water-wheel, and found Samuel Converse, the victim, with his head fastened between the water-wheel and the water-wall. Thompson having shut the gate, came running to the said Brooks, and the wheel being turned backwards was raised upwards sufficiently to release his head. The two then took him up alive, but bleeding excessively, and carried him into his house, where, soon after he was brought in, his bleeding stopped; but in about half an hour, as his bearers conceived, he was dead.

The verdict of the jury of quest on his death calls him by the title of Sergeant, and speaks of his "sudden and untimely death," and conceives that he was cutting some ice off the water-wheel of the corn-mill, and overreaching with his axe, was caught by his coat in some part of the wheel, and the coat being rent to the collar and that not giving way, his head was drawn down until it was sucked in between the water-wall and the water-wheel. In all probability, decides the jury, he received his mortal wound soon after he spoke to stop the wheel. They saw much blood in the place where he was thought to stand, and there was blood upon the snow from the place to the house where he was carried alive. Being set in a chair his blood quickly settled within him, and wholly prevented him from speaking, and in about half an hour he was dead. The jury found the back-side of his head greatly bruised, and the gristle of his nose broken, as they conceived, and the "said Converse, his head lying as before expressed," they judged came to his death by means of the "water-wheel of the corn-mill" (verdict dated February 22, 1669-70). See article by the discoverer of this item, Arthur E. Whitney, in the *Winchester Record*, i. 257-259. For genealogy of Samuel Converse's descend-

ants, see Hill's *Family Record of J. W. and E. S. Converse* (1887), 95-177.

NOTE. The first volume of the town records being in print, it is thought best to omit making any special extracts in illustration of further topics from them. The original entries are more full and explicit than any abstract we might make from them. Before leaving them, however, we would like to refer to the second recorder or clerk of the town, William Johnson. He was the son of Captain Edward Johnson, and a faithful town officer. His career as such may be carefully traced in the records. He was a prominent military officer, and these features are noticed more particularly under *MILITARY HISTORY*. He was noted for his zeal for the old charter, or order of things in New England, in opposition to the changes brought about by the administration introduced by Sir Edmund Andros. His course in that matter was attended by some danger. On July 30, 1686, he was sharply reproved by the council for his carriage on a fast day, when he stood at home out of disrespect to that occasion, and had besides a dozen men with him at his house. He was told he must take the oath of allegiance; and desiring an hour's consideration, then said he could not take it. A *mittimus* was then written, or in the process of writing, for his commitment to prison, when he considered the order again, and took the oath, rather than go to prison. He objected, says the diary of Samuel Sewall, *Mass. Hist. Coll.*, 5th ser., v. 116, to the clause of "acknowledging it to be lawful authority who administered," and would see the seals. He was deprived of his civil offices until the overthrow of the Andros government in 1689.

THE EARTHQUAKE OF OCTOBER 29, 1727.—A discourse by the Rev. John Fox, entitled on cover: *Mr. Fox's Sermons on the Earthquake*; but on the title-page, "God by his Power causes the Earth and its inhabitants to tremble: the substance of two sermons on 1 Sam. xiv. 15, preached soon after the earthquake, at Woburn: by John Fox, A.M.; and now printed at the earnest request of many of the auditors for their own particular use; Boston: printed for N. Belknap, at his shop near Scarlet's Wharf, at the North End, 1728. 58 pp. 16". The earthquake, which was the subject of this discourse, is called "a work of God," and caused such a trembling of the earth and such a trembling among the people, that its effects were felt for hundreds of miles, causing mountains to shake, and the firmest artificial buildings to totter. Such a trembling as this, says the sermon, "we have lately been sensible of, to our great consternation and astonishment." The awful trembling night, October 29th—"a night never to be forgotten"—appeared to threaten a sudden and terrible destruction. The houses and beds trembled and shook. It was a dark and dismal night indeed—a night that might be called *magarmissabib*, fear and terror round about. The timber in the buildings, the stones in the walls were shaken; the people were awakened in a surprising manner as their beds rocked under them like cradles; the quake was "loud to the bodily senses," and the people were brought into a sudden and great consternation by this "new and unusual voice." The preacher had delivered an impressive discourse to his people on the day preceding the evening when they were surprised by this earthquake. From this published discourse the Rev. John Fox would appear to have been an able preacher, as able as the average ministers of his time; not brilliant or sensational, but painstaking, solid and faithful. Professor Williams, who made a study of earthquakes felt in New England, *Mem. Amer. Acad.*, i.

260, writes, about 1788, of the great earthquake of October 29, 1727, as follows:

After an interval of sixty-four years, there came on another very memorable one, October 29, 1727, O. S., about 10 h. 40' P. M., in a very clear air and serene sky, when everything seemed to be in a most perfect calm and tranquillity, a heavy rumbling noise was heard; at first it seemed to be at a distance, but increased as it came near, till it was thought equal to the roar of a blazing chimney, and at last to the rattling of carriages driving fiercely on pavements. In about half a minute from the time the report was first heard the earthquake came on; it was observed by those who were abroad that as the shake passed under them, the surface of the earth sensibly rose up, and then sunk down again; the violence of the shock, like that of other great earthquakes, was such as to cause the houses to shake and rock as if they were falling to pieces; the doors, windows, and moveables made a fearful clattering; the pewter and china were thrown from their shelves; stone walls, and the tops of several chimneys were shaken down; in some places the doors were unlatched and burst open, and people in great danger of falling. The duration may be supposed to have been about two minutes. The limits of this earthquake extended from the river Delaware, in Pennsylvania, southwest, to the Kennebeck, northeast, and at both these places it was sensibly felt, though the shake was but small. Its extent must at least have been 700 miles; it was felt by vessels at sea, and in the most remote westerly settlements (1783), and several springs of water and wells, never known to be dry or frozen, were sunk far down into the earth, and some were dried up.¹

There are no remarkable events of civic character after this, till the period of Samuel Thompson's diary [*N. E. Hist. Gen. Reg.*, xxxiv. 397-401]. This writer records a number of incidents from the year 1755 and onward, connected with Woburn or with other places, e.g., a great earthquake, 1755; a violent wind, 1761; a remarkable storm, 1770; two remarkable freshets, 1771; twenty persons in Woburn were frozen on a very cold day, 1773; in 1777, August 15, a hurricane tore off nearly all the roof of Woburn Second Parish meeting-house (the one at Burlington), and parts of other buildings were destroyed, together with Joshua Jones' barns; a great many apple trees were blown down, many large and strong trees turned up by the roots, and almost all the limbs were blown off some, leaving their naked trunks standing, some five or seven, and others eight or ten feet high; the devastation reaching two or three miles in length. The account of the Dark Day, May 19, 1780, is a plain statement of that occurrence. It began to grow dark between nine and ten o'clock in the forenoon, and the darkness increased by degrees till after twelve, when it was darker than usual on a starlight night. Candles were lighted at mid-day, and the people were astonished and affrighted, calling to

¹The catalogue of the American portion of the library of Rev. T. Prince, by W. H. Whitmore, assigns another publication to our Woburn John Fox. As the Prince library is now a part of the Boston Public Library, Honorable M. Chamberlain, the librarian, has kindly furnished a verbatim copy of its title.

Time and the end of time, in two discourses; The first about *Redemption of Time*. The second about *Considerations of our latter end*. By JOHN FOX. Psalm 90. 12. So teach us to number our days, that we may apply our hearts to wisdom. Lam. 1. 9. Her filthiness is in her skirts, she remembereth not her last end, therefore she came down wonderfully. Non pudet te relinquas vitæ tibi reservare, et tibi solum Tempus bonamenti destinare quod in nullum rem conferri possit! Quam ferum est, tunc vivere incipere, cum desiderandum est? Sæd brev. vit. Boston, in New England. Reprinted by B. Green and J. Allen, for Samuel Phillips, at the Brick Shop, 1701. 234 pp. 24c.

mind passages of sacred writ, namely, the sun shall go down at noon; the sun, his shining shall be clothed with sackcloth. The darkness departed gradually, and the natural day revisited the earth about three o'clock in the afternoon. In 1784 Meeting-House Hill was surveyed, the town having decided on its sale. In 1793 Independence Day (July 4th) was celebrated by about eighty Woburn inhabitants and a number of other gentlemen. A singing exhibition and a lecture occurred this year—unusual events. The era of Middlesex Canal commenced by a preliminary survey. In 1794 a new burying-place was provided in the First Parish of Woburn. On July 4, 1796, one citizen raised a spire-vane or weather-cock—*Independence having been declared twenty years past*. In 1798 there was a school exhibition—another unusual occurrence. In 1799 a hearing occurred on the floor of the new State-House about dividing the town of Woburn, and on January 16, 1800, Dr. Morse, of Charlestown, addressed the people of Woburn on occasion of the public services of the town on the death of General Washington; and on February 22d, following, Mr. Oliver, then preaching in the town, delivered a funeral sermon on Washington. Thus Woburn closes the century with prospects among the people of greater enterprise and hopes of future prosperity.

NOTE.—From 1755 to 1800 the town had its share of accidents and lesser calamities. A few are here cited: Henry Reed's wife was burned to death, 1768—a strange event. Benjamin Brooks, was killed while felling a tree, 1769. Moses Noyes having injured Peter Alexander in a scuffle, 1771, who soon after died, Alexander being infirm at the time of the struggle, Noyes was tried, but acquitted; the jurors finding that Alexander died a natural death. In 1771, Thomas Jones, the pastor of the Woburn Second Church, or Burlington Church, was stricken with paralysis in the pulpit, and died the same day. Nathaniel Kendall died of injuries inflicted by Benjamin Edgell's stallion, 1775. There was a great stir about the small-pox 1775 and 1785. Riots stop certain courts in the State, 1786, and troops are collected and marched off to the scene of trouble, 1787. The Rev. Samuel Sargeant's house in Woburn was on fire on a Sabbath in 1788. The shed of Jonathan Kendall was blown down, and in its fall injured William Tay, by breaking his thigh, and otherwise bruising him, 1789. The influenza prevailed in 1789 and 1790, and many aged persons died. Cyrus Baldwin, who was drowned at Dunstable, was brought to Woburn and buried, 1790, and a strange malady, consisting of a swelling over the eye and then of other parts of the head and throat, occurred 1791. Luther Simonds was killed by a log that rolled on him at his saw-mill, 1792, being found dead under it, and his father's wife was killed by the kick of a horse, about ten years previously, or in 1783. The small pox prevailed and inoculation was permitted in Woburn and other towns, 1792. A young man, Benjamin Edgell, Jr., died suddenly while dancing at a ball, 1793. Lightning struck Bartholomew Richardson's house, and hurt his daughter Phebe, 1794. The schoolhouse was on fire, but was put out soon, 1796. Benjamin Simonds's house was burned down, 1797.

Of all these casualties, but one only, and that the most important, we have found to be the subject of newspaper notice: the strange death of Henry Reed's wife was the subject of a notice in the *Boston Weekly Newsletter* for March 31, 1768. This was a mysterious affair, and occurred in the Precinct, or Burlington part of Woburn, January 18, 1768. The woman was found burned to death. Her husband went to do a day's work for a neighbor, leaving her as well as usual, and three of her neighbors had called to see her, leaving her about sunset as well as ever, also; the husband returned home about 9 p.m., and on opening the door saw a candle burning on the table; the fire on the hearth was secure, but the room was filled with smoke. The man concluded that the house was on fire, and on looking around thought at first that the wife was in bed, but afterwards to his great surprise found her body fallen

backward on the floor some six or seven feet away from the fireplace. The clothes on the forepart of her body were burned to a coal; but, singular to relate, neither her clothes or body, or her face, hands or arms were burned above the "tying of the strings of her coats," or her feet below the ankles. Imprudently, it appears, the body was buried without a jury of inquest. This act occasioned a great uneasiness among a number of people who feared that violence on the part of some ill-minded person might be the cause of the woman's being burned in such a shocking manner. Her husband thereupon desired that her body might be dug up, which was done on March 18, 1768, or nearly six weeks after burial, and a jury of inquest sat on the case. After a strict enquiry, it appeared that no violence had been offered her—two suspected persons, Mr. Reed and Mrs. *Howard* or Hayward, laid their hands on her body and declared their innocence, as the great God was their judge!—and the jury agreed that she came to her death by her clothes catching fire. After this verdict some were better satisfied, while others were not so well; but here the matter ended. The fact that an attachment was discovered between Reed and the Mrs. Hayward of the above statement, whom he married on September 22, 1768, she being the widow of Thomas Hayward, led to suspicions that the first wife had been foully dealt with, and the two, according to the customs of the times, were forced, as above stated, to undergo the ordeal of touch; the belief being that if the murderers were made to touch the murdered body, there would be some demonstration, possibly miraculous, of guilt. In the Reed case, it is said, there was no such demonstration. The house where the event happened was near Billerica line, and also near Wilmington line, in present Burlington. See Reed's *Hist. Reed Fam.* (1861) 69.

The list of casualties from 1768-1826, is the subject of articles in the *Woburn Journal*, July, August, 1870.

The diary (1755-1814) of Samuel Thompson, Esq., is extant, and copied and annotated, 1755-1805. It is full of particulars for the period covered.

ANCIENT PUBLIC BURIAL-GROUNDS.—Those in Woburn proper are two in number; the first and oldest is on present Park Street, Woburn Centre, and is probably coeval with the first settlement of the town (1642), and the second burial-ground—that on Montvale Avenue—and also like the other near the Common, was opened first as a parish burial-ground in 1794, and purchased later by the town in 1824. As the city has arranged to publish the matter prepared under this head, it is omitted here.

THE CENSUS OF 1800.—From a volume containing the census of four towns—Woburn, Burlington, Lexington and Bedford—prepared under the direction of Samuel Thompson, Esq., assistant to the marshal, containing the names of the heads of families, the number in each family by age and sex and color, Woburn's total was 1228. Houses, 156. The first total obtained was 1217, but an omission of eleven persons increased the total to 1228. The details of population on the basis of 1217 inhabitants are made up as follows:

	Males.	Females.
To 10 years,	171	138
" 16 "	109	75
" 26 "	122	100
" 45 "	107	115
Above 45 years,	100	104
Total	612	532
Negroes and mulattoes, male and female,	18	
Male whites,	612	
Female whites,		532
Laborers on the Middlesex Canal, some foreigners, and some from the neighboring States,		55
Total,		1217

Omissions.

PROFESSIONAL MEN.—*The Ecclesiastical Profession.*—Sketches of the lives of the members of this profession in Woburn are given under the heading of Ecclesiastical History.

The Educational Profession.—The Rev. Leander Thompson wrote an elaborate historical sketch of the schools of Woburn, Mass., for the century closing 1876, which was published in the annual town report of that year, pp. 131-185. He expresses his indebtedness to the *History of Woburn* by the late Rev. Samuel Sewall, for items of interest regarding the schools previous to 1775, and gives the substance of all to be found on the subject in that work. Little is left unsaid, and the account for the period covered (to 1876) is very full and complete. There is not known to exist any record or notice of schools prior to 1673. In that year mention is made of Allen Converse's wife and Joseph Wright's wife as teaching school, and in the following year (1674) the selectmen agreed with Jonathan Thompson to teach the bigger children, and with Allen Converse's wife to teach the lesser children. Jonathan Thompson, therefore, was the earliest schoolmaster mentioned in the records of Woburn. Other teachers of this early period were Samuel Carter, a son of the first minister, Mrs. Walker, the Rev. Jabez Fox and the Rev. John Fox, his son, Timothy Wadsworth, of Boston, or his son, John Tufts, and many others, most of them young men who had been connected with the college at Cambridge, and some of them natives of the town. Others were schoolmasters by profession and natives of Woburn, such as the three Richardsons, Adam, Isaac and Jabez, and the two Fowles, James and John—the latter a teacher of eminence—and Ebenezer Thompson. The schools were originally kept in private houses. In 1713 a school-house was erected by private subscription. The grammar school, kept by law by the town, was for a period of thirty-five years movable or rotary, or, in other words, kept for a while each in a number of different neighborhoods. In 1775 and 1776 a grammar school was kept in each of the two parishes. In 1792 the people of Woburn appear to be aroused from a long lethargy in relation to their schools, and active steps were taken to improve them. Soon afterwards nine new school-houses were built.

It seems needless to go over the same ground so well and so ably covered by this report concerning

the period covered by the schools of the nineteenth century. A High School was organized and commenced in 1852. The Warren Academy was founded in 1827 and incorporated in 1830. The sketch closes with a valuable list of a number of the male teachers in the town during the earlier part of the present century; to this list we would add two names of schoolmasters of the last century whose names are not there given, viz.: Joseph Burbeen, died 1794, sometimes styled *Rev.*, a graduate of Harvard College, 1731, a schoolmaster and occasionally preached, but was never settled in the ministry, and Jacob Coggin, a graduate of Harvard College, 1763, a schoolmaster by profession and occasionally preached. His gravestone in the second burying-ground calls him "a preacher of the gospel." He died in 1803, in his sixty-fourth year. Like Joseph Burbeen above, he was a native of Woburn. Jacob Coggin, A.M., and Abigail Blanchard, both of Woburn, were married by Rev. John Marrett, July 3, 1777.

A list of teachers of the grammar school in Woburn till 1771, with explanatory notes, is given in Sewall's *Woburn*, 586-87. See also *ib.* 545-46 for an original document; also *ib.*, chaps. ii., vii., xiii., xvi.

This subject is also amplified in articles in the *Winchester Record*. Cf. vol. ii. 64-69, 304-15, 463. According to a statement in one of these articles the town had but one school-house till 1760, certainly in the part now Woburn and Winchester. School districts as such were first established in 1792, and these districts were not much changed till 1845.

The Medical and Legal Professions.—The material on this subject comprises a chapter by itself, covering the colonial, provincial and later periods.

The Military Profession.—The material on the subject of the military history of Woburn is comprised in chapters by themselves, covering the colonial, the provincial, the revolutionary and later periods.

SOCIAL LIBRARY.—The history of a social library existing in Woburn prior to 1800 is included under the subject of LIBRARIES.

Catalogue of some interesting documents of the provincial period that have been preserved in the *Wyman Collection* in the Woburn Public Library:

Giles Alexander, house formerly licensed for an inn or tavern, purchased by Noah Wynnman March 21, 1761, who petitions the General Court for an innholder's license on that date.

Samuel Blodget, letter to James Fowle, Aug. 26, 1771.

Nathaniel Felton and Joshua Hammond, heirs of the Rev. Edward Jackson, receipt to James Fowle, Dec. 30, 1755.

Thomas Fleet (printer in Boston), undated letter to, from Samuel Coolidge.

James Fowle, unsigned receipt to, for a horse to Cambridge commencement, killed by a chair. Receipt dated July 2, 1760. (A chair, more recently called a "gig," was a two-wheeled vehicle, or chaise without the top. The body resembled a chair.)

Nathan Richardson, letter, Feb. 18, 1765.

Draft of a petition to the General Court by inhabitants of Woburn, and others, in behalf of the "fowls called pigeons," April 4, 1771.

CHAPTER XXV.

WOBURN—(*Continued*).

CIVIL HISTORY FROM 1800 TO THE PRESENT TIME.

THE opening of the present century witnessed a very different Woburn in the general appearance of its buildings and dwellings than the one to be seen at the present time. The town then embraced all the territory which had been formerly included within the limits of the old First Parish, and both were, in the effect of much of their action, practically one. The number of houses in the town at this period was 156, scattered over the area now included principally in the towns of Woburn and Winchester. The population of Woburn at the beginning of the century was 1228. An unfinished description of real estate in Woburn First Parish (October 1, 1798), intended practically to show the condition at the opening of the new century beginning with 1800, conveys an idea of the character of the houses and of the business resources of the inhabitants, and the extent of their property. From this description it would appear that the buildings, with scarcely an exception, were all of wood; that the greater portion of the dwelling-houses were of two stories, a goodly proportion of the number being of the kind described as "two stories in front and one in rear," a number of which yet remain. A small number (21) are mentioned in the unfinished description as one-story houses, and in some cases the number of stories is not specified. As a general thing they were unpainted structures, with small pretensions to beauty. In the extant list, eighteen are described as "old houses;" five as "very old houses;" three as "old and poor;" five as "not tenanted or tenantable;" three as "very poor;" two as "out of repair;" one was "part brick and part wood;" one was "half old and half new, and unfinished;" one was "in good repair;" three were new houses; one was "almost new;" another was "not finished," while one only is spoken of as painted. The condition of some of the barns and out-buildings in the town would appear to be even worse than some of the dwellings we have described. We have not space to go into an enumeration of further details concerning them, but the number of shoemakers' shops would give that business a rank next to agriculture in the general occupations of the inhabitants. At the opening of the century there were, at least, twenty-two of these shops on the estates of those owning them. They generally stood near the dwelling-house, and were small buildings, their average area being eleven by eleven feet. There were at that time two buildings used as currying shops, the area of the largest being only 16x14 feet; one tanner's shop, 16x12; two tan-houses, the largest 30x22; and one bark-house, 24x20 feet. There was certainly one store, kept in an unfinished

building, 24x18 feet, and having two windows of the largest size. There was another store of lesser value, in the present limits of Winchester, and this building was styled a "trading shop." There was a store at the Centre Village, kept by Zebadiah Wyman, as early as 1796, in his dwelling-house, and not in a building separate from it, as in the above instances. A store of the same kind was kept by Major Abijah Thompson at North Woburn, or New Bridge, in his dwelling-house. In 1802 Colonel John Wade, who died in 1858, began business in a store at the Centre, with a capital of \$170. These appear to be all the stores then in the town.

Of shops devoted to mechanic trades, other than the leather trades, are the following: Wheelwright shop, 1; blacksmiths' shops, 5; saddlers' shops, 2; coopers' shops, 6; joiners' shops, 2; other workshops, 5. The saw-mills in the town were 3, and the grist-mills, 7. There were one cider-mill, three cider-mill houses, a bakehouse, a malthouse, and ten chaise or "shay" houses, for a vehicle of some note at that period. The saw-mills had one saw each, and each grist-mill had one pair of stones.

The situation was probably but little changed till after 1825, about which time more houses were built around the Common at the Centre, and the village began to grow in that quarter. After the opening of the Woburn branch railroad, in 1844, the village in this part of the town received a second impetus in the way of increased building, particularly in the neighborhood of Academy Hill. A view of Woburn from that height in 1820, by Bowen Buckman, Esq., gives a good idea of the appearance of the centre village at that date, before the marked changes of a later period had occurred. The Common at that date would appear to be destitute of trees, and in the immediate foreground no houses exist on the level tract easterly of Pleasant Street and southerly of the Common, except a blacksmith shop of E. W. Reed. The other buildings shown in the sketch are less than thirty in number, and several of these are at some distance from the central point. One or more houses near the Common are not included in this pictorial representation, but the whole, we have been told by one who remembered and who was present with Mr. Buckman when the sketch was made,¹ gives a good illustration of the buildings near the Common as they were from about 1809 to 1820, and, with the exception of the large meeting-house in the foreground, and, perhaps, one or two other buildings, the same as they were in 1800, when the town meeting-house stood on the Common, and a town school-house stood on the spot where the large meeting-house stands, as shown in the illustration of 1820.

ANNALS.—Embracing some events of general importance. 1801, "New Century," writes Esquire Thompson. The same writer mentions the following

¹ The late Colonel Leonard Thompson, of Woburn.

important incidents: Jacob Eames's house was struck by lightning July 3, 1801. Deep snow in February, 1802, "very difficult to pass the great roads." A boat and a large raft were afloat on the Middlesex Canal, at Wilmington, April 22, 1802, and on July 5th following, two hundred to three hundred people sailed on the canal, showing that its construction was progressing, and the manner in which some celebrated the anniversary of American independence, July 4th that year being Sunday. On May 29, 1803, Sunday, the diarist went to meeting in a boat by way of the canal, which appears to be open from North Woburn to Woburn Centre at that time. The canal was opened its entire length in this year. In February, 1804, the roads were obstructed with large snow drifts, and the traveling continued bad throughout March. In June, 1804, there was a conference with young people, probably on the subject of religion, for, in August, 1804, near twenty persons offered themselves to the local church. Mary Ann, child of Zebadiah Wyman, was burned to death, Sunday, January 5, 1806. The almshouse is mentioned in 1806. The mail stage, 1806. Esquire Clapp's house, July 14, 1807, was raised and fell, killing three and wounding twenty or more persons, some very badly. On the day following were three burials of victims of this disaster—John Lyman, Samuel Wright and Joshua Richardson. On July 19th following, another victim, Nathan Parker, died of his wounds by his fall off this tumbling house-frame. An account of this distressing accident appeared in the *Columbian Centinel*, Boston, July 18, 1807. The frame of a house belonging to Major Jeremiah Clapp, of Woburn, was raised on Tuesday, July 14, 1807, a day fair and warm, and when the raising was nearly completed, the whole frame fell, carrying down with it all who were upon it. Two persons were killed outright and another died the night following. The newspaper sets the number of wounded at sixteen, and some, it feared, of these were "wounded mortally." One of the latter, Nathan Parker, died of his wounds on Sunday, the 19th instant, the day after the publication of the above newspaper notice, and was buried on the 19th. It was a sad disaster to all the participants, and made a profound impression on the community. Long and curious and quaintly eulogistic inscriptions on the gravestones of three of the dead victims of the accident are to be seen in the old second burying-ground, on Montvale Avenue, and all state the cause of death to be "the fall of a house-frame." These were Parker, Wright and Richardson, no stone to the memory of Lyman being found. Jeremiah Clapp, the owner of the house, was also buried in the same burying-ground. His gravestone there standing gives the date of his death as November 11, 1817, at the age of fifty-five. The late Colonel Leonard Thompson, in some facts published by the present writer in the *Woburn Journal*, February 6, 1869, states that the number of per-

sons on the frame at the moment of its fall was thirty or more. The house was to be a large, square mansion of three stories, and when afterwards completed, stood a well-known object at Central Square till within thirty years. It was on the westerly side of Main Street, near the junction of Wyman Street. Mr. Charles Flagg's present house is near its former site. When it was erected it was the fashion to raise the frame of a side complete from the ground, and "raisings," as the performances of putting together a frame of this sort were termed, were popular, and a general entertainment of refreshments was provided for all persons present. The attendance on this occasion was unusually large, the house to be constructed being of more than ordinary dimensions. Two sides were to be of brick, to be put in after the frame was erected. These, in this case, were not sufficiently provided with braces and occasioned the fall. Hence, when the framework for the crown-roof was put in place, the weight, with the large number of men upon it, was too great for the rest of the structure to sustain, and the frame was first noticed to lean, it then leaned more, and soon fell with a loud crash, followed by a cry of agony from the injured. The spectators were aghast. Then followed a rush to extricate those buried in the ruins. The confusion baffled description. The ruins had fallen in a westerly direction. The hour when the disaster occurred was six P.M., when the raising was supposed to be about completed, and an entertainment was to be enjoyed. But instead of that occurred this fatality! All efforts to avoid the result failed. The bodies of the killed were removed, horribly mangled. Lyman, of North Woburn, after excruciating suffering, died that night. Parker, residing near by, on the Black House estate, died, as we have before said, during the week. Thirty or forty of the "strong men" of the town were wounded in a variety of ways. Some of them lingered months and even years, even till death, before they were relieved of pain. Some were made cripples for life. Jonathan Tidd, of North Woburn, had his back broken, and never walked readily afterwards. Many recovered gradually from their hurts. Among the names of those injured were Captain Ishmael Munroe, of Burlington, Deacon Benjamin Wyman, Captain John Edgell, Josiah Parker, Jonathan Thompson and Jacob Converse, of Woburn. Colonel Thompson said the funeral of Richardson, Wright and Lyman was held in the Third Meeting-house, which stood on Woburn Common. The pastor, Joseph Chickering, delivered an appropriate discourse on the occasion to a large and sorrowing audience. The text was Job i. 19. Richardson and Wright were both about to be married, and their bereaved ladies appeared with the chief mourners at these funeral ceremonies.

The next event of importance which occurred in Woburn was the burning of the town meeting-house on June 17, 1808—the anniversary of Bunker Hill

Battle. On this date, "Woburn meeting-house was burned to the ground, at eleven o'clock at night; thought to be purposely done." After the burning of the meeting-house, religious services were held in the school-house at the Centre. On July 17, 1808, occurred a storm of thunder and wind, very tempestuous in its character. Stables were blown down, chaises were broken, glass windows also were broken in pieces, the destruction being the greatest in Wilmington, Reading, etc. At a town-meeting on the afternoon of August 1, 1808, it was voted to set the next meeting-house where the school-house then stood, or on the spot now occupied by the Unitarian Church edifice. A month later, on September 1, the timber for the new meeting-house arrived at Woburn from New Hampshire, by the Middlesex Canal, and on the 2d and 3d. of that month it was drawn out of the canal and carried to the training-field, or to the open spot easterly of the present Unitarian Church, now traversed by Winn Street. On the 23d, 24th and 25th of October, 1808, etc., the raising of the Woburn Meeting-house was in progress. On June 19, 1809, the meeting house pews were sold, and on the 28th inst., following, the new meeting-house was dedicated. This was a great occurrence for Woburn. The chronicler devotes the following paragraph to it:

"June 28, 1809. Woburn new meeting-house dedicated. Ministers and people from the adjacent towns attended and assisted. A fine day, and all parts of the services were performed decently and in order."

On July 2, 1809, "Mr. Chickering," the parish minister, "preached in the new meeting-house the first Sabbath," or the first Sunday after its dedication.

In December, 1809, there was some legal difficulty about the town common lands. In January, 1810, Joseph Brooks and Benjamin Brooks were both frozen and found dead in the woods; both were buried the 23d of January. On January 18 the two went into the woods to cut wood, a little before noon, the weather then being very mild. In the evening it became excessively cold and they were supposed to have perished on that day, or the night following, from its effects. They were found on the 20th. One was fifty, and the other was forty-five years old. Cf. *Woburn Journal*, August 6, 1870; *N. E. Hist. Gen. Reg.*, xxix. 156. The weather on the 18th, was "fine morning, fair; cloudy, P. M."; on the 19th, Friday, "severe cold, fair;" this was the memorable "cold Friday" of that year, concerning which much has been said and written by the people of that day; the 20th was "fair and excessive cold;" Sunday, the 21st, was "fair and very cold;" the cold had "some abated" on the 22d, and the cold weather continued till the last day of the month. Asa G. Sheldon in his book (Woburn, 1862), has some account of the events on this "cold Friday" (January 19, 1810); the day before was unusually warm for winter, he says, but the next morning brought a great change—"the

cold was intense." Cf. *Woburn Journal*, for January 16, 1885.

December 25, Christmas, was called by that name for the first time in these annals in the year 1810. February 2, Candlemas day, is named as such in 1811. On February 4, 1811, was a deep snow with great drifts ten feet deep. On the 11th of February the sun had not been seen for ten days past. On the 21st there was much snow on the ground. On June 30, 1811, there was a contribution in Woburn for Newbury (port), destroyed by fire.

In 1812, Esquire Thompson, the diarist, was eighty-one years old, and though his items are continued till 1814, there is a dearth of incident. In 1815 occurred an event of considerable interest to a large portion of the community, namely, the death of the wife of Mr. Chickering, the Congregational minister. Three of their children also died about the same time as their mother. Her age was thirty-one years. There has been preserved a paper containing the order of the procession at the funeral of Mrs. Chickering, which occurred on Monday, November 6, 1815. The procession was to move from the house of the Rev. Joseph Chickering, precisely at half-past two o'clock P. M., to the meeting-house, in the following order:

First marshal. Members of the Female Reading Society. Second marshal. Corpse. Mourners. Neighboring ministers with their wives. Members of the church. Members of the society. Strangers. Third marshal.

A marble slab in the second burying-ground covers her "earthly remains" and those of her three children who died at nearly the same time as she did. She was Betsey White, of Concord, Mass.

At this period also was issued a license to a manufacturer of leather, namely, to Abijah Thompson, afterwards General Thompson, to conduct a tannery of twelve vats in Woburn, owned by himself, for the tanning of leather for the term of one year. This license was given in conformity to a law of the United States, and was dated October 21, 1815. In 1815 occurred the famous September gale.

In 1815, also occurred some interest in the matter of public vaccination of the inhabitants. One Doctor Fansher proposed to vaccinate all in Woburn who needed it at the different school-houses at an expense to the town of seventy-five dollars. He would attend also to see that each had the genuine "kine-pock" and insure their safety from the small-pox. The doctor called this a "general vaccine inoculation." He signed his name S. Fansher. He had the support of the two village doctors and the Congregational minister. There is extant a petition to the selectmen, dated Aug. 9, 1815, for an article in town warrant, to see if the town will accept the proposals of the above doctor, "for a general inoculation of the *kine-pock* throughout the town," signed by Drs. Sylvanus Plympton and Francis Kittredge and the Rev. Joseph Chickering, and others. Again, in 1823, Dr. Francis Kittredge and nine others petitioned for an

article in the town warrant concerning the purchase of one or more "bathing tubs" for the public use of the town. This was a species of sweating-box, or bath, used in connection with cases of malignant fever, particularly the *spotted fever*, a disease which raged with great fatality in this region in the earlier part of the present century.

In 1815, Mr. John Brooks Russell, a native of the town of Arlington, Mass., went to school in Woburn a couple of weeks to one Hall J. Kelley, who had started a school of half-a-dozen scholars at New Bridge. Mr. Russell says "I boarded with a Mr. Thompson in a house where Count Rumford was born." His impressions of Woburn in 1815 are given in the following brief recital: "I recollect Woburn only as a terribly dull farming town, partaking largely of the depression that was pretty general after the war of 1812." It may be inferred that, at the time Mr. Russell describes, those who pursued mechanical trades, or even exercised their skill in the learned professions, combined with those employments the occupation of agriculture, which was one of the main sources of their support. Even the most well-to-do exercised themselves personally in the various duties of farming, such as haying, laying walls, planting, gathering crops, caring for cattle, cutting wood, etc., etc., and the situation remained apparently unchanged in 1837, when the shoe manufacture was an important business in the place, as it had been at the beginning of the century, and the tanneries were only four in number. After the opening of the Lowell Railroad in 1835, which passed to the east of the main village, a community grew up at what was then called East Woburn, now called by the name of the village of Montvale, and here an India rubber factory was established and other business, with an attempt also to establish a "silk farm" for the prosecution of the silk industry, a subject then attracting considerable attention in the country at large, and also a building enterprise, the whole proving less of a success than its projectors expected. At the time of the opening of the Lowell Railroad the south village in Woburn, now the town of Winchester, began to show signs of growth, particularly in the vicinity of the railroad. Here a village grew up which was soon dignified with the name of South Woburn. The population of the whole town in 1837 was only 2600, of which number 383 males and 320 females were employed in the manufacture of shoes. The number of hands employed in the tanneries was 77. In the door, sash and blind manufacture were employed 17 hands in three factories. The number of hands employed in the India rubber manufacture is not given. The Middlesex Canal, which ran a little to the west of the main village, was in operation, and added an element of variety and enterprise, but it was soon destined to fail, because of the superior advantages of the railroads. The main village was described, at that date, as consisting of about "70 or 80 dwelling-houses, a number

of mechanic shops and mercantile stores; with 4 churches,—1 Congregational, 2 Baptist and 1 Universalist, and an academy." Horn Pond at that time was also a place of considerable resort, and in the warm season a house on its shore was well patronized by visitors, who came by boat on the canal, which had six locks at this place, the whole spot being made attractive by summer houses, bowling alley (on the island in the pond), boat-houses, fountain, groves and beautiful scenery.

In 1846, according to a writer in that year, after the Woburn Branch Railroad, two miles in length, to Woburn Centre, had just been constructed, Woburn was essentially a manufacturing town; pleasant villages had sprung up in various parts; the principal manufacture was of shoes and of leather; besides these were manufactories of doors, blinds and sashes, mahogany veneers and knobs, furniture, tin and cabinet-wares, India rubber goods, sewing silk, files, saws and lasts. The houses of public worship were then 2 Congregationalist, 2 Baptist and 1 Universalist. Warren Academy, opened in 1828, was flourishing, and delightfully situated near the centre on a beautiful eminence. The town contained some beautiful farms. Horn Pond was still remarkable for its rural beauties, and numerous visitors were still attracted to it from a distance. The hills, dales and woods of the town were exceedingly pleasant. To this period the inhabitants had been mostly of the original stock. The Rev. Mr. Bennett, in 1846, whose career as minister of the first Congregational Church in Woburn covered the period from 1822 to 1847, speaks of them as a peaceable people, as a stable people,—not changeable nor fickle,—their habits were country habits; like Mr. Bennett himself, they were born and brought up in the country, and were accustomed to industry, economy and plain manners. He was, he said, brought up to saw his own wood, to make his own fire; in a word, to wait upon himself; and in Woburn he was among a plain country people of similar habits and customs. With the opening of the railroads and the increase of manufacturing came persons who were natives of other parts of New England, and settled down among them, and with them also, in large numbers, came a body of foreigners, principally of Irish extraction, who readily found work in the shops and soon became an important element in the population of the place. This race was strong and willing to work, and became the owners, in time, of their own dwellings and of much real estate. They have furnished the community with many sober, industrious and patriotic citizens, and have borne well their share of the burdens imposed upon the community. The presence of this large body of strangers modified many of the customs and peculiarities of the older citizens, making them more cosmopolitan in their views and manner of life, and the contact of races, it may be said without prejudice, has been mutually beneficial,—the strangers adopting some of the better qualities

of the older stock in modes of business and life, in education and refinement.

In 1850, after the loss of the village of South Woburn, which in that year was incorporated as the town of Winchester, a miniature directory of Woburn was published, which contains some valuable particulars regarding the amount of business then performed in the town and the names of those conducting it. The leather manufactories were then thirteen in number, conducted by Abijah Thompson & Co., in two yards, J. B. Wina & Co., in four yards, John Cummings, Jr., & Co., Bond & Tidd, Charles Tidd & Co., Cyrus Cummings, G. L. Ingerson, William Tidd, Henry Tidd, Harris Munroe, Warren Fox, John Shepard and Joseph Dow. The shoe manufacturers were Nichols, Winn & Co., John Flanders, Grammer & Brother, John Tidd & Son, D. Buckman & Son, F. K. Cragin, William Flanders, Luther Holden, Oliver Green, Jeduthun Richardson, S. Caldwell, Frederick Flint, Alvan W. Manning, James D. Taylor, Daniel Cummings, S. T. Langley, Harris Johnson, Augustus Roundy, C. H. Thwing, A. S. Wood, William Leathe, A. P. Smith, Nathan Hyde and H. H. Flanders,—twenty-four concerns. The boot manufacturers numbered two concerns—Winthrop Wyman and S. R. Duren, Jr. Of stores there were six English and West India goods stores, kept by Nichols, Winn & Co., Thompson & Tidd, William Woodberry, Martin L. Converse, William S. Bennett and Thompson & Flagg; two dry goods stores, kept by John Fowle (2d) and Nathan Wyman, Jr.; merchant tailors' establishments, two, kept by Gage & Fowle and Philip Teare; West India goods alone, four stores, proprietors, L. P. Davis, William Beers, The Protective Union or Union Store and J. S. Ellis; hats, caps and shoes, B. F. Wyer & Co.; millinery, M. A. Teare, J. Brainard and Betsey Roundy; clothing, Amos Bugbee; hardware, Kimball & Ladd and E. Trull; books and stationery, G. W. Fowle; jewelry, W. M. Weston; drugs and medicines, E. Cooper & Son and E. Trull; paints and oils, Cutter & Otis; lumber, Richardson & Collamore. There was the usual number of professional men for a population of nearly 3800 persons, viz., clergymen, lawyers and physicians. The number of dwellings in 1850 was 617; shops of all kinds, 279; tan-houses, 8; ware-houses and stores, 21; mills, 8; barns, 241.

After 1850 the era of the weekly local newspaper commenced, which has continued regularly without cessation to the present time. Many of these enterprises had been started, and the existence of some of them was of brief duration only; others have had a well-nigh continuous existence from the time of their commencement, particularly the *Woburn Journal* and the *Woburn Advertiser*, in both of which a much fuller account is given of the current local events than could be in any manner attempted here. The *Woburn Journal* began in 1851, and has continued under various names, such as the *Middlesex Journal*,

1854, and the *Woburn Journal* again in 1873, to the present time. The *Woburn Advertiser* began in 1871, and continued till 1889, when, by the death of its editor and proprietor, who had published it from the first, its existence ceased. Its place is now filled by the *Woburn City Press*, which has entered upon its second year. Two papers of ability and note—the *Woburn Budget*, 1857–1883, and the *Woburn Townsman*, 1864—were published during the years mentioned, but were abandoned on account of their projectors and managers entering the army during the American Civil War.¹ The period between 1850 and 1860, in Woburn, might be called a money-making period; mechanics made good livings, store-keepers accumulated money, and professional men and manufacturers accumulated wealth. The financial troubles of 1857 did not make any great impression here. Indeed, the period might be termed the halcyon period of Woburn, when contentment and manufacturing prosperity reigned supreme. In 1860 the Lynn strike of shoemakers made some impression in Woburn, and the writer remembers one procession of so-called strikers connected with that movement marching in the streets of this town. But the War of the Rebellion, 1861–1865, created an enormous demand for leather—Woburn's staple product—and the growth of business and of the town itself was very marked—much greater than it had ever been before—and the impetus of that period has continued to the present. From 617 dwellings in 1850, the number had increased to 988 in 1860, to 1074 in 1861, to 1323 in 1870, to 1691 in 1880, and to 2007 in 1887, and 2145 in 1889. The most marked civil events of the period from 1850 to 1889 were this rapid growth, the action of the town during the civil war, which belongs more especially to the military history of the place; and an extensive fire in the month of March, 1873, which destroyed one church edifice and several business structures; and the gift of a large sum of money from one of the citizens for a free public library; the construction of a loop of the former Boston and Lowell Railroad, now the Eastern Division of the Boston and Maine Railroad, through the place in 1885; the extension of the horse

¹Other newspapers in Woburn were *The Sentinel*, 1839; *Woburn Gazette*, 1842–44; *The New England Family*, 1844 or 45; *Gazette* again 1846–47; *Weekly Advertiser*, 1846; *Guide-Post*, 1846–48; *Young Independent*, (amateur), 1872; *Our Paper* (Unitarian), 1875–78; *Church at Work* (Baptist), 1875–76; *The Silent Worker* (Methodist), 1876; *Weekly Independent*, 1878; *Woburn Item*, 1879; *Grattan Echo*, 1881–82; *Woburn Courier*, 1882–84; *Union Weekly*, 1884–85.

Under the topic of "All About Woburn" the publishers of the *Woburn Budget* began a series of articles Oct. 14, 1859, entitled, Newspapers, Military, Woburn Bands, Firemen, Saw-Manufacturing, Gas-Works, Hat Manufacture, Woburn Tract Society, Leather Manufacture, etc., subjects of interest to the people of that time. A parish newspaper called *Our Paper* (1875–78), contained articles of a similar kind, e. g., Woburn in England, Liberal Christianity in Woburn, The Water Supply, The Press, and Library.

The *Herald of Truth and Evangelical Messenger*, a religious periodical, was published and edited in Woburn by Mark Allen, vol. i. to vii. 1867–74

railroad from North Woburn to Winchester and the construction of another horse railroad from Woburn to Stoneham; the introduction of electric light in addition to gas, etc., etc.; the incorporation of the town as a city in 1888; the increase of institutions and facilities which accompany the growth of a large place—these are the evident features, to be observed by all comers, of her present prosperity.

NOTE.—The description of real estate in Woburn First Parish in 1798 was designed to serve as a basis for the valuation required by the assessment of the United States direct tax of that year. The original volume belongs to the Woburn Public Library, and a copy in manuscript has been made from it. All the details given are now very valuable to conveyancers and antiquaries. In the original there is an attempt at alphabetical arrangement. The copy is indexed. The description gives the dimensions of the houses, the number of their windows, the amount of glass, the number of their stories, the names of their owners, and the value of the houses and the land on which they stood. The other property is treated in a similar manner. The original book was prepared under the direction of Samuel Thompson, Esq., of Woburn, the "principal assessor" of the district, and the handwriting is supposed to be that of Jeduthun Richardson, "assistant assessor" for Woburn First Parish, for the most part. An introduction to the copy above mentioned contains considerable information which we cannot give here. The description was not completed, because a portion of the act authorizing the tax was soon repealed, and the specifications in relation to dwelling houses, their situation, their dimensions or area, their number of stories, the number and dimensions of their windows, and their building materials, were no longer required. A description of some of these houses, by Leander Thompson, is published in the *Winchester Record*, i. 131-147, and extracts from the above description of real estate are given in articles in the *Winchester Record*, i. 147-161.

Some interesting plans of the Academy Hill lots, so called, of date 1846, are found in the Thompson Collection in the Woburn Public Library. These were based on a previous plan of the Coolidge lots, so called, laid out by Luke Fowle in 1827. The names of the owners of lots are quite fully given on the plans, as well as in a copy of Luke Fowle's field-book, made June 18, 1846, by Benjamin Cutter, and preserved with them.

The particulars of the death of Mary Ann, child of Zebadiah Wyman, are told more fully by her father in the family MSS. The accident occurred at 3 o'clock P.M., on the Sabbath. Her mother and herself were at home, while the rest of the family had gone to meeting. The child undertook to kindle a fire in the house, when her clothes caught fire. By shaking them to put it out a blaze was created and instantly she was wrapped in flames. Her mother's exertions were unavailing; the child died in twenty-four hours after. At the moment of the accident, Mr. Chickering, the minister, was relating the deaths of the year past in the parish and entreating the people to consider the uncertainty of life. "At that moment," writes her father, "the fatal scene opened on Mary Ann!"

Nathan Wyman in a Bible (edition of Isaiah Thomas, Worcester, 1801) made the following entry in regard to the dedication of the meeting-house of 1809: "June 28, 1809, Woburn new meeting-house dedicated. Rev. Mr. Osgood made the first prayer and Mr. Joseph Chickering preached the sermon from Acts 7: 48. Rev. Mr. Marrett made the last prayer." This Bible was the property of Nathan Wyman as early as 1805. Mr. Chickering in his printed dedicatory discourse, 1809, gives a number of

particulars concerning the new house and the burning of the old one. The building was the fourth meeting-house which had been erected by the church and parish. The house was decent and becoming their circumstances; it united simplicity with elegance. After the former meeting-house was discovered to be on fire near the hour of midnight, June 17, 1808, in less than an hour it was reduced to ashes. Several circumstances evinced a design on the part of some one to destroy the house. Mr. Chickering recites them, but says nothing had transpired to justify a suspicion of any individual. It had been customary to keep the town's stock of powder in the tower of the house, but the explosion of this was so inconsiderable on the night of the fire, that most of it must have been removed. The house which was destroyed was raised in 1748, and finished in 1752. Zebadiah Wyman (the 2d), in his family MSS., speaking of that house, says, "Our new meeting-house was erected in the first week in December, 1748; the steeple (or tower) was put up in June, 1749." The edifice of 1809 cost \$7911, and the building was ornamented with a handsome steeple. A fund of \$3000 was acquired by the sale of pews, the income of which was intended to be applied towards the annual expenses of the society.

An interesting illustrated article on the Middlesex Canal appeared in the *Boston Globe*, May 12, 1889. The principal writers on the subject of the canal are Eddy, Vose and Sherburne. The stock ledger of the canal company belongs to the Woburn Public Library. Cf. *Woburn Journal*, Jan. 30, and Feb. 13, 20, 1885, for sketches of a trip on the canal and its history.

THE EARLY HISTORY OF THE LEATHER BUSINESS.—John and Francis Wyman, brothers, and early settlers, were tanners, and had their tanning establishment near the corner of Main and the present Wyman Street, where the tan vats are still said to be buried up in the hollow spot directly south of the junction of these two streets. Another early tanning establishment was that of Gershom Flagg, to the north of Woburn Common, on a spot now traversed by Winn Street. Here, in 1673, he had one dwelling-house, a bark-house, mill-house, beam-house, and tan vats with an acre of land belonging, being situated, according to the description, in High Street, near the meeting-house, and bounded west on the lands of the Rev. Thomas Carter, the town minister, and east by the town burying-place, now the ancient cemetery on Park Street, and south by the training-field, or the present Common or its original limits. This land and house-plot was some of it bought and some of it was given by the town. As the proprietor of this tannery was killed in battle with the Indians in 1690, and as nothing further is heard of it, it probably was allowed to go out of use, and it is probable that none of these early establishments were conducted upon anything more than a small and very limited scale. The Wymans appear

to be followed in their business in the original place by a later member of their family, Jonathan Wyman, and still later David Cummings, Jonathan Tidd, Jeremiah Clapp and Jesse Richardson, the fourth, were engaged in the leather manufacturing business in buildings of small size in various parts of the town. David Cummings, the ancestor of the present Hon. John Cummings, of Woburn, came to Woburn from Andover, about 1756, and here engaged in the business of tanning and agriculture on land employed by Hon. John Cummings for the same purpose at a more recent date. This land was purchased by David Cummings of Israel Reed, about Nov. 12, 1756, and contained about thirty-six acres. In 1770 David Cummings purchased a farm in Woburn of Abijah Smith; that farm contains the old Cummings homestead, and has always been in the possession of the family since the date of purchase from Smith. The deed was recorded on Aug. 30, 1770. The farm contained about 127 acres, with a way across it. In his day the winter was devoted to tanning and the summer to farming, and the tanning business was conducted on a very small scale indeed. John Cummings, his grandson, followed David, by beginning business as a tanner about 1804, and about 1830 took up the manufacture of "chaise leather" as a specialty, and succeeded in acquiring a wide reputation for that article. He next manufactured enameled leather, and was the first, or among the first, to use the splitting-machine, and was subsequently the almoner of the fund contributed by the leather interest for the benefit of the inventor of that useful machine.¹ He relinquished in later life his business to the management and control of his eldest son, the present Hon. John Cummings, and it was this business which built up the village of Cummingsville in Woburn. General Abijah Thompson, who became an apprentice in the business of tanning and currying leather, in 1810, and served four years, began

with two dollars capital, in 1814, in Woburn, in a small tannery in the west part of the town, near the junction of the present Cambridge and Russell Streets. At this time he had two apprentices. He continued in this way for about ten years; then he bought a tract of fifteen acres with a small water privilege near the centre of the town. It was a rough place, but he commenced clearing it, built a dam, erected a building and put down twenty vats, enlarging by degrees his business as he gained in capital, till he was one of the largest and most successful leather manufacturers of the time. Thus the village of Thompsonville was commenced, and with the advent of General Thompson's factory increased the leather manufacture in Woburn till it assumed very important proportions. Benjamin F. Thompson, a brother of General Abijah, commenced business in Woburn on a small scale in 1823, in a long and narrow building, still standing in that part of the town now known as Cummingsville, and lived in one end of the same building that was also his manufactory. He was prospered, removed also his business to the centre, where he built a manufactory, and later removed to Winchester, and there built another. Such was the history of the beginning of the leather business in Woburn.

MISCELLANY.—A printed report of the first annual meeting of the directors of the Woburn Agricultural and Manufacturing Company (1836) contains an account of the enterprise known as the Woburn silk farm, and the matter was made the subject of an article by H. F. Smith in *Boston Globe*, July 15, 1883. A few of the mulberry trees set out at the time are said still to remain. The company expected to raise oranges also on their land, and this feature of their enterprise is preserved in the name of Orange Street, at Montvale.

An interesting article on the houses shown in Bowen Buckman's picture of 1820, and others, was published by the Rev. Leander Thompson in the *Woburn City Press*, Feb. 6, 1890.

A lithographic plan of the building lots owned by Sylvanus Wood and J. E. Littlefield, in 1845, in the present populous Highland District in Woburn, shows that in that year there was only one house on that tract—the house now occupied by the Hon. Joseph G. Pollard. The first person to live in the house was Mr. Littlefield, followed by Mr. Daniel Kimball, and later on by his brother, John R. Kimball. At the date of 1845 there was a stopping-place on the Woburn Branch Railroad at the Green Street crossing.²

THE MISHAWUM HOUSE.—Besides the Horn Pond Hotel there was another resort of some celebrity

¹There is preserved in the Woburn Public Library (*Wyman Coll. MSS.*, index, p. 129), a paper of date 1811-12, entitled, "Account of my time and expense attending to the concerns of the proprietors of the patent machine for splitting or shaving leather," but to whom it refers is not evident. The inventor of the machine was evidently Samuel Parker, of Billerica, who obtained patents on leather-splitting machines in 1808, 1809, and 1813. He was a poor man, and was helped by Jonathan Tidd, of Woburn, at the outset, and was the person to whom John Cummings, Sr., was almoner, as noticed in the text. He died at Billerica in 1841. Cf. Hazen's *History*, 281; Davis' *Manufacture of Leather*, 383. Woburn inventors who have obtained patents for improvements on these machines are John B. Tay, 1855; George Reynolds, 1874; J. D. McDonald and W. Boggs, 1883; E. Cummings, 1883-85. The machines of John D. McDonald and William Boggs, and of Eustace Cummings are described at length in Davis' *Manufacture of Leather*, pp. 375-8, 380-83.

Other Woburn names connected with inventions used in the manufacture of leather are the following: F. W. Perry and J. B. Pierce, 1866; J. W. McDondd, 1878, 79, '81; E. D. Warren, 1881-82; C. H. Taylor, 1881; J. Maxwell, 1874; J. Parker, 1866; J. H. Hovey, 1882; W. Ellard, 1864, 74; C. A. McDonald, 1872; E. B. Parkhurst, 1878; J. Champion, 1870; C. B. Bryant, 1883; J. T. Freeman, 1885-86; William H. Wood, 1884. Cf. Davis' *Manufacture*, pp. 235, 334, 335, 408, 439, 440, 466, 467, 551, 615. James W. McDonald's invention of an unhairing machine is mentioned in the *Encyclopædia Britannica*, 9th ed., suppl., vol. iii., p. 577.

²Of some interest in this connection are lithographic plans of house-lots, belonging to Josiah Fowle, in this same neighborhood, of date 1849 and 1855. These plans show adjoining tracts of land and streets, besides the location of dwelling-houses, etc. These, with the original drafts, are to be found with the Thompson plans in the Woburn Public Library.

in Woburn, known as the Mishawum House, which, though on the line of the main stage routes, was also approached by way of the Middlesex Canal. This house was advertised as a "Hotel in Woburn" as early as the year 1813, in which year Thomas Murphy from Concord had taken it, describing it as a "pleasant and commodious house, lately owned by Ichabod Parker." It was at that time "half a mile north of the [Woburn] meeting-house, and only nine miles from Charlestown bridge." Pains had then been taken to beautify the garden, to prepare walks and bowling-alleys, and there was also a large fish-pond near, and a variety of game in the neighboring woods and fields; the place was also said to afford many charms to persons fond of exercise and sports. The proprietor, in 1813, had a large hall and could accommodate companies for balls, fire-clubs, canal parties, etc., at the shortest notice; the canal, he said, at its season, afforded a romantic and charming ride. The house was only thirty rods from the canal banks. Small parties could take the packet boat, which arrived from Boston and Charlestown at one o'clock, afternoon, dine, spend the afternoon and the morning of the following day in fishing and gunning, and return at one o'clock, the second day, in the same conveyance, or they could be accommodated with a carriage, if desired. The house was on the direct road from Boston to Billerica, Amherst, N. H., Andover and Haverhill, Mass., and Portsmouth, N. H. The distance from Boston was just far enough to ride without stopping, and boarders were accommodated on liberal terms. The house stood on Main Street, near corner of New Boston Street, on the estate now owned and occupied by Griffin Place. A portion of the building now stands on Kilby Street. Many years before, in 1775, Woburn was on the upper stage route from Boston to Portsmouth, and in 1812 the almanacs speak of the town as being on the road from Boston to Amherst, N. H., all of which coincides with the statement given in the advertisement of the Mishawum Hotel of 1813. In 1828 the hotel was the half-way house between Boston and Lowell for the line of stage-coaches running between these two places, and fourteen stages each way are said to have made this house their frequent stopping-place. Cf. *Woburn Journal*, August 21, 1885.

EVENTS FROM THE GUIDE-POST.—The following list of notable events was prepared at our request by Mr. J. Cushing Richardson, from the files of the *Woburn Weekly Advertiser and Guide-post*, 1846-1848. No. 1 of the former paper was dated Sept. 3, 1846. Vol. I, No. 1: Town-meeting, N. A. Richardson, moderator. Phalanx parade. Notice of Woburn Debating Club meeting and Episcopal services at the town-hall, Sept. 6. Advertisements of the Marion brass band, and of cemetery lots at auction, Sept. 24. No. 2: The daughter of Mr. Hood drowned in the canal near Hon. William Sturgis's. [Mr. Hood was butler for Mr. Sturgis. *J. C. R.*] No. 4: A son of

Mr. B. Collins found drowned in a barrel of water. No. 5: Mr. Symmes buried in a well he was digging at South Woburn. No. 6: Rev. Mr. Sewall engaged for one year to preach at North Woburn (*New Bridge*). No. 7: Decision in cock-fighting case.¹ No. 8: New brick block (Wade's block) built. Debating club. Notice of lecture by Rev. Owen Lovejoy, of Illinois. No. 9: Fire, Isaac Shattuck's house, Richardson's Row entirely consumed. No. 11: A highway robbery, also a burglary. No. 15: Unitarian service. No. 17: Advertisement for volunteers for Mexican War. Volunteers from the town. 1847. No. 28: Notice of a meeting for forming a Liberal Society. No. 31: Notice of lecture by Rev. Mr. Sewall—a lecture on Woburn. No. 37: Change of proprietors of the *Guide-post*. No. 48: Notice of Mr. Sewall, of Burlington, in relation to records of births, marriages and deaths. No. 50: Robbery of the A. and M. Association. Vol. II, No. 1 (Oct. 7, 1847): Mr. L. Cox, Jr., ordained minister of the Second Baptist Church. Advertisement of man lost. No. 2: Complimentary letter to A. H. Nelson, Esq., from the grand jury of Essex County. Married in Nashua, N. H., Rev. Joseph Bennett to Miss Caroline Esty, of Nashua. No. 3: Dr. John Nelson appointed justice of the peace. Card of Dr. T. Rickard. No. 4: Letter from grand jury of Middlesex County to A. H. Nelson, Esq. Notice of military muster. No. 5: Notice of a course of lyceum lectures. No. 6: Fire at New Bridge village. No. 8: The death of the Rev. Joseph Bennett; also notice of his funeral. 1848. No. 16: At a town-meeting held Jan. 18, voted to grant leave to fence the Common. No. 18 (Feb. 27): Mr. John C. Stockbridge installed pastor of the First Baptist Church. No. 19: Mr. Joseph Richardson buried with military honors. No. 23: Town-meeting doings. No. 25: The First Cong. Church call Rev. Jonathan Edwards, of Andover, to be their pastor.

The articles on local historical topics in the paper called *Our Paper* are found by the following references: Woburn in England (references already given in the first part of this article); Liberal Christianity in Woburn, vol. i. (1876), pp. 65, 77, 85; vol. ii. (1876), pp. 1, 9, 17, 29, 37, 39, 57, 65, 73, 85, 86, 90; the Woburn Water Supply, vol. ii., p. 41; the Woburn Press, vol. ii., pp. 54, 62; the Woburn Library, vol. ii., pp. 54, 62, 71, 78, 91; also the issue for 1878, p. 2.

Beginning with the first volume and first number (Oct. 18, 1851) the *Woburn Journal* published the town records of births, marriages and deaths, completing the publication July 5, 1856. The compiler (Nathan Wyman) was also a frequent contributor of obituaries and historical articles to that paper; the last efforts of his pen were eleven articles entitled, "Material for History," on such subjects as tithingmen, bells, strollers, old receipts and bills, Jack Rand, the poetry of Zebadiah Wyman, oration by Abijah Thompson, unpublished letters of members of Count Rumford's family; the first article appeared July 6, 1883, and the last Nov. 23, 1885. The present writer's first piece for the *Journal* appeared twenty-one years ago, on Feb. 6, 1869, and a large number from his pen on historical subjects have appeared since. The Rev. Leander Thompson has also contributed many papers on historical subjects to the *Journal*, and the Hon. E. F. Johnson has been an occasional writer, a unique production of his pen being the "Story of a Hearsay," which appeared in the *Journal* on Sept. 10, 1886.

The principal historical writer in the *Woburn Advertiser* was the late

¹ Cf. *Woburn Journal*, Aug. 5, 1881, for an account of the affair.

Alfred A. Newhall. His most notable contribution was on the houses in Woburn in 1832, first published in 1871, and again, with additions, in 1881-1882, or fifty years after 1832. At that date the taverns were Benjamin Wood's, Marshall Fowle's, John Flagg's, Ira Glover's, —Haines', the Tay Tavern, Daniel Mixer's and the Black Horse. The stores were kept by Bowen Buckman, James Bridge, John Fowle, Zebadiah Wyman, Martin L. Converse, Stephen Nichols, S. T. Richardson, William Grammer and Joel F. Thayer. For population in 1832, churches, school-houses, shoe-manufacturers, bakery, tailor, painter and harness maker, tin manufacturer, leather manufacturers, physicians and lawyers, see his article in *Advertiser*, Nov. 3, 1881. The people, the academy, the canal and Horn Pond are the subject of that for Nov. 10, 1881. The Young Men's Society, the Selectmen and the ministers that for Nov. 24, 1881. The mills, the use of wood and peat, the town meadow, the first shoe-store (about 1838), and the stage to Boston that for Dec. 1, 1881. The streets, Horn Pond Mountain, Rag Rock, the places where town-meetings were held, the questions of temperance and anti-slavery form the subject of an article, Nov. 17, 1881. These were followed by a series of articles entitled, "Observations About Town."

Mr. Charles K. Conn has written some local historical articles for the *City Press*. Mr. Nathaniel A. Richardson, a well-informed authority, has also written some characteristic articles for the *Journal*.

The principal writers on the paper called *Our Paper* were the Rev. William S. Barnes and Librarian George M. Champney.

NED KENDALL.—A reminiscence of the Horn Pond resort is found in an article by a recent writer on the subject of Ned Kendall, the famous Boston bugler (1808-1861). This writer says of Kendall: "In his palmy days he frequently went to Woburn with military and other organizations, as well as with his own 'Boston Brass Band.' The 'Horn Pond House,' near a charming lake and in the midst of delightful scenery, was a place of great attraction to parties of pleasure and recreation. At the tables after the cloth was removed, Kendall's Band would intersperse the speaking with the most choice and enlivening music. Without announcement, without baton and beating of time to lead or to show that he was leader, he and his compeers would internix the most mellifluous strains that graced the occasion; and drew boys and, perhaps, birds to hear the marvelous music." There is to be seen in the antique department of the Woburn Public Library, the picture of one of the encampments of these military organizations near the Horn Pond Hotel. The picture is entitled, "Encampment, Woburn, Mass.," and was drawn by C. Hubbard and lithographed by T. Moore, Boston. The organization encamped was the New England Guard (or Guards), of Boston, with a Boston brass band. Two small cannon are shown in the illustration, though the organization itself is drilling as infantry in the foreground. The field was in rear of the Horn Pond Hotel and on the top of the Academy Hill, and was an open space, the only one, perhaps, on the hill; the remainder of the hill being then covered with woods. It was on Warren Street, and to the south of present Sturgis Street. The time was the last week of June, 1838. Cf. *Woburn Journal*, Feb. 23, 1883. The Salem corps of cadets were accustomed to encamp in a field adjoining Horn Pond, being a part of the Josiah Richardson farm, till a comparatively recent date.

One who remembers those days,¹ says of one of

these military jollifications at the Mishawum House, that the boys outside were entertained by parties throwing out oranges from the upper windows of the hotel among them, to see the boys scramble to get them. Our informant was one of the boys who witnessed the performance, and was a party with them. The wanton extravagance and drunken carousals of these organizations, on these occasions, no doubt, brought the military into disrepute among the sober-minded citizens of Woburn, and did much to lower the true military spirit which should exist in all communities for the safety of the commonwealth and nation.

OTHER MATTERS.—We have no desire to describe the various *isms* which have affected the community in the years since the beginning of the century. Whatever has been sensible in them has been appropriated by the common-sense of the community. Nor will we describe the various political contentions that have arisen and excited unusual attention from time to time. In 1834 and 1835 occurred some trouble about the election of some representatives, and two publications have been preserved which were issued concerning it,—one was a remonstrance against the election of John Wade and others as representatives, 1834, and the other a report of the committee on elections, case of J. Wade and others, returned as members from the town of Woburn, 1835. Mr. Nathaniel A. Richardson, of Winchester, who was in public life at about that time, probably knows more of those exciting days, and their inside influences, than any one now living.

In 1842 the original first church of Woburn celebrated its two hundredth anniversary; and the town, coeval in its organization with the history of the church, took no particular notice of its own bi-centennial anniversary. In 1845 was opened a new cemetery on Salem Street. An original printed programme of the exercises at its dedication is to be seen in the antique department of the Woburn Public Library; and a copy of the original printed programme of the two hundredth anniversary of the church, in 1842, is in the present writer's possession, and another copy of the same programme was given by him to the Winchester Historical Society. Such prints are now scarce. The new cemetery was dedicated October 30, 1845. The ceremony consisted of an invocation by Rev. Webster B. Randolph, voluntary by the Marion Band, reading of the Scriptures by Rev. Silas B. Randall, original hymn by Mrs. Mary L. Bennett, address by Rev. Joseph Bennett, consecrating prayer by Rev. Luther Wright, hymn, Old Hundred, and the benediction by Rev. Silas B. Randall. The day was Tuesday, and the weather fine. The ceremony commenced at one o'clock, afternoon, and continued about one hour. It was interesting to the one thousand or more persons present,—a large out-door audience for Woburn at that time. The original section of the enclosure was designed

¹ Dr. Ephraim Cutter, born 1832.

by Amasa Farrier, and laid out under the direction of a committee composed of Abijah Thompson, Oliver C. Rogers, Moses F. Winn, Samuel T. Richardson and Nathaniel A. Richardson. The last-named gentleman is the only survivor of that committee at the present time. The area has been enlarged, and now contains entrances on Salem, Charles and Beach Streets. By the donation of \$5000 by the will of Sewall Flagg, in 1866, a tract of eleven and three-quarters acres was acquired, which was added to the original yard, and is now laid out into lots in general use. Another section of over six acres being added by purchase, the whole area is twenty-eight acres. In 1873 a plan of the whole was made by J. R. Carter, C. E., and in 1874 a new receiving tomb was built. Cf. *Woburn Journal*, Jan. 9, 1875. The first one buried in this cemetery was Jephthah Munroe—Larch Path, near receiving tomb. A manual of Woburn Cemetery, containing lists of the lots and their owners, with a historical sketch, the by-laws, town votes, etc., was published in 1877. An account of its funds was published in the town report for Feb. 29, 1888, pp. 94-105.

Another cemetery was opened by the Roman Catholic sect, at Montvale, in 1856.¹

The great fire at Woburn Centre, loss estimated at first accounts at \$75,000, occurred March 6, 1873. It was the most destructive fire which ever occurred in Woburn, was discovered at half-past six o'clock in the evening, and at seven o'clock it was apparent that the town fire apparatus could not cope with it, and help from other places was sent for. Boston sent two engines and a hose-carriage, and Stoneham and Winchester an engine each. The aid which they were ready to render was frustrated by the lack of water. The fire was occasioned by the explosion of a kerosene lamp. The burned district covered an area of nearly four acres, on Main, between Everett and Walnut Streets. This plot was occupied by two wooden blocks of two and a half stories each, owned by Joseph Kelley, the edifice of the Methodist Episcopal Church, a two-story furniture store, belonging to G. W. Pollock, a small wooden building occupied as a shoe-store by C. W. Nute, all on the street, and the Methodist parsonage house in the rear. At eleven o'clock that night not one of these buildings remained standing. The losses were Strout's photographic establishment, in the upper story of Mr. Kelley's building, the building itself, the Methodist Church and parsonage, Barrett's barber establishment, Still's confectionery store, Philip Teare's tailor shop; Frank Flint, shoe-dealer's supplies; S. F. Thompson, civil engineer; C. W. Nute, boots and shoes; G. W. Pollock, furniture; the Literary Insti-

tute, fixtures, etc.; Cyrus Tay, grocer, and Leonard Thompson, Jr., hardware. Several accidents occurred during the fire, but none of them serious. The fire, in its progress, threatened other buildings, such as the Lyceum Hall and Bank Block and others, whose occupants prepared for removal. It was considered remarkable that the fire did not extend further. The day of the fire was Thursday, and the ruins were smoking lively Friday forenoon, but the danger was then passed. No water had then been let into the water-supply pipes which had been laid in the streets, by reason of the pumping-engines not being completed. Mr. Kelley's block, known as Knight's building, was erected in 1840, and in it several newspapers had been published. The High School was first begun in it and the Methodist Society. The Methodist Church edifice was built in 1843 by the Universalists, and was afterwards owned by the Unitarians, being bought by the Methodists in 1867, and remodeled and enlarged. The parsonage had never been occupied and was just completed. But one family, that of Mr. Still, the confectioner, lost their home by the fire. The want of water on this occasion showed the desirability of completing in haste the water-works then in preparation.

Several years ago, July 8, 1886, an account, with illustrations, appeared in the *Boston Globe*, of the Walnut Hill shooting range, which was established in Woburn by the Massachusetts Rifle Association, in 1876. The range is near the line of the Boston and Lowell Railroad (now the Eastern Division of the Boston and Maine), in the easterly part of Woburn, between the Walnut Hill Station and North Woburn Junction. The targets are in the neighborhood of the Buck Meadow of antiquity, and are in sight from the cars, but the shooting-house is about half a mile from the railroad, and is reached from the Walnut Hill Station by a waiting barge. This building is located at the ancient Button End quarter of Woburn. The shooting-house and its uses are fully described in the article referred to. The riflemen are civilians and military, and the place is in frequent use. The land belonging to the range extends about two-thirds of a mile parallel with the railroad, and its width is about a quarter of a mile. The first shoot at these grounds occurred November 16, 1876, a 200-yards range being then completed, and about thirty members of the Rifle Association participated. Later in the month, November 28th, a second shoot occurred, and a target for 800-yards range was ordered. The by-laws and shooting rules of the Massachusetts Rifle Association, with a list of officers and members, was printed at Boston, 1877, 30 pp., the number of members being then 131.²

¹ Daniel B. Measures, weaver, for \$100, conveyed to Michael Ferrin, Hugh Kenney, Patrick D. Clady, Patrick Calman and Patrick F. Brown, executive committee of the Woburn Catholic Cemetery Association, land in East Woburn, Jan. 30, 1856. Michael Harney's child was the first person buried in the place. The child died March 12, 1856. - E. F. J.

² Directories of Woburn were published by John L. Parker, 1868, 1871, 1874, 1877; by Lemuel G. Trott, 1881; by Mark Allen, 1883, 1886, and W. A. Greenough & Co., 1889. These useful publications contain a great deal of information regarding other matters in the town than the list of the residents merely, and can be consulted with profit by any one wishing to know about the business performed in the town, etc.

Mr. Johnson, first mayor of Woburn, will here give an account of Woburn as a city, and present some observations and facts not alluded to heretofore.

CHAPTER XXVI.

WOBURN—(Continued).

WOBURN AS A CITY.

BY EDWARD F. JOHNSON.

As early as 1872 the incorporation of Woburn as a city was looked upon as an event of the near future. In the ten years preceding that date the town had increased in population from 6500 to 9350. The number of its polls in May, 1872, was 2891, as compared with 1760 ten years before, while its valuation during that period had increased from \$4,653,000 to \$8,718,000. This decade was indeed the most prosperous one in Woburn's history, and it is certainly a remarkable fact that the valuation of the town on May 1, 1872, should be greater than it was sixteen years later, when it received its charter as a city, and when its population was twenty-five per cent. larger. This decrease in valuation, however, is attributable to the loss in assessed personal property, a loss which has exceeded the gain in assessed real estate during the same period. From 1862 to 1872 the assessed valuation had increased nearly 100 per cent., and, assuming that the future might safely be judged by the past, the selectmen at that time estimated the taxable valuation of the town in 1892 at \$32,000,000! Resting on this happy financial hypothesis, they felt warranted in incurring debts for posterity to pay.

In their report for the year ending March 1, 1873, the selectmen make the remark that "another year or two will give us a population entitling us to incorporation as a city." In their next year's report the selectmen refer to the same subject in the following language: "Unfortunately just now our population is too large for the proper management of local affairs under our present system and too small to come under such restrictions and regulations as a city charter gives for the control of affairs of large communities. With our present population town-meetings are likely to be for the next three or five years fine specimens of parliamentary tactics and legislative wisdom."

This last sentence, it is almost needless to remark, is somewhat ironical. Since the days of the war our town-meetings had degenerated from a deliberate and orderly assemblage of a few hundred citizens or less, into a noisy, turbulent gathering of seven or eight hundred men, pushing and jamming one another to secure a seat, or even standing-room, in Lyceum Hall which could not accommodate one-third of the voting population of the town. It was, therefore, always

within the power of a few hundred citizens, by securing an early admittance into the hall, to effect a practical disfranchisement of their fellow-citizens. With the increase in population these evils became more apparent and less easy to avert or control, and with the great mass of conservative and thinking citizens the sentiment in favor of a city charter grew rapidly.

Another ten years had to elapse, however, before Woburn's population was such as to give the advocates of a city charter an opportunity to petition for a change in the form of government. The population in the town on May 1, 1882, as ascertained by the assessors, was 11,759, or within 241 of the required 12,000. Moreover, the annual increase in population since 1878, had been almost uniform, and for the five years ending May 1, 1882, it had averaged 265 a year. If this ratio of increase continued the population of Woburn on May 1, 1883, would be 12,024.

Relying on these statistics, a petition was presented to the selectmen on January 2, 1883, signed by Hon. John Cummings and fifty-four others, asking that a town-meeting be called "To obtain an expression of opinion relative to petitioning the Legislature for a city charter." The town-meeting was held January 18th, when it was voted *viva voce*, and almost unanimously, to petition the General Court for a city charter; and the selectmen and ten other citizens were appointed a committee to prepare such petition and take such other action as might be found necessary. The selectmen were also authorized to take a census of the town if deemed necessary to establish the fact that Woburn had the requisite 12,000 inhabitants to entitle it to become a city.

A town-meeting was subsequently held on February 9, 1883, when the opponents to a city charter rallied in sufficient numbers to have laid on the table for two years a motion which was made to the effect that the expense of taking the census of the town authorized at the previous meeting be paid out of the Miscellaneous Department. The committee having the question of a city charter in charge thereupon decided to ask the General Court for a charter to be granted on condition that Woburn had the requisite number of inhabitants, leaving the question of population to be determined afterwards. This course of action was therefore adopted, and a hearing was had at the State House before the committee on cities. As no one appeared before this committee to object, it was much to the surprise and disappointment of the petitioners that the committee voted to refer the matter to the next Legislature, for the reason, as alleged, that there was no record of a count of votes to show that a majority of those present at the town-meeting had voted to petition for a charter. The reason thus assigned by the General Court for its adverse report was looked upon as a mere pretext, but the petitioners were doomed to disappointment in any event; for the result of the census which was taken by the assessors in the following May showed that the population

of the town, instead of increasing in the ratio of preceding years, had actually fallen off 305; so that the population was then only 11,454. These figures settled the question of a city charter for the time, although some enthusiasts proposed that Burlington be annexed in order to secure the requisite number of inhabitants.

The State census of 1885 gave Woburn a population of 11,750, and the enumeration of the inhabitants made by the assessors in May, 1887, showed an increase to 12,760. The matter of population thus being settled, a town-meeting was held on July 27, 1887, when a committee of twenty-one was appointed to prepare a city charter for the acceptance of the town. This committee reported a printed draft of a charter to a meeting held October 31, 1887, which charter, after some discussion, was adopted by a vote of 280 to 9. It was further voted to apply to the next Legislature for an act of incorporation as a city. In pursuance of this vote application was made to the General Court in January, 1888, and on May 18, 1888, the charter submitted by the committee on behalf of the town was enacted by the Legislature with some slight amendments. It came up for acceptance or rejection by the voters of the town at a special meeting held June 12, 1888. The polls remained open all day, and the charter was accepted by the decisive vote of 966 to 32. As soon as the result was announced, twenty-five blows on the fire-alarm alternated with an equal number of peals from the cannon to emphasize the verdict of the citizens in declaring Woburn to be the twenty-fifth city in the Commonwealth of Massachusetts.

The charter thus adopted by the town provided for a city government, consisting of a Mayor, seven Aldermen, eleven Councilmen and a School Committee of nine elective members with the Mayor chairman *ex officio*. The town was to be divided into seven wards, three of which were represented by the villages of Montvale, North Woburn and Cummingsville. The Mayor and School Committee were to be elected by the voters at large, while the Aldermen and Common Councilmen were to be chosen by and from the voters of each ward. In its general features, and in the distribution of powers and privileges, the charter was in other respects a substantial embodiment of the charters of most Massachusetts cities.

At the first election held December 4, 1888, the following officers were chosen: Mayor, Edward F. Johnson; Aldermen, Squire B. Goddard, Julius F. Ramsdell, William C. Kenney, John S. True, Michael Golden, Andrew R. Linscott, John A. Doherty; Common Councilmen, William H. Bradley, Thomas G. Beggs, Charles W. Bryant, Stephen H. Bradley, William Beggs, Joseph M. Gerrish, Edward E. Thompson, Griffin Place, William McDonough, Henry M. Eames, William A. Lynch. On January 7, 1889, these gentlemen were sworn into office, the inaugural ceremonies taking place in Lyceum Hall in the presence of a large gathering of citizens.

Woburn was, in reality, the twenty-seventh town in Massachusetts to become a city, although the annexation by Boston of the cities of Charlestown and Roxbury makes her stand twenty-fifth in the roll of cities existing at the time of her incorporation. In population and valuation Woburn's rank on January 1, 1889, was below that of her sister municipalities, but in extent of territory she exceeded ten out of the other twenty-four cities, containing a larger assessed acreage than the neighboring cities of Somerville, Cambridge and Chelsea combined, and being two and one-half times larger than the city of Malden.

Her valuation on May 1, 1888, was \$8,575,000, and her net debt on January 1, 1889, was \$461,746.74, or about 5.4 per cent. of the valuation. Her dwelling-houses on May 1, 1888, numbered 2085, and her male polis 3672. Such, in brief, was the status of the municipal corporation of Woburn when the administration of its affairs was transferred from a town to a city form of government.

CHAPTER XXVII.

WOBURN—(Continued).

THE MEDICAL AND LEGAL PROFESSIONS: COLONIAL, PROVINCIAL AND LATER PERIODS.

BY W. R. CUTTER.

THE MEDICAL PROFESSION.—The earliest practitioner of medicine or of the science of healing, of which there is any record in Woburn, was a woman; and as it is known on indubitable testimony that she was very skillful in the art, she was no disgrace to the profession. Most of the practice, particularly in certain branches, was in the hands of members of the female sex. The employment of regular physicians from Boston or from adjoining towns was occasionally resorted to in the early period of the town's history, as instanced in the records or in the inventories of the estates of the more well-to-do citizens. The name of a physician of the sterner sex does not appear with the accustomed title till seventy-five or eighty years after the town's incorporation, as will be noticed in the appended list. The stay of some of these doctors appears to be of brief continuance. Others were young men just starting in their medical career. Others were members of the Woburn families by birth or marriage connection. One was of enforced residence, viz., Dr. George Bruscowitz, the French Neutral, from Nova Scotia. Several died comparatively young. A few only appear to have received a liberal education. Doctor John Kittredge, of Billerica, is the earliest non-resident physician named by his title in the tax-lists, being taxed in Woburn, 1712. He died in 1714, and there is evidence in the records that the town authorities em-

ployed him on one case in their charge.¹ Other non-resident physicians named in the tax-lists previous to 1800 are David Fiske, of Lexington, 1781-1782; William Bowers, of Billerica, 1787-1794; John Hale, of Hollis, N. H., 1784; Amos Putnam, of Danvers, 1784. These may have had a connection more or less intimate with the town and its people, as the old records show. Fiske's father, likewise a physician, had been a resident. Other names, perhaps, might be added to the list, and some well known to Woburn residents we defer till later on. This is not the first attempt to write a history of Woburn's early physicians. The father of the present writer, Doctor Benjamin Cutter, began the task many years ago, and collected a number of names. More than forty years ago, or about 1843, he began a list of the early physicians of Woburn, which list is still extant. His list includes the names of Lilley, Brewster, Prince, Boscoitz (Bruscowitz), Hay, Flagg, Blodgett, Poole and Plympton, the eldest, covering a period from 1720 to 1783, and he appears to have depended upon the First Parish records for his principal source of information. He was then interested in collecting some material for a brief history of the First, now the First Congregational Church, and for the history of the town, which had then passed its second centennial. This material was much of it incorporated into a printed church catalogue issued at that time (1844). To Doctor Cutter, also, we owe the recovery of the following lengthy statement regarding the skillful performance of a remarkable cure by the earliest known physician of Woburn residence of which we have any knowledge. In 1847 he copied the following extract—his copy being extant—regarding the performance of GOODWIFE BROOKS in a medical way upon the head of a poor Indian child, who had been scalped and badly injured in a foray of hostile Indians.

Extract from Gookin's *Historical Collections of the Indians in New England*, chap. 4, § 7. From *Mass. Hist. Coll.*, vol. 1, p. 163. "These Maquas, as I said before, are given to rapine and spoil; and had, for several years, been in hostility with our neighbour Indians; as the Massachusetts, Pawtucketts, Pennakooks, Kennebecks, Pokontakukes (living at Deerfield), Quahugs, all the Nipumek Indians and Nashaway or Weshakim Indians. And in truth, they were, in time of war, so great a terror to all the Indians before named, though ours were far more in number than they, that the appearance of four or five Maquas in the woods would frighten them from their habitations and cornfields, and reduce [induce?] many of them to get together in forts; by which means they were brought to such straits and poverty, that had it not been for relief they had from the English, in compensation for labour, doubtless many of them had suffered famine. For they were driven from their planting fields through fear, and from their fishing and hunting places; yea they durst not go into the woods to seek roots and nuts to sustain their lives. But this good effect the war had upon some of them, namely, to turn them from idleness; for now necessity forced them to labour with the English in hoeing, reaping, picking hops, cutting wood, making hay, and making stone fences and like necessary employments, whereby they got victuals and clothes.

"These Maquas had great advantages over our poor Indian neighbours, for they are inured to war and hostility; ours, not inured to it. Besides, the manner of the Maquas in their attempt gives them much advantage

and puts ours to terror. The Maquas' manner is, in the spring of the year, to march forth in several ways, under a captain and not above fifty in a troop. And when they come near the place that they design to spoil, they take up some secret place in the woods for their general rendezvous. Leaving some of their company, they divide themselves into small companies, three or four or five in a party; and then go and seek for prey. These small parties repair near to the Indian habitations and lie in ambushments by the pathsides, in some secure places; and when they see passengers come, they fire upon them with guns; and such as they kill or wound they seize on and pillage, and strip their bodies; and then with their knives take off the skin and hair of the scalp of their head, as large as a satin or leather cap; and so leaving them for dead, they pursue the rest and take such as they can prisoners, and serve them in the same kind; excepting at sometime, if they take a pretty youth or girl that they fancy, they save them alive; and thus they do, as often as they meet any Indians. They always preserve the scalps of the head carefully, drying the inside with hot ashes; and so carry them home as trophies of their valour, for which they are rewarded.

"And now I am speaking of their cruel and murderous practices, I shall here mention a true and rare story of the recovery of an Indian maid, from whose head the Maquas had stripped the scalp in the manner before mentioned, and broken her skull, and left her for dead; and afterward she was found, recovered, and is alive at this day. The story is thus:²

"In the year 1670, a party of Maquas, being looking after their prey, met with some Indians in the woods, belonging to Naamkeek, or Wamessit, upon the north side of Merrimack river, not far from some English houses; where, falling upon these Indians, that were travelling in a path, they killed some and took others whom they also killed, and among the rest, a young maid of about fourteen years old was taken, and the scalp of her head taken off and her skull broken, and left for dead with others. Some of the Indians escaping came to their fellows; and with a party of men, they went forth to bring off the dead bodies, where they found this maid with life in her. So they brought her home, and got Lt. Thomas Hinchman, a good man, and one that hath inspection over them, by my order, to use means for her recovery;³ and tho' he had but little hope thereof, yet he took the best care he could about it; and as soon as conveniently he could, sent the girl to an ancient and skillful woman living at Woburn, about ten miles distant, called GOODWIFE BROOKS, to get her to use her best endeavours to recover the maid; which, by the blessing of God, she did, though she were about two years or more in curing her. I was at Goodwife Brooks' house in May, 1673, when she was in cure; and she showed me a piece or two of the skull that she had taken out. And in May last, 1674, the second day, I being among the Indians at Pawtucket, to keep court, with Mr. Elliott,⁴ and Mr. Richard Daniel,⁵ and others, with me, I saw the maid alive and in health, and looked upon her head, which was whole, except a little spot as big as a six-pence might cover, and the maid fat and lusty; but there was no hair come again upon the head where the scalp was flayed off. This cure, as some skillful in chirurgery apprehend, is extraordinary and wonderful; and hence the glory and praise is to be ascribed to God, that worketh wonders without number."

THIS GOODWIFE BROOKS was Susanna, wife of Henry Brooks, of Woburn [see Brooks family in *N. E. Hist. Gen. Reg.* (April, 1875), vol. xxix., p. 153]. She died September 15, 1681. Her husband married again, and died April 12, 1683. She had been first the wife and widow of Ezekiel Richardson, one of the first settlers of Woburn—Vinton's *R. Mem.*—and for proof of this see that work, p. 37; and for other facts concerning her, see *ib.* pp. 32-37. The Lieuten-

² The Maquas were the well-known Mohawk Indians. See further treatment of the subject of this extract in its relation to our local Indians, in *Woburn Journal*, Jan. 5, 1883.

³ Lieut. Thomas Hinchman was connected with the Richardson family of Woburn, through a daughter's marriage—Vinton's *R. Mem.* 41-43. of the family in which this marriage connection was formed Goodwife Brooks was the mother—see mention beyond under her name. Hinchman was an able officer of repute.

⁴ The well-known apostle to the Indians.

⁵ Gentleman, of Billerica.

¹ Cf. Woburn Records, v. 220.

ant Henchman named in the text was connected indirectly with her family by marriage, Bridget Henchman, his daughter, having married Lieutenant James Richardson, a son of the above Goodwife Susanna, so famous in her day for her extraordinary medical or surgical skill.

PHYSICIANS.—Of physicians resident in the place, named in the records, are the following before 1850.

DOCTOR PETERS, 1719-1720.

DOCTOR REUBEN LILLEY, 1722-1723, son of Reuben and Martha, born February 24, 1696-97. Died October 17, 1723, in Woburn, at the age of twenty-six.

DOCTOR ISAAC HILL, 1723. "Doctor" on gravestone in Woburn first burying-ground. Died January 9, 1723, aged twenty-nine. Supposed to have been the Isaac, son of Isaac Hill, born December 1, 1693, mentioned in Savage's *Geneal. Diet.* He does not appear to be long a Woburn resident. The suggestion is offered that he may have belonged to Stoneham, originally and then a part of Charlestown, and that dying before a burying-ground had been established in Stoneham, his interment, as that in another case, was effected at Woburn. This would account for the want of mention of him in Woburn records.

DOCTOR JONATHAN HAYWOOD or HAYWARD, 1736-1749. "Doctor" per inscription on gravestone in Woburn first burying-ground. Died August 13, 1749, aged 45. Taxed in Woburn, 1736-1748. He graduated at Harvard College, 1726; married Ruth Barbeen, of Woburn, 1735. Was a selectman, 1741. See Sewall's *Woburn*, pp. 590, 595. A son of the same name graduated at Harvard College, 1756, and died a pauper in Woburn, 1812, aged seventy-three.

The following relic of this family has been preserved, having reference to Prince Walker, a negro slave and centenarian of Woburn origin, an account of whom is given elsewhere:

"WOBURN, July 10, 1751.

"For value received, I have this day sold to Mr. Timothy Walker, a Negro boy, named Prince, which I have owned for some time past.

"RUTH HAYWARD."

—See *Diaries of Rev. Timothy Walker*, ed. and annotated by Joseph B. Walker, Concord, N. H., 1889, p. 25, note.

DOCTOR LOT BREWSTER, 1750-1764. He died in Woburn, January 13, 1765. A parcel of curious papers is preserved in the *Wymen Coll.* (box 11), in the Woburn Public Library, relating to the settlement of his own and his wife's estate. Dying as above stated, the inventory of his estate is dated February 25, 1765. It mentions, among other articles, two volumes of practical physic, books, a leather bag, a wine-glass, glass bottles, gallipots, two cases of apothecary drawers, a book-case, small desk, chest with a drawer, a pair of tooth-drawers, two lancets, scales and weights, a pestle and mortar of lignum-vitæ. The whole inventory amounts only to £20 11s. 6d. His widow Lucy, died, according to her inventory, June 12, 1765. Her property consisted principally of debts and woman's clothing, with a little jewelry.

Her goods were sold at vendue at house of the widow Phebe Richardson, in Woburn, proprietress of a tavern which stood on the site of the late Daniel Richardson's house, and known by the name of the Ark Tavern. This house had been kept previously by Noah Richardson, husband of Phebe, whose ancestors, being Walkers, had previously kept the house before her time and that of her husband. Her ancestor, Captain Samuel Walker, who died in 1684, was the first person licensed in the town of Woburn to keep a tavern in the place. The widow Lucy Brewster appears to have died at Mrs. Richardson's house, and Mrs. Richardson brings in a bill against the estate for nursing in her last illness, and for furnishing refreshment (punch, etc.) for the funeral.

The following memoranda, from one of the documents above cited, is interesting to show the state in which the affairs of this poor doctor's family were left.

March 4, 1765, the judge of probate gave all Dr. Lot Brewster's estate to his widow forever.

The widow before her death disposed of, and spent and lost, the value of £8 3s. 4d., and £12 11s. 2d. remained and was added to the inventory of her estate.

Some of the articles she sold and lost were the books, the leather bag ("took off" they said), bottles, the two cases apothecaries'-drawers, the book-case, a "bow-fat," one pair tooth-drawers and a lancet, a silver spoon, which did not belong to the estate; a cow, a saddle, etc. All these, says the memorandum, were sold and lost after the judge gave it (her husband's estate) to her. There is also a son, William Brewster, of these parties mentioned.¹

Where this Doctor Lot Brewster came from before his settlement in Woburn does not appear. There was a Lot Brewster, born March 25, 1724, son of William, of Duxbury, mentioned in Winsor's *History of Duxbury*, p. 237, who may be the same. He was possibly an apothecary. He does not appear to be a college graduate. What his first success may have been, his end would seem to show that doctors in his time did not flourish in such a country place as Woburn then was, and that the profession did not then, outside of urban districts, furnish a very abundant support.

DOCTOR ROBERT FISKE, 1752-62, son of Robert Fiske, a physician of Lexington. In 1760 he was in the French War. In 1764 he returned to Lexington, where the entry is found: "Doctor Fiske and family came last from Woburn." See Hudson's "Lexington." Doctor David Fiske, of Lexington, his son, was taxed in Woburn, 1781-82. This son was an inmate of Benjamin Edgell's family, arriving February 11, 1771. See mention under Doctor Samuel Blodgett, of Woburn.

DOCTOR JOHN PRINCE, 1754-60. A town order (Neutral French) dated May 31, 1756, in favor of Dr.

¹ A William Brewster was a soldier from Woburn in the Revolutionary War.—See Sewall's *Woburn*, 568.

John Prince, "for doctoring the French in this town" (autograph, John Prince), is about the only memorial of him extant in this place. (*Wym. Coll.*, Wob. Pub. Liby., 8-41.) Cf. Sewall's *Wob.*, 561, 562. Another specimen of his autograph is extant as witness to a deed, October 21, 1755 (*Wym. Coll.*, 11-80). His signature is a well-written one.

DOCTOR WRIGHT, 1755.

DOCTOR GEORGE PHILIP BRISQWITZ, 1756-57, one of the Neutral French, then resident in Woburn (Sewall's "Woburn," 558-563). His name is written variously, but his own signature extant on a town order (Neutral French) dated February 21, 1757, writes and spells it as we have given it. On this order he styles himself "Med: Doctor in Woburn." (*Wym. Coll.*, Wob. Pub. Liby., 8-59.)

DOCTOR EDMUND RICHARDSON, 1761, son of Noah and Phebe (Walker) Richardson. "Doctor" per grave-stone in Woburn first burying-ground. Died May 30, 1761, in his twenty-ninth year. Aside from his family we have no further information concerning this person. The statement on his grave-stone is the only warrant for calling him a physician. Perhaps he was a pupil of the Doctor Lot Brewster, whom we have already noticed.

DOCTOR JOHN HAY, 1761-80. A better known name than any we have yet mentioned, from his fame as the medical preceptor of the celebrated Benjamin Thompson, Count Rumford. (*See Ellis' Life*, pp. 31-39.) The period of the Count's pupilage was from 1770 to 1772, when the Count was quite a young man. Doctor John Hay and Sarah, his wife, were admitted members of the Woburn First Church July 8, 1765. His father was a well-known physician of Reading, and having begun his practice at Woburn, the younger Doctor Hay, after the death of his father, returned to Reading, where his death occurred, 1815, aged seventy-seven. During the Revolution he served in the American forces as one of Woburn's quota, and a town order on account of military service of John Hay, dated March 20, 1777, is preserved in the Woburn Public Library; also a bill against his former Woburn neighbor, Benjamin Edgell, dated September 27, 1783. For some particulars regarding his life see Eaton's *Hist. Reading*, pp. 91-92 and 398, in which is presented a silhouette likeness of the doctor and a cut from an original portrait of his father. After 1780, when his residence in Woburn appeared to end, he still appears to hold property in Woburn, for his name is mentioned in the tax-lists, as a Reading resident, from 1781 to 1786. At Woburn he resided in the house at present Central Square, known by the name of the Black House, which stood on the present Kimball place, 732 Main Street. This house, which was old when torn down, was a noted landmark and has a curious history.

Doctor John Hay was chosen to the office of a deacon of the First Church, November 17, 1777, but appears never to have held the office. His name is in

the list of male members of that church on December 1, 1777. In a later hand appears the words against his name of "out of town." In 1793 the list speaks of him as of Reading and as "absent."

DOCTOR JOHN FLAGG, 1765-67. A native of the town, a graduate of Harvard College (1761), and after his removal from Woburn a well-known physician of Lynn, where he died 1793. Lewis and Newhall's *History of Lynn*, gives him an excellent record, p. 358, etc. He settled in Lynn in 1769, and previously, on June 21, 1769, he married, in Woburn, Susanna Fowle.¹ His father, Rev. Ebenezer Flagg, a native of Woburn, a graduate of Harvard College, 1725, was minister of Chester, N. H.

DOCTOR SAMUEL BLODGETT, 1769-89. Not immediately, if remotely, descended from the Blodgett (or Blodgett) family of this town, so far as yet discovered. Doctor Samuel Blodgett, from the church in Sunderland, was received to membership by the First Church in Woburn, January 5, 1772, and Doctor Samuel Blodgett and Jane Gillam, both of Woburn, were married, in Woburn, October 2, 1772. On the testimony of such an authority as the late George Rumford Baldwin the information has come down to us that the house opposite to his mansion, known in recent years by the name of the Wheeler House, was built by Doctor Samuel Blodgett toward the close of the last century, but left unfinished, and sold by him to Colonel Baldwin, father of George R. Baldwin, who finished it so far as to admit of having there a great centennial jubilee in 1800.²

¹ In an account-book of James Fowle, Esq., and Jr., a father and son, 1761, etc., is the following memorandum on the fly-leaf: "Augt. ye 30th, 1769, Susannah moved to Lynn." The inscription on the monument at Lynn to Dr. John Flagg, is given in full in Lewis & Co.'s *Hist. of Essex Co.*, vol. i., p. 301, (a).

² So much has been said about this house in its supposed connection with the proposed return of Count Rumford to this country, it having been stated that the house was built by Col. Baldwin for his occupancy, that it is well to give a few facts concerning it. In 1820 it is described as being on the east side of Main Street, that part of the street now called by the name of Elm Street, the occupant being Archemus Taylor. In 1832 the occupant was Col. Charles Carter. The section of Main Street now immediately in front of this house was not then extant. The entrance from present Elm Street from a large central gateway was lined on either side with rows of trees, chiefly lindens, imported by Col. Baldwin from England. The fence in front was ornamented and took a circular sweep inward at the entrance. In the rear of the house was a short branch of the Middlesex Canal, which sometimes furnished a temporary resting-place for a canal boat. "The whole picture," says the Rev. Leander Thompson in one of his interesting articles, "like that of the Baldwin mansion and grounds, was one of a quiet, well-kept and dignified English country seat, very attractive and restful." About 1811-1814, the Rev. Thomas Waterman, a pastor of the Baptist Church, taught a superior school in this house. His death occurred in the latter year in a sudden manner. A friend of the present writer, Mr. John Brooks Russell, a native of Arlington, went to school in this house in 1815, to the celebrated Hall J. Kelby, the author of one or more text books, who became noted later in his attempts to colonize Oregon.

³ It is in the Old Burying Ground of Lynn, and from it are taken these words: "As a physician, his skill was eminent, and his practice extensive and successful. To Death, whose triumph he had so often delayed and repelled, but could not entirely prevent, he at last himself submitted on the 27th of May, 1793, in the 50th year of his age."

Benjamin Edgell, of Woburn, enters the following items of information in his accounts:

"Doct. Blodgett came June 20, 1769. David Fiske came Feb. 11, 1771—153 weeks, till July 20, 1772. Doct. Blodgett left on July 20, 1772." The two, therefore, were apparently inmates of Edgell's family. The 153 weeks may refer to Blodgett's stay, or to that of both of them. David Fiske, afterwards a doctor at Lexington, evidently standing to Blodgett in the light of a pupil and assistant. The time of Blodgett's arrival and departure from Edgell's is, however, definitely stated—1769-1772.

Again Edgell writes, "Amos Blodgett, Jr., began his year with me, June 12, 1777; Amos Blodgett engaged in the Army, Aug. 18, 1777." Now since it is known that Captain Benjamin Edgell, the recorder of these items, came to Woburn from the place of his former residence, at Lexington, about 1768, and as Fiske and Amos Blodgett were known to belong to Lexington, the supposition is expressed that our Doctor Samuel Blodgett was from Lexington originally also, and that he was a member of the numerous Blodgett family of Lexington, who descended from the old family of Blodgett, of Woburn. We therefore infer he is probably the Samuel Blodgett, born in Lexington April 30, 1727, eldest son of Samuel Blodgett, concerning whom Hudson, in his *Hist. Lexington*, makes no further statement. We also infer he was a former acquaintance or friend, or maybe a relative, of Benjamin Edgell's at Lexington, and that Edgell was the means of his introduction to Woburn. He may have lived for a short time at Sunderland, a small Massachusetts town on the Connecticut River, as his dismissal from the church there would indicate, and he appears to have been a single man when he came to Woburn. Several sketches of Sunderland that we have read make no reference to the name of Blodgett as one of the names of the early settled families in that town, so we infer that he did not originate there. Like many another young physician even in our day, he probably tried one or more places before he settled down permanently anywhere. He appears to have been a man of energy and spirit, and in the Revolution very patriotic. He was in 1773 one of a committee of nine of the town "relative to the public affairs of government" (Sewall's *Woburn*, 359), and also one of the committee of correspondence. Later he was on a committee to draw up instructions for the "committee of inspection" (Sewall's *Woburn*, 382). He

Kelley married a daughter of the distinguished Baptist preacher, Rev. Dr. Baldwin. "The house," Mr. Russell said, "stood on a small canal built up to the house." The school under Kelley's management, however, was a failure. "He had," says Mr. Russell, "but half a dozen scholars, and paid it so little attention that I left after a couple of weeks and went to Westford, Mass." Mr. Russell further says, "I recollect Woburn only as a terribly dull farming town, partaking largely of the depression that was pretty general after the war of 1812."

The house we have been describing was owned by Mrs. F. C. Wheeler in 1880, when the foregoing facts were gathered.

was also a delegate to a constitutional convention at Cambridge in September, 1779 (*Ibid.*, 383). He was also an assessor (*Ibid.*, 368). See other references in Sewall, pp. 435, 568. The latest reference to him in Sewall's *History* is January 4, 1790. In a list of male church members in the First Church records, under date of December 1, 1777, the name of Samuel Blodgett appears, but he is spoken of as "out of town," "returned," "out of town" again. In a similar list in the same records, under date of 1793, he is spoken of as "absent," but it does not say where.

The fact that Dr. Blodgett was from Lexington is still further confirmed by accounts of the transfer of his real estate.¹

There is a letter extant from Doctor Samuel Blodgett, dated Boston, April 1, 1785, and addressed to Mr. Zebadiah Wyman, Woburn. It is as follows:

"BOSTON, April 1st, 1785

"SIR,—If you will be so kind as to get an order from the Selectmen on the Town Treasurer, for the £4 10 0, which the Town Granted me some time past, and send it to me by the first opportunity, you will oblige your friend,

SAM'L BLODGETT.

"MR. Z. WYMAN."

Doctor Blodgett is named in Esquire Thompson's financial accounts as late as August, 1790. He is also mentioned in the same accounts in June, 1789, and in Feb., 1786. He probably left town, therefore, about 1790.

The list of Woburn's soldiers during the Revolution includes the names of two physicians: Samuel Blodgett, and John Hay.

Physicians and clergymen were not ashamed in the earlier part of the war to shoulder their arms and parade in the ranks as private soldiers. In the diary of Rev. John Marrett, minister of the Second Parish in Woburn, is this characteristic entry: June 26, 1775, having attended the funeral of George Reed, Jr., who died of a fever occasioned by a surfeit or heat he got in Charlestown fight, the 17th inst., he says, "also appeared with military company and showed arms."

Doctor Blodgett was an active patriot. Rev. Mr. Marrett records, under date of Sunday, April 23, 1775: "Soldiers travelling down and returning—brought

¹ My friend, Hon. Edward F. Johnson, first mayor of Woburn, contributes the following items from the Middlesex County records:

May 26, 1777, Joseph Simonds, of Lexington, conveys to Samuel Blodgett, of Woburn, physician, for £160 13s. 4d., two parcels of land, one of 35 ac. and the other of 10 ac., with buildings in Lexington. June 1, 1777, Dr. Blodgett sold his Lexington purchase to John and Jonathan Amory, of Boston.

Previously, on April 8, 1777, he had sold for £550, to Jonathan Amory, of Boston, 28 ac. land and buildings in Woburn, bounded west by county road, north by lands of Joshua Reed and William Scott, east by land of Deane Flagg Poole, deceased, and Isaac Stone, and south by land of Joshua Wyman. Also a pot-ash house standing on west side of said county road, opposite above named buildings. Jane, his wife, makes in said transfer.

The buildings of this estate in Woburn stood on the present site of the house of Dr. Harlow, on Main Street, and the pot-ash house on the site of the estate opposite, now Dr. Hutchins's; on the estate of the latter is a never-failing well, formerly connected with the potash works.

—Statement of Miss Susan Edgell.

their arms with them to meeting, with warlike accoutrements—a dark day. In the forenoon service, just as service was ended, Dr. Blodgett came in for the people to go with their teams to bring provisions from Marblehead out of the way of the men-of-war."

DR. JOHN (EBENEZER?) PERRY, 1772-1774.

DOCTOR JONATHAN POOLE, 1781-1782. Of Hollis, N. H., 1783. Born Woburn, Sept. 5, 1758, son of Eleazer Flagg Poole. Studied medicine with his father-in law, Doctor or Colonel John Hale, in Hollis, whose daughter Elizabeth he married, Dec. 7, 1780. He was assistant surgeon in First New Hampshire Regiment 1776 to 1780. After trying his practice at Woburn, he settled as a physician in Hollis, where he died July 25, 1797, *æt.* thirty-eight. See *Worcester's History Hollis*, p. 214.

DOCTOR SYLVANUS PLYMPTON, 1784-1836. Died in Woburn, Jan. 20, 1836, aged seventy-six. A native of Medfield, Mass., where he was born, 1757 (Tilden's *Hist. Medfield*, 462). He graduated at Harvard College, 1780. He married Mrs. Mary Richardson, of Woburn, May 12, 1785. Both joined the First Cong. Church on Oct. 16, 1791, and on Oct. 30, 1791, Luke Richardson, son of Mrs. Plympton by a former marriage, Czarina and Mary, daughters of Dr. Sylvanus Plympton and Mary, his wife, were baptized. His wife was the widow of Luke Richardson and the daughter of Josiah and Margery (Carter) Fowle, *R. Mem.*, p. 272. His wife, Mary, died Nov. 1, 1835, aged seventy-four. To the memory of Dr. Plympton and Mary, his wife, a new stone was erected in the Second Burying-Ground a number of years since. There appears to be some discrepancy in the year of his death as given by various authorities, and the same may apply to his age, but 1836 is the year given in the town records.

Through the kindness of Mrs. Ellen J. Harrington, of Woburn, a granddaughter of Dr. Plympton, we have been permitted to have the use of several very interesting papers relating to the history of her grandfather.

(1). A manuscript sheet endorsed: "Account of my Expenses while at College," the body of which is as follows:

"A Memorandum. Sylvanus Plympton, Junr., arrived at Dartmouth College, Sunday evening, September 23d, 1776; dined with D. D. Wheelock, President; 23d, examined and accepted by Messieurs Ripley and Smith, Tutors in sd. College. Mr. Townsend and my Father departed from College, 26th inst. I received a letter from Mr. Townsend soon after informing me of their Journey, and desiring a favor with regard to something left behind. D. D. Wheelock died April 24, 1779; after which I returned to College, and took a dismission with a recommendation from that Society from Mr. Ripley afores'd, May 31st, 1779. And find my expenses since my admittance into that Society, according to the most just and critical calculation, including books with all other incidental charges, [to] amount to £277 11s. 6d. After this I went to Cambridge, and was examined by the President, Professors and Tutors; was approved and admitted, August 20th, 1779. Settled all accounts and took up all obligations at Cambridge, 23d June, 1780, and find my expenses to have been since my first admittance into Dartmouth College to this time, to have been (including books and other incidental charges) one thousand two hundred and seventy-four pounds, or £1274 7s. 1d."

(2). The bond required by the Faculty of Harvard College on his admission as a student, dated August 20, 1779, containing the autographs of four members of his family, viz.: Sylvanus (his father), Jonathan, Augustus and Chloe Plympton. One remarkable circumstance in relation to this document is, that the words "a minor" are obliterated, the student being more than twenty-one years old. This paper is endorsed: "Mr. Plympton's Bond."

(3). A letter endorsed "Mr. Jona. Townsend's Letter and Advice," dated "Dartmouth College, Sept. 25, 1776." The letter is admonitory, written by the minister of Medfield, who, with the father, accompanied the pupil to the seat of Dartmouth College. This appears to be the letter referred to in the paper mentioned in paragraph 1. The seat of the college is spoken of as at a great distance from the house of his parents; as retired and peaceful; the faculty ingenious, faithful, kind and beneficent, as to appearance; the pupils regular and decent and pleasant and agreeable, the testimony of their teachers being in their favor. There is a tender allusion to his mother, who could not take the leave of him she wished, and at parting wished the minister "to act the part for her." It is a touching commentary on this letter that the faithful pastor who had journeyed so far to see his young friend enter college, that he should have fallen a victim to the small-pox, of which he died in the same year his letter was written.

The document of expenses presented in paragraph 1 is also printed in Chase's *Plympton Genealogy*, p. 100, which also contains a notice of Dr. Plympton and his descendants, pp. 99, 129, 169, etc.

The commission of justice of the peace of Dr. Plympton, 1816, is preserved in the Woburn Public Library, *Wym. Coll.*

The daughter, Czarina, of Dr. Plympton, the elder, married Otis Danforth, and died, 1883, in Cambridge. A daughter, Mary, married James Bridge, of Woburn.

Dr. Sylvanus Plympton had estate scheduled in the list of 1798, as follows: 1 house, 28 x 23, with 14 windows, the house two stories, with a yard in front, about 3 sq. rods of land; a shed, 30 x 10; a farm, 10 ac., with a barn on it, 30 x 22, the land being bounded E. by the road, N. by heirs of Josiah Richardson, W. on Horn Pond, S. on heirs of Nathaniel Brooks. [This land was evidently the place now occupied by Mr. Buck, near the junction of present Buckman and Main Streets.] He had also in that year 15 ac. in Rag Rock; 3 ac. bought of Jonathan Carter's heirs; 15 ac. bought of Capt. Joseph Wyman; and 6 ac. bought of Jonathan Wright, the latter being partly woodland and partly meadow. He had also $3\frac{1}{4}$ ac. of salt marsh in Malden. He had 72 ac., valued at \$1500, in 1801.—"Value of the Several Estates in the town of Woburn, taken by the Assessors of said Town in 1801."—*Wym. Coll. MSS.*, Wob. Pub. Lib., 7: 143.

Later he occupied the house on site of present residence of Mrs. Lewis Shaw, Main Street. The house being burned in 1836.

Augustus Plympton, a son of Dr. Sylvanus, the elder (born 1796, died 1854, M. D. Harv. 1824, *Mem. Mass. Med. Soc.*), was a practicing physician in Woburn; selectman, 1836, '38, '39; representative, 1837.

Dr. Augustus Plympton died of cholera, June 12, 1854, aged fifty-eight. A lengthy obituary notice, well written and containing an excellent character-

ization of his different merits, appeared June 17, 1854, in the *Woburn Journal*. It alludes to his death as sudden. It says, "He was indigenous to our soil, and there are yet many who remember his father, Dr. Sylvanus Plympton, whose skill and devotion to the laborious duties of his profession at a period when its members were comparatively few are often alluded to. The son enjoyed the benefit of the father's experience and practice, and retained many of the peculiarities, both as a man and as a practitioner, of the olden time."

There is also an account of his case in another place in the same issue of the *Journal*: On the Monday previous, about 5 A. M., he was seized with the terrible disease of cholera, which terminated fatally about half-past ten o'clock the same evening. Dr. Benjamin Cutter, who was promptly called, pronounced it to be a decided case of Asiatic Cholera. Dr. H. Bigelow, of Boston, was also called, and coincided with Dr. Cutter in his view of the case. Dr. Plympton also pronounced his case to be cholera. There was one other fatal case of the same disease in Woburn during the same week.

Sylvanus Plympton, a son of Dr. Sylvanus, the elder (born 1794, died 1864, graduated Harvard College 1818, M. D. Harvard 1822, member Massachusetts Medical Society), was a practicing physician in Cambridge.

Dr. Sylvanus Plympton, of Cambridge, had two daughters who married clergymen, and another married Prof. W. H. Niles, of the Institute of Technology, Boston. A son, *Henry Sylvanus* (1838-1863), a graduate of Harvard Medical School, 1860, and of the College of Physicians and Surgeons, New York, 1861, was an assistant surgeon in the army and navy, 1862-1863, and died at home in Cambridge of disease contracted in the service.

Dr. Augustus Plympton had one son and several daughters, all natives of Woburn, viz.: Hannah A.; Eliza B., deceased 1887, greatly respected for her many useful and amiable qualities; Augustus; Ellen J., married C. H. Harrington; Georgiana G., married George Sanderson. The two last-named daughters have descendants.

DOCTOR SILAS BARNARD, 1784. The Woburn Public Library has in its possession a marriage certificate, signed by Joseph Heald, town clerk of Pepperell, Massachusetts, of "Doctor Silas Barnard of Pepperell, and Miss Phebe Russell of Cambridge," dated Feb. 25, 1782. There is also extant in the same library a receipted account of his with Deacon Timothy Winn, 1781, for medicines. He was dead by 1798.¹

DOCTOR JOHN PAGE, 1805. This gentleman was

the father-in-law of Colonel John Wade, and acquired his title as an apothecary in Boston, whence he removed to Woburn. His history is largely to be found in an immense mass of account-books and letters formerly belonging to him, and given by Nathan Wyman, lately deceased, to the Woburn Public Library. He appears to have been a man of enterprise, of wealth, and of mark. We can only select a few points from them. He was in business under the firm-name of Langdon & Page from 1775 and onwards. In 1775 to 1777 he kept a journal while in England. This was at the time of the Revolution. His headquarters were mostly at Boston during his business career, which is represented by a continuous series of account-books from 1783 to 1790, and later there are books of date, 1810-1811, and with them are books of a firm of much earlier date, which perhaps preceded him, 1759-1761. There is an account-book of his brother, Captain Edward Page, 1783-1785. Edward was dead by Sept., 1785. A few entries he made himself in his book are here presented to illustrate the history of the times:

"Fowallboro', Oct. 30, 1784. This day entered the house of Mr. John Page and Langdon.

"Nov. 1, 1784. This day John Langdon turned out part of my goods in the street, etc.

"June 8, 1785. I arrived at Boston, from Wiscasset Point, with Capt. Huskins."

DOCTOR FRANCIS KITTREDGE, 1814-1828. Died 1828. This gentleman is still remembered by the aged among us. He belonged to a family of physicians, and had the reputation himself of being a good one. In his later life he was the partner in business of the father of the present writer, and his death occurred at a comparatively early age. He does not appear to have received a liberal education, or to have been a person of extensive culture; but he was, nevertheless, a skillful physician and had a good practice. In 1824, he built the house now owned and occupied by Dr. Graves, near the Library on Pleasant Street. This was considered quite an undertaking for the times, but his death, soon afterwards, made this expenditure a cause of family embarrassment, and resulted in an early sale to other parties. The house is substantially the same in form as it was when built. Articles of agreement between Dr. Francis Kittredge and his partner Dr. Benjamin Cutter, were entered upon in 1827, and one item was that "each party and his own family shall receive attendance and medicine of the firm *gratis*." Dr. Cutter appears to be his pupil and assistant as early as January, 1825.

From his medical receipt-books, still extant, it would appear that Dr. Kittredge originated in Tewksbury. The inscription on his gravestone in Woburn second burying-ground reads as follows:

"In memory of Doct. Francis Kittredge, who died Feb. 24, 1828, æt. 45.

"My flesh shall slumber in the ground,
Till the last trumpet's joyful sound;

¹ The wife of Dr. Barnard was Phebe, daughter of Seth Russell, of Cambridge. Cf. Cutter, *ib. supra*, 295; Page's *Cambridge*, 650. She was born in 1760 and died in 1841. In 1798 she married for a second husband James Fildes, of Cambridge. Cf. Cutter's *ib. supra*, 295; Page's *Cambridge*, 43.

Then burst the chains with sweet surprise,
And in my Saviour's image rise."

Dr. Francis Kittredge and his wife Sybil were both members of the First Congregational Church in Woburn; he joining, according to the records, in 1817, and she in 1827.

In preparing the foregoing sketches of physicians the writer has been impressed by the truth of the following observation. Its truth, however, should not deter any one from performing his whole duty to the community where he is called to minister.

How little is soon known of the average physician! A gravestone in a neglected burying-ground, is, perhaps, in a few years his sole existing memorial! A few anecdotes of his prowess in combating disease, or a few reminiscences of instances of his wit, these, and even less than these, oftentimes remain, after the generation that knew him and respected him have passed off the stage of mortal existence. He may have been skillful in his profession, a scholar, a man of high mind—and self-sacrificing, kind-hearted and true—but all of these traits and characteristics are gradually forgotten with the generation that knew him, as the world moves on and others take the place that he formerly filled. Like the good Doctor Singletary of the Poet Whittier's tale—he is dead, and forgotten, and a very slight impression of his work and sacrifices remains, but he was a benefactor to the community nevertheless.

DOCTOR BENJAMIN CUTTER, 1825-1864. Died March 9, 1864, aged sixty. Dr. Cutter, soon after his graduation from Harvard College in 1824, established himself as a student of medicine in Woburn under Dr. Francis Kittredge in the house now occupied by Messrs. Thomas and Baldwin Coolidge, in the north village of Woburn, near the place where this sketch is at present penned by his youngest son. Dr. Cutter, on the death of Dr. Kittredge in 1828, succeeded to his practice, which he held without cessation for nearly forty years, till his own death, in 1864. During his whole life Dr. Cutter was an extensive reader of general literature, and a close student of the literature of his profession; he was fond of history, and especially so of local history and genealogy, and while the duties of his profession were extensive and exhausting, he found time to prepare considerable material on the subject of the history of his native and adopted towns, and upon the genealogy of a number of their families. Most, if not all, of this material has been published by the son on whom his mantle of local history has partially fallen—it is to be hoped not unworthily!

There are those living who well remember the time when Dr. Francis Kittredge and Dr. Sylvanus Plympton, the elder, were the two principal medical practitioners in the town. The public favor, it is said, was about equally divided between them. Dr. Plympton was, perhaps, the more distinguished of the two in the case of fevers and in those diseases which re-

quired only the offices of a physician, while Dr. Kittredge was the more distinguished in cases requiring the services of a skillful surgeon. Dr. Cutter was also distinguished in this latter respect, and it is singular that none of the three were natives of Woburn. Plympton, the eldest of the three, was a native of Medfield; Kittredge, still younger, was a native of Tewksbury, where the family had long been noted as a race of physicians of uncommon skill; while Cutter, much younger than either, was a native of West Cambridge, now Arlington, where he was born June 4, 1803. All three, in common with the custom of the time, used in those days to ride about the country on horse-back while visiting their patients. There is extant still a note-book made by Dr. Cutter while a student of Kittredge's, which is filled with the many receipts in use by the medical profession of this vicinity at that period. Some of them may now be accounted "barbarous." The receipt-book is entitled, "A recipe collect of various scarce and excellent compositions, both orthodox and empirical, 1825," and had we space we should be glad to copy some of them. This book was based on similar books of Drs. Francis Kittredge, the senior and junior, the earliest of them dated 1780. These books are still preserved and belong to the present writer. Among the receipts are some from such honored names as those of Dr. Marshall Spring and General John Brooks; others from Dr. Joseph Fiske, of Lexington; Dr. Danforth, of Billerica; the Rev. Mr. Bowes, of Bedford, and others, including receipts even from some women.¹

It is a difficult task for a son to write satisfactorily about his father. Long sketches of Dr. Cutter have appeared in various places, particularly in the *Cutter Family Memorial*, pp. 137-142; his funeral address being printed in the appendix to that work, pp. 335-38; and an appreciative notice appearing at the time of his death in the *Woburn Townsman* for March 11, 1864. Other notices are cited in the sketch in the family memorial referred to. As we have before stated, he was born in Arlington, June 4, 1803, and graduated at Harvard College in 1824, and took his medical degree from Harvard in 1827, and from Philadelphia again in 1857. His predilection for study becoming early manifest, he was sent from home at the age of eight years to enjoy the best educational advantages he could obtain. He was sent to the academies in Westford and Andover, Mass., and in Pelham and Newmarket, N. H. In 1820 he entered Harvard College. His classmate Rev. Artemas B. Muzzey presented some interesting particulars regarding his college life, which are published in the sketch in the *Cutter Book*. In 1823 and 1824 he taught school in Medford and at Wellfleet, and also in other places. In 1826 he was commissioned sur-

¹ Cf. W. R. Cutter, *On the Sources of Early Woburn History*, a lecture, April 8, 1887.

geon's mate, and in 1829 surgeon in the militia, an office which he resigned in 1834. He was one of the School Committee in Woburn from 1845 to 1849, and held various other offices enumerated in the sketch in the Cutter work. He was devoted to his profession and his last illness was of brief duration. "A large community," says his medical brethren, "has been deprived of an experienced, able and conscientious physician, a friend long and thoroughly proved, and a citizen of eminent usefulness—ever seeking earnestly the best good of the public, and exerting through his whole life an exemplary and hallowed influence."

We cannot do better than submit the *Townsmen* notices in full. They touch so many points in the character of Dr. Cutter that we think they are worthy of presentation. There is preserved also the account of the details of his expenses as a college student at Harvard from 1820 to 1824. This production has an historical as well as an antiquarian interest.¹

¹The following books contain the results of some of his antiquarian researches:—

(1). *A History of the Cutter Family of New England*. The compilation of the late Dr. Benjamin Cutter, of Woburn, Mass. Revised and enlarged by William Richard Cutter. Boston, 1871. Pp. xi, 364. A supplement, 1875, continues the number of pages to 432.

(2). *History of the Town of Arlington, Massachusetts*. Formerly the Second Precinct in Cambridge, or District of Menotomy, afterward the town of West Cambridge, 1635-1879. With a Genealogical Register of the Inhabitants of the Precinct. By Benjamin and William R. Cutter. Boston, 1880. Pp. viii, 368.

Various articles by W. R. Cutter in antiquarian publications have their origin in the same source. An enumeration of them will not be attempted here.

[*Woburn Townsman*, for Friday, March 11, 1864.]

DEATHS. 29th, Dr. Benjamin Cutter, 60 years, 9 mos.

EDITORIAL. DEATH OF DR. CUTTER.—It is with deep regret we have to announce the death of Dr. Benjamin Cutter, on Wednesday of this week. Few men will be missed so much as he, and they are few whose death might be so truly regarded as a public calamity. He has for some time been in feeble health, but the sickness which was the immediate cause of his death was of short duration. Funeral services will be held in the First Congregational Church, on Monday afternoon next, at two o'clock.

In another column we lay before our readers a biographical sketch of Dr. Cutter, written by one who knew him well, and who but reflects the feelings of many others in this eulogy of his friend.

[Written for the *Townsmen*.]^b

DR. BENJAMIN CUTTER.

MR. EDITOR: The death of Dr. Benjamin Cutter has cast a gloom over the community. He has lived so long in our midst, and his life has been one of such singular usefulness, that it naturally arrests attention, and makes us pause to ask how the large space made vacant by such a bereavement is to be filled. Dr. Cutter was born in West Cambridge, June 1, 1803, and graduated at Harvard College in 1824. He studied medicine and surgery with the celebrated Dr. Francis Kittredge, in Woburn, and settled here as a practicing physician in 1825. He married Mary, the daughter of Amos Whittemore, of West Cambridge, who now survives him.

Dr. Cutter has lived one of the most active and useful lives. He has been busied with untiring zeal to his profession, ever ready at the call of pain and suffering, cool, calm and skillful. Always studying to ascertain the hidden cause of disease, he was fortunate in living one of the most successful of professional lives. Aside from the arduous duties of his profession, he has found time to accumulate a large amount of

The widow of Dr. Cutter died June 6, 1871. His children who lived to maturity were Benjamin L., died 1852; Ephraim; Mary W., married Samuel A. Fowle, and died 1865; William R., librarian of the Woburn Public Library and the writer of this communication.

Ephraim Cutter, son of Dr. Benjamin Cutter, was born in Woburn, September 1, 1832. He graduated at Yale College 1852, and received the degree of M.D. from Harvard in 1856, and at Philadelphia in 1857, and LL.D. from Iowa College, 1887. He is known, both in this country and abroad, for his medical writings and inventions. From 1856 to 1875 he practiced his profession in Woburn, and later in Cambridge and Boston, and now in New York City. He has been honored with a gold medal abroad.

WILLARD ADAMS was a physician in Woburn in 1842, and was here still earlier. He was connected with Marlborough, N. H. (see *History* of that town), and, returning to Woburn in later life, died here July 19, 1883.

The Middlesex East District Medical Society was organized at the house of Dr. Benjamin Cutter in Woburn, October 22, 1850, and, besides himself, Drs. Nelson, Plympton, Clough, Drew, Piper and Riekard, from Woburn, were present. All but Dr. Piper are now dead.

A miniature directory of Woburn, prepared by Nathan Wyman in 1850, contains the names of the following physicians resident in Woburn in that year: Augustus Plympton, Benjamin Cutter, S. Wat-

minute facts in relation to the history of the town and its inhabitants. He could tell you, for he has visited them, the precise spot where nearly all the first settlers of Woburn lived, and where they died, and what became of the succeeding generations of children. With a retentive memory, a well cultivated and inquiring mind, and a familiar professional acquaintance with nearly all the families residing in town for the last thirty-eight years, his decision in relation to any genealogical fact was considered final.

For the last thirty-five years he has been one of the most active and influential members of the First Congregational society, and for many years the clerk of the church, and at the time of his death was engaged in making an historical catalogue of all the members of the church from its organization, a work of this kind from a pen like his would have been of the greatest historical value.

In social life he was an affable, true-hearted friend. His honesty was proverbial, and his character was above reproach. His modesty was akin to bashfulness, yet he was possessed with a courage that did not seek the approbation of others, nor fear their censure. He early enlisted in the cause of temperance, when to be its advocate insured to one cold looks, bitter words, and a loss of practice. He never thought of these things, however, but only asked what was the duty of a true man. The ready and cheerful manner with which he worked in all causes which tend to elevate and educate society is itself a noble monument to his memory.

He had a noble professional pride, and was not envious of his fellow-laborers in the medical profession. I do not think he ever spoke unkindly of any of them. It was not his way to parade the mistakes or faults of others before the world, and if he had anything to say it was to them, not of them.

No one could be more misused by the community at large than he, and many are the tears that will drop with those of his bereaved family into his newly-opened grave.

Issue for March 18, 1864, contains a notice of Dr. Cutter's funeral. Cf. also *Townsmen* for April 1, 1864, and *Woburn Journal*, April 2, 1864.

son Drew, John Nelson, Truman Rickard, Richard U. Piper, John Clough, Thomas S. Scales.¹

We will not attempt a history of the physicians in Woburn since 1850. The oldest of them now living here is Dr. John M. Harlow, a native of Whitehall, N. Y., and in early life a teacher; he began the study of medicine in 1840, studied in the Philadelphia School of Anatomy, and graduated at the Jefferson Medical College in Philadelphia in 1844. In January, 1845, he commenced the practice of his profession at Cavendish, Vt., and remained there fifteen years, till obliged to retire from ill health. He settled in practice in Woburn in 1861,² where he has held a great variety of offices, and among them that of State Senator two terms.

Dr. Harlow has a world-wide reputation for a ease under his treatment of recovery from the passage of an iron bar through the head. The subject of it was a young man who, while engaged in drilling a hole in a rock in Cavendish, Vt., on the 13th of September, 1848, a premature explosion of the blast drove this iron implement completely through his head and high into the air. The iron was three feet seven inches in length, round, and comparatively smooth by use. After the accident the man was carried some distance in an ox-cart, but got out of the cart himself with little assistance, and later walked up a long flight of stairs, with the help of his physician, and got upon the bed in the room where he was placed. The man spoke and said: "The iron entered there," pointing to the hole in his cheek, "and passed through my head." He hoped he was "not much hurt." The iron had passed through the brain, and the patient continued in a reasonably comfortable state, with his mind clear, saying he did not "care to see his friends," and said he should "be at work in a few days." After lingering between life and death—his friends were so certain of his immediate death that they had his coffin and clothes in readiness—he gradually improved under treatment and recovered, after which he took to traveling, visited many places near home, and in 1852 turned his back upon New England never to return. He remained nearly eight years in Chili, South America, and eventually went to San Francisco, Cal., and died there of convulsions on May 21, 1861, twelve years and six months after the date of his accident.³

¹ For obituary notice of Dr. Stephen Watson Drew, see *Woburn Journal*, Feb. 20, 1875; *Woburn Advertiser*, Feb. 25, 1875; for Dr. John Nelson, *Woburn Townsman*, March 25, April 1, 1861; *Woburn Journal*, April 2, 1861; Truman Rickard, *Woburn Journal*, August 10, 1861; *Woburn Budget*, Aug. 9, 16, 1861; John Clough (physician and dentist), *Woburn Journal*, Dec. 6, 1879; *Woburn Advertiser*, Nov. 27, Dec. 4, 1879; Thomas S. Scales (Homoeopathic), *Woburn Journal*, June 17, 1881; *Woburn Advertiser*, June 16, 1881.

Dr. Drew was a native of Milton, N. H.; Dr. Nelson, of Milford, Mass. (cf. Ballou's *Hist. Milford*, 928); Dr. Rickard, of Cornish, N. H.; Dr. Clough, of Sanbornton or Tilton, N. H.; Dr. Scales, of Henniker, N. H.

² Cf. *Woburn Budget*, Nov. 8, 1861.

³ For a published account of this case, see "Recovery from the passage

THE LEGAL PROFESSION.—The legal profession does not have any exclusively professional representatives in Woburn till a comparatively late period. The ordinary law business that existed in the earlier time was performed by persons holding the offices of magistrates, and it may be supposed that the more liberally educated members of the community, such as the clergymen, and, even where such were to be found, the physicians, attempted some forms of that business, such as the writing of wills and deeds. There were various justices of the peace in the earlier period, specimens of whose handiwork in the preparation of legal documents are still preserved. Among these may be mentioned William Johnson, son of Edward; Samuel Carter, son of Rev. Thomas; James Converse, the major; Jonathan Tyng; Eleazer Flagg; Jonathan Poole; and, of still later date, James Fowle, whose commission is still preserved, dated November 19, 1761; Josiah Johnson,¹ Samuel Thompson, Samuel Wyman and Zebadiah Wyman; and later still, before lawyers were accounted numerous, Timothy Winn and Benjamin Wyman. Two of the above personages, viz.: Samuel Thompson and Benjamin Wyman, have left papers which are still accessible in abundance, showing the large number of actions which were prosecuted before them and the great number of estates which were settled.

LAWYERS.—JOSEPH BARTLETT, ESQ., attorney-at-law in Woburn as early as 1790, per that valuable publication called the *Massachusetts Register*, was named in Esquire Thompson's accounts in Woburn from August, 1788, to December, 1792. This Esquire Bartlett was styled "Captain" in Woburn from 1789 to 1796. In 1797 his career as a lawyer in Woburn had ended by his removal to Cambridge. He was a graduate of Harvard College in 1782, and is said to have been a native of Plymouth. He left Cambridge about 1809, and afterwards resided in Portsmouth, Saco and in Boston, in which place he died in 1827, "his sun" said to have "went down in a cloud." He had no children. The Woburn diarist, Esquire Thompson, refers to him, under date of January 2, 1789, as follows: "Cloudy and fair. At Capt. Bartlett's." This entry shows that the Esquire had settled in Woburn by that date. Again Esquire Thompson records: "August 25, 1790. Some cloudy and some fair. Mr. Bartlett's house raised." And again he records: "June 20, 1797. Went to Cambridge to Capt. Bartlett's." This shows that the captain, otherwise the squire, had then, or by that time, removed to Cambridge. His house in Woburn was known by the name of the Black House,

of an iron bar through the head," by John M. Harlow, M.D., of Woburn; with a plate. An address before the president and fellows of the Massachusetts Medical Society, read June 3, 1868. 20 pp.

¹ Some of these names are recognized in Whitmore's *Civil List of Mass.*, viz., justices of the peace: William Johnson, 1692; Major James Converse, 1700, 1702; Jonathan Tyng, 1700; Eleazer Flagg; Jonathan Poole, 1727, 1729, 1731; Josiah Johnson, 1755, 1761; James Fowle, 1761.

from its color, and was called by that name as long as it stood, which was after the year 1850. It stood on the estate now numbered 732 Main Street, near present Central Square, the residence where dwells the writer of this brief sketch of the first lawyer by profession to settle in Woburn. The low, one story building, now occupied as a dwelling at Central Square, near the junction of Main and Vine Streets, but located on Main Street, and sometimes called the Poole house by the older citizens, is said to have been erected for his law-office. This point in his day was an important business centre in Woburn, being on the line of two important stage-routes, and conveniently reached. His practice was probably as fair as the circumstances of the town would warrant. He possessed a singular taste for his time in house-decoration. In Woburn he had his house painted black, with white paint for the window-sashes and green for the doors. At Saco he is said to have built a house of a round form, and to have painted it a fiery red color. Cf. *Paige's Hist. Camb.*, 184.

LOAMMI BALDWIN, attorney, 1803-1805. Graduate Harvard College, 1800. Died 1838. Son of Col. Loammi Baldwin. Born in Woburn, 1780. He was the distinguished civil engineer.

Loammi Baldwin, "father of civil engineering in America," is one among the leaders of industrial work in this country, to whom the community owes much. There were few works of internal improvement carried out in America during the first thirty years of the present century with which he was not connected. Two great works—the Government dry docks at Charlestown and Norfolk—stand unsurpassed to-day among the engineering structures of the country as specimens of his skill. Such is the commendation passed upon him by his biographer, Prof. George L. Vose, of the Massachusetts Institute of Technology. Loammi Baldwin, Esq., was the son of Colonel Loammi Baldwin, and was born in Woburn, May 16, 1780. He fitted for college, and graduated from Harvard College in 1800. His inclination at that time was towards mechanical subjects, to which very little attention was paid in the college curriculum, and while in college he made, with his own hands, a clock, which kept good time, and was the wonder and admiration of his class. He commenced the study of law at Groton, after graduating from college, and signaled himself there in a mechanical capacity by the construction of a fire-engine in 1802, which is still in use. Loammi Baldwin, the subject of this notice, died June 30, 1838.

He opened an office in Cambridge, as a lawyer, in 1804, which business he pursued about three years, when he turned his attention to engineering, going to England in 1807 with that object in view, and on his return settled in Charlestown. For a fuller account of his ability as an engineer and his professional works, see *A Sketch of the Life and Works of Loammi*

Baldwin, Civil Engineer, by George L. Vose: Boston, 1885, 28 pp., 8vo, with a portrait. An account of the fire-engine, "Torrent," 1802, with an illustration, is given in Dr. Samuel A. Green's *Groton Historical Series*, vol. ii. pp. 393, 394. This was the first fire-engine in Groton, and after a use of more than eighty-seven years will throw a stream of water over the highest roofs in town. Thus Loammi Baldwin's contrivance for extinguishing fires has been a very useful and effective one, and Dr. Green says, on several occasions it has prevented serious conflagrations in the town of Groton.

ABNER BARTLETT, attorney, 1804-1806. Removed to Medford, where his name appears 1808.

He was a native of Plymouth, and graduated at Harvard College 1799, and died in 1850, aged seventy-four. Cf. *Brooks' History of Medford*, 309. Abner Bartlett and Sarah B. Burgess, both of Woburn, were married December 21, 1806.

WYMAN RICHARDSON, Esq., attorney-at-law, in Woburn, in 1811, and still the same in 1837, was for a long period apparently the only lawyer living in the town. He died in 1841. He was adjutant in the militia, 1820, and brigade major, 1823-1836. He was born in Woburn, February 19, 1779; graduated at Harvard College, 1804; studied law and practiced in Woburn; and died suddenly in this town, June 22, 1841, aged sixty-one. Cf. *R. Mem.* 336, 337.

WILLIAM C. JARVIS, Esq., attorney-at-law, 1831-1833. He represented Woburn in the Legislature in 1830, was Speaker of the House of Representatives, 1823, 1824, 1826, and 1827, and at one time a candidate for Governor. Cf. *Winchester Record*, i. 128.

"WINCHESTER, Oct. 21, 1889.

"MR. CUTLER:—I send you some facts about William C. Jarvis, which you can use as you please. I well remember him when he lived in South Woburn, although I was a small boy when he came here in 1825 or '26. He bought the Swan farm, where the Grammers lived when they moved out here in 1822. After Jarvis moved away, about 1835, Isaac Shattuck bought the farm—the Shattuck who at one time kept the Academy boarding-house in Woburn. Jarvis, I am sure, came here from Pittsfield, Mass., where he was living in 1820, and where he wrote and published a book of 400 pages, called the 'Republican, or a series of essays on the principle and policy of free states.' I have read it, an interesting and able work. I do not know where he was born, but do know that he moved to Chesham, N. H., and in 1838, when about fifty years old, went over the Connecticut River to the town opposite and shot himself, dying instantly. He was quite a *book* farmer, a good scholar, a stout built man. He had a law-office in Woburn, where he went daily, riding in a two wheeled chase, with a dog always following behind. He was round shouldered, had a cock eye, red face, was a high liver, hard drinker and fond of women; had no children. I think his wife died here. When he left town his furniture was sold at auction. My father bought a mahogany dining table, which I now have. It was said he bought a farm and moved here to run as a candidate for Governor. I am sure he was a candidate and ran as the free bridge candidate—to abolish the toll over Warren Bridge, which at that period was being agitated. I think he was elected Speaker of the house when a member. He was a Whig in politics and strongly opposed by Col. John Wade, but on account of his being strong for the free bridge was elected. Most respectfully yours, etc., N. A. RICHARDSON."

ALBERT H. NELSON, Esq., attorney-at-law, 1842-

¹ Lawyers named in miniature Woburn directory for 1850. For obituary notices of James M. Randall see *Woburn Journal*, August 3, 1861;

43, etc. Albert Hobart Nelson, Esq., of Woburn, died at Somerville, June 27, 1858, aged forty-six years. He was son of Dr. John Nelson, and was born in Milford, Mass., March 12, 1812. He graduated at Harvard College in 1832, studied law in the office of Samuel Hoar, of Concord, Mass., and in 1839 entered on the practice of his profession at Concord, and in 1842 removed to Woburn. He was appointed district attorney for Middlesex about 1846, and filled the position in a most satisfactory manner. He was a member of the Massachusetts Senate for two successive sessions, 1848 and 1849; a member of the Executive Council in 1854, and continued thus till transferred to the chief justiceship of the Superior Court of Suffolk County in 1855. He sat on the bench till the spring of 1858, when he was obliged to resign because of continued ill-health, severe shocks of paralysis mastering him and carrying him to the grave. He was an able and accomplished lawyer, of cultivated intellect, popular, easy and graceful in manner. Woburn had reason to be proud of him as a citizen, for his many able qualities and his public spirit. Cf. *Woburn Journal*, July 3, 1858; *Woburn Budget*, July 2, 1858; Ballou's *Hist. Milford*, 928.

ASA SPAULDING and JAMES M. RANDALL,¹ 1847. JOSHUA P. CONVERSE¹ (under the firm of Nelson & Converse). GORHAM PARKES.¹

The lawyers since this period have been numerous and we may be pardoned if their names are omitted. Most of those who have settled here since 1850 are still living, and their names also are given under the history of the bar in Middlesex County in another part of this volume.

CHAPTER XXVIII.

WOBURN—(Continued).

MILITARY HISTORY—THE COLONIAL AND PROVINCIAL PERIODS, 1642-1775.

BY W. R. CUTTER.

THE TRAIN-BAND.—A few remarks of a general nature on this hitherto neglected subject in the history of Woburn may not be out of place. The militia of the colonial period was intended for the public defence, and the companies composing it were expected to perform arduous duty and to accomplish important military achievements. The training-day was then no "mere playing at soldiers," but a serious study for the defence of the Commonwealth. The regulations covering many pages of the Colony records, and the

acts and resolves of the Province, testify to the importance attached to it [see *Mém. Hist. Boston*, ii. 481]; and the colonists placed on record their belief that their safety and peace could not be preserved "without military orders and officers." Military service was required of all able-bodied men to 1686, and such service commenced at the age of 16 years, and no limit was prescribed for its close. Men of 76, and even older, were active in the ordinary trainings, and men of 60 were always found drilling in the ranks. In the old country it had been the practice to enlist men in the train-band at 16 years and to dismiss them at 60.² In 1689 the term of service was shortened from 16 to 60 years, though the officers often voluntarily served till a much later period of life. The historian of Cambridge mentions several notable examples in that town, such as Samuel Green, the veteran printer, who held military office at Cambridge about sixty years, being sergeant, 1643; ensign, 1660; lieutenant, 1686, and captain, 1689, when he was seventy-five years old. He died, evidently still in office, in 1702, aged 87. He possessed, it was said, an extraordinary martial genius, and in an obituary notice of his son, in 1733, it was stated that his father took such great delight in the military exercise, that the arrival of the training-days would raise his spirits, and when he was so aged that he could not walk, he would be carried out in his chair into the field, to view and order his company. Daniel Gookin, of Cambridge, whose name is frequently mentioned in connection with Woburn affairs, was another example of a person of great age serving as an active military officer. He was captain of the Cambridge train-band about forty years, and continued to be the captain or commander of his local company, while he held the offices of a sergeant-major, or commander of a county regiment, and major-general, or commander of all the military force of the Colony; the immediate command of his company while he occupied these higher offices being exercised by a lieutenant, sometimes styled captain-lieutenant. Promotion was slow, and the practice prevailed, and continued probably till the Revolution, for a captain to be the captain of his company, however highly he might be promoted, so long as he was in office. Other instances might be cited of old men remaining long in office, such as Captain Thomas Prentice, of Cambridge, the part now Brighton, captain of the troop distinguished in Philip's War, several members of which were from Woburn; John Wyman, of Woburn, holding the office of its cornet and later of its lieutenant in that war. Edward Oakes, of Cambridge, was quartermaster of this troop in 1656, and twenty years afterwards was engaged with it in Philip's War, with the office of a cornet and later a lieutenant. All these Cambridge officers

¹ *Woburn Budget*, August 2, 1861. He was born in Princeton, son of Edward and Eliza, and died of apoplexy August 1, 1861, aged forty years, one month, nine days. For similar notices of Joshua P. Converse see *Woburn Journal*, March 18, 1876; *Woburn Advertiser*, March 16, 1876. Mr. Converse was a graduate of Brown University, 1844.

² See a contemporary document of date 1659, printed in Fane's *Hist. of Cambridge*, pp. 401-402, on the subject why old men of sixty should not be required to train. Another example of the effect of training on old men is given in the same work, p. 402.

named were old men at the end of their service, and the youngest of them died at the age of 75, and the oldest at 89 years. Thus it will be seen that a commissioned officer in the colonial militia served practically for life; that the unit of military organization was the company otherwise called the town training-band or train-band, and that the direct maintenance of military discipline depended upon the captains. These officers were clothed with considerable power. Promotion was also systematic and regular, and long service in any office the rule. The duties of any office, however dangerous, were considered as an obligation and an honor. Revelations from contemporary documents show that some of these men possessed a severe and crusty temper, but they exhibited undoubted bravery in battle.¹

Two-thirds of a company, to 1673, were often musketeers, or men carrying fire-arms, while the other third were armed with pikes or lances. The pikemen wore corselets and head-pieces, and those who could not afford corselets wore buff-coats, or quilted coats. The commissioned officers of an infantry company were three—a captain, a lieutenant and an officer called an ensign, who, when the company could afford to have one, carried a standard or ensign or flag. These officers had power to punish their men for military offences. A foot company had sixty-four members, besides officers, and each foot company had two drums. A cavalry troop was not allowed to exceed seventy members, and one troop was assigned to each county regiment. The commissioned officers of a troop were a captain, a lieutenant and a cornet—the last the third officer in rank, whose duty it was to bear the ensign or colors of the troop, a duty analogous to that of the ensign of infantry.

The latest instance found of the use of the term *training-band* for an infantry company in Woburn is in 1787. The term is found in a document endorsed with the title "The Train-band," containing the list of the names of the members, and an account of the arms, equipments and ammunition possessed by the company, which, on Monday, April 30, 1787, met for a review or inspection, of which the above document is a report.

The list following comprises the officers of the local train-band, or foot company, in the town of Woburn during the colonial period. All the offices held by an individual are included under his name.

OFFICERS OF THE TRAIN BAND IN WOBURN, 1642-1692.

Captains.

Edward Johnson, died 1672, aged 73, lieutenant in Woburn, 1641-49; of military company of Middlesex, 1645; captain, 1650-72.

John Carter, died 1692, aged 76, ensign in Woburn company, 1651-61; lieutenant, 1661-72, captain, 1672-92. In the General Court records is this entry: "Woburn military officers. Upon a motion in behalf of Woburn company, it is ordered that Lieut. John Carter be captain, William Johnson, lieutenant, and James Converse, ensign, to the foot company

there," 1672. The inscription on his gravestone in the first burying-ground at Woburn Centre is as follows: "Captain John Carter, aged about 76 years, deceased the 14th of September, 1692."

William Johnson, died 1704, aged 74; ensign in Woburn company, 1664-72; lieutenant, 1672-88; captain, 1690-91; major, 1692-1704. There is preserved one incident of his military experience. On the night of August 23, 1695, after an alarm occasioned by the killing and capture of fifteen persons by the Indians at Billerica on the 5th inst. preceding, some 300 men assembled in arms at Billerica, from Woburn, Reading, Malden and other towns, under the conduct or command of Major William Johnson and other officers, where they were found by another officer who had been deputed by the government to command them. Their further operations, with Major William Johnson as second in command, are described in a document presented in Frothingham's *Charlestown*, 241, and in Hazen's *Billerica*, 132-33. A thorough search of the country to the northward of Billerica by this expedition failed to discover the enemy in force anywhere, and the men who had assembled for the pursuit of the foe were dismissed.

William Johnson in his time attained to higher civil office than any other citizen of Woburn. He was one of the magistrates or assistants, as they were called, of the Colony, and a military officer of the several ranks to that of major, and, at the risk of imprisonment, resisted the spirit of royal aggression in the days of Andros. He was a man of ability, and the records he has left are examples of better English than that in the famous work of his more celebrated father.

James Converse, died 1706, aged 61; sergeant in Woburn company 1674-87; ensign, 1689; captain, mainly in the Colony service, 1689-92; major, 1693-1706. His military reputation is greater than that of any other Woburn man of his period. He was in the country service, as it was termed, for three years as a captain, 1690-92, in the war against the Eastern Indians, and as an officer in the Colony forces stationed in that section commanded the well-known Storer's garrison-house at Wells. With a very small force he defended that place bravely and successfully, and with slight loss, against a much superior force of French and Indians, after a siege of several days, in 1692. For his gallant conduct on that occasion he was promoted major in 1693. His gravestone in Woburn first burying-ground presents the titles of both "Major" and "Esquire" in connection with his name.

Lieutenants

James Converse, died 1715, aged 95, the last survivor of the signers of the original town orders for Woburn of 1640; sergeant in Woburn company, 1658-72; ensign, 1672-88; lieutenant, 1688-1715. He is styled "Lieutenant" on his gravestone in Woburn first burying-ground.

John Wyman, died 1684, aged about 63; sergeant, 1672; cornet, 1675; lieutenant, 1675-84; officer, cornet and lieutenant in Captain Thomas Prentice's troop, in active service in Philip's War; in the famous Narragansett campaign, which ended in the Fort Fight, where his son, a member of his command, was killed, and he himself was wounded during a scouting foray by an Indian arrow which hit him in the face.

Thomas Fuller, died 1698, aged 80; sergeant (Woburn), 1656 and 1685; lieutenant, 1685-86. He married the widow of Lieutenant John Wyman; resided much of the time elsewhere, and died in that part of Salem now Middleton, Mass. See *N. E. Hist. Gen. Reg.* xiii, 351.

Gershom Flagg, killed in battle with the Indians July 6, 1690, at Wheelwright's Pond, in Lee, S. H., aged 49; lieutenant, 1690, when killed. His captain, Wiswall, and his townsman, Sergeant Edward Walker, and others were slain at the same time.

James Fowle, died 1690, aged 49; lieutenant, 1690; "Lieutenant" on gravestone in Woburn first burying-ground.

John Richardson, died 1697, aged 58; lieutenant, 1690-97; "Lieutenant" on stone in the first burying ground.

Henry Summers, died 1724; licensed to keep an ordinary in Woburn 1682; lieutenant, 1690-91.

Joseph Pierce, died 1716, aged 67; "Lieut." in record of decease; corporal, 1690; lieutenant, 1690-1716.

Ensigns.

Samuel Walker, died 1704, aged 61; corporal, 1683-84; sergeant, 1684-90; ensign, 1690-92; became a deacon in 1692, and was styled "Deacon" on his gravestone in Woburn first burying-ground. The father of this Samuel Walker was another Samuel Walker, who was styled captain, 1683, and probably obtained that title elsewhere than in Woburn. He was the first person licensed in Woburn to keep a tavern, on site of late Daniel Richardson's place, and died in 1684, aged about 70.

Joseph Winn, died 1715, "Ensign" in record of decease; ensign, 1691-1715.

¹ A curious instance of hasty temper on the part of Major Gookin is given in Fane's *Hist. Cambs.* p. 61. John Johnson, apparently of Woburn, was one of the witnesses.

Cornet.

William Green, died 1717, aged 66; corporal of cavalry, 1675-76, in Philip's War. On June 1, 1677, Corporal William Green was appointed by the General Court cornet of the Three County Troop. *Colony Records*, v. 151.

Quartermaster.

Isaac Brooks, died 1686; appointed quartermaster of the Three County Troop, June 1, 1677, of which Corporal William Green was also appointed cornet. *Colony Records*, v. 151. Quartermaster in tax lists, 1684-85. The troop of which he was a member paraded with other militia at Charlestown on October 5, 1685. Sewall's *Diary*, cited in Frothingham's *Charlestown*, 185-86.

Sergeants.

John Tidd, died 1657; sergeant, 1646; the first citizen of Woburn named by military title in the records.

James Parker, removed from Woburn about 1652; sergeant, 1649-51, attained higher office elsewhere.

Samuel Converse, accidentally killed at Woburn, 1690; sergeant, 1669.

Thomas Pierce, died 1683; sergeant, 1669-82.

Henry Baldwin, died 1698; sergeant, 1672-85.

Increase Winn, first child born and recorded in Woburn; sergeant in record of decease, 1690.

Edward Walker, sergeant in Wiswall's company in active military service, 1690; killed on Sunday, July 6, 1690, in battle with the Indians at Wheelwright's Pond, in Lee, N. H., at same time when the captain, Wiswall, the lieutenant, Gershom Flagg, of Woburn, and others were slain also. Two companies of English, it appears, were scouting under Captains Floyd and Wiswall, when, coming upon a party of Indians, a bloody engagement ensued, in which fifteen of the English were killed and several wounded.

Corporal.

Thomas Pierce, corporal, 1683.

Of the officers mentioned in the preceding list some had been soldiers in Philip's War. This war bore heavily on the colony in taxes and men, and was the principal war of that period. A list of the men who served in this war is given in the appended notes, also an account of the killing of such persons, few in number, in the town itself, whose deaths were a result of that war; and of the killing of one person by an Indian a few years previous to that war.

So far as ascertained, Woburn's casualties in the Narragansett campaign, or the principal campaign of Philip's War, were one man, John Wyman, Jr., killed outright, and seven merwounded. The names of all these appear in the following list. The family of Wyman suffered in the persons of all its members engaged in the war, a father, son and nephew. The father was slightly wounded, the son was killed and the nephew died soon after his return. All endured the rigors of a campaign in the depth of winter. The total number of names discovered is eighty-three. Woburn furnished a noticeably large proportion of the cavalry arm—twenty-one, about a quarter of the whole. Her losses in the cavalry were one killed, three wounded. Cavalry officers furnished, one lieutenant, two corporals; and thirteen men from the town were sent in the ranks of one company of infantry to the battle-field.

NOTE.—In our researches on this chapter, we have examined the Woburn records, the printed colony records, and a valuable and scarce copy of the colony laws printed in 1672, and belonging to the Woburn

Public Library; also the *Mem. Hist. of Boston*, and other works and manuscripts. Owing to the insufficiency of data, the years given do not in all instances illustrate the precise length of the service of an officer, though the rank is definitely given.

Thirty years ago John L. Parker, in *Woburn Budget*, Oct. 28, Nov. 4-25, 1859, wrote a sketch of the military history of Woburn, from 1789 to 1859, based on record-books and recollections of men formerly connected with it. The subject from the close of the Revolution to the opening of the Civil War was fairly well covered by these articles, and little can be added of value.

In the Indian wars Woburn men were found scattered throughout the settlements in garrisons, and as members of expeditions of more or less account in the country's annals. If to these the names of many natives who had found homes in other places were added, the number would be very large. The difficulty of procuring data is prodigious, and much is still hidden which the future may bring to light.

For an account of the militia at the opening of Philip's War, see *N. E. Hist. Gen. Reg.*, xxxvii. 75-76. The local companies were not sent on active service out of their towns, but men were impressed from them and placed under officers appointed for special service by the Council. Besides the commissioned officers, each foot-company had a clerk, sergeants, corporals and drummers. A less number than was required for a company was, by a law of 1652, to choose a sergeant and other inferior officers. Cavalry corps had, besides their usual officers, a trumpeter and a quartermaster, and on special service the number of men in a command of any sort was greater than the regular number. Part of the outfit of a Woburn trooper of the period is given in the inventory of William Simonds in 1672, viz., "a pair of pistols, holsters, breastplate and crouper."

An account of the early militia system of Massachusetts is also given in an article of some length in the *Proc. Worcester Soc. Antiquity*, 1888, pp. 105-27.

The theory and practice of the military art as understood by the fathers of New England is set forth with curious minuteness in Markham's *Epistles of Warre* (Lond. 1622), a work of which a copy is to be found in the Woburn Public Library. It contains a dissertation on the duties of every officer from a lance-corporal to a general; nor are the lesser positions, such as those of sentinels and rounders, clerks and harbingers, or drummers and fifers, omitted in the treatise. From this work we ascertain that the lowest of all officers was the *lanspesado*, or lance-corporal, the deputy of a corporal, the leader of a file, and in charge of half a squadron; in other respects little more than a common soldier. The companies being divided into squadrons, a corporal was appointed over the squadron, and under the corporal a deputy corporal, or *lanspesado*. The corporal commanded the fourth part of a company of 100 men, and his command was

divided into two *camarados*, or parties of twelve men each, so that a full squadron was twenty-four men, besides the corporal. This officer, says the old writer, "ought to be of reverend and grave years, thereby to draw on respect."

The sergeant would command in particular two squadrons, or fifty men or more at discretion. In the English armies he was armed with a sword and a halbert, a short and handy weapon easy to manage at close quarters, which he used to keep the band in order, and in all marching, standing and other motions, to keep the ranks and files in an "even, comely and true proportion." By turning the blunt end of his halbert toward a refractory soldier, and showing he might strike, if he would, he insisted on the maintenance of discipline.

The ensign, or "the first great officer of a private company . . . hath the guard of his captain's colors . . . weareth armor . . . [and a] fair sword by his side . . . [and hath] his captain's colors or *ensign* in his hand." He chose "four or five especial gentlemen," who, as his mates and companions in all services, should march about him to guard them . . . and when any of his company died, he at the burial trailed his colors after the body to do honor to the funeral," but when the body was in the ground, he then tossed them up and displayed them. In the absence of the captain and lieutenant he commanded as the "absolute captain," but when they were present he was "bound to obey them."

The lieutenant of a foot company was "the greatest officer in the band"—next to the captain—and commanded the ensign and all other officers below him. In the absence of the captain the entire command was upon him. His other duty was "to oversee both the officers and whole band," and that their duties were duly performed. He was armed in the same manner as the ensign, only his weapon was a gilt partisan or a kind of halbert. His place of command in the captain's presence and marching into the field, was in the rear, but in returning home, or after service, then in the "head of the battle;" but in his captain's absence, then he was as the captain, and the eldest sergeant supplied his place. He had power to commit any man under the degree of an officer, and the officers in the absence of the captain.

A captain of foot or of the infantry was the "highest of all private commanders," and yet the lowest of all "that command in chief." In relation to the weapon he should carry, some would have "nothing but a rich feather-staff, all wrought, gilt, and curiously tasselled." Others would have a pike, and others a sword and gilt target. Some would have a "fair feather staff" in time of peace, and a "fair, gilt partisan, richly trimmed," in time of war. This weapon was not to be above twelve inches of blade, but sharp and well steed, "for it is able to encounter against any manner of weapon." This treatise was opposed to a captain's carrying a musket, which was

the common practice in America in the Indian wars previous to the Revolution, and even General Wolfe, in one of his pictures, is represented as armed with a musket, minus the bayonet, in the time of battle. The captain of horse, in the general parts of his duty, has the same as those which belong to the captain of foot, "only with an augmentation of care, inasmuch as he hath to provide both for man and beast."

Of the other officers, the *Sergeant-major of a regiment* is "ever some especial captain." The *Lieutenant-colonel of foot* is the second officer in command of a regiment. The *Colonel of foot* was, like the others named, a captain; the colonel retaining the captaincy of his own "band" and electing its officers, his own lieutenant being in courtesy called by the title of captain, and "in all meetings" to take his place as the "puny" captain of the regiment. The company commanded by this lieutenant, belonging to the colonel, took precedence of place "before all other captains of the regiment." The colonel was armed at all points like the captain, only his "leading weapon," or "feather staff," was of a "much less proportion." He was mounted on horseback in the ordinary part of his duties, but in an assault he was to alight and "lead forth his regiment in his own person." The *lieutenant-colonel* and *sergeant-major* were also mounted officers in the infantry.

Further, the sentinel was the ordinary sentinel; the rounder, a gentleman discharged from humbler and meaner duties, but assigned to go the rounds at night; the clerk of a band was a penman, rather than a "sword-man," yet by no means a coward; the harbinger had charge of the billeting a foot company when drawn into garrison. Otherwise the holders of these offices were but common soldiers. The *drummes and phifpes*—drummers and fifers—hold offices of power, but not "of command," and are, though private soldiers, "instruments of direction and encouragement to others." The fife was only an instrument of pleasure, not of necessity, and to the voice of the drum the soldier should wholly attend, and not to the "air of the whistle." The work sets forth the importance of every man in a force, even the humblest, and pays high tribute to valor.

Extracts from Records.—On February 4, 1679–80, a fine was remitted in behalf of the town for not observing the law regarding ammunition, on promising to be "more observant" in time to come. This favor was granted on the petition of Lieutenant William Johnson and James Converse of Woburn.—*Colony Records*, v. 264. On March 2, 1691, the selectmen met, and, in obedience to a warrant received from the major-general, viewed the town's stock of ammunition, and finding it "not according to law," they appointed Lieutenant James Converse and Sergeant Matthew Johnson "to seek out to procure a supply of ammunition, according to law, for the town."—*Woburn Records*, iii. 148. A war (King William's War) had commenced, in which the Indians of Canada and

Maine aided the French. Later, during Queen Anne's War, the selectmen, on May 17, 1708, left at the house of Cornet Benjamin Simonds, "of the town stock of ammunition, viz., in powder, with the weight of the two barrels it is in—103 pounds; and in shot and flints, with the weight of the two small bags they were in—162, the account of which was that day entered in the town book, by order of the selectmen then present, and the said Cornet Benjamin Simonds." At the end of this statement in the original record is this entry: "Entered in this place to save paper forward."—*Woburn Records*, vi. 86.

Major James Converse.—The exploit at Wells is immortalized by Cotton Mather (*Magnum*, bk. vii.) In 1690, in the earlier campaigns against the Indians at the eastward, Converse was under the command of the celebrated Major—afterwards Colonel—Benjamin Church. As major, Converse himself commanded the eastward forces in 1693. For allusions to him, see Hutchinson's *Mass.*, ii. 67–68, 72; Baylies' *Plymouth*, pt. iv. 116, 118; pt. v. 88, 96; Sewall's *Diary* (M. H. C., 5th series), v. 320, 358, 377; vi. 75, 93*, 132; Sewall's *Woburn*, 178–183; *Woburn Journal*, Sept. 27, 1873, etc. An echo of a petty squabble of the day in which his name was mentioned, is referred to in Savage's *Genealogical Dict.* and in the *N. E. Hist. Gen. Register*, xiii. 31. It was the result of a council of eight churches, called by the reverend pastor and church of *Oburn* [Woburn] and dissatisfied brethren, and convened in that town December 4, 1706. It was the question whether the oath of Major Converse, which occasioned the controversy, was really true or false. This the council determined did not belong to an ecclesiastical body to settle. They decided it was wrong for Jacob Wyman to form a charge of perjury against Major Converse, and to prosecute it as he did before the pastor, and they advised Jacob Wyman to acknowledge this wrong act to the church. They determined it was wrong for the pastor and church to bring the matter into a course of ecclesiastical proceeding, especially in their act of excommunicating Jacob Wyman, and upon his making an acknowledgment, the pastor and church were advised to restore him to their communion. After some advice on the subject of excommunication and church contentions, the result closes with some words of admonition to the "Christian brethren in *Oburn*," to be of a forgiving spirit, etc. For particular references to Converse in Mather's *Magnum*—not indexed—ed. 1853, vol. ii.—see pp. 603, 607, 609–11, 613–18, 624, 631, 641–43. Sullivan's *Hist. Dist. Maine* (Bost., 1795), 236, mentions the location of Storer's garrison-house, as well as does Bourne, *Wells and Kennebunk* (Port. 1875) 197, and Williamson, *Hist. Maine* (Hall, 1832), i. 627. Sullivan gives a brief account of the action at Wells, which he obtained from Hutchinson's *Mass.*, but does not mention Converse by name. Williamson, vol. i., chap. xxiii., gives an account of the assault,

and mentions Converse, but follows Mather closely. Bourne, the local historian, in chap. xv., particularly pp. 196–97, 207–16, presents an account which closes with an eloquent tribute to the defenders of Wells and the courage of Converse.

The Engagement at Wheelwright's Pond.—An account of this action, in which two Woburn men lost their lives, is given in Mather's *Magnum*, ed. 1853, ii. 607. The contest was an obstinate one and lasted from two to three hours. The English having adopted the Indian mode of fighting, their loss was comparatively small. Neither party could claim the victory. On the following morning, Captain Converse, of Woburn, visited the battle-ground, and brought off seven wounded, who were still alive. Cf. Drake's *Book Indians*, pt. iii., 151; Sewall's *Woburn*, 109.

Indian Murders in Woburn.—The murder of an English maid at Woburn by an Indian is referred to in Increase Mather's *Early Hist. of New England*, Drake's ed., 238. Hubbard's *Narr. Indian Wars*, Drake's ed., i. 18, refers to the same thing, and says that the murder was committed upon a maid-servant by an Indian to whom she had denied drink. The time was about 1669 or 1670. The locality where it occurred was Havenville, in Burlington, on the site of the late Miss Ruth Wilson's house. A lurking Indian having concealed himself in a hop-house near, supposing the neighbors were absent at church on the Sabbath, went to the house and asked for cider of a young woman he found there. She went to the cellar to draw some, but her murderer, on her return, taking advantage of the opportunity, killed her with his tomahawk. A cellar-door, spattered with her blood, was long preserved as a memento of the occurrence. The young woman's name was not preserved in the local records. The Indian, however, was apprehended and executed, the Rev. S. Danforth, in the Roxbury Church records, stating, that on September 8, 1671, an Indian was executed and "hung up in chains," for murdering an "English maid at Woburn." Cf. Sewall's *Woburn*, 120–21; *N. E. Hist. Gen. Reg.*, xxxiv. 301; Drake's *Old Indian Chron.*, 137–38 (and 136–37); also his *Book of Indians*, with com. of S. Sewall, 698–99, etc.; also Hubbard's *Narr.*, 7.

The death of Hannah, wife of Samuel Richardson, of Thomas, his son, and Hannah, his infant, occurred April 10, 1676, in the afternoon of the day. The father, while in his field with a young son, noticing a commotion at his house, hastened hither, and found his wife and son Thomas had been killed by a skulking band of Indians, who had robbed some gardens at Cambridge of linen articles, and, on further search, the infant daughter was found killed also. A nurse had fled with it in her arms to a neighboring garrison-house for protection, but being pursued, to save herself, dropped the babe, which the savages killed. The father, rallying a party, pursued and shot at the

Indians, as they sat by the side of a swamp, causing them to drop their bundle of linen, in which was found wrapped up the scalps of one or more of their victims. From traces of blood afterwards found in the woods, it was supposed one of the Indians had been hit when fired upon, and the body of one was found, buried with leaves, where his associates had laid him after death.

The scene of the Richardson murder was in Winchester, on the former Miller farm, in Richardson's Row. Here Samuel Richardson had his house. In 1798 the Miller place was owned by Jonathan Richardson, and Job Miller was the occupant. On the place, in 1798, was an old house of two stories, thirty-six by eighteen. The farm consisted of fifty acres. Miller died 1832, aged eighty-two, and his widow, Sarah, 1843, aged eighty-eight;—gravestones Woburn Second Burying-ground. Cf. Hubbard, *Indian Wars* (1677), and Sewall's *Woburn*, 119; *MS. Desc. of Real Estate in the First Parish of Woburn*, in 1798.

The killing of an Indian on the training-field in 1675.—For a contemporary account of this occurrence, see Gookin's History of the Christian or Friendly Indians, in *Trans. Amer. Antiq. Soc.*, ii. 475. A party of Wamesit Indians, all men, thirty in number, on their way homeward from Boston, after acquittal of the charge of burning a haystack at Chelmsford, belonging to James Richardson, son of one of the first settlers of Woburn, their home being near the site of the present city of Lowell; while marching through the village of Woburn, under guard of Lieut. James Richardson, the owner of the haystack, and a file of soldiers in October, 1675, came suddenly upon the train-band of Woburn, when that body were exercising their drill. Knowing the prejudice that existed against Indians and fearing trouble, Lieut. Richardson halted his party and held out his handkerchief to the Woburn company as a flag of truce. The captain and officers of the train-band thereupon went to Richardson and examined his commission from the Council to conduct the Indians in his charge safely home. The captain and his officers returning to their company then gave strict charge to every soldier under arms not to fire a gun nor to use any opprobrious words while the Indians filed past; but, notwithstanding these strict prohibitions, a young fellow, a soldier named Knight, discharged his musket when the Indians were passing by and killed one of the Indians outright, being very near him at the moment. The person killed was "a stout young man," very nearly allied to the praying Indians of Natick and Wamesit, and whose grandfather and uncle were pious men, his father long before having been slain in a war with the Mohawks. The murderer was soon apprehended and imprisoned, and tried for his life, but was acquitted by the jury, contrary to the will of the bench. The jury alleged they wanted evidence, and the prisoner pleaded that his gun went off by accident; indeed, witnesses, says Gookin, were "meatly-mouthed" in

giving evidence; the jury was sent out again and again by the judges; who were much "unsatisfied" with the jury's proceedings, "but yet the jury did not see cause to alter their mind, and so the fellow was cleared."

The training-field where the military of Woburn were accustomed to exercise was the spot at the centre village now embraced in part in the present Common. It was formerly somewhat larger, and included the open space now traversed by Winn Street. Here the timber was drawn from the Middlesex Canal when the edifice of the First Society was erected in 1809, and military companies for parade were formed in that part.—See *Woburn Journal*, Feb. 16, 1883.

The Lieutenant James Richardson named above was himself afterwards killed in battle with the Indians at Black Point, a locality in the limits of Maine. Cf. *R. Mem.* 43; *N. E. Gen. Reg.* xliii. 195-97.

Woburn in King Philip's War.—The series of articles by George M. Bodge in the *N. E. Hist. Gen. Register* add further names and facts to what is already published. Cf. Sewall's *Woburn*, chap. iv., particularly pp. 113-15, for men; 115-19 for the war; 119-21 for killed in the town itself.

List of Soldiers from Woburn in Philip's War, 1675-76.

(With references to Bodge's articles, begun in the *Register* in 1883. xxxvii. cl.)

John Baker, wounded in fight, December 19, 1675; one of Captain N. Davenport's company, impressed for that company from Woburn; credited to Woburn in an assignment of wages. Woburn was credited by sundry amounts, with £107 12s 8d, on August 24, 1677. Perhaps this was the John Baker in garrison at Marlborough. Cf. *N. E. Hist. Gen. Reg.* xxxvii. 175; xxxix. 258, 259; xl. 320, 396; xliii. 77, 279; also 266.

Daniel Baldwin, in garrison at Billerica on Charlestown credit. *Ib.* xlii. 290; xliii. 260, 276.

John Baldwin, impressed from Woburn for Captain Davenport's company. *Ib.* xxxix. 257, 259.

John Bateman, in garrison at Chelmsford; credited to Woburn in an assignment of wages. *Ib.* xxxviii. 220; xli. 409; xliii. 262, 279.

Peter Bateman, impressed from Woburn for Captain Davenport's company, died February 13, 1675-76, a result, it is supposed, of exposure in battle in the December previous. *Ib.* xxxix. 258, 259.

Nathaniel Billings, member of Captain Thomas Prentice's troop; of Woburn, wounded in the Fort fight, December 19, 1675. *Ib.* xxxvii. 281, 282.

Isaac Brooks, member of Captain Prentice's troop of cavalry; credited to Woburn in an assignment of wages. *Ib.* xxxvii. 282; xlii. 94; xliii. 279.

John Brooks, xxxviii. 220; xlii. 299.

John Barbee, impressed from Woburn for Captain Davenport's company, name not in pay lists; in garrison at Chelmsford; credited to Woburn in an assignment of wages. *Ib.* xxxix. 259; xli. 409; xliii. 262, 279.

William Butters, credited to Woburn in an assignment of wages. *Ib.* xli. 409; xliii. 279.

John Carter, captain of the local military company; included in the list of impressment of thirteen men. *Ib.* xxxix. 259.

Thomas Chamberlain, in garrison at Groton. *Ib.* xli. 409; xliii. 263.

Anton Cleveland, xlii. 299.

Moses Cleveland, in garrison at Chelmsford; credited to Woburn in an assignment of wages. *Ib.* xli. 409; xliii. 261, 279.

Samuel Cleveland, in garrison at Chelmsford and Groton; credited to Woburn in an assignment of wages. *Ib.* xxxviii. 220; xli. 408; xliii. 262, 263, 279.

Josiah Clapson, or Clarkson, in garrison at Chelmsford; credited to Woburn in an assignment of wages. *Ib.* xli. 408; xliii. 262, 279.

John Coddington, xxxviii. 220.
 James Converse, ensign of the local military company; included in the list of impressment of thirteen men. *Ib.* xxxix. 259.
 Jonathan Crisp, in garrison at Dunstable and Groton. *Ib.* xxxviii. 220; xli. 408; xliii. 263, 264.
 John Cutler, impressed from Woburn for Captain Davenport's company; credited to Woburn in an assignment of wages. *Ib.* xxxviii. 46; xxxix. 257, 259; xli. 409; xliii. 279.
 William Dean, xli. 274.
 Robert Eames, xxxvii. 74.
 Paul Fletcher, xxxviii. 219, 220.
 Richard Francis, credited to Woburn in an assignment of wages; also credited to Hingham. *Ib.* xliii. 272, 279.
 Thomas Fuller, xlii. 95.
 John Green, a cavalryman, also corporal of cavalry. *Ib.* xxxvii. 254; xxxviii. 224; xli. 94, 95.
 William Green, corporal of cavalry, credited to Woburn in an assignment of wages. *Ib.* xxxvii. 175; xxxviii. 224; xli. 94, 95, 209, xliii. 279. On June 1, 1677, Corporal William Green was appointed cornet of the Three County Troop. *Colony Records*, v. 151.
 Thomas Hall, impressed from Woburn for Captain Davenport's company; credited to Woburn in an assignment of wages. *Ib.* xxxix. 257, 259, xli. 409; xliii. 279.
 Thomas Henshaw, or Hinch, cavalryman. *Ib.* xxxviii. 66, 254; xxxviii. 219.
 Josiah Hobbs, xli. 408.
 Jeremiah Hood, impressed from Woburn for Captain Davenport's company, name not in pay-lists. *Ib.* xxxix. 259; xli. 95.
 John Jeffs, xxxviii. 220.
 William Johnson, lieutenant of the local military company, included in the list of impressment of thirteen men. *Ib.* xxxix. 259.
 John Kendall, member of Captain T. Prentice's troop; also possibly a substitute; a cavalryman, credited to Woburn in an assignment of wages. *Ib.* xxxvii. 74, 282; xxxix. 281, 382; xli. 278, xlii. 94, 95; xliii. 279.
 John Knight, xli. 273, 409.
 Joseph Knight, xxxix. 381, 382.
 Benoni McDonald, or McDunnell, credited to Woburn in an assignment of wages. *Ib.* xli. 273, 409; xliii. 279.
 Daniel McGinnis, or Magenis, corporal, in garrison at Medfield. *Ib.* xxxvii. 66, 182; xxxviii. 42; xli. 408, 410; xliii. 267. See note at end of this list.
 John Malony, in garrison at Dunstable; credited to Woburn in an assignment of wages. *Ib.* xxxvii. 72, xliii. 263, 279.
 John Monsall, cavalryman. *Ib.* xxxvii. 186, 284.
 Richard Nevers, in garrison at Chelmsford. *Ib.* xliii. 261.
 Abraham Parker, in garrison at Dunstable; credited to Woburn in an assignment of wages. *Ib.* xliii. 263, 279.
 Josiah Parker, xxxviii. 219.
 Thomas Parker, credited to Woburn in an assignment of wages. *Ib.* xliii. 279.
 Joseph Pierce, xxxvii. 66; xli. 273, 408.
 Nathaniel Pierce, in the celebrated Falls Fight, under Captain William Turner; name given as of Woburn. *Ib.* xli. 210, 212.
 Samuel Pierce, xlii. 209.
 Thomas Pierce, member of Captain T. Prentice's troop; also in the cavalry under Lieutenant Oakes, cavalryman, credited to Woburn in an assignment of wages. *Ib.* xxxvii. 282, 284; xli. 278; xlii. 94; xliii. 279.
 William Pierce, impressed from Woburn for Captain Davenport's company; in garrison at Chelmsford. *Ib.* xxxix. 257, 259; xliii. 262.
 George Polly, xlii. 209.
 John Polly, impressed from Woburn for Captain Davenport's company; in garrison at Chelmsford; credited to Woburn in an assignment of wages. *Ib.* xxxvii. 74; xxxix. 258, 259; xliii. 262, 279.
 John Priest, impressed from Woburn for Captain Davenport's company; in garrison at Chelmsford; credited to Woburn in an assignment of wages. *Ib.* xxxix. 258, 259; xliii. 262, 279.
 Samuel Reed, in garrison at Groton. *Ib.* xli. 273; xliii. 263.
 William Reed, member of Captain T. Prentice's troop; also in the cavalry under Lieutenant Oakes. *Ib.* xxxvii. 280, 284. This William Reed died by a shot fired by his brother Timothy in the woods, November 7, 1688, who mistakes shot him instead of a deer. Cf. Sewall's *Woburn*, 632.
 John Richardson, cavalryman; credited to Woburn in an assignment of wages. *Ib.* xlii. 95, 102; xliii. 279.
 Joseph Richardson, cavalryman; credited to Woburn in an assignment of wages. *Ib.* xxxvii. 74; xxxviii. 441, 443; xlii. 94; xliii. 279.

Nathaniel Richardson, member of Captain T. Prentice's troop, wounded in the Fort fight, December 19, 1675; cavalryman; credited to Woburn in an assignment of wages. *Ib.* xxxvii. 281, 282; xlii. 94; xliii. 279.
 Samuel Richardson, cavalryman, credited to Woburn in an assignment of wages. *Ib.* xlii. 94; xliii. 279.
 Stephen Richardson, cavalryman. *Ib.* xxxvii. 281; xlii. 94.
 David Roberts. Sewall's *Woburn*, 111.
 Joshua Sawyer, xxxvii. 74; xli. 273, 278.
 John Seers, cavalryman. *Ib.* xxxvii. 284.
 John Sheldon, impressed from Woburn for Captain Davenport's company. *Ib.* xxxix. 258, 259.
 Benjamin Simonds, in garrison at Groton; credited to Woburn in an assignment of wages. *Ib.* xxxvii. 220; xli. 409; xliii. 263, 279.
 Oaleb Simonds, wounded; of Woburn; in fight of December 19, 1675; impressed from Woburn for Captain Davenport's company. *Ib.* xxxix. 257, 259.
 James Simonds. Sewall's *Woburn*, 111.
 Joseph Simonds, in garrison at Chelmsford, credited to Woburn in an assignment of wages. *Ib.* xli. 408; xliii. 261, 279.
 Robert Simpson, credited to Woburn in an assignment of wages. *Ib.* xliii. 279. Servant of Lieutenant John Wyman, who petitioned the General Court, May 16, 1676, that his servant, Simpson, then a garrison soldier at Hadley, and needing clothes, might be released and return to Wyman, so that Wyman's leather, then in the vats, might not be spoiled, Wyman being a tanner. Simpson had been in the country's service all that winter. Sewall's *Woburn*, 114, 115.
 Zachariah Snow, wounded; of Woburn; in fight of December 19, 1675; impressed from Woburn for Captain Davenport's company. *Ib.* xxxix. 258, 259.
 Cyrian Stevens, in garrison at Groton. *Ib.* xliii. 264.
 Henry Summers, a member of Captain T. Prentice's troop. *Ib.* xxxvii. 280, 282.
 John Tidd, cavalryman; in garrison at Groton. *Ib.* xxxvii. 284; xliii. 263.
 Elijah Tottingham, wounded, of "Oborne;" at Fort Fight December 19, 1675. *Ib.* xxxvii. 442, 443.
 Nehemiah Tottingham, xli. 273, 409.
 John Walker, xlii. 209.
 Samuel Walker, xlii. 76.
 Joseph Waters, credited to Woburn in an assignment of wages. *Ib.* xliii. 279.
 George Wilkinson. Sewall's *Woburn*, 114.
 Benjamin Wilson. Sewall's *Woburn*, 114.
 John Wilson, credited to Woburn in an assignment of wages. *Ib.* xxxvii. 174; xlii. 209; xliii. 279.
 Increase Winn, member of Captain T. Prentice's troop; cavalryman; credited to Woburn in an assignment of wages. *Ib.* xxxvii. 282; xli. 278; xlii. 94, 95; xliii. 279.
 Joseph Winn, cavalryman, credited to Woburn in an assignment of wages. *Ib.* xxxviii. 42; xlii. 94, 95; xliii. 279.
 Josiah Wood, xlii. 209.
 Joseph Wright, member of Captain T. Prentice's troop, cavalryman, credited to Woburn in an assignment of wages. *Ib.* xxxvii. 282; xlii. 94; xliii. 279.
 Francis Wyman, member of Captain T. Prentice's troop. *Ib.* xxxvii. 280, 282. It is inferred that he served apparently by voluntary enlistment. He died April 26, 1676, a result probably of exposure in battle in the December previous. Sewall's *Woburn*, 119. Son of Francis and nephew of Lieutenant John Wyman.
 John Wyman, cornet; latterly lieutenant of Captain T. Prentice's troop. *Ib.* xxxvii. 280, 282.
 John Wyman, son of the above; member of same troop, killed at the Fort Fight, December 19, 1675. *Ib.* xxxvii. 281, 282.

Daniel McGinnis, variously spelled, however, Mackginnis, Magines, Mackgennys, Maginnah, etc., appears to have been a citizen of Woburn in 1674, for in a deed, dated June 29th of that year, Michael Bacon, of Cambridge, conveyed about seventy-five acres of land in Cambridge to Daniel McGinnis, who is referred to in the deed as a resident of Woburn. At that time, however, he apparently moved from Woburn to Cambridge, as he describes himself of the lat-

ter place in a deed to John Tidd, dated June 8, 1675. In this deed, also, McGinnis first speaks of himself as being an "Irishman." Shortly afterwards our early Irish citizen seems to have returned to Woburn, for the Woburn records give his marriage to Rose Neal, February 10, 1676. His first child, Rose, was born in Woburn November 19, 1677, and can easily claim to be the first Irish-American of Woburn.

According to Billerica *History*, McGinnis was living in that town in 1678 and 1679. He next appears, April 4, 1682, at Watertown. On that date "the selectmen of Watertown stated to the Court that Daniel *Maginnah*, an Irishman, is lately removed from Medford and hired estate of Richard *Houlding*, having a poor place and considerable family of children, and they disapprove of him as an inhabitant."

After this rebuff it would seem that Mr. McGinnis again sought refuge in Woburn, for under date of October 27, 1684, he entered into an agreement with Ralph Reed and Benjamin Simonds about the fencing of some land "of the great field in Woburn, called the Simonds' field, or Mount Playmun fields," which is the large, level plain now located on Burlington Street in Cummingsville, near Burlington town line, and even now often spoken of as "The Plains." As he clearly owned land at this place, it may be inferred that he lived there also.

In December of the same year his name appears in the town rate, where he is taxed four shillings. His son Edmund was born here, March 23, 1685. About this time, however, or shortly prior thereto, he again migrated, and this time to Rhode Island, for in a deed dated February 15, 1685, he describes himself "of the King's Province in the Narragansett County in New England," and in this deed conveys his Billerica land to John Abbott. Further see *Records of the Colony of Rhode Island*, vol. iii., p. 234.—E. F. JOHNSON.

The lieutenant (Oakes) of Prentice's troop, who held office at the beginning of the war, having been assigned to another command, John Wyman, the cornet, was promoted to his place. In *N. E. Hist. Gen. Reg.*, xxxvii. 281, reference is made to a petition of Lieutenant John Wyman, asking for the release of his son, who was lately married, stating that he himself had been in both the Mount Hope and the Narragansett campaigns, and in the latter had received a wound in his face; that his eldest son was killed in that campaign, and that his servant had been in the country's service all the past winter. The servant was Robert Simpson. Again, a well known character—John Seers, constable of Woburn—made complaint to the authorities that Lieutenant John Wyman and daughter, named Bathsheba, had together resisted him in the impressment of one of the horses of the said Wyman for the country's use, and for this offence they were both charged two pounds each as a fine. The date of Seers' petition was May 10, 1676,

and the time of the trouble was April, 1676. Captain John Cutler, of Charlestown, marching through Woburn with several soldiers on the way to Billerica to attack the Indians, who had caused a stir at that place, having a warrant from the late Major Willard to the constable at Woburn and the constable at Billerica, to impress horses or anything desired for the service, found horses were very scarce, because on account of the stir at Billerica about twenty of the best of Woburn men and horses had already gone up to help them. Seers recites the hard words and action of resistance of Wyman, and prays for such legislation "as will prevent such abuse." "That so," he says, "I and other constables may not go in fear of our lives when we are upon the execution of our office."

A warrant had been issued to the constable for six carriage horses and three men from Woburn. Bathsheba Wyman, named above, married Nathaniel Tay, of Billerica, May 30, 1677. Cf. *N. E. Hist. Gen. Reg.* xxxviii. 44; Hazen's *Billerica*, 120.

The troop of which John Wyman, of Woburn, was lieutenant was attached to the Massachusetts regiment, which was organized for the Narragansett campaign, and was present with the army in the memorable Fort Fight of December 19, 1675, being the only cavalry organization of the English there. A letter of Joseph Dudley at the time mentions a slight wound by an arrow in Lieutenant Wyman's face, which he received during a scout about four days before the occurrence of the famous Fort Fight. During this scout a number of Indians were killed or taken prisoners in an attack on their wigwams, which were burned, the slight wound of Wyman being the only casualty received on the part of the English in that skirmish. Cf. *N. E. Hist. Gen. Reg.*, xl. 80, 88; xliii. 156.

OFFICERS OF THE PROVINCIAL PERIOD, 1692-1775.—During this period occurred certain minor Indian wars, and the war of greater magnitude than any that had yet been experienced, namely, the French and Indian War. In all these contests Woburn men bore an active part. The provinces were then loyal and true to the government of Great Britain, and great interest was still taken by the people in military affairs. Indeed, it was a necessity for their own protection. The warlike experience of this period was a school for the War of the Revolution, and many of the officers and men originally enrolled under the British colors in these earlier wars, were later found in arms against the British Government. First and foremost in the list it will not do to omit a sketch of Woburn's most eminent son, whose military career commenced during this period.

Prime Minister and Commanding General of an European Army.

Benjamin Thompson, Count Rumford (1753-1841), a native of Woburn; pre-eminently her most distinguished son; was major in the second provincial regiment of New Hampshire, 1773, before he was of legal age; later a lieutenant-colonel in the British army in a cavalry regiment composed of royalists and designed for service in America, 1781,

and later still a colonel of the King's American dragoons, 1783. Having gained some military distinction in the British service during the Revolutionary War in America, he then entered the service of the Elector of Bavaria, and gained still higher military distinction in Europe. He was colonel of a regiment of cavalry and general aide-de-camp in Bavaria, 1784; major general of cavalry and privy counselor of state, 1788; minister of war and minister or superintendent of police, etc., etc.; head of the council of the regency in Bavaria, and commander-in-chief of the Electoral army, and, in 1796, while he held the high offices last named, Munich, the capital of Bavaria, was threatened by the Austrian and French armies, but owing to his signal services and his success, neither the French or the Austrian forces entered the city, nor gained any substantial foothold in the country, which was soon after delivered from their dangerous presence.

Although this eminent man acquired none of his military renown in Woburn, he should not be omitted in a consideration of the career of Woburn's military men. It is true that he fought against his native country in the Revolutionary contest, and on the side which was opposed to her liberties, but his eminent services to mankind as a scientist and a philanthropist are sufficient to overcome the opprobrium conferred on him by his countrymen for his course in that struggle. The world now looks on him as a benefactor, in spite of serious defects in his moral character, and America considers him as one of her greatest men. Let us unite in that verdict.

Among other natives of Woburn who gained distinction in the military profession elsewhere, may be mentioned Brigadier-General James Reed.

James Reed (1724-1807) was born in Woburn, son of Joseph and Sarah, and died in Fitchburg. Officer of eminence in the French and Revolutionary Wars; captain, lieutenant-colonel, and, in May, 1775, colonel of the 2d New Hampshire Regiment, which held the rail-fence with John Stark, at the battle of Bunker Hill, and protected the retreat of the main body from the rebout. In the army in Canada under General John Sullivan, in 1776, his regiment suffered severely from disease, and more than one third died. He, himself, was attacked by the small-pox, and, after a long illness, became incapacitated for further service. He had, meantime, been appointed a brigadier-general on the recommendation of Washington, and retained the commission in the hope that he might be able to return to active service, but becoming nearly blind and deaf, he was forced to give it up, and retired with half pay. A son, Sylvanus, was also an active military officer, and rose to the rank of colonel. Cf. *Appleton's Cyclop. of Amer. Biog.*; *Reed's Red Randy*, 78-80.

The father of General Reed resided on the estate of his father at Woburn West Side, in the house and on the place known in the present century as the Sylvanus Wood farm, corner present Lonest and Cambridge Streets. Very little reliance can be placed on the statements made in the *Hist. Reed Fam.*, above cited, in relation to General Reed's regiment, or the careers of his immediate ancestry. According to that history, 75-76, the General was a grandson of that Joseph Reed who was sergeant, 1701-1713; ensign, 1713-1715; lieutenant, 1716-1741; and captain-lieutenant (?), 1739-1749, in Woburn.

Another officer born in Woburn, and who gained distinction in the French and Revolutionary Wars, particularly in the line of a military engineer, was Colonel Jeduthun Baldwin.

Jeduthun Baldwin (1732-1788), a native of Woburn, son of Isaac and Mary, died in Brookfield. Captain in the French War. In the siege of Boston, 1775-76, he designed the defences of the American forces, and, on March 16, 1776, was made assistant engineer, with the rank of captain, to the Continental troops; was subsequently ordered to New York and made lieutenant-colonel, April 26, 1776; was sent to Canada, September, 1776, and later made engineer with the rank of colonel. He performed various services and resigned from the army April 26, 1782. Cf. *Appleton's Cyclop. Amer. Biog.*; *Richardson Memorial*, for genealogy, where it is stated that a brother, Isaac, was killed in Bunker Hill Battle. The name of Jeduthun Baldwin often occurs in the documentary history of the Revolutionary War.

Colonels.

Jonathan Tyng, esquire and colonel prior to 1708, at which time his name is first connected with Woburn. He had been major, 1699; lieutenant-colonel, 1702, etc.; and colonel certainly from 1708-1721, dying in the last year named at Woburn, in his eighty-first year. Gravestone at Woburn. His previous homes had been in Boston and Dunstable, and his family had been one of the most prominent in Massachusetts. His widow, Judith, who had been formerly the wife of the Rev. Jabez Fox, of Woburn, died there, 1736, in her ninety-ninth year—grave-

stone—and the gravestone of another wife, Sarah (Usher) Tyng, 1713, is also to be seen there. Colonel Tyng was a magistrate and one of Sir Edmund Andros's council, 1686-1687, and colonel of the 2d Middlesex County Regiment of Foot. He was also entitled to armorial bearings, and there is much preserved to show that he was an honorable man and a person of ability. The history of Dunstable contains many allusions to him, a place where he was the earliest permanent settler, having remained in that town alone during Philip's War, when every other person had departed from the place for fear of the Indians. He fortified his house, and though obliged to send to Boston for his food, was alone in the wilderness among his savage enemies. Town-meetings of Dunstable were held at Woburn, 1677, and were continued in that way as late as 1711. Till 1713 he was kept busy in defending his frontier settlement from hostile Indians. At an early period he was appointed guardian of the Wameet tribe. His brother, Edward Tyng, was father-in-law of Rev. John Fox, son of Rev. Jabez, of Woburn. We will not attempt to enumerate the offices he held at Dunstable. In 1703, as colonel, he had charge of all the garrisons in his district. The standard genealogical dictionaries give the particulars regarding his family and wives, his distinguished connections, and his children. One of his sons was the first born child recorded in Dunstable. Two of his sons, both graduates of Harvard, were distinguished military men, one of them, the eldest, being killed by the Indians in 1710. Interesting details are furnished in the diaries of the period. Samuel Sewall, Jr.,—*Memoranda* (*Mass. Hist. Coll.*, 4th ser., ii, 34)—alludes to these occurrences:

"Jan. 29, 1723-24, Col. Jonathan Tyng dies. See *Next Letter*, N. 1043. Interred the 24th, at Woburn; I went with two brothers Dudley; a large funeral. Gave me and wife gloves."

The *Next Letter* notice, No. 1013, referred to, was as follows:

"Woburn; Lord's Day, January 19th. We were here entertained with a very loud *monede mori*.¹ The Hon. Col. Jonathan Tyng, Esq., walking to the place of public worship in the afternoon, expired as soon as he got into his seat, during the time of the first prayer, and was carried out dead, *status* 81. His faith and holiness were so apparent that we are persuaded he was conveyed to the assembly of the first-born in heaven, to bear a part with them in glorifying their creator and redeemer."

On another occasion, March 1, 1713-14, Sewall "went to Woburn to attend the funeral of Ann Tyng." She "was about sixty-nine years of age, and died on Sabbath morning, of fever." Sewall "waited on the Governor and Lady there," and had given him "a pair of gloves."

Eleazer Tyng, son of the preceding, is named in Woburn tax-lists as colonel, 1729-37.

Eleazer Flagg, styled colonel and esquire on gravestone at Woburn, which contains a lengthy inscription. He was a sergeant, 1708-13; lieutenant, 1713-15; captain, 1716-19; major, 1719-22; colonel, 1722-26; and died in 1726, in his fifty-sixth year. His father was Lieutenant Gershom Flagg, who was killed in battle with the Indians in New Hampshire, in 1690. The son spelled his surname Flagg. He was evidently a rich man. His wife was called "Madame." The enumeration of his virtues on his gravestone is curious: "A faithful christian, a pious liver, cheerful giver, the widow's savior in a doubtful case, a father to the fatherless, a tender husband, kind parent, faithful friend, a righteous man." A silver cup he gave to the "church in Woburn," 1726, is still in use. He was evidently the successor of Colonel Jonathan Tyng as colonel of the 2d Middlesex County Regiment of Foot.²

¹ *Monede mori* accompanying the phrase *fugit hora*, is a common inscription on the gravestones of the period. From the style the notice appears to have been written by the Rev. John Fox.

² Colonel Eleazer Flagg's inventory, dated April 3, 1727, discloses £1242 18s. of personal property, and includes "a Negro man and Negro maid," valued at £200, and "armes," valued at £12 15s. The "Homestead Dwelling-House, Gristmill and other Buildings with the land adjoining thereto about 2 hundred acres, and about 100 acres of out-land," valued at £2200.

There appears on record an elaborate agreement made by and between Mrs. Esther Flagg, the widow, and her son-in-law, Jonathan Poole, and Esther Poole, his wife, and providing, among other things, that the widow should have the easterly end of the dwelling house, and that her son-in-law should keep for her own use, both summer and winter, a good cow and horse "suitable for the widow to ride" on at all times. He also agrees to provide the widow with twenty bushels of good Indian corn, four bushels of rye corn and three barrels of good cider yearly, together with 160 pounds of good pork and 100 pounds

Jabez Fox, of Falmouth, now Portland, Me., a native of Woburn, was a colonel. Roland Cotton, a resident of Woburn, was a colonel, 1714-52.

Jonathan Fox, a brother of Colonel Jabez Fox, and son of the Rev. John Fox, of Woburn, was a captain, 1701-74, and colonel of the 2d Middlesex County Regiment of Foot, 1755-81. He died 1790, and was called colonel in the record of his decease. In the latter part of his life he appears to have been afflicted with some disease which rendered him helpless, and there is extant a town order dated February 26, 1790, a few months before his death, in favor of Josiah Richardson, for moving "Col. Fox up into Doct. Blodget's chamber." A paper entitled "copy of a court-martial," is preserved, dated Concord, June 29, 1779, a general court-martial being held that day, upon a complaint brought by Lieutenant Joseph Johnson, of Woburn, against Colonel Jonathan Fox, for an alleged violation of the thirteenth section of the militia law. The court was of opinion that Colonel Fox was, through inadvertency, guilty of misdemeanor and breach of duty, and sentenced him to be reprimanded by the brigadier-general. Jonathan Reed, president; Eleazer Brooks, brigadier-general.

Majors.

William Johnson, 1692-1704, and James Converse, 1693-1706, already noticed.

John Fowle, captain, 1738-48; major, 1749-75. Died 1775, aged eighty.

Joseph Richardson, quartermaster, 1709-17; lieutenant, 1717-39; captain, 1747-54; major, 1755-56. Died 1756, aged fifty-eight.

Nathaniel Thwing, major of Boston, named in tax list, 1752. Lieutenant-colonel, 1756. He married the widow of Rev. Supply Clapp, of the Second Parish, 1750.—*Thwing Fam.* (Boston, 1833), 23-25.

Captains.

Edward Johnson, ensign, 1693-96; lieutenant, 1696-99; captain, 1700-24. Died 1726, in his sixty-eighth year. A deacon of the church, 1720-25. Died, it is said, of grief at the death of a son killed in Lovewell's Fight.—*Sewall's Woburn*, 294-95.

Josiah Converse, lieutenant, 1693-1706; captain, 1706-17. Died 1717, aged fifty-eight. "Capt." on gravestone.

Abraham Fitch, styled "Mr." on gravestone, but "Capt." in record of decease. Died 1711, aged fifty-seven.

James Fowle, sergeant, 1693-1701; captain, 1712-14. Died 1714, aged forty-seven. "Capt." on gravestone and on stone of daughter, Ruth, 1712.

Seth Wyman, lieutenant 1705-12; captain 1712-15. Died 1715, aged fifty-two. "Lieut." in record of death. Perhaps he was one of those officers commanding a company, styled captain lieutenant. He appeared to bear this office as early as 1707. On February 16, 1706, he was court-martialed at Groton, for his conduct on the February 6th previous, when he was in command of a scouting party, near Mount Monadnock, in search of hostile Indians. By a false report of the appearance of a superior force of the Indians in their front, his command was stampeded, encouraged, it was said, by the example and orders of the officers. At the trial, Wyman and his under-officers were exonerated from cowardice and dishonorable intentions. Cf. Dr S. A. Green's *Groton during the Indian Wars*, 98-101.

James Richardson, captain-lieutenant (?) 1708; captain 1714-22. Died 1722, aged forty-six. "Capt." on gravestone.

John Coggin, lieutenant 1705-17; captain 1718-25. Died 1725, aged fifty. "Capt." on gravestone.

John Fowle, captain 1721-44. Died 1744, aged seventy-three.

Stephen Richardson, ensign 1717-21; captain 1722-52. Died 1752, aged seventy-nine. A deacon of the church, 1740-52, and "deacon" on gravestone.

Seth Wyman, ensign and captain, 1725. Promoted for his meritorious services in Lovewell's Fight, May 8, 1725. Died September 5th following, aged thirty-nine. His prowess has been frequently celebrated in prose and verse. He commanded the company engaged in the above action after his superior officers had fallen. It was one of the most fiercely contested and bloodiest battles, considering the number of good beef yearly. The widow was also to have "the Negro maid called Rosa."

There appears to have been considerable litigation over the estate of Colonel Jonathan Tyng, which, as late as 1788, was represented as unsettled by John Tyng, one of the heirs. In his inventory, appraisal is made of "3 Negro Men," "Quash," valued at £40; "Boston," at £53 6s 8d; and "Cornwell," at £52 10s 8d. E. F. Johnson.

bers engaged, that ever occurred in New England. The Indians never recovered from its results. Six Woburn men, four of them grandsons of William Johnson, fought in the battle. One was killed and three wounded; two only escaped unhurt, Wyman being one of them. Penhallow's *Indian Wars* (1726) pays a deserved tribute to the actors in this battle, and mentions Wyman especially, who, he says, was, at his return, presented with a silver-hilted sword and a captain's commission. He went out again on another expedition, but the heat of the season caused many to sicken, and some died when they returned, and among them was Captain Wyman.

Robert Converse, lieutenant 1714-1726; captain 1726-36. Died 1736, aged fifty-eight.

Caleb Blodget, captain 1733-45. Died 1745, aged fifty-four.

Joseph Bowman, captain 1733-35, in tax-lists. Supposed to be a non-resident.

Isaac Dupee, captain 1734-41. Captain in 1734 of a troop of horse in a regiment of cavalry of which Estes Hatch was colonel. From out of town.

Joseph Reed, sergeant 1701-13; ensign 1713-15; lieutenant 1716-41; captain (captain-lieutenant (?)) 1739-40. Died 1741, aged eighty.

Samuel Eames, lieutenant 1733-41; captain 1741-44. Died 1755, aged eighty-four. A deacon of the church 1745-75, and "deacon" on gravestone.

Samuel Carter, cornet, 1734-40; lieutenant 1741-43; captain 1744-57. He appears to be in service in 1770. Two commissions are preserved. The Captain's, addressed to him as gentleman of Woburn, was as captain of the 1st Troop of Horse to be raised in the regiment of militia in Middlesex County, of which Eleazer Tyng was colonel; dated June 2, 1741. The cornet's was as cornet of the troop of which Isaac Dupee was captain, in the regiment of horse of which Estes Hatch was colonel, dated June 27, 1734. Captain Samuel Carter died 1787, aged ninety-six. "Capt." on gravestone at Arlington. Cutter's *Hist. Art.*, 201-02.

James Proctor, corporal 1725-32; ensign 1733-39; lieutenant 1739-44; captain 1744-67.

Nathan Blodget, ensign 1739-43; lieutenant 1744; captain 1745-47. Died 1747, in his forty-fourth year.

Timothy Brooks, quartermaster 1738; lieutenant 1744-53; captain 1746-56; perhaps captain-lieutenant a part of that period. Died 1786, aged eighty-six or eighty-eight. Died the 13th, buried the 15th October, 1786.

Robert Temple, captain in tax-lists 1746-53. Will, 1754, mentions farm at Woburn. Widow died here, 1755. Well-known resident of Ten Hills Farm, Charlestown.

Samuel Belknap, lieutenant 1750-51; captain (captain-lieutenant (?)) 1748 and 1752. Died in Newburgh, N. Y., 1771.—*Winchester Record*, ii, 274-75.

Zachariah Flagg, captain 1748-81.

John Fowle, captain 1749-51. John, Esq., died 1786, aged sixty-one.

John Reed, ensign 1744-50; captain 1750-55. Died 1755, aged forty-two. Captain of the "2d Military Company of Foot in the town of Woburn in the second Parish."

Ebenezer Thompson, sergeant 1733-35; ensign, 1738-50; lieutenant 1751-53; captain 1753-1755. Died 1755, aged fifty-four. Captain of the "2d company of foot in the town of Woburn, in the second regiment of Middlesex County, of which Eleazer Tyng was colonel;" commission dated July 3, 1753.—*Thompson Memorial*, 31.

Thomas Hardy or Harlee, captain 1754-64. The same, lieutenant 1756-66 (?).

Ebenezer Jones, generally a resident of Wilmington, captain 1755-58. Killed in battle at Halfway Brook, near Lake George, July 20, 1758.—*Sewall's Woburn*, 551. The Woburn records give his death as follows: Captain Ebenezer Jones, son of Samuel and Abigail, July 20, 1758, in his sixtieth year.

Benjamin Johnson, captain, 1756-81. Died 1781, aged eighty.

Jabez Carter, lieutenant 1748-71, captain (captain-lieutenant (?)) 1756-58. Died 1771, aged seventy-one. "Lieut." on gravestone. The following memorial is preserved: A receipt of Jabez Carter, as lieutenant of military company, for payment of three guns, that were "burnt in the fire, when Joseph Johnson's shop was consumed;" dated July 26, 1765.

Ebenezer Converse, ensign 1748-1752; lieutenant 1753-64; captain (captain-lieutenant (?)) 1756-57. Died 1765, aged fifty-five. "56th year," gravestone.

Benjamin Edwards, captain 1760-72

Benjamin Wyman, captain 1762-74. Died 1774, aged sixty-eight. "Capt." on gravestone.

Timothy Winn, ensign 1750-52; lieutenant 1758; captain 1762-63. Two of his commissions are preserved. The ensign's, 1750, to Timothy Winn, Jr., ensign of "3d military company of foot" in Woburn Second Parish, whereof John Reed was captain. The captain's, 1762, to Timothy Winn, captain of "3d military company of foot, in the town of Woburn," the part now Burlington. Lieutenant Timothy Winn was called into active service in 1757, the command containing a number of Woburn men, whose names are preserved in the rolls at Boston. He died 1800, aged eighty-seven. His portrait and that of his wife are extant in the house of William Winn, a descendant; John Johnston, painter, September 18, 1799.

Joshua Walker, lieutenant 1759-74; captain (captain lieutenant (?)) 1762 and 1775. Lieutenant at Lake George, October 21, 1758—Sewall's *Woburn*, 556. Later a captain during the Revolution. Died 1798, aged seventy.

Josiah Pierce, captain 1768.

Samuel Berry, captain 1769-70.

Thomas Pierce, captain 1769-73; also in tax-lists, 1776-81.

Non-resident captains named in tax-lists: William Reed, 1737-43, and Samuel Stone, 1748-52, both of Lexington; Amos Bunney, 1754, Bedford; Samuel Walker, 1758-59, Wilmington; Nathaniel Greenwood's 1759, Boston; Caleb Brooks, 1759 and 1786, Medford.

Lieutenants.

James Thompson, sergeant 1690-91; lieutenant 1693. Died 1693, aged forty-four. "Lieut." on gravestone. Cf. *Thompson Mem.*, 21-22.

Joseph Wright, lieutenant 1693-1700. A deacon of the church, 1698-1724. Died 1724, aged eighty.

Matthew Johnson, sergeant 1672-92; lieutenant 1693-96. Died 1696, aged sixty-two. "Lieut." on gravestone.

Josiah Parker, lieutenant 1695-96.

John Carter, sergeant 1682; lieutenant 1700-27. Died 1727, aged seventy-five. "Lieut." on gravestone.

Benjamin Simonds, corporal 1697-1702; cornet 1702-08; lieutenant 1708-26. Died 1726, aged seventy-two.

John Vinton, lieutenant, 1720, in inscription to wife on gravestone in Woburn burying-ground. Belonged to Stoneham; there being no public burying-ground there in 1720, his wife was buried here. Further see *Vinton Memorial*, 22.

Henry Walker, sergeant 1716-20; ensign 1720-21; lieutenant, 1721-1725.

Samuel Snow, sergeant 1708-21; ensign 1722; lieutenant 1722-23. Removed to Ashford, Ct., 1724, and died there, 1743.

Pierson Richardson, corporal 1714-17; cornet 1718-22; lieutenant 1723-54.

Aaron Cleveland, cornet 1722; lieutenant 1724. Further, see Sewall's *Woburn*, 600.

Joshua Thompson, sergeant 1718-22; ensign 1723-26; lieutenant 1726-38. Of Wilmington. Died 1760, aged eighty-two. *Thompson Memorial*, 25.

Samuel Kendall, sergeant 1717-32; lieutenant 1732-64. Died 1764, aged eighty-three. "Lieut." on gravestone. His lieutenant's commission from Governor Belcher, 1742, is extant.

Edward Johnson, ensign, 1716-32; lieutenant 1733-40. Died 1774, aged eighty-five. Deacon of church in the Second Parish 1741-74.

Thomas Reed, corporal 1718-22; sergeant 1723-32; lieutenant 1733-36. Died 1736, aged fifty-four. "Lieut." on gravestone.

James Simonds, corporal 1703-36; lieutenant 1737-75. Died 1775, in his eighty-ninth year.

Phineas Richardson, ensign 1735-36; lieutenant 1738. Died 1738.

Israel Reed, corporal 1718-32; ensign 1733-38; lieutenant 1739-52.

Joseph Richardson, lieutenant 1739-54. Died 1754, aged eighty-two.

Nathaniel Cutler, lieutenant 1746-48. Died 1748, in his forty-ninth year. "Lieut." on gravestone in the Precinct, or Burlington burying-ground.

William Tay, lieutenant 1746-80. Died 1780.

Joseph Johnson, corporal 1734; lieutenant 1751-92; commission of first lieutenant of eighth company, 2d regiment, Middlesex County, extant, dated May 6, 1776. "Lieut." in record of decease. Died 1798, aged ninety-seven.

John Holt, lieutenant 1751-56. Dismissed from the church to the "church in Westminster in New York Government," September 27, 1767.—*First Church Records*.

James Richardson, lieutenant 1756-57. Died 1773 (?)

Samuel Thompson, sergeant and lieutenant in Captain Ebenezer

Jones's company in the French War 1758; lieutenant in town records 1758-77. Died 1820, aged eighty-nine. He was an esquire, a deacon, an indefatigable clerk, a surveyor, a diarist, and held most of the highest offices in the town, besides performing much important town business. He fought in Concord and Lexington battle April 19, 1775, and left an explicit written account of his own personal experience. In this action his brother, Daniel Thompson, was killed. It is not too high praise to say that he was one of the most useful men of his day in the town, and that posterity owes much to the memoranda he preserved. His gravestone is to be found in the Second burying-ground, Woburn Centre.

Phineas Lovjoy, lieutenant 1758-59.

Thomas Hardy or Hardee, lieutenant 1759-66. See Captains.

Jonas Richardson, ensign, 1758-59; lieut., 1760-74; capt., 1775-76. Died 1776, aged 41.

William Belknap, lieut., 1762-67. Died 1767, aged 36. Cf. *Winchester Record*, ii, 275-76.

Josiah Parker, lieut., 1762-74. Died 1774.

Nehemiah Wyman, sergt., in active service in Capt. David Green's company, raised by Col. Eleazer Tyng, and marched for the relief of Fort William Henry, in August, 1757; Timothy Winn, of Woburn, was the lieutenant. Nehemiah Wyman was again impressed for Col. Eleazer Tyng's regt., from Woburn, March 27, 1759—age 36; lieut., 1763-74. Died of the small-pox, 1775, aged 52.

James Fowle, Jr., lieut., 1761. Died 1793, aged 72.

Benjamin Flagg, lieut., 1761. Died 1774.

Eleazer Flagg Pools, ensign, 1762-67; lieut., 1768-75. Died 1776, aged 42.

Jonathan Tidd, ensign, 1762-73; lieut., 1774-75. Died 1785, aged 59.

Non-resident lieutenants named in tax-lists: Gershom Flagg, 1755-78, Wilmington; Abijah Smith, 1760-71, Charlestown.

Ensigns.

John Pierce, sergt., 1680-91; ensign, 1693-1720. Died 1720, aged 76.

Israel Walker, corp., 1683-90; sergt., 1690-96; ensign, 1696-1719. Died 1719, aged 75.

Samuel Blagget, sergt., 1693-99; ensign, 1700-43. Died 1743, aged 84.

John Holden, sergt., 1697-1706; ensign, 1706-56. Died 1756. Commission extant as ensign in the "foot co. of which Josiah Converse is capt.," dated Nov. 21, 1706.

Josiah Converse, ensign, 1711-26. Died 1748.

Abraham Jaquith, corp., 1719; sergt., 1719-26; ensign, 1726-30.

Samuel Wymun, sergt., 1734; ensign 1739-43. Died 1743, aged 55. "Ensign" on gravestone.

Daniel Reed, ensign, 1747-55. Died 1757, aged 57. *Hist. Reed Fam.*, 75; Wyman's *Charlestown*, 803.

Joseph Pierce, ensign, 1762-67.

Isaac Snow, ensign, 1761-74. Died 1776, aged 67.

Timothy Brooks, Jr., ensign, 1768-1772. Removed to Sa'em. "Or. of town," 1777, in a list of male members in the First Church records.

Matthew Johnson, ensign, 1768. As ensign, he received cash of "Major Johnson's company" to purchase colors, £11, 18s, 10¹/₂d. Died 1775.

Timothy Winn, ensign, 1772-94.

John Wood, ensign, 1774; capt., 1775. Died 1809, aged 69. Anecdote of him in French war in Sewall's *Woburn*, 348-50.

Non-resident ensign named in tax lists: Daniel Tidd, 1765-72, Lexington.

Cornets.

Jonathan Wyman, quartermaster, 1697-1708; cornet, 1708-36. Died 1736, aged 75.

Jacob Fowle, corp., 1720-22; quartermaster, 1723-24; cornet, 1725-47.

John Fowle, cornet, 1741-45. Died 1745, aged 45.

Samuel Wymun, cornet, 1762. Perhaps the Samuel, Esq., died 1787, aged 70.

Non-resident cornets named in tax-lists: John Whiting, 1757-60, Bedford; Joseph Damon, 1759, Billerica; Jabez Damon, 1762, Reading.

Sergeants and other under-officers during this period were numerous, and the names of those not already mentioned are here given.

Sergeants.

Daniel Baldwin, 1693-1718. Died 1719. Samuel Waters, 1693-1728. Died 1728. Francis Wilson, 1693-96. Ebenezer Johnson, 1693-1736. Died 1737. John Tidd, 1694-1737. Died 1743. Samuel Wilson, corp., 1694; sergt., 1695-1729. Died 1729. George Reed, corp., 1694; sergt., 1697-1719. Died 1756, in his 96th year; gravestone at Woburn Centre.

A deacon of the two Woburn churches, 1719-56. John Walker, corp.,

1694; sergt. 1697-99. Died 1699 (?). James Simonds, 1697-1706. Died 1717 (?). Timothy Walker, 1700-6. Died 1706, aged 34 y., 3d. - grave-stone. Benjamin Johnson, 1700-33. Died 1733. Benjamin Pierce, 1701-1737. Died 1739. Samuel Walker, corp., 1694-1702; sergt., 1702-8. Died 1744. A deacon of the two Woburn churches, 1709-44. See Sewall's *Woburn*, 173. James Pierce, 1705-35. Died 1742. John Converse, 1707. Died 1708. Henry Baldwin, corp., 1697; sergt., 1707-37. Died 1739. John Wyman, corp., 1706-7; sergt., 1707-28. Died 1728. Ebenezer Locke, 1710-23. Died 1723. Jonathan Thompson, 1710-37. Died 1748. William Bruce, 1712-38. Isaac Walker, 1714-28. Timothy Snow, 1716-37. Died 1747. Samuel Pierce, 1717-31. Thomas Henshaw or Hineher, 1720-26. Died 1726. Samuel Buck, corp., 1718-23; sergt., 1723-30. James Thompson, corp., 1718-23; sergt., 1723-24. Died 1763. A deacon of Woburn and Wilmington churches, 1725-63. *Thompson Mem.*, 25-26. William Wyman, 1724-37, and 1747-51. A William was sergt. in active service, 1753. Noah Johnson, 1725, a native of Woburn, but in 1725 a resident of Dunstable; sergt., in Lovewell's company at Lovewell's fight, 1725. He resided latterly at Pembroke and Plymouth, N. H., where he died 1798, aged 99 y., 6 m., 11 d., being the last survivor of Lovewell's company in the celebrated engagement which made that company famous. Cf. Sewall's *Woburn*, 207. David Roberts, corp., 1718-29; sergt., 1727-34. There were probably two persons of this name holding office at the same time, for David, Sen., died 1724. Josiah Pierce, 1727-28. Died 1759. A deacon of the church, 1742-59. Ralph Reed, corp., 1725-34; sergt., 1733-38. Isaac Baldwin, 1735-34. Benjamin Richardson, 1734-36. Eleazer Carter, 1734. Samuel Wilson, 1735-37. Died 1759. John Cutler, 1736. Died 1767. Isaac Gleason, 1740-50. Samuel Tidd, 1757, on roll as sergt. in the company impressed, under command of Samuel Bancroft, Jr., capt., in 1757, and marched to Marlborough, being one of the Woburn names found in that company. He died in the army at Lake George, Oct. 10, 1758, being under age. Particulars regarding his sickness, death and burial are given in Lieut. Thompson's diary.—Sewall's *Woburn*, 555-56.

Corporals.

John Wyman, 1708. Perhaps the John who settled in Wilmington, and who died about 1748. James Burbeen, 1714-29. Died 1729. Edward Johnson, Jr., 1715. Daniel Snow, 1716-17. Died 1717. Edward Walker, 1718-37, and 1747-52, 1764, 1767-68. Supposed to be the same person, perhaps the Edward, died 1787, aged 93. Ebenezer Buck, 1721-24. John Tidd, 1723-25, and 1735-37. James Thompson, 1725. Thomas Richardson, 1725. Died 1774, in his 93d year—grave-stone. He was a corporal in Lovewell's company in Lovewell's fight, 1725, and was one of the few who escaped any considerable injury in that seriously contested engagement. Samuel Jones, Jr., 1726-30. Philip Alexander, 1733. Andrew Evans, 1733. Died 1778. Thomas Reed, 1739.

After 1736 the usage of mentioning the names of non-commissioned officers by title appears to have ceased in the tax-lists, and the names of later officers are unknown. The names of two officers bearing the title of Clerk are preserved.

Clerks.

Clerk or *clerk* Pierce, 1696. ? Thomas, died 1717. Samuel Baker, 1715.

NOTE.—For authorities on Colonel Tyng, cf. Whitmore, *Elements of Heraldry*, 92; Fox's *Dunstable* (1846). There is extant an interesting petition of Colonel Tyng's, in February, 1676, showing that he then lived "in the uppermost house on Merrimac River, lying open to the enemy, yet it was as it were a watch-house to the neighboring towns, also near to the Indians' fishing place; there being never an inhabitant left in the town but *myself*." He asked for three or four men to help garrison his said house, which he had been at great charge to fortify. The early history of Dunstable was a series of "attacks, burnings, captivity and massacre." An engagement at Dunstable in which three Woburn men were killed occurred September 5, 1724. A small party attacked a body of seventy Mohawks, and a reinforcement fared little better. The Indians killed the

greater part instantly. Eight bodies of the slain were found and buried in one grave. The Boston *Newsletter* for September 10, 1724, gave their names, including Daniel Baldwin and John Burbeen, of Woburn, to which the name of Benjamin Carter, of Woburn, should be added. One of the grave-stones at the location of their interment contains an inscription "to Mr. Benjamin Carter, aged twenty-three years." Cf. Fox's *Dunstable*, 106-110; Penhallow's *Wars*, 1 *N. H. Hist. Coll.* 109; Sewall's *Woburn*, 595-598; *Reminiscences of Dunstable*, 115, etc. The writer heard a tradition from his father, Dr. Benjamin Cutter, that the last seen of this Benjamin Carter by his family in Woburn, was when he descended the hill near their residence on horseback, going down the steep incline by a crooked road that formerly existed, opposite to the junction of present Cambridge and Church Streets in Winchester; and that when the men of his family heard of the manner of his death, they said, "Ho! they would not be such boys as to be killed by Indians."

A bill is extant against Jonathan Fox, "Captain Fox, his company's expenses for liquor," of James Fowle, September, October, 1764. The alarm-lists of the Third Foot Company in Woburn, in 1776, and following years, contain references to his name in the following manner: "Return of training soldiers belonging to the Eighth Foot Company in the Second Regiment of foot in the county of Middlesex, commanded by Jonathan Fox, Esq., colonel." The same was repeated in 1781. The company was commanded by Joshua Walker at this time. In 1782 it was Captain Reuben Kimball's company, same designation, and the regiment was commanded by Colonel Benjamin Brown. The following are brief references to Colonel Fox:

"October 6, 1786. Colonel Fox's wife died. April 17, 1790. Colonel Fox died; 18th, buried."

Sewall's *Woburn*, 332, contains a brief notice. April 30, 1770, Captain Fox was debtor to Matthew Johnson, constable, for serving a writ for him, 1s. 5d.

An account lodged February 21, 1791, by the widow Mary Fox against Josiah Johnson, one of the selectmen for 1786-87, for damage done to her house by his putting soldiers therein, in January, 1787, the time of Shay's Rebellion, is extant.

An account of the ancestors and descendants of Captain Seth Wyman is published in the *Woburn Journal* for July 29th and August 5th, 12th and 19th, 1887.

There is extant a memorial in behalf of Elizabeth Blogget, in her eighteenth year, daughter of Caleb, her father being deceased, being an order of the General Court to Benjamin Wyman, her guardian, to sell her land; the letter of guardianship being dated November 16, 1761; the memorial to the court being dated January 13, 1762. On December 4, 1749, Elizabeth Wade, the said minor's mother and legal guardian, had preferred her petition to the General Court,

showing that Nathan Blogget, late of Woburn, deceased, had died seized of a real estate, and had left a widow, but no surviving children; therefore said minor, being a brother's child, was heir to a one-forty-fifth part.

Lieutenant Samuel Thompson left a diary of his experience in the campaign of 1758, which is one of the most interesting relics preserved connected with the early history of Woburn. The original was burned, it is said, in the great fire at Woburn Centre, 1873. The whole was published, 1868, in Sewall's *Woburn*, app. ix. The diarist, his brother, Abijah Thompson, and a number of his townsmen were in the same regiment. They marched to Fort Edward. This post was "exceeding strong" and "commanded by a numerous artillery." They proceeded thence, in the direction of Lake George, to a fort at Half-way Brook, and to Fort William Henry. They remained at the lake when General Abercrombie and the "old countrymen" attacked Ticonderoga and were repulsed. The body of Highlanders, regulars and provincials denominated the "old countrymen," suffered great losses in killed and wounded, and returned to Fort William Henry in confusion after the assault on Ticonderoga. The regiment on duty there, the one in which the diarist was, witnessed their sad return. Later the regiment went again to the fort at Half-way Brook, and a fight occurring there with Indians, on July 20, 1758, in which it was engaged, it lost fourteen or more killed. The diary preserves the names of those killed in this fight, including three captains, two lieutenants, one ensign, and three non-commissioned officers, and the bodies of all were buried in one grave. After performing hard duty in scouting, guarding posts, and labor in the woods, the regiment was released about November 1st, and on November 6, 1758, the diarist arrived home. By the death of his captain, Ebenezer Jones, in battle, July 20, 1758, at Half-way Brook, Sergeant Thompson was advanced to the rank of a lieutenant.

Catalogue of some interesting documents of the provincial period that have been preserved in the *Wyman Collection*, in the Woburn Public Library:

- Nehemiah Abbott, receipt for a soldier's gun, May 22, 1761.
- Aaron Beard, for son, receipt for military service, Mar. 21, 1762.
- Benjamin Brooks, and others, receipt for military service, April 6, 1759.
- Zachariah Brooks, by Isaac Snow, receipt for military service, Mar. 29, 1762.
- William Buck, receipt for military services, April 30, 1760.
- Jabez Carter, and others, receipt for military services (of a man), April 6, 1759.
- John Center, receipt for military service, May 11, 1762.
- Capt. Edwards, named in a lengthy lodging and meals' account, 1761-1763, in James Fowle's handwriting.
- Zachariah Flagg, for son Zachariah, receipt for military service, Feb. 7, 1764.
- Joseph Fowle, certificate of military service, 1757 (?) and Sarah Fowle, for Joseph, receipt for military service, Aug. 27, 1761.
- James Fowle, representative from Woburn, 14 receipts to him, on account of the public military business, 1760-1765.
- Jonathan Fox, for his son Thomas, an enlisted soldier in the expedition against Canada, in 1760, petition, 1760.

- John Kendall and others, receipt on account military service, April 6, 1759.
- John Kimball, receipt on account military service, May 11, 1762.
- Daniel Kittredge, for son, receipt on account military service, Jan. 1, 1762. Refers also to a gun.
- Benjamin Nutting, receipt for military service, Jan. 30, 1764.
- Joshua Parker, and others, receipt on account military services, April 6, 1759.
- Jacob Reed, and others, receipt on account military service, April 6, 1759.
- Benjamin Richardson, town order on account military service, Feb. 14, 1748.
- David Richardson, for David, Jr., receipt on account military service, Mar. 6, 1760.
- Simcon Richardson, twice an enlisted soldier in the expedition against Canada, legislative petition, and report of committee, Jan. 17, 1761. Same, receipt for military service, Mar. 30, 1761.
- Benjamin Simonds, and others, receipt on account military service, April 6, 1759.
- Timothy Slaughter, receipt for a man for the military service, from Medford, in the expedition against Crown Point, Sept. 4, 1756. An enlistment certificate of a private soldier with autograph of Slaughter, Sept. 4, 1756, has reference to the same business. The soldier was to be under Colonel Gridley in the expedition for reduction of Crown Point.
- Elisha Tottingham, and others, receipt on account military service, April 6, 1759.
- Edward Twiss, for son, receipt for military service, and the loss of a gun, Dec. 23, 1761. [A Timothy Twiss or Twist, of Woburn, in service, 1760, is mentioned in Srgt. David Holden's journal, published in pamphlet form by Dr. S. A. Green, 1889 (*Mass. Hist. Soc. Proc.*) and this Timothy was later a soldier in the Army of the Revolution, and was probably the son of Edward, above referred to].
- Artemas Ward, fragment of an undated petition about difference of pay of a lieutenant-col. and a major, he having served as a lieutenant-col. in the French War. [The same Artemas Ward who was afterwards a major-general and the commander-in-chief of the forces at the beginning of the Revolution.]
- Jonas Wyman, by John Russell, order for wages for military service at Cape Breton, in Capt. Stevens's co., of Andover, Nov. 28, 1745. [Jonas Wyman had died in the military service at Cape Breton.—Sewall's *Woburn*, 655. Another receipt, to Benjamin Wyman, by John Russell, in his behalf, is dated Sept. 24, 1745.]
- Nourse's *Military Annals of Lancaster* contains the names of a number of natives of Woburn, who enlisted in the wars as inhabitants of Lancaster, e. g., Peter Kendall, aged 29, husbandman; Stephen Kendall, 23, laborer; William Chubb, 25, weaver; Joshua Pierce, 22, housewright; and Richard Noyes, 20, blacksmith—all in Vernon's expedition to the West Indies, 1749. Most of the men who served in that expedition died during their absence. Joshua Pierce, of the above expedition, was captain of Col. Willard's co., at Cape Breton, 1745. Matthew Wyman, aged 40, laborer, and Uriah Wyman, 21, apothecary, natives of Woburn, were in the Lancaster co. in the expedition against Nova Scotia for the capture of the Neutral French, 1755; and Jonathan Pierce, of Woburn, was in the military service in 1760, and is mentioned in Srgt. David Holden's journal, published by Dr. S. A. Green, 1889.

CHAPTER XXIX.

WOBURN—(Continued).

MILITARY HISTORY—THE REVOLUTIONARY AND LATER PERIODS TO 1861, ETC.—THE CIVIL WAR OF 1861-65.

THE REVOLUTIONARY PERIOD.—The military history of Woburn during the Revolutionary period began with a war at her very doors. The events of the opening struggle at Lexington and Concord, of the battle of Bunker Hill and of the siege of Boston

occurred within the hearing and observation of her inhabitants, and all her people were stirred by the exciting scenes around them. We have heard, as well as many others, relations of the terror these scenes inspired in the minds of the young and the aged, and of the anxiety that prevailed, and of the grief in households occasioned by the loss of friends who fell in battle or who lost their lives in other ways connected with the warlike experiences around them. To these distresses were added the ravages of the small-pox, which in those days always accompanied the movements of an army. The irruption of this disease occurred in Woburn in May and June, 1775. Esquire Thompson, in his memoranda, records the following deaths: May, 1775, the Widow Jane Winn, Mr. John Burnam's child; June, 1775, Nehemiah Wyman and a nurse-child, all of the small-pox; and all these, he adds, and about twenty more had the small-pox at Mr. Joseph Winn's, 1775. The effect of these calamities on the prosperity of the people was considerable, and many persons unable to bear the strain died, giving an increased death-rate to the neighborhood, not counting the much greater mortality of the military losses in the vicinity.

Had we space, we would like to enter upon this subject in much detail; but it is not feasible. In place of it, let us say that on the subject of the Battle of Lexington the narratives of Woburn participants are principally the following:

1. Sylvanus Wood's deposition on the events of the early morning at Lexington and on his making a British soldier his prisoner. This deposition was dated June 17, 1826, and has been several times published, notably in Dr. Ripley's "History of the Fight at Concord," and in Barber's *Hist. Coll. Mass.*, 400-401. Wood, on the morning of the 19th of April, 1775, was an inhabitant of Woburn, living with Deacon Obadiah Kendall at present corner of Russell and Cambridge Streets. At an hour before daybreak that morning he heard the Lexington bell ring, and, fearing there was trouble there, arose, took his gun, and with Robert Douglass hastened to Lexington, about three miles distant, where he found the Lexington company assembled. He inquired of Captain Parker, the commander, the news, and while talking with the captain, a messenger arrived and announced that the British were within a half a mile. The drum was then ordered to beat to arms. The captain asked Wood if he would not parade with his company, and Wood assented. The captain asked also if the young man, Douglass, with Wood, would not also join his company. Wood spoke to him, and he assented also. Then follows a description of the events that took place. Wood was stationed about in the centre of the company, which was formed at the north end of the common in single file. While they were standing, Wood left his place, and went from one end of the company to the other, and counted every man

who had paraded, and the whole number in line was thirty-eight. Just as he had finished and got back to his place, the British appeared before them. He then gives a circumstantial account of what happened. He was intimately acquainted with the inhabitants of Lexington, and particularly with those of Captain Parker's company. After the British had begun their march to Concord, Wood, who had retreated from the common with the other Americans, returned and found two men, Robert Munroe and Jonas Parker, lying dead at the north corner of the common, and others dead and wounded. He assisted in carrying the dead into the meeting-house, and afterwards proceeded towards Concord with his gun; and when he came near the Vile's Tavern in Lexington, he saw a British soldier seated on the bank by the road. Wood approached him, holding his gun in readiness to fire if the soldier should offer to resist. He did not, and Wood took his gun, cutlass and equipments from him, and, proceeding with his prisoner towards Lexington, and, meeting two other persons, delivered him to them. Wood then mentions the supposed further disposition of his prisoner, whose action partakes in a measure the character of a deserter, from the feebleness of his resistance, and concludes his deposition by saying: "I believe that the soldier who surrendered his gun to me was the first prisoner taken by the Americans on that day."

2. Loammi Baldwin's narrative on the movements of the Woburn men during the first half of the day and his own experiences. This is very interesting, and is included in Rev. Leander Thompson's sketch of Colonel Baldwin, given elsewhere. He would appear from this narrative to have been in command of the body of men belonging to Woburn, holding at the time a rank equivalent to that of major.

3. Samuel Thompson, Esq.'s, narrative on the same subject, with his own experiences and observations. This has been several times published in full or in part. It may be said to be a good general account. According to this, the town was alarmed by the news of the regulars' march at two or three o'clock in the morning, and the men from the town were on their march towards Concord before sunrise. The Woburn complement arrived there early, and retired before the troops to Lincoln. Some had fired on the enemy from the Bedford road, just out of Concord, where had occurred a slight skirmish. The Woburn party placed themselves behind trees and walls on each side of the road where the enemy would approach, and when the enemy came up, poured upon them a general fire, which both forces engaged participated in. The roadway being full of the regulars, the intenseness of the fire greatly annoyed them; but the walls on each side of the road were, however, somewhat of a safeguard to them, as they stooped down to avoid the fire as they ran by; but, notwithstanding this precaution, many of them were struck at this point by the bullets of the Americans.

Thompson said the Woburn men distinguished themselves in this engagement with much valor. The Americans had three killed in this particular skirmish, one of them being the brother of Esquire Thompson—Daniel Thompson, of Woburn—who, his brother writes, "behaved very valiantly." When the Americans engaged the enemy in this skirmish, it was thought they had not more than one-third as many men as the regulars had. Thompson says, "I shot about ten rods at them near ten times, and thought I killed or wounded several;" he was very confident that the number was four or five, if no more. He apparently based his calculation on the fact that when the rear of the enemy had gone by, he went where he had shot and found three or four of the enemy lying dead very near the spot; and here he got one of their guns and some small plunder.

After this the Americans ran up and fired on the rear of the regulars, as they were marching rapidly along, and fired from every place where the land and turns in the road would give our side an advantage; and thus the British troops were pursued to Lexington.

Thompson pursued with the rest, and followed on to the point where the enemy burned the houses in Lexington. He shot several times more, he said, but then returned home, being much fatigued. He was at this time forty-three years old.

A large portion of his narrative is taken up with a recital of the general events of the battle, and his whole narrative, with all the variations upon it, has been carefully copied into the volume containing the transcript of the greater portion of his extensive diary. These general facts are too familiar for repetition, and are not always correct, being based on mere hearsay. He says his brother Daniel, who was killed, was much lamented. That Asahel Porter, another Woburn citizen, was killed in the morning at Lexington, with the seven Lexington citizens who then fell, at the time of the first fire. This was indeed true. Thompson speaks of the 18th of April, the day previous to the battle, as being Tuesday; thus the battle was on Wednesday, an interesting fact to be remembered. He speaks of the Woburn men at Concord, after their arrival in the morning, as watching for a time, with others, the enemy's motions. In the fight near Tanner Brook, in Lincoln, he says, "Woburn party greatly annoyed the regulars," and of the battle as a whole, he says, the British troops "marched with great expedition all the way," to the end of it.

He continues with a narrative of the events in Charlestown on April 20, 1775, and an account of the events of the siege of Boston to about the date of September 2, 1775, when the account suddenly ends.

The particulars regarding Daniel Thompson, "who was slain in Concord Battle, on the 19th of April, 1775, aged 40 years," are very numerous. His epitaph in Woburn first burying-ground has been oft-quoted, and the *Thompson Memorial*, recently pub-

lished, gives a view of his house, and an account of his life, as well as one of his death. He was very enthusiastic in the popular cause, and his end was a courageous one. He was killed in the limits of the town of Lincoln. It is said he was firing from behind the corner of a barn near the road where the British were passing, and that a regular, noticing the execution done by his firearm, ran around the barn and shot him dead, through his back, while he was in the act of reloading. His adversary was killed a moment later by an American bullet. This is the generally accepted story. See also a description of the locality in W. F. Wheeler's sketch of Lincoln, in Drake's *Middlesex County*, where the spot is described as near Cornet Ephraim Hartwell's house. His remains and those of Asahel Porter were interred in Woburn, on Friday, April 21, 1775, at which time the Rev. Josiah Sherman, of Woburn, delivered a suitable sermon and prayer, and a multitude of persons from Woburn and neighboring towns attended, and followed the remains to the grave. It was the office of his brother Abijah Thompson to carry the tidings of his death to the widow and children. The eldest child was about fourteen years old, and immediately went raving distracted on account of it, a state in which he remained for a number of days.

4. William Tay's deposition on some of the earlier and later phases of the battle, comprised in a petition to the General Court, dated September 20, 1775. He signs himself William Tay, Jr., and begs leave humbly to show, that on the morning of April 19, 1775, he was aroused from his sleep by an alarm, occasioned by the secret and sudden march of the ministerial troops towards Concord; that he, with about 180 of his fellow-townsmen, well armed, speedily took their march from Woburn to Concord, and upon their arrival there, with a number of their fellow-soldiers of the same regiment, who reinforced them, smartly skirmished with the enemy, being deeply touched by the results of the events that had occurred at Lexington, where they had seen the bodies of those who had been killed in the morning on that fatal field. These scenes served to heighten resentment, and the petitioner, by the joint testimony of his fellow-soldiers, lent, at least, an equal part through the whole stretch of way from Concord to Charlestown, in the action that ensued. At or near the latter place the petitioner, with several others, passing by a house, was fired upon by three of the British troops planted within. The fire being returned by him and his party, two of these British soldiers were killed, and thereupon the petitioner, rushing into the house, seized the survivor of them, who was a sergeant, by clasping him in his arms, and subduing him by sundry cuffs, when he then resigned himself and weapons to the petitioner, there being no others then in the house. It so happened when the petitioner was engaged in securing his prisoner, that others of the American side were coming up and rushing into

the house, when some one to the petitioner unknown carried off the arms or weapons of the prisoner, which were afterwards found in the possession of a respectable citizen of Concord, who, on the pretext of superior right, refused to give them up, and the petition had reference principally to their recovery. The petition is printed in full in the appendix to Frothingham's *Siege of Boston*, 368-69.

Asahel Porter, of Woburn, who was killed on the morning of April 19, 1775, at Lexington, was shot down by the British near the Common, when endeavoring to effect his escape, having been made a prisoner by them on the road, while they were on their way from Boston. He is said to have been the son of William Porter, and in 1773, when married at Seabrook, N. H., to Abigail Brooks, of the well-known Woburn family, called himself and bride in the marriage certificate, still extant, as "of Salem, Essex County, in the Province of Massachusetts Bay;" witnesses, John Brooks, Timothy Brooks and Mary Knowlton. His body, when found at Lexington, after he was killed, was lying close by the stone wall below the plot formerly called Rufus Merriam's garden, east of the Lexington meeting-house, as it existed in the earlier period. Here it was seen by Amos and Ebenezer Locke, of Lexington, who coming up that morning towards the easterly side of the Common, where the British then were, found Asahel Porter, of Woburn, shot through the body, and under cover of a wall about twenty rods distant from the Common. It is said, on good authority,¹ that Asahel Porter and one Josiah Richardson, of Woburn, set out for Boston Market during the night of the 18th of April, 1775, and that when near the present town of Arlington, being on the route the British had taken, they were halted by the enemy's column, deprived of the horses they rode, and forced to accompany their captors to Lexington as prisoners of war. They were released when the firing on the Common at Lexington occurred, on condition they departed without attracting any especial observation. To do this they were ordered to cross the fields at a pace no faster than a walk. Porter disobeyed, and ran after walking a few steps, and as a result was fired upon and killed.

His name is inscribed on the Lexington monument. His funeral occurred at Woburn, on April 21, 1775. No ancient stone to his memory is known to exist. A hundred years after his burial a monument was erected (April 21, 1875) to his memory by Post 33, G. A. R., near the supposed spot of his burial in the first burying-ground, the memorial consisting of a plain marble slab suitably inscribed.

5. The Rev. John Marrett's observations incorporated in his interlaved almanacs. This gentleman was pastor of the church in the Second Parish, or Burlington. He does not appear to have been pres-

ent at the battle, and an account he wrote of the events of the day as he heard about them is published in Sewall's *Woburn*, 363. He had been ordained pastor of his church during the December previous to the memorable 19th of April, 1775, which day he records was "fair, windy and cold; a distressing day," commencing "an important period." He says the adjacent country was alarmed the latter part of the night preceding, which corresponds with the statement of all the other Woburn authorities contemporary with the battle. "Our men," he says, "pursued them to and from Concord on their retreat back; and several [were] killed on both sides, but much the least on our side, as *we pick't them off* on their retreat." This is evidently an allusion to the part of the action in which the Woburn men played a conspicuous part, though the phrase "our men" may refer simply to the Americans in general. "*We pick't them off*" seems a singular expression for a clergyman to use, but he probably meant to say "our men," the Americans, "picked them off"—one of the current phrases of the day, alluding to the marksmanship of the Americans upon the British troops, as the enemy traced their way through the narrow defiles in the woods between the towns of Concord and Lexington, and were subjected to a brisk fire of musketry, constantly kept up, by the Americans, concealed in large detachments, behind trees, walls or buildings, where such chanced to be along the road traversed by the British in their retreat.

The Rev. Mr. Marrett would appear to have been present at the dinner on the 19th of April, 1775, prepared by his hostess, Madame Jones, the widow of his ministerial predecessor, for her distinguished guests, John Hancock and Samuel Adams, together with Miss Dorothy Quincy, the future wife of John Hancock, on that memorable day. The facts of the earlier part of the story are an oft-told tale. How Hancock and Adams and Miss Quincy, having witnessed the action on Lexington Common in the early morning, left the house of Rev. Jonas Clarke, of Lexington, where they had lodged the night previous, and were conducted as a precautionary measure for their safety to the house of Madame Jones, about four miles distant, in Woburn Preenet, now Burlington, the house afterward occupied by the Rev. Messrs. Marrett and Sewall, and now occupied by the latter's son, Mr. Samuel Sewall. This house had been occupied previously by the Rev. Thomas Jones, the husband of Madame Jones, and still previously by Sergeant Benjamin Johnson, who died in 1733, and who probably built it. Here the good lady of the house provided for her distinguished guests the elegant dinner above mentioned, exerting herself to the utmost to gratify them as highly as possible, feeling honored by their presence and company. Among other delicacies prepared for the occasion was a fine salmon procured with infinite difficulty, being an unusual dainty at that season. The hour for dinner

¹The late Col. Leonard Thompson, of Woburn, grandson of Samuel, Esquire.

having arrived, the company sat down with expectant appetites. But scarcely had they seated themselves when a man, terrified beyond reason, rushed into the room with a shriek, and led them to believe that the regulars were close upon them in hot pursuit of the two distinguished proscribed citizens, Hancock and Adams. He is quoted as saying: "My wife, I fear, is, by this time, in eternity; and as for you," addressing himself to Hancock and Adams, "you had better look out for yourselves, for the enemy will soon be at your heels." The man was evidently a coward, fresh from the bloody scenes at Lexington, the sight of which distracted a mind evidently already weak. There was really no danger whatever, as the enemy were then occupied in securing their own safety, and were busily engaged in fighting at several miles distance from the place where Hancock and Adams then were. But the appeal in the confused state of the affairs of the day had a startling effect on the company at table, and all instantly arose and prepared for concealment or flight. The coach in which Hancock and Adams rode was hastily put out of sight, being hurried into some woods, named Path Woods, some distance off, near the road to Billerica. Whether Hancock and his companions rode in the coach to this point in their flight, does not clearly appear. But this much is certain, that Mr. Marrett is said himself to have piloted the party along a cartway to Mr. Amos Wyman's house in a corner of Billerica, Bedford and Woburn Precinct, an obscure quarter, where the distinguished personages, who had intended to be the guests of Madame Jones, having had neither breakfast or dinner on that direful day, were glad to dine off of cold salt pork and potatoes, served in a wooden tray. Cf. the narratives of this event in Sewall's *Woburn*, 364-366, and Rev. Mr. Sewall in Frothingham's *Siege of Boston*, 60.

On April 20, 1775, the day following the battle, the Rev. Mr. Marrett records that he "rode to Lexington, saw the mischief the regulars did, and returned home." On the 21st he rode to Concord, and records on that day the statement that "the country is coming in fast to our help." On the 22d he was "at home; all quiet here," he records, but "our forces are gathered at Cambridge and towns about Boston." He records other items of news. On the 23d of April (Sunday) he mentioned that "soldiers are traveling down and returning," that some of them brought their arms and warlike accoutrements with them to meeting—"a dark day." "In the forenoon service," he records, "just as service was ended, Dr. Blodget came in for the people to go with their teams to bring provisions from Marblehead out of the way of the men-of-war."

Mr. Marrett records nothing further of moment, till on Saturday May 27, 1775, he distinctly heard the cannon in an engagement at Noddle's Island, now East Boston, which occurred on that day. He mentions hearing the cannon at that time all day, and in

the night, and in the time of morning service on the Sabbath following. From his account the firing of the cannon throughout the entire siege of Boston was always plainly heard at his home in Woburn Precinct.

According to the contemporary lists the number of wounded men from Woburn in the battle of April 19, 1775, was three, viz., George Reed, Jacob Bacon and one Johnson. The number of killed, as we have already stated, was two—Daniel Thompson and Asahel Porter. The following is a list of men from Woburn who died in the military service during the Revolutionary War. The number, however, may be only an approximate one, like that of the number of those from the town who entered active service; the number in both cases being indefinite for want of sufficient records.

KILLED AT LEXINGTON AND CONCORD BATTLE. 2. Asahel Porter and Daniel Thompson.

DIED FROM THE EFFECT OF WOUNDS AND EXPOSURE IN BUNKER HILL BATTLE. 2. Samuel Russell and George Reed, Jr.

DIED IN THE SERVICE AT TICONDEROGA, AUTUMN OF 1776. 3. William Locke, William Stratton and Abner Alexander.

DIED IN THE ARMY AT NEW YORK, 1776. 2. Jonas Wymann and Lieut. Samuel Thompson.

DIED OF SMALL-POX IN THE ARMY AT THE JERSEYS. 1. Solomon Wood, on March 16, 1777.

DIED IN SERVICE AFTER 1777, BEFORE THE END OF THEIR ENGAGEMENT. 3. Jabez Brooks, Ebenezer Marion, and Charles Mason.

Making a total of 13 deaths, so far as discovered. Killed in battle, 2. Died of wounds, 1. Of disease, or exposure to hardships, 10.

BUNKER HILL BATTLE.—Colonel Loammi Baldwin wrote a letter on the subject of this battle, but he was an eye-witness only, and not an actual participant. Samuel Thompson and Mr. Marrett incorporate accounts of it in their memoranda, but neither were present or even eye-witnesses apparently. Mr. Marrett says of himself that he was at home. The day was Saturday, June 17, 1775, and fair, and very warm and drying. While he was writing, he says, "the adjacent country had gone down," meaning to the scene of action. On Sunday, June 18, 1775, the day following, he had, at service, a "very thin meeting; the men gone down to the army on the alarm yesterday." On June 22, following, the weather being fair and drying, in the morning the good pastor of the Second Parish was "at home;" but in the afternoon attended the funeral of Samuel Russell, aged twenty-one, belonging in the First, or Old Parish, who had died, having been "mortally wounded in the battle at Charlestown." Again, on the afternoon of June 26, 1775, a fair day, he attended the funeral of George Reed, Jr. (probably in the Second Parish), "who died of a fever, which was occasioned by a surfeit, or heat, he got in Charlestown Fight, on the 17th instant." Esquire Thompson records concerning Samuel Russell, this: June 17, 1775, Samuel Russell, son of Jesse Russell, was that day "wounded in the shoulder at the fight in Charlestown," and he was brought home and there died "with his wounds and a fever." Aside from tradition, this is all that we can glean of the participation of Woburn men in this famous battle.

THE SIEGE OF BOSTON.—Samuel Thompson continued his account of events, being items of news, to September 2, 1775. Mr. Marrett's account is, however, more interesting, because he gives some items of his own personal experience. The ministers of the neighboring parishes often rode to Cambridge and Roxbury during the siege and viewed the intrenchments, surveyed the situation of the forces, and prayed publicly with the regiments, and they appeared also at the trainings of their own local military companies and showed their arms or weapons for inspection with the rest. On Sunday, March 3, 1776, the people were in great anxiety about some important events soon to take place between the armies, and during that night, from eight in the evening to morning, cannon-firing was heard, and on March 4 continued. Between twelve and one on that day it continued so vigorously that a general battle was imagined, or a smart skirmish, as Mr. Marrett judged, from the report of small arms and cannons combined. So strong was this feeling that Mr. Marrett's people collected rags, etc., for the use of the army. On the night of March 4 "the mortars and cannon played very fast most all night." After the evacuation of Boston by the British, Mr. Marrett rode to Charlestown ferry, March 20, and viewed Bunker Hill, the works of the enemy and the ruins of the town. He returned home by the way of Cambridge. On April 23, 1776, he rode to Boston and returned home; "first time," he said, "I have been to Boston since the enemy evacuated it;" and later, on June 3, 1776, he "went to the Castle with Woburn militia to intrench." He lodged that night at Roxbury, and on the morning of June 4 sailed from Boston to the Castle, and "intrenched all day," and at the close of the day "returned home with the militia."

One or two other incidents from Mr. Marrett's memoranda only remain to be quoted in connection with the events of this period.

1. "Sunday, July 14, 1776: Five o'clock P.M. Preached at lecture at home to a party of soldiers going on the Canada expedition."

2. "July 25, 1776. Woburn company of soldiers for the Canada expedition marched for Crown Point. Prayed with them at Deacon Blanchard's."

Two hundred or more men from Woburn were in active service in the Revolution during the first two years of the war, and nearly as many were afterward in service from the town in the regular Continental line. Quotas of her men served at Ticonderoga and New York, 1776; at the northward against Burgoyne in 1777, and in guarding his imprisoned army at Cambridge, 1777-78; at Rhode Island, 1777-80; on guard-duty at Bunker Hill, 1778, and elsewhere near Boston, in duties frequent and various, in time of the war. The record of much of this service is now probably lost. Much of it also, as is usual in wars, was not deemed worthy of distinguished mention, though useful in its way. There are very many receipts and

military papers preserved in the *Wyman Collection of MSS.* in the Woburn Public Library, relating to this subject, and Woburn had its representatives in the navy as well as in the army of the Revolution. The most remarkable instance of naval service was that of Ichabod Richardson, of Woburn, who, from a long absence, proved to be a veritable "Enoch Arden." The tale is told in an original document presented in the *Woburn Journal* for June 12, 1885. Having enlisted himself on board a provincial privateer during the Revolution, leaving behind his young wife and child, the voyage undertaken proved to be an unfortunate one, and he was captured by the British and carried a prisoner to England, and thence to the East Indies. An absence of six or seven years followed, with no tidings of his being alive. The wife, being courted by a widower and relative of her first husband, married the latter suitor. After hostilities ceased the missing husband returned to find his wife had married another. The document already referred to as containing an account of the affair, is a stipulation, and dated February 15, 1783. The parties are the husbands—Ichabod Richardson and Josiah Richardson. The wife was named Sarah and the child was a son. To settle the difficulty, the wife chose for her mate her former husband, because of their child, she having had no other child by either marriage. The unhappy affair for the participants, by the terms of the stipulation, was amicably adjusted as to matters of property, the second husband also surrendering the wife to the first. The name of Ichabod Richardson is found in a journal of American sailors imprisoned at Forton, near Portsmouth, England, where he was committed June 26, 1777. There are other details concerning him, but he appears to have effected his escape from that prison. One James Richardson, of Woburn, was a prisoner in the Mill Prison, England, in 1777, but was later exchanged.

NOTE.—On the subject of the earlier events of the Revolution in their connection with Woburn, articles were published by W. R. Cutter and others, in the *Woburn Journal*, notably in Feb. and May, 1875, in view of the centennial observances of that year. One or two matters of general interest might also be mentioned in connection with the Revolution. Action on the formation of a volunteer military company, or society, in Woburn, on account of the warlike outlook, occurred as early as Jan. 4, 1775, and at a meeting at the house of James Fowle, Esq., on that date, several votes were passed relating to its organization as a company of minute-men, or picked men. They voted on that occasion "to show arms once a month, according to law," and something was done about the town-house, so-called, as a house "to exercise in." Cf. *Woburn Journal*, for March 31, 1882. There is framed and preserved in the antique department of the Woburn Public Library a document dated April 6, 1775, about two weeks before Lexington Battle, from the field officers of the local regiment urging the Woburn minute-men to action. Some old papers belonging to the Johnson family in Woburn Second Parish have an especial interest in relation to affairs that occurred during the Revolution in that precinct. Among them is a list of the preachers and texts in this parish from the ordination of Rev. John Marrett, Dec. 21, 1774, to July 16, 1775, and minutes of parish meetings, receipts showing that the people of this parish donated the sum of £2, 11s. 2d. to the sufferers in the war of South Carolina and Georgia in 1782, and the sum of £1, 15s. 10d. in 1783, for the purpose of building a meeting-house in Charlestown, burned by the British, June 17, 1775. There are "war" papers, and a receipt dated Nov. 24, 1775, signed by Timothy Jones, relating to the keeping of a portion of the valuables of Harvard College

during the first year of the war, which were deposited in the care of Deacon Joseph Johnson in the precinct. The receipt enumerates the following articles:—"Of the college library and apparatus, two hogshheads of books, one large box containing glass, two boxes containing a pair of globes, one large pack of carpets." One of the papers in this collection relates to Lieut. Joseph Johnson, an officer who was seventy-five years old when recommended in 1776. It was dated from hospital at "Pappasquash," A. D., 1778, and was signed by "Jona. Arnold, Director," and gave Lieut. Johnson, of Col. McIntosh's regiment, "unfit for present duty," leave of absence on a furlough of six days. *Pappasquash* is the neck of land in front, or to the west, of the harbor of Bristol, in Rhode Island, and about fifteen miles from Newport. Here a hospital had been erected. Cf. Green's *Deux Ponts Campaigns in America, 1780-81*, p. 90, note; *N. E. Hist. Gen. Reg.*, XXXVI. 79-80. The original journal of the Forton prisoners in England is in the present writer's possession, and was contributed by him, with the addition of notes, to the *New England Historical and Genealogical Register*, and published in the volumes of that periodical for the years 1876, '77, '78 and '79 a hundred years after it was written. There are many particulars regarding Ichabod Richardson in the article in the *Woburn Journal* for June 12, 1885.

The following is a list of the principal military characters of the period mentioned. It is a partial list, at best, made up from such sources as could be easily found in Woburn.

MILITARY OFFICERS DURING THE REVOLUTION AND FROM THAT PERIOD TO 1830.

Major-General.

John Walker, ensign, 1791; capt., 1792; lieut.-col., 1793-1796; brig.-gen., 1796-1797; maj.-gen., 1798. Died 1814. Brig.-gen., 1st brig., 3d div., Middlesex, 1797, '98 and '99, per *Mass. Register*.

Brigadier-General.

Abijah Thompson, capt., 1827-1828; major, 1829; lieut.-col., 1830; colonel, 1832-1835, all of the artillery; brig.-gen., 1836. Died, 1868.

Colonels.

Loammi Baldwin, major, 1775; lieut.-col., 1775; col., 1775-1777, all in the Revolutionary Army. See an extended notice elsewhere.

Robert Greaton, 1777, Cont. Army. Non-resident. One of Woburn's quota in the Revolutionary War; Col. of 3d Massachusetts regt., C. A. (?).

Bill Russell, lieut., 1801-1803; capt., 1804; major, 1805-1806; lieut.-col., 1807-1828, all of the cavalry; a Revolutionary pensioner, residing at Billerica, 1840, aged 77.

Abijah Wheeler, col., 1807-1809. Died 1812. "Col." on gravestone in Woburn second burying-ground. Removed to Woburn from Temple, N. H.

Benjamin F. Baldwin, capt., 1800-1805; major, 1807-1811; lieut.-col., 1811-1816. Died 1821. Lieut.-col. commandant of 2d regt., 1st brigade, 3d div., Middlesex County.

John Wade, capt., 1810-1811; commissioned major, Sept. 17, 1811; lieut.-col., May 30, 1815; col., July 1, 1816. Lieut.-col. commandant of the 2d regt., 1st brig., 3d div., Midd. Co. till such officers were changed to colonels, when he received a colonel's commission. He was in office, 1820. Died 1858.

Samuel Tidd, lieut., discharged from the East company, 1803; capt., discharged from same co., 1815; major, 1815-1816; lieut.-col., 1818-1821; same regiment as named in the two preceding notices. Died 1826.

William Winn, major, 1816-1821; lieut.-col., 1822; col., 1823-1830, of the same regiment as the above three officers. Died 1856. Resided in Burlington and in Woburn.

Leonard Thompson, capt., July 15, 1815; major, Aug. 24, 1821; lieut.-col., Sept. 24, 1822; discharged as lieut.-col., May 7, 1823. All offices in 2d regt. infantry, 1st brig., 3d div., same regiment as the preceding officers in this list. Died 1880, aged 92. Commissions and other military papers extant, kindly loaned for examination by his son, Leonard Thompson, Esq.

Samuel B. White, lieut.-col., 1839; Charles Carter, col., 1842-1843; William T. Choate, major, 1842, lieut.-col., 1843; and Charles Choate, lieut.-col., 1846, were some of the field officers of a later period.

Thomas Dawes, col., of Boston, 1784, and Samuel Hopkins, lieut.-col. of Wilmington, 1812, are named in Woburn tax-lists.

Majors.

John Hastings attained the rank of a major in the Revolutionary army, and resided in Woburn, 1784-1796. He was a graduate of Har-

vard, 1772, son of Jonathan Hastings, of Cambridge, the college steward.

Samuel Tay, lieut., 1775; capt., 1776-1784; major, 1784-1797. Died 1804. He commanded a company of about fifty men, who marched June 21, 1776, to Ticonderoga, from Woburn, where the company remained five months in service.—Sewall's *Woburn*, 370-71.

Robert Douglass, Jr., capt., 1787; major, 1788-1793, of the 2d regt., 1st brig., 3d div., etc. Removed to Portland, Me., 1794. Robert Douglass, a young man, accompanied Sylvanus Wood to Lexington, early in the morning of April 19, 1775, and on the invitation of the captain of the Lexington company, paraded with the company on the green on that morning and received the first fire of the British troops. The Douglasses, father and son, lived on the Sylvanus Wood farm in Woburn, corner Cambridge and Locust streets, Wood having apparently bought it of them before 1800.

John Radford, ensign, 1792; capt., 1793-1796; major, 1797-1799; of the 2d regt. above named. Resided in Burlington.

Jeremiah Clapp, lieut., 1791-1796; brigade major, 1797-1813; of 1st brig., 3d div., Middlesex County. Died 1817.

Abijah Thompson, lieut., 1796; capt., 1796-1799; major, 1800-1816; of 2d regt. above named. Died 1820. "Major" on gravestone.

Benjamin Wynan, lieut., 1795-1797; second lieut. of company of cavalry, 1st brig., 3d div., Middlesex, July 14, 1794; captain of a company in the squadron of cavalry, same brigade, July 6, 1797; major of a battalion of cavalry, same brigade, January 13, 1800. Three commissions and his discharge from the service have been preserved. His discharge as major is dated March 24, 1802. He was styled major in the town records as late as 1816. Died 1836.

Francis Johnson, capt. of the East company, according to its records, from 1798-1805, when he was chosen major of the regiment—the well-known 2d regt., 1st brig., 3d div., Middlesex County. The latest mention of him by his military title in the town records is 1816. Died 1846.

Wynan Richardson, adjutant, 1820; brigade major, 1823-1836. Died 1841.

Moses F. Winn, aide-de-camp, 1836; adjt., 1843; major, 1845. Died 1875.

Staff (other than Adjutants).

William Tidd, adjt., 1823-1830; brigade quarter-master, 1836. Died 1837.

Benjamin Coolidge, assistant commissary of clothing at Ticonderoga during the Revolution, became late in life a resident of Woburn. An abstract of a deposition of his, before John Roorback, of Albany, N. Y., dated July 18, 1777, is given in a note. He had been a merchant of Boston, but retired from business, and died in Woburn in 1820.

Rufus Thompson, quarter-master of the 2d regt., 1st brig., 3d div., Middlesex, was discharged Sept. 11, 1820.

Captains.

Samuel Belknap, lieut. 1775; capt., 1776, and styled capt. in the Woburn records till 1785, about which time he removed to Newburgh, N. Y. He was a member of Brooks's regiment in the Continental army prior to 1777, and he commanded one of the three stated military foot companies of Woburn at that period. The town, by vote, on March 22, 1779, granted him fifteen pounds out of the treasury, as a premium for his extraordinary trouble in procuring men for the war in the few years past. An attested copy of this vote has been preserved, also the names of the members of his local company. A grandson, William Goldsmith Belknap, was a brigadier-general in the United States regular army. Cf. town order dated March 20, 1777; Sewall's *Woburn*, 566, 568; Belknap genealogy in *Winchester Record*, ii. 276-78.

Benjamin Edgell, a soldier from Lexington, in the French war, 1755 and 1757, capt., 1776, in service from Woburn prior to 1777, and again as captain in the Rhode Island campaign, 1778. Styled captain in the Woburn records till 1816, when the fashion of mentioning officers by title in the records apparently ceased. Died 1819. Some interesting details regarding his early career have been preserved.

Thomas Locke, capt., 1775 (?). Died 1792. He resided in Woburn precinct in a part lately annexed to Lexington. There is doubt of his being a captain at a period so early as the Revolution, but he appears to have been a member of Wood's co., Baldwin's regt., C. A., 1775-76.

Joshua Reed, lieut., 1775; capt., 1776; in Revolutionary army before 1777; capt. in Woburn records, 1800. Died 1805. A wooden monument to his memory was standing in the second burying ground as late as 1847.

Jonas Richardson, ensign in the provincial period, 1758-1759; lieut., 1760-1771; capt., 1775-1776; in the Revolutionary service, 1775. "Capt. Jonas Richardson died January 10, 1776."—*Thompson's Diary*. Cf. *Richardson Memorial*, 263.

Joshua Walker, lieutenant, in the French war, 1758, also 1759-1774; captain (capt.-lieut., ?) 1762 and 1775; captain, 1775-1781, in command of one of the three stated military companies of Woburn during the Revolutionary period. In active service in the Revolution. Styled captain in the Woburn records till 1796. Died 1798.

John Wood, ensign in the provincial period, 1774; captain, in active service in the Revolution, 1775-76. Styled captain in the Woburn records till 1798. Died in Burlington, 1809. When very young he was determined to enlist in the army during the French war and succeeded in doing so, and an interesting anecdote of him connected with his service in that war is preserved in Sewall's *Woburn*, 348-50. He commanded a company composed principally of Woburn men in Baldwin's regt., C. A., 1775-76, and appears to be also in the army three years after 1777. His company was stationed with Baldwin's regt. at Medford, 1775. Cf. Sewall, 386,—and a roll of his company is published in the *Woburn Journal* for March 11, 1854. His house is shown on a curious road map of date about 1797.

Jesse Wyman, who had been a soldier in the French war with Samuel Thompson, the diarist,—cf. Sewall, 554, 556,—and whose name was also found in a list of twelve men impressed for the military service in 1777—*Woburn Journal*, Aug. 19, 1887—was a captain, 1776-1781, per tax-lists. Died 1782. During the Revolution he commanded one of the three stated military companies of foot soldiers in Woburn. He was in active service before 1777, and two months at Rhode Island in 1777, and three months on guard duty on Banker Hill in 1778.

The names of Charles Anderson, 1779-1782, Samuel Doggett, 1775, and Nathaniel Greenwood, 1777-1778, are mentioned with the title of captain in the town records, but these persons were probably only temporary residents on account of the war.

Abraham Andrews, of the Cont. Army, Whitney's regt., for Woburn, was a lieutenant, 1777-1778; captain, 1779-1780.

Nathaniel Brooks, in Revolutionary service before 1777, was lieutenant, 1776-1781; captain, 1781-1783. Died 1783.

Reuben Kimball, in the Revolutionary service for a long period, was a lieutenant, 1776-1782; captain, 1782-1798, in Woburn records. Died in Burlington, 1814.

Thomas Dean, Jr., a sergeant in the Revolutionary army, was styled a captain in the records from 1783-1787, and died in the West Indies in 1790. Lieutenant, 1781-1783.

Josiah Richardson, lieutenant, 1782-1784; captain, 1784-1793, in town records. Died 1795. Resigned his office of captain, 1787. A number of interesting papers regarding his period of service are extant.

Benjamin Eaton, captain, 1786-1790. Died 1796.

Joseph Wyman, lieutenant, 1787; captain, 1787-1791.

Joseph Brown, lieutenant, 1785-1787; captain, 1787-1807. Died 1808. "Capt." on gravestone. He was elected 1st lieutenant, June, 1784.

James Reed, lieutenant, 1777 and 1781-1787, in tax-lists; captain, 1788-1798, in Woburn records. Served in Revolution with Capt. Ford, at Cambridge, 1777-78. Resided in Burlington.—*Hist. Reed Family*, 470.

Joseph Bartlett, captain, 1789-1796. Noticed under lawyers.

William Green, captain, 1790-1791.

John Johnson, ensign, 1787; lieutenant, 1787-1792; captain, 1792. Died 1792. Detailed as an officer of a detachment to rendezvous at Marlborough, Feb. 9, 1787, during Shays's Rebellion.

Nathaniel Brooks, ensign, 1787-1792; captain, 1793-1797, and 1804. Died 1829.

Jeduthan Richardson, Jr., captain of the East company, 1793 (of Medford, 1794); discharged May 24, 1794—per orderly book of that company.

Nathan Richardson, 1791; Jonathan Thompson, 1796—discharged 1797 from East company; Jesse Tay, 1796—died at Bedford, N. H., 1797; John Wood, Jr., 1797-98; Joseph Bond, 1796-1801; Nathan Harrington, 1800-1811; Caleb Richardson, 1806-1809; William Fox, ensign, 1801; lieutenant, 1805; captain, 1807-1816; Nathan Simonds, 1811; John Eames, 1812; John Edgell, 1812-25; Isaac Richardson, 1812-17 (lieutenant, 1809)—discharged from East company, 1813; John Cutler, 1812-16; John Eames, Jr., 1814-18 (lieutenant, 1813)—discharged from East company, 1818; George W. Reed, 1814-15 (of the cavalry); Josiah Richardson, sergt., warrant dated Aug. 25, 1801; ensign, commission dated April 1, 1804; lieutenant, Nov. 10, 1806; captain, March 25, 1809, all of a company in the 2d regt., 1st brig., 3d div.; certificate of resignation as captain dated March 15, 1809; captain in town records, 1811-18; Joseph Gardner, 1814-16; John Hastings, 1814; Joseph Eaton, lieutenant, 1797; captain, 1797-98,—discharged from East company, 1798; captain, in town records, 1815-16; John Todd, sergt., warrant dated Sept. 27, 1809; ensign, commission dated Dec. 22, 1813; captain, Feb. 13, 1818 (ensign in 1814, and lieutenant, 1818) all in a company in the 2d regt., 1st brig., 3d div.—discharged

from East company, 1821—all are captains of this period named in the town records. The following also were captains of the East military company, which suffered extinction about 1830, from want of actual interest in the militia:—Stephen Nichols, discharged in 1822; Benjamin Wood (2d), discharged 1827; Isaac Hofmaster discharged do.; William Reed, elected 1827 or '28, being the last officer named in the company's extant records. The company had existed, it is supposed, without interruption from the seventeenth to the nineteenth century.

The following were captains of the West military company, per tradition:—William Fox, Samuel Abbott, Dana Fay, Henry Flagg, 1828, and Larkin Livingstone, 1829, the last captain of the company, its fate being the same as that of the East company, both having existed for an indefinite period.

The orderly book of the East company from 1794 to 1828 has been preserved. Joseph W. Beers, clerk, received the book April 28, 1794, when Jeduthan Richardson, Jr., commanded the company. Richardson was discharged May 24, 1794, and Beers was discharged from doing duty as clerk and soldier in 1805. It preserves the fact that two, at least, of its captains, Francis Johnson and John Wade, were chosen majors, 1805 and 1811, and that on Feb. 12, 1800, orders were received to turn out in uniform, without arms, to show respect to the death of General Washington. On Sept. 20, 1811, the company raised \$19 by subscription, to purchase a bass drum, and in response to orders turned out on Aug. 30, 1824, and marched to Boston to be reviewed by General Lafayette.

The West company was the subject of a sketch in the *Woburn Budget* for Nov. 4, 1859.

Lieutenants.

Zachariah Brooks, lieutenant, 1776, in service before 1777; lieutenant, in town record till 1792. Died 1792. When a minor he was a soldier in an expedition against Canada in 1753, being one of the soldiers "who tarried all winter," per receipt of Isaac Snow, dated March 29, 1762.

Isaac Burton, lieutenant, 1776-81. Died 1784. In service before 1777—expedition to Ticonderoga, five months, 1776. A resident of the Precinct or Burlington.

Nathan Dix, lieutenant, 1775-76, of the Cont. Army, Wood's co., Baldwin's regt., 1775. Eight men, three months, 1778, under Lieut. Dix, guarded prisoners at or near Cambridge. His wife died 1780, in Woburn, aged 31.

Joseph Johnson, lieutenant in the provincial period, 1751-75; commission extant of first lieutenant of 8th co., 2d regt., Middlesex County (the Precinct or Burlington co.), dated May 6, 1776. In service at Cambridge, two months, guarding stores, 1777. Died 1798, aged 97. Called "Lieut." in the tax-lists till 1792, and "lieut." in record of decease. His commission of 1776 called him "Joseph Johnson, gentleman," his company being the one of which Joshua Walker was the captain, and Jonathan Fox, Esq., colonel of the regiment.

Joseph Perry, lieutenant, 1776-81, in the records, with Lieut. Dix, near Cambridge lines in 1778, and with Capt. Green, at Rhode Island, three months, in 1780.

Jonathan Porter, lieutenant, 1777, and 1782-84, per tax-lists, with Cont. Army three years, 1777-79. He was probably dead soon after 1784, for the widow of Jonathan Porter died 1791, in Woburn, aged 30.

Jeduthan Richardson, lieutenant, 1776-94, per tax-lists. Deacon of the 1st church from 1796-1812. Died 1815. Gravestone in Woburn second burying-ground. In the Revolution he had apparently three terms or "turns" of active service, the first before 1777, the second with Capt. Ford at Cambridge, 1777-78, and the third as a sifer with Capt. Green's co. in Rhode Island, for three months, in 1780.

John Richardson, lieutenant, 1776, in active service before 1777.

Stephen Richardson, lieutenant, 1776-83. Died 1783. "Lieut." on gravestone in first burying-ground; in active service before 1777.

William Tay, Jr., lieutenant, 1775-93. Died 1795. He was the author of a petition published in Frothingham's *Siege of Boston*, 368-69, in which he recites his experiences on the day of Lexington Battle, April 19, 1775, and tells how he made a British soldier a prisoner, and how he lost his own or prisoner's gun by another person's taking it.

Samuel Thompson, Jr., lieutenant, 1775-76; according to his father's written statement, lieutenant of Capt. Pettigill's co. or the 8th co. of Baldwin's regt., 1775. Died 1776. See *Thompson Memorial*, 47-48. An acrostic on his death by the father has been several times published. He died in the service at New York, Aug. 12, 1776, aged 22 years, 4 months and 5 days, of a putrid fever, so-called. An orderly book in his handwriting and a book containing the inventory of his estate and sundry accounts during 1775 and 1776 are preserved. The inventory was taken Sept. 20, 1776. The orderly book contains general orders and other orders from Aug. 1, 1775, to Aug. 25, 1775. The father, Samuel Thompson, inscribed upon

it the following words: "Samuel Thompson, Esq., lieutenant of the eighth company in Col. Baldwin's regiment."

Jonathan Tidd, ensign in the provincial period, 1762-73; lieutenant, 1774-75, was a lieutenant from 1770-81, per tax-lists. He was in the Cont. Army for eight months, 1775, or in Wood's co., Baldwin's regt., Cont. Army, 1775. Died 1785.

Joseph Winn, lieutenant, 1776-98, in Woburn tax-lists. Resided in Burlington. He was in active service before 1777, and also with Capt. Ford at Cambridge, 1777-78.

Sylvanus Wood, ensign, 1776; lieutenant, 1777-93, in the tax-lists. Died 1849. He was a member of his brother's company in Baldwin's regt., Cont. Army, 1775; lieutenant, 1776. He was the author of a deposition on the Lexington Battle which has been several times published. He was present with Robert Douglass, another Woburn man, at Lexington, when the British first fired on the Americans on the memorable morning of April 19, 1775, and claimed to have taken the first British soldier made prisoner in the Revolution.

James Wyman, lieutenant, 1777. In service before 1777.

Joshua Tay (died 1801), 1774-92; Seth Johnson (died 1782), ensign, 1776-78; lieutenant, 1779-81, in active service before 1777; Nathaniel Trask, 1780-84; Joseph Lawrence (died 1836), 1782-1801; Abel Wyman, 1784-98; Jacob Richardson (died 1819), ensign, 3d co., 2d regt., 3d div., commission dated Feb. 17, 1787; lieutenant, 2d regt., 1st brig., 3d div., M. d., commissioned Oct. 8, 1787—lieutenant in the town records till 1796 and also to 1807; Jonathan Nichols, 1788-93; Josiah Richardson, 1789; Samuel Dutton, 1789-1791 (ensign, 1788); Joseph Johnson, Jr., 1790; Jonathan Tidd, 1792-1816; Jonathan Eaton, 1796; Joseph McIntire, 1796 (ensign, 1793); Cyrus Baldwin, 1797; Bartholomew Richardson, 1801-1815 (ensign, 1799)—Bartholomew Richardson, probably another, was the lieutenant discharged from the East company in 1799; Stephen Richardson, 1805-14; probably held the office earlier—a lieutenant. Stephen Richardson was discharged from the East company in 1805; Willard Jones, 1808-16 (died 1824—"lieutenant" on gravestone); Moses Winn (died 1838), 1814-16; William Tay, 1801, and 1814-16 (died 1827—"lieutenant" on gravestone); and Archelaus Tay, 1811-13, are some of the lieutenants belonging to this period.

During the years from 1799 to 1820, meagre mention is made in the records of military titles, and doubtless if facts could be obtained the list could be enlarged.

The list of ensigns is a still shorter one.

Ensigns.

Timothy Brooks, Jr., ensign in the provincial period, 1768-72, and ensign, 1776-78. In the Revolutionary service before 1777.

Reuben Richardson, ensign, 1776-79, in service before 1777. Samuel Tidd, 1776-1779; Joshua Reed, 1777-86; Joseph Fowle, 1779; Ichabod Parker, 1787-99; Jesse Dean, 1788-96; Josiah Tay, 1814-16; and Joseph Parker, 1815-16, were other ensigns of this period.

Adjutants.

William Fox was adjutant at Cambridge in 1777, in active military service, per his order on the town, endorsed with his autograph, which is preserved.

Abijah Thompson (died 1811), was adjutant of militia.—*Cf. Thompson Memorial*, 31, 1.

NOTES.—Maj.-Gen. John Walker was born in Woburn, Feb. 7, 1762, son of Capt. Joshua Walker. He was appointed by the elder President Adams a major-general to command an army at Oxford, Mass., in 1798, there seeming then to be danger of a war with France. *Cf. Sewall's Woburn*, 171-72; Ammidown's *Hist. Coll.* (Oxford, Mass., etc.), 1-204. He was an elector for President of the United States in 1813. His son, James Walker, D.D., of Charlestown, was the president of Harvard University. On a large marble stone in the Precinct or Burlington burying-ground is the following inscription:

[Masonic emblems.]

In memory of Gen. John Walker, who died VIII June, MDCCCLIV, in the LIII year of his age. In military life he gained honor and reputation. As a civil magistrate he was a friend to his country and faithful to his trust. In his domestic and social relations those who knew him best will speak his praise. Uniformly striving to give practical efficacy to his relations and acts, he became alike distinguished for his integrity and enterprise. He was esteemed and valued by all. All must feel his loss."

¹A number of facts gathered concerning these officers are deposited in the archives of the RUFORD HISTORICAL ASSOCIATION.

An extended notice of Col. Loammi Baldwin by the Rev. Leander Thompson appears in another place. Another notice in print is that to be found in Sewall's *Woburn*, 38-39. For some particulars of his military history see Frothingham's *Seign of Boston and Mass. Hist. Soc. Proceedings*, vol. xiv. A volume of manuscript papers relating to his service is deposited by the Baldwin family at the State House in Boston. His neighbor, Samuel Thompson, Esq., in his memoranda records the item that "October, 1807, Col. Loammi Baldwin died 20th," and was "interred" the 23d following.²

The spacious mansion of Col. Baldwin is still standing in Woburn and is, though somewhat changed, the oldest dwelling in Woburn. His estate was scheduled in part only on the list of 1798, and contained 212 acres, valued at \$9000, in 1801.

There is reference to a letter of his on the subject of Bunker Hill Battle in the *Narrative and Critical History of America*, vi, 187. This refers to Frothingham's *Battlefield*, p. 43. For an estimate of his scientific attainments, see *Memorial History of Boston*, iv, 511. A letter of his to the provincial congress on the subject of surveys and instruments, dated Cambridge, June 3, 1775, is printed in Force's *American Archives*, 4th ser., vol. 2, p. 902. The purpose being to take surveys of the ground between the opposing armies, and some mathematical instruments being necessary, request was made for such instruments from the apparatus of Harvard College, to be returned as soon as the surveys were finished. The use of such instruments from the college as he needed was readily granted (*Ibid.* p. 1392). There are also letters of Loammi Baldwin to General Washington, published in Force's *Amer. Archives*, 4th ser., vol. 2, pp. 1748, 1754; and vol. 3, pp. 5, 98. The first is dated at Chelsea, July 28, the second, July 29, 1775; the third at Chelsea, Aug. 1, and the fourth, at same, Aug. 13, 1775. The third letter is addressed to Col. Joseph Reed, Gen. Washington's secretary. There is a letter to Col. Baldwin at Chelsea, dated Dec. 13, 1775, in Force's *Archives*, 4th ser., vol. 4, p. 255, and a reference, *ibid.* vol. 5, p. 1200. The letters all have reference to military matters, and one or two of them are quite interesting. In one he requests the commander-in-chief to furnish him with more writing materials, and in another he thanks Gen. Washington for a compliment he had paid him on the able manner in which he had performed his duties. There are also references to Baldwin in *Amer. Archives*, 5th ser., vol. 3.

Col. Loammi Baldwin was the officer of highest rank furnished by Woburn to the army of the Revolution. The following is an account of the number of officers furnished by Woburn to that army, including those from other places who formed a part of her quota: Colonels, 2; captains, 9; lieutenants, 19; ensigns, 3; adjutants, 1. There were besides these an unknown number of non-commissioned officers and of persons having a part in the field-music. In the latter class were at least 1 life-major (James Osborn, 1784, a non-resident); 2 flutes (Jonathan Thompson, 1775, and Jonathan Richardson, 1789), and 1 drummer (Joshua Reed). Of the sergeants the names of Bennett, Biscoe, Dean, Jones, and Luke Richardson and Silas Richardson are given in Sewall's list, and so are two corporals, Caleb Simonds and James Walker, but, of course, there must have been others whose record is now lost. Silas Richardson, Abraham Skinner and James Reed, sergeants, are named in the town records in 1778. The autograph of life-major James Osborn has been preserved. He was a handsome penman, and, from the papers he wrote, evidently a person of intelligence and of good education. None of the papers concerning him, preserved in the Woburn Public Library, give any clue to the place of his residence. He was enlisted as one of

²Among the many references to Col. Loammi Baldwin in this diary of his neighbor are the following containing items of importance in his family history: May 13, 1776, a daughter died. Sept. 26, 1786, his first wife died in a fit, and on Oct. 3, following, she was buried. July 23, 1787, he raised his barn. Nov. 5, 1799, Cyrus Baldwin, Esq., apparently his brother, was drowned at Dunstable; on the 7th his corpse was brought to Woburn; and on the 10th was buried. May 13, 1791, his mother, Mrs. Ruth Baldwin, died, and on the 14th was buried; June 28th following, his father, Mr. James Baldwin, died, and on the 30th was buried;—"about 46 days between." The father was aged 81 years, and the mother, 78 years. In February, 1799, his second wife was subjected to a surgical operation in which an "incision" was made, but unsuccessfully, for the preservation of her life. On Aug. 8, 1799, she died, and was buried on the Sabbath day, the 11th. There are allusions to his being a representative in 1800, 1803, and Federal representative, town-meeting, Aug. 25, 1800. Earlier than all these dates are references in Matthew Johnson's account-book of the service of writs in his behalf in 1771 and 1772.

Woburn's quota, and served in the 3d Massachusetts regt., or Col. Greaton's regt., in the Cont. Army, 6 mos and 11 days, as a file-major. The town of Woburn at the close of his service paid his traveling expenses homeward.

The abstract mentioned of the deposition of Benjamin Coolidge, before John Roorback, dated July 18, 1777, is as follows:

Coolidge having charge of the continental clothing store at Ticonderoga received, about sunset, on Saturday evening, July 5, 1777, a written order to pack, as the store was wanted as barracks for troops which were hourly expected to arrive. At about one o'clock on Sunday morning he was informed, while in bed, that the retreat from Ticonderoga and Mount Independence on the part of the American army had already commenced, and the general in command informed him that it was then too late to remove the clothing. Putting up his papers, clothes and cash, he left with the rest and proceeded with the army to Skensborough by water in the row-galley called the 'Trumbull,' but it being the sternmost vessel of the fleet, it was overtaken by the armed vessels of the enemy before it could reach the landing, and was fired upon. This caused its abandonment by all the crew and passengers, one man and his wife excepted. All who quit the vessel left their baggage behind, and by thus doing Mr. Coolidge lost everything in the way of baggage and money he had, excepting about twenty dollars he carried in his pocket.¹

WOBURN'S MILITARY ACTION IN SHAYS' REBELLION.—A variety of papers in connection with the name of Josiah Richardson, captain of the East company of Woburn militia, 1784-1787; deacon, per gravestone, 1795, æt. 48;² estimable officer of the First Church [*R. Mem.* pp. 259-60], are preserved relating to this time. All have now found a place in the Woburn Public Library (*Wyman MSS. Coll.*). The warrant for calling a meeting of his company for his election as captain, June, 1784, is one of them, and at the same meeting Mr. Joseph Brown was elected their first lieutenant. The distinction between the "train-band" and "alarm list" is kept up (1784-1785) in these documents. Joseph Bryant, of Stoneham, was then the colonel of the regiment—the 2d regt., 1st brig., Co. Middlesex—and many of these papers were from him. In 1786 the Shays' Rebellion was in progress, and the troops were instructed to hold themselves in readiness for immediate service. On Sept. 10, 1786, they were ordered to be called out and to be marched to Woburn meeting-house in the Old Parish, at 8 A.M., on the morrow, to await further orders,—being also fully equipped with arms and ammunition, and having three days' provisions. But at 12 o'clock at night these orders were countermanded. On Oct. 28, following, they received their "orders to Cambridge," and as this document contains many interesting facts, it is here given in full:

"Sir: The General Court having called upon his Excellency the Governor, to take the necessary measures to maintain the honor of this commonwealth, in obedience to the orders, I this instant Received from the Major General of this Division, you are hereby ordered immediately to call upon your Company and put them in readiness to march, and you are hereby ordered to assemble and march your company to Mr. Noah Wyman's, innholder in Woburn, sign of 'Black Horse,' at the south part of said Town, so as to be at his house on Monday next, at Eight o'clock in the morning, with arms, ammunition and provisions,

according to law, and each man will bring a blanket; and there remain until further orders.

"I am, Sir, with respect, your Huml. Servt.,

"JOSEPH BRYANT, Col.

"Stoneham, Oct. 28, 1786.

"To Capt. Josiah Richardson, Woburn."

On Oct. 29th these orders were "suspended" till the Tuesday following, when they were to "positively march."

The following paper, addressed to Capt. Josiah Richardson, contains "a list of the soldiers that marched, with *yourself*, to Cambridge, the 31st of October, 1786." This was a demonstration on the part of the militia of Middlesex County, under the instructions of the Government, to overawe the insurgents. The names were as follows:

"Jacob Eames, Saml. Richardson, Zadoc Richardson, Jun., Nat. Wade, Thom. Richardson, Rich. Richardson, Amos Brooks, Gid. Richardson, Ben. Richardson, Job Miller, Joseph Skinner, Paul. Richardson, Jesse Wyman, Abel Richardson, Jesse Johnson, Silas Wyman, Steph. Nehemiah Richardson, Lt. Zac. Brooks, Abijah Richardson, Junias Richardson, Bartholomew Richardson (3d), John Converse, Jesse Converse, Saml. Tidd, Jun., Lemmy Reed, Jeremi Converse, Eben Tay, Leonard Thompson, Josiah Richardson, John Buxton."

"The above names are those who will draw pay for Marching to Cambridge, with Capt. Josiah Richardson, ye 31 of October, 1786.

"Jost Wright, Clerk."

Early in January, 1787, 800 men from the 3d Division of militia were drafted for thirty days' field service on the 19th inst.; 2 captains, 4 sub-alterns, 8 sergeants, 6 corporals, 4 drummers and fifers and 100 privates, to be detached from the 2d Regiment; 1 sergeant, 1 drummer and 10 privates to be from Captain Richardson's company, and he was to see them marched to Mr. James Fowle's, innholder in Woburn, and returned under the commanding officer of said detachment, etc. The colonel also appointed to meet the officers on this business at Landlord William Tay's, in Woburn. On January 19, 1787, Captain Eaton's company quartered at Captain Josiah Richardson's, at Woburn, having forage for the team and convenient lodging for the men.

On January 26, 1787, Sergeant Jesse Richardson, Jr., was required, without a moment's delay, to warn his squad, by order of Josiah Richardson, captain, being "all the trainband on the southerly side of the road from Andrew Evans's, by Mr. Samuel Tidd's out to Bartholomew Richardson's, innholder, to appear to-morrow morning at six o'clock at Mr. Noah Wyman's, innholder, in said town," fully armed, equipped, provisioned and provided with ammunition.

NOTE.—Andrew Evans lived at East Woburn (Montvale Avenue), in a house still standing. Samuel Tidd's house was the house latterly Luke Tidd's (Salem Street) and Bartholomew Richardson, innholder's place was the place latterly Daniel Richardson's, on Main Street, opposite entrance to New Boston Street. The streets embraced by this road were, therefore, the way from East Woburn to Daniel Richardson's—principally Salem, Beach and New Boston Streets, apparently. Noah Wyman, innholder, kept the "Black Horse Tavern" at Winchester.

On February 5, 1787, orders were again received for Captain Josiah Richardson to detach from his company 1 sergeant, 1 fifer and 8 privates, and march them to Mr. Noah Wyman's, innholder in Woburn, on the 8th inst., at 9 A.M., the men to rendezvous at Marlborough, the 9th, Ensign John Johnson, of Woburn, who died 1792, was one of the officers to accompany the detachment. The men detached were expected to do duty six weeks from the 10th inst.—Orders from the colonel at Stoneham, February 5, 1787, "Monday night 12 o'clock." A second order of same date stated that Captains Nathan Parker and Josiah Richardson, Lieutenants John Going (Gowing?) and David Smith, and Ensign John Johnson were to command this detachment. Two of these officers only were of Woburn.

"On February 7, 1787, the following orders were issued: Stoneham, February 7, 1787—Regimental Orders.—His Excellency the Commander-in-Chief, having received information from General Lincoln of the total dispersion of the rebels and the flight of their leaders out of this commonwealth, has countermanded his orders for marching the detachment called for in the orders of the 5th instant. Major-General Brooks has only to add his congratulations to the 3d Division on the complete success of the measures of Government, and his warmest thanks for their spirited conduct through the course of the insurrection.

"Colonel Bryant returns his warmest thanks to both officers and men for their spirited conduct through the whole contest.

"I am, with respect and esteem, your humble servt.

"Evening, 7 o'clock.

"CAPT. JOSIAH RICHARDSON, Woburn."

¹ For genealogy of Mr. Coolidge, see Bond's *Watertown*, 183, and for description of his real estate in Woburn, see Bulletin of Woburn Public Library, 1884, p. 34.

² In Woburn Second burying-ground, with a lengthy inscription.

TRAIN BAND.—The next paper in the series is "A list of the Train-band." It contains the "Names of the Train-band," an account of their arms and equipments in the year 1787, the band being a part—the active part—of Captain Josiah Richardson's company, the alarm list of such a company being the oldest and the youngest men, or those the least efficient for severe military service.

The names: Sergeants Jesse Richardson, David Tottingham, Jonathan Eaton, Jr., John Hobden, Jr. Of these Richardson had a musket, a bayonet, a cartridge box, a steel ramrod, a spring, a worm, a priming-wire and brush, a scabbard and belt, 6 flints, 1 pound of powder, 20 balls (or bullets), a haversack, a blanket and a canteen—a full equipment.¹ Tottingham had the same. Eaton was minus the bayonet, cartridge-box, priming-wire and brushes, the scabbard and belt, the bullets and the canteen. Holden was minus a cartridge-box, wire and brush, the bullets and canteen.

Drummer, Edward Wyer.

Fifer, Lilley Eaton.

The other members see the original roll in the Woburn Public Library).

Few of the men had a complete equipment.

On this roll, also, is this inscription: "On Monday ye 30th of April, 1787, the Company met for a Review, which was as follows (viz.)," the roll, we suppose.

The "pay roll of Capt. Josiah Richardson's Company in Col. Joseph Bryant's Regiment, under command of Major-General Brooks" for their services during the period of Shays' Rebellion, is preserved. It is confined to the services of the officers, Captain Josiah Richardson, Lieutenant Joseph Brown, Ensign Jacob Richardson, and Clerk or Clerk Josiah Wright. The captain was on duty 5 days, September 5 to 10, 1786; 8 days, from January 10 to 18, 1787; and 3 days, from February 5 to February 8, 1787. His pay was *5s. 4d.* per day; rations extra. The lieutenant was on duty 5 days, from September 5 to 10, 1786, and his pay was *3s. 6 2-4d.* per day. The ensign was on duty 2 days, from February 6 to 8, 1787, at *3s.* per day. The clerk was on duty 2 days, September 8 to 10, 1786, at *1s. 9 2-4d.* per day. The roll minutely specifies every particular in tabular form and the total amount of wages and rations for the whole was £7 15s. 4 2-4d. They do not appear to have gone from home on this service—in other words, to have left town. The roll is signed by the captain, and was sworn before John Avery, Justice of the Peace, Suffolk ss., Boston, May 10, 1787.

The acceptance of the resignation of Captain Josiah Richardson is preserved—a very handsome specimen of handwriting—and reads as follows:

"COMMONWEALTH OF MASSACHUSETTS.

"COUNCIL CHAMBER, BOSTON, 2d October, 1787.

"This may certify that his excellency the Governor has accepted of the resignation of Josiah Richardson as captain of the 3d company in the 2d Regiment, in the 2d Brigade, and in the 3d Division of the Militia of this Commonwealth, comprehending the County of Middlesex.

"Attest: JOHN AVERY, *Jus. Sec'y.*"

NOTE.—Two undated papers relate to the exciting period of the Shays' Rebellion, and to members of this company. The first contains the statement that Major John Hastings, for Loammi Reed, hired Joseph Eaton; Squire Thompson hired John Buxton; Josiah Pierce, for Leonard Richardson, hired John Hobden; Rev. Samuel Sargeant hired Edward Wyer; Jeduthun Richardson hired Jeduthun Richardson, Jr.; Samuel Tidd hired Joseph Skinner (3d); Captain Richardson hired Silas Wyman; Ichabod Parker hired James Buz(zell?) Johnson; John Wyman hired William Dickson. These were prominent citizens, evidently hiring men for substitutes or soldiers for the campaign—actual or expected.

The other paper is a letter in the form of a warning to the militia officers and the Selectmen to perform their duty:

"To the Officers in Woburn, Pr. favour of Mr. David Winn:

"East Sudbury, Jany. 21st [1787]. To the Militia Officers and Selectmen of both Parishes in Woburn:

"Gent. You may depend, if your men detached do not join their

¹ "Each soldier was to equip himself with a good fire-arm, having a steel or iron ramrod and spring to retain the same, a worm, a priming-wire and brush, bayonet fitted to his gun, a scabbard with belt therefor . . . a cartridge-box . . . six flints, one pound of powder . . . leaden balls . . . blanket, canteen, or wooden bottle." *The Early Militia System of Massachusetts, in Proceedings of Worcester Society of Antiquity, for 1883, p. 115.* For an explanation of the terms *Train Band* and *Alarm List*, and many other matters, see that article.

corps within six days that they will absolutely be sent for and brought to camp, and dealt with as deserters. Wishing that such a disagreeable matter might not take place, beg you to send the men forward.

"WILLIAM BLANCHARD, *Capt.*"

The historian McMaster pays a fine tribute to the Massachusetts militia of that period in vol. 1, p. 319, of his *History of the People of the United States* in the following words:

"The troops which the State had assembled, while they passed under the name of militia, were very different from the holiday soldiers which could now, in a like emergency, be gathered from the same places. They were an army of veterans. Scarcely an officer among them but had gained his rank by meritorious services in the late war. In the ranks marched many men who had taken up arms in the early days of the Revolution, had joined the Continentals and had served with the illustrious chief to the close; had participated in the disastrous retreat along the Hudson, and had been present at the surrender of Yorktown. Even the greenest had seen something of battles and sieges. Some had lined the fences on that memorable day when the British were driven out of Lexington town. Some had stood in the trenches with Warren, and had seen the red-coats twice come up, and twice in confusion go down the slope of Breed's Hill. Others had formed part of the army which had laid siege to Boston, and had looked on with grim pleasure as the ships bearing the troops of Howe stood out to sea."

NOTE.—For a critical account of the Shays' Rebellion see Winsor's *Narr. and Crit. Hist. of Amer.*, vol. vii., pp. 227-231. Daniel Shays was its leader. At the last "the militia of the Eastern part of the State was put in motion, and the main body proceeded westward, under Gen. Benjamin Lincoln, to the scene of the chiefest disorder. The supporters of the law presented a front before which the ill-organized mob quailed." Under references this authority cites Minot's *History of the Insurrection in Mass.* as the principal contemporary account, and it is likely the best and most complete, and highly creditable to the author for its fairness and classic literary style. It was published at Boston in 1788; 2d ed. in 1810.

Thompson's *Diary Woburn*, also referred to the insurrection. See copied diary, pp. 72-78, and notes. The author, aged 55, went to Cambridge and saw the "regiments mustered," Nov. 1, 1786, alluded to on a previous page; the weather was fair, and on the same day he returned home. He was then a member of the General Court.

Extracts from Samuel Thompson, Esq.'s, diary, relating to local military affairs after 1780:

Musters.

1781, June 23.—Very hot weather. General muster, Col. Brown's regiment at Chelmsford.

1787, Oct. 18.—Cold, but fair. Regiment mustered at Reading.

1788, Sept. 30.—Cloudy. Regimental muster at Woburn.

1789, Oct. 8.—Good day. Muster at Medford. Went to Boston.

1791, Oct. 7.—Muster at Wilmington, Regimental.

1791, Oct. 6.—At home. Fair, good day. General muster at Waltham.

1791, Oct. 8.—Cloudy some, and muster of Regiment in Town.

1796, Oct. 3.—Cloudy, little rain. Muster at Reading.

1797, Sept. 26.—Cloudy, rain. Muster at Concord. Rain prevented most of their manoeuvring.

1798, Oct. 2.—At Probate. No Court. Muster; and [at] Lexington.

1799, Sept. 5.—Militia muster complaints; 5 all settled.

1800, Aug. 27.—Came from Chelmsford. Muster at Concord. Thunder and rain.

1802, Oct. 6.—Fine day. To Cambridge; to Waltham muster.

1804, Sept. 29.—Muster in New Bridge (Home of the Parist. Fair weather for the occasion). "Muster," he says, "of five companies, one of horse, on my land (the 29th) and Colonel Baldwin's."

This ends all reference in the indexed diary. Later incidents are the following:

1808.—A general muster in Woburn on Benjamin Wyman's plain.

1812.—Another general muster in Woburn. Diarist eighty-one years old.

Legal.

1799, Jan. 8.—Militia cavalry, actions. 1799, Sept. 5.—Militia muster, complaints. See *Musters.*

Trainings.

1782, July 1.—Training. [Age of Diarist 50 years.] June 3, 1783, Ditto.

1786, Dec. 25.—Trainings. The address read. [Having reference to Shays' Rebellion. The diarist being "in Town" was doubtless present. This winter was the severest for many years].

1788, April 28.—Cloudy, rainy. Training. View arms.

1788, June 25.—Rainy, cloudy. Training. West Company.

1790, Sept. 3.—Rainy. Training.

1797, July 1.—Fair, dry; some air. Training. Independence, etc. [Diarist aged 65].

1799, June 17.—Fair. Train. Parish-meeting. Hot.

[The diarist was evidently a member of the East Company; his house being on the east side of the main road which constituted the division line, for taxable and military purposes, between the east and west sections of the town. The weather for the above recorded trainings was not very favorable].

Miscellaneous.

The Diarist alludes to the anniversaries of Lexington and Concord Fight in 1783, 1789 (14 years), 1791, 1793 (18 years), 1794 (19 years).

1799, July 22.—Fair, good weather. Brigade officers met at A. Thompson's [Alojah Thompson then keeping a public house.]

CAPTAIN BALDWIN'S COMPANY, 1802.—There is extant a printed blank containing a return of Captain B. F. Baldwin's company in the 2d Regt., 1st Brig., 3d Div. of militia, 1802. We have not space for all the details given, but a few will suffice. The officers were a captain, a lieutenant and an ensign. There was one sergeant, five drummers and fifers, and fifty-three rank and file. The company was evidently unmounted. There is a muster-roll extant of the same company, under the same captain, also dated 1802. It is on a printed blank. The company is one of foot, and reasonably well equipped. We would gladly, had we room, give the names of all. The following were the names of the sergeants and musicians: Sergeants, 1. Josiah Richardson (3d); 2. Henry Parker; 3. Randolph Wyman; 4. Daniel Johnson. Musicians,—John Edgell and Peter W. Edgell, drummers; Charles Thompson, Joshua Richardson, Caleb Richardson, Jesse Brown and James Locke, fifers.

CAVALRY COMPANY.—In 1797 a company of this arm, composed of men from Woburn, Reading and Wilmington, was formed, Benjamin Wyman being the captain. On parade they looked finely, in a uniform composed of a scarlet coat trimmed with yellow, buff vests, buckskin pants, high boots, and a bearskin hat with a tall, red plume. The second captain was John Symmes, and other captains were Noah Smith, Bill Russell, George W. Reed, Josiah Locke, — Stanley, of Wilmington, Thomas Emerson and Isaac Upton, of Reading, Sewall Winn, of Wakefield (or South Reading), Jonas Parker and David Damon, of Reading, in 1822 and 1824, and the last captain, Samuel Leathe, of Woburn, who commanded in 1825. A roll of this company is said to exist. In 1828 it was formally disbanded. Cf. *Woburn Budget*, Nov. 4, 1859.

WASHINGTON LIGHT INFANTRY.—About 1823 Woburn had some members in an independent rifle company in Reading. Being about eighteen in number, they thought Woburn might afford an independent company of the same kind. Others joined them, and a charter was granted July 5, 1823. It became quite popular. The uniform consisted of a blue coat with narrow skirts, trimmed with gold lace; white pants, and leather bell-top hat, surmounted with a black plume twenty-two inches long. It was attached

to the first brigade, third division. On the 4th of July, 1824, the company was presented with a standard by the ladies of Woburn. The company was present at the reception of Lafayette, in Boston, in 1824. Its captains were Jeremiah Converse, Jr., commissioned Aug. 18, 1824; James Jaques, of Wilmington, afterwards colonel; Edmund Parker, afterwards of Winchester, and Marshall Tidd, the last captain of the company. The company was disbanded Oct. 13, 1834, being the last of the old organizations before the advent of the present Woburn Mechanic Phalanx. Cf. *Woburn Budget*, Nov. 11, 1859.

A request from Jeremiah Converse, Jr., captain of the *Washington Infantry*, to the selectmen, is preserved, asking for powder for muster for the Woburn members of that company. The request is dated Sept. 25, 1824. The powder comprising the town's stock was, at that date, kept in the brick powder-house still remaining on Powder-house Hill, near the Common and old burying-ground in Woburn. This has been a familiar object in the landscape for many years. On Nov. 4, 1811, the town voted to build a magazine to keep the town stock of powder in. The committee chosen to build it were Col. Benjamin F. Baldwin, Major Benjamin Wyman, and Capt. William Fox. It was ordered to be built of brick. Its site was selected by the committee, and the spot was convenient and was safe in case of an explosion. It appears to be finished after March 23, 1812. Bricks were brought from Medford for its construction, and by Sept. 2, 1812, the bricks and lumber left at the magazine after its completion were disposed of, and the fences repaired, showing that by that time it was completed. About 1820 it was repaired. It stands on public land, and may soon be removed. It has not been in use for many years. For a fuller account of the expenses of building it, see an article on the subject in *Woburn Journal* for Jan. 26, 1883.

WOBURN MECHANIC PHALANX.—The history of this company is very fully written to 1859, in the *Woburn Budget* articles, commencing Nov. 18, 1859. We have space only for a brief compendium of the information there obtained. It was a volunteer corps in distinction from the compulsory training of the old militia. In its earlier days it was distinguished for its proficiency in drill, and bore a good reputation in the general volunteer militia of the State. It was formed in the year 1835,—the State authorizing its formation on July 6, 1835, as a new company of light infantry in the second regiment, first brigade, third division, and Sergt. Charles L. Moore was directed to assemble the company at the vestry of Rev. Mr. Bennett's meeting-house, in Woburn, on Thursday, Oct. 1, 1835, at 3 P. M., for the purpose of electing a captain, lieutenant and ensign for the said company. Oct. 1, 1835, is therefore considered the birthday of this company. Samuel B. White was the first captain. Other captains were William Woodberry,

¹This statement is verified by the *Thompson Memorial*, pp. 51, 52. On Feb. 23, 1799, while the Diarist was at General Court, Boston, he records the fact that it was "Gen'l Washington's Birthday," and that cannon were fired [at Boston], etc., and that the day was unpleasant, there being a "hozen rain."

Charles Carter, Jonathan Bowers Winn, Walter Wyman, Albert Thompson, Timothy Winn, William T. Grammer, Charles S. Converse, Abijah F. Thompson, Cyrus Tay, Edwin F. Wyer, Luke R. Tidd, Alonzo L. Richardson, John W. Ellard, Charles W. Converse, George M. Buchanan, George A. Simonds, Horace N. Conn, and William C. Parker, the present commander. For many years its designation has been Company G, Fifth Massachusetts Regiment, and in the war between the States, 1861-65, it accompanied that regiment on two tours of active service,—one of nine months and another of one hundred days. The account of the service of the company during that period belongs to another part of this sketch. In 1842 the ladies of Woburn presented the company with a standard. On the 27th of Feb., 1856, the company held a grand ball in the Lyceum Hall, on the completion of that building. On Oct. 1, 1885, it celebrated its fiftieth anniversary by a grand parade of its present and past members, and a banquet. Cf. *Woburn Journal*, Oct. 2, 1885; *Advertiser*, Oct. 8, 1885.

The *Budget* articles describe the early uniforms of the company. In 1849 a notable uniform was adopted, which was worn by the company for about ten years. It was doubtless the most attractive and popular uniform the company ever had, but not the most useful for active service. It consisted of a tall black bearskin hat with a handsome gilt tassel, of a gray suit with white facings and white stripes, white crossbelts and epaulets, and an abundance of gilt buttons and gilded ornaments. Its drill, at this time, was of a high degree of excellence. Timothy Winn was its ruling spirit and popular commander; B. F. Wyer and John Robbins its constant and able field music,—Wyer, its drummer and Robbins, its fifer. This was the company of the writer's boyhood, which fired his military ardor and gave him his ideal of what a military organization was. With the opening of the war of 1861 a gray uniform with black facings and stripes was adopted, minus the great bearskin of yore, which was so impressive to the youthful spectator, and excited his wonder how one could wear so apparently heavy and certainly *hot* article of head-gear. The company at this time drilled daily for weeks in the public streets, and the four squads could be seen constantly passing and repassing.

BENJAMIN EDGELL.—The interesting details already alluded to as referring to him are described at length in the index to the Wyman *Collection of MSS.* in the Woburn Public Library, pp. 215-221.

First and principally, there is an account-book containing a journal, much scribbled and tallow stained, of a cruise of Benjamin Edgell to the West Indies, in the privateer "Pownall," of Massachusetts, from Dec. 8, 1757, to June 24, 1758. He appears to have worked for Isaac Stone, of Lexington, from Aug., 1755, to Nov., 1757. In the journal are given the names of all the islands visited in the course of cruising for French vessels. On one occasion there was a blood red eclipse of the moon (Jan. 24, 1758), the times of its appearing and disappearing being given. They were forced to keep out of the way of two men-of-war vessels, one a sixty and the other a fifty-gun ship. On the 10th of February they met with a Spanish sloop, which for

want of proper papers became their prize. She was loaded with sugar, coffee and indigo, and was sent to Boston. Soon afterwards they captured two Dutch ships, which they examined for contraband French articles, but finding nothing the captain ordered them discharged. The name of the "Pownall's" captain was Sample. The Dutch ships did not thus easily escape, for two sloops, cruising in company with the "Pownall," at the moment, took possession of them. Later on, in company with a ship of sixteen carriage guns, under Captain Semer,¹ of New York, they pursued several sail, March 10th, which, being French, tried to evade pursuit. After a difficult chase Captain Semer's ship came alongside the hindermost. His ship, being newly cleaned, shot ahead about a cannon-shot, and received a broadside from the "French ship," which carried twenty-two guns of the same kind as Semer's ship, which returned the fire, when the French struck their colors; and, thereupon, the magazine of the French vessel taking fire, blew up their ship; but whether accidentally or on purpose was not known, it being thought the captain did it to be revenged. The ship's quarter-deck, mizen-masts and sails, main-sails, all to her fore-sails were blown to some distance from her, and immediately she filled and sunk. Some of the men were swimming and some were floating on pieces of the wreck after she sunk. The launch of the "Pownall," being sent earlier in the day to watch the motion of the sail, returning, rescued ten of these men, the others all being lost, there being between seventy and eighty men on board the French ship. Several of those taken into the launch had their skins almost burned off. Captain Semer's vessel was damaged some by the broadside, and some by the ship when she blew up, and being somewhat disabled, he turned aside in pursuit of a large top-sail schooner that put before the wind. The "Pownall" following the remaining sail of the enemy, came alongside another ship and engaged it near three glasses—meaning *hour-glasses*—before it struck. The enemy's ship had several men killed and wounded, and the greater part of her rigging cut away. The rigging of the "Pownall" was shattered considerably, but not one of her men was killed or wounded. The enemy's vessel had eighteen six-pounders and seventy men. Owing to the abandonment of the chase by Captain Semer, and night coming on, the remaining sail getting close in with the shore, got clear. Other adventures of the "Pownall" are described in the journal, which is copied in full in the "Wyman Index." After a complete refitting of the "Pownall" at one of the islands, on the first day of May, she gave chase, while cruising, to a swift sailing brig, but after a chase of several hours she got near enough to fire a shot, and thereupon the craft hoisted French colors and returned the fire. After firing thirty or forty shots from her stern-chasers at the "Pownall" before that vessel came alongside, the French craft struck. She was loaded with wine and flour, and proved a valuable prize. On June 2d they took a French privateer schooner. On the 7th they set sail for Boston; on the 23d they made land in New England, and on the 21th day of June, 1758, in the morning, they came to an anchor at Boston.

"Jamaica, March the 10th, 1758,"—entered in the journal as *Jamoca*—was therefore a red-letter day in Benjamin Edgell's annals. On that day occurred the great battle with the French fleet, already described above. The home of Edgell at this time was apparently "Lexington in New England," as he records it. Here he again works for Isaac Stone from June, 1758, to April, 1759. He again started out on a course of adventure in the French War, arriving May 16, 1759, at Albany, to be an assistant to Cutler, the sutler. Here he remained till Nov. 20, 1759. From Dec., 1759, to May 20, 1760, he is again with Stone at Lexington. From June, 1760, to Nov. 18, 1760, he was at Albany and vicinity. On Dec. 23, 1760, he was at Worcester, and from March, 1761, to March, 1762, again with Stone at Lexington. He thus evinced in early life some enterprising characteristics. About 1768 he settled in Woburn.

"Albany, May 31, 1759," he says, "I went to Cutler, the Suttler." On the 22d inst. previous, he appears to have engaged himself to a person named Cooper. If this was so, he appears to have made a brief stay with him only. The name of Cutler, the Suttler, was Jonas Cutler. He mentions Fort Miller, Fort Edward, Crown Point and other places in his accounts. Under date of Albany, May 31, 1759, he states: "Jonas Cutler is debtor to Benjamin Edgell the sum of ten dollars, York money, or 41. On another occasion Robert Dunkley, belonging to Captain Bancroft's company, was "Debtor to 1 Pint Rum, 0: 1: 6." The book itself is a rich mine of names and

¹ Perhaps Seymour.

accounts. His house at Woburn was the centre of much business and resort. For instance: "Doct. Blodgett came June 20, 1763. David Fisk came Feb. 11, 1771. Doct. Blodgett left on July 20, 1772"—apparently boarders. "Amos Blodgett, Jr., began his year with me June 12, 1777; Amos Blodgett engaged in the Army Aug. 18, 1777; John Fenton, Esq., engaged my house Sept. 19, 1775, and came Nov. 15,"—the latter apparently a refugee from Boston, then in a state of siege. John Fenton, Captain and "Esq." of Boston, is mentioned in Wyman's *Charlestown General and Estates*, p. 313. His house stood on the site of the present house of Dr. Harlow on Main Street.

Before the Baptist Society of Woburn had erected their first meeting-house—their first meeting in their new meeting-house being on July 20, 1794—their meetings were held, as is well known, in Benjamin Edgell's house, at Central Square. He has entered in his book of accounts statements to the effect that "the Society met at my house, 1792, April to December, two Sabbaths each month. From April, 1792, to April 27, 1794, 38 Sabbaths. In May, June and July, 1794, two Sabbaths each month; total, 44 Sabbaths."

The book also contains a record of the births of his children.

His wife was a daughter of Peter Wyman, and "Peter Wyman's Hill," in the rear of his Central Square house, which was the homestead of his wife's father's family, was recently dug away for railroad purposes, its soil being used for the road-bed.

From the fact that Doctor Samuel Blodgett was an inmate of his house during his first stay in Woburn—for three years and one month (1760-1772)—the inference is that Doctor Blodgett was introduced by him to Woburn, and that Blodgett was originally one of the numerous Blodgett family of Lexington, where Edgell may have enjoyed his previous acquaintance, or may be relationship. This matter is taken up more fully under the notice of Doctor Blodgett, elsewhere. See PHYSICIANS.

Captain Benjamin Edgell's estate, scheduled in list of 1798, consisted of 1 dwelling-house, 37x28, with 18 windows; house of 2 stories, with $\frac{1}{2}$ acre of land adjoining the chimney not finished; 1 farm of 10 acres, north on the road, east on Jeremiah Clapp, south on Josiah Converse, west on Major Clapp; 1 barn on said land; 2 lots elsewhere, and 2 acres of salt-marsh in Medford. Captain Benjamin Edgell had 19 acres; value \$900 in 1801.

His house stood on the estate recently Marcellus Burnham's (1889) at Central Square.

WOBURN IN THE CIVIL WAR OF 1861-1865.—The "war is inevitable; let it come." These are the words at the beginning of an editorial in the *Woburn Weekly Budget* for Friday, April 19, 1861. The same issue of the paper says Woburn was "wide awake," a large and enthusiastic meeting being held in the Lyceum Hall the evening of the 18th inst., to consider the subject of raising a military company. At this meeting Capt., afterwards Col., W. T. Grammer, stated that it was desirable that Woburn should contribute her portion towards the support of the government, and proposed to revive the Phalanx—then in desuetude—and raise a company of eighty men. Enlistment papers were then opened and eighteen past members of the Phalanx signed; forty other names were procured the same evening, and \$3350 was raised by subscription at the same meeting. The war feeling was very general, and unbounded enthusiasm prevailed. The subscribers to the above amount are named in the issue of the paper of the above date. There is also an article on the rise and progress of the war, and items referring to it, principally the departure of the Stoneham military company for the seat of hostilities, with the names of its members. The issue of the *Budget* for April 26, following, contains a list of still further contributions, and contains two printed local sermons on the war and other items having reference to the progress of the war. More

than enough men were found ready to join the Phalanx, and that company had begun to drill every day and evening. The officers were chosen informally at first, and Timothy Winn was captain, and W. T. Grammer, C. S. Converse, E. F. Wyer and T. Gynn lieutenants, and Luke R. Tidd orderly sergeant. The uniform adopted was a jacket and pants of gray cloth, trimmed with black. A small French cap corresponded with the rest in color. Under "Stoneham news," in the same number of the paper, is an account of the experience of the Stoneham company in their bloody passage through Baltimore on April 19, 1861.¹ The fire-engine companies began drilling as a home-guard, and flags were put up by citizens very generally as a token of patriotism.

Some trouble about the Phalanx being summoned as a company to join a New York regiment in Brooklyn, N. Y., is explained in the issue of the *Budget* for June 7, 1861. The delay in being ordered out served to break up the company. A portion of it, however, volunteered, and left town on June 10 and 11, 1861, for the scene of service, the first section, under Sergt. John P. Crane, being accompanied to their quarters in Boston by an escort. This section expected to join a New York regiment. The second, and much smaller detachment, expected to join the 5th Massachusetts regiment in Washington. An account of the proceedings at their departure and the lists of their names are to be found in the *Budget* for June 14, 1861. As before, those who went to New York to join a regiment of that State experienced great dissatisfaction, while the Washington party experienced greater success.

On Wednesday, June 19, 1861, was a famous "training day" in Woburn. What was left of the Phalanx turned out for a target shoot, and before that parade was ended, late in the afternoon, the Stoneham Gray Eagles unexpectedly visited Woburn under Capt. J. P. Gould, a regularly educated military officer. This company surprised the Woburn people by their excellence in plain and fancy drilling, of which they gave an exhibition, and their coming excited great enthusiasm. Cf. *Woburn Budget*, June 21, 1861. On the 18th, ten more members of the Phalanx had left town for Washington, to recruit the Fifth Regiment, after the manner of the eleven who went the week before, and who had succeeded in joining the regiment.

The troubles of the "Yonkers Squad," or the thirty-seven men who went to New York to join the volunteers of that State, are detailed in communications in the *Woburn Budget* for June 21, 1861. Most of these men joined the First and Fifth Massachusetts

¹In the issue of the *Budget* for May 3, 1861, is a long letter from the lieutenant of the Stoneham company, describing the events of the 19th of April, etc., and in the *Woburn Journal* for April 27, 1861, are other interesting letters from members of the Stoneham company on the same subject. The papers from this time forward are full of letters from the seat of war.

Regiments. There were twenty-seven of the Phalanx in the Fifth Regiment on June 24, 1861. A list of the names of the Woburn soldiers to date is presented in the *Budget* for June 28, 1861. An attempt to revive the Phalanx, consisting of forty members only, by the departure of members, was made at this period, but it was not successful, and on July 6, 1861, it was disbanded by an order from the State. Attempts were immediately made to raise another company. This company was the Woburn Union Guard.

In the battle of Bull Run, July 21, 1861, the Fifth Regiment took part, and consequently, the Woburn men in it. But one was hurt and he not seriously—Robert Pemberton. In the *Budget* for Aug. 2, 1861, is an account of the reception of these men and others in Woburn, on the close of their term of three months' service, a celebration being held on Wednesday, July 31st, previous.

WOBURN UNION GUARD.—This company was organized at Woburn, July 27, 1861, and Samuel I. Thompson was chosen captain, and John P. Crane, first lieutenant. This company was soon sent into camp. Though not large in numbers, it was determined to go, if they could be received, and recruit on the field. Strong efforts were made to get a position in some regiment and they were successful. The command was first attached to the Nineteenth Regiment, then encamped at Lynnfield. The number of men was about forty. On Wednesday noon, Aug. 7th, the company assembled in the Town Hall, which for a week past had been used as a drill hall, and marched from there directly to the depot, where they took the cars at 1.15. A large concourse of citizens accompanied them there. This was the first detachment of soldiers from Woburn that left town as a company. Their names are given in the *Woburn Budget* for Aug. 9, 1861. A description of the camp is given in the *Budget* for Aug. 16, 1861. The company was soon afterwards transferred to another regiment, and on September 16th was attached to the Twenty-second Regiment, Col. Henry Wilson's, and left for the seat of war Oct. 8, 1861. The majority of the company were Woburn men, and the company had been rendered efficient by a camp duty of two months at Lynnfield before their departure. Before this company had left, talk was made of forming a second company from Woburn, and on Sept. 27, 1861, the report was that twenty-nine names were upon the enlistment paper; at that time it was estimated that with this proposed company, Woburn would have as good as three companies in the field, because, besides the two companies not yet gone, there were about seventy-five other Woburn men then serving in other regiments.

An account of the departure of the Woburn Union Guard to the war is given in the *Budget* for Oct. 11, 1861, and also a roll of the men's names. There were 104 men in the company, of which number Woburn sent forty-seven. There were six Woburn men in

the Twenty-second Regiment besides those in this company, whose regimental designation was Co. F. These were E. Hackett, commissary sergeant, J. K. Richardson and Alonzo Teel, in Co. D, and Cornelius and Thomas Connolly and Patrick Kelly in Co. G. A letter from one of the members of the Union Guard, giving an account of their journey, is published in the *Budget* for Oct. 25, 1861. As the career of this company is very fully described by one of its members, John L. Parker, in his "History of the Twenty-second Regiment," it is not necessary to go any further with it here. Mr. Parker joined the company at the front, and began letters in his paper, the *Woburn Budget*, in the issue for Dec. 13, 1861, which were continued for some time, giving a very minute account of the doings of the company from day to day. A full list of all persons in any way connected with the army or navy from Woburn was published in the same paper for the first time on Jan. 10, 1862. The total number of persons engaged in the service then had been 269. Among them were one surgeon, S. W. Drew, 9th Regt.; one major, E. Burbank, 12th Regt.; two captains, J. W. McDonald, 11th Regt., and S. I. Thompson, 22d Regt.; two first lieutenants, J. P. Crane, 22d Regt., and Cyrus Tay, 1st Battalion; and one assistant surgeon U. S. Navy, S. W. Abbott. To the list of commissioned officers thus given were added later, G. W. Batchelder, lieutenant 19th Regt.; John Wallace, captain or lieutenant of receiving-ship "Ohio;" and E. F. Wyer, first lieutenant 1st Battalion. In the battles before Richmond at this period the casualties to Woburn soldiers were numerous, and lists of those injured were given in the *Budget* for July 11-18, 1862. In July, 1862, enlistments received a new impetus from a call for troops by the General Government, and an attempt was again made, and successfully, to raise a full company from Woburn. This company was the Woburn National Rangers.

The brave Captain Samuel I. Thompson having received a fatal wound in battle, and experienced imprisonment by the enemy and a release and transportation to Baltimore, died there in the presence of his wife, and his body was brought to Woburn for interment. A tribute was paid to his bravery and ability in the *Budget* for August 1st, and an obituary and arrangement for his funeral procession appeared in the *Budget* for August 8, 1862. For account of his funeral see *Budget* for August 15, 1862.¹

The first death of a soldier of Woburn birth among the Woburn volunteers in the war was that of a member of Captain Thompson's company, viz.: Andrew J. Harris, who died of disease March 2, 1862, aged nineteen years. In the same battle in which Captain Thompson received his fatal wound, was killed his son, Corporal F. W. Thompson, aged seventeen years.

¹ Cf. *Thompson Memorial*, pp. 172-174.

John P. Crane succeeded S. I. Thompson as captain of this company in August, 1862. The Union Guard was reduced by losses to nine members (*per Townsman* of June 24, 1864). The return of the Twenty-second Regiment is the subject of an article in the *Woburn Journal* for October 15, 1864. But one person belonging to the regiment—Charles Day—arrived in Woburn, and the celebration that had been prepared was all in his honor.

The Twenty-second Massachusetts Regiment was one of the leading infantry regiments, in point of numerical loss in the Union armies, during the war. Its total in killed or died of wounds was 216. It can fairly claim the honor of having encountered the hardest fighting in the war. Its per cent. of loss was 15.5, while the highest per cent. stated was 19.7. Its loss in killed at Gaines' Mill was 84. Company F's loss in killed and died of wounds during its service was,—officers, 1; men, 20; total, 21. Died of disease, accidents, in prison, etc., men, 10. Total enrollment, 131. Its list of battles is a long one, including Gaines' Mill, Malvern Hill, Gettysburg, Wilderness and Spottsylvania. It was stationed for a time at Hall's Hill, Va., and in March, 1862, commenced active service in the Peninsular army. Bealton, Va., was its winter-quarters afterwards. The Thirty-second Regiment, in which was a number of Woburn men, appropriated its remnants. *Cf. Fox, Regimental Losses*, etc.

During the term of the Twenty-second Regiment in service, John P. Crane was made captain and William R. Bennett first lieutenant, the latter having been second lieutenant. Both of these officers were of Woburn.

In the Thirty-second Regiment Woburn had three captains—Cyrus Tay, John E. Tidd and Joseph S. Wyman—all of whom had been lieutenants.

WOBURN NATIONAL RANGERS.—This company of 101 men was raised in Woburn in the space of fifteen days, and sent to camp. The election of officers resulted in the making of John I. Richardson captain, Luke R. Tidd first lieutenant and James McFeely second lieutenant. On August 5, 1862, the company started for camp at Lynnfield. A roll of this company was published in the *Budget* for August 29, 1862. At this time L. F. Wyman was second lieutenant of the company, Mr. McFeely having resigned, and the company had 5 sergeants, 8 corporals, 2 musicians, 1 wagoner and the regulation number of privates. This company was attached to the Thirtieth Regiment (three years' troops), and left with the regiment for Washington on September 6, 1862. Its company letter was K. A history of this company by one of its members is published in the *Budget* for September 4, 1863.¹ To this time two members only had died. This company suffered much in the battles of May, 1864, and a large number of the company

were made prisoners August 19, 1864. The *Journal* for October 8, 1864, stated that this company then numbered for duty, 10 privates, 5 corporals and 2 sergeants. A reception at Woburn of Co. K, 39th regt., is mentioned in the *Journal* on June 3, 1865. On June 6 and 7 the members of Co. K, 39th, arrived, and on June 8 Co. B, 11th regt., arrived in town. See *Journal* for June 10, 1865, in which a particular roll of Co. K, man by man, is published.

A history of Co. K, 39th, was printed in the *Journal* for June 17, 1865. The company and regiment both sustained unusually heavy losses by deaths in Confederate prisons. The deaths in the 39th during the war (279) included 102 in the enemy's prisons, the regiment having lost 246 men captured in the battle at the Weldon Railroad.—*For.* Its first destination was Washington; 2d, Arlington Heights; 3d, Edward's Ferry, etc. It remained in the vicinity of Washington for some time, and afterwards joined the Army of the Potomac. Its principal battles were Spottsylvania, Va., May 8-13, 1864, and Weldon Railroad, Va., August 19, 1864. According to the local paper, June 10, 1865, the company's death losses were 6 killed; died of wounds, 6; of disease, 5; in prison, 13.

During the term of service of this company Luke R. Tidd became captain, Luther F. Wyman 1st lieutenant, Charles K. Conn 1st lieutenant, William McDevitt 1st lieutenant, George E. Fowle 1st lieutenant, Oscar Persons 2d lieutenant, George H. Dennett 2d lieutenant, all of Woburn.

THE NINE MONTHS' COMPANY, OR THE WOBURN MECHANIC PHALANX.—On August 14, 1862, the formation of another volunteer company from Woburn was begun. This was to be a company of nine months' men, and it chose for its commissioned officers, W. T. Grammer, captain; C. S. Converse, 1st lieutenant; W. A. Colegate, 2d lieutenant. It was enrolled also as a part of the volunteer militia of the State, and was to be known as Co. G, 5th regt. Lists of the names enrolled are given in the *Budget* for August 29, 1862, and September 12, 1862, the company having left for camp at Wenham, on the 10th inst., preceding. A roll of honor of Cos. K, 39th regt., and G, 5th regt., was published in the issue of the *Budget* for October 3, 1862.

The local war spirit was kept up in a measure at this time by such organizations as the Rifle Club (Nov. 15, 1861); the Woburn Brass Band (July 18, 1862); Soldiers' Aid Societies (1863); a juvenile military company at the Warren Academy, furnished with muskets by the trustees (June 5, 1863), a precursor of the more recent High School battalion; the Woburn State Guard (Aug. 28, 1863), an organization of old men, of which T. J. Pierce was captain;² and war meetings (Dec. 1863, etc.).

The Phalanx returned from their term of service and were received in Woburn on June 26, 1863. For

¹ *Cf. Townsman*, March 4, 1864.

² A roll of this company was published in the *Journal* for Aug. 13, 1864. The captain was T. J. Pierce, and the 1st lieutenant Charles Carter, and the 2d lieutenant E. F. Poole.

an extended account of their reception, see the *Woburn Budget* for July 3d, following. The company left Woburn nine months previous, with one hundred and one men, and *every one* of them returned safe home again, without a wound or a loss of a man or a life. The nine months' term of the Fifth Regiment, beginning September, 1862, was expended in active service in the Department of North Carolina, at Newbern, etc. Co. G was detailed on February 21, 1863, as garrison for Forts Hatteras and Clark, at Hatteras Inlet, where it remained till the return of the regiment to Massachusetts.

ONE HUNDRED DAYS' COMPANY, OR THE WOBURN MECHANIC PHALANX.—On July 6, 1864, on a call for 100 days' men, the Phalanx voted to recruit the company to its full number.—*Townsmen*, July 8, 1864. Fifty-eight men were recruited by July 15th, and a roll of 100 days' Woburn men was published in the *Townsmen* for July 22, 1864. Sixty of them had already left town for camp the day previous. The roll of the company as an organization was published in the issue of the above paper for July 29th, the company having left for the seat of war July 28, 1864. William T. Grammer, who commanded the company when it went into camp, was made major of the regiment. The commissioned officers of the company were C. S. Converse, capt.; E. F. Wyer, 1st lieutenant; and C. E. Fuller, 2d lieutenant. There were fifty-three Woburn men in the company, and the company went to Baltimore, where the regiment went also, and was stationed there, or in that vicinity, during its term of service. Letters from members to the local papers give an idea of the character of that service. It was not especially dangerous. The company arrived home November 8, 1864, at 7 A.M., and a reception was accorded them by the Woburn citizens. See *Journal* for Nov. 12, 1864. Two of the company died during its absence, of disease, and another of the same cause, soon after its return. Edwin F. Wyer was made adjutant of the regiment during its term, Charles E. Fuller 1st lieutenant, and Montessor S. Seeley, 2d lieutenant.

THE HARRIS GUARD.—First mentioned in the *Journal* for October 15, 1864, as recruiting at Galloupe's Island, in Boston Harbor, as a company in the 11th regt., hailing mostly from Woburn and Andover. The company was Co. B, and its captain was William R. Bennett, of Woburn, and 2d lieutenant, John L. Parker, of Woburn, both formerly of Co. F, 22d regt. An account of the doings of this company, in a letter from one of its members, appeared in the *Woburn Journal* for March 25, 1865. It arrived home on June 8, 1865, and a history of it was given in the *Journal*, June 17, 1865. See also issue for June 10, 1865.

This company left Galloupe's Island October 31, 1864, and reached the front, at Petersburg, November 4. Immediately its active duties, under fire, commenced. It was in the famous Weldon raid, and frequently in battle the whole of its stay in the field.

Among the field officers of the 11th regt. was James W. McDonald, major, Woburn, promoted from captain, having previously been 1st lieutenant. John L. Parker was promoted to 1st lieutenant in this regiment, and Charles A. McDonald, of Woburn, was a 2d lieutenant in it.

In December, 1862, was chronicled the death of Major Burbank, of the 12th regt. He was wounded at the battle of Antietam, and died of his wounds in hospital. His remains were brought to Woburn for burial. Funeral from the Unitarian Church. Cf. *Woburn Budget*, December 5, 1862, and January 23, 1863.

In July, 1863, occurred the draft mentioned in the *Budget* under date of July 10th; the *Budget* extra of July 14th, containing the names of 104 men drafted in Woburn—list repeated in issue of July 17. On account of the draft riot in Boston, at this time, the Phalanx was assembled, to be in readiness for action, if needed, and examinations of conscripts are alluded to in the *Budget* for August 14, and September 4, 1863. The funeral of Capt. William M. Buckman, a soldier in the war, occurred about this time, from the Baptist Church, his body having been brought home. See *Budget* issues for November 13 and 20, 1863. War meetings to fill quota were frequent during the winter of 1863 and 1864, and the names of those in last quota from Woburn were published in the *Townsmen* for February 19, 1864, and *Journal* for January 9, 1864; also lists of Woburn soldiers on duty with their regiments, in *Townsmen* for March 18 and 25, 1864. In the spring of 1864 the 59th regt. had on its rolls some 30 men from Woburn, including one lieutenant and two sergeants. See *Townsmen* for April 22, 1864, for their names, and *Townsmen* for April 29th, following, for their departure.¹ The *Townsmen* notes a training and inspection of the Woburn State Guard, 67 guns, in the streets of Woburn, under their captain, Thos. J. Pierce, in the number for May 6, 1864. But deeper anxiety was to rest upon the town from the effects of the war than from anything that had yet occurred. In an extra of the *Townsmen* for May 17, 1864, intended to explain the situation of the draft in Woburn of 31 men, whose names are given, was proclaimed the news that 41 or more Woburn men were killed, wounded and missing in the recent battles in Virginia, and a list of names was given. This was followed by an article on the Woburn men in the

¹The 59th Regt. was in action before Petersburg, Va., June 17-18, 1864, when its aggregate in killed, wounded and missing was 74. Its total deaths in the service was 184.—*For.* The lieutenant in this regiment from Woburn, George J. Morse, was killed in battle May 12, 1864. Woburn furnished three majors in the service—Grammer, 5th; McDonald, 11th; and Burbank, 12th. The medical profession was represented by three members—Drew, Abbott (army and navy) and Jameson,—all surgeons, ranking as majors. Among the captains, not mentioned elsewhere in this sketch, may be named T. F. Page, A. W. Persons, O. B. Darling, and others; but an attempt at further specification might lead to errors and omissions, so the writer will be pardoned if he refers the reader for further information to Barrett's list, mentioned in a note at the end of this section.

recent battles, in the issue of the *Townsmen* for May 20th. The casualties, though bad enough, were somewhat overstated. The matter of the losses in battle was continued in the *Townsmen* for May 27, 1864. The draft was further treated in an article on May 20, 1864, and in an extra of the *Townsmen* for May 21 the announcement was made that the quota was filled by 30 men procured by the town's agents at Washington, and their names were given in a following number of that paper. During the summer of 1864 many of the three years' regiments returned at the expiration of their term of service, and their members, many of them, did not re-enlist, but continued to remain at home. The papers of the time are full of the subject. War meetings, however, were renewed, and recruiting, after the departure of the Phalanx for 100 days' service, was vigorously prosecuted in August, 1864, in view of a threatened draft. A corrected list of enrolled men in Woburn was published in an extra of the *Townsmen* August 31, 1864, and a list of volunteers, under the recent call, in the *Journal* for September 10, 1864. Capt. John I. Richardson, who commanded Co. K, 39th regt., when it entered the war, and who was honorably discharged, for ill-health, died at his residence, in Woburn, October 1, 1864, and an account of his funeral is given in the *Journal* of October 8th, following.

Woburn shared in the general rejoicing at the end of the war, but military items continued to appear in the local papers till long after peace had been accomplished. Soldiers constantly returned from the seat of action throughout the summer of 1865, and the interest in them did not wholly abate. As a final echo of the war spirit, on June 6, 1865, an election of officers was held in the town for the "64th unattached company infantry, Mass. volunteer militia." The company was duly commissioned, and 98 men had signed the roll before June 10, 1865, when an account of it was given in the *Journal*. Its captain was John Powers; 1st lieutenant, James Sheehan; 2d lieutenant, John Murphy, but nothing further was done to perfect it.

NOTE.—In the foregoing cursory sketch of Woburn's doings during the Civil War of 1861-65, the newspapers on which we have mainly relied for facts have been the *Woburn Budget* and *Townsmen*. The *Woburn Journal* for the same period may also be consulted with profit for the same purpose. The annual town reports contain also considerable information concerning military expenses, and the names of men sent into the service—*e. g.*, 1862, pp. 28-34; 1863, pp. 28-39; 1864, pp. 39-46; 1865, pp. 54, 57, 58, etc.; 1866, pp. 38-42. Lists of wounded soldiers and of prisoners and missing during 1864 were published in the report for 1865, pp. 18-19; and the names and sketches of the soldiers who had died from 1861-65 from Woburn are published in the report for 1865, pp. 20-30; also 1866, p. 15. Other subjects connected with the war, such as recruiting expenses, etc., are mentioned in the report for 1865, pp. 65, 89-93. The expenditures

of the town incident to the late war are enumerated in the report for 1870, p. 19, also the number of men raised for the army and navy during that time. The number of the latter was 775. Number killed in battle, 21; died in Confederate prisons, 17; died of wounds, 17; died of disease, 27; total deaths, 82. The report of the committee on the soldiers' monument was presented in the annual report for 1870, pp. 98-125. It contained a history of the enterprise, a description of the monument, the inscriptions, the exercises at its dedication, Oct. 14, 1869, and the addresses. A roster of the soldiers and sailors from the town in the war, compiled by Albert P. Barrett, was published in the *Woburn Journal*, beginning March 27, 1880. This publication of Mr. Barrett's may be consulted with profit by all who desire to inform themselves of the military record of individuals.

LIBRARIES.—THE WOBURN PUBLIC LIBRARY.¹—The Woburn public library was founded through the liberality of the Hon. Jonathan Bowers Winn and his only son. The father had been a country schoolmaster and possessed a genius for finance, which he later developed in the prosecution of the leather industry, in which business he made for himself and others connected with him a fortune of considerable magnitude, much of which was bequeathed for benevolent objects. An only daughter, the wife of the Hon. Edward D. Hayden, late a member of Congress, died a number of years before her father, and the only son, Charles Bowers Winn, unmarried, survived the father but a short time, and died, the last member of his father's immediate family, at the early age of thirty-seven. The family of Winn had been prominent in the annals of the town from the time of its first settlement, and the first-born child recorded in Woburn was Increase Winn, born December 5, 1641. Many were the offices of a civil and military nature which the members of this family held in the town; and when the munificent donations of Jonathan Bowers and Charles Bowers Winn are included in the estimate, no family can be said to have done so much for Woburn as this old and well-known family of Winn.

There had been other libraries of a public nature in the town, before the library known as the Woburn public library had been thought of. A social library, founded in 1789, existed for quite a period. A charitable religious library, founded in 1807, and now but little used, is still preserved intact. A young men's library, founded about 1835, was in use for a while, but has been for the most part incorporated with the present public library. This library was remarkable in one respect, that it contained no religious works or novels. Other libraries of minor importance might be mentioned if it were necessary. But all these were subscription libraries, and not open free to all comers.

¹ From the *New England Magazine* for Feb., 1890.

In 1853, the Hon. Jonathan Bowers Winn was a member of the convention for the revision of the constitution of the state of Massachusetts, and at a town-meeting in Woburn in November, 1854, he, having informally introduced the subject of a free public library, offered to give for that object the money he had received as a member of the state convention, provided the town itself would appropriate a like sum for the same purpose. The project met with a favorable reception, the offer was accepted by the town in an informal vote, and thanks were presented to Mr. Winn for his gift. The offer was formally accepted in March, 1855, and the sum of \$300 was appropriated to be added to his donation, to be expended for books. Thus a library was started, which was opened for the first time on August 20, 1856.

No other important sum was given to the library by the Hon. Jonathan B. Winn till the year 1875, when he and his brother, Timothy Winn, devised together the sum of \$5500. In 1875 the late Charles Bowers Winn, son of the Hon. Jonathan B. Winn, made his munificent bequest to the people of Woburn in behalf of her public library, which was at once appreciated as an endowment of the richest and most permanent kind. This bequest was accepted by the town on February 17, 1876, and its provisions were immediately carried into effect by a committee, composed of John Johnson, Parker L. Converse and Edward D. Hayden, the executors of the will. A period of about two years was taken to erect and furnish a suitable building, to purchase the number of volumes needed to open a library of the grade contemplated, and to prepare a catalogue necessary to point out the stores of knowledge in all branches that it was expected to cover. The amount received as an immediate legacy was \$140,000; the value of the pictures left by Mr. Winn being added, raised the amount to \$153,000. As residuary legatee the town received still further amounts expended on the library, till the sum amounted to \$227,000. Of this amount about \$80,000 was expended for "one of the most exquisitely designed and harmoniously arranged buildings modern architecture has produced." About \$15,000 was expended immediately for books, many of them of costly character, and about \$50,000 more was reserved as a permanent fund, the income of which was to be applied to needful improvements and the purchase of current books. The building was opened for use without formal ceremony on May 1, 1879. The library was originally organized under the general law allowing towns to establish and maintain free public libraries, and continued under the same law till 1885, when a special act of incorporation was secured from the Legislature more especially suited to its own peculiar case.

Before entering upon a description of the building, a few facts in relation to Charles Bowers Winn may be of interest. He was at one time a student in Harvard University with other young men from Wo-

burn, but his health, never strong, would not admit of his staying there. He then made a voyage to the Mediterranean, and after that time spent most of his years in travel, finding a change of scene and climate a partial relief from pain. In consequence of his prolonged absence, he was personally but little known to the citizens of Woburn. In his journeying he visited every habitable portion of the globe, and the accounts of his wanderings, to those who had the pleasure of his intimate acquaintance, are said to have been intensely interesting. He seldom visited a place twice, avoided companionship, and preferred to pursue his solitary way undisturbed by any one's caprice but his own. He was, however, a broad man, but opposed to parade of any kind. For nearly a year before his death he was confined by illness to his house. During the American civil war he sent a substitute, paid liberally for raising men for the town's quota, and finally went himself, joining the Eleventh Massachusetts light battery, while that command was at the front near Petersburg, Virginia, during the last year of the war, and serving honorably with the battery till the close of its term of service. He would accept no commission, even though it was offered, but served his term as a private from the beginning to the close of his service. His modesty was remarkable. He was loyal to his father's name, and his extraordinary gift of a public library to Woburn was accompanied by a desire that the father who accumulated the fortune, rather than the son who bestowed it, should be honored, and the credit due to such an extensive expenditure should be the father's forever. Thus the inscription prepared by the son, and placed in the porch, reads thus: "This building was erected in memory of Jonathan Bowers Winn, from funds bequeathed by his son, for the use, benefit, and improvement of the people of Woburn."

In accordance with the provisions of the will, the best known architects of New York and Boston were invited to submit plans for a library building, and five plans from as many different architects were submitted. That of the firm represented by Henry H. Richardson was the one selected. The building as it stands, with a frontage on the street of 163½ feet, set seventy-five feet back from the street, with a lawn entirely surrounding it, is one of the finest and most imposing in its architectural effect to be seen in New England or in the country. Its style is of an original composite nature, resembling its architect's former work in Trinity Church, Boston, though in some respects it is more beautiful than Trinity, for the reason that the original designs were not in the least interfered with, the genius of the architect being allowed full sway. The contract specified that the material to be used in its construction should be of McGregor stone from the Longmeadow quarries at Springfield, relieved by Ohio cream-colored sandstone trimmings, and the roof to be covered with Akron, Ohio, moulded

and vitrified tile of a deep red color. The whole was to be completed for the sum of \$71,625.50.

The main entrance of the building is crowned by a tower which rises to the height of seventy-eight feet. At its base is a cloistered porch, in which is placed a tablet, above a stone settee, containing the inscription prepared by Charles B. Winn. From the entrance a flight of steps in the tower leads to rooms above, while a door opens into the art gallery, in which are hung the fifty or more pictures, principally oil-paintings, bequeathed as a commencement of his collection by Charles Bowers Winn. This room is 22 by 28 feet, with floor of black walnut, and wainscoting of the same wood. To the right, through an arched passage-way, is the apse used for a museum, containing in cases a scientifically arranged and valuable collection of fossils, minerals and birds, contributed by the uncle of Charles B. Winn—the Hon. John Cummings. This room is about thirty feet across, and polygonal in shape. In the centre is a round table for readers, on which is placed a handsome chandelier or fixture designed for electric light and gas. To the left of the art gallery is the reading-room proper, 36 by 24 feet, the finish of the wainscot and ceiling being butternut, the floor being ash. Around this room are drawers and shelves for books and statuary. The library is in possession of some eight antique busts and other specimens of statuary imported from Italy, which are placed in this room. From this room leads the wing of the library proper, at the entrance to which is the delivery desk. This room is 67 by 30 feet, and contains fourteen alcoves, seven on each side, in which are now shelved some 27,000 books, with ample capacity for a large number more. The ceiling is of butternut wood, while the floor is of southern pine. The centre ceiling is circularly arched, and the columns of butternut finish, supporting the roof and galleries, are surmounted with beautiful capitals, representing leaves, fruit, and flowers, of familiar varieties, exquisitely carved, no two alike, yet all forming a harmonious whole. This peculiar feature in ornamentation is noticeable throughout the building, and especially in the exterior decoration.

These are some of the principal architectural effects of the building itself. Of its contents little need be added beyond what has been already said, that it contains many valuable and useful books, and a number of costly ones. This feature it is expected will be added to in full proportion as time goes on. The policy in this respect has of late been somewhat conservative, the belief being that slow accessions after careful consideration are the wisest and best. It would be very easy with the funds at command to fill the shelves rapidly, but this certainly would not be prudent, if the value of the works is to be considered.

The place the library has achieved in the intellectual life of the town cannot easily be measured; it is an undoubted and a very high beneficial influence,

the extent of which perhaps could only be adequately realized by its sudden withdrawal. Everything that a reasonable person could ask, in relation to what may be termed an intellectual equipment or intellectual tools, is freely and readily furnished.

The total value of the gift of Mr. Winn may be generally summarized in money as follows (to 1881):

Original legacy from executors	\$140,000 00
Two thirds of the residue of estate	42,286 16
From pictures	15,708 50
From interest on investment	15,122 79
From rents, sale of buildings, etc.	7,850 70
Total receipts from all sources (to 1881)	\$221,028 15

Of this amount there had been expended for construction of building, architects, heating apparatus, fixtures, etc. (to 1881)	\$95,305 24
Paid for real estate	27,438 44
for books	15,281 50
for pictures	13,500 00
for catalogue, stationery, etc.	6,907 20
Discount on U. S. bonds sold	4,138 50

Making the total cost of building and contents (to 1881) \$162,770 88
Leaving an unexpended balance to be invested of \$58,257.27.

There is another feature, uncommon in libraries, namely, an antique kitchen fitted up in one of the rooms in the basement—"an old farm kitchen, the fireplace, corner cabinet of china, wall-mirror, settle and chest of drawers, all placed as though in use." This collection was opened to visitors about ten years ago, for the first time, and has been much visited since. It contains, in the words of a recent writer, "a loom, swifts, spinning-wheels, distaff for spinning flax, the cards for carding wool into rolls, churns which are vividly remembered by old men who, when boys, were reluctantly harnessed to this domestic instrument of torture every week to do the family butter-making. Scattered around are rusty old swords in time-eaten scabbards; specimens of the Queen's Arm with which our ancestors beat back the fierce attacks of the foe; ironware, from the little skillet and shallow spider to the big kettle that held the family wash; a whole series of pewter platters, the pride of matronly hearts; toasting-irons, piggins, noggins, chests of drawers, settles (settees) of tough wood, sets of andirons, shovels, tongs and iron candlesticks to go with them. There are Dutch ovens, bread shovels, waffle-irons and bellows to set the wood ablaze. The wide, open fireplace of the room has its ancient crane, pot-hooks and trammels; and there are candle-moulds; stills that the fair dames of ye olden times brewed their rose leaves in for attar to scent their Sabbath-day handkerchiefs; queer, straight, stiff-backed chairs; looking-glasses uncertain as to reflection; the warming-pan, whose glow was so grateful when crawling into a cold bed in midwinter; rare patterns of old crockery-ware; cradles, tables, lightstands, secretaries; the old mortar and pestle still fragrant with rich Thanksgiving spices; choice single samples of rare wares like the 'Washington Plate'; decanters that have graced many a festive board; antique brasses, curious smoking pipes, pew-

ter buttons that once ornamented the garments of an illustrious ancestry; sconces, saddle-bags, books printed in ancient type, and innumerable quaint and curious things, relics of bygone days."

After all, what better description of the uses of a library is there than that given in the opening lines of the document containing the signatures of the subscribers to the old Woburn social library at its founding on April 13, 1789: "To advance knowledge, to enlarge our ideas and extend our capacities." This is the service which, in a larger way, the new Woburn library is rendering to-day.

NOTE.—THE SOCIAL LIBRARY, founded in 1789. The preamble to its preliminary statement began with the words we have just quoted. It was gathered in 1789. It was a proprietary library, the shares being held by a number of subscribers, who promised to conform to such laws and regulations as the majority of the subscribers should make for the good government and mental advantage of the whole. Of the original subscribers Loammi Baldwin leads with four shares, Joseph Bartlett follows with two, Samuel Thompson with one, Zebadiah Wyman with three, and so on, till a large number of the citizens of the town are included, some owning one share, others two, and a few three. John Hastings owned three shares. The names of the subscribers and a sketch of this library, by Nathan Wyman, are published in *Our Paper*, vol. ii., p.91. Samuel Thompson, in his diary, mentions his going to Boston to buy books for this library in 1789 and 1807, also his attending occasional library meetings. Colonel Leonard Thompson was probably the last living proprietor. About 1827 the books, some two or three hundred in number, were divided among the proprietors, some being given to a library in Lynn. The books were mostly of history and travel—works of poetry and fiction being very few. Occasionally, at the present time, some book or relic of this library is seen.

THE CHARITABLE RELIGIOUS LIBRARY, founded in 1807. This library is still extant, in the present custody of the First Congregational Church. A little pamphlet of eight pages, containing its constitution and the catalogue of its books, was published at the time of its organization, a few copies of which are yet preserved.¹ "This institution," says the pamphlet, "originated in the congregational Church in Woburn, A.D. 1807, and was carried into effect by a general subscription in the town."² The constitution begins with the following words: "The Congregational Church in Woburn, sensible of the importance of moral and religious instruction to the temporal and eternal happiness of themselves, their neighbors and posterity," having taken measures to establish a

charitable religious library, did, on the 7th of April, 1807, unanimously adopt the following articles as its constitution."

The articles referred to are fifteen in number, and from them a few facts are selected to illustrate the purposes and scope of the organization. The first object was to supply the library with the plainest and most practical books on moral and religious subjects. The librarian was to give out and receive books every Monday, P. M., and he could also, when convenient, accommodate persons at any other time. The library was for the use of all persons regularly residing in the town of Woburn, and also inhabitants of other towns adjacent to Woburn were allowed to use it by the payment of fifty cents annually, and life membership could be obtained by the payment of two dollars. A book could be kept out two months at one time, and all books were to be returned once each year. A fine of five cents a week was charged for detaining books beyond the legal time. The catalogue appended to these articles contained about 120 titles, arranged alphabetically by authors. As might be expected, the works were as a rule strictly religious in character, their titles being given in the briefest possible space, and with a general suppression of capital letters. Of some volumes there were a number of copies, in some cases as many as twelve. Another catalogue of the books in this library was published in 1856, and another in 1868.

THE YOUNG MEN'S LIBRARY, founded about 1835. The constitution and catalogue of this library, belonging to the organization known as the Young Men's Society, was published in 1835, and another catalogue of their books was published in 1852. The Woburn Young Men's Society was founded with a patriotic moral purpose, and for mutual instruction and the general diffusion of knowledge. The age of its members was limited from 14 to 30 years. In the first publication is a list of active and honorary members of the society, and the rules and regulations of the library. An annual fee of fifty cents was required for its use, outsiders paying the sum of one dollar for the privilege. Books could be kept out three weeks, and fines for overdue books were 12½ cents per week.

The library was composed of books of science and instruction, and of such works only as treat of facts, it being understood that works of fiction and theology should be excluded from it. The works were classed under history, biography, travels and voyages, and scientific and miscellaneous works. The catalogue of 1852 is arranged under the same classification, the subscription being the same amount per year as previously. Miss Ruth Maria Leathe was then the librarian. Other librarians were Capt. Marshall Tidd and Dr. Benjamin Cutter. In 1865 the volumes of this library to the number of 375 were added to the Woburn Public Library, and its existence as a separate library ceased.

¹ Viz.: "Constitution of the Charitable Religious Library in Woburn, and catalogue of books which it contains," 8 pp., 16mo., [1807.]

² A list of the subscribers to "Woburn Charitable Religious Library," not church members, is preserved in the *Wyman Coll. MSS.*, Woburn Public Library, 15: 133.

THE NORTH WOBURN LIBRARY, founded in 1840.¹ The North Woburn Library Association was organized in November, 1840. The labor which resulted in this achievement was very largely performed by Benjamin Coolidge, a grandson of Colonel Loami Baldwin. Possessing unusual intelligence, his tireless and almost boundless energy knew no rest till his purpose was accomplished. As a fitting return for his perseverance, the Association chose him for their first President. In accordance with their vote, each male adult member paid one dollar at once, with the understanding that this sum should be given each year. Each female and each minor paid, on the same condition, fifty cents. As there were forty-seven of the former and forty-two of the latter class of original members, the sum of sixty-eight dollars was raised in the outset. To this were added six dollars in gifts, making seventy-four dollars as a beginning for the purchase of books. A considerable number of volumes were also given by individuals both in and out of the Association. This nucleus of the proposed library, consisting of 102 volumes, was opened November 21, 1840, for the delivery of books to members.² By a special gift of twenty-five dollars from James F. Baldwin, Esq., a native of North Woburn, then residing in Boston, the number of volumes was soon increased to 132.

From this time on for many years there were essentially the same sources of income and an expenditure sufficient to secure a gradual, though small, yearly increase in the number of volumes. According to a catalogue issued in 1874, there were then 1016 volumes, besides various miscellaneous public documents, reports, etc.

On March 26, 1877, the 124th birthday of Count Rumford, the Rumford Historical Association was organized and subsequently incorporated. As a majority of the Library Association were also members of this, it was thought best that the former should be merged in the latter, and that the library should thenceforth be called the Rumford Library. The old Rumford House having become the property of the Association, it was also voted that the library, then homeless, should be set up in the very room where Benjamin Thompson, the future Scientist and Count, was born. In that historic room it has remained until the present time. Under this new *régime*, it was decided that it should be a *free library*, and though still retained in North Woburn for the use

of the people of the village, and under the immediate care and control of the officers of the Rumford Historical Association, be made, with the consent of the Public Library Committee, an adjunct of the Town Library. The object of this was to make it a convenient channel for the delivery, on regular specified days, of books from the general library as well as from that of the Association. This arrangement, which continued till recently, gave great satisfaction.

As no catalogue of the Rumford Library has been issued since 1874, and, in the mean time, some volumes have fallen into disuse, while others, newly received, have not yet been regularly numbered and arranged, the writer cannot, with exact accuracy, state the number of volumes now in the library. From certain data at hand, however, it seems safe to say that the whole number is between 1500 and 1600 volumes. And there is abundant evidence that it has been and still is very useful.

NOTE.—In 1852 a printed catalogue of 456 books was issued belonging to this library, and another was issued in 1874, and perhaps others earlier. The Woburn Public Library itself has not a complete set of its own publications.

The Warren Academy had a library of 300 or more volumes, and an Agricultural Library of 150 volumes was united to the Woburn Public Library collection in 1865–66. The largest private library in Woburn probably is that of the late George R. Baldwin, which numbers some 7000 volumes, and contains many works of unusual value. These libraries, it is expected, will be deposited in the Woburn Public Library, which possesses ample facilities for their safe keeping.

Among the Woburn libraries not already mentioned are the following, whose catalogues are to be found in the Woburn Public Library: Pippy's Circulating Library, 1857; Grosvenor & Co.'s Circulating Library, 1867; First Congregational Sabbath-School Library, 1868 (another, no date); First Unitarian Parish, do., 1869, 1875; Baptist, do 1870; Methodist Episcopal do. (no date).

CHAPTER XXX.

WOBURN—(Continued).

BIOGRAPHICAL NOTICES.

COUNT RUMFORD,³ WOBURN'S MOST EMINENT NATIVE.—Sir Benjamin Thompson, Count Rumford (1753–1814), an eminent man of science, enlightened philanthropist, and sagacious public administrator, was born at Woburn, in Massachusetts, in 1753, and died at Auteuil, near Paris, in 1814. His family had been settled in New England since the middle of the

¹Sketch by Leander Thompson.

²The paper for signatures was headed as follows: "The undersigned, young men of New Bridge, in the town of Woburn, being desirous of having a greater command of books than each one can conveniently obtain by his own unaided exertions, have determined to form themselves into an association for the purpose of securing a library of useful works; inasmuch as the investigation of truth affords equal pleasure and much greater benefit than the perusal of fiction, it shall be a fundamental principle in the constitution of this association may form, to exclude novels and light reading generally."—*Woburn Journal*, Nov. 18, 1881.

³From *Encyclopædia Britannica*, 9th ed., vol. xxiii. By Frederick Drummond.

century preceding his birth, and belonged to the class of moderately wealthy farmers. His father died while Thompson was very young, and his mother speedily married a second time. But he seems to have been well cared for, and his education was so far from neglected that, according to his own statement, he was at the age of fourteen sufficiently advanced "in algebra, geometry, astronomy, and even the higher mathematics," to calculate a solar eclipse within four seconds of accuracy. In 1766 he was apprenticed to a storekeeper at Salem, in New England, and while in that employment occupied himself in chemical and mechanical experiments, as well as in engraving, in which he attained to some proficiency. The outbreak of the American war put a stop to the trade of his master, and he thereupon left Salem and went to Boston, where he engaged himself as assistant in another store. He afterwards applied himself to the study, with a view to the practice, of medicine, and then (although, as he affirms, for only six weeks and three days) he became a school-teacher—it is believed at Bradford, on the Merrimack. Thompson was at that period between eighteen and nineteen years old; and at nineteen, he says, "I married, or rather I was married." His wife was the widow of a Colonel Rolfe, and the daughter of a Mr. Walker, "a highly respectable minister, and one of the first settlers at Rumford," now called Concord, in New Hampshire. His wife was possessed of considerable property, and was his senior by fourteen years. This marriage was the foundation of Thompson's success. Within three years of it, however, he left his wife in America to make his way to wealth and distinction in Europe, and, although his only child by her, a daughter, subsequently joined him, he never saw and, so far as anything appears to the contrary, never attempted or desired to see her again.

Soon after his marriage Thompson became acquainted with Governor Wentworth, of New Hampshire, who, struck by his appearance and bearing, conferred on him the majority of a local regiment of militia. He speedily became the object of distrust among the friends of the American cause, and it was considered prudent that he should seek an early opportunity of leaving the country. On the evacuation of Boston by the royal troops, therefore, in 1776, he was selected by Governor Wentworth to carry despatches to England. On his arrival in London he almost immediately attracted the attention of Lord George Germaine, secretary of state, who appointed him to a clerkship in his office. Within a few months he was advanced to the post of secretary of the province of Georgia, and in about four years he was made under-secretary of state. His official duties, however, did not materially interfere with the prosecution of scientific pursuits, and in 1779 he was elected a fellow of the Royal Society. Among the subjects to which he especially directed his attention were the explosive force of gunpowder, the construc-

tion of firearms, and the system of signaling at sea. In connection with the last, he made a cruise in the Channel fleet, on board the "Victory," as a volunteer under the command of Admiral Sir Charles Hardy. On the resignation of Lord North's administration, of which Lord George Germaine was one of the least lucky and most unpopular members, Thompson left the civil service, and was nominated to a cavalry command in the revolted provinces of America. But the War of Independence was practically at an end, and in 1783 he finally quitted active service, with the rank and half-pay of a lieutenant-colonel. He now formed the design of joining the Austrian army, for the purpose of campaigning against the Turks, and so crossed over from Dover to Calais with Gibbon, who, writing to his friend Lord Sheffield, calls his fellow-passenger "Mr. Secretary-Colonel-Admiral-Philosopher Thompson." At Strasburg he was introduced to Prince Maximilian, afterwards elector of Bavaria, and was by him invited to enter the civil and military service of that state. Having obtained the leave of the British Government to accept the prince's offer, he received the honor of knighthood from George III., and during eleven years he remained at Munich as minister of war, minister of police, and grand chamberlain to the elector. His political and courtly employments, however, did not absorb all his time, and he contributed during his stay in Bavaria a number of papers to the *Philosophical Transactions*. But that he was sufficiently alert as the principal adviser of the elector the results of his labors in that capacity amply prove. He reorganized the Bavarian army; he suppressed mendicancy and found employment for the poor; and he immensely improved the condition of the industrial classes throughout the country by providing them with work and instructing them in the practice of domestic economy. Of the prompt and the business-like manner in which he was wont to carry his plans into execution, a single example may serve as an illustration. The multitude of beggars in Bavaria had long been a public nuisance and danger. In one day Thompson caused no fewer than 2600 of these outcasts and depredators, in Munich and its suburbs alone, to be arrested by military patrols and transferred by them to an industrial establishment which he had prepared for their reception. In this institution they were both housed and fed, and they not only supported themselves by their labors but earned a surplus for the benefit of the electoral revenues. The principle on which their treatment proceeded is stated by Thompson in the following memorable words: "To make vicious and abandoned people happy," he says, "it has generally been supposed necessary first to make them virtuous. But why not reverse this order? Why not make them first happy, and then virtuous?" In 1791 he was created a count of the Holy Roman Empire, and chose his title of Rumford from the name as it then was of the Ameri-

can township to which his wife's family belonged. In 1795 he visited England, one incident of his journey being the loss of all his private papers, including the materials for an autobiography, which were contained in a box stolen from off his post-chaise in St. Paul's Churchyard. During his residence in London he applied himself to the discovery of methods for curing smoky chimneys and the contrivance of improvements in the construction of fireplaces. But he was quickly recalled to Bavaria, Munich being threatened at once by an Austrian and a French army. The elector fled from his capital, and it was entirely owing to Rumford's energy and tact that a hostile occupation of the city was prevented. It was now proposed that he should be accredited as Bavarian ambassador in London; but the circumstance that he was a British subject presented an unsurmountable obstacle. He, however, again came to England, and remained there in a private station for several years. In 1799 he, in conjunction with Sir Joseph Banks, projected the establishment of the Royal Institution, which received its charter of incorporation from George III. in 1800. Rumford himself selected Sir Humphrey Davy as the first scientific lecturer there. Until 1804, when he definitely settled in France, Rumford lived at the Royal Institution in Albemarle Street, or at a house which he rented at Brompton, where he passed his time in the steady pursuit of those researches relating to heat and light and the economy of fuel, on which his scientific fame is principally based. He then established himself in Paris, and married (his first wife having been dead for many years) as his second wife the wealthy widow of Lavoisier, the celebrated chemist. With this lady he led an extremely uncomfortable life, till at last they agreed to separate. Rumford took up his residence at Anteuil, where he died suddenly in 1814, in the sixty-second year of his age.

He was the founder and the first recipient of the Rumford medal of the London Royal Society. He was also the founder of the Rumford medal of the American Academy of Arts and Sciences and of the Rumford professorship in Harvard University. His complete works were published by the American Academy of Arts and Sciences at Boston in 1872, and a full and extremely interesting memoir of the author which was issued with them was republished in London by Messrs. Macmillan in 1876.

ARTISTS RESIDENT IN WOBURN: BENJAMIN CHAMPNEY AND ALBERT THOMPSON.¹

BENJAMIN CHAMPNEY, painter, born in New Ipswich, N. H., Nov. 20, 1817. He was graduated at Appleton Academy, in his native town, in 1834. He went to Boston in that year, worked in Pendleton's lithographic establishment in 1837-49, studied and painted at the Louvre, Paris, in 1841-46, then visited

Italy with Kensett, and, revisiting Europe in 1847-48, painted a panorama of the Rhine. Since 1853 he has passed his summers at North Conway, N. H., where he has a cottage and a studio, and has painted many White mountain views, as well as those of Switzerland, which are owned in and around Boston. He was president of the Boston Art Club in 1858, and in 1865-66 he again visited Europe, spending a summer in Brittany.

ALBERT THOMPSON, artist, born in Woburn, Mass., Mar. 18, 1853. He became a pupil of William E. Norton in 1873, and in 1872 and 1875 traveled in Europe. During 1880-81 he studied in Paris under Jules J. Lefebvre and Gustave R. C. Boulanger at Julien's academy, and also anatomy at the École des beaux arts. Among his works, mainly landscapes and cattle-pieces, are "After the Shower" (1876); "Clearing up" (1877); "More Wind than Rain," in Woburn Public Library (1885); and "Changing Pasture" and "An October Afternoon" (1886). He is the author of "Principles of Perspective" (Boston, 1878).

INVENTORS: SAMUEL BLODGET, A NATIVE, AND CHARLES GOODYEAR, A RESIDENT OF WOBURN.

SAMUEL BLODGET, inventor, born in Woburn, Mass., April 1, 1724; died in Haverhill, Mass., Sept. 1, 1807. He participated in the French and Indian war, was a member of the expedition against Louisbourg in 1745, and afterwards became a judge of the Court of Common Pleas for the county of Hillsborough, N. H. In 1783, with a machine of his own invention, he raised a valuable cargo from a ship sunk near Plymouth, Mass., and then went to Europe for the purpose of engaging in similar enterprises. He met with discouragement in Spain, and his proposition in England to raise the "Royal George" was unsuccessful. On his return to the United States he established a duck factory in 1791, and in 1793 removed to New Hampshire, where he began the canal that bears his name around Amoskeag Falls in the Merrimack. He expended a large sum of money on this enterprise without being able to complete the work, and, becoming financially embarrassed, was for a time imprisoned for debt. See "Massachusetts Historical Collections" (second series, vol. iv., pp. 153, 154). (Cf. *Woburn Journal*, October 25, 1873, for an extended sketch.)

CHARLES GOODYEAR, inventor, born in New Haven, Conn., December 29, 1800; died in New York City July 1, 1860. In 1834 Goodyear first turned his attention to the substance of India rubber, and from then until his death the idea of producing from it a solid elastic material occupied his entire mind. His experiments were conducted in Philadelphia, New York and in different towns of Massachusetts, with his family always in want, and himself frequently in prison for debt. Although he died in debt, he lived to see his material applied to nearly 500 uses, and to give employment to upward of 60,000 persons.

¹ From Appleton's *Cyclopædia of American Biography*.

"At Woburn, one day in the spring of 1839, after five years' previous investigation, he was standing, with his brother and several other persons, in a store near a very hot stove. He held in his hand a mass of his compound of sulphur and gum, upon which he was expatiating in his usual vehement manner, the company exhibiting the indifference to which he was accustomed. In the crisis of his argument he made a violent gesture, which brought the mass in contact with the stove, which was hot enough to melt India rubber instantly. Upon looking at it a moment after he perceived that his compound had not melted in the least degree! It had charred as leather does, but no part of the surface had dissolved; there was not a sticky place upon it. To say that he was astonished at this would but faintly express his ecstasy of amazement. The result was absolutely new to all experience—India rubber not melting in contact with red-hot iron! Eagerly he showed his charred India rubber to his brother and to the other bystanders, and dwelt upon the novelty and marvelousness of his fact.

"Then we see him resorting to the shops and factories in the neighborhood of Woburn, asking the privilege of using an oven after working hours, or of hanging a piece of India rubber in the man-hole of the boiler. If the people of New England were not the most 'neighborly' people in the world, his family must have starved or he must have given up his experiments. But with all the generosity of his neighbors, his children were often sick, hungry and cold, without medicine, food or fuel. One witness testifies,—

"I found (in 1839) that they had not fuel to burn, nor food to eat, and did not know where to get a morsel of food from one day to another, unless it was sent in to them."

"By the time that he had exhausted the patience of the foreman of the works near Woburn, he had come to the conclusion that an oven was the proper means of applying heat to his compound. An oven he forthwith determined to build.

"It was in the winter of 1839-40. One of those long and terrible snow-storms, for which New England is noted, had been raging for many hours, and he awoke one morning to find his little cottage half-buried in snow, the storm still continuing, and in his house not an atom of fuel nor a morsel of food. His children were very young, and he was himself sick and feeble. The charity of his neighbors was exhausted, and he had not the courage to face their reproaches. As he looked out of the window upon the dreary and tumultuous scene, 'fit emblem of his condition,' he remarks, he called to mind that a few days before an acquaintance, a mere acquaintance, who lived some miles off, had given him upon the road a more friendly greeting than he was then accustomed to receive. It had cheered his heart as he trudged sadly by, and it now returned vividly

to his mind. To this gentleman he determined to apply for relief, if he could reach his house. Terrible was his struggle with the wind and the deep drifts. Often he was ready to faint with fatigue, sickness and hunger, and he would be obliged to sit down upon a bank of snow to rest. He reached the house and told his story, not omitting the oft-told tale of his new discovery, that mine of wealth if only he could procure the means of working it! The eager eloquence of the inventor was seconded by the gaunt and yellow face of the man. His generous acquaintance entertained him cordially, and lent him a sum of money, which not only carried his family through the worst of the winter, but enabled him to continue his experiments on a small scale. O. B. Coolidge, of Woburn, was the name of this benefactor."

These selections are from Parton's *Famous Americans of Recent Times*.

COLLEGE PRESIDENTS, NATIVES OF WOBURN: SAMUEL LOCKE AND JAMES WALKER.

SAMUEL LOCKE, educator, born in Woburn, Mass., 23d November, 1732; died in Sherborn, Mass., 15th January, 1778. He was graduated at Harvard in 1755; ordained a minister at Sherburne, 7th November, 1759, and retained this pastorate till 1769, when he was appointed president of Harvard, 21st March, 1769. On 1st December, 1773, he resigned from the presidency, and spent the remainder of his life in retirement. Harvard conferred on him the degree of D.D. in 1773. The only production of Dr. Locke's in print is his "Convention Sermon" (1772).

JAMES WALKER, president of Harvard, born in Burlington or in Woburn, Mass., of which that town was then a part, 16th August, 1794; died in Cambridge, Mass., 23d December, 1874. He was graduated at Harvard in 1814, studied theology at Cambridge, and was pastor of the Unitarian Church in Charlestown for twenty-one years. During this period he was active in his parochial duties and in advocating the cause of school and college education, lectured extensively and with success, and was a close student of literature and philosophy. In 1831-39 he was an editor of the *Christian Examiner*. He resigned his pastorate in July, 1839, and the following September became professor of moral and intellectual philosophy in Harvard, was elected its president in 1853, and held office till his resignation, in 1860. He devoted the remainder of his life to scholarly pursuits, and left his valuable library and \$15,000 to Harvard. That college gave him the degree of D.D. in 1835, and Yale, that of LL.D. in 1860. He published numerous sermons, addresses and lectures, including three series of lectures on "Natural Religion" and a course of Lowell Institute lectures on "The Philosophy of Religion;" "Sermons preached in the Chapel of Harvard College" (Boston, 1861); a "Memorial of Daniel Appleton White" (1863); and a "Memoir of Josiah Quincy" (1867). After his death a volume of his

"Discourses" appeared (1876). He also edited, as college text-books, Dugald Stewart's "Philosophy of the Active and Moral Powers" (1849), and Dr. Thomas Reid's "Essays on the Intellectual Powers, Abridged, with Notes and Illustrations from Sir William Hamilton and Others" (1850). See "Memorial" (Cambridge, 1875), and "Services at the Dedication of a Mural Monument to James Walker in the Harvard Church in Charlestown" (1884).

MEMBER OF CONGRESS FROM WOBURN: EDWARD D. HAYDEN.

Mr. Hayden was born in Cambridge, December 27, 1833. He attended the public schools in that place, and was afterwards sent to Lawrence Academy, in Groton, to be fitted for college. In 1850 he entered Harvard College, graduating with his class in 1854. He studied law at Harvard Law School, and in the offices of the late Chief Justice Chapman, in Springfield, and Ezra Ripley, in Boston. In February, 1858, he opened a law-office in Woburn, where he continued in practice until 1862, when he received the appointment of assistant paymaster in the United States Navy. He served in the Mississippi Squadron, under Admiral Porter, during the Vicksburg and Red River campaigns. In 1866 he returned to Woburn, and engaged in business in the firm of J. B. Winn & Co., in which he continued until 1875. In 1874 he was elected president of the First National Bank of Woburn, which office he held until 1890. Mr. Hayden was re-elected to the House for 1881, having been a member of the Massachusetts Legislature in 1880. He was a member of the 49th and 50th Congresses, representing the Fifth Massachusetts Congressional District. In Woburn he has held many local offices, selectman, library trustee, etc.

CHAPTER XXXI.

WOBURN—(Continued).

ECCLESIASTICAL HISTORY.

BY REV. L. THOMPSON.

THE Ecclesiastical History of Woburn is, in its beginnings, closely connected with that of Charlestown, of which Woburn was once a part, and, in its progress, with that of several other towns, which were once a part of Woburn. The founders of Woburn were all, or nearly all, from the early settlers of Charlestown. As early as 1640 some of these men, more adventurous than the rest, began to explore the "unknown northernness," sometimes called "the wilderness," though included within the bounds of Charlestown, and, till the date of its incorporation, October 6, 1662, called "Charlestown Village." It then in-

cluded Wilmington, Burlington and nearly all of Winchester. Led on by Edward Converse, a man of wonderful energy and ever-restless activity, and the builder of the first house, the first bridge and the first mill in the unsettled region, many followed, some of whom being, as the historian Johnson says, "shallow in brains," soon became faint-hearted and returned. The number of settlers, however, became, little by little, so numerous that they began, more and more earnestly, to entertain the thought of a church organization. Meanwhile the mother church at Charlestown became so seriously apprehensive that Charlestown itself would be depopulated by the departure of so many of her members as to raise objections to and decidedly discourage the proposals for a new settlement. And it was not till it was clearly seen that the tide setting in that direction could not be resisted, and the increase and permanence of the settlement were inevitable, that the consent of the First Church was gained to the proposed enterprise. Seven men, all members of the church in Charlestown, were, at length, appointed as a "committee" to effect, in the usual way, the outward and legal organization of a new church. These men were: Edward Johnson, Edward Converse, John Mousall, William Learned, Ezekiel Richardson, Thomas Richardson and Samuel Richardson—the last three being brothers. There were many besides these seven among the first settlers, both men and women, equally interested, who doubtless only awaited the accomplishment of this organization to become, with the seven organizers, members in full communion.

The organization was effected August 14, O. S., or August 24, N. S., 1642. Beside the Hon. Increase Nowell as the representative of the secular authority of the Colony, there were present the following messengers of the churches: Rev. Me-srs. Symmes and Allen, of Charlestown; Wilson and Cotton, of Boston; Shephard and President Dunster, of Cambridge; Knowles, of Watertown; Allin, of Dedham; Eliot, of Roxbury; and Mather, of Dorchester.

To the seven men appointed by the mother church to effect the organization, after making each for himself a confession of his faith and Christian experience, and after prayer and preaching by Mr. Symmes, the elders and messengers of the churches had opportunity to propose such questions as they thought proper. All questions being satisfactorily answered, they entered into the following

COVENANT.

"We that do assemble ourselves this day before God and his people, in an unfeigned desire to be accepted of him as a Church of the Lord Jesus Christ, according to the Rule of the New Testament, do acknowledge ourselves to be the most unworthy of all others, that we should attain such a high grace, and the most unable of ourselves to the performance of anything that is good, abhorring ourselves for all our former defilements in the worship of God, and other wayes, and resting only upon the Lord Jesus Christ, for attonement, and upon the power of his grate for the guidance of our whole after course, do here, in the name of Christ Jesus, as in the presence of the Lord, from the bottom of our hearts, agree together through his grace to give up ourselves, first

unto the Lord Jesus, as our only King, Priest, and Prophet, wholly to be subject unto him in all things, and therewith one unto another, as in a Church Body, to walk together in all the Ordinances of the Gospel, and in all such mutual love and offices thereof, as toward one another in the Lord; and all this, both according to the present light that the Lord hath given us, and also according to all further light, which he shall be pleased at any time to reach out unto us out of the Word, by the goodness of his grace; renouncing also, in the same Covenant, all errors and schismes, and whatever by-ways that are contrary to the blessed rules revealed in the Gospel, and in particular, the inordinate love and seeking after the things of the world."

"Every Church hath not the same for words: for they are not for a form of words."

After the solemn adoption of this Covenant, the little band, now duly organized, received from the messengers of the churches the right hand of fellowship in the name of the churches they represented.¹

The loss of the records of this church from its organization onward more than one hundred years is greatly to be deplored and is doubtless irreparable. But, from other sources, we learn that Rev. Thomas Carter was ordained the first pastor, November 22, 1642, and Edward Converse and John Munsall were chosen, probably earlier in the same year, the first deacons. The editor of Johnson's "Wonder-Working Providence" says, in his introduction, p. 92: "The wives and children who were communicants must have been as numerous as the heads of families. The early membership, therefore, of the Woburn Church, I think, was thirty persons at least."

The town having been "erected," and the church duly organized, the same council, with perhaps the exception of one man, accompanied again by the Hon. Increase Nowell, as the representative of the civil authority, were called on "the 22 of the 9 month following, or December 2d, N. S., 1642, to aid in the ordination and installation of Rev. Thomas Carter as the first pastor. The exercises appear to have been, in the main, similar to exercises on like occasions in these days. There was, however, one noted exception. Instead of calling upon messengers of other churches who were present, to officiate in the simple act of ordination by prayer and the imposition of hands, the church, jealous of their rights as an independent body, preferred to delegate two of their own members to do it on their behalf. It is perhaps not certainly known who the two men were, though it has been thought there were reasons for believing they were Edward Johnson and Edward Converse. After Mr. Carter had preached and prayed, according to the custom of the times, these men, in the name of the church, laid their hands upon his head and said: "We ordain thee, Thomas Carter, to be pastor unto this church of Christ."

Following this simple act of consecration, the exercises were continued by prayer from one of the ministers who were present.

It does not appear that there was any serious oppo-

sition to this departure from the common usage, on the part of the council, though it is quite likely that some had doubts of its propriety. But outside their number, there was, for some time, considerable dissatisfaction and demurring. Even Governor Winthrop had some misgivings about it and declared it "not so well and orderly as it ought."² Yet, at length, all acquiesced, and the peculiarity of the ordination never was a bar to the fellowship of the church with other churches, though, from that time to this, the case has often been referred to by writers on congregational polity as being, though not in itself necessarily a breach of genuine congregationalism, a nearer approach to pure independency than would generally be deemed desirable. So far as is known, the church, after its organization, was very prosperous. Johnson, writing in 1651, nine years later, says, "After this, there were divers added to this church daily," and the original members had been increased to "74 persons or thereabouts," the number of families being about sixty.³

The subsequent history of this church furnishes material enough for a volume, instead of the sketch now proposed. We can only give a brief account of its general character and standing, its pastors, its houses of worship, and its colonies.

So far as known to the writer, the church has never swerved from its original foundation. While many other churches, organized both before and after the date of its existence, have departed from the old confession of faith, this, through all changes and down through all the years of its history, has steadfastly adhered to the essential faith of the original members. It has had some seasons of trial, and one, perhaps two, when there was protracted and deplorable lack of unity and harmony. But, for many years, it has been one of the largest and most prosperous of the churches of New England. Its history has been marked by frequent revivals of religion, some of which were of great power and most valuable results. That which began in 1826 and continued uninterruptedly through more than two years, was by far the most remarkable. In its extent, its noiseless power, its duration and its wide-spread and far-reaching effects, it was wholly unprecedented in Woburn, and rarely, if ever, equaled in the country. During the years 1827-28 nearly 300 persons in the town, then having less than 1900 population, were admitted to membership in the church. Nearly all of this large number are now gone, but the very few who yet remain cherish the memory of those days with the deepest interest as without a parallel in their observation.

THE PASTORS OF THE CHURCH.—*Rev. Thomas Carter*, the first pastor, was born in England in 1610, probably at Hertfordshire, at or near St. Albans. He was matriculated at St. John's College, University of

³ "W. W. Providence."

Cambridge, April 1, 1626, and took his degree of Bachelor of Arts in January, 1630, and that of Master of Arts in 1633. In April, 1635, when still "a young man," he embarked with forty others for New England. Soon after his arrival he became a citizen of Dedham, taking the freeman's oath, March 9, 1637. He removed thence to Watertown, where he became an elder in the church.¹ He had a place assigned him by Mather in what is called the "Second Classis" of ministers.²

When he was first invited to preach in Woburn, November 3, 1641, he was a member of the church in Watertown, as well as an office-bearer, and doubt was expressed about the willingness of that church to part with him.³ By special invitation, he preached for the first time, December 4, 1641, his text being the 22d chapter of Genesis and his subject, "Encouragement to trust in the Lord for the means." This sermon seems to have encouraged the people to press their suit more urgently than ever, though he then and for several months subsequently, declined to accept their call. He, however, at length yielded to the strong persuasion of the Woburn Church, and accepted the position of minister with a salary of £80 per annum, which, in 1674, was increased by the addition of twenty cords of wood delivered annually at his door.⁴

The circumstances of Mr. Carter's ordination have already been narrated and need not be here repeated. Of his long ministry of nearly forty-two years, much might be written. The highest testimony to its excellence has been given by various writers. Johnson, in his history, describes him as a "reverend, Godly man, apt to teach the sound and wholesome truths of Christ," and "much increased with the increasings of Christ Jesus."⁵ Mr. Chickering, in his Dedication Sermon, says of him, "During his ministry there appears to have been the greatest harmony between him and the Society."⁶ And Mr. Sewall says, "There is abundant evidence that Mr. Carter was a very pious, exemplary man, an able and sound preacher of the Gospel and one whom God honored and prospered in his work. Under his ministrations the Church was greatly enlarged and built up, and the town flourished and was for the most part in peace."⁷

Before his settlement in Woburn, Mr. Carter had married Mary Dalton, of Watertown, where he owned a homestead and a farm. His well-known home in Woburn was on Pleasant Street, facing the southern portion of the old "Common" or Square. His house, built for him and presented to him by the town,

stood where the old Coolidge house, lately known as the Sylvanus Wood house, now stands. It is said that the original timbers of hewn oak that were in the house built in 1642 still remain in place as when first laid.

Mr. Carter had eight children, of whom Samuel and Judith were born in Watertown, and Theophilus, Mary, Abigail, Deborah, Timothy and Thomas in Woburn. Theophilus and Deborah died young. Samuel, the eldest of the eight, born Aug. 8, 1640, graduated from Harvard College in 1660, and was settled, for a short time, as pastor of the church in Groton. For some reason, not now fully known, he retired early from the ministry, and, besides being, at different seasons, a teacher, he sustained various offices in the government of the town. In 1672 he married Eunice Brooks and had eight children. He died in the autumn of 1693.⁸

Of the other children of Rev. Thomas Carter, Judith married, first, Samuel, son of Edward Converse, and, second, Giles Fifield, and died 1676. Mary married first, John Wyman, Jr. about 1671, who, being killed by the Indians at the Swamp Fight, December, 19, 1675, she married, second, Nathaniel Bachelor, of Hampton, N. H., in 1676, and died 1678. Abigail married John Smith, 1674, and died prior to 1684. Timothy married Anna Fisk, of Cambridge, 1680, and died 1727. Thomas married Margery Whitmore, of Cambridge, 1682, and died 1734.⁹

Rev. Thomas Carter died September 5, 1684. His wife, Mary (Dalton) Carter, did not long survive him. She died March 28, 1687.

Rev. Jabez Fox, son of Thomas Fox, of Concord, was born in that town in 1647, but, at a very early age, removed with the family to Cambridge, his father being as early as 1652, and repeatedly after that year, on the Cambridge Board of Selectmen. Here he lived in the historic house known in later years as the "Holmes Place," and here he died April 25, 1693. According to a tradition in the family, he was a lineal descendant from Rev. John Fox, the martyrologist.

Jabez Fox was educated at Cambridge, graduating from the college in 1665. On taking his second degree there, three years later, his public address consisted of a few lines of Latin verse.¹⁰ Made a freeman in 1667, he entered upon the work of the ministry and married. While yet at Cambridge, he was invited, in 1678, to serve as an assistant of Mr. Carter for one year. This invitation he accepted, but, before the year had expired, he received a unanimous call to continue his labors with an ultimate settlement in view. On the 5th of November, 1679, the parish voted to give him a call "to be their minister for his life-time." He was accordingly

ordained soon after this date, probably in the same month. The town agreed, November 10th, of the same year, to build him "a dwelling-house, twenty-four feet in length, eaightene feet wide, and thirteene feet stud, a stack of three brick chimneys, a cellar under it, and a leantwa at the chimney end, and so to finish the said hous and give it him."

December 8th, "The Town did agree, upon Mr. Fox's desire, to build the said hous fourty feet long. Mr. Fox being willing to allow toward the worke twenty and five pounds and five pounds more in case that it be not sufficient for what is expended for the making the said house sixteene feet longer than was agreed of by the Towne in the first place."¹

This house, situated on Pleasant Street, near the site of the Public Library, was occupied by Mr. Fox and his son and successor about seventy-six years.

Mr. Fox appears to have had the confidence and affection of the great body of his parishioners through life, though they sometimes occasioned him disquietude by allowing his salary to fall in arrears. At one time about seventy pounds were thus due to him, some of which was not paid till after his death. Doubtless, however, this seeming neglect was due to the extraordinary pressure of the times and other causes not specifically named.²

Mr. Fox died in Boston, of the small-pox, in the forenoon of the Lord's Day, February 26, 1702-3, but was buried in Woburn, where, in the oldest burying-ground, his grave-stone bears the following inscription:

<i>"Memento Mori</i>	<i>Engit Hora.</i>
Here lyes ye Body of Ye Reverend Mr Jabez Fox, Pastour of Ye Church of Christ in Wobourn 23 years, & Aged 56 years, Deceased Febr. Ye 28 th 1702-3."	

Mr. Fox married Judith, daughter of Rev. John Reyner, of Plymouth, 1636-54, and of Dover, N. H., 1655-60.³ After his death she became the wife of Colonel Jonathan Tyng, of Boston, who subsequently lived in Woburn, where he died January 19, 1724. His widow died June 5, 1736. The inscription on her monumental stone in the old burying-place on Park Street, is as follows:

"Here lyes Buried ye Body
of Mrs. JUDITH TYNG, wife
to Col. Jonathan Tyng,
formerly wife to ye Rev^d.
Mr. Jabez Fox, who Dy'd
June 5th Anno Domi 1736,
in ye 99th year of her Age:
A woman of Most Exemplary Vertue
& Piety; Rich in Grace, Ripe for Glory."

It is not known that any sermons or other writings of Mr. Fox were published, though there are still existing skeletons of two or more sermons preached in

Cambridge, which were committed to paper by friends, probably at the time of, or immediately after, their delivery. One was preached July 28, 1678, from 2 Timothy 2: 19. Another May 11, 1673, was based upon Ephesians 5: 16.⁴

Rev. Jabez and Judith (Reyner) Fox had five children: 1. John, born at Cambridge, May 10, 1678, his father's successor; 2. Thomas, born at Woburn, July 6, 1680, died July 10, 1680; 3. Thomas, born at Woburn, November 13, 1681; 4. Jabez, born at Woburn, December 2, 1684; 5. Judith, born at Woburn, June 19, 1690, and died the same year.

Rev. John Fox, son and successor of Rev. Jabez Fox, was born at Cambridge, May 10, 1678, and graduated from Harvard College in 1698. After serving as master of the Grammar School in Woburn from 1700 about two years and a half, until his father's death, February 28, 1703, he was invited to become the pastor of the church. He had already been, for several months, an assistant of Rev. Samuel Whiting, of Billerica, who was in enfeebled health.⁵ Ordained as pastor at Woburn, October 4, 1703, he retained his office and position till his death, December 12, 1756, but by his greatly impaired health he was often unable to preach. For fifteen years before his death he was totally blind. He, however, preached occasionally, notwithstanding these obstacles, and often "catechised" and instructed the youth who were accustomed to meet him at his house.

Rev. Edward Jackson was his colleague for many years, and died in office more than two years before the death of Mr. Fox. Rev. Josiah Sherman was also settled as his colleague nearly one year before the decease of the senior pastor.

Mr. Fox had sore trials beside those of personal infirmities. The lack of harmony between his first colleague and himself from the beginning of their connection, and the consequent unsettled and divided condition of the people, resulting at length in the organization of a new church, must have greatly saddened his last years. Yet there are not wanting decisive indications that his ministry was a useful one, and, for many years before the settlement of a colleague and the loss of his health and sight, one of marked success.

Mr. Fox married Mary Tyng, daughter of Honorable Edward Tyng, who died in France. She survived her husband several years, dying in February, 1764. There are still extant two sermons of Mr. Fox occasioned by the great earthquake of October 29, 1727, and founded on 1 Samuel 14: 15.⁶ Another sermon is extant on "time and the end of time."

Rev. John and Mary (Tyng) Fox were the parents of seven children, who, according to Sewall, were:—

⁵ Sibley's "Harvard Graduates," vol. ii., pp. 196-198.

⁶ Lawrence's "N. H. Churches," p. 320.

1. John, born February 13, 1704, "who, in early life, went to Ireland to live with a wealthy relative."

2. Jabez, born May 25, 1705. Alden, in his epitaphs mentioned him as "Hon. Jabez Fox, Esq.," as found in his monumental inscription. His first wife, who lived but a short time after her marriage, was from Boston. He married, second, Ann, widow of Phineas Jones, who died June 9, 1768. Mr. Fox graduated from Harvard College 1727, studied theology and entered upon the work of preaching, but was soon obliged by failing health to relinquish the profession. He removed to Falmouth (now Portland), Maine, where he spent an honorable and useful life, and was for several years a member of the Provincial Council of Massachusetts.

3. Mary, born October 26, 1706, married Rev. Hebijah Weld, of Attleborough, October 17, 1728.

4. Edward, born October 26, 1708, lost at sea on his passage to England.

5. Thomas, born April 7, 1711, a goldsmith at Boston.

6. Judith, born August 10, 1712, married Rev. Nathan Stone, of Southborough, October 31, 1734.

7. Jonathan, born March 26, 1716, married Ruth Carter, August 17, 1737; lived and died in Woburn.¹

Rev. Edward Jackson was the son of Deacon Edward Jackson, of Newton, and a grandson of Edward Jackson who came to New England about 1642, was made freeman in 1645 and settled in Newton, then a part of Cambridge, between 1642 and 1645.²

The sources of information in regard to Mr. Jackson are more limited than in the case of most of the pastors. Mr. Sewall seems to have exhausted them with comparatively small results. Born at Newton, April 3, 1700, and a graduate from Harvard College, 1719, he was ordained in Woburn, as colleague of Rev. John Fox, August 1, 1729, but died before the decease of the senior pastor, September 24, 1754, after a ministry of more than twenty-five years. He was never married.

It is not easy, after the lapse of more than 134 years, and with somewhat conflicting accounts of Mr. Jackson's ministry, to form an estimate of Mr. Jackson as a man which is entirely satisfactory, in any sense. Mr. Sewall says of him, "he was sound in doctrine, correct in morals, and his public labors and services were acceptable to his people, though he left nothing in print by which the style, matter and manner of his preaching can now be estimated."³ That, during a considerable part of his ministry, there were strifes and humiliating criminations, cannot be questioned. But the exact measure of blame which should be attached to the one or the other man or party, we may not now be able to determine. We

can only regret that any hearts and any homes were, even for a limited time, overshadowed by a cloud that was so ominously threatening.⁴

*Rev. Josiah Sherman*⁵ (William⁶, Joseph⁵, Captain John⁴, John³, Henry², Henry¹) was born in Watertown, April 29, 1729. His great-grandfather, Captain John Sherman, came from Dedham, England, in 1634, and was an early settler in Watertown during that year. Rev. Nathaniel Sherman, of Bedford, William Sherman, Esq., of New Milford, Connecticut, and Hon. Roger Sherman, of New Haven, Connecticut, one of the signers of the Declaration of Independence, were his brothers. He graduated from Nassau Hall, New Jersey, 1751, and received, during the same year, a degree from Yale College, and one from Cambridge in 1758.⁵

After studying theology with Rev. Dr. Bellamy, of Bethlehem, Connecticut, and Rev. Mr. Graham, of Southbury, in the same State, Mr. Sherman was ordained at Woburn, January 28, 1756, as colleague of Rev. John Fox, whose death occurred in a little less than one year afterward, Mr. Sherman thenceforward, till his dismissal, April 11, 1775, being the sole pastor.

Mr. Sherman was a man of rare ability. He found the people in a broken and unhappy condition, occasioned by the alienations and divisions during the ministry of his predecessor as colleague, but his eloquence and wondrous power soon drew all hearts together and the recently organized Third Church back into the old fold. History and tradition alike represent him as a master of eloquence that, in his time and neighborhood, had no equal. The house of worship, though considerably enlarged after his settlement, was crowded, and even the aisles and pulpits were thronged from Sabbath to Sabbath.⁶ Whenever he preached in Charlestown, as he occasionally did, there, too, he was sure to have a crowd of hearers so great as to suggest some extraordinary occasion. An old tradition, well remembered by some still, used to say that, on one occasion, a neighboring minister, less popular than himself, asked him why it was, that wherever and whatever he preached, he always so deeply moved the people, while he himself, though preaching the same gospel, could elicit next to no interest at all. Mr. Sherman replied by making this offer: "I will preach one of your sermons to your people and you shall preach one of mine to my people." The offer was accepted. And the result was that Mr. Sherman's people, ignorant of the arrangement, listened to what, as usual, when they heard the same preacher, they thought a dull

sermon, while his neighbor's people, also ignorant, were charmed with an extraordinary one.

Such being the character of the man and the eloquence of the preacher, it is not strange that the people of Woburn parted with him with great reluctance. But finding himself unable to support his family without a considerable addition to his salary a small increase having been repeatedly inadequate he requested a dismissal, which request he repeated and urged before it was finally granted. And even after his dismissal, an unsuccessful effort was made to induce him to return and be settled again.

Mr. Sherman, while in Woburn, lived in the large and still remembered house that stood on the east side of Main Street, near the present residence of the widow of the late Lewis Shaw. On leaving Woburn he removed to Milford, Connecticut, where he was for some time pastor of the Second Church. He thence removed to Goshen, in the same State, where he was also a pastor, and finally removed to Woodbridge, near New Haven, where he preached during the remainder of his life and now sleeps in death.¹

The inscription on the monumental stone at Woodbridge is as follows:

"In
Memory of The
REV. JOSIAH SHERMAN,
Minister of the Gospel,
Obt. Nov. 24th, A.D. 1789.
Æ. 60.

"The learned Scholar, the eloquent
Orator, the accomplished Gentleman,
the faithful Pastor, the kind Husband
and Parent, and the humble follower of
Jesus Christ. Piety adorned his useful
life, and in the moment of his painful
Death, enabled him to triumph in the
Hope of Heaven.

"Much impressed himself, as conscious
of his awful charge,"—"by him the violated
law spoke out its thunders, and by him in
strains as sweet as Angels use, the Gospel
whispered Peace." 2

It is not definitely known how many sermons or other addresses Mr. Sherman published. Three are extant. One was addressed to infidels. Others were on "The Redemption by Jesus Christ," and the "History of Melchisedec." In 1770, while at Woburn, he preached the Artillery Election Sermon from Ps. 149: 6.³ It is not known that this was published.

Mr. Sherman married, January 26, 1757, Martha, daughter of Hon. James and Elizabeth (Merrick) Minott, of Concord. They had six children, of whom the four oldest were daughters and the two youngest sons, all born in Woburn,—

1. Martha, born December 8, 1758, married, first, Rev. Justin Mitchell, of New Canaan, Conn., and second, Joseph Bartlett, of Albany, N. Y. (she was the grand-

mother of the Hon. Chauncey Mitchell Depew, of New York); 2. Elizabeth, born March 26, 1761, married John Mitchell, of Woodbury, Conn.; 3. Mary, born February 3, 1763, married Joseph Ives, of Conn.; 4. Susanna, born April 7, 1765, married John Baldwin, of Bloomfield, N. J.; 5. Josiah, born — 1770, married Hannah Jones, of Hartford, Conn., and settled in Albany, N. Y., where he was a highly esteemed merchant and an elder in the Presbyterian Church. He was the father of Rev. Charles S. Sherman, who, after graduating from Yale College in 1835, and from Andover Theological Seminary in 1838, was ordained as a missionary in Woburn, November 30, 1838. He was for some time a missionary in Jerusalem, Palestine, and is now living in Manchester, Conn. Two other sons of Josiah Sherman, Henry and Epaphras, after leaving Yale College, entered the profession of law. The former practiced in Hartford, Conn., in New York and in Washington, D. C., where he died March 24, 1879. The younger practiced chiefly in New York until his death there, January, 1886. 6. Roger Minott, born May 22, 1773, married Elizabeth Gould, of New Haven, Conn., December 13, 1796. At the age of sixteen he entered the Sophomore Class in Yale College, six weeks before the death of his father. By the aid of his uncle, Hon. Roger Sherman, of New Haven, who received him into his family, and by his own exertions in teaching, he was enabled to meet his college expenses and graduated, in 1792, with a high standing as a scholar. He immediately took an academy in Windsor and, at the same time, commenced the study of law under the Hon. Oliver Ellsworth. Subsequently he took a school in Litchfield, where he continued the study of law under the Hon. Tapping Reeve. In March, 1795, he was appointed a tutor in Yale College. He was admitted to the bar in New Haven, May, 1796. After practicing in Norwalk several years, he removed to Fairfield in 1807, where he resided nearly forty years, till his death, December 30, 1844. As a man, as a Christian, as a scholar, as a lawyer and a judge of the Supreme Court, he stood pre-eminent in his State, and was very highly esteemed wherever known.⁴

Rev. Samuel Sargeant.—After the dismissal of Mr. Sherman the church was, for nearly ten years, without a pastor. This destitution, together with the still remembered popularity of Mr. Sherman, made it exceedingly difficult for the people to agree upon a successor, and equally difficult for any man to fill the vacancy. Among the many who preached as candidates, at least four received a call to settle, but, in each case the candidate, evidently fearing to incur the risk, in the circumstances, of an affirmative answer, declined acceptance and settled elsewhere. In their sadly disheartening condition, the parish finally extended a call to Rev. Samuel Sargeant. This call,

⁴ Dr. Atwater's Funeral Discourse, pp. 9-11; Letter of Rev. Charles S. Sherman.

though not unanimous, was voted December 8, 1784, and it was not till January 24, 1785, that it was answered affirmatively. The ordination seems to have taken place March 14, 1785. Few pastors, at the outset of their ministry, have ever had a more unpromising outlook into the future. The people were divided, uneasy, discouraged and dissatisfied. If the minister had been the best in the country, he could hardly have expected or achieved success. And it was not necessarily to the discredit of Mr. Sargeant that he failed. So far as appears, he tried to do his duty and earnestly desired the welfare of the people. But he had scarcely entered upon his work before a series of agitations respecting him began which continued till its close, nearly fourteen years later. The wonder is that he remained so long, though it should not be forgotten that, in his day, there prevailed, in regard to the length of pastorates, ideas very different from those prevalent to-day.

Without attempting to go into the numerous details of the case, it is sufficient for our present purpose to say that the people voted, July 9, 1798, with the concurrence of Mr. Sargeant, to call a mutual council to consider their condition and give advice. The council convened September 25, 1798. After an address from a joint committee of the church and parish to the persons composing it, and due deliberation, the council gave their result. In view of the very complicated and threatening circumstances of the parish, they unanimously advised Mr. Sargeant to "ask for dismission on condition that the Church and people of his charge shall pay him nine hundred dollars, that sum being judged no more than a reasonable compensation for his relinquishing his contract." At the same time the council bore their testimony to the good moral character of Mr. Sargeant as a man, as a Christian and as a minister, which they declare to be unimpeached, "no charges having been offered of any immoral conduct, false doctrine, or criminal delinquency in office."

The council concluded by addressing wholesome and timely admonition and advice to the people, and commending them and the pastor to the blessing of God.

This result, especially in its recommendation of a compensation of \$900 to Mr. Sargeant, was not accepted by the people. After nearly a year of additional agitation, a compromise was made which put an end to the controversy, and Mr. Sargeant was accordingly dismissed, May 27, 1799, after a ministry of a little more than fourteen years.¹

Rev. Samuel Sargeant was born in Worcester, November 6, 1755. By the author of the "Descendants of William Sargeant," he is said to have been of the Malden family of Sargeants, but no very definite account of him is attempted. He graduated from Dartmouth College in 1783, and studied theology under

Rev. Professor Ripley, of Hanover, N. H. He was ordained at Woburn March 14, 1785, and dismissed May 27, 1799.²

According to a tradition in the Thompson family, he boarded, for some time, in the family of the widow of Daniel Thompson, the martyr-hero of Lexington and Concord, whose well-known house still stands on Main Street, corner of Clinton Street, Central Square. There is reason to believe that he subsequently lived in a house standing on the east side of Main Street, near the present residence of Dr. J. M. Harlow, or perhaps nearer the spot now occupied by the Episcopal Church. It is not known that he published more than one sermon, but a "Right Hand of Fellowship," which he gave to Rev. F. Reynolds at his ordination in Wilmington, October 29, 1795, was printed, with the sermon preached on the same occasion by the Rev. Charles Backus, of Somers, Conn., and the charge to the pastor by the Rev. Dr. Nathaniel Emmons, of Franklin, and is still extant.

After Mr. Sargeant was dismissed from the church in Woburn he removed to Chester, Vt., and without being settled over any church, he preached in various places and in different States, under the direction of the Connecticut and Massachusetts missionary societies. For several years he had also charge of the church in Chester, whose pulpit he regularly supplied, though not as a settled pastor. He died in Chester, June 2, 1818, at the age of 63.³

Rev. Samuel Sargeant married, May 10, 1787, Miss Nabby Blaney, of Malden, and four children were born to them in Woburn:

1. Nabby, born February 6, 1788; 2. Jabez, born February 1, 1789; 3. Phineas Osgood, born February 29, 1792; 4. Benjamin Blaney, born August 9, 1793.

From Sargeant's work on "Descendants of William Sargeant," we learn that Rev. Samuel Sargeant had a family of five sons, though the record is confessedly imperfect. The names given are—1. Jabez, a lawyer in Windsor, Vt.; 2. Samuel, who went West; 3. Benjamin; 4. Blaney; 5. Phineas Osgood.

December 18, 1889. Since the foregoing was written the writer has been informed by a letter from a friend in Chester, Vt., that Benjamin Blaney Sargeant died in that town November 29th, in his ninety-seventh year. The writer adds that for many years he was a sheriff, and that he once took the census of Windsor County, traversing the hills on foot.

Rev. Joseph Chickering.—During the interval between the dismission of Mr. Sargeant and the settlement of his successor nearly five years elapsed. Calls were, in the mean time, extended to Mr. Joshua Lane in 1801, and to Mr. Humphrey Moore in 1802, to assume the pastoral charge, but in each case the answer was in the negative.

At a meeting held December 5, 1803, the church

¹ Sewall's "History," pp. 433-446.

² "Descendants of William Sargeant."

³ Chester Town Record and Chester Church Manual.

voted a unanimous call to Mr. Joseph Chickering to become their pastor. In this call the town, on the 22d of the same month, unanimously concurred, and voted to give him an annual salary of \$650.00 and fifteen cords of good hard wood. On the 26th of January, 1804, the town voted that when, by reason of old age or other infirmity, Mr. Joseph Chickering shall be unable to perform the work of the gospel ministry, he shall then receive one-half of the aforesaid annual salary, to be equally apportioned on the money and wood during the time he shall stand in the connection of a gospel minister in the town of Woburn.¹

On the 12th of February following, Mr. Chickering signified his acceptance of the invitation, and he was accordingly ordained March 28, 1804, by a large council of the pastors and delegates of fifteen churches, Rev. Jabez Chickering, of Dedham, father of the pastor-elect, preaching the sermon.²

It was during Mr. Chickering's ministry that the third meeting-house was destroyed by fire and a new house erected on the site now occupied by the Unitarian Church. This house was dedicated June 28, 1809, the sermon, preached by the pastor, being published and still extant.

Mr. Chickering's ministry was attended by manifest tokens of Divine acceptance. He had warm friends; the attendance upon his ministrations was full and increasing; new and earnest interest was awakened in the work of various benevolent associations, and a large number of persons were added to the church, there being, during his ministry, 164. To human view it seems as if this prosperity might continue indefinitely. But the last few years of his pastorate became, through an unfortunate business transaction between him and a prominent member of his society, a source of great disquietude to him and of anxiety to his people. All efforts intended to restore peace failed, and, at length, amid the tears and sobs of a large part of the congregation the beloved pastor read, January 28, 1821, his resignation, and he was accordingly dismissed April 11th following. The council bore strong testimony to the moral, Christian and ministerial character of the retiring pastor, and cordially recommended him to any Christian community, wherever the providence of God might call him. The council also commended the church for the Christian spirit which had actuated them in the trying circumstances which had led to the severance of the tie that had bound them to a pastor whom they loved and, in other circumstances, would gladly have retained.

After leaving Woburn Mr. Chickering was installed, July 10, 1822, as pastor of the church in Phillipston, Mass., where he remained as pastor till July 16, 1835, when, at his own request, on account of enfeebled health, he was dismissed. He died in Phillipston, January 27, 1844.

Rev. Joseph Chickering, son of Rev. Jabez Chickering, was born April 30, 1780, in that part of Dedham which is now known as the town of Norwood, where his father was pastor of the Congregational Church. He graduated from Harvard College, 1799, studied theology with Rev. Professor Tappan, of Cambridge, and was ordained at Woburn, as before stated, March 28, 1804.³

Mr. Chickering was twice married. He married, first, September 1, 1805, Betsey, only daughter of Deacon John White, of Concord, Mass. They had five children:

1. John White, born March 19, 1808; graduated from Middlebury College, 1826, and from Andover Theological Seminary, 1829; for many years a beloved pastor in Portland, Me. Married, November 9, 1838, Frances Evelina Knowlton, of Phillipston. Of his children, John White, Jr., graduated Bowdoin College, 1852; was a pastor at Exeter, N. H., and is now professor in the College for the Deaf and Dumb, at Washington, D. C. Joseph Knowlton, graduated Amherst College, 1869; for some time professor in that college, and now (1889) residing in Washington. Rev. John W. Chickering, D.D., died suddenly at the house of a friend in Brooklyn, N. Y., December 9, 1888, when on his way to his winter home in Washington.
2. Joseph, born January 9, 1810; married at Phillipston, April 3, 1833, Emeline Jones, of Gloucester—who died September 25, 1886. Since 1835 he has resided at La Harpe and Oquawka, Ill. His present home is the latter place.
3. Ruth, born 1812; died October 27, 1815, aged three years and four months.
4. Henry, born 1814; died November 14, 1815.
5. Elizabeth, born October, 1815; died October 19, 1815. Mrs. Betsey (White) Chickering dying November 3, 1815, Rev. Joseph Chickering married, second, Sarah Abbott Holt, daughter of Jacob Holt, of Andover, and had other children: 6. Betsey, born May 3, 1818; unmarried and residing in Pittsfield, Mass.
7. Henry, born September 3, 1819; married, first, Martha, daughter of Ward Newton, of Phillipston; second, Eivira P. Allen, of Barre. He resided in Athol, Barre, North Adams and Pittsfield, where he died March 5, 1881. He was a printer by trade; was for many years proprietor of the *Berkshire County Eagle*, and for twenty years was postmaster of Pittsfield. He was a deacon in the First Congregational Church in Pittsfield, where his widow still resides. His only surviving son graduated from Amherst College, 1871, and is a lawyer in San Francisco, Cal.
8. Abbott, born December 6, 1821; died at Phillipston June 11, 1842.
9. Benjamin, born in Phillipston November 18, 1824; married there, May 21, 1846, Deborah Louisa, daughter of Tilly Baldwin. She died in Pittsfield September 1, 1863, and he married, second, October 5, 1865, Mary Safford Smith, daughter of Cyrus Smith, of Reading. Their only child, a daughter,

¹ Parish Records.

² Rev. S. Sewall.

³ Letter of Miss Betsey Chickering.

died in July, 1874, at eight years of age. Mr. Chickering resided for many years in Pittsfield, where, for a considerable number of years, he was the principal of Chickering's Commercial College,¹ and where he died August 3, 1889.

Rev. Joseph Bennett.—On the 19th of November following Mr. Chickering's dismissal a unanimous call to settle, as his successor, was extended by church and parish to Mr. Joseph Bennett, then a recent graduate from the Theological Seminary at Andover. Having signified his acceptance December 6th, he was ordained by a large council, January 1, 1822. Like similar occasions elsewhere at that time, it was a memorable day. Assembled on the Common, from all quarters, was an immense crowd of people, not one-fourth part of whom could find room for them in the church, even if they had desired it. The whole aspect of the place was that of a gala day. A procession of the council and members of the church and parish marched into the meeting-house, preceded by instrumental music, the players on instruments also performing at intervals select pieces during the protracted exercises.

The ministry of Mr. Bennett, continuing nearly twenty-six years, is so recent and so well remembered by a large number of the people yet living, that it seems unnecessary to go into details in an account of it. Mr. Bennett was a man of marvelous energy. Inheriting a perilous amount of nervous force, he was the *Boanerges* of the Woburn pulpit. There were occasions when he was like a war-horse on the field of battle. His commanding figure and his strong voice made him the "observed of all observers." On several occasions, when, in a crowded and somewhat tumultuous miscellaneous assembly, the moderator failed to secure a proper degree of order, he rose, and, with an air of majesty and a tone of startling significance, commanded silence, and instantly there followed a great calm, and business was quietly resumed.

The revival of religion, which began in the autumn of 1826, and continued through two years or more, was one of wondrous power, and resulted in an admission, during a single year, of 225 persons, and during the next year, 62, or 287 in two years, to the church. During his ministry in Woburn there were 760 additions. A new meeting-house was erected in 1849, and signs of external and internal prosperity were visible on every hand.

Doubtless it should be distinctly understood that no small part of the success attributed to Mr. Bennett was due, humanly speaking, to his excellent wife. She was a woman of rare qualities, always calm, self-poised and self-possessed, and, in every respect, just the helpmeet for such a man. She was often called, and admitted by him to be, his "balance-wheel." Having a remarkable control over him, she could, by a single quiet word, and often by a look, still his un-

due excitement and soothe his unsteady nerves as by a lullaby. And it was a sad day for him when death snatched her away. His work was done. He survived her for a short time, and even married again. But his excited nerves were never again quieted. His inherited and long approaching insanity led him at last, Nov. 19, 1847, to take his own life.

Rev. Joseph Bennett was born in Framingham May 13, 1798; graduated from Harvard College in 1818; studied theology at Andover; was ordained at Woburn Jan. 1, 1822; and, during the month of February following, married Mary Lamson, of Charlestown. He lived first in the historic house at North Woburn of late known as the Wheeler house, then in the historic Clapp house at Central Square. But his home, during most of his ministry, was in the house on Pleasant Street next to the new railroad depot. He had only two children,—

1. Joseph Lamson, born Nov. 8, 1823; graduated Amherst College, 1845; Andover, 1848; was pastor of Churches, at Hannibal, Mo., East Cambridge, Mass., Lockport, N. Y., Indianapolis, Ind., Springfield, O., Suspension Bridge and Spencerport, N. Y. He married Eliza Ann Tilson, of Boston, had four children, and died May 22, 1882.

2. Mary Lamson, born Sept. 14, 1829; married Rev. Thomas Morong, who graduated Amherst College, 1848; Andover, 1853; has been pastor at Pepperell, Mass., Iowa City, Iowa, Ipswich and since 1878 at Ashland, Mass. They have two children, one of whom, Arthur Bennett, graduated Amherst College, 1871, and is a physician in Boston.²

Rev. Jonathan Edwards.—During the month of March, succeeding Mr. Bennett's death, the church and society extended a unanimous call to Mr. Jonathan Edwards, of Andover, to the pastoral charge. On the 26th of May following the call was accepted, and Sept. 7, 1848, the pastor-elect was publicly ordained. The sermon was preached by Rev. Dr. E. N. Kirk, of Boston; the charge was delivered by Rev. Dr. Justin Edwards, of Andover, and the address to the people by Rev. Dr. John W. Chickering, of Portland, Me.

The ministry of Mr. Edwards was characterized by a gratifying degree of prosperity. The uniform urbanity and culture as well as fidelity of the pastor were met by respect, confidence and kindness on the part of the people. The salary was largely increased without solicitation, and nothing is known to have occurred to jar or mar the mutual harmony.

But, after more than seven years of useful labor, Mr. Edwards received an urgent invitation to engage in a new enterprise elsewhere, which seemed to him to promise, on the whole, a more satisfactory degree of usefulness, and the people reluctantly consented, at his own request, to release him. He was accordingly dismissed Jan. 9, 1856.

² Woburn Record of Births.—Biographical Record of the Amherst Alumni, p. 206, p. 227, p. 470.

¹ Letter of Miss Betsey Chickering.

Rev. Jonathan Edwards, son of Rev. Dr. Justin and Lydia (Bigelow) Edwards, was born at Andover July 17, 1820; graduated from Yale College in 1840; studied theology at New Haven and Andover Theological Seminaries, graduating from the latter in 1847. After spending an additional year at Andover as "Abbot Resident," and, in the mean time, accepting a call to settle in Woburn, he was ordained, as before mentioned, Sept. 7, 1848. Leaving Woburn early in 1856, he became, Feb. 14th of that year, the first pastor of the Plymouth Congregational Church in Rochester, N. Y. On the 1st day of January, 1863, he was installed pastor of the First Congregational Church in Dedham, Mass. Since 1876 he has been pastor of the Congregational Church at Wellesley Hills, Mass.

Mr. Edwards married, Aug. 31, 1848, at Augusta, Me., Frances Swan Bronson, eldest daughter of Hon. David Bronson, of Augusta. Their children, all born in Rochester, N. Y., are:

1. Augusta Bigelow, born Feb. 26, 1857; married Frederick W. Brooks Dec. 13, 1876.
2. Mary Newton, born Jan. 4, 1859.
3. Justin, born Nov. 30, 1861.¹

Rev. Daniel March.—Rev. Daniel March, recently from Brooklyn, N. Y., was the immediate successor of Mr. Edwards. A unanimous call having been extended to him August 18, 1856, he accepted it and was installed October 1st, following; the sermon being preached by Rev. Dr. A. L. Stone, of the Park Street Church, Boston. This pastorate, like that of his predecessor, was a highly prosperous and happy one, and though short—between five and six years—was rich in results. As, however, Dr. March, after a ministry of several years in Philadelphia, Pa., resumed his former charge in Woburn, which he still retains, a more extended notice of his connection with the church and society is here deferred and will be given farther on. It need only be said here that it was during his first pastorate in Woburn, and not, as stated in Sewall's History, in Dr. Bodwell's, that the present spacious church edifice was erected.

Rev. Joseph C. Bodwell.—Dr. March having been dismissed February 17, 1862, Rev. Joseph C. Bodwell, then of Framingham, accepted a unanimous invitation, voted October 6th of the same year, to become his successor, and was installed November 11th following. A written statement of his theological views and a verbal account of his personal experience were highly satisfactory, both to the council and to the people. Richly furnished by personal and professional training and culture, Mr. Bodwell entered upon his work with rare promise of usefulness. During a part of his subsequent ministry his happiness was somewhat disturbed and his usefulness more or less abridged by an untimely, if not wicked, interference of a few persons, led on by men who did not accept

his theological views and were only transient residents in Woburn. But the large majority of his people had the fullest confidence in him and, in various ways, manifested for him a warm affection. That he was a man of unusual culture and ability, none could deny, and the council that dismissed him August 3, 1866, bore the highest testimony to his character, as a genial man, a sound theologian, an able preacher, a successful pastor and a wise winner of souls to Christ. The council also warmly commended the church and society for their steadfast sympathy with him, their "warmest attachment and unwavering confidence."

But the urgent call from the Board of Trustees of Theological Seminary at Hartford, Conn., to a professorship in that institution, and considerations connected with the offered position, were accepted as unmistakable indications that God had for him there a more important field of usefulness even than the wide field in Woburn. And accordingly, amid the great regrets of his flock, he was dismissed and commended to those who were specially interested in his new sphere of labor.

Rev. Joseph Conner Bodwell, D.D., was born in Sanbornton, N. H., June 11, 1812, and was the son of Rev. Abraham Bodwell, pastor for many years of the Congregational Church in that place. He fitted for college mostly in his native town, where, at a very early age, he was a teacher. He graduated from Dartmouth College in 1833, and during the following year taught the academy at Haverhill, N. H., and in 1835-36 the Woodman Academy in Sanbornton. Encouraged and advised by Rev. Mr. Gibbs, of Haverhill, a native of England, he pursued his theological studies in 1836-37, at Highbury College, London. On the 3d of April, 1839, he was ordained pastor of the Independent Church, Weymouth, Dorsetshire, from which he was dismissed in 1845. In June, 1847, he was installed at Bury St. Edmund's, Suffolk. Dismissed from this charge in 1850, he returned to the United States, and June 30, 1852, he was installed pastor of the Congregational Church at Framingham, Mass. Dismissed November 5, 1862, he was installed at Woburn November 11th, following. He was dismissed from his charge in Woburn August 3, 1866, to become "Professor of Pulpit-Training and Pastoral Care" in the Hartford Theological Seminary, where he remained for seven years. He died of carbuncle at Southwest Harbor, Mount Desert Island, Me., June 17, 1876, and was buried in Sanbornton, N. H., by the side of his parents.

He received the degree of S.T.D. from his *alma mater* in 1864.

Dr. Bodwell published "A Pastor's Farewell to his Flock," preached in the First Congregational Church in Woburn, August 5, 1866; "The Preachers demanded in Our Day, and How to secure them," inaugural discourse as professor at Hartford; "Historical Address" at the centennial celebration of the San-

¹ Letter of Rev. J. Edwards.

bornton Congregational Church November 13, 1871. He was one of the founders of the *American Theological Review*, and one of four original proprietors of the *Boston Congregational Review*.

Dr. Bodwell married, May 16, 1839, Catharine Sykes, only daughter of John Sykes, Esq., of Highbury Park, London. Their children were:

1. Joseph Conner, born February 29, 1840, in Weymouth, Eng. He graduated from Dartmouth College 1863; was admitted to practice in the courts of Massachusetts, at Cambridge, 1864; graduated from Hartford Theological Seminary 1871; ordained at Thompson, Conn., March 13, 1872; installed over the Congregational Church there in December following; dismissed September 25, 1874, and installed over the church in Stockbridge, Mass., October 6th following. He has since labored in Leavenworth City, Kansas, two years, and has been, for some time, pastor of the Congregational Church in Bridgewater, Mass. He is now (1889) pastor of the Congregational Church in Lyndonville, Vt., where he was installed June 23, 1887. He married Lydia Anne, daughter of Deacon John R. Kimball, of Woburn, June 15, 1871;
2. Katharine Sykes, born in Weymouth, Eng., August 15, 1841;
3. Charlotte Elizabeth, born in Weymouth, Eng., September 3, 1843;
4. John Abraham, born September 13, 1844, died June 25, 1847;
5. Helena Jane, born in Islington, Eng., October 2, 1846, died November 27, 1846;
6. Herbert James Lovell, born at Bury St. Edmund's, Eng., June 24, 1849;
7. Albert Edward, born in Framingham, Mass., June 26, 1853.¹

Rev. Stephen R. Dennen.—After the dismissal of Dr. Bodwell, August 3, 1866, the church and society were without a pastor till June 24, 1868, when Rev. Stephen R. Dennen, who had accepted a call to succeed him, was duly installed. Rev. Dr. Thatcher Thayer, of Newport, R. I., preaching the sermon from Matt. 5: 17. Mr. Dennen, like his predecessor, had the advantage of ripe experience in the pastoral office, and his power, as an able and impressive preacher, was soon felt and acknowledged. During the interval of nearly two years which preceded his installation, the parish, though without a pastor, had enjoyed unusual religious interest and about sixty persons, mostly young, had been admitted to membership in the church. An encouraging degree of this interest continued for some time under the ministry of the new pastor, and those of only recent Christian experience at the time, especially needed the strong and instructive discourses with which he fed them. A good degree of prosperity, in various ways, continued to crown the labor of both pastor and people from year to year. But with another field in view, which he thought, on the whole, promised more satisfactory results, the pastor resigned his position and, at his own request, was dismissed December 27, 1871.

Rev. Stephen Rollins Dennen, D.D., was born in Poland, Me., November 6, 1826; graduated from Colby University in 1849; from the theological seminary at Bangor, Me., in 1852, and spent 1853 as resident licentiate at Andover. He has been a pastor in Providence, R. I., in New Haven, Conn., and in Lynn and Watertown, Mass., and now (1889) resides in West Newton.

Dr. Dennen married, November 2, 1854, at Thomaston, Me., Clara Whitney Ludwig, and their children were: 1. Clara Rollins, born at Watertown, December 14, 1856; 2. Lucy Whitney, born at Watertown, April 12, 1859; 3. William Ludwig, born at Watertown, October 22, 1860, died September 21, 1862; 4. Jane Whitney, born at Watertown, January 16, 1863; 5. Stephen Howard, born at Somerville, February 2, 1865, died at West Newton, November 1, 1888; 6. Walter Knight, born at Providence, R. I., April 22, 1868, died at Woburn, May 15, 1870; 7. Grace Atherton, born at Woburn, September 28, 1872.²

Rev. Henry S. Kelsey was installed pastor March 19, 1873. Rev. Dr. Webb, of Boston, preached the sermon; Rev. Mr. Bissell, of Winchester, gave the right hand of fellowship; Rev. Mr. McCollom, of Medford, gave the address to the people, and Rev. Dr. Wallace, of Manchester, N. H., the charge to the pastor. Mr. Kelsey also had been previously a pastor. His ministry in Woburn was short, it being only about three years and six months. During this time there were admitted, by profession and by letter, about 100 persons to membership in the church. He was dismissed, at his own request, October 8, 1876. Before coming to Woburn he had been pastor of churches in Granby, Mass., Rockville, Conn., and Holliston, Mass. After leaving Woburn he was pastor of the College Street Church, New Haven, Conn., and now (1889) resides, without charge, in Chicago, Ill.

Henry Sylvester Kelsey, son of Sylvester and Polly (Gates) Kelsey, was born at LeRoy, N. Y., December 5, 1830; fitted for college at Williston Seminary, Easthampton, Mass.; graduated from Amherst College 1855, and from East Windsor (now Hartford) Theological Seminary in 1857; was tutor in mathematics, Amherst College, 1857-60; professor of mathematics and physics, Beloit College, 1860-63. He married, first, Harriet A., daughter of Philip Schuyler, of Litchfield, Conn., October 8, 1861, who died August 3, 1865; second, Mrs. Eliza Leavitt Fiske, daughter of Rev. Aaron Foster, of East Charlemont, Mass., October 16, 1869. She was the widow of Samuel Fiske, A.M., a tutor in Amherst College.³

Rev. Daniel March, D.D.—Soon after Mr. Kelsey's dismissal in 1876, Rev. Dr. March, after a successful pastorate in Philadelphia, yielded to the strong and anxious desire of the people of his former charge in Woburn, to resume his residence and work among

² Letter of Rev. S. R. Dennen, D.D.

³ "Biographical Record of Amherst Alumni," p. 294.

¹ Russell's "History of Sanbornton, N. H.," pp. 42-44.

them. Moved by their destitute and, at the time, somewhat discouraging circumstances, he consented, at first conditionally, and with the mutual understanding that he should not immediately take the regular charge, but would ere long do it if it was deemed best. To this they gladly consented, provided only they might expect him after the proposed delay. At the expected time he came, and after about two years of stated labor as acting pastor, he accepted a cordial invitation to be reinstalled, and was accordingly installed by a large council, Jan. 22, 1879, in the same office which he had resigned seventeen years before. This position he still, and never more acceptably, fills in 1889.

Dr. March has been an extensive traveller; "The Land of the Midnight Sun," and the more prominent States in Europe, Western Asia, India, China, Egypt, and various islands of the sea have been visited by him. During a portion of 1887 and nearly all of 1888 he made the most prolonged and widely extended of all his repeated journeys.

Dr. March has also been a voluminous writer. Among his published works the following have been well and widely known: "Night Scenes in the Bible," "Our Father's House, or the Unwritten Word," "Home Life in the Bible," "From Dark to Dawn, or Second Series of Night Scenes in the Bible," "Walks and Homes of Jesus," "Days of the Son of Man," "The First Khedive, or Lessons from the Life of Joseph." Many sermons in newspaper and pamphlet form he has also published.

Rev. Daniel March, D.D., son of Samuel March, was born in Millbury, Mass., July 21, 1816. After spending some time in Amherst College, from 1834 to 1836, he left that institution and spent a year in other pursuits, but at length entered Yale College, from which he graduated in 1840. He has been a pastor in Cheshire, Conn., in Nashua, N. H., in Brooklyn, N. Y., and in Philadelphia, Pa., besides being twice settled as pastor in Woburn.

Dr. March married, first, Jane P. Gilson, of Proctorsville, Vt., Oct. 8, 1841, and she dying Feb. 27, 1857, he married, second, Anna B. Leconte, of Cheshire, Conn., April 29, 1859, who died in Woburn, April 8, 1878.¹

Dr. Daniel and Jane P. (Gilson) March had four children:

1. Anna P., born in Proctorsville, Vt., Oct. 13, 1842, and died in Philadelphia, Pa., Aug. 26, 1863.²
2. Daniel, born in New Haven, Conn., May 25, 1844, graduated from Amherst College in 1865, married, Oct. 3, 1878, Jean H. Stephenson, of Cambridge, N. Y., and is a physician in Winchester, Mass.³
3. Frederick William, born in Cheshire, Conn., March 6, 1847, graduated from Amherst College in 1867,

studied theology in Princeton, N. J., married, Sept. 13, 1880, Jennie, daughter of Dr. Thomas Hill, of Newton, Mass., and is a missionary of the Presbyterian Board in Syria.⁴ 4. Charles Augustus, born in Cheshire, Conn., Nov. 26, 1848, was a member of Amherst College, 1866-68, graduated from the University of Pennsylvania, 1870, and is a stenographer in the employ of the United States Government, Washington, D. C.⁵

HOUSES OF WORSHIP.⁶—The First Congregational Church and Society now worship in the sixth and by far the largest and most imposing structure ever occupied by them or their predecessors.

The first was doubtless very rude in appearance and small in dimensions. It stood on the southerly border of the Common and on the north side of a narrow lane which is now expanded into Common Street, leading from Pleasant to Main Street, and not far from the Armory and Municipal Building. The exact date of its erection has not been certainly ascertained; but it must have been previous to 1642, for the ordination of Mr. Carter in that year was doubtless within its walls. The house was so frail and inadequate to the growing wants of the people that in about thirty years it became necessary to take measures for the erection of another. In November, 1671, a committee was appointed to confer with carpenters in relation to it, and on the 20th of that month, after hearing their report, the town voted to build a new house forty feet square. In the autumn of 1672 it was ready for occupation.

The second house stood on the hill east of the Common and a short distance northeast of the "Zeb. Wyman" house and store, lately the home of Miss Ruth Maria Leathe. It was considerably more imposing than the first house, and was surmounted by a "turret" or cupola, in which was a bell. On the sides of the house within were galleries, which were constructed not at first, but from time to time subsequently as needed, and then in part by private parties. For more than forty years there were only two pews on the main floor of the house, and these were occupied by the families of the minister and deacons. The people generally, under the guidance of the "Seating Committee," were seated on benches with high backs, the men and women apart, and the boys on long benches on the sides of the house, under the windows.

In 1678 the house, proving too limited in capacity for the accommodation of increasing numbers, was enlarged. And in 1709 it was repaired and again enlarged by an addition of twenty feet to the east end. This house stood eighty years, and for fifty-eight years was the only place of worship for the

⁶ The material for this brief sketch is largely from Mr. Sewall's "History of Woburn," severely condensed, and from various old records, private papers, tradition and memory.

entire town, then including Wilmington, Burlington and Winchester.

The third meeting-house, after many delays and many changes of the proposed location, was built on the easterly side of the Common, not far from the building formerly occupied as the post-office, now the store of William H. Curtis, and near the flag-staff on the west side of the street (now Main Street). This house, according to a note found in the Family Record of Zebediah Wyman, was erected (or raised) in the first week in December, 1748, and its steeple was put up in June, 1749. Mr. Sewall says it was not fully completed for more than three years, and was "probably" finished about March, 1752. It is described as "58 feet long, 42 feet wide, with 24 feet post." After being used nearly sixty years, it was, on the night of June 17, 1808, destroyed by fire.

The fourth meeting-house is still well remembered by many of our oldest citizens. After the destruction of the third house, the people were prompt and zealous in their measures for erecting another. In one year from the loss of one, the other (June 28, 1809) was dedicated. Rev. Joseph Chickering, the pastor, preached an appropriate sermon from Acts 7: 48,—"The Most High dwelleth not in temples made with hands." The house stood on the site of the present Unitarian Church. It greatly exceeded either of its predecessors in capacity, architectural beauty and general appearance. But after it had been occupied a little more than thirty years, it was discovered that there was a degree of decay in the timber used in its construction that rendered, or was likely very soon to render, it unsafe. It was, therefore, taken down, and on the same site was erected, in 1840, another house.

The fifth meeting-house, like the fourth, on Pleasant Street, looking easterly upon the Common, was dedicated December 31, 1840, the sermon being preached by the pastor, Rev. Joseph Bennett, from Haggai 2: 9,—"The glory of this latter house shall be greater than of the former."

Such was the growth of the parish and the increased demand for seats to accommodate new families, that in less than twenty years it was found necessary to dispose of this spacious house and erect a much larger one. It became the property of the Unitarian Society, and by them has been so remodeled and beautified as to be almost beyond recognition by its former occupants.

The sixth and latest church edifice was erected during the first pastorate of Dr. March, and dedicated October 31, 1860. It is one of the largest in New England, and its conveniences are in all respects so excellent as hardly to leave anything to desire. Its location, on Main Street, corner of Church Avenue, is easily accessible. One hundred and fifty feet in length, eighty feet wide, with a steeple one hundred and ninety-six feet in height, it has a substantial and majestic aspect not often seen outside our large cities.

During the absence of the pastor (Dr. March, in 1887-88) this stately edifice was, at large expense, repaired and refurnished, and so was the more appropriate place in which, after his far-off journeyings, to welcome him home.

COLONIES FROM THE FIRST CHURCH.—In an account of the churches which, at different times, have gone from the old First Church and become distinct organizations, there should be special mention of the Second, the Third, the South and the North Churches. It is proper, however, to note the fact that the church in Wilmington was originally almost wholly, and the churches in Billerica and Arlington largely, composed of members who took letters from the First Church in Woburn.

Wilmington was for nearly a century a part of Woburn, and the people of that distant portion of the town worshiped with all the other inhabitants, near and remote, in the one and then only meeting-house in what has been called the Centre of the town. About three years after the incorporation of this northern portion of the town, then called Goshen, October 24, 1733, a new church organization was effected by seventeen men, and immediately after this act, performed, as was then the custom, by men only, the membership was increased by the addition of twenty-two other persons, men and women, making thirty-nine in all. Nearly all of these are believed to have taken letters from the old Woburn Church, one of them, James Thompson, having been a deacon of that church, as he was the first deacon chosen by the Wilmington Church. But as at the date of organization the town was a separate municipality, we do not propose further to trace the history.¹

It may properly be said here that the Congregational Church in Billerica, organized in 1829, embraced originally a considerable number of persons who had previously been members of the Woburn Church, including one who became the first deacon of the new church.

The church in West Cambridge (now Arlington), organized in 1842, also embraced a considerable number of members of the Woburn Church, and among them Deacon Luke Wyman, one of its officers.

We come now to the colonies whose separate organizations were within the boundaries of Woburn.

The Second Church.—This church was organized October 29, 1735, in that part of Woburn which, for some time previously and for more than sixty years subsequently, was known as Woburn Precinct. A meeting-house was erected in 1732, but for some time previous to this the people met for worship in the house of Simon Thompson, near the centre of the present town of Burlington.

Following the usual custom of the times, the church was organized by men only, ten of whom, in-

¹ "Wilmington Church Manual." Rev. D. F. Noyes' Historical Address.

cluding Rev. Supply Clapp, the first minister, signed the covenant at the date given above, or November 8, 1735, N. S. The names were as follows: Supply Clapp, George Reed, Ebenezer Johnson, Samuel Walker, James Thompson, Joseph Pierce, Edward Johnson, William Bruce, Simon Thompson, John Spear.

Two of these ten organizers—Samuel Walker and George Reed—had been deacons in the First Church. They were soon followed by twenty-three other persons, thirty-three in all, most of them having been dismissed from the First Church for this purpose.¹

The first minister of this church was Rev. Supply Clapp. He had preached for the first time as a candidate December 15, 1734, and he received a call to settle March 5, 1735, more than six months before the church was organized. He accepted the call "upon conditions," May 19th, and "in full" August 25th of the same year. He was accordingly ordained pastor, October 29, 1735, the day on which the church was organized, and he remained in office twelve years, or till his death, December 28, 1747.

Mr. Clapp, the son of Deacon Samuel and Mary (Paul) Clapp, of Dorchester, was born in that town June 1, 1711. Graduating from Harvard College in 1731, he immediately engaged in the work of teaching in his native town. This work he followed two or three years, preparing himself in the mean time for the higher work of preaching. In 1734 he occupied for most of the year a pulpit in Roxbury, going thence to Woburn. His first sermon, after his ordination, was founded upon Luke 12: 42, 43, "Who then is that faithful and wise steward, etc."

Mr. Clapp married August 11, 1737, Martha Fowle, daughter of the wife of Deacon Samuel Walker, by a previous marriage. A little more than two years after Mr. Clapp's death she married Nathaniel Thwing, of Boston, whose son James, seven years later, married her oldest daughter, Martha Clapp.

Mr. Clapp was a man of very feeble constitution, and was often seriously ill. He died when comparatively young, between thirty-six and thirty-seven years of age. He was highly esteemed as a good man and a faithful minister of Jesus Christ. On his gravestone in the old cemetery in Burlington is the following inscription:—

"Here lie interred the Remains of the
Rev^d. Mr. Supply Clapp, late Pastor
of the 2nd Church of Christ in Woburn,
Who departed this Life
December the 28th, 1747,
in the 37th Year of his age,
and the 13th of his ministry.
He was a good Christian, and a faithful
Pastor, and being dead Yet Speaketh,
Especially to the People that were
his charge, Saying, remember how
Ye have received and heard, etc.
hold fast."²

¹ Letter of Mr. Samuel Sewall.

² "Clapp Memorial," pp. 19-21.

Rev. Supply and Martha (Fowle) Clapp had three children:—

1. Martha, born August 6, 1738, died in 1807; she married James Thwing, and had children:—Nathaniel, Supply, James, Rebecca and Samuel. Of these, Rebecca married William Furness and was the mother of Rev. William H. Furness, D.D., of Philadelphia, Pa.

2. Supply, born January 3, 1742; he lived in Portsmouth, N. H., and was never married. Died March 24, 1811, aged sixty-nine years.

3. Samuel, born about June, 1745, lived in Boston, where he died in 1809.³

The compiler of the "Clapp Memorial" says, "The children of Rev. Supply Clapp ever retained a grateful recollection of their native town; they made frequent visits to it, lingering about the spot which was the scene of their childhood. About 1790 they presented the church, over which their father had labored, a large folio Bible for the use of the pulpit."⁴

Mr. Clapp's immediate successor was Rev. Thomas Jones. He was the son of Ebenezer and Waitstill Jones, of Dorchester, where he was born April 20, 1721; graduated from Harvard College 1741, and during the same year taught the school in his native town, at the rate for the first quarter of £85 per annum, and for the next three months at the rate of £95, probably old tenor money. He also taught in 1742. He was ordained and installed as pastor of the Second Church, January 2, 1751, Rev. Ebenezer Gay, of Hingham, preaching the sermon. After a ministry of a little more than twenty-three years, he died suddenly March 13, 1774. While engaged in the Sabbath morning service he was stricken with apoplexy in the pulpit, and was immediately carried to his home, where, at sunset, he expired, much lamented by his people. His widow survived him many years, and died at the great age of ninety years, in consequence of a fall in 1814.⁵

Rev. Thomas Jones married Abigail Wiswall, of Dorchester, September 5, 1751. They had three children:—1. Lucy, baptized July 8, 1753, married Rev. Joseph Lee, of Royalston. 2. Martha, born May 17, 1758, married Rev. John Marrett, the successor of Mr. Jones as pastor of the Second Church. 3. Mary, twin of Martha, born May, 17, 1758, married Edward Walker, of Burlington.

Rev. Samuel Sewell, in 1857, says of the house in which Mr. Jones and his two immediate successors lived: "The house I live in was purchased by Mr. Jones soon after his ordination, was his dwelling while he lived the abode of his widow till her decease, and also of her son and daughter Marrett; so that it has been a ministerial abode above a century. And it is a memorable house, as the place of refuge to

³ "Clapp Memorial," p. 21. "The Thwing Family," p. 24.

⁴ "Clapp Memorial," p. 21.

⁵ "Am. Qy. Register," vol. xi, p. 379 and p. 392, and "History of Dorchester," pp. 521-525.

Hancock and Samuel Adams on the 19th of April, 1775.¹

Mr. Jones was succeeded by Rev. John Marrett, the son of Amos and Mary (Dunster) Marrett, of Cambridge, where he was born September 21, 1741. He was a direct descendant from one of the first settlers of Cambridge and also from Rev. Henry Dunster, the first President of Harvard College. Having graduated from Harvard College in 1763, he was ordained and installed pastor of the Second Church December 21, 1774, and died in office February 18, 1813.²

Mr. Marrett is supposed by his son-in-law, Rev. Samuel Sewall, to have studied divinity at Cambridge, where he resided several years during the interval between his leaving college and his settlement at Woburn Precinct. At the time of his ordination he had likewise a call to take charge of the church in Topsfield.³

Mr. Marrett married Martha, a daughter of his predecessor, Rev. Thomas Jones, December 16, 1779. He had an only son, who died in infancy, and, at his death, February 18, 1813, left an only daughter, Martha, who became the wife of his successor, Rev. Samuel Sewall. Mrs. Marrett died September 11, 1803.

It is not the object of this sketch to trace the history of the Second Church of Woburn after it became the First Church of Burlington, incorporated as a separate town in 1799. We can only say here that Mr. Marrett was succeeded, in 1814, by Rev. Samuel Sewall, who remained in office, honored and esteemed by all who knew him, till 1842, when, at his own request, he was released from service, but continued to reside in Burlington till his death, February 18, 1868.

It is worthy of mention that the house of worship, built in 1732, is still, in 1889, occupied as it has ever been from the first. It was, however, remodeled in 1846, and again in 1888, and is now more attractive and convenient than ever, and dearer than ever, as the place where the fathers worshiped one hundred and fifty-seven years ago.

The Third Church.—It is not possible to give an intelligible account of the Third Church without assuming the difficult and unwelcome task involved in at least a brief description of the long-continued controversy that led to it. Allusion has already been made to a serious alienation between Rev. John Fox and his colleague, Rev. Edward Jackson. It was a source of great trouble for many years, and gradually disturbed the peace and prosperity of the entire parish. Doubtless the greatly enfeebled health of the senior pastor, which often disqualified him for any share in the active work of a pastor, and, added

to this, his total blindness during the last fifteen years of his life, complicated, in some measure, the mutual relations of the two men. Even before his loss of sight, Mr. Fox, in an important communication, described, in terms which long-continued suffering made strikingly pathetic, his almost utter helplessness at times and his general disability for labor. And after the added privation, involved in his blindness, came upon him, his case seemed sufficiently hopeless to elicit universal sympathy instead of censure for failing to do his share of the mutual work. This claim for sympathy was the more emphatic, when to the reality of his sufferings, as related by him, responsible physicians sent their unqualified testimony.

But, besides all this, there seems to have been an utter incompatibility between the men—a striking lack of congeniality in each for the other. Mr. Fox was much the older, more grave, more reverent, and, to use a common phrase, "more ministerial," than Mr. Jackson. So far as appears, he was also more conscientious, more self-respecting and more deeply religious.

Mr. Jackson was comparatively young, lacking in moral balance, careless in the use of language, and often very severe in his criticisms of Mr. Fox.

Within the past two years a large collection of valuable papers have been deposited in our Public Library, which, after being, for several of the later generations, unknown to the people of Woburn, have proved to be a new revelation touching this old controversy. They were discovered by Hon. Joseph B. Walker, of Concord, N. H., among the papers of Rev. Timothy Walker, the first minister of that place and a native of Woburn, and they were kindly placed by him in their present accessible position.⁴

It is not possible nor necessary here to go into details in our mention of these papers; but it is proper to say, in general, that the controversy which, to Mr. Sewall and others, once seemed, in some respects, inexplicable, receive, in the light they shed, an explanation which is sufficiently plain to be painful in a high degree. It is evident from them that Mr. Fox sought repeatedly and earnestly, both by proposals to Mr. Jackson and by correspondence with others whose kind mediation he solicited, to heal the open wounds. Rev. Dr. Coleman and other ministers in Boston also labored in vain to effect a reconciliation. But, strangely, Mr. Jackson seems to have refused every overture; had no confession to make, no apology to offer and no proposal to suggest

¹ "History of Dorchester," pp. 524-525.

² "Am. Qy. Register," vol. XI, p. 392, and "Letter of Samuel Sewall, Esq."

³ "Am. Qy. Register," vol. XI, p. 392, and "Letter of Samuel Sewall, Esq."

⁴ To these Walker Papers may be added a pamphlet of six pages in the form of a letter dated Woburn, September 13, 1747. It is without signature, printed about 1750, and was lately presented to the Library by Isaac Brooks Dodge, of Amherst, N. H. No other copy of it is known to exist. It relates wholly to the controversy between Mr. Fox and Mr. Jackson, and, so far as it goes, it essentially corroborates the statements found in the Walker Papers and gives reasons for the organization of the Third Church.

for an adjustment of existing difficulties in any feasible way. Meanwhile grave and numerous charges were made against him, by one and another of the people, of conduct which, if not wholly unchristian, was, at least, if the charges were sustained, highly impudent and unbecoming his office and profession. Mr. Jackson, too, brought charges against Mr. Fox, particularly of writing to him a scurrilous letter, which Mr. Fox, on the other hand, instantly and utterly denied ever writing.

While this unhappy controversy was going on, a considerable number of the people, most dissatisfied with Mr. Jackson, after various hindrances and delays, separated from the parish and received the necessary permission to form another, and organized a new church, which, the church at Woburn Precinct being the Second, should be known as the Third. Deferring more particular notice of this new organization for the present, it seems proper here to note the fact that it did not and, in the nature of the case, could not, bring peace to those who remained in the old parish. Mr. Fox was still the senior pastor and Mr. Jackson was the same as before. Their relations to each other were none the less unhappy, and the sad work of dissension went on.

About three months after the organization of the Third Church, Mr. Jackson, goaded on every side by the outspoken or whispered criticisms of the people, called an *ex-parte* council of six ministers and their delegates to consider his case and give advice. It seems strange, in view of the circumstances, and especially in view of the refusal of the church to join in the movement, that any council should have been found willing to undertake the difficult and dangerous and even thankless work. It is charitable to believe that they but faintly understood the nature of the enterprise. They, however, assembled. The charges that they took into consideration were numerous, and some of them were very serious. In reading their Result, which is very long and minute, one would, if the subject were not so serious, be tempted to smile at what seems to be a special painstaking to preserve a prudent equipoise between the two ministers, the two parties, and the measure of approval and censure for the man who had called them together. Yet after all their nice and praiseworthy adjustments of the balance, there seems to be a preponderance of censure, either expressed or implied, for Mr. Jackson, and a very cautious and apparently kind reference to Mr. Fox. On the whole, one cannot well avoid the conviction that he who called the council, after being "weighed," is found "wanting." They say they have found Mr. Jackson blameworthy to some extent and expect him to confess it and behave himself thereafter with Christian propriety. The church is exhorted to act wisely and kindly, bury the past and the new Third Church and Society are called upon to consider their course and its divisive consequences.

So far as appears, this elaborate Result had not the

weight of a feather in the scale of public opinion. The unhappy schism remained. There was, perhaps, several years later, a slight and transient change in Mr. Jackson's favor. From some obscure origin a charge of scandalous immorality against him was found to be in circulation. Too hastily and very unwisely the people of the new society, including their minister, accepted it for truth and helped to circulate it as such. The result proved their mistake. Mr. Jackson was publicly vindicated, and Mr. Cotton, the minister of the Third Church, publicly confessed himself to have been deceived and in the wrong. This sad affair and the vindication of its intended victim, did not long precede his death. In the autumn of the same year Mr. Jackson died, and all controversy with him ended. Most fortunately, or rather providentially, his successor, as Mr. Fox's colleague, was Rev. Josiah Sherman, a man of great wisdom, of unblemished reputation and of unquestionable piety. Being also an orator of almost peerless eloquence, he soon drew all parties to himself. The aged senior pastor and the people were alike moved by his wondrous power, and, more strange than all, as already related, the recent Third Church organization was abandoned, the minister voluntarily retiring from his charge, and the people returning to the old church and parish.

The way is now prepared for a more particular notice of the Third Church.

On the 17th of September, 1746, a council, called for the purpose of organizing, if thought best, this church, after hearing and duly considering the statements bearing upon the case, adopted, with only one dissentient vote in relation to one article, the following

RESULT.

"The Result of a Council of seven Churches met here at Woburn to embody the new Society into a Church state and to hear the grounds and causes of their separation from the First Church in said Woburn, Edward Jackson, pastor:—

"At the desire of a number of the inhabitants, several of them members of the Church there and some of other churches, dissatisfied at the conduct of their minister, the Rev. Mr. Edward Jackson, and being sett off a distinct Society by the General Court applied to us for advice and assistance in embodying into a Church State.

"After many prayers to God for his direction and several days unsuccessful endeavors with Mr. Jackson and the Church to bring them to join on reasonable terms with their aggrieved brethren in calling a Mutual Council; and hearing what the dissatisfied had to lay before us, we came to the following Result, viz:—

"It appears to this Council that Mr. Jackson's conduct, in many articles, has been very offensive and the dissatisfied have been unreasonably denied proper means of redress in their grievances and have, therefore, just and sufficient cause to withdraw from him as their pastor, and that it is advisable for them now to embody into a Church State.

"The Church in this place, not having, when desired, objected any particular of disorderly walking against them, we heartily lament the deplorable circumstances in which we find the people of this Precinct, broken into parties, and earnestly exhort all concerned to examine themselves and be deeply humbled for all that has been amiss in their temper and behaviour towards each other. Seeking God's pardon and grace, exercise mutual Christian forgiveness and endeavor by all means the recovery and preservation of the unity of the Spirit among them in the bonds of peace. Amen.

"NATHANIEL EELLS, Scituate, Moderator.

"DANIEL LEWIS, of Pembroke,

"JOHN BARNARD, of Andover,

"EZEKIEL GAY, of Hingham (except the article of embodying *now* in a Church State),

"SITARIAMUS BROWN, of Scituate,

"STEPHEN CHASE, of Lynn End,

"Signed also by all their messengers."

"The solemn Covenant, entered into at the time of Embodying the Church, was read distinctly by the Moderator of the Council and subscribed by those that were embodied as follows, viz. :—

"We, whose names are hereunto subscribed, being desirous of embodying into a particular Church of Christ in order thereunto; We do, in the presence of God, the holy angels and this assembly, solemnly, seriously and sincerely, so far as we know our hearts, this day avouch the Lord Jehovah, the only living and true God, to be our God. We take God the Father, to be our Father and Sovereign; God the Son to be our Saviour and Redeemer, our Prophet, Priest and King and only Mediator of the Covenant of grace, and God the Holy Ghost to be our Sanctifier and Comforter. And we give up ourselves one unto another in the Lord, solemnly promising by God's gracious assistance to walk with Him and one with another in a Church relation in ways of Holy Communion and due observation of, and subjection to, all Christ's commandments and ordinances. Amen."

Thirty-eight persons subscribed and assented to the covenant, of whom twenty-three were females and fifteen males, as follows:

Roland Cotton, John Lock, Gershom Flagg, John Russell, Samuel Carter, Zachariah Flagg, John Carter, members of the First Church.

John Fowle, Joseph Richardson, Jr., Jacob Wright, Philip Alexander, Gershom Flagg, Jr., Peter Wyman, Samuel Tidd, James Sawyer, members of other churches.

Mary Fowle, Joanne Alexander, Elizabeth Flagg, Mary Sawyer, Sarah Kendall, Sarah Richardson, Mary Fowle, Phebe Tidd, Mary Richardson, Phebe Richardson, Isabel Bruce, Mary Fowle, Sarah Ames, Sarah Winn, Abigail Carter, Sarah Sawyer, Abigail Richardson, Pegg Grigree, members of the First Church.

Martha Richardson, Betty Flagg, Elizabeth Alexander, from other churches.

There are found but meagre data for the brief subsequent history of this church, its records being long since lost. John Leathe was chosen deacon and was also parish clerk. Rev. Josiah Cotton, previously a pastor of the church in Providence, Rhode Island, was installed pastor of the Third Church, July 15, 1747. The congregation worshiped in an unfinished building nearly opposite the old and still remembered Plympton House on Main Street. Not long after the settlement of Mr. Sherman, who lived in this house, Mr. Cotton became aware that his own people were increasingly attracted by the preaching of the popular successor of Mr. Jackson, and inclined to re-unite with the First Church and Parish. This measure he did not oppose, and wisely resigned his office as pastor. He was dismissed June 30, 1756. The re-union of the two churches soon happily followed, and Deacon John Leathe, of the Third Church, was ere long chosen deacon of the re-united church.

Rev. Josiah Cotton, the only pastor of the Third Church, was a son of Rev. Roland Cotton, of Sandwich. His grandfather, his father and three of his brothers were also ministers of the Gospel, and were

descendants from Rev. John Cotton, minister of the First Church, Boston. Rev. Josiah Cotton was born in Sandwich, June, 1703, and graduated from Harvard College, 1722.¹ After leaving Woburn he was installed at Sandown, New Hampshire, November 28, 1759, and died there May 27, 1780.²

THE SOUTH CONGREGATIONAL CHURCH.—The largest colony that has ever gone from the First Church was that which, November 19, 1840, organized a new church in that part of Woburn which, in 1850, became a separate municipality bearing the name of Winchester. This colony, numbering one hundred and two persons, included many of the most valuable members and three of the six deacons of the mother church. Deacons Nathan B. Johnson, Benjamin F. Thompson and Marshall Wyman had long been pillars in the old church and their names were synonyms for consistent Christian character and usefulness wherever they were known. It is not strange, therefore, that the church parted with such men as they and those they represented with reluctance. But, after much hesitation and some delay, they consented and bade the new enterprise a sincere God-speed.

A council was called which was convened November 19, 1840. After the customary preliminaries, they proceeded to organize and recognize the new church. Following an invocation by Rev. Mr. Dennis, Rev. Jacob Coggin, of Tewksbury, a native of Woburn, offered the consecrating prayer, Rev. Reuben Emerson, of South Reading, gave the charge, and Rev. Joseph Bennett, pastor of the mother church, offered the concluding prayer. In the celebration of the Lord's Supper which followed, Rev. Messrs. Emerson, the moderator, Cleveland and Bennett officiated.

A house of worship having been erected in 1840, was dedicated December 30th of that year to the worship of God, Rev. Daniel Crosby, pastor of the Winthrop Church in Charlestown, preaching the sermon.

The church, after an unsuccessful effort to obtain the services of Rev. James Boutwell, as pastor, extended, in the spring of 1841, a unanimous call, in which the society unanimously concurred, to Mr. George P. Smith, of Salem, to assume the duties of the pastoral office. He accepted the invitation and was ordained June 17th following.

Rev. T. P. Field, of Danvers, offered the invocation and read the Scriptures; Rev. Reuben Emerson, of South Reading, offered the introductory prayer; Rev. Dr. Nehemiah Adams, of Boston, preached the sermon; Rev. J. Mann, of Salem, offered the ordaining prayer; Rev. J. Towne, of Boston, gave the charge to the pastor; Rev. Abijah R. Baker, of Medford, expressed the fellowship of the churches; Rev. Joseph Bennett, of the First Church, made the address to

¹ "Sewall's History," pp. 337-338.

² Lawrence's "New Hampshire Churches," p. 132.

the people; Rev. W. J. Budington, of Charlestown, offered the concluding prayer.

Two original hymns, written for the occasion by the wife of the pastor of the First Church, were sung as peculiarly appropriate parts of the service.

At a meeting of the church, held December 31, 1840, Nathan B. Johnson, Benjamin F. Thompson and Marshall Wyman, who had been office-bearers in the First Church, were chosen as the first deacons of the South Church. And in January, 1841, when the Sabbath-school was organized, Deacon Benjamin F. Thompson, who had been also the superintendent of the school in the First Church, was chosen to the same office in the new organization.

The ministry of Mr. Smith, though short, was one of vigor and great usefulness. A delightful harmony and a "mind to work" pervaded the church, which at once took rank among the most active and efficient in every Christian enterprise.

To the great regret and deep sorrow of all, the young pastor, worn with care and heavy bereavement in his family, felt under the necessity of resigning his position and even of repeating his request for a release. He was accordingly dismissed March 11, 1845.

Mr. Smith was succeeded in the pastoral office by William T. Eustis, Jr., of Boston, who was ordained and installed April 8, 1846, Rev. Dr. R. S. Stows preaching the ordination discourse. Mr. Eustis remained in the pastoral office less than two years. He was dismissed January 27, 1848, and became pastor of a church in New Haven, Conn.

Mr. Eustis was followed by Rev. John M. Steele, who was ordained August 10, 1848, and dismissed February 11, 1852.

As South Woburn was incorporated in 1850, as a separate town, bearing the name of Winchester, the South Church of Woburn may more properly, from this year onward, be described as the First Church in Winchester, and, of course, belongs to the history of that town.¹

Congregational Church at North Woburn.—In the month of September, 1846, a number of persons, then residing in North Woburn and accustomed to attend church at the Centre village, began to consider the propriety and feasibility of establishing separate religious worship among themselves. Securing permission to occupy for this purpose the large upper room of the village school-house, and bespeaking the services of Rev. Samuel Sewall, of Burlington, there was preaching there for the first time, October 11th of that year. The service from Sabbath to Sabbath being well attended and increasingly hopeful, the arrangement continued for three years. In the mean time a religious society was legally organized, March 1, 1849, and in June following, the foundations were

laid for a house of worship, which was dedicated October 11th of the same year. On the 22d of November following, an ecclesiastical council, consisting of Rev. Jonathan Edwards of the First Church, Rev. Barnabas M. Fay of the church in Wilmington, Rev. Harrison G. Park of the church in Burlington, and their respective delegates, Deacons Stephen Richardson, Benjamin Foster, John Marion and Mr. Sumner Richardson, delegate from the church at South Woburn, convened for the purpose, if deemed proper, of organizing an Evangelical Church of the Congregational denomination. Forty persons presented themselves and offered their letters of dismission from other churches, for the purpose of uniting with the proposed church. Of these forty, whose autograph signatures are appended to the request, twelve were males and twenty-eight were females. Thirty-three were from the First Church of Woburn; two were from the Mt. Vernon Church, Boston; two were from the church in Wilton, Me.; one from the church in Wilton, N. H.; one from the church in Reading, and one from the Union Church, in Groton.

Rev. Mr. Fay offered the introductory prayer; Rev. Mr. Park propounded the articles of the Confession of Faith and the church covenant for the public assent of the persons who desired to become a church, and offered the prayer of consecration; and Rev. Mr. Edwards, in the name and in behalf of the First Church, extended to Deacon Charles Thompson, as a representative of the new church, the right hand of fellowship. Mr. Edwards also, in behalf of individual members of the First Church and Society, presented a set of communion and other church furniture, in an address to Rev. Mr. Sewall, as the stated preacher, to which the latter made a suitable response. At the same time the newly-organized church voted unanimously to concur with the society in an invitation to Rev. Mr. Sewall to officiate for another year as preacher, and now as pastor. These interesting exercises were closed by the administration of the Lord's Supper to the new church and invited members of other churches then present, Rev. Messrs. Sewall and Fay, and Deacons Charles Thompson, Richardson, Foster and Marion officiating in their respective spheres.

Rev. Mr. Sewall continued to supply the pulpit and officiate as pastor till January, 1852, when he announced his intention, after his engagement should cease, of withdrawing from service.

During the following summer (June, 1852) Rev. George T. Dale, who had been pastor of a church in Beverly, was engaged to supply, temporarily, the vacant pulpit. In August he was invited to assume the pastoral office. Having signified his acceptance of the invitation, he was installed October 12th, the first regular pastor. During the three years of his official relation to the church, he labored, amid many difficulties and discouragements, wisely and usefully. He was an unusually pure writer and always an able

¹ The authorities for the sketch of the South Church of Woburn are the Woburn Church Records, the Winchester Church Manual, and various articles in Vols. I. and II. of the *Winchester Record*.

preacher. But his frail health seriously crippled him, and, at his own request, he was dismissed October 30, 1855. He was never again settled as a pastor, but though struggling with shattered health he supplied, for several years, two more pulpits in Berkshire County, Mass. He at length retired from the active duties of the ministry, and, in 1875, bought a comfortable house in Reading, where he died March 26, 1884.

Rev. George Thurlow Dole was born in Byfield, Mass., October 30, 1808; graduated from Yale College in 1838; studied theology at New Haven and Andover, leaving the latter place in 1841. He married Jane P. Treat, of New Haven, Conn. They had three children, all daughters: 1, Susan Jane; 2, Alice Hooper; 3, Bertha Cordelia.

During the years intervening between the dismissal of Mr. Dole, October 30, 1855, and the installation of his successor in the pastoral office, July 26, 1865, the pulpit was supplied, for seasons of greater or less duration, by Messrs. E. S. Fairchild, G. D. Pike, A. S. Nickerson and others from the Theological Seminary at Andover, and Henry Kimball, of New York, and by Rev. Messrs. Byington and Harding, who had been pastors of other churches. During these years the progress of the church was slow, but, notwithstanding some sore trials, especially in 1857, there was, on the whole, some advance in strength, and more in its well-defined and recognized character as an unswerving Evangelical organization.

Early in July, 1865, an invitation was extended to Rev. Melancthon G. Wheeler, then of West Roxbury, to assume the pastoral office. This invitation being accepted, he was installed on the 26th of the same month, the First Church in Woburn, the South and Bethesda Churches, in Reading, the churches in Stoneham and West Amesbury, Winchester, South Reading, Wilmington and Burlington being represented on the council.

After so many years of destitution of a regular pastor, the church took fresh courage, and, with renewed zeal, engaged in their appropriate work. The pastor, also, with the advantage of much previous experience, was earnest and active in his work. But his work was short. Failing health made it more and more evident that he could not perform the duties of his office; and, after a lingering and painful illness of several months, he died in office, February 9, 1870.

Rev. Melancthon Gilbert Wheeler was born May 22, 1802, in Charlotte, Vt.; graduated from Union College in 1825; studied theology at Princeton, N. J., and at Andover, leaving the latter place in 1829. Before coming to Woburn he had been a pastor in Abington, Conway, Williamsburg and at South Dartmouth, and, for brief periods, stated supply in other places. He was twice married, his first wife leaving at her death two sons and a daughter. He married, second, Frances C. Parkinson, of New Boston, N. H.,

a graduate of the Mount Holyoke Female Seminary, and a teacher in various places. They had five children: 1, Elizabeth P., married John R. Carter, of Woburn, June 22, 1873, and died July 25, 1888. 2, Caroline A., married Charles H. Cooper, professor in Carleton College, Northfield, Minn., June 10, 1883. 3, Cornelia F., married William W. Hill, of Woburn, June 21, 1882. 4, John H., graduated from Harvard College in 1871. Distinguished as a scholar and teacher. In 1875-6 he was Fellow of the Johns Hopkins University, Baltimore, Md. The next three years he spent at various universities in Germany and Italy, receiving the degree of Doctor of Philosophy from the University of Bonn, in 1879. Returning to this country in 1880, he was successively tutor at Harvard University, Professor of Latin at Bowdoin College, Brunswick, Me., and Professor of Greek in University of Virginia. This last professorship failing health compelled him to resign in the summer of 1887. Retiring to the former home of his wife, in Newbury, Vt., he gradually failed, and died greatly lamented, October 10, 1887, at the age of thirty-seven years. 5, Edward F., graduated from Bowdoin College 1883, and now, 1889, a member of the Senior Class in the Theological Seminary, at Hartford, Conn.

For several months before and for more than three years after the death of Mr. Wheeler the pulpit was supplied by Rev. L. Thompson, a native of the village, and, for thirteen years previously, the pastor of the Congregational Church in West Amesbury (now Merrimac.) After Mr. Wheeler's death he was invited to officiate as pastor. This he did till April, 1873, when he declined a new engagement. Among the many men from Andover and elsewhere who, for one Sabbath or more, supplied the vacant pulpit, during the subsequent year and five months, Mr. Charles Anderson, then a student at Andover, was prominent and the preacher for a considerable time. Receiving a unanimous call to become pastor, in the summer of 1874, he accepted it, and was ordained and installed September 2d following, with the mutual understanding that he should also serve as pastor of the neighboring church in Burlington.

Mr. Anderson's pastorate of fourteen years is perhaps too recent for history. But it is proper to say that he was most indefatigable and efficient in his work. In season and out of season he was actively engaged in efforts to build up and benefit the people. Nor did he labor in vain. Several seasons of special religious interest resulted in numerous accessions to the church, and there was, throughout his ministry, a degree of harmony rarely witnessed, for the same length of time, in any church.

In 1881-82 it became so apparent that something must be done to secure better accommodations for the church work and worship, that, after mature deliberation and the consideration of various plans, it was decided to erect a new house of worship. "The people had a mind to work," and nearly all, men, women

and children, the pastor leading, pledged their aid in such weekly offerings as they saw fit. The result, in the amount raised then and prospectively, astonished every one, and the great enterprise was initiated. The last service in the old sanctuary was held May 28, 1882. From this time till August 19, 1883, the congregation met for worship in the Firemen's Hall. After the last date there was no Sabbath service till September 23d, when, for the first time, the scattered flock met in the new chapel, or lecture-room, which was finished before the main audience-room was in readiness.

On the 19th of February, 1884, the handsome new edifice was dedicated. The audience was large, filling both the main audience-room and the chapel, thrown into one. Dr. Daniel March, of the First Church, preached an appropriate sermon from Ps. 116: 7. There was a solemn act of dedication, in which the church and society formally joined. And the building committee, through their chairman, gave the most gratifying information that, through the persistent and self-denying efforts of the people, aided by the generous gifts of the mother church in Woburn, the sister church in Winchester, and various friends in other places, the house was dedicated *free from debt*. To secure this result, the pastor had labored most assiduously, and both he and the people rejoiced in the auspicious accomplishment of what they had hoped for with not a little misgiving.

Mr. Anderson continued in the pastoral office till July 2, 1888, when, at his own request, and amid the regrets of the church and society he had served so long and so successfully, he was dismissed, it being his intention to assume the duties of a professorship in Robert College, near Constantinople, to which he had been called. In this institution he had spent several years as tutor before his ordination as pastor in Woburn.

Rev. Charles Anderson, son of Rev. Charles Anderson, of Sennett, N. Y., was born in that place April 4, 1847; graduated from Hamilton College, 1869, and studied theology at Auburn, N. Y., and at Andover. He married Abbie F. Hamlin, a daughter of Rev. Cyrus Hamlin, D.D., for many years a missionary in Turkey, and the first president of Robert College. Their children are: 1. Elizabeth Clary, born October 24, 1874, died August 21, 1875; 2. Arthur Hamlin, born August 7, 1876, died September 27, 1876; 3. Robert Harlow, born October 2, 1877; 4. Catharine Roberts, born September 25, 1879; 5. Sarah Whiting, born July 18, 1883; 6. Roger Hamlin, born June 5, 1886.

Mr. Anderson was succeeded by Rev. Charles H. Washburn, lately pastor of the Congregational Church in Berlin, Mass. He has not been formally settled as pastor, but entered upon his work as acting pastor, November 2, 1888.

Since the date of the organization of the church,

November 22, 1849, down to April 1, 1889, there have been, including the forty original members, 253 admissions to membership.¹

The First Baptist Church.—The First Baptist Church of Woburn originated in that part of Cambridge formerly known as West Cambridge and now as Arlington. A meeting of persons interested, to consider, and, if deemed advisable, to complete an organization, was held as early as June 16, 1781. Having adopted a Declaration of Faith and invoked the blessing of God, they proceeded to organize a church embracing twelve men and twenty-three women, in all thirty-five members. A council composed of the First and Second Baptist Churches in Boston and the Baptist Church in Newton was called, and assembled July 5, 1781. At their meeting, after having examined and approved the Articles of the Confession of Faith, they recognized the new church as regularly constituted. Rev. Samuel Stillman, of Boston, preached an appropriate sermon from Isaiah 22: 24; Rev. Isaac Skilman, of Boston, extended the right hand of fellowship on behalf of the churches represented, and Rev. Caleb Blood, of Newton, offered the concluding prayer.

The church had no settled pastor until November 17, 1783, when Rev. Thomas Green was ordained and installed in that office, Rev. Thomas Gair preaching the sermon. Six years later—November 29, 1789—Thaddeus Davis and Daniel Brooks were publicly set apart as the first deacons. Meanwhile, in 1786, a number of persons claiming to be Baptists, but attendants on the ministry of Rev. Samuel Sargeant in the Congregational Church at Woburn, and disaffected toward him, seceded and began to attend the Baptist meetings in West Cambridge. In 1790 the number had increased to twenty-two, a majority of whom were ere long hopefully converted, and, in due time, notwithstanding the strong opposition then unhappily common in such cases, were baptized by Elder Green and welcomed into the fellowship of his church.

The number of persons residing in Woburn, but connected with the church in West Cambridge, having, in 1791, become so large, it was thought best that the pastor should preach in Woburn one Lord's Day in each month. This was at length accomplished in 1793, the first meeting in Woburn being at the residence of Josiah Converse April 3d of that year.

Mr. Green, after a ministry of ten years, was dismissed at his own request in 1793, and removed to Danvers.

On the 29th of August of this eventful year it was voted that "hereafter half of the Church shall be in Cambridge and half in Woburn, and that the

¹ The materials for the foregoing sketch of the church in North Woburn are from church, parish and private records from town records of marriages, births and deaths, and from Triennial Catalogues of various colleges and seminaries.

pastor, whoever he may be, shall divide his labors equally between the two places." Doubtless the real meaning of this vote was, that in each place half of the church services should be held, and not, as the words seem to imply, that the church should be literally divided into two halves, each place to have one. However this may be, this was the turning point for the Woburn branch of the church. From this time there was a rapid increase in Woburn and as rapid decrease in Cambridge. After a supply of the pulpit by Elder Simon Snow for about one year a call was extended to Rev. John Peak, of Windsor, Vt., to settle. He accepted, and entered upon his work in 1794. It was stipulated that he should preach alternately in Woburn and in Newtown, N. H., two weeks successively in each town. Notwithstanding this arrangement, his ministry was a successful one. Through his influence a society was organized and a beginning made in the erection of a house of worship. A revival of religion resulted in an addition of thirty-five persons to the church, there being also a branch of the church in Reading which shared in the blessing. Meanwhile the people held their meetings in a chamber of the house of Benjamin Edgell, near Central Square. The whole of the second story was one unfinished room, furnished with plain benches and reached by a narrow stairway in the rear of the house.¹ Not waiting for the completion and furnishing of the meeting-house, the almost impatient people first opened it for worship July 20, 1794. This well-remembered house stood on the east side of Main Street, near where the residences of the late Colonel William and Timothy Winn now stand. It was 40 feet by 30 feet in dimensions. Five or six years after it was first opened for worship it was greatly improved by thirty-five square pews, a sounding-board over the pulpit, and the usual "deacons' seats" in front and below it. This once honored building still exists, and is used for secular purposes a few rods north of its original location.

About 1797 the church voted to hold their services wholly in Woburn, and assumed the name of the "First Baptist Church of Woburn." Elder Peak having, in October, 1795, closed his labors in Woburn, removed to Newtown, N. H., where he devoted himself exclusively to the church in that place. The vacancy in Woburn was not filled till November, 1798, when Elder Elias Smith, a man of great eccentricity and, as the sequel proved, given to change, became the pastor. He remained only about two years, and withdrew both from the position and from the denomination.

Mr. Smith was succeeded by Elder Ebenezer Nelson, who, though not settled as a pastor, preached

from 1802 to 1804. After his retirement the Church had for a part of one year the services of Elder Isaiah Stone. Meanwhile, in 1804, there was an interesting revival of religion, largely under the ministrations of Rev. Thomas Paul, acting as an evangelist. Though belonging to the despised race of colored men, he was a man of rare excellence and marked success, and subsequently was a highly useful pastor of an African church in Boston. Thirty persons, the fruits of the work in 1804, were baptized and received to the fellowship of the church. Some, who subsequently united with the Congregational Church, were also the fruits of Mr. Paul's faithful labor.

In August, 1808, an invitation was extended to the Rev. Samuel Wydown, who, at the time, was preaching in one of the Southern States, to make them a visit. Though not able to come immediately, he came in the following spring, with recommendations from Dr. Rippon, of London, and Rev. Lewis Richards, of Virginia. After preaching for a short time on probation, he accepted a call to settle, and entered upon his work as a pastor, though without the usual formalities of an installation. Mr. Wydown was greatly esteemed as a man and a preacher, but during his short ministry of about two years there existed difficulties in the church which rendered him less happy and less useful than he might and doubtless would otherwise have been.

In the spring of 1811 Rev. Thomas Waterman took the pastoral charge. Educated in an English college, he held a high rank as a man of learning and culture among ministers who are often deficient in both. He had been the first pastor of the First Baptist Church of Charlestown, and came to the church in Woburn in the midst of their troubles. But he entered upon and prosecuted his work, cheered by the esteem and sympathy of his people and respected by all who knew him. Had he not, in addition to his pastoral work, been worn with the care of a select school for young men, there is reason to believe that his ministry would have been richer in results. As it was, it was useful, and the influence of his work for three years—till his sudden and greatly lamented death, March 23, 1814—was highly and thoroughly beneficial. He was buried in Woburn, and his memory has ever been cherished—both in and out of his own society—as precious. After Mr. Waterman's death the church was, during two years, without a pastor. In May, 1817, Rev. Herbert Marshall was ordained as Mr. Waterman's successor. His ministry was short, but greatly blessed, the Spirit being poured out in a wonderful manner upon the church and congregation, and seventy persons being added to the church in one year. It is a singular fact that, during this prosperous year, November 16, 1817, eleven members were dismissed for the purpose of organizing a church in West Cambridge (Arlington), where the Woburn church itself was organized.

¹ In his book of accounts, Capt. Benjamin Edgell says: "The Society met at my house, 1792, April to December, two Sabbaths each month; from April, 1792, to April, 1794, two Sabbaths each month, total, 14 Sabbaths."

Mr. Marshall being dismissed in 1818, Rev. George Phippen, from Lynn, was called to succeed him, and was installed September 16th of that year. He was dismissed September 5, 1820. But little can be said of his ministry. During the year of his dismissal he published a sermon delivered at Woburn, May 17, 1820, before the "Female Missionary and Female Charitable Societies." This sermon—from Matt. 10: 8—is still extant.

From the close of Mr. Phippen's labors, in September, 1820, to July, 1821, the church depended upon transient supplies from Andover and elsewhere. In July, 1821, Rev. Adoniram Judson, of Nobleboro', Me.,—the father of the distinguished missionary of the same name,—became the pastor. He was a most excellent man and highly esteemed, but, by some unforeseen providence, apparently, his pastorate was very short, it being only nine months.

Mr. Judson was soon followed in 1823—by Rev. James A. Seaman, of Greenfield, N. Y. His ministry, too, was short, it being but a little over two years. At his own request he was dismissed and became the pastor of the Second Baptist Church in Providence, R. I. It is not improbable that his departure was hastened—if not occasioned—by an unhappy division in the church, which continued for some time subsequently.

Rev. Samuel S. Mallory, from the State of New York, was, in March, 1826, called to the vacant pulpit. Very soon after his coming the threatening clouds began to disperse, peace and harmony were restored, and the congregation considerably enlarged. Near the close of the year a work of great power began and continued through the year following, extending to every part of the town. Seventy-one persons were added to the church, and among them were some of the most valuable members the church ever had, the whole number being at this time over two hundred. A spirit of entire harmony prevailed during all these months of joy, and the whole church was pervaded by a deep religious interest. This was the more remarkable, since the prosperity soon rendered the old house of worship so inadequate to the wants of the society as to make it necessary to consider—and soon to enter upon—the work of erecting a new sanctuary in a new and more central locality. This house, begun in 1827, was finished early in the following year, and dedicated May 21, 1828. Facing the Common, at the corner of the present Park Street, it was far more commodious and comfortable than its predecessor, the dimensions being 58 feet by 60 feet, with a vestibule six feet in width in front. Mr. Mallory preached the dedication sermon from Haggai 2: 9, "The glory of this latter house shall be greater than of the former, saith the Lord of hosts." The house, containing eighty-eight pews on the main floor and twenty in the galleries, was built at a cost—including \$1100 for the lot—of about \$8000. Twenty-three male members of the church had assumed all

pecuniary responsibility, resolved to trust God for the result, and the house was dedicated free from incumbrance.

But the successful pastorate of a man, honored and loved as few have been, was, like that of others before him, soon, and reluctantly on the part of the church, brought to a close. A few restless persons, as often occurs, made Mr. Mallory so uncomfortable that he insisted on closing his labors, after a ministry of three years, March 1, 1829.

On the 10th of December, of the same year, Rev. Bejamin C. Wade became Mr. Mallory's successor, remaining in the pastorate four years and two months. The religious interest during Mr. Mallory's ministry still, in some measure, continued, and with very gratifying, though, in the end, somewhat qualified results. Of one hundred persons admitted to the church, a very considerable number were ultimately cut off from membership, and another season of trial was introduced. After being destitute of a pastor seven months, the church, anxious to secure a man of ripe experience and unblemished character, extended a call to Rev. Thomas B. Ripley, who was settled November 5, 1834. Mr. Ripley was a good and faithful man, and earnestly labored for the highest good of the people. But his usefulness seems to have been embarrassed by circumstances which he did not foresee and which he could not control. The church diminished in numbers, and he was dismissed March 16, 1836. From this time until August 31, 1837, there was again no pastor. At the time just mentioned Mr. Noah Hooper, a student in the Theological Institution at Newton, was ordained and entered upon his work. It was a time, as he soon found, of great trial. The discordant elements of the previous two years became more and more discordant. Various questions of public morals and interest were agitated and charges of a departure from the old faith of the churches were made, all which resulted at length in the dismission of forty-nine members, who, in 1838, constituted themselves the "Independent Baptist Church." In these circumstances the faith and patience and wisdom of the young pastor were sorely tested. But both he and the church passed the crisis safely and soon welcomed the dawn of a brighter day. Some of those who had left them, dearly beloved members of the old church, ultimately, from time to time, returned, and were welcomed back to the old fellowship.

The church, again harmonious and prosperous, soon enjoyed a season of special religious interest, resulting in the admission to their fellowship of forty-six persons, thus more than supplying the vacancy occasioned by the dismissal of forty-five two years previous.

At his own request, Mr. Hooper, after a pastorate of a little more than three years, was dismissed October 6, 1840.

Rev. Silas P. Randall was settled May 20, 1841, as

Mr. Hooper's successor. His ministry of six years and four months was a faithful one and fruitful in good results, thirty-five persons being baptized by him and received into the church. He, however, resigned his office as pastor, and closed his labors September 1, 1847.

The church next invited Rev. John C. Stockbridge, of Waterville, Me., to supply the vacant pulpit, and, accepting at length a unanimous call, he was installed in January, 1848. During his ministry of four years and eight months the church was greatly prospered and strengthened, forty-four being added to their number. And it was with profound regret and great surprise that they were asked to release him from service. He closed his labors October 3, 1852.

Rev. Joseph Ricker succeeded Mr. Stockbridge in January, 1853. He, too, was a man of great excellence, and a delightful harmony was enjoyed throughout his ministry of more than five years. His success, however, was not so apparent in the numbers added to the church, as in the development of spiritual life and the general uplifting of the standard of the Christian profession.

During Mr. Ricker's ministry, the sanctuary was enlarged by the addition of seventeen feet to its length and thirty-eight pews to its seating capacity.

Mr. Ricker was dismissed April 1, 1858, and on June 1st of the same year he was succeeded by Rev. Benjamin F. Bronson, of Methuen, without any formal act of installation. During his ministry of nearly four years the debt incurred in the enlargement of the house of worship was liquidated, and fifty-three persons, by baptism and by letter, were added to the church, the whole number rising to 289. There was also a large increase in contributions to various benevolent objects.

Mr. Bronson, closing his labors with the church, April 27, 1862, was followed, on the 5th of October of the same year, by Rev. Joseph Spencer Kennard, of Washington, D. C., who was publicly recognized on the 31st of that month. He was an earnest and successful laborer, never sparing his own strength in his efforts to benefit others. As the result of an interesting work, he baptized sixty-two persons, raising the total membership to 347. In the mean time an addition was made to the rear end of the house for the purpose of securing room for a new baptistery.

Mr. Kennard closed his ministry in Woburn December 17, 1865, and removed to Albany, New York, and June 24, 1866, Rev. Hugh C. Townley, from New York, accepted an invitation to succeed him, and was accordingly settled in July following. Mr. Townley was a very active, energetic, popular and useful man. As a member of the School Committee he was useful in a sphere outside his domain as a pastor. But he was ever alive, as he was able, in his more appropriate work, and, as a result, sixty-nine persons were by him added to the church. He was dismissed after a pastorate of five years and nine months, April 23, 1872.

Rev. William Young, D.D., from Oil City, Pennsylvania, entered upon his work, as Mr. Townley's successor, November 17, 1872, and was installed January 2, 1873. Dr. Young was impulsive, frank, generous, and had a high ideal of what every church ought to be. For two years he sought to do his duty manfully and faithfully. And he did not labor without some measure of success, though his usefulness was largely, it may be, out of the usual line of the preacher's work. He closed his labors November 22, 1874, going hence to Meadville, Pennsylvania, and thence to the far West, where, in 1881, he suddenly closed his life.

In March, 1875, Rev. Edward Mills, from Rutland, Vermont, entered upon his work as Dr. Young's successor, and continued it till 1881. During the six years of his pastorate a debt of \$3500 was removed, the sanctuary, at a cost of \$22,000, was remodeled, benevolent contributions averaged \$4500 each year, and, better than all, there was a degree of spiritual prosperity which resulted in the addition to the church of more than ninety new members.

Mr. Mills closed his labors in 1881, and was succeeded, in 1882, by Rev. George A. Simonson, who, though in enfeebled health, labored faithfully and was highly respected by all who knew him. Obligated by increasing illness, he retired from his work in the autumn of 1883 and was dismissed in January, 1884, Rev. Daniel D. Winn supplying the vacant pulpit. Mr. Simonson removed to New Jersey, where he died in 1884. After his death Rev. Daniel D. Winn, a native of Woburn, and a son of the church, assumed the pastoral charge, which he still and successfully retains in 1889.¹

Independent Baptist Church.—In the historical notice of the First Baptist Church is an allusion to the dismissal, June 22, 1838, of forty-five members, under circumstances of sore trial. The dismissed members embraced some of the old and most valued brethren and sisters of the church, and, doubtless, they were believed to be as sincere in their views at the time as were those whom they left behind. It was a time of much excitement and much heated discussion far and wide. The subject of temperance and the question of American slavery greatly agitated the whole community, and, naturally, the excitement invaded the churches even more seriously than it did, or could, the outside world, which was supposed to be less sensitive on moral questions. As the controversy waxed warmer, there was more or less of discussion of, and pointed allusion to, the evils in question in the pulpits. To this the pulpit of the Baptist Church was not an exception. And, as usual, the members of the congregation ranged themselves on the one side or the other of the subjects discussed.

¹ For most of the material of the foregoing sketch, the writer is indebted to a private record of his friend, Alfred A. Newhall, formerly clerk of the Baptist Church, and to an historical discourse preached by Rev. Edward Mills.

Some thought that such questions could not be brought into the pulpit or the church-meeting without a departure from the simplicity of the gospel, and from a paramount adherence to the old and distinctive faith of the church. At this distance of time we may charitably believe they were honest. And we may, with equal, if not even greater, charity, believe that it never entered into the thought of the majority of the members that they were guilty of any departure whatever from the Gospel. On the contrary, they honestly believed that a due consideration of great moral questions necessarily grew out of a genuine fidelity to the Gospel. But, at such seasons of deep and excited emotion, it is of but little use to attempt argument. And so, trying as it was, the request of forty-five members for dismissal from the church was granted to each petitioner separately, the letter including a recommendation to "any church of the same faith and order."

The persons thus dismissed did not think it necessary to effect a new and separate organization, but, by mutual consent, regarded themselves as already organized by virtue of their previous relations to the old church. By the courtesy of the old church, they were allowed, at a merely nominal rent, to worship in their former and their abandoned meeting-house, at the corner of Main and Church Streets. In July, 1849, Sarah Winn Converse died and left a will, made seven years before, in which she bequeathed certain real estate "to the Independent Baptist Church, to be holden and enjoyed by them so long as they shall maintain their present religious belief and faith and shall continue a Church." This bequest led to the erection of the chapel or church on Main Street, just north of the Central House, where they thenceforward worshipped until 1861, under the ministry of men of their own choice. Since 1861 their meetings have been only occasional. A recent writer in one of our local papers¹ says that services are held, generally, on the first Sabbath in each month, and are conducted by Elder Campbell. For the purpose of preaching on these occasions to an audience of from four to six or eight persons, the elder comes on Saturday from another State.

The property is held by trustees, B. F. Flagg, H. Campbell and John B. Horn being a standing committee.

*The Unitarian Church.*²—The history of liberal religion in Woburn in its organized form properly begins with the formation of the "First Universalist Society in Woburn," which took place in the spring of the year 1827. Previous to this, meetings, with preaching by Universalist clergymen, had been held from time to time, the first of these of which we have record being in 1817, held in the hall of a dwelling-house at North Woburn, said to have been built by Colonel Baldwin in expectation that it would be oc-

cupied by Count Rumford, should he ever return from his long exile abroad. The preacher was Rev. Edward Turner, of Portsmouth, N. H., who preached by invitation of several citizens, Mr. Samuel Converse being of the number.

Some time after this, in what is still spoken of by the older citizens as "Parson Bennett's time," there was inaugurated in the Congregational Church at the Centre an old-fashioned "revival" of a very stirring kind, in which preachers reveled and rioted in visions of fiery pits and lost souls, frightening the timid into confession of sins of which they were not guilty. Against the violent measures of this campaign many of the more calm and thoughtful citizens revolted, and to voice their protest they engaged Universalist ministers, who came from Sunday to Sunday and preached in a school-house. In this place appeared some of the greatest preachers the Universalist Church has ever had,—Thomas Whittemore, Walter Balfour (author of several works that have become standards in Universalist literature), Sebastian Streeter and Hosea Ballou. In one of the vigorous sermons which Father Ballou gave to this band of Protestants he said to them: "If you want to keep the bell a-ringing you must keep the tongue a-thumping." And they kept the tongue "a-thumping" in the school-house till a society was formed, and the number who wished to hear "the Word" became so great that they were forced to seek more ample accommodations, which they found in a meeting-house that the Baptists had deserted. The formation of this society was regarded by the defenders of Calvinism as the work of Satan himself, and was accordingly duly preached against and condemned. And the young society found no slight element of growth in the opposition which it received. It flourished so abundantly that in the spring of the year 1829 it took measures to have a pastor of its own. The Rev. Otis A. Skinner was called, and, by accepting the invitation, became the first settled Liberal preacher in Woburn. On the first Sunday in April, 1829, he preached his first sermon as pastor of the society. By those still living who remember well the feeling that existed against the society at the time, the writer has been told that on the following Sunday "Parson Bennett" took for his text 1 Peter v: 8: "Your adversary, the devil, as a roaring lion walketh about, seeking whom he may devour," remarking that this Scripture was now being literally fulfilled, for he had himself, during the past week, seen the devil upon the streets of Woburn, referring to the pastor of the Universalist Society. It was a time of fierce contention, and the preachers of the new faith, like inspired war-horses, scented the battle afar off, and they always had their quivers full of Scripture proof-texts ready for the fray. Mr. Skinner was a young man of much power, and soon became a recognized leader of thought in his denomination, and the society soon found it necessary to have a meet-

¹ City Press, June 13, 1883.

² By H. C. Parker.

ing-house of its own. In August of this same year the frame of a house was raised, on which occasion a public ceremony took place, with an address by the pastor. A writer in the *Universalist Trumpet* said: "A great concourse of people assembled to witness it. The day was fine. The raising was complete without the occurrence of an accident, and without the use of *ardent spirits*, but with the assistance of ardent friends." This house was dedicated December 23, 1829. In his address to the people on this occasion, Mr. Whittemore said: "You have been prospered almost beyond a parallel. Many societies have to struggle for years before they attain that maturity which you have attained in a short time. I can hardly believe the testimony of my own senses when I see so large a society and so convenient a house erected in a town where a few years ago the name we bear was scarcely known." In his address at the services, Father Streeter charged his hearers if they saw folly on the wing to shoot it down, which figure of speech, in the mouth of the opposition, was interpreted to mean, "If you see an Orthodox anywhere, shoot him!"

On this day Mr. Skinner was publicly installed as pastor of the society, and with him as its leader it seemed to have a brilliant future before it. But if its rise and progress were phenomenal, its decline and fall were equally so. Mr. Skinner was called to Baltimore in 1831, and with his departure the ardor of the young protestants was somewhat abated. He was soon followed by the Rev. Daniel D. Smith in a brief and uneventful ministry. In 1834 the Rev. A. L. Balch became pastor of the society. His term of service was also short. There are records of a "Dorcas Society" formed in January of this year, containing in its list of members many familiar names of ladies, living and dead, who were active in works of benevolence.

The next pastor of the society was Rev. John Gregory, installed in 1836. During his pastorate a wave of temperance agitation swept over the country, engulfing many a weak church and putting asunder many a strong one. It struck both the Baptist and Universalist Societies of Woburn, putting them in peril. Mr. Gregory took ground against the teetotalers, maintaining with Paul that it was a good thing to take a little something for the stomach's sake. He published his views in a little book, which he called "The Bramble," in which he contended that it was right and just and a matter of duty for men to use intoxicating drinks, giving copious Scripture-texts in support of his position. He had many strong opponents in his own flock, and also in the denomination at large. Ministers refused to exchange with him, and attacks poured in upon him. He was a born controversialist and reveled in these fightings. But this kind of controversy was not well calculated to strengthen a young and feeble church. Some who had been earnest workers were alienated by it, and it

was deemed necessary that he should retire from the pastorate. So distracted was the society by this agitation that it voted that the doors of the church be closed against all lectures on temperance and abolition.

After Mr. Gregory came a man of very different temperament, a mild and lovable spirit, the Rev. J. C. Waldo, son-in-law of Father Ballou, and under whose ministry a strong Universalist Church had been established in Lynn. He came in 1837 and was engaged with the hope that he might restore peace to the troubled waters. But he remained with the church but a brief time, and with the close of his pastorate the "First Universalist Society of Woburn" became extinct. The property of the society was purchased by the town, and the meeting-house converted into a town hall. It still stands and is near the depot of the Boston and Lowell Railroad, and is now used as an armory.

It was expected by many that when the town purchased this property it would be the end of Universalism in Woburn. But very soon after this (1841) the "Second Universalist Society of Woburn" was formed, adopting what is known as the "Winchester Confession" as its theological basis. At the very outset it voted that it was in no way responsible for any act of the first society, especially the act relating to temperance and abolition lectures. In April, 1843, the Rev. W. B. Randolph was asked to preach for the society for such money as could be raised for his support. A new church was built and dedicated on Nov. 22d of the following year. This house was situated on the corner of Main and Walnut Streets; it was sold to the Methodists in 1865, and was destroyed by fire in 1873. It was in this house, and while Mr. Randolph was pastor, that Rev. Thomas Starr King and Rev. A. D. Mayo preached in Woburn their first sermons, one occupying the pulpit in the morning and the other in the afternoon. The pastorate of Mr. Randolph was a short one, and with his departure the public services of the Second Universalist Society came to an end.

Previous to the coming of Mr. Randolph and the building of the Second Universalist Church, certain liberal-minded persons interested in the principles of the Unitarian faith had held occasional services, the Rev. Mr. Stetson being the first to preach this gospel in Woburn. Their services were for a while held in the Town Hall, alternating with the meetings which the Universalists held there previous to building their new church. During the pastorate of Mr. Randolph the Unitarians held no meetings, but after his retirement they held services regularly in the Town Hall until 1846, when they accepted the offer of the Universalists to use their church "for such preaching as they might wish to obtain." Among the preachers of this time were Rev. Dr. Francis, Rev. W. H. Channing and the Rev. T. W. Higginson, who preached frequently for the society in its inception. On the

31st of March, 1847, a warrant was issued by A. H. Nelson, Esq., upon petition of parties described as "members of a Religious Society not incorporated," summoning all members of said religious society to assemble at the vestry of the Universalist meeting-house in Woburn on the 8th day of April following, to act upon the usual business involved in the organization of a legal society, etc., etc. The meeting was held as directed, with the choice of A. H. Nelson, Esq., moderator, and John Johnson, Jr., clerk. The regular parish officers were chosen, and it was voted that the society be called the First Unitarian Society in Woburn. For six months thereafter the pulpit was supplied by Rev. John A. Buckingham, who devoted himself chiefly to the task of getting the society into condition for doing effectual work. It was during his ministry that the Ladies' Charitable Society was formed, its first recorded meeting being Jan. 6, 1848, at the residence of Mrs. Albert Nelson. Twenty-two ladies were present, and the first officers of the Society were chosen. For many years it has been its custom to hold its meetings on the first Thursday of each month, the ladies gathering at 4 o'clock P.M., and the gentlemen at 6.30 o'clock for tea. The records of this society show that in the year 1862 it met 33 times and made 528 articles for the soldiers, and in 1863 it met 32 times and made 483 articles for the soldiers. From the day of its organization until the present time it has been an indispensable agent in the social and benevolent life and work of the parish.

The first settled pastor of the society was Rev. Henry F. Edes, who was installed July 6, 1848. Early in his pastorate he organized a church body within the parish, which organization adopted a church covenant and certain articles of faith prepared by the pastor. In February of the following year a parish library was formed, Mr. Edes at the time preaching a sermon on books and reading. In 1856 this was merged into the Public Library of the town. Under the lead of J. C. Park, Esq., an attempt was made to organize a Sunday-school, but for some reason the movement failed. Under the pastorate of Mr. Edes the society was not strong, having little of the cohesive power necessary to the life of a fresh enterprise, and owing to some dissatisfaction the pastor was dismissed, June 16, 1843. After his retirement the society continued to hold meetings regularly, although there was very little interest manifested, and it became a debatable question whether it were wise to continue its existence. In October, 1851, an informal meeting was called to consider the question of closing up its affairs. In March of the next year another meeting was called to see if the two elements—Unitarians and Universalists could not unite and form a strong society, and another warrant was issued by John Nelson, Esq., on petition of twenty-one gentlemen, for a meeting of parties interested in organizing a "Unitarian Religious

Parish." A new organization, April 10, 1852, was the result of this meeting. It was voted that the clerk be directed to inscribe on the records of the parish the following declaration: "We whose names are hereunder written, desire and agree to become members of the First Unitarian Parish in Woburn, and that all persons who shall sign said declaration shall thereby become members of said Parish." It was voted that the annual meeting of the parish be held the first Monday in April, and this is the organization of the society as it now exists. Nearly a year elapsed after this before the settlement of a pastor, and in this interval there were three clergymen who preached very frequently and very acceptably to the people. They were the Revs. T.W. Higginson and O.W. Wight, both subsequently distinguished in literary circles; and George F. Simmons, a young man of fine culture, who was called (January 10, 1853) to the pastorate of the society, at a salary of \$800 a year, but who did not accept the invitation.

At a parish meeting in March, 1853, it was unanimously voted to invite John M. Masters to become pastor of the society at a salary of \$1000 a year. At the same meeting a subscription paper was circulated for the purchase of an organ, resulting in the sum of \$1000, and a committee was appointed to purchase an instrument. Mr. Masters, accepting the call, was ordained and installed as pastor of the society April 28, 1853. In the services of the occasion many well-known persons took part. Revs. William R. Alger, F. D. Huntington, A. B. Fuller, better known as "Chaplain Fuller," and Thomas Starr King. That the society was prosperous at this time is evident from the fact that it was necessary to add twenty pews to the church to accommodate those who wished to attend the services (in 1854).

In 1853, under the lead of Mr. George M. Champney, a Sunday-school was organized, with Mr. Champney as its first superintendent, a position which he held for many years. The school soon numbered sixty-five scholars and has continued a prosperous life down to the present time. Mr. Masters' health failing, he was compelled to resign March 25, 1855.

At a meeting held April 7, 1856, which was described as large and spirited, a "unanimous, enthusiastic and warm-hearted" call was extended to the Rev. Mr. Pope of Somerville to become pastor of the society, but the call was declined. It was not till April, 1857, that the Rev. R. P. Stebbins, D.D., formerly president of the Meadville Theological School, was installed as the successor of Mr. Masters. The pastorate of Dr. Stebbins covered a period of about six years, during which time the society steadily increased in numbers and influence. He was much interested in the public schools and did much to increase their usefulness. He was a preacher of great rhetorical power and a zealous defender of the faith he cherished. His resignation as pastor of the society came as a great surprise, November 28, 1863.

The society was not long in finding his successor, the Rev. Eli Fay, who was installed as pastor April 14, 1864. Very soon after his settlement the Unitarian Society of Winchester was organized, which drew away members from both the Medford and Woburn parishes.

In 1866 the Unitarian Society at North Woburn was formed, Mr. Fay assisting in its organization. The chapel which it now owns and in which religious services are occasionally held was dedicated on January 10, 1875. Through its Sewing Circle and its Sunday-school, which meets every Sunday, and has been for many years in charge of Mr. A. R. Linscott, this society has done effectual work for the cause of liberal religion.

For some time before the coming of Mr. Fay the meeting-house belonging to the Second Universalist Society had been inadequate to the needs of the parish. To accommodate the growing congregation, it was finally decided to purchase the house that the Congregationalists had vacated, which was done at a cost of \$4250, and on the purchasing of this property the old meeting-house was turned over to the Methodists. The Unitarians at once proceeded to enlarge and remodel their house, and it was dedicated to Unitarian purposes April 12, 1865. The cost of the property in its enlarged and improved state was about \$42,500. That the society was able to raise so much money at this time—it all being paid for into about \$2500—shows that it had gained very rapidly in members and power since its reorganization in 1853. Mr. Fay was very popular as a lecturer on practical themes, and his Sunday evening discourses always drew very large congregations.

In the time of Dr. Stebbins' pastorate a Natural History Association had been organized, and under the auspices of this society many public lectures on scientific themes were given in the Unitarian vestry during the ministry of Mr. Fay, and lectures of this character given from time to time have constituted a part of the parish work for many years. Owing to ill-health, Mr. Fay resigned February 20, 1867. The society gave him a year's absence, supplying the pulpit in the mean time, hoping that the rest would restore him to health. But finding at the end of the year that he was unable to resume his charge, the relation was severed at his request, and the society was again forced to look for another pastor. He was found in the person of William S. Barnes, who was installed January 17, 1869, and for more than ten years, or until April 1, 1879, ministered devotedly to his people. In 1870 a large organ of fine tone and mechanism was placed in the church at an expense of \$9000. In 1874 the parish received a generous legacy of \$5000 under the provision of the will of Mr. Timothy Winn, who had long been actively interested in the welfare of the society. By vote of the parish this sum was appropriated in part towards the cancellation of the debt of the parish. The remainder, added to the gifts of indi-

viduals, was used in the purchase of an estate on Main Street to be used on a parsonage, the purchase price of which was \$7000. This estate was deeded to the parish without encumbrance other than certain restrictions relating to its use as a parsonage.

The death of Hon. Jonathan Bowers Winn, which occurred December 12, 1873, removed from the parish one who had been its strongest support. By his will he gave to the society the sum of \$5000 which was set apart as a prominent fund, the income to be used for current parish expenses. To this fund was added, in 1876, the munificent legacy to the parish of the sum of \$1500 by his son, Charles Bowers Winn, lamented for his early taking off and immortalized in the hearts of the inhabitants of Woburn for his gift to them of a princely sum in trust for library purposes.

In November, 1879, Rev. George H. Young became the minister of the society, and after a faithful service of nearly four years resigned October 29, 1883, to enter a wider field of work.

By the will of Hon. Charles Choate, who died February 15, 1883, the church and parish of which he was a staunch friend and zealous upholder were not forgotten, and the society received from his executor the sum of \$5000, which was added to the permanent fund of the parish.

A code of by-laws adopted by the parish May 8, 1883, recognized the equality of women in the parish, and they were given all the privileges of parish membership, and since that time have been represented on each successive Board of Parish Committee.

Rev. Henry A. Westall was chosen pastor April 11, 1884, and his resignation was accepted December 1, 1886. It was during his pastorate that the Friday Night Club was formed, October 30, 1886, its purpose being to cultivate the literary and social life of the young people of the parish. And it has been of great help to the society in many ways. Its first president was Albert Thompson and its secretary Harry A. Brackett, and the club has had, from the first, an average membership of over one hundred.

March 27, 1888, Rev. Henry C. Parker was invited to the pastorate, and at this writing holds that position.

In October of the same year the Unitarian Club was organized, with Colonel Grosvenor as its president, and Charles B. Bryant secretary, a club for men only, its purpose being to increase the interest of the men in the work of the church. Fortnightly meetings are held, at which papers are read on subjects of general interest to the members. The club has already proven itself a valuable auxiliary of the parish.

In January, 1889, a society called the Merry Workers, composed of children of the Sunday-school, was organized. By fairs and entertainments it raises money for what is called Country Week. It gives each year twelve poor children from the city a visit in the country of about two weeks; and it is expected

that this will be a permanent society within the parish.

Since the reorganization of the parish, in 1853, there has been no serious break or falling away of members, but for the greater part a steady increase of interest on the part of all, and the church has become more and more a power for good in the community. The old bitterness that existed between the first Liberal Societies and the churches of a different faith has entirely died away. Only the most pleasant and friendly, social relations exist between it and the other parishes of the city. And with its various organizations it can, perhaps, be truly said, that it was never in better condition for doing real constructive religious work than at this present time.

*Methodist Episcopal Church.*¹—The Methodist Episcopal Church in Woburn was organized by Rev. Amos Binney, presiding elder, February 1, 1851. It embraced ten members. Previous to this date there had been, for a greater part of a year, occasional preaching in the town house, Revs. Horace Vail, Leonard P. Frost and John W. Merrill, D.D., being the preachers. There had been also resident in town a few Methodists—some, if not most, of whom were members of the Methodist Episcopal Church in Medford. These had, for some time, been organized as a class, whose meetings nearly all punctually attended. During the spring, after the regular organization of the church, in 1851, Rev. Hollis Kendall was appointed, by the presiding elder, as a stated preacher. The town-house, which had been rented, August 11, 1850, as the place of assembly, was still used for that purpose. And Mr. Kendall, who was earnest and laborious in his work, was successful beyond the expectation of any of the people. When he left his charge, in 1852, though only a single year had elapsed, the original ten had nearly trebled, so that he left to the charge of his successor twenty-seven members in full church fellowship and twelve probationers.

Mr. Kendall was succeeded, in April, 1852, by Rev. J. B. Holman, who is said to have made the first permanent church record. His term of service, like that of his predecessor, was short, closing in the spring of 1853.

The first preacher, regularly appointed by the Conference, was Rev. Mr. Cary, who entered upon his labor in the spring of 1853, but, leaving before the expiration of that year, was succeeded by the Rev. H. R. Parmenter, from the Biblical Institute at Concord, N. H., who supplied the pulpit for the remainder of the Conference year.

In the spring of 1854 Rev. George Sutherland became, by appointment, the minister of the church. He remained two years and was very successful in

his work. During his ministry a small chapel, located on Main Street, corner of Mann's Court, was filled to overflowing with attentive and earnest hearers.

In 1856 Mr. Sutherland was succeeded by Rev. Thomas B. Treadwell, who, after serving one year, was succeeded, in 1857, by Rev. J. A. Ames, who remained through two years of marked prosperity.

In 1859 Rev. Moses P. Webster was sent by the Conference and served one year, when, in the spring of 1860, he was succeeded by Rev. Bartholomew Othman, who remained two years. In 1862, the church having failed to ask for a preacher, the bishop and presiding elder sent, as a supply, Rev. Kinsman Atkinson, who remained one year. In April, 1863, Rev. Miles Barney, a student from Concord, N. H., succeeded, and remained one year.

According to the testimony of a subsequent pastor, the years 1862 and 1863 were a season of great trial. "Many were ready to give up the organization, and, but for a few determined spirits, the church must have broken up. For a long time the records show no conversions, no baptisms and no marriages. In fact, the church seems to have been crippled socially, financially and spiritually."²

In the spring of 1864, Rev. N. D. George, who was sent by the presiding elder, succeeded, with the aid of the church, in obtaining money or pledges nearly sufficient to enable them to purchase the Unitarian Church on Main Street, which its owners were about to abandon. About one-half of the needed \$5000 was collected, when, in 1865, Mr. George was succeeded by Rev. Matthew M. Parkhurst. The building was purchased in the spring of that year, the balance of the subscription, \$2500, being collected and paid. The house, after being repaired, furnished with carpet, cushions, a new pulpit, altar, chairs and gas-fixtures, was re-opened May 17, 1865. In 1867 it was raised sufficiently to admit of the construction of vestries beneath the main audience-rooms.

Rev. Mr. Parkhurst, leaving in the spring of 1868, was immediately succeeded by Rev. John A. Lansing, who, in 1870, was succeeded by Rev. Cyrus L. Eastman, and he, in 1872, by Rev. William J. Hambleton. During the ministry of Mr. Hambleton the church edifice, which the society had, at the cost of so much labor and sacrifice, happily secured, was, with other buildings adjacent, laid in ashes by the most disastrous fire ever known in Woburn. March 6, 1873, the day of this event, will long be remembered as a day of sore trial. Yet the people speedily rallied and, as soon as possible, proceeded to erect, on nearly the same spot, the edifice now occupied by them. On Fast Day, April 2, 1874, a little more than one year after their loss, they publicly dedicated the new sanctuary, Rev. R. R. Meredith, then of Springfield, preaching the sermon. Rev. Mr. Hambleton, who had witnessed

¹ For a large part of the material of this sketch the writer gratefully acknowledges his indebtedness to Mr. Thomas Wilson, who, as secretary of the Methodist Episcopal Church for many years, both kindly and promptly rendered the needed assistance.

the loss of the former house, was permitted, before he left for another field, to witness and rejoice over the consecration of the new and more convenient church-home.

Mr. Hambleton was succeeded, in the spring of 1874, by Rev. Charles A. Merrill, who, in 1876, was succeeded by Rev. Charles H. Hannaford, and he, in 1878, by Rev. William J. Pomfret, each remaining two years.

In April, 1880, Rev. Volney M. Simons succeeded Mr. Pomfret and, in 1883, Rev. Nathaniel B. Fisk succeeded Mr. Simons, each supplying three years. From the spring of 1886 to the spring of 1888 the pulpit was occupied by Rev. M. Emory Wright, and from 1888 to April, 1889, by Rev. Lyman D. Bragg. In 1889 Rev. Hugh Montgomery succeeded Mr. Bragg, and is now the minister.

In concluding this sketch of a history covering less than forty years, the present writer is happy to say that the Methodist Episcopal Church of Woburn has, with the exception of brief seasons of trial, been blessed with marked prosperity and tokens of usefulness.

The North Woburn Chapel Association.—From the families in North Woburn affiliating with the Unitarian Society in Woburn there was organized, July 17, 1860, a society bearing the name of "The Young Men's Liberal Christian Association." No regular worship was maintained and they had no stated place for worship. But the association retained their organization and met at some appointed place, on special occasions. In 1874 a neat and convenient chapel was erected on Minot Street, which was dedicated January 10, 1875. Rev. William S. Barnes, then the pastor of the Unitarian Church at Woburn Centre, preached a sermon on the occasion, from John 1: 14: "And the Word was made flesh and dwelt among us."

In October, 1876, the association was reorganized under the name of the "North Woburn Chapel Association." This name it still bears. There has, however, never been stated religious worship, even since the erection of the chapel. But a Sabbath-school has there each Sunday its meeting-place, and the minister of the Centre Church and clergymen from elsewhere occasionally occupy the pulpit as preachers.

*Roman Catholic Church.*¹—Previous to the year 1813 the few Roman Catholics residing in the town of Woburn were obliged, in order to attend divine worship, to go either as far as Boston or, later on, to East Cambridge, where a Roman Catholic Church had recently been established. The conveniences of travel at that time being, of course, but scanty, these journeys were oftentimes made on foot, the travelers going and returning the same day, a distance of more than twenty miles.

In 1843, however, Rev. James Strain, of East Cambridge, decided to visit Woburn, which was one of the outlying towns included in his parish, in order to ascertain if the number of its Catholic families was not sufficient to warrant his performing the holy sacrifice of the Mass for them at intervals in their own town.

He found this to be the case. A large house, situated at the Watering Station, and owned by the Boston and Lowell Railroad Company, was selected as a temporary place of worship, and here, in the same year, the first service was held. It was not long, however, before it was found that this accommodation was insufficient for the increasing congregation, while it also proved inconvenient for those residing in the westerly and southerly portions of the town. At length the town hall in Woburn Centre was hired, and here a monthly service continued to be held by Rev. Father Strain until 1846, when, to the sincere regret of his little flock, he was called to the West. He was succeeded at East Cambridge and also at Woburn by Rev. Father Doherty.

About this time a portion of the people, becoming dissatisfied with their accommodation, the question of building a small church was agitated, but the size and condition of the congregation not seeming just as yet to authorize the necessary outlay, Father Doherty decided, after some consideration, to continue celebrating the Mass in the building chosen by his predecessor. This custom was continued during the following three years.

In 1849 a change was once more made, and Father Doherty's place was filled by Rev. Father Reardon, also from East Cambridge. As this latter clergyman remained in the town but a short time, no further effort toward building a church was made. Such had been the growth of the congregation, however, during the last few years, that it became apparent to all that the use of the town hall would very soon have to be discontinued, and when, in 1851, Rev. Father Carroll was given charge of the parish, steps towards raising funds were at once taken by him.

His labors in this direction were, after a time, crowned with success. A lot of land, situated upon Main Street, at the corner of Summer Street, was purchased, and in 1853 the first Roman Catholic Church, a small wooden structure, was erected.

Although Father Carroll remained pastor of the new church until 1859, he did not at any time reside in Woburn, nor did his successor, Rev. Father Branigan, who acted as officiating priest for the following two years.

The history of this denomination in Woburn is henceforward one of continuous growth and prosperity. The clergymen of East Cambridge could no longer give it the care and attention necessary to its spiritual welfare. The monthly service became inadequate, and in 1862 Rev. John McCarthy came to Woburn as a resident pastor.

A house situated upon Pleasant Street, near Ben-

¹ By Josette Gertrude Menard.

net, formerly the Baptist parsonage, was chosen as a parochial residence, and was occupied by him for a period of two years. It was at the end of this time, in January, 1864, that Rev. John Queally, then at Worcester, was appointed pastor at Woburn, a position which he holds at the present date (1890).

The parish at the time of his coming covered considerable territory, consisting, as it did, of the towns of Woburn, Winchester and Burlington. The wooden church became overcrowded, and the demand for a larger edifice became once more urgent. It was decided to move the building then in use and erect a brick church on the same site. Subscriptions to this end were solicited by Father Quealey, and at length, in the month of December, 1867, the corner-stone of the present church was laid. In September, 1869, it was dedicated to Saint Charles Borromeo and formally consecrated.

Two years previous to this, Father Quealy finding that a residence at such a distance from the church was a source of much inconvenience, the estate located upon the corner of Summer and Main Streets, and directly opposite the church property, was purchased, upon which he still resides.

Not long after the completion of the new building, the services of an assistant becoming indispensable, Rev. Thomas H. Kenney, was sent as curate to share with Father Quealy in the labors of the parish. Father Kenney died in Woburn in March, 1872, and was succeeded by Rev. Edward L. McClure. After a time, this last curate being called upon to assume the duties of pastor elsewhere, the vacancy was filled by Rev. Michael Gleason and Rev. Michael D. Murphy. They, in turn, were substituted by Rev. Matthew F. McDonnell and Rev. Lawrence W. Slattery, who are now in the parish.

In 1884 an event of some importance took place in the establishing in Woburn of a parochial school. A large building, situated upon Main Street, belonging to the church property, and formerly dedicated to the use of the temperance society, was fitted up as a school-house. Twelve of the Sisters of Notre Dame were secured to take charge of the children and act as teachers, and a convent pleasantly located upon Summer Street, in convenient proximity to the church and school, was opened for them. The school, which is for girls only, is at present in a prosperous condition, having a full attendance of five hundred and thirty pupils.

The Roman Catholic Chapel, located at Montvale, or East Woburn, which has a congregation numbering about five hundred, is included in the Winchester parish, and was erected some ten years ago by the clergymen of that place.

*Trinity Church and Antecedents.*¹—The earliest efforts to establish an Episcopal congregation in Woburn, recorded by the historian, was a movement

made 138 years ago, A.D. 1751, when Benjamin Simonds, William Smith, Robert Reed, Swithin Reed, Ebenezer Reed, George Reed, Jr., Eliphas Reed, James Perry, Thomas Skelton, Jr., Caleb Simonds, Caleb Simonds, Jr., Seth Johnson and John Cutler, thirteen men, "signed off," i. e., declared themselves Episcopal.² "Benjamin Simonds, of the First Parish," became "a very important man among them." He was the head and front of the movement, being at the time twenty-seven years of age. He occupied the Simonds homestead at Dry Brook, Cumminsville, with his great-uncle, Caleb Simonds, Sr., who was the fourth child of the first pair, William and Judith Simonds, who settled here A. D. 1643, and built the house which may be seen to-day near Cambridge Street, in Woburn, and of special interest to us, as that west room was no doubt the first Episcopal church in Woburn.

Let us go a little further back while in these early days of the town. It was April 2, 1635, that the good ship "Planter," Captain Nicholas Trarice, sailed from England, having among his forty passengers most, if not all, the ancestors of the thirteen men who organized in 1751, and Thomas Carter, a graduate of Cambridge, who is to be the first pastor of the First Church of Woburn.

The old historic house referred to may have been forty-six feet long by twenty wide, and fourteen feet high to the eaves. The room so long sanctified by prayer and praise is fifteen feet by nineteen. A tall man must remove his hat and bend as he passes under the heavy beams that sustain the floor above. Before the cheering flames of a large, old-fashioned fireplace, the services were led by a clergyman from Boston or from Cambridge at times, but more frequently by Thomas Skelton, Jr., and the large quarto prayer-book used by him on such occasions was, until her death, in possession of his grandchild, Mrs. A. J. Kendall, of West Swansea, N. H. A grand old elm, whose limbs extend forty-five feet from the trunk, holds one arm over this consecrated room. Out there, in mild weather, the services were conducted. Who, that understands the affection of Churchmen for that old, familiar service, is prepared to believe that the incense from that domestic altar did not rise like that of Noah from Ararat?

The services, inaugurated by the thirteen in 1751 continued with more or less regularity for thirty years. Benjamin Simonds had all his children baptized here. Caleb Simonds' children—Gideon, Calvin and Jesse—here received holy baptism. The little flock held together, the last recorded service being December 4, 1781, the marriage of Ebenezer Page, of Boston, to Susanna, daughter of Benjamin Simonds, in the little room by Rev. Samuel Parker, D.D., of Boston. But the use of the prayer-book did not end there. Caleb

¹ By the Rev. J. Frank Winkley.

² The greater part were members of the Second Parish. See Sewall's "Woburn," p. 500.

Simonds lived on Pleasant Street until 1805, when he sold his house to the Congregational minister and lived in Bedford with his son Zebedee, where he died January 4, 1811, aged ninety-one. Zebedee died in 1826; Edward, the son of Zebedee, several years collector of taxes in Woburn, resided with his mother in Bedford until 1837, down to which date the prayer-book services had been regularly maintained in that home, and he believes were continued to his mother's death, in 1853. Lucy Simonds no doubt maintained this service in the old temple home by Dry Brook to the last year of her life, 1842. In A.D. 1846, only four years after Lucy Simonds left her prayer-book in the old homestead, seven years before the saintly mother of our collector Simonds lay her prayer-book by to go to the paradise of God, the Rev. George Packard, D.D., began to officiate every third Sunday in the town-hall, alternating with Beverly and Lawrence until September, when the movement of manufacturers developing in Lawrence, decided him to establish himself in that place, and build a church there. The Universalists had made a beginning in Woburn in 1828, and again in 1841. In 1847 they united with the Unitarians in forming the present society, and the Roman Catholics began in the same year. The Methodists broke ground in 1850, but the Episcopal element stood still twenty years. Then Mrs. Eliza Wyman visited various church families, and, late in 1865, met the Rev. Frederick D. Huntington, D.D., in "the old Corner Book-Store" in Boston, and on Sunday, January 21, 1866, the Rev. George L. Converse, rector of St. James', Roxbury, inaugurated a series of services with a good congregation. He was followed on succeeding Sundays by the Rev. Drs. Huntington, Randall and Babbitt. On the 20th of May Rev. Charles H. Learoyd, of Medford, was appointed provisional rector, and on the 26th Rev. E. H. Chapin commenced under the Eastern District Association, concluding his work of four Sundays by organizing a Sunday-school, St. John's Day, June 24th, having a library of 150 volumes, the gift of Boston Churchmen. He was followed by Rev. Messrs. Slack, Babbitt, Foxcroft, Carter, Bradley, Downing and Munroe. An interregnum of three Sundays followed August 12th. A petition for organization produced a warrant, September 27, 1866, naming October 4th, 7.30 P.M., at which time Parker L. Converse, justice of the peace, was present, and the organization made by the election of officers and adopting the name—Trinity Church. A delegation of nine clergymen of Eastern District Association visited the field October 20th, and Rev. E. H. Downing was left in charge, the second rector. He worked seven months, and worked well. His are the first records extant, since that wedding, 1781. George Thompson, W. A. Haslam and J. R. Little appeared as committee soliciting subscriptions in aid of the building enterprise. A Bible, two altar prayer-books, presented by the Rev. Mr. Slafter, other books by Bishop Eastburn, fifty-

four prayer-books by the Margaret Coffin P. B. S., altar, chancel chair, little melodeon and communion service remain as witnesses of that enterprise. The first baptism was March 16, 1867.

But the effort was futile. Miss Wyman, the Mrs. Margaret Farmer, Eleanor T. Long Haslam, Mary McCarthy, Josephine W. Rogers and Thomas G. Davis worked zealously to get up a fair and rescue the falling house, but it was a failure; and on April 22, 1867, the second organization was effected under a warrant of Parker L. Converse, Esq., at which Thomas G. Davis was elected clerk; Joseph McCarthy, senior warden; O. W. Rogers, junior warden; Richard Barrington, Daniel Chamberlain, Joseph G. Frampton, Oliver W. Rogers and Thomas T. Long, vestrymen; and at the adoption of a constitution, May 5th, the additional name of Charles Trull appears with the above signatures. Committee on building: Joseph M. Carthy, O. W. Rogers and the Rector Nicholson. Outside help was asked, and subscriptions to the amount of \$3657.06, were obtained and ground was broken September 25, 1867. The cornerstone was laid with usual ceremonies by the Rev. F. D. Huntington, D.D., on Tuesday, October 27th. Rev. H. A. Nicholson resigned March 11, 1868, after a rectorship of nine months, and Rev. C. C. Chapin succeeded. May 4th building committee report cost \$6574.55; debt, \$2618.49. The debt, January 18, 1869, was \$5000. Rev. J. W. Porter, D.D., succeeded C. C. Chapin. He collected \$5000 in Boston and paid the debt. Rev. Charles A. Rand succeeded Doctor Porter, Whit-Sunday, May 28th. Rev. George Pomeroy Allen assumed charge December 25, 1872, and his last recorded act was a baptism, December 25, 1873. Rev. Sumner U. Shearman, succeeded, and resigned November 3, 1876. Rev. George Denham commenced December 10, 1876, and his resignation was accepted April 15, 1877. August 6th Rev. J. Frank Winkley was called, and entered upon the duties of his office, September 8, 1877. His resignation took effect May 8, 1885. The Rev. Samuel Hazen Hilliard succeeded, and following him the Rev. James P. Ware, and the Rev. Dr. Harris followed him, leaving in July, 1887. Between that January 21, 1866, and July 31, 1887, are twenty-one years and seven months, during which 41 adults and 258 infants were baptized, 141 confirmed. The largest class at confirmation, 24; of the names recorded as communicants, 90 are believed to have received communion within two years preceeding May 8, 1885.

The parish began with the pew system, passed to envelopes, then subscriptions and free. The most prosperous season for finances was the era of inflation after the great war. The gentleman longest in office, clerical or lay, was Dr. James Folsom, of Montvale, warden between eight and nine years, to Easter, 1885. The largest amount raised in any one year was to April 10, 1870: offerings, \$348.49; pew-rents, \$619.98; subscriptions, \$48.26 = \$1038.80; and the

same year received from missions, \$550; borrowed, \$116.49. Of the illustrious dead who assisted in starting this parish is George M. Randall, first bishop of Colorado, but then rector of the Church of the Messiah, Boston, and of the living clergy not mentioned above, Rev. Dr. Wharton, who, in 1867, subscribed \$500. In 1873 the quorum at parish meeting was reduced to four, and in 1879 raised to ten. Other gentlemen acting as senior warden were Robert Eaton, 1873; Richard Barrington, 1874. From 1879 the rector's duties called him to Winchester, Wilmington, Lexington and Bedford, three of which now have established services and resident clergymen.

New Jerusalem Church.—The society bearing this name, sometimes also called the Swedenborgian Church, formerly worshiped for several years in an edifice on Central Street, Montvale. Of late its members seem to have been, from various causes, so weakened in numbers and ability as to practically abandon their enterprise, and their house of worship, now called All Saints' Chapel, is used for services which are not strictly denominational.

All Saints' Chapel.—Those who now worship in this edifice, formerly known as the New Jerusalem Church, on Central Street, Montvale, do not represent any one religious denomination. "Union Services" are held regularly every Sunday afternoon and conducted by representatives from various churches.

The Scandinavian Evangelical Society.—This religious organization is one of the most recent of similar organizations in Woburn. Previous to 1882 there were hardly a dozen persons of Scandinavian origin in town. During that year Messrs. Bryant and King introduced a considerable number of workmen in their manufactory. Of these, but very few had even an imperfect acquaintance with the English language, while the great majority knew nothing of it; and as only a very small number were professing Christians, it was, for the few who were, a difficult enterprise to introduce and establish in the Scandinavian language a regular ministration of the Gospel. In July of the year before mentioned, one of their number, a Swede, succeeded in inducing a Swedish evangelist from Cambridgeport to come to Woburn and preach for a single Sunday. At this first service ever held in town in the Scandinavian language about thirty persons (Swedes, Norwegians and Danes) were present. Such an interest was now awakened that, at different times and at different places, services were subsequently held. Generally these services were held in dwelling-houses of Swedish families, and nearly once each week with a single family residing at No. 7 Greenwood Avenue. Toward the close of October of that eventful year the Young Men's Christian Association opened their rooms, then at 127 Main Street, for a regular weekly service in the Scandinavian language. The work was signally blessed, and, as more frequent meetings became desirable, permis-

sion was given in May, 1883, to hold two meetings in those rooms each week. Such was the success of the enterprise that on the 2d day of June, 1884, the "Scandinavian Evangelical Society" was organized. It consisted of seven members, whose names were Charles R. Rosenquist, Mrs. Charles R. Rosenquist, Claes H. Svenson, Mrs. Claes H. Svenson, Sven Froberg, Mrs. Sven Froberg and Gustaf J. Olson. At an adjourned meeting on the following evening five more members were added to the seven of the previous meeting—Olof Johnson, Mrs. Olof Johnson, Magnus Carlson, Swan Ekmark and Miss Augusta C. Johnson. These twelve persons included nearly all the Scandinavians who were professing Christians at that time in Woburn. But from the date of the organization onward, the church, so feeble in its beginnings, has been wonderfully blessed. A large number of persons have been, it is believed, savingly benefited. Meanwhile the society has moved steadily forward, and in June, 1889, the original seven had increased to eighty-three members, the Scandinavian population being, at the last-named date, nearly six hundred, and on the 27th day of June the church was incorporated. But, from this time up to January, 1890, a large number, for reasons chiefly connected with the uncertainties of business, have left the city and settled in the West as farmers. This reduced the Scandinavian population during the closing months of the year to about four hundred, and of course, has seriously affected, financially and otherwise, the church.

But the church, though "faint, is yet pursuing." Meetings for worship are now held in Concert Hall, Savings Bank Building, Sunday mornings at 10.30, Sunday evenings at 7, and Wednesday evenings at 7.30 o'clock. The present members (January, 1890) number fifty-eight. The officers of the church, 1890, are: Elder, A. F. Simonson; Deacons, Sven Froberg, Aug. Erlandson, Alfred L. Olson and N. C. Olson; Moderator, Chas. R. Rosenquist; Secretary, Gustaf Anderson; Treasurer, Neils Olson; Standing Committee, Swan Ekmark, Sven Froberg, Alfred L. Olson and Ludvig Froberg; Organist, Gustav A. Svenson.

The communion service is on the second Sunday afternoon of each month. A Sunday-School and Bible Class were organized January 1, 1887, with twenty-five members. This number has since increased to seventy. The present officers are A. F. Simonson, superintendent; G. A. Svenson, secretary; A. L. Olson, treasurer.

The church has not, as it needs to have, a regular pastor. Indeed, it has had but one, Rev. M. Ahlberg, who came in 1889, and remained less than a year, the departure of so many during the year leaving those who remained unable to meet all the necessary expenses.

The church holds meetings every second Thursday evening in the Congregational Church at Winchester

with Scandinavians in that place. From one to three evenings each week, meetings for prayer and Bible study are held in Scandinavian homes in Woburn, from ten to thirty-five persons attending.

Considering the circumstances, the Scandinavian Evangelical Church and Society have accomplished a great and good work, and, indirectly, have thus favorably affected the whole community. They greatly need a religious home in a church edifice of their own, and, in the judgment of the present writer, the large-hearted members of other churches could hardly do a wiser or better deed of Christian kindness than to help them to secure it.¹

St. John Baptist Church.—This organization, originating with and sustained by the people of color in Woburn, is of very recent date. From the local papers we learn that the first meeting took place November 18, 1886, at the residence of Saunders Sims, on Everett Street. On the 5th of July, 1887, the organization was effected with seventeen members, and on the 17th of May, 1888, the church was formally recognized by delegates from other churches. Wilson Fitchett, John White and H. W. Dearborn were chosen the first deacons. Rev. J. M. Taylor had previously officiated as the first pastor. On the 5th of February, 1888, Rev. George G. Robinson had succeeded, but remained only till the following September, and, in 1889, he was followed by Rev. T. H. Thompson.

The society purchased a lot on Fowle Street for a house of worship, but, finding it to lack adaptation to their wants, at length abandoned it. During the summer of 1889 another and more desirable lot was presented to them by Geo. W. Holden, Esq., of Somerville, formerly of Woburn. On this lot, on Green Street, the corner-stone was accordingly laid with the usual ceremonies. Rev. Arthur Crane, of Boston read a manuscript history of the church, which was placed under the stone. Rev. Mr. Crane also preached a sermon from Luke vi. 43. After prayer and singing the audience was dismissed by the benediction from the pastor.

The Salvation Army.—The religious organization commonly known as "The Salvation Army" has, for some time, had an existence in Woburn. After considerable, though perhaps less systematic, work for several years, a regular "Branch," on the 7th of January, 1890, commenced operations, with a more definite and permanent aim in view for future work. In the words of one of their number: "Our aim is to evangelize the non-church-goers. We hold meetings nightly. We generally have an outdoor service; then a service in our hall. Our meetings are carried on in about the same line as all religious meetings; opened with singing and prayer,

a portion of Scripture being read. We are strictly temperate; no user of alcoholic drinks can be a member of our organization. We are a permanent society and always endeavor to get the good will of all churches. We are a law-abiding people.

"Our local forces consist of about fifteen members at present. The meetings are conducted by Army officers, the officers being generally changed once or twice a year.

"Meetings during the week commence at 8 P.M. Meetings, Sunday, at 11 A.M., 3 P.M. and 8 P.M.

"Captain George J. Henninger and Lieutenant H. Spange are the present (1890) officers in command."

BIOGRAPHICAL.²

LOAMMI BALDWIN.

Among the most prominent men of Woburn at the opening of the Revolutionary War and for more than a quarter of a century subsequently, Loammi Baldwin was universally acknowledged to be conspicuous. The fact that he descended from one of the oldest, most wealthy and most influential families of the town doubtless gave him, even in early life, advantages which but few enjoyed. But his native and acquired ability would have, in any circumstances, raised him far above the common level. His emigrant ancestor, Henry Baldwin, from Devonshire, England, was one of the subscribers to the "Town Orders" in December, 1641, at Charlestown, with the new settlement in view which, in 1642, was incorporated as Woburn, and he became one of the first settlers of the new town and of that part of it which is now known as North Woburn. Here, in 1661, he built the palatial house which is still one of the most imposing in the town, and which, though with some changes and occasional improvements, has been owned and occupied by his descendants down through six generations.

Loammi Baldwin³, (James³, Henry², Henry¹), the son of James and Ruth (Richardson) Baldwin, was born January 10, 1745. Evincing even in early life an unusual taste for study, he was long a pupil of "Master Fowle," who was celebrated as a teacher in Woburn for many years. On reaching young man-

² By Rev. L. Thompson. *

* It may be proper to say that, though the ordinary sources of information concerning the life and career of Colonel Baldwin are numerous and familiar to the writer of this sketch, he has thought it best, for obvious reasons, to draw the material for it almost wholly from the comparatively little known diary and numerous letters of Colonel Baldwin himself, kindly lent for the purpose by his granddaughter, Mrs. W. A. Griffith. Many family traditions and historical facts, furnished by George R. Baldwin, Esq., before his late decease, have also been freely used. In two or three instances, when the writer has gone outside of these sources, he has indicated the authorities for his statements.

L. T.

¹ For the material of the foregoing sketch, the writer is indebted to Mr. Charles R. Rosenquist, one of the original members and an active supporter of the Scandinavian Evangelical Society.

L. T.

Loumi Baldwin

hood he eagerly longed for larger opportunities for acquiring knowledge, and, having sought and obtained permission to attend the lectures of Professor Winthrop, of Cambridge College, he used, with his life-long friend, Benjamin Thompson, afterward known as Count Rumford, a young man of kindred tastes and aspirations, to walk to and fro, in order to enjoy the luxury of listening. On reaching home from time to time, they busied themselves, heedless of weariness, in constructing rude instruments for the purpose of illustrating the principles in natural philosophy which they had been taught in the Cambridge lecture-room.

There is evidence that Loammi Baldwin, in his younger years, had also a taste for military life. As early as 1768, when in his twenty-fourth year, a paper signed at Cambridge by "David Phips, Col.," certifies that "Mr. Loammi Baldwin has enlisted himself with His Excellency's Troop of Horse Guards, under my command." He was not, therefore, like many others, wholly destitute of military experience when suddenly summoned to join the Army of the Revolution. His own diary, though bringing to view no facts not otherwise known, has the freshness of a personal testimony:

"1775, April 19, Wednesday. This morning a little before break of day, we were alarmed by Mr. Stedman's Express from Cambridge. Informed us that the Regulars were upon the move for Concord. We mustered as fast as possible. The Town turned out extraordinary, and proceeded toward Lexington. I rode along a little before the main body, and, when I was nigh Jacob Reed's, I heard a great firing; proceeded on,—soon heard that the Regulars had fired upon Lexington people and killed a large number of them. We proceeded on as fast as possible and came to Lexington and saw about 8 or 10 dead and numbers wounded. . . . We proceeded to Concord by way of Lincoln meeting-house, . . . ascended the hill and pitched and refreshed ourselves a little. . . . The people under my command and also some others came running off the East end of the hill while I was at a house—and we proceeded down the road and could see behind us the Regulars following. We came to Tanner Brook, at Lincoln Bridge, and then concluded to scatter and make use of trees and walls for to defend us, and attack them. We did so and pursued on, flanking them (Mr. Daniel Thompson was killed, and others), till we came to Lexington. I had several good shots. The enemy marched very fast and left many dead and wounded and a few tired. I proceeded on till coming between the meeting-house and Buckman's tavern with a prisoner before me, when the cannon began to play, the balls flew near me, I judged not more than 2 yards off. I immediately retreated back behind the meeting-house, and had not been there ten seconds before a ball came through the meeting-house near my

head. I retreated back towards the meadow, north of the meeting-house, and lay and heard the balls in the air and saw them strike the ground."

The foregoing extract assumes that the writer was already an officer in command. From other sources we learn that he bore the rank of major, and that Woburn sent to the rescue no less than 180 men. Having enlisted in the regiment of foot under the command of Col. Samuel Gerrish, he was promoted June 16th, to the office of lieutenant-colonel, and, on the historic 17th of June, he was designated in the general orders as the field officer of the main guard. He was for some time stationed at Chelsea, and, while there with a small party of Americans, he was fired upon by a party of British soldiers, the attack being so vigorously and successfully met as to elicit marked commendation. To his wife, who had anxiously written to him in regard to his condition, he says, March 6, 1776, "I received your kind letter of yesterday, filled with expressions of anxiety and concern for me, during the late cannonade and bombardment. I have been pretty much fatigued and broken of rest. . . . I have had much to do, constantly keeping a party on Noddle's Island for spies to discover all the movements of the enemy. . . . We have been under arms and at a moment's warning ever since the cannonade began, some expecting the enemy would seek revenge by coming out against us and destroying what they could at Chelsea. But, through the goodness of God, I am still alive and in good health, and, if called to battle, I pray that the same Almighty Being will give me courage, and, if consistent with His divine will, protection also.

"Our works on Dorchester Hills are completing as fast as possible. The enemy's ships are all drawn up in line of battle before them, but are very quiet at present."

Upon the retirement of Colonel Gerrish from the army in August, 1775, Lieutenant Colonel Baldwin assumed the command of the regiment as colonel, though his commission as colonel of "the 26th Regiment of Foot in the Army of the United States," signed by "John Hancock, President of the Congress of the United States," is dated January 1, 1776. His regiment, which had been designated as the Thirty-eighth, and consisted of eight companies, all stationed in the vicinity of Boston, was, near the close of the year, enlarged to ten companies and thenceforward known as the Twenty-sixth Regiment.

Having been ordered to follow General Washington to New York, Colonel Baldwin writes, April 1, 1776, from Grafton, Mass., "I have this moment received orders to alter the route and go to Providence, R. I.," and, on April 3, he writes from Providence, where he arrived the previous night, and, with his regiment, is "quartered in the College." On the 6th of April, "Saturday, 2 o'clock, P.M.," he writes, "I have this moment arrived in Norwich, after a march of eight days. . . . I have just received orders to continue

my march to New London, where I expect to embark for New York."

April 10th in a long and interesting letter to his wife, Colonel Baldwin announces his arrival in New York, and relates some of his observations in and around the city, with evident zest. And on the 19th he writes: "This is the anniversary of the ever memorable 19th of April, when the present war commenced. I have been in the war during the whole time and am in good health. May 1, with a grateful heart, ascribe all to God Almighty, who is the author of all our mercies. . . . This city is grand, the buildings lofty and elegant. The streets are not so fine as those of Boston, but the buildings, I think, exceed."

"April 28: I know not when we shall leave New York; we go into tents this week. The encampment for my regiment is laid out near the Jews' burying-ground, joining the northerly part of the city. The army is healthy. . . . I have just returned from hearing the last of two of the best sermons (I think) that I ever heard in my life, preached this day to my regiment and some others, at Dr. Rogers' meeting-house, the afternoon sermon preached by the Doctor himself."

May 2d, he learns indirectly that his youngest child is ill with the "canker-rash," and on the 15th he hears directly that the child is very sick and declares that nothing short of his duty to his imperiled country could keep him from home and induce him to undergo, at such a distance from his family, the anxiety he feels for them.

May 21st: Still anxious for the sick child.

June 18th: Receiving a letter, dated June 1st, from his wife, announcing the death of the child and her own feebleness, he says of the news: "It so shocked me, I am unable to contain myself. . . . This is new trouble to us, and aggravated by our being at such a distance apart. My earnest desire is that we may not be separated from God's grace and favor, although we are separated so far from each other as not to be able to assist and comfort one another."

Four days later he writes: "We have this morning discovered a hellish plot, led by the Tories, to assassinate His Excellency, General Washington, and the principal officers of the army, and to afford all possible assistance to the enemy when they should attack us, having agreed on the place where they were to make their feint, and where their grand attacks, to blow up our magazine, etc. They have bribed a number of our soldiers in the Continental Army, four or five in the general's select guard, one or two in my regiment, chiefly old countrymen, and some in other regiments to the number of about fifteen, already found out, that belong to the army, and near fifty Tories. The mayor of the city of New York is one of the said infernal crew, and is in the dungeon, chief of the prisoners and in irons."

July 5th: "I have but just time to inform you

that the enemy's fleet arrived at Sandy Hook the 29th and 30th of June, and on the 2d, 3d and 4th of July came up through the Narrows and anchored off the northeast side of Staten Island, about four miles southwest of the city of New York, to the number of about 120 sail, all in plain view of our encampment. We have expected a battle every day since they came up to the island. This island is inhabited by none but Tories."

July 14th: After giving further details of the subject of the last letter, Colonel Baldwin adds: "Gen. Heath is this moment come to Camp, he informs me that a flag of Truce from Lord How, newly arrived from England, brother of General How, with a packet or single letter directed to 'George Washington, Esq.', was rejected and sent back on account of the direction. I suppose the generals insist upon its being directed to 'His Excellency, George Washington, Commander-in-Chief of the Army of the United States.' So we know nothing of the contents of the packet."

Thus far, in every letter to his family, Colonel Baldwin has described himself as enjoying vigorous health. But, on the 5th of August, he writes a few lines and employs a friend to write more fully, to inform his family that for a fortnight he has been seriously ill with universal pain, sickness and weakness of the stomach, inability to bear any food, great loss of strength and sleeplessness. For the comfort of his family, he adds that he has around him faithful friends who kindly care for him. As soon as he was able he came home for rest and recovery, and while here he received from Isaac Sherman, near the close of August and again on the 1st of September, detailed accounts of the progress of events at the seat of war. Those accounts were so full of startling incident that he could remain no longer at home, but hurried on his way as fast as he could safely do it, in order to rejoin his regiment. At Stratford, Conn., when on his journey, he learned that General Washington, in accordance with a plan previously arranged, had evacuated New York, and that the enemy was in possession of the city. September 28th he reports himself at Fort Constitution, New Jersey, where he arrived on the 25th, after a journey of nine days. "I found my regiment encamped," he says, "upon the utmost heights of the Highlands, about one mile west of Hudson River and nearly opposite Fort Washington, about twelve miles from the city of New York. It seems impossible to set a foot upon the ground for stones, or behold a star for trees; where we can scarcely build a fire-place because of the flat stones, or make a fire on account of the plenty of wood. You smile, but you would laugh if you were to see us here, elevated at least 400 feet above the level of mankind, where scarcely earth enough can be procured to eat with our victuals, or water to wash it down."

In a previous communication Colonel Baldwin

had, in allusion to a well-known rocky eminence in Woburn, described a portion of the region of New York as so rough a country that "Rag Rock would appear an inconsiderable knoll to some of the rocky and woody eminences on the Island and the Jersey shore."

October 1: Colonel Baldwin, still at Fort Constitution, reports himself "comfortable, but not strong and hearty," as he used to be, and the expectation of a "general engagement very soon."

October 12: Health quite feeble. Alarms and skirmishes.

October 20-23: "Camp at Mile Square, about five miles north of King's Bridge and near General Lee's quarters." Health increasingly poor. Account of various skirmishes and battle-scenes at White Plains, etc.

October 31: In a letter to his wife from the "Camp at White Plains," he gives a more detailed account of the recent fighting and the general anticipation of a more serious battle, and, in a long letter to his friend, Dr. Samuel Blodgett, of Woburn, dated North Castle, November 9th, he writes more in detail:

"The movements of the enemy made it necessary for the regiment to remove from New Jersey to York Island,—from thence to King's Bridge, East Chester, Mile Square, &c. About this time my regiment pitched and decamped nine times in seven days, and sometimes had to remove the whole baggage of the regiment without any assistance by wagons, carts or the like, or even of the soldiers, except a few over-slows.¹ Once, in particular, I had to make a remove under these circumstances upward of two miles and in the night, after I had been fatigued all day in the skirmish and exercised at the same time with a dysentery which has now followed me for near seven weeks. But I stood the hardships beyond my expectation, never having been discouraged nor found my spirits fail in the least. I have always endeavored to take lodging in a house, barn or some other place, so as to keep my body from the damps of the ground. However, I have been obliged sometimes to lodge in the common tent; at other times, on the bare floor or soft side of a board, without blanket or even anything but the common clothes to my back, and sometimes, though very seldom, in a good feather bed, and all the time to watch the motions, and defend or secure ourselves against the attacks of a restless and powerful enemy, whose movements have made it necessary to be under arms a great part of the time since our troops left New Jersey. Sometimes we have had to remove 12 or 14 hundred barrels of pork and flour a mile or two by hand to keep it out of the hands of the enemy. . . . Sometimes my regiment, together with others, have had to lodge two or three nights together upon the bare ground without any tents to cover them. I have not had my clothes off but three times for about a fortnight. . . . *Thus a soldier lives, sometimes better, but never worse.*"

The letter from which the foregoing extract is given proceeds to give a full and deeply interesting account of the scenes that preceded, accompanied and followed the battle at White Plains. But it is far too extended for insertion here.

Omitting, from necessity in this sketch, a large amount of Colonel Baldwin's narratives of his army experience, our limits admit of only the following from a letter to his wife dated from "Camp, 5 miles west of the Delaware, and 30 miles above Philadelphia," December 19, 1776:

¹ This word, nearly illegible in the manuscript, seems to designate those soldiers who did not keep up with the army,—the laggards or stragglers.

"If I were at home, I should think myself sick enough to keep house, but *here* feel myself in good spirits. . . . I am determined to exert myself to the last, and have no neglect of mine to reflect upon. I trust in the skill of my commanders, and have cheerfully executed the orders I have from time to time received from them. . . . The enemy have penetrated much further into the country than I expected they would be able to do this fall. They have made great destruction in their route through New Jersey. They now lay at Burlington and Trenton, on the east side of the River Delaware, and Gen. Washington's Army are on the west over against them, where I expect we shall arrive and form a junction to-morrow."

"On the 3d inst. marched from Peekskill for King's Ferry. Very rainy all day. Crossed the river just before night. Pitched our tents in New Jersey by the side of the mountains, took my lodging in a common tent upon the wet ground; very cold, there being no house to go to. In the night the rain increased, and the flood came down from the mountains, and ran in torrents among and through our tents, and almost washed them away. I had no bed nor blanket except a thin piece of drigget. . . ."

All the marching army under Gen. Lee received orders at Peekskill not to take anything with them but one shirt and one pair hose more than what they commonly wore.

"Dec. 4: Struck our tents in the morning and marched to Haverstraw. Rained by showers all day, exceeding bad traveling. Ordered to pitch our tents about one o'clock, which we did. Soon after came orders to strike and march two miles further, which we did, and pitched under the grand mountains at the landing at Haverstraw Bay. Lay in my tent."

Thus the long communication notes the incidents of experience from day to day; the marches and countermarches, the snow, the rain, the cold weather, with no house nor refuge; yet, on his part, excruciating suffering. It is not strange that, at the close of his letter, he hints an intention to be ere long at home. It does not appear from his communication when he resigned his commission, but there is reason to believe that it was not long after the battle of Trenton, December 26th, as he expresses a hope that he shall be at home "some time in the latter part of January, and sooner, if possible." It appears, in any case, to have been early in 1777 when he received an honorable discharge from the army. It is proper, in this connection, to say that he had been on the most friendly terms with both officers and men. From Gen. Washington he had received special commendation for his fidelity and skill, and in repeated instances notes of invitation to dine with him.² In his resignation, therefore, there is no evidence that he was influenced by the slightest disaffection, either on his own part or on the part of others, but abundant evidence in the nature of his physical ailments that he did not retire from the army a day too soon.

Of Col. Baldwin's life and career at home our limits do not admit of minute detail. He was far from being an idle man. In one enterprise and another he was incessantly engaged. Honored by the town as an

² General Washington's compliments to Col. Baldwin. Requests the favor of his company at dinner to-day, at three o'clock. Thursday morning, April 25th."

"General Washington's compliments to Col. Baldwin. Requests the favor of his company at dinner to-day, at three o'clock. Thursday morning, June 20, 1776."

officer in 1781; as a member of nearly every committee, and generally chairman, for many years; as representative in the General Court in 1778, 1779 and in 1780, and again in 1800 and the four immediately succeeding years, he must have felt that his fellow-citizens respected and trusted him.

Nor were Col. Baldwin's offices and honors limited to Woburn. In 1780 he was appointed high sheriff of the county of Middlesex, the first after the adoption of the State Constitution to hold that office. He was candidate for State Senator, for Lieut.-Governor of Massachusetts, and elector of President of the United States. "At the election of representative to Congress in 1794 he had all the votes cast in Woburn but one. In August and September, 1796, he had all the votes, and in November of that year, at the third trial for the choice of the same officer, he had 74 out of 76 that were then cast in Woburn."¹

On January 30, 1782, Col. Baldwin was elected a Fellow of the American Academy of Arts and Sciences; was member of the Council from 1785 to 1796, and again from 1797 to 1807, and a member of the Committee of Publication from 1784 to 1785. To the publications of the Academy he contributed two articles, one on "The curious appearance of the celestial fluid produced by raising an electrical kite in the time of a thunder shower," and another entitled "Observations of electricity and an improved mode of constructing lightning-rods." Both these papers clearly show that he had by no means lost his early taste for scientific study and experiment.

In 1785 Col. Baldwin was made Master of Arts by the Corporation of Harvard College, and manifested in various ways, ever after, as before, his warm interest in that venerable institution.

The name of Loammi Baldwin is widely associated with that of Benjamin Thompson, better known now and famed afar as Count Rumford. In childhood they were near neighbors, playmates and schoolmates. As young men they were associated in attending scientific lectures at Harvard College and in practical experimenting. In maturer life, when Thompson was under suspicion and hasty accusation, Baldwin steadily befriended him; was a member of the court that tried and acquitted him,² and in various ways, notwithstanding his own lofty and undisputed patriotism, he vindicated his neighbor's loyalty, and in their subsequent life the two were, to the last, enthusiastic friends and correspondents, though separated by the

waters of the Atlantic. All this seems the more remarkable when it is considered that in his letters to his family he repeatedly expresses the most intense antipathy and disgust for *Tories* with whom he came in contact while in the army. Though he evidently regretted certain unfortunate errors and circumstances in Thompson's career, he clearly did not believe that he was a genuine Tory.

Colonel Baldwin was widely and favorably known as a projector, one of the principal proprietors and an assistant engineer in surveying the route and in the construction of the Middlesex Canal. From first to last, while the work was progressing he was most assiduous in the responsible business of superintending and guiding the numerous workmen. And when, in 1803, the work was completed, he arranged for a grand jubilee in the spacious house near his home, which he had previously bought of his old friend, Dr. Samuel Blodgett. This well-known house, owned by the Baldwin family for many years, at length passed out of it, and at present is known as the "Wheeler house."

Colonel Baldwin was also extensively known in connection with the famous apple which he zealously cultivated and introduced to the public and which now bears his name. After bearing for many years, the names successfully, of Butters, Thompson and Pecker, it came at length, long after his death, to be known by his name in honor of his interest in it and his special efficiency in spreading it abroad.

From the material at hand, it would be both easy and pleasant to extend to far greater length, this sketch of the life of this distinguished son of Woburn. But our limits do not admit of it.

In his domestic relations Colonel Baldwin was significantly favored. He married, first, July 9, 1772, Mary, daughter of James Fowle, one of three or four of the old Fowle family who, at the same time, bore the same name. She was the mother of five children—Cyrus, Mary, Benjamin Franklin, Loammi and James Fowle. All except Mary, who died in childhood, lived to maturity, had families, and were in various ways highly distinguished.

Colonel Baldwin's first wife dying suddenly September 26, 1786, he married, second, May 26, 1791, her cousin Margaret, daughter of Josiah Fowle. She was the mother of two children—Clarissa, who married Thomas B. Cooledge, and George Rumford, who, as the last representative of the old family, bearing the name of Baldwin, in Woburn, died in the Baldwin Mansion October 12, 1888, leaving one daughter (now Mrs. W. A. Griffith).

Colonel Baldwin's second wife, Margaret, died October 8, 1799. He survived her eight years and died October 20, 1807. From manuscript notes of William R. Cutter, the librarian of Woburn, we are permitted to take the following:

"A marble tablet on a granite obelisk surmounting a tomb of probably later construction on the highest

¹ Sewall's *History of Woburn*, p. 387.

² Among Col. Baldwin's frequent allusions to Thompson in his diary and letters is the following:

"1775, May 29, Monday: Obtained leave of the General to go to Woburn. Went. Decided the affair of Major Thompson and acquitted him."

At a previous date, May 18, 1775, we have the following entry in his journal:

"At a Court of Inquiry into the conduct of Major Thompson, of Concord, New Hampshire, convened at the Meeting-house of the 1st Parish, in Woburn, on Thursday, the 18th of May, 1775, at 2 o'clock p.m., by the Committee of Correspondence of said town."

Hygiea Thompson

summit in the Woburn first burying-ground, contains the following inscription, put in place, it is supposed about 1810, after the town had granted permission that such a tomb be built.

"To the memory of the Honorable Loammi Baldwin, who died October 20, 1807, æt. sixty-three. Erected by his children.

"For a long period this monument was the most imposing structure of the kind to be seen in the town. It is about ten feet high and is constructed of nine courses of granite ashlar, crowned by a pyramidal granite cap. The entrance to the tomb beneath the obelisk is concealed with earth."

GEN. ABIJAH THOMPSON.¹

Not many men have lived in Woburn more favorably known and respected in the world of honorable and successful enterprise than the man whose once familiar name is at the head of this sketch. Descended from the emigrant, James Thompson, who, in 1630, came in Winthrop's choice company to the new world and settled, first in Charlestown, and, in 1642, became one of the first settlers and magistrates in the newly incorporated town of Woburn, General Abijah Thompson could trace his line of descent back through six generations of men, all of whom lived and died in that part of the town now known as North Woburn. His father, Major Abijah Thompson, was the oldest son of Sheriff Abijah Thompson, in whose large house, formerly a public-house, but now owned and occupied by the heirs of the late Oliver Fisher, the subject of this sketch was born May 20, 1793. In 1800 Major Abijah Thompson built a house a few rods north of the old homestead. In this new house, now owned and occupied by Henry Thompson, he reared his young family and had his home till his death, in 1820. Besides his business as a mechanic he kept, in a part of his house, a country store. But, though highly respectable in character and comfortable in circumstances, he could afford to give his sons only the very limited opportunities, common at the time, for educational culture. The wide world was before them as they grew to manhood, and they had to find their way through it. At the early age of seventeen, Abijah, the oldest of the children, embarked, without experience and wholly unaided from without, upon the tumultuous, and, to him unknown sea of business life. In a loose paper, discovered after his death, was found, in his own handwriting, the following condensed account of what followed this first step in his career: "In 1810 I left home at the age of seventeen to become an apprentice in the business of tanning and currying leather, and served four years. At the age of twenty-one I commenced business for myself, buying leather in the rough and dressing it with my own hands, in Medford. I began

with two dollars capital, selling in small lots, from one to six sides, to shoemakers from adjoining towns, for one year. I then left and built a small tannery with sixteen vats, in the west part of Woburn, grinding my bark with a horse and stone, and tanning what few hides I could find among the farmers,—from one hundred to one hundred and fifty a year.

"I had two apprentices. Buying leather from the tanneries in the county, and dressing it, I then took my horse and went to Reading, Stoneham, Malden and other adjoining towns, where I sold to shoemakers from four to five sides each about every other week. At the same time I picked up the hides among the farmers as they killed their animals in the fall of the year. Thus I increased my business, as capital increased, for about ten years. I then bought a tract of fifteen acres of land, with a small water privilege, near the centre of the town. It was a very rough place, but I commenced clearing it up, built a dam, and erecting a building, put down twenty vats, enlarging by degrees my business as I gained in capital, and each year putting down more vats. In 1835, finding my water-power not sufficient for the business, I put in steam-power and other machinery, and, in 1836, I took in Stephen Dow as a partner."

This short account involves details which a stranger to the business would not even suspect. From these small beginnings General Thompson's business went on increasing in its extent and importance until he was one of the largest and most successful manufacturers of leather in the United States; and by all who knew him he was ever regarded as no less honorable than he was successful. And when, in 1866, he retired from active participation in the business, though tanning and finishing leather at the rate of fifty thousand sides per annum, and having a large leather store in Boston, not one unpleasant word and not one suspicious look had ever occasioned a jar between him and his partner, or between him and any man with whom he was concerned. No suspicion of trick, or unworthy resort to any species of sham, ever rested upon him for a single day. He well knew what "the day of small things" meant: and he had his trials, sometimes numerous and severe. But whatever else he sacrificed, he never sacrificed a principle nor had a principle for sale.

In the early days of his enterprise General Thompson was obliged and not ashamed to practice rigid economy. When his young wife, then in very poor health, needed a nurse, which he was not able to employ, he cheerfully became nurse himself, but removed his carrying-beam from his shop to the sick-room, so that he could perform the double duty of shaving leather and caring for the sick one until her recovery.

Immense as his business finally became, and great as was the burden of care and responsibility resting upon him, no man was ever further removed from bluster or noisy pretence than General Thompson.

¹By Rev. L. Thompson.

With wonderful equanimity he always seemed calm, self-contained and unpretending. His speech never betrayed a loss of balance or self-respect. Seeing and deploring the evils of intemperance and low and profane talk around him, he, for years, made it a law of his establishment that no intoxicating liquors and no profane language should be used by men in his employ. Those who were addicted to either and unwilling to abandon the bad habits, need not apply for employment. Yet the law was made and enforced so quietly, so wisely and so kindly that there was never any "strike" and never any serious difficulty. To some of his workmen the measure was the means of permanent reformation and very manifest benefit.

Though General Thompson was one of those men who never sought and apparently never desired office—offices from all quarters sought him. He had an inherited fondness for military life and early joined a company of artillery in Lexington. From the office of sergeant, in 1824, he rose, in 1826, to that of captain, in 1828 to that of major and in 1835 to that of brigadier-general—the last-mentioned commission being given by Governor Armstrong and the two former by Governor Lincoln. In the town he served several years on the Board of Selectmen. He was for many years president of the Woburn Bank, and also of the Woburn Five-Cent Savings Bank; one of the original directors of Faneuil Hall Bank, of Boston, a director of a bank in Charlestown and, for many years, one of the active managers of the Middlesex Insurance Company in Concord.

General Thompson was unquestionably one of the most public-spirited men ever resident in Woburn. No great and important enterprise failed to enlist his sympathy and aid. He was among the first, if not the first, to move in the effort to secure the Woburn Branch Railroad, the Woburn Gas Company and the bank, of which he was long the president. In his relations to the parish and church of his choice, he was also ever ready to help on every good work. And always regretting his own early lack of educational advantages, he evinced a like interest in the schools, and especially the academy of his native town, of which he was a trustee and the treasurer, and to which he left, in his will, a considerable sum of money, as he did also to the First Congregational Church, of which, from his early manhood, he had been a member. Of his large fortune, accumulated by his own honest industry and enterprise, it is pleasant to know that a large number of worthy objects received a share.

In his domestic relations General Thompson was peculiarly happy. On the 29th of April, 1814, when he was not quite twenty-one years of age, he married Celende, daughter of Captain William and Arethusa (Munroe) Fox, of Woburn. The mutual experiences of joy and sorrow, of adversity and prosperity, continued through more than fifty years of married life, proved that she was one of the best of wives and mo-

thers, and he one of the best of husbands and fathers. Of their "golden wedding," observed April 29, 1864, the local papers gave a deeply interesting account. After various appropriate exercises, including music, addresses from Rev. Jonathan Edwards, a former pastor of the family, and Rev. Dr. J. C. Bodwell, the pastor at the time of the festival—the latter read a beautiful poem, suited to the occasion and subsequently published.

General Thompson survived his wife nearly two years, she dying September 11, 1866, and he June 7, 1868.

They had four children: 1. Celende, born February 13, 1816, married Stephen Dow, May 24, 1836, and had seven children; 2. Abijah, born June 13, 1818, died September 11, 1826; 3. Julia Ann, born September 16, 1827, married J. B. Doyle, June 1, 1854, and died in 1867—had two children; 4. Abijah Franklin, born September 17, 1829, married Mary E. Wyman, May 15, 1851, and died August 5, 1861, leaving one child, Arthur Abijah, now of Brooklyn, New York.

Of the business firm of which General Thompson was the founder, it is proper to add to the foregoing sketch that, though represented from time to time since his death by various other names, it is still in existence and still vigorously prosecuting its appropriate enterprise under the names of his grandsons,—Messrs. Alfred Abijah and Edward Augustus Dow.

JONATHAN B. WINN.¹

Jonathan Bowers Winn, to whose liberality and property the Woburn Public Library owes its existence and its present extensive endowment, belonged to a family which had contributed to Woburn, from the period of the town's first settlement, many of its most prominent and influential citizens. The first-born child recorded in Woburn was Increase Winn, born December 5, 1641, the son of Edward and Joanna Winn, the ancestors of all the Winns of Woburn. Edward Winn was of Woburn, 1641; made freeman 1643, and taxed in Woburn, in the rate for the county, September 8, 1645. His daughter Ann, the wife of Moses Cleveland, of Woburn, is the ancestor of Grover Cleveland, ex-President of the United States. Edward Winn, the family ancestor, died in Woburn, September 5, 1682. From Edward Winn, the early settler, the Hon. Jonathan Bowers Winn traced his descent, through Edward's son Joseph, who was born in England, and who, known as "Ensign Joseph Winn," died in Woburn on February 22, A.D. 1714-15; and Timothy Winn, son of Joseph, born in Woburn, February 27, 1686-7, died January 5, 1752, aged sixty-five. His gravestone is standing in the Woburn first burying-ground. His son, Timothy Winn, born about July, 1712, was a gentleman

¹ By W. R. Cutter.

Jonathan Pease

of note and of much influence in his day. He was a native of Woburn, and his place of residence falling within the bounds of Woburn Precinct, he joined the Precinct Church May 4, 1740, and was chosen a deacon of that church December 26, 1752, an office which he held during life, and hence came the reason why he was better known and generally recognized as Deacon Timothy Winn. He was a man noted for his industry, economy and success in amassing wealth. He was chosen one of the selectmen of the town in 1756-57, and again in 1773-74-75. He represented Woburn in the General Court 1787-88 and 1791; and in December, 1787, he and James Fowle, Jr., were chosen delegates for Woburn to the convention which met in Boston, January 9, 1788, respecting the ratification of the Constitution of the United States. In all the early attempts to set off Woburn Precinct as a separate town, he was opposed, it is said, to the measure; but he favored, it is understood, the last attempt, which proved successful. But he did not live long to enjoy the success of it. He died March 3, 1800, aged eighty-seven years and eight months, a few days more than a year after the act of Court incorporating the Second Precinct as a town, by the name of Burlington. By his wife, Mary (Bowers) Winn, Dea. Winn had two children that lived to mature age, viz., Timothy, born at Woburn December 20, 1740; and Mary, born June 21, 1743, and married, January 2, 1777, to Col. John Waldron, of Dover, N. H. Dea. Winn's son Timothy, distinguished in Woburn records as Timothy Winn, Jr., and as Ensign Timothy Winn, was a gentleman highly respected and esteemed. He married for his second wife Mary Bridge, daughter of Rev. Ebenezer Bridge, of Chelmsford. By her he had, among other children, the late Col. William Winn, of Burlington and Woburn, who was the father of the Hon. Jonathan Bowers Winn, of Woburn. Among other families descended from the first settlers of Woburn, Mr. Winn traced his descent to those of Reed and Brooks and Walker.

Hon. Jonathan Bowers Winn was born in Burlington, August 24, 1811, a son of Col. William and Abigail (Walker) Winn. As we have shown, he traced his lineage through Col. William⁶ (his father), and Ensign Timothy⁵, Deacon Timothy⁴, Timothy³ (died 1752), and Ensign Joseph² (died 1715), to Edward¹ Winn (died 1682), one of the first settlers of Woburn. He was, therefore, in the seventh generation of the family in this country. His father died April 13, 1856, aged seventy-one; his mother, May 11, 1826, aged forty.—Family monument. Hon. J. B. Winn, in early life, taught school at Wilmington and North Woburn, and, after learning the currier's trade, became a partner of the leather-manufacturing firm of John Cummings & Co., and in 1837 started in business for himself, and in 1841 established the leather-manufacturing firm of J. B. Winn & Co. In 1843-44 he commanded the local military company known as

the Woburn Mechanic Phalanx. He filled many minor offices in the town, and in monetary and other institutions. He was elected delegate to the State Constitutional Convention in 1853, and, as already shown, gave the money he received for his services to establish the Woburn town library. During the Civil War of 1861-65 he was the most active citizen in raising money for furnishing soldiers, and became responsible for large sums of money, when the town was in doubt about their legal right to pay bounties to soldiers enlisted by the town. He was one of the founders of the present Woburn National Bank, and was elected president of that institution at the decease of General Abijah Thompson. In 1869 he was elected a member of the Governor's Council of Massachusetts, and was re-elected to that high executive office till the year 1873, when declining health admonished him to retire from public life. He was a liberal supporter of the Unitarian Church in the town of Woburn, and appeals for assistance by other churches seldom were unheeded. He was a man of strong will and unswerving integrity—his word was as good as his bond, and his death was deeply felt by the citizens of Woburn. He died at his residence, on Pleasant Street, in Woburn, at one-and-a-quarter o'clock, Friday morning, December 12, 1873, aged sixty-two years.

His funeral was a notable event in Woburn; attended by the Governor and Council, and a large company of strangers and citizens.

The Hon. J. B. Winn married Nancy W. Cummings, daughter of Deacon John Cummings, of Woburn, born December 16, 1814. She died at Woburn, March 24, 1863. By her he had two children only, both born at Woburn, viz.:

Marcia Ann, born August 25, 1836; married Hon. Edward D. Hayden, of Woburn, and died at Woburn January 8, 1862.

Charles Bowers, born May 15, 1838; unmarried; died December 19, 1875. A notice of him is given under the title of the Woburn Public Library, of which he was the generous benefactor.

TIMOTHY WINN.¹

Timothy Winn, a brother of the Hon. Jonathan Bowers Winn, was the son of Colonel William and Abigail (Walker) Winn, and was born in Burlington, September 25, 1817. He was a partner of the firm of J. B. Winn & Co., leather manufacturers, and by his ability and strict attention to business contributed much to the success of that firm. He commanded for many years the military corps known as the Woburn Mechanic Phalanx, which, during his captaincy became one of the best drilled companies in the State. By a coalition of the Democratic and Free Soil parties in 1851, he was elected as a representative

¹ By W. R. Cutter.

to the Legislature of 1852, and in 1860 he was chosen a delegate to the National Republican Convention, held at Chicago, which nominated Abraham Lincoln for the Presidency. Although not holding any local town office, and always declining every attempt to put him in nomination for one, he was always active, by influence and vote, for all those measures which tended to elevate and improve the town.

He had a more extensive acquaintance with the leading military and public men of the county, and was probably better known to them than any other person in Woburn. There was a magnetism about him that seemed to inspire others with the energy and spirit which animated him. In the caucus, at the military parade, in the social circle, his presence was a power which largely contributed to success.

He married Abigail Maria, daughter of Ezra and Susanna Kendall, April 20, 1843, by whom he had two children—Otis Kendall, born June 17, 1844, married Addie B. Norris, June 17, 1866, and died January 23, 1868; Susan Maria, born May 1, 1849, married Daniel H. Lane, of Boston, January 11, 1871. About eight years before his death he was attacked with a disease which the best medical skill was powerless to cure, and at times his sufferings were intense; yet he bore them all with a brave and manly spirit. He died in Woburn, November 28, 1873, aged fifty-six, and his funeral services were held in the Unitarian Church, Tuesday afternoon, December 2d.

In his charities he was generous without parade, and there were many in the community whose burdens in life were made lighter by his timely bounty. He left a property estimated at a large amount. He gave, among other bequests, \$3000 to the town library, \$3000 to the town for the cemetery, and \$5000 to the Unitarian Church.

COL. MOSES F. WINN.

Col. Moses F. Winn, son of Moses and Sally (Johnson) Winn, was born in North Woburn, March 5, 1806. He married Abigail, daughter of Stephen and Abigail (Tidd) Nichols, August 30, 1830, and died August 8, 1875. On his father's side he was a descendant of Increase Winn, the first child born in Woburn, and on his mother's, from Edward Johnson, author of a rare work entitled "The Wonder-Working Providence." Mr. Winn was so largely identified with the growth and progress of the town that a mention of the public places he has filled will suggest the respect and esteem in which he was held by his fellow-townsmen. He was one of the selectmen in 1855 and 1856, for several years an overseer of the poor, one of the committee to lay out the cemetery in 1841, and the beauty of the "city of the dead" is largely due to his good taste. He retained his position on the cemetery committee up to the time of his death, a period of thirty-two years. He was prominent as a member of various committees for

public buildings and other purposes. He was elected one of the directors of the Woburn Bank at the time of its incorporation in 1853, director of the Woburn Agricultural and Mechanics' Association in 1841, and trustee of the Woburn Five Cent Savings Bank in 1854. All of these positions he held at the time of his death. He was also president of the North Woburn Street Railroad Company and one of the firm of Nichols, Winn & Co., shoe manufacturers, and Winn, Eaton & Co., leather manufacturers at North Woburn. He was colonel of the Fifth Massachusetts Volunteer Militia, and was the predecessor of Colonel Green, commanding the regiment at the muster at Groton. But he excelled mainly in the sweet and unostentatious charity of his neighborhood life. He was foremost in everything that tended to develop the natural beauty of the town or promote the good morals of the community.

He aided largely in building the Congregational meeting-house.

The poor and suffering found in him a sympathizing friend. He felt a tender interest in young men, and counseled them to manliness, honesty, sobriety and economy, that they might win for themselves the respect of their fellows and live lives of real value to the world. Colonel Winn was one of Woburn's most esteemed citizens, and his many good works are held in grateful remembrance.

JOHN JOHNSON.

Mr. John Johnson is the eldest son of John and Sarah (Kendall) Johnson, and was born in that part of Woburn known as Cummingsville, Feb. 12, 1814. He is a lineal descendant, in the eighth generation, of Capt. Edward Johnson, the line of descent extending through Edward¹, William², Edward³, Samuel⁴, Reuben⁵, Reuben⁶, and John⁷. According to the will of George Johnson, who died in Maryland in 1681, Capt. Edward Johnson was the son of William Johnson, who owned property "in Canterbury, Kent County, Old England, in a parish called Alfdige, over against the Bishop's Palace."¹

As a boy, the subject of this sketch attended the "Mountain School" in Burlington, and the "West-Side School" on Cambridge Street, in Woburn, for about three months in winter and six weeks in summer. In Oct., 1831, he took charge of his grandfather Kendall's farm, receiving for his services seven dollars a month in winter and twelve dollars a month in summer. Being under age, he gave his father one-half of these wages, and with the residue, in Dec., 1832, he paid his tuition at the Warren Academy for the winter term of 1832-33. It was his intention and ambition to educate himself for the Universalist ministry, but, frustrated in this purpose and dissatisfied with farming, he resolved to learn a trade. His

H. F. Wilson

John Johnson

John Combs

friend, John Cummings, urged him to become a currier, but the manufacturer of whom he sought employment was unwilling to accept him as an apprentice unless he would attend either the Baptist or Orthodox Church, a condition with which he would not comply. In April, 1833, he went to West Cambridge (now Arlington) and became apprenticed to his uncle, Isaac Hall, a wheelwright, whose wife, *née* Hannah Kendall, was a sister of Mr. Johnson's mother. He remained with Mr. Hall as an apprentice for two years, receiving thirty dollars the first year and thirty-five dollars the second year for his services. In the spring of 1835, about six weeks after he had attained his majority, he left West Cambridge and went to work for Thaddeus Parker, whose shop stood at the junction of Pond and Cambridge Streets, in Woburn. He afterwards worked at his trade for Oliver Parker, and in 1839 he built a shop and excavated the mill-pond on Burlington Street, in Cummingsville, and engaged in business on his own account. He followed his trade here until 1854, doing more or less of a farming business during that period on land purchased of his father.

On March 1, 1854, he was elected treasurer of the Woburn Agricultural and Mechanic Association at an annual salary then of \$300 only. He still retains this position.

In Nov., 1864, he succeeded Bowen Buckman as a director of the First National Bank of Woburn, and subsequently became vice-president of that institution, a position which he still holds.

In the administration of municipal affairs he has been somewhat prominent. With the exception of the year 1854 (when he was one of the selectmen) he held the office of town auditor for the twenty-nine successive years beginning in 1847 and ending April, 1876. He was a member of the Board of Selectmen in 1854, an assessor in 1851, 1852 and 1860, and has served on the School Committee seventeen years in all, being a member of that board as early as 1848 and as late as 1880. In April, 1873, he was chosen to succeed Nathan Wyman as town clerk, but declined to serve. He was an executor named in the will of Charles B. Winn, and was one of the committee who had in charge the building of the Woburn Public Library. In politics Mr. Johnson has been a Whig and a Republican, although he voted for Greeley in 1872. He was an active member of the First Universalist Society of Woburn so long as it retained its separate organization, and since its union with the First Unitarian Parish he has been prominently identified with the latter body, and has been one of its deacons for many years.

Mr. Johnson has always evinced an interest in local historical and antiquarian matters and by research among probate papers and early deeds has established the fact that the homestead of his ancestor, Capt. Edward Johnson, is identical with that of the present J. R. Kendall farm, situate on Cambridge and

Russell Streets. Capt. Edward Johnson gave it to his grandson William (son of his son John), who sold it to Thomas Kendall by deed dated Dec. 11, 1688, and recorded with Middlesex Registry of Deeds, book 10, page 112. The property has ever since remained in the Kendall family.

Mr. Johnson has been twice married. His first wife was Rosella Malvina Waldo, daughter of Shubael and Rebecca (Crosby) Waldo, of Chesterfield, N. H. She died June 8, 1845, leaving one child, Rosella Annette (born May 11, 1845, died Feb. 22, 1846). His second wife was Julia Ann Bulfinch, daughter of Amos and Hannah (Coombs) Bulfinch, of Woburn. By her he has had three children, all living—Rosella Maria, John Warren and Edward F. Johnson.

HON. JOHN CUMMINGS.¹

Hon. John Cummings was born in Woburn, October 19, 1812. He came of a Scotch family found in Watertown in the early days of the Massachusetts Colony. His great-grandfather moved from Andover to Woburn in 1756, and bought the estate on which Mr. Cummings now lives.

Mr. Cummings was largely self-taught, but had for a brief time the advantages of the Warren Academy and of the school at South Reading. Entering business, Mr. Cummings engaged in the tanning and currying industry, associating with himself, sooner or later, John B. Alley, Charles Choate, Leonard B. Harrington and Leonard Harrington. In 1868 he became president of the Shawmut National Bank of Boston, which office he now holds. He has served in both Houses of the Massachusetts Legislature; was a member of the Centennial Board of Finance, which redeemed from failure and conducted to a triumphant success the Philadelphia Exhibition of 1876, and was also one of the judges of the Exhibition. He has served as a director in the Perkins Institution for the Blind, and in the Massachusetts Institution for Feeble-Minded Children.

Mr. Cummings early developed decided scientific tastes, especially in the department of natural history, and made acquirements which, considering the occupation of his time by business cares and duties, are remarkable. He has always been an enthusiastic agriculturist, with an ardent interest in the application of scientific principles to the cultivation of the soil.

His most intimate public relations, in his later life, have been with the Boston Society of Natural History, the Agricultural College at Amherst and the Massachusetts Institute of Technology, to all of which he has rendered inestimable services. Of the last-named institution he was for seventeen years the treasurer, as well as a member of the Executive Committee of the Corporation from the organization of

¹ By Gen. Francis A. Walker.

that committee. To his courageous acceptance of responsibility and his strong financial support the friends of the school largely attribute its rescue from pecuniary embarrassment and its subsequent remarkable development. By a vote of the corporation in 1889, when he retired from the office of treasurer, Mr. Cummings' name was applied, in perpetuity, to the Laboratories of Mining Engineering and Metallurgy, in recognition of his services.

Mr. Cummings' remarkable disinterestedness in public life, his severe integrity, combined with great kindness in personal intercourse, his powerful intellectual grasp and strong Scotch-American sense have made him one of the most useful citizens of his native Commonwealth.

CHAPTER XXXII.

SHIRLEY.

BY REV. JOSEPH CREHORE.

SHIRLEY was originally a part of Groton. It was set off from the parent town and incorporated as a district of the Province of Massachusetts by an act of the General Court at its session in January, 1753. Six years previously, at the March meeting of the town of Groton, the following petition, signed by John Whitney and thirty-two others, asking for the separation, was presented:

"To the inhabitants of the town of Groton, assembled in town-meeting on the first day of March, 1747:

"The petition of us, the subscribers, being all inhabitants of the town of Groton, aforesaid, humbly sheweth that your petitioners all live in the extreme parts of the town, and by that means are incapacitated to attend public worship constantly, either ourselves or families; and being sensible of our being set off in order for a precinct will be of great service to us, we desire that we may be set off by the bounds, viz., beginning at the mouth of the Squannacook river, and so run up said river till it comes to Townsend line, and then by Townsend and Lunenburg lines till it comes to Groton southwest corner, and so by the south line in said town until it cometh to Lancaster (Nashua) river, and then run down said river till it cometh to Harvard corner, and then about a mile on Harvard north line, and then turn to the north and run to the waste brook in Groton (Hansen or Nomanen's farm, where people generally pass over, and from thence to the mouth of Squannacook river, where we first began, and your petitioners as bound in duty will ever pray, etc. John Whitney, John Williams, David Gould, John Kelsey, Phineas Bart, Joseph Wilson, Thomas Loughton, James Patterson, Jonathan Gould, Robert Henry, John Williams, Jr., Jacob Williams, William Furwell, Thomas Longley, Oliver Furwell, Isaac Holden, Jonathan Holden, Phineas Holden, Stephen Holden, Jr., William Simonds, William Preston, William Williams, Henry Furwell, Isaac Furwell, John Russell, James Park, Daniel Page, Joseph Dodge, Moses Bennett, Jr., George Beckett, Francis Harris, Caleb Holden, Elizabeth Sawtell."

The petition was read "at the anniversary meeting in Groton, March 1, 1747, and the prayer thereof granted, except the land on the easterly side of Lancaster (Nashua) river." A delay of nearly six years occurred after this action of Groton consenting to the division before an act of incorporation was obtained from the General Court. This was passed and ap-

proved at its session in January, 1753. A small addition to the territory embraced in this act was made on the southern line by the Legislature of 1765, and a few changes have been made since that date, the most important of which was in 1871, when all that part on the east of the Nashua River was taken for the new town of Ayer. As at present constituted, it contains an area of about sixteen and a half square miles, and is quite irregular in form. From its extreme north point to its southern line it is seven and one-half miles, and its greatest width four miles. The Squannacook River bounds it north and east, runs southeasterly from the Townsend line on the west to near the centre of its eastern line, making the extreme north an acute angle. Groton joins it on the north, Groton, Ayer and Harvard on the east, Lancaster on the south, Lunenburg and Townsend on the west. Its distance from Boston is thirty-eight miles. The name of Shirley was given it in honor of William Shirley, Governor of the Province of Massachusetts at the time of its incorporation.

The first meeting of the district after the act of incorporation was held March 1, 1753. The warrant calling this meeting reads as follows:

"Middlesex, ss. To Nathaniel Harris, in Shirley, in the District of Groton, in said County of Middlesex. Greeting:

"By virtue of the power and authority given to me, the subscriber, by an act of the Great and General Court of Massachusetts Bay, in New England, for dividing the Town of Groton, and making a District by the name of Shirley, to call the first meeting of the inhabitants of said district, you are hereby required, in his majesty's name, to warn and give notice to all freeholders and other inhabitants qualified by law to vote in Town, District and Parish meetings to assemble and meet at Mr. John Whitney's in said Shirley on the First day of March next at nine of the clock in the Forenoon.

"First to choose a moderator to manage said meeting.

"2d. To choose all such officers for said district as other towns by law are enjoined to choose at their annual meeting.

"3d. To conclude where the next district meeting shall be held, and make due return of your doings hereon, to myself, at or before nine of the clock of the above said day. Given under my hand and seal at Shirley this ninth day of February, A.D. 1753, in the 26th year of his Majesty's reign.

JOHN WHITNEY."

The officers chosen at this meeting were a moderator, town clerk, selectmen, assessors, constable, highway surveyors, tithingmen, sealer of weights and measures, sealer of leather, fence-viewers, field-drivers, carer for swine, deer-reaves, surveyor of lumber, pound-keeper. The number of inhabitants at this time is not definitely known, but it is thought to have been about 400. In 1800 the population was 713; in 1860 it was 1460. But in 1871 the incorporation of the town of Ayer took a part of its territory and reduced its population. The present number is about 1500. The property valuation rises a little above \$600,000, and the annual products above \$200,000. From 1875 to 1885 there was a decrease of its manufacturing industries from forty-two to eighteen, caused by the fluctuations and depression in the various branches pursued. A gradual recovery from this condition is now being witnessed from year to year, and the water privileges, yet unused, together

with the facilities for transportation and the natural attractions of the place, which in beauty of scenery and healthiness of location is excelled by few, should render the full return of its former activity and prosperity a matter of but a few years.

The first settlement made within the territory included in the district was about 1720, and the first farms cleared and occupied were in the northern part.

The soil presents some features quite distinct from that of the neighboring towns. Along the rivers there are large tracts of intervale land that are excellent for tillage, and that yield large harvests to reward the faithful cultivator; and upon the higher lands there are many valuable farms. There is also much woodland covered with oak, walnut, chestnut, birch, maple and pine. Running through a part of the town is an extensive range of coarse slate, which begins in Boylston and continues through Lancaster, Harvard and Shirley to Pepperell. There is a large acreage of light, sandy soil. But the most important feature, and one that adds much to the beauty of the natural scenery, as well as furnishing valuable power for various mechanical industries, is its numerous water-courses. The largest of these is the Nashua River, which runs through the southern and eastern part, while the next in importance is the Squannacook, which runs along the northeastern boundary and flows into the Nashua near the line between Groton and Ayer. The Catacunemaug is formed by the junction of two streams, one of which rises in Lunenburg, and the other in Lancaster. It flows through the southern part of the town and empties into the Nashua on the southeastern boundary. By residents along a part of its course it is familiarly known as Bow Brook, having received this name from Miss Sarah C. Edgarton, afterwards Mrs. Mayo, who "sang its praises in a beautiful poem," written in 1838, the first two verses of which we here give :

"Far in a wild and tangled glen,
Where purple Arcthusas weep—
A bower scarce trod by mortal men—
A haunt where timid dryads sleep—
A little dancing, prattling thing,
Sweet Bow Brook, tutor of my muse!
I've seen thy silver currents spring
From fountains of Castalian dews,
"A wilder or more sylvan spot,
Ne'er wooed a poet's feet to roam;
Not e'en Olyppo's classic grot
Would be so fit a fairy's home,
The birchen boughs so interlaced,
That scarce the vault of heaven is seen,
With pendant vines are wildly graced—
An arbor of transcendent green."

Another stream, of much larger importance than its name would imply, is known as Mulpus Brook. On these several water-courses are many fine privileges, the best being upon the Catacunemaug. Some of these are improved by valuable manufacturing interests; but there is still a large amount of water-power unoccupied.

BURIAL-GROUND.—One of the first needs to receive attention after the district was incorporated was a place for the burial of the dead. In September, 1753, a committee of five was chosen "to find a centre for the district, and to find a burying-place." The spot selected by the committee seems not to have been favorably regarded by the inhabitants, as another location was secured. The land chosen for the purpose belonged to the "Proprietors of Groton," and at a meeting held by them March 7, 1755, the following vote was passed: "4th. Voted to ye District of Shirley four acres of land (where their burying-place now is) for a burying-place and a training field, in said district, and that ye Proprietors' committee be directed to lay out the same, providing it doth not infringe upon any former particular grant."

The committee made the following record of their work:

"Shirley, April 17, 1755. Then we, the subscribers, pursuant to ye vote of ye Proprietors of Groton, have laid out a *piece* of land for a burying place, etc., in ye district of Shirley, and bounds as followeth: beginning at the northwest corner, at a chestnut tree; thence ye line runs southerly twenty-eight poles, to a red oak tree; thence easterly twenty-four poles, to a red oak; thence northerly twenty-eight poles to a dead white oak tree; thence westerly twenty-four poles to ye chestnut first mentioned; the same *piece* of land contains four acres and sixteen poles.

JAMES PLESCOTT, Prop^{ts} Clerk.

" WILLIAM LAWRENCE,	} Committee."
" THOMAS TARBELL,	
" SAMUEL TARBELL,	
" BENJ. PARKER,	

This gift called forth the following action at a meeting of the district convened for the purpose: "Voted to chuse a committee to return thanks to the Proprietors of Groton for a Piece of land for burying-place and other uses. Lieutenant Powers, Mr. Samuel Walker, Mr. Richard Herrington, Captain Harris, Ensign Walker *were* chosen this committee." The unstable nature of the landmarks left the land given somewhat open to encroachment in subsequent years, so that land was obliged to be purchased for the enlargement of the burial-ground in 1864, the larger portion of the gift remaining in public possession being then occupied as the church lot and a public common. One and one-quarter acres were at this time purchased. In the following year, 1865, Thomas E. Whitney made a gift of an additional amount, with conditions that were accepted and agreed to by the town. In 1849 a purchase was made by the town for a new cemetery at the South Village. It borders on the Catacunemaug, and is partially covered with a young growth of wood and finely adapted for the purpose. Artistic taste combined with the fine natural scenery will in time make it one of the most beautiful of burial-places. It is enclosed with a fence composed of stone posts and iron rails or bars on three sides. That part of the fence which separates the grounds from the street was the gift of Mr. N. C. Munson, and was built under his supervision at an expense of \$5000. It is an iron structure resting on a solid granite foundation, with an elaborate and finely constructed gate-

way at the centre; the columns, arches and entablatures composed of Nova Scotia sandstone.

TOWN-HOUSE.—From the incorporation of the district, in 1753, until the meeting-house was built, in 1754, meetings for municipal purposes were held in private houses. From that time until 1839 the meeting-house was the place for the transaction of the public business. During the larger part of this period, if not the whole of it, the meeting-house was the property of the town. But in the ecclesiastical changes which transpired and the separation of the church from municipal oversight, "The First Congregational Society," which was organized in 1822, became the legitimate successor of the Town Parish, and held the legal claim to the property. Extensive alterations and improvements were made in the house in 1839, and it was then "closed to all secular gatherings and objects." This turned attention to the matter of building a town-house. But no decisive steps were taken to this end till eight years later, in 1847. In March of this year a communication was addressed to the selectmen of the town by the executors of the will of James P. Whitney, notifying them of the bequest of \$500 by Mr. Whitney to be appropriated towards the building of a town-house. The terms of the bequest were as follows: "I give and bequeath to the inhabitants of the town of Shirley the sum of five hundred dollars, to be appropriated towards the building of a town-house, with a commodious hall for holding town-meetings, and suitable rooms for the safe keeping of records, books and papers belonging to the town, and for the transaction by the Selectmen, and all other town officers, of all the town business; provided, however, that said town-house shall be located in that part of the town now considered the centre thereof, but not placed near the south side of the land which belonged to my late father, bordering on the Training-Field, so called, without the consent of the owner of said land; and provided, also, that the same shall be built within three years of the time of my decease; and in case of failure on the part of said inhabitants to comply with the provisions aforesaid, I then give and bequeath the said sum, with all the interest that may have accrued thereon, to my said daughter, Henrietta Parker Whitney, or whoever may be my heirs at law.

"I also give and bequeath to the inhabitants of said town of Shirley the sum of one hundred dollars, the interest of which is to be annually expended in ornamenting the burying-ground now belonging to the town, by the cultivation of trees and shrubbery, and otherwise improving the same; and the principal sum may be appropriated towards the building of a handsome fence around the same whenever the town shall so determine."

The town voted to accept the legacy and proceeded at once with measures for building the town-house. In the mean time Thomas and George A. Whitney,

brothers of James P., and executors of his will, proposed to give \$500 in aid of the building, and a lot of land on which to set the same, upon conditions which the town, by vote, accepted and agreed to. A building committee was chosen and the work proceeded with. Ground was broken on the 17th of June, and, on the 5th of July, "the corner-stone was laid with imposing ceremonies." The service was combined with the 4th of July celebration, which came on that day. The address was given by the Hon. Leonard M. Parker, chairman of the building committee.

The building was completed at a cost of \$2953.75, including the furnishing, and was opened for a meeting of the town on the 19th of September, 1848. The public recognition and celebration of the completed work was delayed till the 4th of July of the following year, when services fitting to the occasion and to the day were held, with an address by Rev. Seth Chandler, pastor of the First Congregationalist Society.

POST-OFFICE.—Few things in the progress and rapidly-changing customs and methods of our civil and social life mark the difference of the present from a century or even half a century ago more strongly than our postal facilities and methods of communication and transportation. Not till fifty-eight years after the incorporation of the town was there a post-office within its borders. In 1811 one was established at the centre of the town, and Thomas Whitney was appointed postmaster. He remained in office till his death, a term of thirty-three years. About twenty years after the establishment of this office, the growth and business importance of the south part of the town required another in that section, and one was there located, and Dr. Augustus G. Parker appointed postmaster.

ALMSHOUSE.—The custom prevailing throughout the New England towns in the early period of its history for providing for the poor dependent upon them, was adopted in Shirley and continued till 1837, a period of eighty-four years.

"At the annual town-meeting the names of the unfortunates were publicly paraded, and they were auctioned off, one after another, by the moderator to the lowest bidder." The moral sense of the people was, in a measure, awakened to the wrong of this treatment, and, at a town-meeting in March, 1763, a movement was made for providing a home for this class, and a committee was chosen "to provide a work-house in this district." But nothing resulted from this effort, and, for seventy-four years more, "the gavel of the moderator was heard at each annual town-meeting, hammering off the board and lodging of the unfortunate pauper to the lowest bidder." The following are samples of the notices which were accustomed to be posted in the different parts of the town:

"Notice. The Poor of the Town of Shirley will be let out in lots, for

one year from the 3rd day of April next, on Saturday, the 24th day of March, instant, at one o'clock p.m. at the store of Thomas Whitney & Son.

"JAMES PARKER, JR., for the Overseers."

"Take Notice. At Whitney's store in Shirley, on Monday next, at seven o'clock p.m., the wife of William Longley will be set up at auction to the lowest bidder, at so much per week, from then until the first of April. Shirley, Feb. 13, 1821."

"Notice. David Atherton and Mary Davis will be let out by the week for one year or a shorter time, at Esq. Whitney's store, Monday, 5 o'clock p.m. May 5, 1828."

In 1837 this wrong and oppressive custom was brought to its end. Land and buildings were purchased, and a comfortable and pleasant home provided where all dependent upon the town could be well cared for.

The house was that of Mr. John Whitney, where the first meeting of the district for the transaction of public business, after its incorporation, was held. The farm contained a little more than 100 acres. The number of paupers entered and cared for at this home, the first three years after it was opened, varied from fifteen to thirty each year. After this there was a gradual diminishing of the number, caused chiefly by the effect of the temperance reformation, till "at the close of the twelfth year there were but from three to five who claimed a home in the Alms-house."

This change led to the disposal of the property by a vote of the town, in 1853, as an economic measure. Since then those who are dependent upon it for support have been provided for in private families, under the direction and care of the overseers of the poor.

MILITARY.—The "French War," which terminated in the surrender of the Canadas to the English Government, was in progress at the time of the incorporation of Shirley. Volunteers from this district were in that war. "Joseph Longley, who held the office of first selectman and town clerk, at the organization of the district, entered and died in that service." In the controversies and contests which resulted subsequently with Great Britain, on account of the grievances imposed by the King, the district took an active and decided part in support of measures for maintaining the rights and liberties of the Colonies. The first public action recorded was in reference to the "Stamp Act," passed by the British Parliament. It was at a district meeting held October 18, 1765, when the following instructions to its representative received a unanimous vote: "Ordered that Abel Lawrence, Esq., Representative, &c., for us and others in the Great and General Court, have a copy of our views, and is desired to act accordingly. Is it a matter of wonder that every thinking person in the Colonies of North America is greatly alarmed by the late act of Parliament, called the Stamp Act, as it affects the state and liberty of every loyal subject of said Colonies? It is therefore thought by your constituents that, at this critical season, you would not be unwilling to know their minds upon this important affair. We look upon said act as a burden, grievous,

distressing and insupportable; not only likely to enslave the present, but future generations. The great and heavy load lying upon us, occasioned by the late war, with its increasing interest, and all other incidental charges at home for the support of government, &c., have sunk us so low already that we are wholly unable to bear the duties imposed upon us by the 'Stamp Act,' which, if it take place, must and will immediately prove our certain ruin. With regard to the power of the British Parliament to lay taxes in such a manner, is, you know, a point that has been disputed with great warmth on both sides of the question. We are far from saying or acting anything whereby we might be charged with disloyalty, as subjects to the best of kings, or that we have not a proper sense of the British Court, but we do think that our charter privileges and natural rights, as the free-born sons of Britain, are infringed upon by said Stamp Act. Our advice, instruction and direction, therefore, to you is, that upon all proper occasions you use and exercise your utmost endeavors and strongest efforts, in a modest, becoming and respectful manner, to prevent said act from taking place in the government; and that you with a watchful eye, upon every occasion, diligently guard and protect the liberties of your country, to the utmost of your power, against all encroachments and innovations. Likewise we desire you to frown upon every attempt for raising, by way of tax, any sum or sums of money, or consent to dispose of any already raised, without the consent of the people, upon any pretence whatsoever, except for defraying the necessary expenses of government. Also we would signify our dislike of the late act of violence in the town of Boston, and every other act of rage committed against any particular person or private property, anywhere within his Majesty's most loyal and dutiful province of Massachusetts Bay. Finally, your constituents expect that, on all occasions, you will view their interest as closely connected with your own, and at all times endeavor to promote it, and also the interest of the province generally. By order of the committee. John Longley."

The repeal of the "Stamp Act," soon after, brought a brief period of relief. But new grievances call forth further action. A circular was received from a Committee of Correspondence in Boston, setting forth their character, and action thereon was taken as follows:

"The unanimous proceedings of the inhabitants of the District of Shirley, being legally assembled upon adjournment, January the 11, 1773. Having received from the metropolis of this Province their votes and proceedings at the late town-meeting, and having taken the same into consideration, we are of the opinion that our rights are properly stated by their committee, and that they are infringed in those instances mentioned by them; and we are fully persuaded if the Judges of the Superior Court of this Province have their salaries from the king—from whose substitutes their appointment originates, and without whose consent (let them hold the scales of justice ever so uneven) they cannot be removed—that our liberties are greatly infringed thereby, and that we shall have no better chance for justice, no better security of life and

property, than the people have in the most despotic country under heaven.

"We, therefore, with due deference to the opinion of our fellow-electors, do express to our representative our desire that he use the utmost influence that the judges of the superior court of this province be placed upon a constitutional basis, and their salaries be raised to such a sum as will support them in a manner suitable to their dignity. And we would further say that it is our fixed determination to join with the people through the colonies, and of this Province in particular, manfully and constitutionally to oppose every stride of despotism and tyranny, and that we will not sit down easy and contented until our rights and liberties are restored to us, and we enjoy them as at the beginning.

"*Resolved*, the above be entered upon the records of the District, and an authenticated copy thereof be sent by the District Clerk to the Committee of Correspondence of Boston, and another to James Prescott, Esq., our representative. *Resolved*, also, that our grateful acknowledgments are due to the inhabitants of the town of Boston for their vigilance upon this and many other occasions of like nature.

"JOHN LONGLEY, *District Clerk*."

During this year the act putting a tax upon the tea brought into the country, passed the British Parliament. This fact was communicated to the selectmen of Shirley by the Committee of Correspondence in Boston by a letter dated November 23, 1773. On this, action was taken at the town-meeting in March following, when it was voted unanimously:

"1st. That we will neither buy, nor sell, nor drink, nor suffer it to be drunk in any of our families any tea that is subject to an American duty. 2d. That we will stand ready to unite with our brethren through the Colonies in every proper measure to retrieve our liberties, and to establish them upon such a firm basis that it will be out of the power, at least of our present enemies, to wrest them out of our hands. 3d. That the thanks of the District be, and hereby are, given to the town of Boston and to the towns in that vicinity for every rational and proper measure they have pursued in order to prevent our inestimable rights and privileges being torn from us by the artifice and cunning of our enemies, who are endeavoring to rob us of the fruits of our honest industry, that they may riot in idleness and luxury themselves. 4th. That the District enter the above votes on the district book of records, and transmit an attested copy of the above votes to the Committee of Correspondence in Boston. A true record of the votes of the District of Shirley or the inhabitants thereof.

"AUGUST, OBEDIAH SAWTELL, *District Clerk*."

When the time for something more than expressions of sympathy and promises came, there was an equal readiness for active duty. A town-meeting was called January 18, 1775, immediately after the passage of the "Boston Port Bill," at which it was voted, "That we make some provision for the suffering poor in Boston and Charlestown, on account of the Boston Port Bill, so-called, and that the same be done by subscription. Francis Harris, John Ivory and Obediah Sawtell were chosen a committee to receive the donations of said district for said poor, and ordered to forward said donations to Boston or Charlestown as soon as may be." A still more decisive and important step toward severing the allegiance to the mother country was taken at this meeting, in the vote to withhold the "Province Tax" and to stand firmly with the "association of the Grand American Congress," held in Philadelphia, in October of the previous year. The following is the record: "We, the subscribers, having seen the association drawn up by the Grand American Continental Congress, respecting the non-importation, non consump-

tion and non-exportation of goods, etc., signed by the delegates of this and the delegates of other colonies of this continent, and having attentively considered the same, do hereby approve thereof, and of every part of it; and in order to make the same association our personal act, do, by these presents, under the sacred ties of virtue, honor and the love of our country, firmly agree and associate, fully and completely, to observe and keep all and every article and clause in said association contained, in respect to exportation, importation and non-consumption, according to the true intent, meaning and letter of our said delegates, and will duly inform and give notice of every exception and contravention of said agreement as far as we are able; and that we will, so far as we can, encourage and promote a general union herein; as witness our hands, this 18th day of January, A. D., 1775."

Nor was this all. Measures having a somewhat compulsory appearance were taken to bring all the inhabitants into this agreement. This is the record additional:

"At a legal meeting of the inhabitants of the District of Shirley, held on the 18th of January A.D. 1775, Resolved and voted, that the above draught of an association is approved of, and that the same be entered in the District book of records, and that the same be signed by the several inhabitants of said district, and that the committee of correspondence see that the same is done, or inform the district at their next meeting of every person who shall delay or refuse to sign the same, so that the district may take such further order thereon as they may think proper.

"Attest, OBEDIAH SAWTELL, *District Clerk*."

Only two months and one day from this date came the alarm from Lexington ringing through the country. Shirley, in common with other towns, was stirred intensely by this hostile advance, and its patriotism aroused. Every man old enough to bear arms, but seven, "volunteered his services and marched to Cambridge." And these seven were prevented, not by any reluctance on their part, but by the necessities of their families, or their age and physical condition. One of them, William Longley, familiarly known as "old Will the miller," bent with age and supporting himself with two staves, wanted to join the company. In response to an allusion to his infirmity, "True," he said, "I cannot handle a musket, but I can fight the red-coats with my two canes," brandishing these vigorously. Eighty names are on the roll of the Shirley minute-men, who, on the alarm of that day, April 19th, marched to Cambridge. Immediately after this came the enlistment of eight months men. Thirty-eight from Shirley responded to this call. From this time to the opening of the memorable campaign of 1777 many volunteers went for indefinite periods. Then came the enlistment for three years, when thirteen entered the service for that term. And when the Legislature of the State decided that one-seventh of all the male inhabitants over sixteen years of age, capable of bearing arms should be enlisted, the district promptly made its number twenty-two. And as an encouragement to the service, it

"voted, to give each man twenty pounds as an additional bounty." Besides the call for men, there was a call for muskets, military coats, provisions of food, etc., "all of which were readily contributed." In the schedule of apportionment among the towns of the State, of the thirteen thousand coats required by the Provincial Congress for the patriot army engaged in the siege of Boston in the summer of '75, twenty-five were asked of Shirley. The response to this request was conveyed to the Committee of Supplies in the following letter:

"To the Gentlemen Committee of Supplies appointed by Congress, etc., To see to the Providing Clothing for the army. Gentlemen: These Are to Inform you that the Dist. of Shirley have agreed to provide the Parte of Coats, Shirts, Stockins and Britches to them Assigned and Forty Pare of Shoes for the Benefit of the Continentle army, etc.

"By order of the Selectmen,

"OBADIAH SAWTELL, Dist. Clerk.

"Shirley, August ye 10th, A.D. 1775."

The most of the three years' men enlisted in the early part of '77 served in the Fifteenth Continental Regiment, which was recruited from Worcester and Middlesex Counties, under command of Colonel Timothy Bigelow. It was a regiment distinguished for its discipline and valor, and was in many of the hardest-fought battles of the war. It had part in the capture of Burgoyne at Saratoga, in the trials and sufferings of Valley Forge at the battle of Monmouth, and in the crowning glories of Yorktown. A call was made for additional men for the service for a given time in 1780, and the district "voted to give each soldier one, one hundred silver dollars, including the forty shillings per month, allowed by the state. It was also voted to give them, each forty pounds additional in hard money, for three months' additional service." The next year, 1781, at the March meeting an appropriation was made for paying the three-years' soldiers, whose term had expired, the amount due them from the the district. It was "voted to raise twelve hundred silver dollars, or the value thereof in other money, to be immediately assessed on the inhabitants of the district and others owning property therein, as soon as may be." This is the last record of the action of the district in relation to the Revolutionary War with which we have met. There is mention of a committee appointed by the district, to see that the families of the absent soldiers were provided for, and we have reason to believe that this matter received faithful attention. The muster-roll of Captain Henry Haskell's company of "minute-men" in Colonel James Prescott's regiment, which marched from Shirley, April 19, 1775, contained the following names:

Henry Marshall, captain; Sylvanus Smith, first lieutenant; Ebenezer Gowing, second lieutenant; John Wason, sergeant; John Davis, sergeant; Ephraim Smith, sergeant; Thomas Bennett, sergeant; Joseph Dodge, corporal; John Kelsy, corporal; Aaron Bennett, corporal; Joseph Longley, corporal; Thomas Burkmar, drummer; William Bolton, drummer; William Bartlett, Eleazar Bartlett Timothy Bolton, Abel Chase, Titus Colborn, Jonathan Conant, Daq. Chatman, Amos Dole, Silas Davis, Jonathan Davis, James Dickerson, John Dwight, John Edgerton, John Gordon, Asa Holden, Amos Holden, Amos Holden, Jr.,

Sawtell Holden, Stephen Holden, Zachariah Holden, Lemuel Holden, Simeon Holden, Asa Harris, Simeon Harrington, John Haskell, Benjamin Haskell, Paul Hale, Seth Harrington, Samuel Hazen, John Ivory, John Jupp, Moses Jensen, Daniel Kenzar, Joshua Longley, John Longley, Jr., Edmund Longley, John Longley, Jonas Longley, Jonas Longley, Jr., William Little, Walhs Little, David Pratt, Abel Parker, Abel Parker, Jr., Phineas Page, Daniel Page, Thomas Peabody, Simeon Page, Jr., Jonas Page, Peter Parker, James Parker, Obadiah Sawtell, Jr., Ezra Smith, William Sampson, David Sloan, David Wilson, Ephraim Warren, William Williams, Ivory Wilds, Aaron Woodbury, Samuel Walker, Jonas Parker, Jr., Oliver Livermore, Oliver Fletcher, Joseph Brown, Thomas Nichols, Francis Mitchell.

SHAYS' INSURRECTION.—The great indebtedness incurred by the War of the Revolution left a heavy burden upon the State and upon all the towns. Taxes became onerous, and yet were hardly sufficient to meet the current expenses of the government and pay the interest of the public debts. Many were impatient and restive under the difficulties and embarrassments with which they were encumbered. Out of this condition, which was but an effect from the war, sprang the insurrectionary movement, which obtained no little notoriety under the leadership or command of Daniel Shays, a captain in the war. Men from Shirley joined the insurgents. But of the number there is no record. While there was an almost unanimous feeling in favor of some movement to ameliorate the existing condition of things, it is a matter of grave doubt if this resort to forcible measures received the countenance of any considerable proportion of the people. Among those who took an active part in it, were two brothers, Sylvanus and Nathan Smith, both of whom had been officers in the late war. In company with others from the district and parties from other towns, they gathered at Concord to the number of about one hundred. Their object was to suppress the court and stay the flood of executions that were wasting their property and making desolate their homes, until some action should be taken for their relief. It was Nathan Smith who made the somewhat famous address to the people, as related by the historian of Concord, "declaring that any person who did not follow his drum and join his standard, should be drove out at the point of the bayonet, let them be court, town committee, or what else. 'I am going'—he said—to give the court four hours to agree to our terms, and if they do not, I and my party will compel them to it. I will lay down my life to suppress the government from all tyrannical oppression, and you who are willing to join us in this *ere* affair may fall into our ranks." Smith was a good soldier in the war, and without doubt thought he was doing his duty in this affair, and defending the freedom that had been secured against unwise and oppressive measures. He died in Shirley in 1834, at the age of ninety-six years. A company from Shirley went with the insurgents in January, 1787, in a movement for the suppression of a court in Springfield. The town records give the best indication of the prevailing sentiment among the people at this time. In a town warrant dated

"January ye 29, 1787," there were two articles which read as follows: "1st. To see what the town will do in regard to sending provision to those men that are gone, or about to go (as they say) in defence of their rights and privileges. 2d. To see if the town will take into consideration the present depressing circumstances of our public affairs, and consult upon means for a settlement of those disturbances that are subsisting in this Commonwealth."

Upon these articles it was voted: "1st. Not to send provisions to the men gone from this town under arms. 2d. Voted to choose a committee, agreeably to the second article." This committee was chosen, and reported, recommending a petition to the General Court, "praying that all disturbances subsisting in this commonwealth may be settled." The report was adopted and petition sent.

Shirley furnished its required quota for service in the War of 1812, raising it by draft. No note of any action or incident worthy of mention appears in the records or can be gathered from tradition. There was only one enlistment from the town in the Mexican War—Nathan King (2d). He was in two battles, in one of which he was wounded.

THE CIVIL WAR OR WAR OF THE REBELLION.—The startling intelligence flashed over the country, on Monday, April 15, 1861, of the attack on Fort Sumter, aroused the people of Shirley, as it did the whole North. Informal meetings were held, projects discussed and services tendered by persons of all ages. Immediately a town-meeting was convened. At this meeting, crowded with those of every age and grade of life, the following resolutions were presented and unanimously adopted:

Resolved, That the town of Shirley pay to all volunteers who have enlisted, or who may enlist hereafter for the present war (the same being residents of said town at the date of their enlistment), the sum of twelve dollars per month, in addition to the compensation now made by government; said sum to be paid to the families of any such volunteers, in their absence, at the discretion of the committee hereafter named. And should they fall in battle, the same sum to be paid to their families during the term of enlistment. And, if any such volunteers are single men, the said sum to be paid to them at the expiration of their respective enlistments, or to their legal representatives. Also to furnish them with all suitable and necessary outfits, not furnished by the State or General Government, at the discretion of said committee.

Resolved, That the town raise the sum of five hundred dollars for the purpose above mentioned, and that the same be assessed the present year; and that the town treasurer be and is hereby authorized to borrow any sum or sums of money for the purposes specified, not to exceed ten thousand dollars."

Measures were taken at this meeting for raising a company for the Fifty-third Massachusetts Regiment. This company, when organized, took the name of "Munson Guards," in honor of N. C. Munson, from whom it received the generous gift of five hundred dollars. At a meeting held April 28, 1862, further action was taken in behalf of the families of those in the service. It was voted "to raise and assess one thousand dollars for the relief of the families of volunteers in the federal army, and that the same, or such part thereof as may be necessary, be paid out

by the selectmen to families where they are certain the same will be refunded by the State."

In July of this year, in response to the call of the President for more soldiers, the quota of the town was sixteen. This was soon filled, the town voting, at a meeting held on the 23d of the month, a bounty of one hundred dollars to each soldier, and authorizing the treasurer to secure a loan of sixteen hundred dollars for this purpose. When, a year later, another call came from the President for still more men, to fill the ranks that were being depleted by losses and expirations of terms of service, volunteer enlistments had reached their limit, and it became necessary to draft the number required. To meet its duty to these, the town voted, at a meeting held July 27, 1863, to "pay one hundred dollars to each of its quota of drafted men, or their substitutes, who go into the service under the late call of the President of the United States, and also to furnish State aid to their families according to law." Other action, of record, for maintaining its part, by the town, in this crisis of the nation's life, was on July 5, 1864, when it was voted "to raise two thousand dollars, to pay volunteers that have been enlisted for this town, or may hereafter be obtained to fill the quota next called for by the President." Also, "that the selectmen, after expending the two thousand dollars raised for the purpose of recruiting, be further authorized to pay one hundred and twenty-five dollars to each and every recruit they may obtain, in order that our full quota be kept up." And then, a month later, it was voted, "that the town pay one hundred and twenty-five dollars in gold to each and every volunteer who will enlist, or to any enrolled man who will furnish a substitute, to fill this town's quota under the call of the President for five hundred thousand men." A few months later a rumor was prevalent of an expected call for additional recruits, and on November 8th it was voted "that the selectmen be constituted a committee, and authorized immediately to borrow a sum not to exceed two thousand dollars, and procure recruits to fill an anticipated call for three hundred thousand men." One more item completes the record of municipal appropriation and activity for this important and trying period. January 24, 1865, but a little more than two months before the note of final victory rang exultingly through the land, a meeting was convened, at which the selectmen were "authorized to procure and put into the service of the United States, fifteen men, in addition to those already in." Also, "to borrow a sum of money sufficient to pay the sum of one hundred and twenty-five dollars to each of the men who have been put in or may be put in before the 18th of March, 1865—who have not been paid according to a previous vote of the town."

The whole number of men mustered into the service from the town, and credited to it on the rolls, was one hundred and thirty-eight—about one-tenth

of the full number of its population during these years. Two of these served in the navy. The loss by death on the field, or from wounds, and disease caused by the hardships and exposures of army life, was twenty-one.

During all these intensely anxious years, those who remained at home were, in common with all the towns, constantly engaged in procuring and furnishing supplies for the needs and comforts of the sick and wounded in camp and hospital. The full appropriation and expenditure of the town for the men it put into the service by enlistment and draft amounted to about eight thousand dollars. The complete list of the names of these men is here given :

Army.—John H. Alger, Michael T. Ames, James Armstrong, Octave Anedette, George W. Baker, Oliver Balcolm, Horace A. Balcolm, Frank Balcolm, Thomas Baley, George V. Barrett, George H. Beard, Frank M. Boynton, Andrew Blood, Christoff Brockmann, Charles H. Brown, Joseph Brooker, Norman H. Bruce, Henry Bunnell, Henry S. Butler, Medard Bourcard, Edward E. Carr, Norton E. Chamberlain, Charles P. Chandler, Andrew J. Clough, Philip Connors, Charles H. Cowdrey, Moses Cram, John R. Cram, Thomas Daley, Michael Danlon, Granville C. W. Davis, Chas. B. Davis, Henry A. Dixon, Edward Donahue, Percy H. Dunkins, Joseph Duprey, Estes Elliott, Henry Elmore, Owen Elmore, Geo. A. Farmer, W. H. Farmer, Joseph A. Farnworth, John W. Farren, Simon Fields, Jeremiah Flynn, George F. Fuller, Patrick Gately, John Gately, Rock St. Gosh, John Goodhue, John Goss, William Greenalgh, Benjamin Grover, James Haley, William L. Harris, Albert L. Hartwell, James Hawksworth, George Haynes, Alvin Henry, George C. Hill, William Hodgman, Charles Hoffman, Robertus F. Holden, Stephen Howard, Henry Johnson, Josephus Jones, Albert Kilburn, Charles E. Kilburn, Clesson Kenney, Daniel L. King, Peter King, Thomas Kitzredge, Thomas Kelley, Carle Lamerlain, Samuel Lane, Geo. A. Lancy, John B. Lapine, Joseph Lasier, Peter Lavily, George F. Lawrence, James H. Little, John H. Linehan, Stephen W. Longley, Harriman Longley, Frank Lovely, Wm. McGill, Phelix McGovern, Isaac A. McDaniels, John McCarty, James McGill, Daniel Mahoney, George H. Mason, William McLelland, Walter Mitchell, David Morrell, William M. Moses, George Munyon, Emery Munyon, Thomas McGovern, Joel C. Neat, Harrison Nelson, Alexander Nelson, Abel Nickless, Daniel O'Hern, Michael O'Neal, George F. Parker, Marcus M. Parmenter, Sidney Parris, John Peterson, Charles W. Richards, John Rench, Charles F. Robbins, Harrington W. Sanders, Otis Sartell, Charles P. Sartell, James Sawtell, E. M. Smith, Marcus M. Spaulding, Lorenzo Spaulding, Henry B. Story, Henry Taylor, Walter Taylor, Granville P. Traves, James Taylor, Walter Underwood, William W. Underwood, William F. Warren, Henry A. Waters, Stephen Wheeler, John Wheeler, John G. White, Henry K. White, Wellington S. White, Walker Wright, Frederick Wilson, John Zimmerman.

Navy.—Charles Love, Charles E. Richards.

MILLS, MANUFACTURERS AND MANUFACTORIES.—

Like all newly settled communities, Groton, of which the present Shirley then formed a part, in the early part of her settlement lacked the means of supplying the wants and needs of her early settlers.

While the newly cultivated land yielded rich harvests of golden grain to the worker, he was unable to convert this grain into meal without the aid of a mill, and there was none in Groton, nor, in fact, did such a mill exist for a period of seventeen years from its first settlement; hence we are led to suppose that the colonists were obliged to use hand-mills or samp-mortars to grind their corn, but no record of their use exists, either written or traditional.

Mr. Butler says, in his "History of Groton," that the first corn-mill erected within the territory of

Groton was by John Prescott, in company with his son, Jonas Prescott, who afterwards distinguished himself as an inhabitant of Groton. This mill stood on a small stream of water in what was then the southern boundary of the territory, but in what is now the northerly section of Harvard; and there it stands yet and is devoted to its original purpose.

A few years after this mill was erected the Indians destroyed the greater part of Harvard, but, fortunately for the people, this property was overlooked, and continues to do its work after a lapse of over two centuries, it having been erected in 1673.

For eight years this mill was the only one the inhabitants of this section had to carry their grain to, and in consequence was constantly engaged—in fact, such was the press of work that the inhabitants of the town enacted a law requiring the proprietor of the mill to set apart the second and sixth days of each week for the purpose of grinding the grain of the people of Groton on those days.

In 1681 James Prescott, who was active in the establishing of the mill above mentioned, erected another mill on the easterly boundary of the territory, on what is now known as Stony Brook, near its issue from Forge Pond (so-called), being within the limits of the present town of Westford.

As nearly as can be ascertained, the territory of the present Shirley was first settled in 1720, and the northerly part was soon taken up for farms; but all grain had to be carried to the old mill, now in Harvard, or to the Forge Pond mill, now in Westford, to be ground.

We of the present day cannot understand the hardship this was to the early settler to carry grain for a distance of from four to ten miles over rough roads, often mere bridle-paths cut through the woods—no such roads or highways as we of the present generation are used to. Few of our forefathers were the fortunate possessors of horses, for they were luxuries in those days, and as for light carriages, they did not exist; so that the early settlers were compelled to use ox-teams and even wheelbarrows to transport the grain, and, indeed, many were the loads borne on the strong shoulders of the hardy settlers, at all seasons of the year. Through rain and shine, snow and hail, they bore their burdens over the weary miles, often compelled to make two trips ere they could bring back the meal they required for their sustenance, for the mills were small and unable to fulfill all the demands made upon them with facility.

The first mill in the limits of what is now known as Shirley was built by William Longley, an early settler, and Samuel Hazen, who settled here in 1749. This was a grist-mill to which was added later a saw-mill.

This mill was a small one of but a single run of stones, and was not furnished with the means for bolting flour.

But such were the needs of the people that the un-

dertaking, small though it was, was considered as a harbinger of better times.

This mill stood on the site of the "Shirley Cotton-Mill," better known perhaps as the "Red Mill," which was destroyed by fire in 1867.

The above partnership lasted but a few years, Mr. Hazen selling out his interest to Mr. Longley, who continued to serve his patrons as "miller" until old age compelled him to retire, when he was succeeded by his son.

As the years rolled on these mills, went to decay and others were built upon the same privilege, but upon the opposite side of the stream, by one Henry Haskell. These mills afterwards were owned by Israel Longley, Esq., who sold them to Thomas Hazen, who, in turn, sold them to Israel Longley, a great-grandson of the first owner. In 1872 the mills were purchased by Mr. N. C. Munson and the grist-mill was used for other purposes.

George Davis, Esq., next became the owner of the saw-mill and for some years carried on an extensive business in lumber, furnishing in quantities large or small to suit the requirements of purchasers. In 1886 he ceased to carry on business at the mills, and they remained idle until the following year, when the property was purchased by Mr. Gilbert M. Ballou, of Shirley. He at once repaired the buildings and erected in connection with the mill a large carpenter's shop, and fitted it up with a full line of wood-working machines necessary to carry on his trade.

Mr. Ballou has done quite an extensive business in sawing lumber since he started, the first year sawing out about 150,000 feet, and he has since turned out from 250,000 to 300,000 feet annually. It might well be supposed that the supply of trees of a size suitable for lumber would have been exhausted long ago, but each season brings its full supply of logs, and the space in front of his mill is filled to overflowing with great piles of pine and chestnut logs waiting to be turned into boards.

The second grist-mill was built on Mulpus Brook, in that part of the town known as Wood's Village. This, too, like the one on the Catacunmaug, contained but one run of stones and was wanting many of those conveniences now considered necessary.

But it filled a long-felt want, for, being situated at the opposite border of the town from the other mill, it greatly shortened the distance, thereby proving a great accommodation to the dwellers in its vicinity.

Francis Harris was the first owner of this mill, and James Dickson erected a saw-mill in connection with it, both of which were afterwards owned and operated by the same person.

These mills passed through many hands, until in 1822 Jonathan Kilburn became the owner, and they were operated by him until his death, in 1881.

Mr. Kilburn was an energetic business man, sparing neither time nor expense in fitting up his mill to meet the needs and demands of the public. This mill,

after its renovation, was better fitted for the work of milling than its predecessor, it consisting of two runs of stones and an apparatus for sifting the wheat as it entered the hopper, and for bolting it after it was ground. The mill was also furnished with a second bolt that was used in sifting flour from the meal of the coarser grains. Mr. Kilburn did a large lumber business in connection with his grist-mill.

The third mill for grinding was erected on the Catacunmaug, a little above that of Messrs. Longley & Hazen, and on the same side of the stream, by Joseph Edgerton. This was abandoned after a few years, the owner deeming it of no avail to compete with his long-established neighbors below him.

The fourth grist-mill, with saw-mill connected, was built by Jonas Longley, Esq., in 1799, on the Nashua River, on that part now belonging to the town of Ayer. This mill was operated by Mr. Longley until his death. Various persons were owners and operators of these mills, among them Eli Page & Sons, who were the last owners while the property remained within the boundaries of Shirley. This firm renewed the business formerly carried on,—the mills under a former owner having been used for other purposes,—and added a shingle-mill and also increased the water privilege.

The next saw-mill of which we have record was built by Samuel Hazen in 1829, on the northern branch of the Catacunmaug. The mill was run until the summer of 1856, when it was swept away by the breaking of the reservoir above it. The building of this mill opened the way for the settlement of a small village known as the "North Bend."

In 1836 Peter Page built a saw-mill on Mulpus Brook, a short distance above its junction with the Nashua River. Mr. Page died shortly after, and the mill property passed into the hands of Messrs. R. P. & M. W. Wood.

In 1856 Alvin White and Edwin L. White came to Shirley and purchased the mill and privilege known as "Peter Page's Mill," of Robert P. and Moses W. Wood, connecting therewith a basket manufactory. On the 8th of March, 1857, this mill was destroyed by fire. It was immediately rebuilt, with enlargements and improvements. The Messrs. White did a large and lucrative business in the manufacture of baskets, sawing lumber, etc., until 1861, when Alvin White disposed of his share to Edwin L. and purchased an estate higher up the river, which he enlarged, and, in company with his son, continued the manufacture of baskets—making some ten thousand per annum.

Edwin L. continued to carry on business at the old stand, and the average number of splint baskets manufactured by him in the earlier years of the business was from fifteen to twenty thousand. His yearly production now is upwards of ten thousand baskets of all sizes and grades, from the small one holding four quarts to the mammoth one holding forty bushels.

The baskets are used by manufacturers, marketmen and farmers.

Special power machinery is used to get out the greater quantity of the basket stock, the lumber being sawed into planks, then steamed and put into the slicing-machine. A portion of the stock is, however, split and shaved in the old way. In addition to the manufacture of baskets, Mr. White has done a large business in sawing lumber, some years sawing 500,000 feet. He also prepares staves and shingles, turning out about 500,000 annually.

As will be seen, the wants of the early settlers, so far as food and shelter are concerned, were provided for by the several mills established upon the banks of the various streams for the purpose of grinding the grain and sawing the huge logs into boards. Yet there remained other wants and needs to be provided for. While the men toiled in the fields, clearing the land for planting and sowing and harvesting the grain, and then, when harvested, carrying it to the mill to be converted into meal, it must not be supposed the mothers, wives and sisters were idle; far from it, for, in addition to the regular work of the house, they, by their own hands, made all the clothing worn by them and their families.

It is true that their homes were not as large and elaborate as those of our day, nor were they furnished with as many ornaments and rare pieces of bric-a-brac; few were the rooms they had to keep clean and tidy, for their houses were mostly rude, unfinished dwellings—log cabins in many instances—and the household utensils were of the commonest and coarsest kinds.

But their chief labor lay in the preparing of the flax and wool, as it came from the field and flock, into garments of warmth and comfort for the wear of the families, and so, thus was supplied in the early times another of the wants of the settlers.

But as time wore on these colors grew monotonous to the people, and they began to make use of art in the manufacture of a material that was of a lighter, smoother and finer texture than that which they had so long been used to, and, hence, the dyeing, fulling, shearing and pressing processes were adopted, to bring about this desired change. These different processes were carried on in an establishment, and were called clothing-mills. Clothing-mills were introduced into the Colonies in the latter part of the seventeenth or the early part of the eighteenth century, and soon the process of breaking and rolling wool was added, which was a great benefit to the female sex, as it lightened the labors of making cloth.

These mills were early introduced into Shirley, and thus another, the third, industry was commenced. They little thought when the first mill, small though it was, was built, that it would be the forerunner of an industry that would prove to be Shirley's greatest manufacturing interest, but such it was; the "clothier's mill," with its crude and imperfect machinery,

was closely followed by the cotton-mill, with its delicate and intricate mechanism, furnishing employment to the many and substantially improving the financial interest of the town.

All through the early years of the settlement and until within a comparatively few years the settlers of the northern part of our country have been in the habit of keeping a few sheep to furnish the wool from which might be made the every-day clothes of the family. The woolen blankets for winter use were obtained from the same source. The farmers also raised a little flax, that the needs of the family through the summer might be met.

The work of manufacturing this cloth devolved upon the female portion of the family; they took the flax as it was brought from the field, and the wool as it was shorn from off the backs of the sheep, and by a slow and laborious process, called hand-carding, converted it into rolls; these rolls were spun into yarn, and the yarn was, in turn, woven into cloth by the use of hand-power machinery. As there existed in those early times no establishment for the dyeing and dressing of cloth, and not even in the homes of the settlers was the use of the dye-pot known, it became necessary to adopt some other means whereby a change of color could be obtained. Therefore, the colonists bred sheep of two colors—white and black—the mixture of whose wool gave that sober gray tint to the cloth that our forefathers so highly prized.

Later on these hand labors were lightened by the introduction and use of machinery operated by water-power, and the various streams running through the town were utilized to furnish the power.

The first clothier's mill was built on the Squannacook River, near the village of that name, in the year 1739, by Elisha Rockwood, who came from Wrentham.

Mr. Rockwood continued in business until old age compelled him to relinquish it to his son, Samuel Rockwood, who, in turn, dyed and dressed cloth until within a short time of his death, which occurred in 1804. Samuel Rockwood and Sewall Rockwood, sons of Samuel Rockwood, succeeded to the business, and run the mill until the business was superseded by the more modern methods of manufacture. In 1812 William Flint and Thomas Sweetser added a carding-mill to the dyeing and dressing departments; this they continued until about the year 1836, when they were obliged to relinquish the business, owing to a lack of employment.

The second clothier's mill was situated upon the Mulpus Brook, and connected with the corn-mill previously erected by Francis Harris, Esq., who also built the clothier's mill. Mr. Harris was a man of influence in the town, both as a public official and a private citizen.

Joseph Edgerton was the builder of the third clothier's mill, which was situated on the Catacunemaug; this mill was never very prosperous, as the Rockwood

mill had established such a reputation for good work, that competition was unavailing, and the establishment was devoted to some other occupation that would yield better income.

The fourth and last clothing-mill was erected by one James Wilson, an Irish immigrant, and the first and only one who obtained naturalization in Shirley for nearly three-quarters of the first century of its incorporation. This also was situated on the Mulpus Brook. Levi Wheeler rented and occupied the mill for a few years, but soon he, too, as well as the others of his craft, was obliged to give way to the inroads of fashion, which adopted the use of foreign fabrics in preference to those of home-made character. Mr. Wilson had a carding manufactory in immediate connection with this mill. He carried on the business of carding till old age and infirmities compelled him to stop.

As has been noticed, the "clothier's mills" were soon followed by the establishment of factories for the manufacture of cotton yarn and cotton cloth, which proved to be the greatest and most important of Shirley's varied industries. The enterprise of her citizens was manifested by the many factories erected along the banks of the various streams, where water privileges existed within the boundaries of the town. For many years the hum and noise of the busy loom and spindle were heard on all sides, and the streets of the village were filled with young people eager for recreation after a hard day's work at the mill. The stores were doing a prosperous business supplying the wants and needs of the people. This continued for years until, for various reasons,—fire, flood and financial depression,—the mills one by one ceased operations until in 1884 the closing of the Phoenix and Fredonia Mills brought the career of the town as an active cotton manufacturing village to a close. These last-named mills are now running again under new management, as will be noted later on in this chapter.

The first of these mills was erected as early as 1812, and was situated on the Catacunemaug, very nearly on the site occupied by the present mill known as Munson's Yarn-Mill, or the New Mill. The mill was built by a company from Harvard, consisting of Simon Willard, Joel Willard and Zacheus Gates. Before it was completed it was purchased by Joseph Edgarton, who sold it to Merrick Rice, of Lancaster. Moses Carlton, also of Lancaster, became a partner of Merrick Rice, and later on became the sole proprietor. This, as we are credibly informed, was the third cotton factory built in this country; the first being the Slater factory at Webster, Worcester County, and the second the factory at Waltham. In 1818 the property was transferred to Joseph Edgarton & Co., and they carried on the manufacture of cotton cloth until 1834, doing a successful and profitable business. But the death of one of the company, Adolphus Whitecomb, and the great depression of business

throughout New England that year, together with large investments in land, brought them to failure, and the business was discontinued. The machinery was removed from the building, and the building was not occupied, excepting the basement, which was used for various trades, as will be noted later on.

The second cotton mill, known as the Fort Pond Mill, was built by Joseph Edgarton and Lemuel Willard, and was located on the southern branch of the Catacunemaug, on the western privilege of that stream.

Hiram Longley purchased this property about the year 1840 and greatly enlarged and improved it. He disposed of it to Israel Longley and it was by him connected with the Shirley Cotton-Mill and used as the weaving department. It was at this time supplied with fifty-six looms.

In 1868 this mill was destroyed by fire, but was soon replaced by a new structure built of wood, with a brick basement. In 1877 this mill, together with the dwelling-houses and other buildings connected therewith, was purchased by Mr. Nathaniel W. Cowdrey, who commenced the manufacture of "leather board," an industry as yet new to the village, although paper-making had been carried on to some extent. He manufactured about five tons of the "leather board" per week for several years.

In 1881 Mr. Cowdrey added a mill for sawing lumber and stave material, and in 1881-82 sawed out some 700,000 feet lumber and some 600,000 staves. Connected with this saw-mill was a coopering establishment, conducted by Granville Fairbanks, who turned out 12,000 casks of different dimensions per month. Later on Seth F. Dawson became the owner. There were one or two other lines of business carried on in some of the buildings connected with this mill. Dec. 14, 1884, the mill, together with the contents, was destroyed by fire, supposed to be of incendiary origin, causing a total loss of \$23,000, which was partially covered by insurance. The privilege is at present unused. It is one of the best privileges in the town, and should be utilized by some manufacturing industry.

The third cotton-mill was built in 1823 and 1824, on the site of the first corn-mill, on the banks of the Catacunemaug. This mill, known as the "Shirley Cotton-Mill," was built by Israel Longley, Esq., but on his death, which occurred before the building was completed, Thomas Hazen became the owner.

This mill was for many years rented and occupied by John Smith. Israel Longley, son of the original owner, afterwards operated this mill for many years. It had 2400 spindles, and, in connection with Fort Pond Mill, manufactured nearly 700,000 yards of brown sheeting annually. This mill was destroyed by fire May 26, 1867.

The next cotton-mill, or the fourth, was what is known as the Fredonia Mill, and is situated on the Catacunemaug, a short distance below the bridge. It was built in 1832, by a company of the same name, incorporated February 16, 1832.

The building is one hundred and fifteen feet long, thirty-six feet broad and three stories high. When first built the mill was run by water-power, but in later years a boiler-house and stack were added, so that now the mill is equipped with both steam and water.

From 1832 until 1863 Messrs. Israel Longley and Willard Worcester were the proprietors. Upon the death of one of the partners they were succeeded by Levi Holbrook, E. W. Holbrook and Charles W. Smith, under the firm-name of Levi Holbrook & Co. This firm continued until the year 1868, when the interest of the Messrs. Holbrook was purchased by Mr. J. E. Smith, the firm then becoming C. W. & J. E. Smith. These gentlemen were sons of John Smith, who for a time rented the Shirley Cotton-Mill. Mr. Levi Holbrook was the superintendent of the mill, under the new firm, for some time. This mill, at this time, ran 3280 spindles and sixty-eight looms, and employed about sixty operatives. The yearly product was 1,189,000 yards of light-brown sheetings. Mr. Warren N. Orswell, who is well known as a mill man, was the agent of this mill, as well as of the Phoenix, for several years. This mill was shut down in the summer of 1884.

Connected with this mill are twenty-five tenements for such of the help as are married, and in addition there is a large boarding-house. A beautiful avenue leads from this mill to the main road.

In 1886 Mr. J. E. Smith became the sole owner of this property, and in September of the following year Alfred Page, of Ayer, purchased it, and in December of that year deeded it to E. A. Richardson, who has since carried it on, in connection with Mr. Page. This new company employs about forty operatives.

Several improvements have been made in the property, and new machinery of various sorts added, so that now the mill runs seventy-four looms and 2880 spindles, and turns out annually about 1,000,000 yards of light sheetings, of a value of \$35,000. The yearly pay-roll amounts to about \$11,000.

The fifth cotton-mill was built in 1840 by Mr. Samuel Hazen, near the saw-mill erected by him in 1829, at the part of the town called North Bend. He also built several tenement-houses for the use of the operatives.

This was called the Lake Mill, and was first occupied by Mr. Oliver Barrett. It was afterwards enlarged and operated by the Fredonia Mill proprietors. Afterwards a company from Boston operated it until it was destroyed by fire, September 17, 1866. This mill was fitted with two thousand spindles and fifty-two looms, manufacturing about 524,000 yards of brown sheetings yearly.

A short distance below the Fredonia Mill, on the same stream, and a short distance above its juncture with the Nashua River, stands the largest mill, known as the "Phoenix Mill," the sixth cotton mill built in town. This was built by the Shaker Community in

the year 1849, and they gave it the name it now bears. The structure is of brick, one hundred and forty feet long, fifty feet broad and three stories high, exclusive of the attic. It is surmounted by a tower which contains a bell. The whole structure was built very thoroughly in every detail. There are three blocks of brick dwelling-houses, two stories high, each block containing four houses. These are designed for such of the help as are married and wish to be housekeepers. There is also a large three-story brick boarding-house, sufficiently large to accommodate all those who prefer boarding. Between the houses and the mill-pond is a beautiful grove of pine trees that furnish an agreeable shade from the summer sun.

There was also a large and commodious agent's house, furnished by the proprietors, connected with the establishment; but it is not now used in connection with the mill.

The dedication of this mill by the Shaker fraternity, on May 17, 1851, was an occurrence of such marked interest and peculiarity that the following extract from the account published by the *New Bedford Daily Evening Standard* is here inserted:

"The United Believers, who assembled on the occasion, consisted of the principal of the Shirley Shakers, with a large number who were invited from the society in Harvard, numbering from one hundred and fifty to two hundred persons of high respectability, distinguished for their neatness, benevolence and industry, as well as for their peculiar manner of worship. The services were opened by one of the leading elders, William H. Wetherbee, who delivered an address. This address was followed by an original hymn, sung by the congregation. Lorenzo Dow Grosvenor, an elder from Harvard, then addressed the assembly. He earnestly recommended his hearers to cultivate the disposition of brotherly love in all parties, to worship with frequency of spirit, and obey the dictations of those heavenly messengers by whom he felt they were surrounded. In conclusion, he recommended prayer, in which they all united, kneeling in silence. After a few minutes they arose and sang a hymn. They then proceeded in their usual manner to march by quick songs. Some thirty or more, who seemed to be singers, formed an oval, facing each other, and the rest marched round them, two deep, making one circle within another; after a while the inside circle faced around and marched in the opposite direction from the outside column. At the close of this exercise they took their seats in nearly the same form they at first stood in ranks, when Elder Grosvenor briefly explained the views and beliefs of the society. He was followed by Elder William Leonard, who more fully entered into the subject.

"After singing an original poem the meeting adjourned. At one o'clock the people reassembled and seated themselves in the order of their religious usage and opened their meeting with singing a hymn. The short address preceding the active worship then fol-

lowed, and the brethren and sisters arranged themselves in order for a march or dance, which they entered upon with renewed spirit. Several brief addresses were then made by persons of both sexes. Among the females was Mrs. A. D. Cook, who was distinguished for her gift in public speaking.

"The meeting closed at four o'clock P.M. The services were conducted by W. H. Wetherbee, as elder, and Jonas Nutting, as deacon, who discharged their duties in a manner highly creditable to themselves and to the great satisfaction of the spectators. During the exercises several songs were sung, accompanied by solemn marches, in their peculiar manner, which added much to the interest of the occasion."

The first tenant of this mill was a company from New Bedford, Mass., called the "Steam Mill Company," which they soon afterwards changed to the more fitting name of the "Phoenix Company." This company furnished the mill with shafting and machinery, and started business in 1852. They employed about one hundred persons, the mill running 5688 spindles, 3168 mule spindles and 2520 ring and traveler spindles, and 130 looms. Brown and bleached cottons were the fabrics manufactured, and the annual product was 1,050,000 yards.

This company later on purchased the property, and, in 1881, disposed of it to Messrs. C. W. & J. E. Smith, the proprietors of the Fredonia Mill, who continued to manufacture goods of the same grade as their predecessors.

Mr. Warren N. Orswell, who at one time carried on the manufacture of cotton at the Munson's Mill, was agent of this mill for some years. Mr. C. W. Smith died in the spring of 1883, and the following summer both this and the Fredonia Mill were shut down and remained idle for some years. In the month of July, 1888, the Phoenix mill property was purchased by the Sampson Cordage Works, a corporation having a capital of \$80,000, and organized under the laws of the Commonwealth of Massachusetts, to extend the business already established and previously carried on in Boston under the firm-name of J. P. Tolman & Co.

The business of this company is the manufacture of braided cotton cord and lines, of which they make a very large assortment, to be used for various purposes, such as bell-cord on steam and horse-railways, window-cord, fancy awning-cord, etc.

They immediately commenced at Shirley the manufacture of their yarns, and, in February, 1889, moved their braiding-machines from Boston. The company employ one hundred operators, two-thirds of whom are women and girls. They handle a ton of cotton every day, and have a weekly pay-roll of about \$600. The officers of the company are J. P. Tolman, president; Herbert G. Pratt, treasurer; Frank D. Aldrich, secretary. Mr. J. Edwin Smith, a former owner of the property, is a director in the company. The business headquarters of the com-

pany are at its Boston office, No. 164 High Street. The operation of this mill, which had so long lain idle, and the filling the tenements and boarding-houses with busy operatives, has done much to improve the business interests of the town.

To ensure this, as well as the other mills farther up the stream, a supply of water at all times, a reservoir was built upon the northern branch of the Catacunemaug. This branch of the river was fed by two large ponds, one of sixty and the other of one hundred and twenty acres area. In order to enlarge these, a dam was thrown across the river in 1852, at a point a little above the present paper-mill of B. S. Binney, and a pond covering some seven or eight hundred acres was secured. Another pond, on the southern branch, Fort Pond, in Lancaster, covering about one hundred and fifty acres, was utilized later on for the same purpose.

In the summer of 1856 this dam gave way, doing great damage. The following extract from the "History of Shirley," by Rev. S. Chandler, will show the extent of this damage:

"On the 2d day of July, 1856, the reservoir dam gave way, and the mass of water which it had held in reserve poured down the valley, overflowing its banks, and inundating fields and meadows with its turbid waves. Four road bridges, five mill-dams, two blacksmith-shops, one saw-mill, and some smaller buildings, with one railroad bridge, were swept away, and other structures were partially undermined and injured. This was a sad day for the town in general, and for its manufacturing interests in particular. The estimated loss occasioned by this disaster, public and private, was about \$50,000. The cause of this calamity has not been fully determined. The dam had braved all the force of the spring freshets, and at the time of its failure the water was two and a half feet below high-water mark. Undaunted by disappointment and loss, the Reservoir Company immediately commenced to reconstruct their dam, and in prosecuting their work they aimed to place their structure in a position of such security as to bear any pressure of water to which it could be subjected. The roll is of stone, bedded on a solid foundation and jointed with great care. This foundation is protected by plank spiles, driven five feet into the solid earth. These spiles are continued the whole length of the dam, and its massive embankments are sustained by a central wall of strong brick masonry, and the whole is declared finished in a substantial and workmanlike manner."

The seventh cotton manufactory in town was founded in 1865 by Mr. N. C. Munson, a widely-known contractor. It is situated on the privilege of the first cotton-mill, and is known as the "Munson Mill or New Mill." It is a large structure, one hundred and fourteen feet in length, three stories in height and furnished with steam heat.

It was fitted with 3400 spindles, eighty looms, and

employed at one time fifty operatives, turning out about fourteen thousand yards of brown sheetings per week.

Later on this mill was occupied by C. A. Edgarton & Co., who manufactured tape and webb for suspenders.

Warren N. Oswell, at one time agent for Phoenix and Fredonia Mills, carried on the manufacture of cotton here for some years; he was succeeded by Messrs. Nickless & Holt, who manufactured cotton yarns during the years 1887-88. This concern run 3500 spindles, producing 3500 pounds of yarns per week, and employing thirty operatives.

The mill now stands idle, and is in the market for a purchaser, offering a rare opportunity for a manufacturing interest.

This completes the list of cotton manufactories. Closely following comes that of paper-making, which has been carried on in the town for nearly one hundred years. In the latter years of the eighteenth century Jonas Parker and Thomas Parker, his brother, went to Waltham for the purpose of acquiring the art of paper-making. After a year's residence in that place they returned to Shirley, and in connection with Joseph Edgarton, Esq., built the first paper-mill. This was located on the Catacunemaug, on the spot afterward occupied by Messrs. Pope & Co. as a fork-shop. This was a small mill, with but one engine, and there was no means of drying then known but by sun and air. But the advent of a new industry into the town was hailed with delight by the townspeople. It was the forerunner of a large industry.

The Parker Bros. carried on the business for some years, finally selling out to Lemuel Willard & Brother, who, in turn, disposed of the property to Joseph Edgarton & Co. This firm made paper here for some years, but finally suspended the work in this place, and the building was used for a batting-mill, continuing to that use until 1837, when it was destroyed by fire.

The second paper-mill was built by the Edgarton Company, who had become interested in this industry and decided to enter into the manufacture on an enlarged scale. They accordingly, in 1828, built a larger mill upon the Nashua River, near the corn-mill erected by Joshua Longley. This mill was two stories in height, the upper part being entirely devoted to drying purposes. Mr. H. P. Howe was the superintendent of this mill. "Mr. Howe was a skillful machinist," says Rev. Seth Chandler, in his "History of Shirley," and he devised various artificial methods to remedy the long process of air-drying. He finally hit upon the plan—which he subsequently patented—of the 'fire-dryer.' This wonderful machine, after many trials, alterations and amendments, was at length completed, and put in operation with satisfactory results. It is hardly possible to describe the astonishment which the new enterprise created. The dull way of grinding the material, pressing it into sheets and then passing it through a long season of air-dry-

ing, was a tedious method of producing one of the most important articles of domestic and business use; and such was the imperfection of the material thus produced that it would hardly be regarded worthy the meanest service to which paper is devoted at the present time. By the invention of Mr. Howe the pulp was received at one extreme end of the machine, and after passing through a complicated process of change and preparation, was discharged at the other end finished paper, ready for immediate use."

The invention of the "fire-dryer" having established the reputation of Mr. Howe, he, in 1833, set up a machine-shop near the mill and for some years carried on the business of making them.

The Edgarton Mills were enlarged by extending the building and the addition of new machinery. These mills were run until destroyed by fire, June 15, 1837. In 1842 Mr. Eli Page purchased the privilege and erected another paper-mill, renting it to one Moses Carlton as first tenant, but it was soon after rented to John L. Hollingsworth, who greatly enlarged and improved it. He manufactured yearly 50,000 reams of paper. Mr. Hollingsworth was succeeded in 1852 by Stephen Roberts, an old and experienced paper-maker, who made manilla paper out of old ropes—the cast-off cordage of vessels—and dyed it with ochre, turning out about one ton per day.

When Mr. Roberts relinquished the business the old mill was removed and a new mill built. This was occupied by John Roberts, a son of Stephen. This also was destroyed by fire, having been occupied but a short time.

The next manufactory of paper was situated in the basement of the mill formerly occupied by Joseph Edgarton & Co. as a cotton manufactory, and known as the "Old Red Mill," which has been the subject of a poem by Mrs. Sarah C. Edgarton Mayo:

"Bright in the foreground of wood and hill,
Close by the banks of my native rill,
Rumbling early ere dawn of light,
Rumbling late through the winter's night,
When all the air and the earth is still,
Toileth and groaneth the old red mill."

This was owned by William W. Edgarton. It was furnished with a steam-dryer and turned out about four hundred reams of coarse wrapping-paper per week.

The fourth paper-mill was commenced in 1837, in the building erected by the Messrs. Rockwood as a clothier's mill, on the Squannacook River. The business was carried on by several different parties until 1853, when Oliver Howe purchased the property; he let it to Harrison Hartwell for a few years. In 1857 Mr. B. F. Bartlett, of Pepperell, became the owner, and he in turn disposed of it to George W. Mitchell. In December, 1865, Mr. E. H. Sampson became the owner. He carried on the manufacture of "leather board" until April 3, 1879, when the mill was burned. The tall chimney, which was left standing, was in

1885 torn down, thus destroying the last vestige of the paper-making industry in that part of the town.

This mill was one of the first to manufacture "leather board" in this country. Its product was one ton of "leather board" per week.

The fifth paper-mill was built in 1868 by Samuel Hazen. It was located near the site of the Lake Mills, destroyed by fire in 1866.

Andrew and Granville Williams were the first occupants; they were succeeded by Stephen Shepley, who was largely interested in paper-making.

Mr. Shepley sold the property to B. S. Binney, who began the manufacture of paper for paper bags. These bags were made by machinery, and about 120,000 were made per day.

In 1886 extensive improvements were made in the property; about one-half of the old mill was rebuilt with heavy Southern pine and the floor raised, thereby gaining a roomy basement for the intricate lines of shafting, water-pullies, steam and water-pipes necessary to carry on the paper-making; at the same time all the old mixing and heating machinery was taken out and new and larger machines put in, thus greatly increasing the capacity of the works. In 1885 Mr. Binney commenced the manufacture of "Asbestos paper." This paper is perfectly fire-proof in any temperature. It is used for covering boilers and steam-pipes, covering the inside of boiler-rooms and any and everywhere that money and life can be saved from the great destroyer, fire. To show the wonderful growth of the business, the following yearly productions are given:—1885, 75,000 lbs.; 1886, 106,000 lbs.; 1887, 262,000 lbs.; 1888, 435,000 lbs.; 1889, 473,900 lbs.

In 1887 Mr. Binney added another specialty, which is patented, namely, a heavy deadening felt which, though made from very combustible material, is rendered chemically fire-proof, so that if a piece one-sixteenth of an inch in thickness be placed over a gas-jet and blow-pipe for twenty-four hours, a piece of cotton wool placed on the felt will not be scorched even.

The rapid development of the business necessitated increased room and machinery, so that in 1888 an ell 25 x 50 was added to the east side of the mill and filled with new and costly machinery. The following year it was found necessary to again enlarge, and another ell 25 x 60 was added, together with an office. At this same time the old part of the mill was rebuilt in a substantial manner, and this and the ell filled with new machinery.

The present production of the mill is 8000 lbs. of "leather boards" daily, or 6000 lbs. asbestos and 6000 lbs. carpet-lining or building felt.

A large number of operators are employed in this industry, which is one of the most important in the town.

The iron industry also has been carried on in the town, although never in any considerable way. The first record of the working of iron that exists, was that of the establishment of a "forge," as it was then

known, in the closing years of the last century by Ebenezer Pratt. This stood on the Mulpus Brook, very near the location upon which the Wilson carding-mill was built. Here Mr. Pratt, with the help of his three sons, made scythes, but, finding the profits small for the amount of labor expended, the business was soon relinquished.

The Catacunemaug was the location upon which was built the second "forge." The builders, Messrs. John and Benjamin Edgerton, continued the business for about ten years, when they too abandoned it.

Messrs. Pope & Parsons were the proprietors of the next factory for the manufacture of farming implements. In 1850 this firm established a mill on the Catacunemaug for the manufacture of hay and manure-forks, and continued to do a successful business for some years, employing some eight or ten men. They turned out about five hundred dozens of forks—of superior quality—per annum.

This completes the list of manufacturers of farming implements, but not of the iron industry, for the manufacture of nails has been followed to some extent by the people of Shirley. William McIntosh was the first to commence the manufacture of cut nails, in or about the year 1810, a business which he followed for several years.

William W. Edgerton and brothers, in 1855, were the proprietors of the second nail factory; this was situated in the basement of the cotton-mill formerly occupied by J. Edgerton & Co., and known as the "Old Red Mill." They manufactured horse nails, of which they made about one hundred and fifty pounds per day. The business was abandoned in 1865. The "Old Red Mill" was burned in September, 1855, and the business was continued in a new building erected for the purpose.

The manufacture of carriages has also been carried on. One Thomas Hunt established the industry in a small way in the early part of the present century. His shop was located in what was known as the South Village. Later on—in 1716—Joseph Hoar built a wheelwright shop on the Mulpus, where he carried on business for three years, employing three or four men. In 1819 he sold the business to Joseph Esterbrook, who, for sixteen years, carried on a successful business. The building was destroyed by fire in 1821, but was quickly rebuilt. In 1835 Andrew Shattuck became the proprietor. The business was again sold in 1840 to Harvey Woods & Bro. Under this firm the buildings were greatly enlarged and facilities for carrying on the business very much improved. They, in turn, were succeeded by Moses Wood, a brother, and he by Henry Brown and Oliver Wing.

Carriages of all sorts and descriptions, and in almost all their parts, were manufactured by these several firms, and they added the manufacture of harness and certain kinds of upholstery. During the Mexican War and during the War of the Rebellion they manufactured many military baggage-wagon-

and ambulances, and six hundred railroad carts were annually turned out for many years. In 1871 the whole establishment, together with a large boarding-house, was totally destroyed by fire. They employed some thirty workmen. Woodsville received its name from the Messrs. Woods.

Emery Williams opened a wheelwright-shop in the South Village in 1853. This shop was connected with the Hazen Mills, and on the same water privilege. He employed six men in the manufacture of farm-wagons. Mr. Williams is the inventor of a washing-machine. Soon after, Mr. William Sawtel commenced the manufacture of window-blinds and sashes in the same neighborhood, carrying on the same for several years.

In 1850 a planing and shingle mill was started in the basement of the "Old Red Mill" before referred to, which was operated about five years, when it was succeeded by the horse-nail industry.

Leather has been manufactured to some extent in the town. In 1793 Nathan Adams established a tannery on Mulpus Brook. Here he carried on business until 1801, when he sold out to Stephen Barrett, of Concord. Mr. Barrett continued the tanning and carrying of leather until his death, in 1856, when the leather industry ceased to be a part of Shirley's business occupation.

Hoop-skirt-making has also been carried on in the town. In 1861 George Sanderson commenced to manufacture hoop-skirts, employing some fifteen operatives, who turned out weekly about seventy dozens of skirts.

The Shakers in this town have always been an industrious people, and have manufactured many different articles, and such is the quality of the work done, that they have established a reputation for excellence to be desired by all manufacturers. Among the many different articles that they have manufactured may be mentioned agricultural implements, woodenware, hair sieves, brooms, grass bonnets, husk mats, feather fans, and fancy articles of various kinds. They also cure herbs, make a kind of apple-sauce, called "Shaker Apple-Sauce," make tomato preserve, and various articles of a similar nature, all of which find a ready sale.

There is another industry deserving of mention, that was for some years carried on by the female portion of the town, and that is the braiding of palm-leaf hats. For years, nearly every family had one or more of its members engaged in this industry, and, in fact, so profitable was this occupation at one time, that whole families were enabled to earn comfortable livelihoods. In 1837 something over seventy thousand of the hats were manufactured, and were valued at about \$12,500.

For some years a condensed milk factory was carried on in one of the buildings connected with the Dawson Mill property. From time to time other industries have been started, but after a brief existence have been discontinued.

One of the most important industries in the town is the manufacture of suspenders, suspender-webbing and elastic goods, by Charles A. Edgarton & Son. This firm commenced business some time in the year 1870, under the firm-name of Charles A. Edgarton & Co. They first devoted their attention to the manufacture of tape, bindings, bed-lace, etc., using the ingenious machinery then recently patented. They occupied the mill known as the Dawson Mill, which was located on the site of the Fort Pond Cotton Manufactory. After remaining here for some time they removed the business, in 1873, to the mill lower down on the Catawunemaug, known as the Munson Mill. The manufacture of suspender-webbing and elastic goods was then added to the regular line of business, and such was the success of the new undertaking that eventually it became the principal line manufactured. In 1878, the company, seeing the desirability of making a better line of goods, put in new and improved machinery, thereby enabling them not only to manufacture a greatly superior quality of goods, but to so enlarge the business that it soon became evident that enlarged quarters, as well as new machinery, were required. Accordingly, in 1881, the company, now changed to C. A. Edgarton & Son, by the admission of Charles Frederick Edgarton, built a new factory just below the Munson Mill, on the banks of the same stream. This structure was of wood, twenty-eight feet wide by eighty feet long, and two stories in height, independent of the basement. This they fitted up with new and improved machinery, using steam as the motive-power for the same. Since occupying their new factory the firm have manufactured suspenders exclusively, beginning with the material, cotton, silk and rubber, in a raw state, and making therefrom the elastic webs which they use in the manufacture of a full line of men and boys' suspenders of all grades and qualities, from the cheapest to the finest hand-embroidered holiday goods. The factory runs 119 looms and 275 shuttles, and turns out about 2500 dozens of finished suspenders of the various grades per week. To manufacture these goods they employ 100 operatives, both male and female, who are mostly residents of the town. The firm has two offices, one at the factory and the other in New York. The products of this company, which stands second in the amount produced in the country, among the manufacturers who are exclusive makers of suspenders, are well known throughout the country, being sold in nearly every State of the Union; and such has been the demand for their goods in the last few years that they require additional room, and arrangements are being made for a large addition to their present factory, whereby their facilities will be greatly increased and they be able to meet more amply the requirements of their growing trade.

SCHOOLS.—While Shirley was a part of Groton township there were no schools within its bounds. The financial condition of the town was such that

it would not allow of the establishment of schools in the remote section, or angles as they were called in those days, and therefore the children were either obliged to travel many weary miles to the centre of the town or go without learning.

But home instruction was not neglected by our forefathers, and though for years the early settlers were without schools, yet there were few who could not read, write, and cast up common accounts. For the first four years of its existence as a distinct corporation the town was without schools.

The first record of a school being held in town was in May, 1757, the town voting "to have a school for three months, and to have it commence in August or September." This school was held in a private house, a single room in the dwelling-house of Jonas Longley being used. This house was located in the Centre, on the estate now known as the Augustus Holden farm.

Schools continued to be held from time to time in various places until the Revolutionary period, when they were suspended owing to the embarrassed condition of the finances of the town. The sessions were renewed soon after the peace was declared, and were entered into with a renewed interest, the facilities of learning were increased and once more all were given an opportunity to acquire learning.

The first school building was erected at the "Centre" on the land of and near the residence of the late Rev. Seth Chandler. It was, like all school-houses of that time, a small and unpretentious edifice of one story, "about twenty feet square," single boarded with rough boards, without inside ceiling, but was furnished with a cellar, to which access was gained by a trap-door in the centre of the room. In one corner of the apartment stood a huge fire-place, built of rough stones, and surmounted by a chimney of the same material. The room was furnished with a few seats made of rough planks, and with writing benches made of boards over which a plane never passed. To facilitate the means of supporting a school for a few weeks each year, it was customary to rent the building to the pedagogue or school-marm as a tenement, in part payment for his or her service in "teaching the young ideas how to shoot."

This school was taught by one Dame Nutting. Of her, Rev. Seth Chandler, in his "History of Shirley," writes: "Such was the obesity of this female official, that she might have stood beside Falstaff himself without losing aught by the comparison. To supply, therefore, the defect of an unwieldy person she kept herself provided with a stick—some five or six feet long—with which she reduced her urchin crew to a state of subjection while seated in her chair-throne, from which she seldom moved."

Hand-bells and gongs had not then been invented and this worthy dame summoned her pupils from recess by a vigorous beating of the outside of the building with the stick. She used to keep order in the

school, and the summons was usually obeyed, for the present ideas in regard to corporal punishment had not then been entertained.

For a few years this building was large enough to accommodate all the scholars desiring to attend school; but soon it was found necessary to provide additional facilities, and accordingly the town was divided into three districts,—the North, the Centre and the South. The Centre occupied the school-house already built and the other districts were obliged to hold their schools in private houses. The school in the North District was held in the house known as the Reuben Hartwell place, near the present North School-house, while the Southern District held theirs in different houses, as circumstances allowed. School buildings were erected in each of these districts before the close of the century, the building being of a character such as the times would permit.

The present North School occupies the site of the first building erected in that district. The building was subjected to alterations two or three times, and in 1844 was removed and the present building erected. The old building was afterwards used as a blacksmith shop.

The Centre School-house was located on the Common, quite near the present location of the First Parish Church. The school-house in the South District was located upon the opposite side of the road from John Park's house. Later on it was converted into a dwelling-house. Later on the town was re-divided, it being thought necessary to have six districts, and these were named as follows: Middle, South-Middle, South, North, East and Southeast.

Buildings for school purposes were erected by each of these districts and they were located on or very near the sites of the present structures.

There was also a Seventh District, or the Shaker School; this was located among the Shakers, who furnished the room, which was fitted up with their accustomed neatness.

Up to the year 1843 it had been the custom of the several districts to furnish at their own expense the school buildings for the use of the scholars within the limits; but as many of the districts were small and the number of children few, the buildings erected were of a cheap character and not suitable for the purpose intended, so that in the year mentioned the town voted to "assume the buildings at a fair appraisement," and later they were all rebuilt and in some instances the buildings were for the times quite expensive structures.

At the time the town became the owner of the school buildings, they were all numbered to comply with a law of the Commonwealth, and some of them continue to be so designated at this time.

In 1846 District No. 3 was divided, thus forming what is now known as No. 8. The present school buildings, with the exception of those in Districts No. 4, No. 6 and No. 8, have been built since 1855.

The new buildings were all constructed on a new and improved plan, and furnished with patent desks, and were well adapted to meet the requirements of the schools; but while they are large enough to accommodate all the pupils of the present day, they yet lack many of the appliances needful for the more modern system of teaching. All these buildings, with one exception, are single-story structures and built of brick. The grammar-school, which is situated in Shirley Village, is a two-story structure also of brick, and contains two rooms, one of which—the upper—is occupied by the grammar-school, and the other by the primary. This school-house has been lately much improved by the addition of a furnace for heating purposes and various other repairs.

This town, although a small one, has, within the last quarter of a century, expended nearly twenty-five thousand dollars on its school-houses, and greatly increased the appropriations for the support of the schools, while the number attending the schools has not materially increased. The annual cost of the schools at the present time is about three thousand dollars.

For several years the schools were in session for a period of twenty-four weeks during each year, and later on this was increased to thirty weeks, divided into three terms of ten weeks each. The terms of the schools have, from time to time, been lengthened by private subscription, and for a few years a select school was held for three months in the fall of the year in the basement of the town-hall, which was well adapted for the purpose, being large and well ventilated. In 1853 this school was provided with an apparatus for illustrating physical science, furnished by the subscriptions of several of the liberal citizens.

At the present time the school year is divided into three terms of three months each.

Under the present administration of the schools there are but five of the school buildings in use for school purposes,—the Centre or No. 1, the Grammar or No. 3, the East or No. 5, the North or No. 6, and the Intermediate or No. 7. The average number attending school is from 250 to 270, of all ages from five to sixteen.

As in all country towns, these pupils are scattered over a wide range of territory, and in years past it has not been possible to grade most of the schools as well and carefully as was desired. The village schools, three in number,—the grammar, intermediate and primary,—situated as they are in that part of the town the most thickly settled, are for this reason more carefully graded than the other schools of the town. These schools, for the last two years, have been under the charge of teachers who are graduates of the Normal Schools.

Normal graduates are employed in the other schools in the town with one exception. The advancement in the several schools by reason of this change has

been very satisfactory, and the work accomplished by the introduction and working out by these normal graduates of new methods and advanced ideas has been all that could be reasonably expected, showing conclusively the wisdom of the change and the desirability of obtaining for the schools the best possible aids to education.

Under this present system of teaching, music has been introduced into the schools in a small way, and it is the intention of the School Committee to more thoroughly introduce it in the near future.

In the fall of 1889 the Shaker School, so called, was discontinued. The committee, after carefully considering the question, decided that inasmuch as the Shaker fraternity were unwilling to either send their children to the village schools for instruction or to admit of any number of pupils from outside their families attending—the committee, owing to the crowded condition of some of the other schools, desiring to send a number of scholars there—they could not rightfully continue the school. It was held by many that the school was sectarian, and therefore, under the existing law of the Commonwealth, could not be supported by the town.

The town has been the recipient of two bequests for the benefit of the schools, the first of which was from the Hon. Leonard M. Parker, a native of the town and a man prominent in the affairs of the State.

In 1856, at a town-meeting convened August 4th, the town voted to accept his bequest, which the following extract from his will will explain: "I give and bequeath to the inhabitants of the town of Shirley, aforesaid, the sum of four thousand dollars, to constitute a fund for the endowment and support of a high school for the benefit of all the youth of the town," the same to be placed under the superintendence and direction of a board of six trustees named in the will, this board to consist of five, when reduced to that number by death or otherwise; arrangement was also made whereby the vacancies occurring on this board from time to time should be filled.

This fund was, according to the implied request of the donor, placed in the hands of Dr. James O. Parker, as treasurer, by the trustees of the fund. Dr. Parker entered upon the discharge of his duties July 12, 1856, and continued in the office until 1872, when his name was dropped on account of the aroused suspicions on the part of the town and the trustees of the fund, and Rev. Seth Chandler was appointed in his place.

The fund at this time amounted to \$8151.52. Of this sum Dr. Parker paid over to his successor, in the office of treasurer, at the beginning of the fiscal year, June 30, 1873, the sum of \$3654.67, leaving in his hands a balance of \$4496.85, which sum he repeatedly promised to pay, but his promises were never fulfilled. Frequent demands were made by the treasurer of the fund upon him, but to no purpose, and at length the town appointed a committee to collect from the ex-

treasurer the sum due the fund, then amounting to over \$7500,—after a tedious litigation it was decided that, owing to the poverty of the defaulting treasurer, the amount could not be recovered.

The fund remaining in the hands of the trustees after paying the costs of litigation was found to be so small that little could be done towards carrying out the plans of the donor; accordingly a compromise was proposed between the town and the residuary legatees of the estate of Hon. L. M. Parker, "by which the remainder of the funds might be used for any legitimate town purposes," but by reason of the disagreement of counsel the case is still before the court in an unsettled condition. The amount of the fund at the present time, 1890, is about \$6000.

The second of these legacies was that of Mrs. Sarah P. Longley, who died in 1889. Both Mrs. Longley and her husband, the late Israel Longley, were greatly interested in the public schools in the village, and the fund created by her will be a fitting monument of her generosity, and the names of Mr. and Mrs. Longley will long be kindly cherished by the grateful scholars of the village school.

The following is an extract of her will: "I give and bequeath to the town of Shirley the sum of six thousand dollars in trust to keep the same invested in safe securities, and I order, will and direct that the said town shall pay the income or interest of four thousand dollars towards the support of the union or high school, and the income or interest of two thousand dollars towards the support of the primary and intermediate schools, all of which schools are now situated in Shirley village. The principal, six thousand (\$6000), to be invested by itself and called the 'Israel Longley School Fund.'"

Thus the town has two funds aggregating some twelve thousand dollars, the income of which shall be a last benefit to the schools, and the funds will stand as lasting monuments of the generosity and public spiritedness of the donors.

In 1842 five out of the seven school districts availed themselves of the State appropriation offered in that year—on condition that as much more should be added by a town tax or private subscription, and procured the "School Library," published under the direction and superintendence of the Massachusetts Board of Education.

These libraries are now a thing of the past, they having been so much neglected by the people that their existence, if in fact they do now exist, is no doubt forgotten.

The number of persons from this town who have received a college education is small, owing, doubtless, to the limited population, the pecuniary inability of parents to give their sons a public education, and the general inclination of the young men to engage in mechanical pursuits. Among the number may be mentioned General Daniel Parker, a graduate of Dartmouth, class of 1801. He was a classmate of Daniel

Webster. He for years was judge advocate of the Third Division of Massachusetts militia—afterwards he was appointed by President Madison adjutant and inspector-general of the army with the rank of brigadier-general. He died in 1846.

Leonard M. Parker, a brother of Daniel, was also a graduate of Dartmouth in the class of 1808. In 1812 he was appointed army judge advocate. In 1816 he was elected to the House of Representatives from Charlestown, where, on his admission to the bar in 1811, he began the practice of his profession. Soon after he was chosen to the Senate, and continued to be elected to either the Senate or House until 1830, when he was appointed naval officer for the port of Boston and Charlestown. After the expiration of his term he removed back to Shirley and he was immediately returned to the House, and until 1850 was actively engaged in both branches of the State government.

Mr. Parker was active in town affairs, serving both on the Board of Selectmen and School Committee.

He was active, too, in church work, being a member of the First Parish Society.

While in the State Senate in 1826–27, he was a leader in the struggle which resulted in making Warren Bridge a free bridge and opening "a free passage from Boston to the country,"—a most important and warmly contested movement. And when in the early history of the anti slavery agitation, in 1837, the national House of Representatives adopted the resolution overthrowing the right of petition upon the subject of slavery, in the battle against which John Quincy Adams, then a member of that House, bore so prominent and noble a part, Mr. Parker, as chairman of the committee to which a memorial upon the matter was referred in the State Legislature, prepared and reported a series of resolutions, of which the following are a part:

"Resolved, That Congress does possess the constitutional power to abolish slavery within the District of Columbia.

"Resolved, That the foundation principles of our political institutions, the honor of our country, and the peace of all, demand the solemn consideration by Congress of the wisdom and effects of exercising the power aforesaid.

"Resolved, That the right of petition, and free discussion in regard to all matters within the constitutional powers of Congress, ought to be held sacred; and any attempt to impair or abridge it should be met with devoted firmness."

This, so far as we have been able to learn, was the first report of resolutions in any form to the Legislature, or to any Legislature in the country, "asserting the right of Congress to abolish slavery in the District of Columbia, and making upon that body a solemn demand to consider the wisdom and the effects of the exercise of that power."

One other name is worthy of mention here, though not a college graduate—Oliver Holden. He was born in Shirley, September 18, 1765. Trained to the trade of a carpenter, his musical gifts led him in time from that employment to that of a teacher and composer of music. He was the author and compiler of several musical works which had large sale and became widely

popular. But "what most distinguished him, and that for which he will be the longest known and remembered is the composition of that divine tune 'Coronation.'"

PUBLIC LIBRARY.—The first library of a public character of which we have record was known as the "Social Library." It was established about 1790 by the associated effort of a few prominent families, under the lead of the first minister of the town, Rev. Phinebas Whitney. It numbered somewhat over one hundred volumes at the beginning, and was increased from year to year by such additions as circumstances would permit. We are told that "not a work of fiction was on its shelves,—nothing of an ephemeral character,—but standard history, geography and natural science." It was esteemed a valuable collection at the time, but passed from service with the generation with which it started.

In 1839 another movement for a library was made by a few ladies of the First Congregational Society. An association was formed for its maintenance, and it was supported by a membership fee, initiatory and annual. It numbers about seven hundred volumes.

During the pastorate of Rev. Mr. Norcross, of the Orthodox Church, at his suggestion and by his aid, a reading circle was formed. Books for reading were purchased as members desired, and passed from one to another on a system of mutual ownership and exchange. Somewhat more than one hundred volumes were gathered in this way, and in 1884 they were offered to the town on certain specified conditions, to be made the basis or beginning of a Public Library. The town consented to the conditions and accepted the offer, and elected a board of trustees. It also made an appropriation for the purchase of new books, and continues this practice annually. The appropriation for the present year is three hundred dollars. The trustees perform the duties of librarian, and render all service free. The library now contains about eleven hundred volumes, and arrangements are in progress for the opening of a reading-room in connection with it.

ECCLESIASTICAL HISTORY.—At the time the district was organized, the nearest place of public worship was in the parent town, Groton, a distance of from three to nine miles. The roads were but rough pathways through the woods, and the only passage across the river was by a narrow foot-bridge, or by fording. The travel was on foot or horse-back, and yet, with this distance and its difficulties, those who were in health and able to make the journey were seldom absent from church. The need of religious privileges at a nearer and more convenient point was deeply felt, and was one of the reasons for the separation and incorporation of the district, and an early movement was made to secure the same. At a legal meeting held six months after its organization, the second article in the warrant was: "To see if the town will hire any preaching this spring."

"Passed in the negative" is the record of the action at this time. But soon another effort was made, and with better success. "At a legal meeting begun and held at the house of Mr. Jonathan Gould, in sd district of Shirley, it was voted to raise Ten Pound, lawful money, to hire preaching." This was in the first year of the district's incorporation. In the same year steps were taken toward building a house of worship. A meeting was held October 24th at the house of Robert Henry, and adjourned thence to the spot which had been selected for the meeting-house. A slight change was determined in the location and recorded as follows: "Voted to move the meeting-house place from where the committee stated it, about thirty poles west to a white oak tree and heap of stones." "Voted that William Simonds, Jerahmeel Powers and Sammel Walker be a committee to move the meeting-house." By which was meant, make the change in location and move such material as had been brought to the place. The people were invited to labor on the house and grounds, and were to be allowed "four shillings a day for a man, and one shilling a day for a pair of oxen." In November the site was prepared and the frame erected. "It stood nearly opposite the location of the present Centre School-house." The covering, laying the floors and finishing proceeded slowly. On December 26th the district voted "to raise £16, to provide building materials." The house was completed late in the following spring, or in the early summer, and was a rough structure, ceiled on the outside and without pews or seats. These, however, were furnished within a few years, the first being built by the town at the right of the pulpit for the minister's family, and the custom adopted of seating the house according to the dignity of the people, the largest tax-payer being considered first, the men sitting at the right of the broad aisle, and their wives having the same position on the left.

At a meeting held a few weeks before its completion, it was "voted to hire three months' preaching." And, on November 29th, it was "voted to have six weeks' preaching this winter." The expense of maintaining religious services appears to have borne heavily, and during the following year, 1755, we have no account of any being held. But at the meeting of the Colonial Legislature in September, a petition was presented, which reads as follows:

"Province of the Massachusetts Bay.

"To His Honour Spencer Phips, Esq., Lieutenant-Governor and Commander in chief of said Province; to the Honourable, His Majesty's Council and House of Representatives, in General Court assembled at Boston, September 24th, 1755.

"The petition of John Whitney, James Patterson and Jonas Longley, a committee duly appointed by the District of Shirley, humbly sheweth, that the said District is small, and many of them poor; but the great distances they lived from the Public Meeting-House in Groton, obliged them to get off from said town, in order to receive privileges among themselves; altho' we have been set off more than three years, we have not been able to settle a minister, tho' we have built a small House for the public worship of God, and have hired preaching part of the time since we were set off; and so it is, that there is now about one-third of our Rateable Polls are enlisted in his Majesty's Service; but we being

desirous to settle a Minister among ourselves (but think ourselves not able without some further assistance than to raise our Estates, and what Polls we have), and there being several Hundred Acres of unimproved Lands lying within our District, which is made much in value for our improvements, so that we humbly pray your Honour and Honours, to enable the said District of Shirley to assess all the unimproved Lands lying within said District, for three years next coming, at two Pence per Acre, to enable us in settling of a Minister, and other necessary charges in said District; and to assess and collect the same in such way and manner as your Honours shall see meet; as in duty bound shall ever pray.

"JAMES PATTERSON,
"JOHN WHITNEY."

Upon this petition the following order was issued:

"In the House of Representatives Sept. 26, 1755.

"Resolved ordered, that the Petitioners serve the Non-resident and other Proprietors of the unimproved Lands in the District of Shirley with this Petition, by inserting the substance thereof in one of the publick Prints three weeks successively, that they show cause (if any they have), on the second Friday of the next setting of this Court, why the prayer should not be granted.

"Sent up for concurrence.

"T. HYDEARD, Speaker.

"In Council, Sept. 26, 1755. Read and concurred.

"THOMAS CLARKE, Dep. Sec'y.

"Copy examined.

Per THOMAS CLARKE, Dep. Sec'y."

This was printed in the *Boston Gazette or Country Journal* October 6, 1755.

Soon after the completion of the meeting-house it was decided to have a settled ministry, and a committee was appointed to attend to the matter and to seek advice of neighboring ministers in the discharge of this duty. A day of fasting and prayer was appointed and observed—June 18, 1755—"that they might have divine guidance in a matter of such great moment."

In February of the following year an invitation was extended to Mr. Goodhue, from Hollis, N. H., who had been supplying the pulpit for some six or seven months. He accepted, on condition "that a mile of territory from the town of Lunenburg could be annexed to Shirley." This territory would give a more regular form to the town and assist its interests, and was, therefore, desired by it. A petition for it was sent to the "Great and General Court," at Boston, but was not granted, and Mr. Goodhue was not settled. Another invitation was given to him two years later, but declined.

After several disappointments, a unanimous invitation was given to Rev. Phineas Whitney, of Weston, February 25, 1762, and accepted. It was "voted to give Mr. Whitney £133 6s. 8d. as a settlement, and that one-half be paid in three months, and the residue within the year. And voted to give £53 13s. 4d. as a salary, to be raised to £60 when the district shall have seventy-five families, and to £66 13s. 4d. when there shall be eighty-five families, with the addition of twenty cords of wood annually to be carried to his door." Land owned by the district was deeded to Mr. Whitney in part payment of the sum voted to him as a settlement, and on this he built his home. His letter of acceptance bears date April, 1762, and his ordination took place in June. The church was organized by the council previous to the ordination, and a cov-

enant adopted and subscribed by the pastor-elect and twelve brethren. No names of women appear.

The covenant reads as follows:

"We whose names are hereunto subscribed, being inhabitants of the District of Shirley, New England, knowing that we are very prone to offend and provoke the Most High God, both in heart and life, through the prevalence of sin that dwelleth within us, and manifold temptations from without us, for which we have great reason to be unfeignedly humble before him from day to day;—do in the name of our Lord Jesus Christ, with dependence upon the gracious assistance of His Holy Spirit, solemnly enter into covenant with God and with one another according to God, as follows:

"1. *Imprimis*. That, having chosen and taken the Lord Jehovah to be our God, we will fear him, cleave to him in love, and serve him in truth, with all our hearts, giving up ourselves to him to be his people; in all things to be at his direction and sovereign disposal; that we may have and hold communion with him as members of Christ's mystical body, according to his revealed will, unto our lives' ends.

"2. We also bind ourselves to bring up our children and servants in the knowledge and fear of God, by holy instructions, according to our best abilities; and in special by the use of Orthodox catechism, that the true religion may be maintained in our families while we live; yea, and among such as shall live when we are dead and gone.

"3. And we further promise to keep close to the truth of Christ, and drawing with lively affection toward it in our hearts, to defend it against all opposers thereof, as God shall call us at any time thereunto; which that we may do we resolve to use the holy scriptures as our platform, whereby we may discern the mind of Christ, and not the new found inventions of men.

"4. We also engage ourselves to have a careful inspection over our own hearts, viz., sons to endeavor, by the virtue of the death of Christ, the mortification of all our sinful passions, worldly frames and disorderly affections, whereby we may be withdrawn from the living God.

"5. We moreover oblige ourselves (in the faithful improvement of our ability and opportunity) to worship God according to all the particular institutions of Christ for his church, under Gospel administrations, as to give reverent attention unto the word of God, to pray unto him, to sing his praises, and to hold communion each with others, in the use of both of the seals of the covenant, namely Baptism and the Lord's Supper.

"6. We likewise promise that we will peaceably submit to the holy discipline appointed by Christ in his church, for offenders; obeying (according to the will of God) those that have the rule over us in the Lord.

"7. We also bind ourselves to walk in love, one towards another, endeavoring our mutual edification, visiting, exhorting, comforting, as occasion serveth, and warning any brother or sister which offendeth, not divulging private offenses, irregularly, but heedfully following the several precepts for church dealing (Matthew xviii. 16 and 17), willingly forgiving all that do manifest, unto the judgment of charity, that they truly repent of their miscarriages.

"8. Moreover we further agree and covenant that we will have ruling elders and deacons, and when any differences may arise between any members of the church, then they shall be tried and admonished by the pastor, ruling elders and deacons; if either party be dissatisfied with their determination, then there may be an appeal to the church at large; and if either party be dissatisfied with the determination of the church, then there may be an appeal to an ecclesiastical council, according to the custom of Congregationalism.

"Now the God of peace that brought again from the dead our Lord Jesus Christ, that Great Shepherd of the sheep, through the blood of the everlasting covenant, make us perfect in every good work to do his will, working in us that which was well pleasing in his sight, through Jesus Christ, to whom be glory forever and ever. Amen.

Daniel x Page,	mark,

Children whose parents were not church members

were permitted to receive the seal of baptism by the parents owning the following

"Covenant,

"You do now, in the presence of God and his people, own the covenant into which you were entered and given up to God in baptism, and take upon yourself the obligation your baptism laid you under. You do now humbly beg of God remission of all your sins, both actual and original, and with all your heart you desire to accept of Jesus Christ as your only Savior, as he is offered to poor sinners in the Gospel; and you do now solemnly promise, to the best of your power and as God shall enable you, that you will forsake the vanities of the world, and in all respects live as those with the great God and his people; and you do now particularly promise, as God shall enable you, to make it your prayer and endeavor that you may be prepared aright to attend to the ordinances and institutions of Christ, and meet him where his death is showed forth; and you likewise promise to submit yourself to the watch and discipline of the Church of Christ, and strive that your behavior be approved by God and man."

The Confession of Faith adopted was the following:

"1. You believe in one God, in three persons (or characters), Father, Son and Holy Ghost.

"2. You believe the sacred Scriptures are the word of God and a perfect rule of faith and practice.

"3. You believe that man is a fallen creature, and cannot be justified by the deeds of the law.

"4. You believe that Jesus Christ is the Son of God and Savior of men and that God will bestow salvation on all those who will repent and believe in his name, and live according to the precepts of his Gospel.

"5. You believe in a resurrection of the body and a future state of rewards and punishments.

"6. You believe that baptism is an institution of Christ's, and the Lord's supper is a Sacrament by which his church should commemorate his dying love; to which church you believe it your duty to join yourself."

In the same year with the settlement of Mr. Whitney and the organization of the church, repairs were made on the meeting-house. At a meeting of the district a committee was chosen, and it was "voted to leave it to the committee to repair the meeting-house as they shall think proper; that they shall put a new window in the ministerial pew, and that as much light be given to the pulpit as possible." On Oct. 24, 1763, it was "Voted that each seat in the meeting-house shall go out on the Sabbath days according to their dignity." As was the common practice of the time, the meeting-house was used for town and military meetings, as well as public worship.

With the increase of population this house became in a few years too small for their accommodation. A new house was accordingly determined upon, and to encourage the work the pastor gave "£10 lawful money for the carrying on of the meeting-house." Land adjoining the four acres given by the proprietors of Groton for a burying-place and training-field was bought for the purpose. At a district meeting, May 21, 1771, "Voted that the new meeting-house be fifty feet in length, and forty feet in breadth, and that it be raised as soon as June of next year." The house was completed in the autumn of 1773 and was opened for use for the first time on the annual Thanksgiving Day, Nov. 25th. The shingles on the north roof of this house were in service eighty-three years, and when removed showed but little decay. The house was enlarged by adding three porches and a tower in 1804, and a bell was given the town by

Wallis Little, Esq., to be hung in the tower. The same custom was observed in seating the people as in the former house. While the house was building, a gift of an elegant folio Bible (London edition) for the use of the pulpit was made by Madam Hancock, the wife of the first Governor under the State Constitution, John Hancock. This Bible is still in use in the pulpit of the First Parish. A letter of acknowledgment was sent the donor by order of the district. It reads as follows:

"MADAM:—The inhabitants of Shirley, being this day assembled at the public meeting house, take this first opportunity to return their sincere thanks to you for your late generosity in giving them a very handsome folio Bible, to be read in public every Lord's day. They are sensible that the reading of the Scriptures in public is very commendable, and hope it will be really serviceable to them; and at the same time assure you that they have a grateful sense of your generosity and piety in promoting such a laudable practice. They sincerely wish you (may) live and continue to diffuse your kindness to the needy—that you may enjoy happiness here, and in the future world be rewarded to reap the reward of your extensive charity, in the kingdom of heaven.

"JOHN LONGLEY, Dist. Clerk.

"Shirley, December 28, 1772."

An interesting episode in the ministry of Mr. Whitney occurred during the Revolutionary War. The people found great difficulty in paying his salary when due. Mr. Whitney found it equally difficult to provide the necessaries of life with the greatly diminished purchasing power of his salary. This obliged him to ask for a measure of relief, or dismissal. Unwilling to grant him a dismissal, they decided to raise a special appropriation of £133 6s. 4d. But such was the depreciation of paper money that the purchasing power of this was only £86 12s. 4d., an amount entirely inadequate, of which he informed them. A committee was then appointed to consider and adjust the matter. This committee reported June 21, 1779, "That we find Mr. Whitney is desirous of doing no business for his support that in any measure interferes with his ministerial work. This committee are of opinion that his present salary is entirely insufficient for his support; they are therefore of opinion that the district from the 23d day of this instant June, during the present war with Great Britain, pay his salary of £66 13s. 4d. annually, according to the price of Indian corn and Rye, reckoning Indian corn at £0 2s. 8d. per bushel, and Rye £0 4s. per bushel, said salary to rise and fall as the price of said grain rises and falls; also that the price of said grain be estimated by the assessors annually, when the assessment is made for the payment of salary; the salary being paid in the foregoing manner, upon the following conditions, to which Mr. Whitney freely consents, viz: that there be a deduction made by the assessors, during the war, from his salary thus paid, of his full proportion of taxes assessed upon the district according to his estate, real and personal."

This report was unanimously accepted and the thanks of the district voted "to the Rev. Mr. Whitney for his generous and truly patriotic spirit and disposition in being willing to bear his equal propor-

tion of the very extraordinary heavy taxes his people are laboring under at this distressing time."

The singing in public worship was congregational, the senior deacon reading the psalm or hymn a line at a time, and the congregation following. In 1786 it was decided to give this part of the service to the charge of a select choir, and the back seats in the front gallery were appropriated to their use. This caused trouble and it was brought before the town at a regular meeting by an article in the warrant, "To see if the town will vote the two hind seats in the front gallery, to be fitted for the use of the singers, instead of the two hind seats on the lower floor." A committee was chosen to confer with the singers and arrange the matter. They reported "April y^e 13, 1786," "that having held a conference with them, we have agreed that the two hind seats in the front gallery be made into a proper pew, with a table suitable for them, or convenient for books, and that they take the said pew for their seats so long as they serve in singing."

A committee was appointed April 24, 1787, to purchase a bass-viol, "for the use of the meeting-house," and "a chest was made—at the expense of the pastor—for the safe-keeping of the viol when not in use." This instrument was in use till 1842, and forty years of this time was played by the same person—David Livermore.

Mr. Whitney continued in active service for somewhat more than forty years, when he was stricken with paralysis. Incapacitated for the performance of his public duties, he generously offered to relinquish one-half of his salary to aid toward the settlement of a colleague. In a letter to the town dated Nov. 12, 1812, he says: "Considering my age and infirmities, I sincerely wish to have you settle another minister in this town as soon as you can. And I now renew the offer that I made by your committee last year, that if the town will settle another minister with me that is not yet fifty years old, and one whom the neighboring churches shall approve, I will from the day of his ordination, relinquish one-half of my salary forever thereafter. I would further observe, such is my solicitude for the welfare and order of the town, that I should willingly relinquish the whole salary if they would settle another regular minister,—if I could do it and do justice to myself, my family and my creditors. Wishing you divine direction, I subscribe myself your affectionate pastor,

PHINEAS WHITNEY."

By the terms of his settlement he could claim his full salary during his life.

The settlement of a colleague was not effected till the autumn of 1815, when Mr. Samuel H. Tolman, of Winchendon, accepted the invitation of the town and of the church, and was ordained to the office Oct. 25th. He discharged its duties till Feb. 17, 1819, when at his request, on account of growing dissensions, a council was called and he was dismissed. The death of Mr. Whitney occurred Dec. 17th, of the same year.

His first wife, to whom he was married April 28, 1762,—the month in which he accepted the invitation of the town to become its minister,—was Miss Miriam Willard, of Harvard, who, when a young girl, was taken from her home by the Indians. "She lived with a married sister, Mrs. James Johnson, at Charlestown, No. 4, when the Indians made a raid upon that town and carried her, with the Johnson family, Mr. and Mrs. Johnson and three children, the eldest of whom was but six years old, with two of their neighbors, to Canada. Forced to journey through a pathless wilderness, she was required to lie upon the ground at night, with an Indian upon either side of her, with cords passed over her body and under theirs so that the least stir on her part would arouse them. They were sold by the Indians to the French at Montreal. Miss Willard was soon redeemed, but remained two years in the family of the Lieut.-Governor, where she was treated with uniform kindness, and supported herself with her needle till the release of her sister and children, when they sailed for England and from thence to New York, and then returned to her former home. She died in 1769 at the age of twenty-nine years. With the death of Mr. Whitney the administration of ecclesiastical affairs by the town ceased, and their conduct passed into the hands of religious societies, entirely separate from civil authority and maintained by voluntary individual support, in accordance with what is now the universal practice throughout the country.

The Shaker Community or Society of United Brethren.—The ecclesiastical unity of the town was first broken in 1781, when a community of Shakers was started. This community began with two families, Elijah and Ivory Wild, who were brothers and farmers, living in the southern part of the town. They were joined by two other families in the immediate neighborhood, but within the town of Lancaster. Mother Ann Lee, the founder and spiritual head of this religious order in this country, was at that time temporarily residing and holding meetings in the adjoining town of Harvard, where a society of Shakers had been formed. She visited and conducted the Shaker worship in the homes of the Wilds. Meetings for worship were held frequently, and were an object of great interest to all the country round. Mr. Chandler, in his "History of Shirley," to which we are largely indebted, tells us that "on one occasion two women walked from Mason—twenty miles—on a rainy Sunday, and were even obliged to stop and wring the water from their stockings while on the road; then proceeded forward unharmed by the elements, being protected by their faith." The movements and exercises of their worship were so strange and accompanied by so much that was exciting as well as novel, that public attention was soon called to the matter.

At a town-meeting held September 12, 1782, it was "Voted, that the town disapprove of the conduct of

that people called Shaking Quakers, and of their meeting in this town. Then, voted to choose a committee of five to wait on and consult said people at Elijah Wild's, and discourse with them respecting their conduct. Then voted to leave the matter discretionary with the committee, and that they make a report to the town at the next town-meeting in said town." No record of any report from this committee appears, and it is probable that none was made. At the present time the "labor," as it is termed in the Shaker worship, which consists of marches and dances, is attended by much less of the violent and nervous agitation and excitement than formerly, and is, therefore, more graceful and pleasant to witness, as well as to those engaged in it. The society received many additions and became in time quite large and prosperous, numbering at one time about one hundred. It was divided into three families, the North, the South and Church family, the South family being located just over the Shirley line, and within the town of Lancaster. Its real estate embraces about twenty-five hundred acres, much of which is valuable woodland. It has a large amount under cultivation and devoted to various crops. The raising of garden seeds for the general market has, in past years, been a large and valuable industry, but is at present continued only to the extent of what is needed for home use. A large orchard, well cared for and in fine condition, yields a good variety of fruit, sometimes amounting to a thousand barrels for the season. In recent years the society has declined in membership, having at the present time only one-third as many as when in its most prosperous condition. Its buildings are plain, substantial structures, some of them of brick, commodious and well arranged for their several uses, and for health, convenience and economy in management. Although the attempt to bring its first members under the censure of the town failed, that did not entirely end the hostility that existed towards them. On Sunday evening, June 1, 1783, Ann Lee had come over from Harvard with her elders, James Whittaker and William Lee, to hold a religious meeting at the house of Elijah Wild. Enemies from Harvard followed them, and a mob supposed to number nearly a hundred men gathered and surrounded the house. Wild says, in his narrative of the affair: "The malicious crew came to my house on Sabbath evening, about eight o'clock, and surrounded the house. Some of the leaders of the mob were, or had been, captains in the militia, and still bore that title. They were followed by a large number of men, for the evident purpose of abusing Mother and the elders." Fearing violence, and knowing that the object of the assault was Mother Ann, and that she would suffer at their hands if they should gain an entrance, she was concealed in a small dark closet and the door hidden from view, by "placing before it a high chest of drawers." All means of communicating their perilous position and seeking help was cut off, as no one was permitted to

pass out. But finally a woman who lived in the neighborhood, and had left a nursing infant at home, was given the privilege of going to her home. She immediately took measures to get information to the authorities of the town. Meanwhile the mob continued noisy and threatening through the night, crying out, "That woman or your house shall come to the ground." Late in the morning the dilatory police came and ordered them to disperse. Liberty was given them to enter the house, and at the request of Mother Ann and the elders food was put upon the table and the leaders sat down and ate. Food was passed also to those in the door-yard. They promised the elders if they would return with them to Harvard no injury should be done to them. The elders consented, though with little confidence in their promises. Nor hardly had they arrived in Harvard when they violated their word. They dragged them aside to a convenient place and then proceeded with their assault upon them. They first took James Whittaker and tied him to the limb of a tree, and then "scourged him with a whip till the skin was almost flayed from his back." Next they took Lee and were about to proceed in the same manner with him, but refusing to be tied, "he knelt down and told them to lay on their stripes, which he would receive as a good soldier of the Cross." At that moment a sister, breaking in among them, threw herself between the uplifted lash and the elder, that she might receive the blow, rather than it should fall upon him. Striking her on the temple, it opened a serious wound, from which the blood flowed freely. Alarmed, they released the elders, and hastened from the scene of their desperate work. Elder Whittaker's back was found to be "beaten black and blue from his shoulders to his waistbands, and in many places bruised to a jelly, as though he had been beaten with a club. 'I have been abused,' he said, 'but not for any wrong I have done them; it is for your sakes. I feel nothing against them for what they have done to me, for they were ignorant and knew not what they did, nor what manner of spirit they were of.' Mother and the elders, with all the brethren and sisters, kneeled down and prayed to God to forgive their blood-thirsty persecutors. Elder James cried heartily and said, 'Father, forgive them, for they know not what they do.' " The house in which Ann Lee and her elders were holding their meeting, and which the mob surrounded and attacked, is still standing and in good condition, and is an object of interest to visitors. Persons have sometimes become members of the society and donned the garb and habit of the Shaker, who after a time, from one cause or another, have found the mode of life uncongenial to them, and left the community. Children who have been taken and brought up in the families, have often, on reaching the age in which they could choose for themselves, declined to remain, preferring the broader life of the world. Clandestine and run-away matches have sometimes occurred. Sometimes

the seceders have become enemies. An instance of this kind occurred in which the enmity turned into an offensive attack upon the community and destruction of its property. This was on the night of March 3, 1802. A number of those who had been of the Shaker faith and contributed to the building of the meeting-house, but had withdrawn from the community, laid claim to the house on this ground, and sought to enforce their claim by taking possession. Supplying themselves with a quantity of liquor, in which they freely indulged, and provisions, they entered the building on the night mentioned and held possession four days, barring the doors and shutting out entrance from others. The rooms and furniture were much mutilated and damaged. On the fifth day the officers succeeded in forcing an entrance through a window in the upper or attic part and arresting the parties. They were taken before the justice and bound over for trial to the Criminal Court at Concord. But through some failure of duty on the part of the county attorney, as was generally supposed, or other mismanagement of the case, the grand jury did not find a bill against them and they were acquitted.

This appears to have been the last assault or offense of a serious nature made upon the community. From the first they have been a peaceable, industrious and self-respecting people, and they have the confidence and the respect of their neighbors and fellow-citizens. To the stranger they are always kind and hospitable. They are strict in the rules and regulations which they impose upon themselves and pleasant and orderly in all their affairs. The following "Rules for Visitors" are in keeping with their orderly ways and kind spirit :

"*First.* We wish it to be understood that we do not keep a public house, and wish to have our rules attended to as any would the rules of their own private dwelling. *Second.* Those who call to see their friends and relatives are to visit them at the office, and not to go elsewhere except by permission of those in care at the office. *Third.* Those who live near, and can call at their own convenience, are not expected to stay more than a few hours, but such as live at a great distance, or cannot come often, and have near relatives here, can stay from one to four days, according to circumstances. This we consider a sufficient time as a general rule. *Fourth.* All visitors are requested to arise and take breakfast at half-past six in summer and half-past seven in winter. *Fifth.* At table we wish all to be as free as at home, but we dislike the wasteful habit of leaving food on the plate. No vice with us is less ridiculous for being in fashion. *Sixth.* Married persons tarrying with us over night are respectfully notified that each sex occupy separate sleeping apartments while they remain. This rule will not be departed from under any circumstances. *Seventh.* Strangers calling for meals or lodging are expected to pay if accommodated."

Worship.—As the mode of worship is peculiar to the Shakers and widely different from others, the following concerning it may be of interest. Their meeting-house or place of assembling is a large open room or hall, furnished with movable seats. "The sexes enter by different doors, and arrange themselves in lines—the elders being in front—where they listen to a short opening address by one of their elders, after which they unite in a dance, regular, solemn and uniformly in time with the harmony of some

half-dozen selected singers. After this they fall into files of two abreast and march, keeping step with the music of some selected hymn, which is sung with much fervency and spirit. They then bring up their benches and seat themselves, while one of their number interests them with a religious exhortation. This concluded, they rise and close their service with a song of praise. Everything is performed with decorum and solemnity. All classes, from the gray-haired of fourscore down to the child of five years, seem attentive and interested, whether they march or dance or sing or exhort. They uniformly wave their hands in concert with their music, and listen with marked attention to the words of their spiritual leaders."

Order and neatness pervade every department. The government is religious in character, the ministers, of whom there is usually one of each sex, being the chief officers, and under them the elders and trustees, the elders having in charge the spiritual affairs of the society and the trustees the temporal. The offices of elder and trustee in the Shirley Society are held by John Whitely, who is very devoted and faithful to its interests. He is also trustee of the Harvard Society and minister of the district.

Universalist Society.—The first meeting for the organization of the Universalist Society was held at the house of Joseph Edgarton, Sept. 21, 1812. A committee consisting of Merrick Rice, John Edgarton and Lemuel Willard was chosen to prepare a constitution. This committee reported at an adjourned meeting, the constitution was adopted and officers chosen. The names of John Edgarton, Joseph Edgarton, John Davis, Samuel Hazen, Merrick Rice, Lemuel Willard, Elnathan Polly, William McIntosh, and Thomas Ritter and many others are prominent in the early records. Among its members were families from Harvard, Lancaster and Lunenburg that were regular attendants upon its worship. When, some years after, societies were established in their own towns, they connected themselves with those societies. For some time previous to the organization there had been occasional preaching in the town by ministers of this denomination, the first of whom was Rev. Isaiah Parker, a convert from the Baptist faith, and physician as well as minister. After him were Revs. Joshua Flagg and Jacob Wood. The first house of worship was built in 1816, and dedicated Jan. 9, 1817.

It was a plain building covered with a hip roof, and had but one door of entrance. This opened into a narrow porch, and thence into the church. It was furnished with high box pews, and a gallery for the singers along the west wall that was entered by stairs within the audience-room. Rev. Jacob Wood was installed pastor in 1818. He remained five years and then an interim of six years followed, in which the pulpit was supplied by transient preachers. In 1829 Rev. Russell Streeter removed from Watertown and became the resident pastor, continuing his ministry till 1834,

when he removed to Woodstock, Vt. The following year the pulpit was supplied by Rev. Stillman Barden. In 1836 Rev. Lucius R. Paige, who was then settled in Hardwick, supplied a part of the time. Mr. Paige in later years was the author of "Paige's Commentaries" and other important works. In 1837 and 1838 Rev. Rufus Pope was the preacher, but resided in Sterling, where he preached a part of the time. He was succeeded by Rev. John Pierce, whose pastorate continued till April 1840, when failing health obliged him to retire. Then Rev. Walter Harriman, pastor of the church in Harvard, was engaged, preaching one-half the time. This arrangement continued till 1845. Mr. Harriman was afterwards widely known in public and political life, serving in the army during the Civil War, commissioned as colonel of a regiment from his native State, New Hampshire, and promoted to the office of general. For several terms after the war he was Governor of New Hampshire.

During 1845 and 1846 the church was remodeled at an expense of \$2168. A hall was finished in the upper part and devoted to the use of the "Fredonia Lodge" of Odd Fellows. In April, 1846, Rev. Josiah Coolidge became the pastor, and performed the duties of the office two years. An interim of one year now occurred in which the pulpit was supplied by neighboring ministers. Rev. Benton Smith was then invited, and began his pastorate in April, 1849. During Mr. Smith's pastorate, on March 19, 1850, a bell was placed upon the church, the first church-bell in the village. He discharged the duties of the office five years, and was succeeded by Rev. Orren Perkins, who remained but one year. Rev. E. W. Coffin was the next pastor, beginning his work in May, 1855, and closing it March 8, 1857. The 7th of the following June, Rev. George F. Jenks entered upon his duties as pastor and remained three years and nine months. The next pastor was Rev. Cyrus B. Lombard, his pastorate beginning March 10, 1861, and covering a period of five years. After an interim of a few months with a transient supply of the pulpit, Rev. Ezekiel Fitzgerald was engaged, but remained less than a year and a half. From the close of Mr. Fitzgerald's labors to the last Sunday in October, 1869, preaching was continued regularly, but no pastor was settled. At that date the last service was held in the old church. It was sold to Mr. Norman C. Munson, who removed and fitted it for a public hall. It is the present Village Hall, and is finely adapted for all social and public uses. The building of the new church was immediately begun, and was completed, and the service of dedication held November 23, 1870. It is a fine structure of the early English Gothic style of architecture, with open-timbered roof and ceiling, painted and frescoed in rich and subdued colors. The entire expense of the church was \$25,000. It is furnished with a fine organ which cost \$2200. Towards this large expense, Mr. N. C. Munson, a

member of the society and a leading spirit in the work, was a large and generous contributor. Immediately on the completion of the church, Rev. H. A. Philbrook was called to the pastorate, in which he continued two years. The next few years the pulpit was supplied by transient preachers, and during a part of 1875 services were suspended altogether, on account of the general depression in business. In May, 1876, Rev. J. W. Keyes was called to the pastorate and served the society three years. Then followed another interim of a little more than one and a half years filled by the transient supply, and in December, 1880, the settlement of Rev. James Vincent as pastor. In June, 1884, he accepted an invitation from the church in Calais, Maine, and was succeeded by Rev. William Gaskin, who entered upon his work in August. His term of service was a little less than two years. In January, 1887, Rev. James Rawlins was settled and remained one year. In April, 1888, Rev. Joseph Crehore accepted the invitation of the society and entered upon his work in May. During the pastorate of Rev. John Pierce, in April, 1839, a Sunday-school was organized, with Miss Sarah C. Edgerton in charge and Miss Susan McIntosh as assistant. Miss Edgerton was well and favorably known as a writer and a poet of fine promise, and associate editor of the *Ladies' Repository*, a monthly magazine published in Boston. Jerome Gardner was chosen superintendent of the school in 1845 and held the office, with the exception of one year, till his death in November, 1889, a period of forty-three years. He was clerk of the society thirty-eight years. A church organization was formed in 1820, but for many years subsequently was dormant; it was reorganized in 1846. Its present membership is forty-two. The parish and Sunday-school library numbers nearly one thousand volumes. A bequest of \$1000 to the society was made by the will of Sylvanus Holden, who died March 17, 1882. Jerome Gardner included in a will drawn March 24, 1885, a gift to the society of the income of twenty-five shares of Lancaster Bank Stock. The subsequent ruin of the bank, by the fraudulent dealings of its president, swept away this gift. In his last sickness Mr. Gardner sought to replace this in part by a codicil in which he gave to the society ten shares of the Fitchburg Railroad stock, but there being some legal inadequacy in the witnessing of the codicil, it was disallowed by the Judge of Probate.

First Congregational Society.—In March, 1822, a little more than three years after the death of Rev. Mr. Whitney, the pastor of the First, or Town Parish and Church, a meeting was called and held for the purpose of organizing the parish as an independent society, disconnected from the municipal or town oversight and charge. This organization was effected under the name of the First Congregational Society. For the twelve years following its organization it had no stated ministry, and there was preaching but a portion of the time. But its annual meetings for the

choice of officers and the transaction of business were regularly held. In June, 1834, Rev. Seth Chandler, of Oxford, preached two Sundays. Receiving an invitation to settle with the society, he accepted it and entered at once upon his duties. The ministry of Mr. Chandler continued till June, 1879—forty-five years; though from that date till his death, in October, 1889, he performed more or less of pastoral duty, and occasionally preached. Thus from the date of the first organization as a town parish in 1762 to 1879, one hundred and seventeen years, there were but two pastorates, and one brief colleague pastorate of three years. There was an interim of nearly fifteen years between the death of Mr. Whitney and the settlement of Mr. Chandler, but the united ministries of the two covered a period of one hundred and one years. Until the present century the heating of churches was hardly known in any part of New England. Congregations endured the cold and the long sermons with equal fortitude. The winter following the settlement of Mr. Chandler an innovation was made upon this custom. Two large stoves were put into the church. It was the first provision made in town for warming the house of worship. The next year, 1835, a new bell was placed in the church tower.

The old bell, a gift to the town in 1808, by Wallis Little, had been cracked for several years and rendered useless. The new bell was a gift from Leonard M. Parker and Thomas Whitney, and their intention was communicated in the following letter, which was read at the town-meeting.

"As a token of respect for our native town, and a sincere regard for its character and the well-being of its inhabitants, we, the undersigned, propose to present to the town a bell. It is our wish and intention that the same should be kept on the meeting-house of the First Parish; that it should be used for all the necessary and proper purposes of the town; that the religious societies should also have the privilege of its use; and unless the town shall provide for the ringing of the same, at the usual time and in the usual manner, for the religious services in the forenoon and afternoon of the Sabbath day, the First Parish may have the privilege of causing it to be so rung for such services. And in case the First Parish shall fail to cause it to be so rung on the Sabbath, any other parish then having regular services, and not being supplied with a bell may have the same privilege. Should the proposal be acceptable to the town, it would be agreeable to us that the selectmen, or a committee, should be authorized to confer with us as to the size of the bell, and to take other proper measures in regard to the subject. We have the honor to subscribe ourselves your respectful fellow-citizens.

Shirley, May 27, 1855."

"LEONARD M. PARKER,

"THOMAS WHITNEY.

Previous to the engagement of Mr. Chandler a Sunday-school was organized by the devoted women of the parish, also "a charitable society." This society has purchased books for the library, to the amount of nearly one thousand volumes; furnished the Sunday-school room and the church, contributed to the incidental expenses, clothed and otherwise aided indigent children, and accumulated a fund of about \$1500, the income of which is used for contingent expenses.

In March, 1839, a movement was started for remodeling the church. Committees were chosen, contracts for the work made, and the work begun in July. The

expense of the alterations and furnishings was \$2307.61. It was completed, and the house reopened for public worship on the 27th of October. An effort was made at the time this work was undertaken to have the meeting-house removed a few rods east from where it was then located, but the majority of the society did not favor it. This effort was renewed in 1851, and the following action taken at a town-meeting held July 14th:

"Voted that the Town give their consent that the First Parish may remove their meeting-house to and upon the ground called the 'training field,' the same to be carried and placed so far east that the west end of the meeting-house shall be on a line with the east side of the town-house and the south side of said meeting-house to be as near the present traveled road as conveniently may be. The said parish to have the right, if need be, to rebuild upon the same ground. And this consent is hereby given on the following conditions, to wit: 1. That the owner of the land adjoining the northerly and easterly lines of said 'training field' give his consent thereto in writing, under seal and acknowledgment. 2. That the said parish shall agree to lay open all their grounds, where the meeting-house now stands, and around the same as a public common; and so to continue unencumbered, so long as the said meeting-house, or any new one which may be built in place of the present, shall remain upon the said 'training field.' And for the security of both of the said parties, this further condition or stipulation is also made—that either party, for good cause, shall have the right to cause the said meeting-house, or any one built in its place, to be removed to the spot where it now stands, or to such other near thereto, as the parish may fix upon. The sufficiency of the cause and the terms of removal to be mutually agreed upon by the said parties; and in case they cannot agree the same shall be submitted to the judgment of three disinterested and judicious men to be mutually agreed on, whose decision shall be final, both in regard to the sufficiency of the cause and the terms of removal. And the agreement of the said parish to the foregoing conditions and stipulations, at a meeting duly called for the purpose, is hereby required;—a copy whereof, duly certified by the clerk of said parish, shall be filed with the town clerk before the removal of said meeting-house."

These conditions were accepted by the parish, and the meeting-house was removed the following year. The original windows, as built with the house in 1773, were retained through all the changes till 1857, when Mr. John K. Going, a member of the parish, generously assumed the expense and care of the entire reglazing. The third and last considerable alteration and improvement of the church was made in 1867. At the annual parish meeting, Henry B. Going proposed important changes, and generously offered to have them made at his own expense, "provided his proposal should be agreeable to members of the parish." Mrs. Harriet B. Going, his mother, was associated with him in carrying forward this work, as appears from the record of the parish meeting held after it was completed. The record is as follows:

"Whereas during the past year our old church edifice has been materially altered, repaired and improved, chiefly at the expense and by the liberality of Mrs. Harriet B. Going and her son, Henry B. Going,—therefore, we, the members of the First Parish in Shirley, desirous of expressing our appreciation of their generosity, do hereby tender to Mrs. Going and her son our sincere thanks, with the hope that their lives may be long spared for usefulness and enjoyment. And should it be their pleasure to again reside in town, and weekly meet with us around the same old altar where they were wont to come in early life, we assure them they will receive a cordial welcome."

Bequests.—The society has received several bequests which are matters of interest. The first was from Thomas Whitney, son of the first minister of

the parish, and a devoted member through his life, bearing always a leading and active part in its affairs, as also in the affairs of the town. He died January 14, 1844, and in a codicil to his will gave to the parish as follows: "I give and bequeath unto the First Parish, in said town of Shirley, of which I have been a member from my youth, the sum of five hundred dollars; and it is my intention that the same shall be safely and permanently invested, on interest, and the income thereon be annually appropriated toward the payment of the salary of a good and faithful Unitarian minister of the gospel in said parish. And it is my earnest wish and hope that the parish may, at all times, be supplied with the services of such a minister; and, in making the bequest, I take satisfaction in the indulgence of a hope that it may have a lasting influence in securing to the parish an object so essential to the happiness and well-being of society. And I indulge the further hope that the sum hereby bequeathed may lay the foundation of a fund which, at no distant period, by the munificence of others, will become of such magnitude that the income thereof will annually pay the salary of a minister, in said parish, of the character and denomination above mentioned. And it is my further will and intention, that in case the said parish shall fail during the period of twenty years after my decease, and for the space of six months in succession, to be supplied with a minister of the character and denomination aforementioned, who shall be regularly settled as their pastor, or be engaged by the year, then the said sum of five hundred dollars, bequeathed as aforesaid, shall revert and descend to my heirs-at-law.

"And I further give and bequeath to the said parish the sum of twenty dollars, annually, for the term of five years after my decease, to be appropriated toward the payment of the salary of a minister in said parish, of the character and denomination aforementioned; but one-half of said annual sum, may be applied to the support of the singing in said parish, if the parish shall so decide. But if the parish shall fail, during the said term of five years, to be regularly with a minister of the character and denomination aforesaid, then the said annual bequest of twenty dollars shall cease."

Three years after the death of Thomas Whitney occurred the death of his son, James P. Whitney. In his will he bequeathed to the parish fund, upon the same terms and conditions specified by his father, two hundred and fifty dollars.

In 1864 an additional bequest came to the parish, on the death of Mrs. Henrietta Whitney, widow of Thomas Whitney. The will giving the same reads as follows: "I give and bequeath to the First Parish in Shirley the sum of five hundred dollars, which is to be appropriated in the same manner and held on the same terms and conditions as are specified by my late husband, Thomas Whitney, Esq., in bequeathing a like sum to said parish, all of which will fully ap-

pear by the codicil of his last will and testament; and it is my intention that the period of twenty years, mentioned in said codicil, during which a forfeiture may be incurred by said parish, shall terminate at the same time in reference to my bequest that it will in reference to the bequest of my late husband."

Five years later, in 1869, Mrs. Clarissa Isaacs, a sister of Thomas Whitney, and daughter of Rev. Phineas Whitney, the first minister, died. Her last will and testament contained the following: "I give to the First Parish in Shirley, over which my respected father was settled for a series of years, the sum of two hundred dollars, for the same purpose, and on the same terms and conditions as specified in the will of my late brother, Thomas Whitney, respecting a similar bequest made by him."

In addition to these several bequests, amounting to fourteen hundred and fifty dollars, from the immediate family of the first minister, Rev. Phineas Whitney, the parish received still another generous expression of the family interest in its affairs in the gift of an organ of "rare excellence" from Mrs. Henrietta Whitney, which she had built expressly for it by Mr. George Stevens, of East Cambridge, but a short time before her decease, at a cost of thirteen hundred dollars.

Other bequests to the parish fund were: five hundred dollars from John K. Going, in 1864; three hundred dollars from Miss Rebecca Day, in 1869; fifty dollars from Martin Turner, in 1869. This fund, amounting to twenty-three hundred dollars, was intrusted with the treasurer of the parish, Thomas E. Whitney, without special security. By some incompetency of management it was wasted, and would have been wholly lost to the parish but for the generosity of Mrs. Mary D. Whitney, of Boston, an aunt of the treasurer, then deceased. She was a heavy loser by his failure, yet she generously made over to the parish an amount of real estate of equal value to the sum owed by him, thereby restoring the fund. Mrs. Whitney, whose death occurred January 26, 1886, also made an additional gift by her will, of which this parish was evidently intended to be the final recipient or beneficiary, but the singular wording of the article of the will imposed a difficulty upon the executors in determining the party legally entitled to receive it. Hence it was taken to the Court for decision, where it still awaits the final verdict. As a matter of historic interest in which there was the evident intent to be so exact and strict in terms that the gift could not be diverted, or fail to be applied to the purpose of the giver, we here append a copy of the article: "Secondly, I give and bequeath to my friend, Rev'd Seth Chandler, of Shirley, the sum of Five thousand dollars, which, after his death, shall revert to the town afore-named, strictly on this condition, namely, that said town shall support fairly and permanently a Unitarian clergyman, in which case all interest accruing on the above sum shall be

used to aid in the payment of his salary, failing of which it shall revert to my heirs-at-law."

Following the attestations of the witnesses is this added clause:

"In regard to article second, I would add, that in case Rev'd Seth Chandler should not outlive me, I wish the sum therein named to go direct to the town of Shirley for the purpose and on the conditions therein stated.

MARY D. WHITNEY."

Since the termination of Mr. Chandler's active service as pastor, in June, 1879, the society has had a resident pastor but one and half years, from April, 1886, to October, 1887, when Rev. L. B. Macdonald was with it in that capacity. The remainder of the time when services have been held, clergymen from out-of-town have supplied the pulpit.

Orthodox Society.—On February 3, 1828, a meeting in the interests of Trinitarian Congregationalism was held at the house of Miss Jennie Little. When the First Congregational Parish was organized, as the successor of the town parish in 1822, a minority did not fully sympathize with the doctrinal opinions of the majority, yet for six years they continued to worship together. But the agitation of these doctrinal differences, which was then widely prevailing throughout New England, had its effect here as elsewhere, and led to the feeling that they could not conscientiously continue together, but must have a separate organization and worship. At the meeting called to consider this matter, Rev. J. Todd, pastor of "Union Church of Christ," in Groton, was present to assist and advise. At this meeting it was voted "That it be expedient to form a church in this place, of evangelical principles." Also "that a committee of three be appointed to make the necessary arrangements."

Samuel S. Walker, Imlay Wright and Deacon Joseph Brown were constituted this committee, and Thursday, February 14th, was appointed to be observed as a day of fasting and prayer. An ecclesiastical council composed of pastors and lay delegates from churches in the vicinity was invited and held at the house of Samuel S. Walker, March 12th, in the forenoon. Articles of faith and form of covenant were considered and adopted, and sixteen candidates presented themselves for examination. These candidates were Joseph Brown, Esther Brown, Rhoda Brown, Harriet Walker, Samuel S. Walker, Esther R. Jefts, Jenny Little, Nancy Holden, Imlay Wright, Sarah Meriam, Amelia Shipley, Lucy Porter, Jacob Harrington, Sarah B. Harrington, Elizabeth Harlow, A. Livermore. The candidates were examined and accepted, and it was "voted to proceed to organize said persons into a church of Christ, to be denominated

The Orthodox Congregational Church in Shirley."—The public services of the occasion were held in the afternoon, in the Universalist meeting-house, at the South Village. There was no society organized as a legal body until 1846, when it was incorporated under the name of the "Orthodox Congregational Society in Shirley." The summer following the organization

of the church, land was given by Miss Jenny Little for the building of a church edifice. This was built during the next year, 1829, and dedicated in December. It was constructed of brick, was of humble pretensions and pleasantly located. It served its purpose as a house of worship for about twenty years, when the matter of removal to the South Village began to be agitated. It was thought by those who favored this change of location, it would be placing it in a flourishing village, where the manufacturing interest was increasing, and all the conditions were such as to insure greater prosperity and growth, while very few accessions to the church could be expected if it remained where it was, and its support would become a matter of great difficulty. The movement was finally carried, though not without earnest and vigorous protest from those who lived in the northerly section of the town, and a serious defection and division. Services were held in a school-house until the new church edifice was built. This was completed and dedicated in the spring of 1851. It was located on the tableland north of the Catacunemaug Valley, and was a plain, neat structure, surmounted by a tower and supplied with a bell. Its cost was \$8300.

After twenty years of use, repairs were needed, and in 1872 a thorough renovation of the interior was made at an expense of \$2500.

The first pastor was Rev. Hope Brown, who was ordained to the office June 22, 1830. He continued with the church nearly fourteen years, devoting himself to its interests with great fidelity. After the retirement of Mr. Brown, Mr. John P. Humphrey, a licentiate from Andover, was the pulpit supply till July, 1847, when Mr. Joseph M. R. Eaton, having accepted an invitation to settle with the church, was ordained to the pastorate. His term of service was a little less than three years. He was followed by Rev. G. W. Adams, who supplied the pulpit between two and three years, but did not settle. In May, 1853, Rev. B. B. Beardsley became the pastor and performed the duties of the office until 1858. A period of transient supply then followed till April, 1860. Rev. Daniel H. Babcock was then engaged to supply for an indefinite period, and continued for nearly three years. An invitation was given to Mr. A. J. Dutton, November 1, 1863, by the society, and endorsed by the church on the 9th, and on the 10th he was ordained and installed. His ministry continued six years. He was succeeded by Rev. A. H. Lounsbury, who was installed April 29, 1870, and was with the society five years. Rev. Mr. Shurtled' was next engaged, and began his labors the 1st of July, 1875, but early in the second year of his work a growing disaffection induced him to withdraw. Rev. E. J. Moore then came, but remained only a few months over one year. In June, 1881, Mr. Albert F. Norcross, a graduate of Andover, was given an invitation, and accepting it, was ordained August 31st. His pastorate closed December 29, 1884. From this date to January, 1890, there was no settled pas-

C. A. Edgerton

tor, and the pulpit was supplied by transient preachers. In January of this year Rev. Albert G. Todd accepted the invitation of the society, and entered upon the duties of pastor.

By the will of Mrs. Sarah P. Longley, who died September 8, 1889, the society received a bequest of \$2000, the income of which is to be appropriated to the salary of the pastor.

Baptist Church.—The movement for a Baptist organization and worship began in April, 1852, and a sermon was preached by Rev. Mr. Seaver, of Salem. Services were held occasionally during the year, and in February, 1853, a church was formed, and publicly recognized the 6th of the following April. Its chapel was built the same year and dedicated the last day of the year. Rev. G. W. Butler served as pastor one year. After him, Rev. Ezekiel Robbins, a resident of the town, was the preacher for a few months. Then Rev. George Carlton preached two years, but did not reside in town. In 1859 a call was extended to John Randolph, a young licentiate from the State of Illinois. He was ordained March 24th, but remained only one year. Public services were then suspended for several years and the chapel given to various secular uses, the income from which was appropriated to the removal of the church debt. In 1866, through the efforts of Rev. Mr. Skinner, then temporarily supplying the Baptist pulpit at South Groton, means were procured for extinguishing the debt and repairing the chapel, and it was reopened for public worship.

Rev. Sumner Latham became the pastor at this time, and remained not quite two years. A period of transient supply now followed until November, 1870, when Rev. Thomas Atwood was engaged, and was pastor fourteen months. From October, 1872, till March, 1874, Rev. E. H. Watrous performed the duties of the office. From this date to the present, May, 1890, it was without a pastor, but has continued its services, its pulpit being supplied chiefly by undergraduates from the Newton Theological Seminary. At this date Mr. Walter V. Gray entered upon the duties of the office. A renovation and renewal of the interior of the chapel was made in 1873, at a cost of \$800, of which \$500 was contributed by Mrs. Munson, mother of the late N. C. Munson, and a new organ, supplied mainly at the expense of Mr. Munson. About \$400 was expended in a similar work in the autumn of 1889. A bequest of real estate valued at \$1000 was made to the church by the will of Miss Maria Hartwell, who died Dec. 9, 1876.

BIOGRAPHICAL.

CHARLES AUSTIN EDGARTON

The Edgarton family has, for many years, filled an important place in the history of Shirley. The first of the name appearing on the records of the town

was John Edgarton, who came from East Bridgewater about 1771. He was a prosperous farmer, proprietor of the farm now owned by William P. Wilbur, and erected the house now the residence of Mr. Wilbur—a large, brick dwelling, “the first building of brick set up within the limits of the town.” He entered actively into public affairs, was one of the “minutemen” at the breaking out of the Revolutionary War, and a volunteer to Cambridge on the 19th of April, 1775. For twenty-one years he was one of the selectmen of the town, served as justice of the peace several years, represented the town two terms in the State Legislature, and was often sought for duty on committees and in other places of trust. His second son, John, Jr., in company with Jonas and Thomas Parker, built and operated the first paper-mill in town, near the close of the last century, and, in company with Benjamin Edgarton, built and carried on a forge for the manufacture of scythes. The name of Joseph Edgarton comes next into prominence. He was the third son of John, and inherited the energy, enterprise and public spirit of his father, but without the taste or inclination for office, except in military affairs, in which he took a great interest, being familiarly known as Major Edgarton. He engaged largely in manufacturing industries, and was a leading proprietor in the first and second cotton factories, in two of the paper-mills, and the batting-mill, and in an extensive trade in general merchandise. Chandler, in his history, styles him “the veteran manufacturer of Shirley, whose name is more largely connected than any other with the manufacturing enterprise of the town.” Among these varied industries and activities his sons received that early training which gave them a practical knowledge of machinery and developed more or less of mechanical ability. William W. succeeded his father in the manufacture of paper, and afterwards engaged in the manufacture of nails. Charles Austin, whose portrait accompanies this sketch, had his first experience as a workman in the paper-mill of his father. He had charge of a machine at the age of sixteen. On leaving the paper-mill, he, in connection with his brothers William and Henry, ran a saw and planing-mill, turning out a large amount of lumber annually. He was then, for a few years, with his brother William in the nail factory. From 1865 to 1873 he was, in company with N. C. Munson, in the Munson Cotton-Mill. At the latter date he entered upon the manufacture of tape; adding to this, in time, the manufacture of suspender webbing and elastic goods. From this he passed to the manufacture of suspenders exclusively, in which business, in connection with his son Charles Frederick, whom he associated with him in 1881, he has built up a large and growing trade. Always giving close attention to his business, of good judgment and large, practical experience, he ranks well among the business men of the day. He will be sixty-four years of age October 13, 1890. He

was married, June 17, 1852, to Miss Jane A. Longley. A son and two daughters—Charles Frederick, Hattie Whitecomb and Sarah Miranda—complete the family, whose home life is one of rare parental and filial devotion.

Mrs. Sarah C. Edgerton Mayo, of whom mention is made in this history, a gifted poet and literary writer, widely and favorably known, was an older sister.

CHAPTER XXXIII.

WESTON.

BY COL. D. S. LAMSON.

AT the second Court of Assistants held at Charlestown, September 7, 1630, it was ordered "That Tremont be called Boston, Matapan should be called Dorchester and the town upon Charles River, Watertown."

The exact period when what is now called Weston began to be settled is not known; it was probably at an early period of the Watertown settlement, for there are still standing houses or parts of houses and foundations which go back to a very early period, of which we now have no reliable dates. The territory of Watertown was very extensive, and its several parts were known by distinct and peculiar names. The lands next west of Beaver Brook were called "the lots of the Further Plain," or the Great Plain, now Waltham. The remote or West Pine Meadows were in the southerly part of what is now Weston. The township lots, or lots beyond the Further Plain, were west of Stony Brook. The Farms or Farm Lands comprised what is now Weston, and were bounded by Sudbury and Dedham. In town-meeting, held October, 1638, "it was ordered that Daniel Patrick, Abram Browne, John Stowers, Edward Lewis and Simon Eire shall lay out the Farms as they are ordered." A list of these allotments in 1642 gives the names of those persons to whom ninety-two farms, containing 7674 acres were allotted. It would appear by the Watertown Records that the committee to whom the matter of allotments was given in charge, allotted to themselves the first choice, and they, with Jeremiah Norcross, Thomas Mayhew and John Whitney, were the first land-owners in Weston.

These allotments of the meadow-lands gave great dissatisfaction, and they are referred to in old deeds as the "Land of Contention." In 1663 these lands were re-surveyed and laid out for a new allotment by John Sherman. This survey contained 1102 acres, and was bounded on the south by Dedham, on the west by Sudbury, and on all other sides by the Farm Lands. These farms were styled the Farmers' Precinct, and also the Third Military Precinct. In 1692 these parts of Watertown, which subsequently became the towns of Watertown, Waltham and Wes-

ton, were designated as the Precinct of Captain Bond's Company of Horse, and of Captain Garfield's Company and Lieutenant Jones' Company. In the allotment of these farms it was stipulated that they shall be for a Common for cattle, to the use of the farmers of the town and their heirs forever, and not to be alienated without the consent of every freeman and their heirs forever. This is the first instance upon record where the term "Farm Lands" is applied to Weston. The earliest proprietors in 1642 are Bryan Pendleton, Daniel Patrick, Simon Eire, John Stowers, Abraham Browne, John Whitney, Edward How, Jeremiah Norcross and Thomas Mayhew. In ecclesiastical affairs, what is now Weston was connected with Watertown about sixty-eight years, and in civil affairs about eighty-three years. The inhabitants of the Farm District, and those in the remote westerly part of Watertown, went to worship at the easterly part of Watertown, at a house situated in the vicinity of the old burying-ground. The Watertown church is the sixth in organization in Massachusetts, the first being at Salem, the second at Charlestown (including Boston), the third at Dorchester, the fourth at Roxbury, and the fifth at Lynn. In July, 1630, at Watertown, forty of the inhabitants subscribed to a church covenant, and the church of this place dates from that period. It would seem from Governor Winthrop's journal that the Watertown church has a prior existence to the one at Charlestown, and was second only to that at Salem. In 1692 commenced the contention in this church growing out of the location of the new meeting-house. There was great opposition to a change in the place of worship, and it became so serious that the selectmen agreed to refer the matter to the Governor, Sir William Phipps, and his Council. This mode of bringing the disputes of a town to an issue by referring them to the chief magistrate, would be deemed singular at the present day, but at this early period was not uncommon. The Governor appointed a committee of five members to report, and they made their report in May, 1693. Judge Samuel Sewell was president of this committee. The report was unsatisfactory to the people, and the contention continued down to 1695, when a protest was placed on record, signed by 100 inhabitants, of which thirty-three were inhabitants of the Farmers' District. The contention growing out of this matter of the location of the new church led up to the final separation of the inhabitants of the Plain, or Waltham, they being allowed to have a meeting-house at "Beaver Brook, upon the road leading to Sudbury, to the end that there may be peace and settlement amongst us." As early as 1694 the Farmer's District—now Weston—would seem to have had separate interests from the church in Watertown. In 1694 the inhabitants of the Farms, to the number of 118, petitioned to be set off into a separate precinct, alleging the great distance to the place of public worship, and protesting against being obliged to go so far from home. The prayer of

the petitioners was not acceded to at once, and the contention growing out of the proposed separation extended over a period of five years. Judge Sewell presided over the conferences, and in his diary alludes to the contention between the parties, and adds, "that he had to pray hard to keep them from coming to blows;" but in January, 1697, the farmers were exempt from ministerial rates in Watertown, though not in legal form until a year later. It would seem that the farmers were determined to be separated from Watertown, and feared that the delay in granting their petition to this end would end in refusal. Money was contributed by sundry persons for the purpose of preferring a petition for their separation to the Great and General Court. The farmers again displayed their determination for a separation from Watertown, and did not wait patiently for a decision on their petition, for, in January, 1695, they agreed to build a meeting-house thirty feet square on land of Nathaniel Coolidge, Sr. This little church was never completed, but services were held in it in 1700. It was styled the Farmers' Meeting-House. It was begun by subscriptions, and afterwards carried on at the expense of the precinct. A history of Weston from the date of its separation from Watertown, in 1698, as a distinct precinct, must necessarily commence with a history of its church. There are no records extant of the precinct other than those of the church; all town and precinct records have been lost most unaccountably, the former for a period of fifty-two years, and the latter for a period of forty-two years. There is extant a precinct record beginning at the time of the separation of Lincoln from Weston, in 1746, and extending down to the year 1754, when they cease, and are merged in the town records, no explanation of any reason, therefore, being given on the books of that period. In the early settlements of New England towns the church was the nucleus of organization—the bond which held together the scattered population of rural districts—around which the people gathered and formed that essentially New England form of government which we call the town-meeting.

In 1699 the bounds of the Farmers' Precinct, by order of the General Court, was declared to be as follows, viz.: "The bounds of said Precinct shall extend from Charles River to Stony Brook bridge, and from said bridge up the brook Northerly to Robert Harrington's farm, the brook to be the boundary, including the said farm, and comprehending all the farms and farm lands to the line of Cambridge and Concord, and from thence all Watertown lands to their utmost Southward and Westward bounds." The same bounds, in the same words, are defined in the Act of Incorporation of the town in 1712. In 1700 money was granted to support preaching, which grants for that purpose continued from time to time by the inhabitants in town-meeting.

In 1701 Mr. Joseph Mors or Morse, who was a

graduate of Harvard College in 1695, was invited to preach, with a view to a settlement, and in 1702 they gave him a call by a vote of thirty to twelve, agreeing to build him a house forty by twenty feet. In January, 1703, he accepted the call, and it was voted in town-meeting to begin the promised house. The house and land were conveyed to him by deed. In 1704 difficulties arose respecting Mr. Mors' settlement; but there is no record extant of what was the nature of these difficulties. There appears, however, to have been considerable irritation, whatever may have been the grounds. Justice Sewell, in his "Memories," Vol. II., pp. 156, under date of 1706, speaks of a council held at the house of Mr. Willard, and they advise that after a month Mr. Mors should cease to preach in Watertown Farms. Mr. Mors was afterwards settled in Stoughton (now Canton). After some difficulty the precinct purchased his house and land for the use of the ministry; but it was not until 1707 that he conveyed the premises. (Lib. 14, fol. 646.) The Committee of the Precinct at this time consisted of Thomas Wilson, Captain Josiah Jones, Captain Francis Fullam and Lieutenant John Brewer. In 1706 the precinct was presented at the Court of Sessions for not having a settled minister, and a committee was appointed to make answer to the presentment. The precinct was again presented for the same reason in 1707 at Concord Court, and the answer made by the precinct was to "pray that the Court would not place Mr. Mors over the precinct, and not by their own election." In July they called Mr. Thomas Tufts; but he declined in September, and in January, 1708, the precinct appointed a day of fasting and prayer. In February, 1708, they gave Mr. William Williams a call, and he accepted in August, 1709, or eleven years after the Farmers' district had become a distinct precinct. It would appear by the parish records that the church in Weston had no regular organization until the settlement of Mr. Williams in 1710, when the covenant was signed; two deacons were chosen, the membership numbering eighteen males, nine from other churches, and nine who were not communicants. The following are the names of those who gathered with the church at this time: Nathaniel Coolidge, Thomas Flagg, Joseph Lovell, John Parkhurst, John Livermore, Francis Fullam, Abel Allen, Ebenezer Allen, Francis Peirce; the others were Joseph Jones, Thomas Wright, Joseph Allen, Josiah Jones, Jr., Joseph Woolson, Joseph Livermore, Joseph Allen, Jr., Josiah Livermore, Samuel Seaverns and George Robinson.

In March, 1710, money was granted to finish the meeting-house, by which we learn that the small meeting-house, thirty feet square, begun in 1695, was not completed in fifteen years. In 1718 a motion was brought forward to build a new meeting-house, but the matter was deferred. In 1721 the town voted to build, and to appropriate their proportion of the bills of credit issued by the General Court to this purpose.

The new location of this second church is north of the old location given by Nathaniel Coolidge, upon what is now called the Common. At a town-meeting November 5, 1721, it was voted that Benjamin Brown, Benoni Garfield, Ebenezer Allen, Joseph Allen and James Jones be a committee to manage the covering and closing of the new meeting-house. It was also voted "to grant the Reverend William Williams the sum of seventy-and-four pounds for his salary for his labor in the Gospel Ministry the present year, beginning the 10th of September, 1722, and six pounds for cutting and carting his fire-wood for the year." In what year this church was completed is not recorded. In 1800 it underwent thorough repairs—a steeple and two porches were added, and a new bell purchased of Paul Revere, for which the sum of \$43.12 was paid by public subscription. Mr. Williams continued in the ministry until October, 1750, covering a period of forty-one years, and was dismissed by a mutual council. The reasons for this action are not recorded. He remained in the town and, for a time, acted as schoolmaster, and otherwise assisted the successor chosen in his place. He died in Weston, and is buried in the town burying-ground. The Rev. Samuel Woodward succeeded Mr. Williams in 1751. He died October 5, 1782, at the age of fifty-six years, and the thirty-first of his ministry. Mr. Woodward was greatly beloved by his people and brethren of the clergy. He was succeeded by the Rev. Samuel Kendall, who was ordained November 5, 1783. He died in 1814, after thirty-one years of faithful service in the ministry. The Rev. Joseph Field succeeded Mr. Kendall in 1815, having graduated from Cambridge College in 1814. He died November 5, 1869, having been pastor of the Weston parish for fifty years. In the War of 1812 he served as chaplain to the Third Middlesex Regiment, and was a pensioner of the Government. The Rev. Dr. Edmund H. Sears succeeded Mr. Field. He died in 1876. He was followed by two or three ministers, whose stay was of short duration, until the ministry of Mr. C. F. Russell, in 1882, who is still pastor of the church. From the settlement of Mr. Williams, in 1709, to the death of Mr. Sears, a period of one hundred and sixty-seven years, there have been only five ministers settled over this ancient church, all of whom died here, and are buried in our graveyards, within a stone's-throw of each other. To the centennial sermon of the Rev. Dr. Kendall, delivered on the completion of the century of the incorporation of the town, in 1812, we are indebted for much of the ancient history of the town, that otherwise, in consequence of the loss of all town records covering the early period, we should to-day be ignorant of that interesting period of the town's history. Mr. Kendall states that at this time the population of the town was a little more than a thousand. In 1888 it was 1439. He gives the mortality for thirty years, from 1783 to 1813; before that date there was no means of computing such valuable data. During

this thirty years there were 396 deaths, making the annual average 13.5. Of the 396 who died, ninety arrived at the age of seventy and upwards—more than 43 per cent. arrived at what is called the common age of man. Out of the ninety that lived to this age, fifty-two attained the age of eighty. Of the fifty-two that arrived at this age, twenty-seven lived to be eighty-seven and upwards, or one in 14½ that attained this advanced age; twelve lived to be ninety and upwards, making one in thirty-three. Three lived to be ninety-five and upwards, giving one in 132. One lived to be 102 years old.

The estimate which Dr. Kendall gives of the people of the town, is that they are mostly industrious farmers—a class of men which merits the high consideration and esteem of every other class. The character of its inhabitants would not suffer by a comparison with those of any other town in the Commonwealth.

In 1711 a committee, consisting of Captain Fullam, Lieutenant Josiah Jones and Daniel Estabrook, were appointed by the Farmers' District to present a petition to the town-meeting in Watertown, held in May, 1711, and the following December the town "did by a free vote manifest their willingness that the said farmers should be a township by themselves, according to their former bounds," with the proviso and conditions, "1st, that the farmers continue to pay a due share of the expense of maintaining the Great Bridge over Charles River; 2d, that they pay their full share of the debts now due by the town; 3d, that they do not in any way infringe the right of proprietors having land, but not residing among the farmers." The petition was at once presented to the General Court, and the act incorporating the town of Weston was passed January 1, 1812. It is to be regretted that those who took part in organizing the new town, its officers, etc., are lost, little or nothing remaining to-day from that date to 1754, when the second volume of "Town Reports" commences. There were no Indian settlements within the limits of Weston; they had their hunting-ground higher up, on the banks of the Charles River. When the Indians planned the destruction of Watertown and the outlying settlements in 1676, they entered the north-westerly part of the town and burnt a barn, but it does not appear that any other damage was done. In Captain Hugh Mason's return of his company in 1675 appear the names of seven men who were of the Weston Precinct—John Parkhurst, Michael Flagg, John Whitney, Jr., George Harrington, Jacob Ballard, Nathaniel Hely, John Bigelow.

Jacob Fullam, of Weston, son of Squire Francis Fullam, joined the expedition, commanded by Captain Lovewell, against the "Pequanket" tribe of Indians in 1725. Fullam held the rank of sergeant. This tribe of Indians, with Pungus, their chief, had its home in the White Mountains, on the Saco River, in New Hampshire. They were very troublesome, and this expedition was undertaken to capture and

destroy them, as well as to gain the large bounty offered by the Province of £100 for every Indian scalp. The expedition consisted of about forty men. They were led into an ambush by the savages, and the greater part were killed, including Captain Lovewell and Sergeant Fullam. Fullam is reported to have distinguished himself in the fight. He killed one savage in a hand-to-hand encounter, and when a second savage came to the rescue of his friend, Fullam and the second savage fell at the same time, killed by each other's shots. There was an old song about this fight, one verse of which runs as follows:

"Young Fullam, too, I'll mention,
Because he fought so well,
Trying to save another man,
A sacrifice he fell."

The first step taken toward a military organization was in September, 1630, induced, probably, by the danger which was threatening the charter of the Province, which King Charles was said to be about to withdraw, which act on the part of the King would in all probability have brought matters to an early crisis. In 1636, at the time of the Pequot war, a more general organization of the militia took place. In this year all able-bodied men in the Colony were ranked into three regiments, the Middlesex regiment being under the command of John Haines. This Middlesex regiment continued to exist down to the early years of this century, as one of the historic features of the county, and in its day having been commanded by such distinguished men as Brooks, Varnum, Barrett and others. In 1637 lieutenants and ensigns were appointed for the train-bands in the towns. All persons above the age of sixteen were required to take the oath of fidelity, and that was probably the age when they became subject to military duty. In 1643 the danger from the Indians and the scattered position of townships led to the league of the four Colonies of Massachusetts, Plymouth, Connecticut and New Haven, under the title of the "United Colonies of New England." These four Colonies contained thirty-nine townships, with a population of about 24,000 inhabitants. Of the 24,000 people in the Confederacy, 15,000 belonged to Massachusetts, while the other three Colonies had only a population of about 3000 each. In 1643 the thirty towns of Massachusetts were divided into four counties—Middlesex, Essex, Norfolk and Suffolk. The train-bands organized at this time in every part of the Colony; one-third of the band was set apart, under the title of "Alarm men," who were to be ready at a moment's notice to repel any Indian invasion of the towns or settlements. They were the home-guard, and never took part on expeditions calling the train-band from home. The Alarm men took their arms to meeting on Sundays, and stacked them in the church during divine service. After meeting they formed in front of the church, and were inspected by the captain of the train-band, or, in his absence, by

one of the deacons of the church. Each man had to be provided with a certain amount of powder and ball, which ammunition was provided the men by the precinct. As the danger from Indian incursions had passed away, the "Alarm list" still continued down to the time of the Revolution. During the French and Indian wars, from 1735 to 1760, it became necessary to keep open direct ways of communication between Eastern Massachusetts and the frontiers of Canada. Massachusetts, from 1740, claimed all the territory that now constitutes the State of Maine, New Hampshire and Vermont. She manned and supported the forts on the Connecticut River at Westmoreland, Keene and Charlestown, Fort Drummond at Vassalboro', Vermont, etc. The Indian trails which from the early period had been the principal roads of travel, were inadequate for the transportation of cannon and ammunition of war; Massachusetts constructed roads through New Hampshire to Crown Point and Lake Champlain. Several of these roads ran through Middlesex County, and were the foundation of the principal thoroughfares we have in use to-day. The Main Road, Concord Road and Framingham Turnpike were largely in use in early times to reach distant points in the interior. These roads run through Weston to-day. The soldiers who had served in the Narragansett or King Philip's War were, for a number of years, clamoring for the lands which had been promised them by the Province for their service, in this war. A large percentage of these old soldiers had gone to their graves unrewarded, but there still remained some 840 claimants.

After a long delay it was finally decided to grant a township six miles square to every one hundred and twenty soldiers; seven townships were granted. The committee appointed to lay out these several townships reported in February, 1734. These Narragansett townships were distinguished by numbers from No. 1 to No. 7. No. 2, at Wachusett, was ordered "to assign to His Excellency Jonathan Belcher, five hundred acres of land in said town, for his father's right." In this township there were seventeen grantees from Cambridge, thirty-three from Charlestown, twenty-six from Watertown, five from Weston, eleven from Sudbury, seven from Newton, three from Medford, six from Malden and ten from Reading. John Sawin drew his father's rights in No. 2 in 1737; John Thomas and Manning Sawin owned the Livermore farm in Weston, afterwards sold to John Train. Mr. Abijah Upham, of Weston, was collector of the grantors of Weston. Benjamin Brown, of Weston, would seem to have been the principal manager of the Township No. 2. An interesting letter is addressed to him in 1737 by the clergyman of No. 2, who it, appears, had received no salary for a number of years. It was not, however, till 1744 that any attention appears to have been paid to the demands of the Rev. Elisha Marsh. In 1738 the bill for building the meeting-house appears among Mr. Brown's papers;

the sum of its cost is stated as £366 10s. 0d.,* with vouchers attached. Mr. Brown continues in general management of the township, now Westminster, from 1736 to 1750, when he transfers his accounts to Mr. Cook, treasurer of the proprietors. Beginning with the year 1734, the inhabitants of the northerly part of Weston complained of the distance which separated them from the place of public worship, and the condition of the roads leading to the meeting-house. Repeated presentments to the General Court were made concerning the condition of these roads. These complaints carry us back to the separation of Weston from Watertown, and resulted in 1746, in the formation of the town of Lincoln, and the loss to Weston of a large tract of land granted to Lincoln which had formerly formed a part of that town. The custom prevailed before the Revolution, and for some years later, for the inhabitants, in town-meeting, to draw up instructions for their representative to the General Court to follow, and regulating their actions and votes on particular subjects of general interest, and not infrequently the representative was called upon in open town-meeting to explain his votes, while the extreme leaders of rebellion against Great Britain were fulminating their action in Boston, sending letters and broadsides into every town. The Stamp Act, the Tea Party and the Boston Massacre do not seem to have created a very marked ruffle in the town-meetings of Weston; in fact, they are not mentioned on the town records. It required the march of the British regulars on Lexington and Concord to arouse the sleeping lion, who, when once thoroughly aroused, as became the case on the ever memorable 19th of April, 1775, never again drew in his claws until every vestige of British and royal dominion had been torn from the soil. A few days previous to the battle of Concord, Sergeant How, of the British Army, in Boston, was sent as a spy through the western part of Middlesex to discover the best means for a force to reach Worcester, there to destroy the provisions and ammunition which were stored at that place. This spy, whose journal is still in existence, met with his first mishap in Weston, when he was spotted as a spy, and his movements reported by the Liberty men of the town throughout his journey. The Weston men so thoroughly aroused the towns through which How traveled to Worcester and Concord, that it caused him to make a report to General Gage that to go to Worcester and back, not a man he would send there would come back alive. It was this report of How, that caused General Gage to make the attack on Concord instead of Worcester. On the morning of the 19th of April, 1775, on the alarm that the "British were coming," the inhabitants of Weston gathered to the number of one hundred at the house of Captain Samuel Lamson; among them the Rev. Samuel Woodward, who after offering a prayer, took a musket and fell into the ranks with the company. The list of these men who marched from Weston for the defence of the Colony

against the ministerial forces, will be found in *Lexington Alarm*, vol. xii. p. 170.

Captain, Samuel Lamson; Lieutenants, John Fiske, Matthew Hobbs; Sergeants, Josiah Steadman, Josiah Severn, John Wright, Abraham He-ws; Corporals, Abijah Steadman, Simon Smith; Drummer, Samuel Nutting; Privates, Nathan Hager, Jonathan Stratton, Isaac Bullard, John Allen, Jr., John Warren, Jr., Jonathan Warren, William Hobert, Micah Warren, John Frost, Abijah Warren, Isaac Flagg, Isaac Walker, Isaac Cory, James Jones, Amos Jones, David Sanderson, Abraham Harrington, John Walker, Jr., Samuel Underwood, Eben Brackett, Oliver Curtis, Josiah Corey, Reuben Hobbs, Thomas Rand, Thomas Rand, Jr., Benjamin Dudley, William Lawrence, Nathl. Parkhurst, Samuel Fiske, Elias Bigelow, Wm. Whitney, Abraham Sanderson, Benjamin Rand, Benjamin Pierce, David Fuller, Saml. Child, David Livermore, Jonas Harrington (3d), Jacob Parmenter, Thomas Corey, Roger Bigelow, Elijah Kingsbury, Jonas Underwood, Converse Bigelow, William Pierce, John Stimpson, Thomas Williams, Increase Leadbetter, Elisha Stratton, Isaac Hobbs, Benjamin Lancroft, Daniel Twitchel, William Bond, Jr., John Flint, John Norcross, William Carey, John Bemis, Daniel Lawrence, Jedh. Bemis, Leunel Stimpson, Samuel Train, Jr., Josiah Allen, Jr., Daniel Benjamin, Joseph Whitney, Josh. Steadman, Jonas Pierce, Nathl. Boynton, Eben Phillips, Jedh. Wheeler, Benjamin Pierce, Jr., John Pierce, William Jones, John Gould, John Lamson, Solo. Jones, Phineas Hager, Paul Coolidge, Samuel Taylor, Josh. Lovewell, Peter Cary, Thadus. Fuller, Joseph Pierce, Saml. Woodward, Elijah Allen, Hozekh. Wyman, Ebenr. Steadman, William Bond, Joel Smith, Joseph Jennison, Moses Pierce, Daniel Bemis, Daniel Stratton, Amos Parkhurst.

The Weston company did not reach Concord; they struck the retreating British at Lincoln and followed them to Charlestown, and were on this duty for three days.

The Weston artillery company also marched to Concord on that day under command of Captain Israel Whitmore,—

Captain, Israel Whitmore; Lieutenants, Josiah Bigelow, John George; Privates, John Whitehead, John Pownell, Nathan Weston, Joseph Russell, Nathan Smith, John Flagg, Jonathan Lawrence, James Smith, Jr., Thaddeus Garfield, Alpheus Bigelow, Thomas Russell.

This company received for their services £5 17s. 2d. 3¢.

At a town-meeting held on the 25th of May, 1775, Colonel Braddyl Smith was chosen to represent the town at a Provincial Congress, to be held in Watertown on May 31st, to deliberate, consult and resolve upon such further measures as under God shall be effectual to save this people from ruin. The whole warlike stores in Massachusetts on April 14, 1775, were a little over half a pound of powder to a man,—

Fire-arms, 21,549; pounds of powder, 17,441; pounds of ball, 22,191; number of flints, 141,609; number of bayonets, 10,108; number of pouches, 11,970.

In town meeting held June 18, 1776, it was voted to intrust their Representative to use his influence for the independence of Great Britain, if the honorable Congress thinks it best for the interests of the Colony, and also that their Representative should not be paid out of the public chest, which is still in the hands of the Royal Governor, and that he be allowed four shillings a day for 137 days' services out of the town rates. General Washington, having decided to fortify Dorchester Heights, the Third Middlesex Regiment was ordered, on March 4th, to occupy the Heights. This old regiment was at that time commanded by Eleazer Brooks, of Lincoln; Nathan Barrett, of

Concord, was lieutenant-colonel and Samuel Lamson, of Weston, was major. The names of the Weston company were as follows (State Records, vol. xix. p. 88):

Captain, Jonathan Fiske; Sergeants, Samuel Fiske, Josiah Seaverns; Corporals, Abijah Steadman, Simon Smith; Fifer, Abijah Seaverns; Privates, Isaac Cory, William Bond, Benjamin Dudley, Isaac Walker, Uriah Gregory, Solomon Jones, Edward Pierce, Nathan Hager, Jonathan Stratton, Jr., Isaac Flagg, Ebenezer Steadman, Nathaniel Howard, Joshua Pierce, Thaddeus Fuller, Abraham Harrington, James Cogswell, Joshua Cogswell, Joshua Jennison, John Allen, Jr., James Hastings, Joseph Steadman, John Warren, Jr., Michael Warren, Jonathan Warren, Thomas Russell, Jr., Benjamin Stimpson, David Steadman, Benjamin Pierce, Jr., Renben Hobbs, Silas Livermore, Samuel Woodward, Benjamin Rand, John Wright, John Stimpson, Lemuel Stimpson, John Pierce, Thomas Wilhaus, Abel Flint, John Hager, William Hobbs, Thomas Rand, Jr., Jonas Underwood, Joseph Russell.

The company traveled twenty-eight miles, and served five days. It is to be regretted that the town records do not give the organizations, companies and regiments to which the Weston men who fought in the Revolution were assigned. We have the payments made to all who served in the war, and mention is made of some of the campaigns in which they took part, but nothing very definite.

At a town-meeting July 1, 1776, it was voted to give £6 6s. 8d. to each man, in addition to the bounty granted by the General Court to those men that are to go to Canada. The Weston men who went to Canada at this time are as follows:

Converse Bigelow, John Warren, Jr., Samuel Train, Matthew Hobbs, John Hager, Lemuel Stimpson, James Cogswell, Benjamin Rand, Samuel Danforth, William Helms, P. Coolidge, John Baldwin, Benjamin Bancroft, Daniel Sanderson, Renben Hobbs, Elias Bigelow, Thomas Russell, Jr., John Stimpson.

Nearly all the above were members of the Weston company. The Weston men who were in Captain Asabet Wheeler's company, Colonel John Robinson's regiment, in 1776, at the siege of Boston, and stationed at Cambridge, were:

Josiah Cary, Roger Bigelow, Paul Coolidge, Converse Bigelow, Nathaniel Parkhurst, Oliver Curtis, Phineas Hager, Lemuel Jones, Nathaniel Bemis, Elias Bigelow, Daniel Benjamin, Daniel Livermore, Thomas Bigelow, A. Faulkner.]

The three months' men at Cambridge received £346 11s. 2d.—

Edward Cabot, Joseph Coburn, Isaac Gregory, Isaac Peirce, Artimus Cox, Daniel Bemis, John Bemis, Joseph Mastick, Peter Cary, Simeon Pike, Keene Robinson, Daniel Rand, Thomas Harrington.

The five months' men at Cambridge were paid £200 18s. 0d.—

Philemon Warren, Joseph Stone, John Hager, George Farrer, Nathan Hager, Jedediah Warren, Nathan Fiske, Henry Bond, Josiah Jennison.

The Weston men who guarded the beacon on Sanderson's Hill, in Weston, were as follows; they were paid £127 8s. 0d.—

Jonas Sanderson, Nathaniel Fetch, Joel Harrington, Nathaniel Parmenter, Thaddeus Pierce, Daniel Rand.

This beacon is spoken of in General Sullivan's "Memoirs" as the connecting link of signals between the army at Cambridge and Sullivan's command in Rhode Island. The nine months' men from Weston

were paid £900 as bounty-money; their names are as follows:

Keen Robinson, Jeduthen Bemis, Joseph Mastick, James Bemis, Samuel Bailey, Daniel Davis, Peter Cary.

There were eight Weston men in Captain Jesse Wyman's company, Colonel Josiah Whiting's regiment, serving in Rhode Island. They were discharged at Point Judith,—

Oliver Curtis, Joseph Mastick, Buckley Adams, Joseph Stone, George Farrer, Amos Hosmer, Josiah Parks, Eleazer Parks.

A draft was ordered by Colonel Brooks, of the Third Middlesex Regiment, of one-sixth of Captain Fiske's company, under date of August 18, 1777, as follows (S. R. vol. liii. p. 192):

William Hobbs, Samuel Nutting, Silas Livermore, Alphens Bigelow, Nathan Warren, Daniel Benjamin, Joel Harrington, Isaac Jones, Jr., Phineas Hager, Phineas Upham, Isaac Flagg, Thomas Hill, William Bond, Amos Harrington, Isaac Harrington, Jr., John Allen, Jr., Jeduthen Bemis, Daniel Weston.

At the defeat of Washington at Brooklyn, New York, his army came near being broken up in consequence of short-term enlistments, and he appealed to Congress to organize an efficient army. As an inducement to enlist for the term of the war, Congress offered a bounty of £20 at the time of muster, and the following grants of land: To a colonel, 500 acres; to a major, 400 acres; to a captain, 300 acres; to a lieutenant, 200 acres, and 100 acres to privates. Massachusetts passed a resolve requiring each town to furnish every seventh man of sixteen years of age, excepting Quakers. Under this order Weston quota was eighteen men. The town borrowed money of the town people to pay these men to the amount of £649 5s. 6d.; the full amount borrowed for the use of the town from 1778 to 1779 was £4281 5s. 0d.

The town debt at this time was £3965 9s. 11d. The army of General Burgoyne, which surrendered at Saratoga in October, was marched to Winter Hill, Somerville, in two divisions. One wing, under General Brickett, was marched over the Framingham Turnpike through Newton; the other wing, under General Glover, passed over the main road of Weston to the same destination. Drafts were frequently made on the Weston Company to guard these prisoners at Winter Hill, being relieved from time to time.

October 3, 1778, Colonel Brooks, of the Third Middlesex Regiment, was made brigadier-general and was succeeded in command of the regiment by Nathan Barrett, of Concord. At a town-meeting in May, 1779, it was voted that £3000 be devoted to the support of the war.

Voted to choose a committee to put in force the subject of domestic trade which had been considered at the convention in Concord: the scarcity of money, the high rates the town was obliged to pay for money to support the war, and the unreasonable prices charged for all produce of daily consumption. The convention fixed a scale of prices for goods and merchandise, for farm produce and wages. Weston

put in immediate force this regulation, and it was ordered that the names of those persons who did not comply with the rules be published. The currency of that date in depreciated money was about twenty shillings paper to one shilling in silver. This brought the price of tea to \$1.33 per pound, and wages in summer at fifty-eight cents. West India rum at £6 9s. per gallon. New England rum £4 16s. per gallon; coffee, eighteen shillings per pound; molasses £4 15s. per gallon; brown sugar, ten to fourteen shillings per pound; salt, £10 8s. per pound; beef, five shillings per pound; butter, twelve shillings per pound; cheese, six shillings per pound; men's shoes, £6 per pair; women's the same. Flip per mug, fifteen shillings; toddy in proportion. Extra good dinner, £1; common, twelve shillings. Best supper and breakfast, fifteen shillings; common, twelve shillings. Horse-keeping twenty-four hours on hay, fifteen shillings; on grass, ten shillings. The greater part of the men hired after this date to serve in the Continental Army were hired by the town, strangers to the town. The new Constitution was voted yeas fifty-four, nays twenty, with the proviso that it should be revised within ten years.

In 1780 the Weston Company of the Third Middlesex Regiment enlisted for three years or the war, and were commanded by Captain Matthew Hobbs, the two Livermore brothers being the lieutenants. This company took part in the campaigns along the western and northern borders of New York, and were discharged at Newburgh on the Hudson in 1783. Captain Hobbs died in 1817.

At a town-meeting on December 27, 1780, it was voted to grant money to purchase Weston's quota of beef for Washington's army—7930 cwt. It was also voted to raise £50,000 for the support of the war. It had now become difficult to find men willing to enlist and equally difficult to hire men. The currency had so far depreciated as to have become almost worthless, and loans of money on any terms extremely difficult. The times were hard and the necessities of life exhausted. The year closed in gloom. It is to be regretted that we have no record of the men from Weston who were killed or who died in the Army of the Revolution. The Rev. Mr. Woodward gives the names of only two, Daniel and Elisha Whitehead. In 1781 took place the sale of the estates in Weston of conspirators and Tory absentees. Seven lots were sold in the town. The bill relating to the sale of all such estates throughout Massachusetts was proposed and passed in the Legislature in 1780 by the action of the Representative from Weston. At the time of the Shays' Rebellion the State debt was enormous, and the people were saddled with taxes beyond endurance—farmers especially felt the burden, and many were sold out of their farms on account of not being able to pay their taxes and personal debts; discontent was universal. Massachusetts' proportion of the Federal debt was

about £1,500,000, private debts were computed at £1,300,000 and £250,000 was due to the old soldiers. Dr. Samuel A. Green estimates from 1784 to 1786 every fourth if not every third man in the State was subjected to one or more executions for debt. In 1784 there were 2000 actions pending at the Worcester Court, and in 1785 over 1700 more. Executions could be satisfied by cattle and other means besides money, thus placing the creditors at the mercy of the debtors. The militia of the State had become of very little account since the peace, and what there was of it could not be depended upon at the Shays' crisis, and Governor Bowdoin enlisted 4400 troops and two companies of artillery for thirty days; £6000 was raised in Boston by subscription and General Lincoln placed in command. Weston refused to offer any bounty to the men who enlisted. It was at this period that independent companies were organized; among these was the Weston Company of Light Infantry, its formation encouraged by Colonel Samuel Lamson who was at the time colonel of the Third Middlesex Regiment. This company received its arms from the Harvard College Company, which organization dates back to the year 1770. The Weston Light Infantry continued to hold its charter until the 13th of May, 1831, when it was disbanded for insubordination at the muster at Watertown. The names of its several commanders were as follows:

Abraham Bigelow, 1787; Artemas Ward, Jr., 1789; William Hobbs, 1793; Alpheus Bigelow, 1797; Nathan Fiske, 1800; Josiah Hastings, 1802; Isaac Hobbs, 1804; Thomas Bigelow, 1808; Nathan Upham, 1809; Isaac Childs, 1811; Isaac Train, 1813; Charles Stratton, 1814; Henry Hobbs, 1817; Luther Harrington, 1818; Marshall Jones, 1821; Sewell Fiske, 1822; Elmore Russell, 1828.

A detail from this light infantry company was ordered in the War of 1812 to guard the powder-house at Cambridge,—

Sewell Fiske, Nathan Warren, Nehemiah Warren, Jesse Viles, Charles Bonds, William Bigelow, Henry Stratton, Jacob Sanderson, David Viles, — Morse.

Major Daniel S. Lamson, Charles Daggett, William Harrington, Deacon Isaac Jones and Corporal Garfield, of the Weston company of the Third Middlesex Regiment, took part in the War of 1812. Major Lamson was made lieutenant-colonel of the Third Regiment in 1818, and died as such in 1824. Corporal Garfield lived to be over one hundred years old and died in 1875, having spent the last thirty-six years of his life in the Weston poor-house.

In 1788 the town of Weston voted for the new Constitution adopted by the convention held in Philadelphia on the 28th of April, the vote standing sixty-three out of seventy-four. In 1789 General Washington, President of the United States, undertook a journey to the New England States, which he had not visited since the evacuation of Boston by the British troops. He traveled in his own carriage, accompanied by Mr. Lear and Major Jackson, his secretaries, and six servants on horseback. Washington passed the night of October 23d at Flagg's tavern, in

Weston, and his letter to Governor Hancock accepting an invitation to dinner is dated from Weston. On the morning of October 24th he received the inhabitants of the town, and Colonel Marshall made an address of welcome. On his way through the town he called on Mrs. Lamson, whose husband had been an officer of his army. General Washington was escorted to Cambridge by the Watertown Cavalry Company.

The eighteenth century closed in great prosperity; the need of hard money alone prevented large commercial ventures. In 1790 the whole capital of the United States was only \$2,000,000, and the Federal debt in 1799 was \$78,498,669.77. The first Baptists in Weston began to gather together about 1776, meeting at each other's houses under the lead of Deacon Oliver Hastings. In 1784 a meeting-house thirty-one feet square, which building was first occupied in 1784, and finished in 1788, was erected on the Nicholas Boylston estate on the Framingham turnpike. In 1789 a church of sixteen members was organized and recognized by the ecclesiastical council. They had no settled minister until 1811, when they united with the church in Framingham, and the Rev. Charles Train was ordained as pastor over the united churches. They separated in 1826, Mr. Train remaining in Framingham. At this date the Weston church numbered about fifty members. The new church in the centre of the town was erected in 1828, Mrs. Bryant giving \$1000, and Mr. Hews giving the land. The material of the old church was used in erecting the parsonage in 1833. The first settled pastor was the Rev. Timothy P. Ropes, a graduate of Waterville College. The successors of Mr. Ropes in the ministry of this church are as follows: Rev. Joseph Hodges, Jr., in 1835; Rev. Origen Cram, in 1840; Rev. Calvin H. Toppliff, in 1854; Rev. Luther G. Barrett, in 1867; Rev. Alonzo F. Benson, in 1870; Rev. Amos Harris, in 1875, who is still the presiding elder. The Methodists of Weston began to gather about 1794, and a small chapel was erected in the rear of the present church. It was a very modest building, without paint or plastering, having neither pulpit or pews. This chapel was in the old Needham Circuit, which consisted of Needham, Marlboro', Framingham and Hopkinton, the whole under the charge of one preacher; later increased to three. The original society consisted of twelve members, and the first trustees were Abraham Bemis, Habbakuck Stearns, Jonas Bemis, John Viles and Daniel Stratton. Of the twelve members of this church, eight were women. The present church was erected in 1828, and in 1833 it became a regular station with a regularly appointed preacher. In 1839 Waltham was detached from it, which reduced the membership from one hundred and forty-one to eighty-three, and it has not materially increased since that date. Since 1794 to the present time this parish has had one hundred and seven preachers.

The schools of Weston have from the earliest period of the settlement received the care and money grants consistent with the means of the inhabitants. The earliest mention of the pay of a schoolmaster was on January, 1659, when £30 was voted to Mr. Richard Norcross, and this continued to be the salary for about seventy-five years. In 1683 it was agreed that those inhabitants who dwell on the west side of Stony Brook be freed from the school tax, that they may be the better able to teach among themselves. Mr. Norcross was employed in 1685-86. Those who sent children to school were to pay three pence a week for each, and all short of £20 the town would make up to Mr. Norcross. In 1690 the town allowed £15 for the schoolmaster's maintenance or board. The rate established for tuition was three pence a week for English, four pence for writing and six pence for Latin. The rates were established upon the following basis: Rye, five shillings; Indian corn, three shillings; oat, two shillings. Two shillings in money to be taken as three shillings in grain. In 1697 oak wood was seven shillings, walnut, eight shillings. In 1693 Richard Norcross was chosen schoolmaster again; he was also to catechize the children and all others sent to him. In 1696 the town was fined at General Sessions for not having a school. In 1700 Mr. Norcross was again the schoolmaster at £10 and the usual rates from owners of children, they agreeing to provide one-quarter cord of wood in winter. At this time Mr. Norcross had been a teacher forty-nine years and he was seventy years old. In 1706 Mr. Mors, having ceased to be the minister in Weston, was invited to keep school, and he helpful to the minister, for £40 and four pence a week from parents. In 1714 the town was presented at General Sessions for not having a writing school, and Mr. Joseph Woolson was appointed. In 1737 the town was again presented for not having a grammar school. The records of the town being lost, it is impossible to give any account of the schools down to 1754. In 1760 the town votes £100 for schools, but from 1761 the school appropriations and the incidental charges of the town are under one grant, rendering it impossible to state what was paid for schooling. This custom continued down to a very late date. During the Revolution the school-houses seem to have been little in use, and at the close of that period were in a bad state of decay. Whatever schools there were at that time were in private houses and were conducted by women. Rev. Mr. Woodward and Dr. Kendall both kept school and were paid by the town. Dr. Kendall received at his house the boys from Harvard College who were "rusticated" by the faculty for offences against discipline, and he kept them up in their recitations and classes. Several men, who in after-life became distinguished, passed periods of rustication in Weston. In 1803 \$600 is appropriated for schools, and \$25 for each woman's school. In 1805 this had increased to \$900. In 1807 a

census was taken of school children, and the whole number was 374. In 1810 a music-teacher was engaged. In 1813 the town had six school districts, each provided with a good school-house.

In 1817 \$650 was appropriated for schools and wood, and \$200 for women's schools, and this grant continues each year down to 1837, with slight variations. In 1834 the census taken by order of the Commonwealth gave a population of 1051 souls. The wages of female teachers in 1836 was \$2.75 per week. The master \$26 per month if he board himself, or \$18 if he be boarded by the town. In 1840 the school grants were \$1200, and in 1846 \$1450. In 1854 a grant of \$150 was made for a High School. In 1860 the school appropriation was \$1600, and in 1870 \$2900, and in 1889 \$4000. The above town appropriations for schools do not include the funds received for State aid for schools. In 1878 a large and imposing High School building was erected at a cost of about \$15,000, a very liberal sum for a town of the limited population of Weston.

In 1857 the town voted to establish a public library to be called the "Weston Town Library," and chose Isaac Fiske, Doctor Otis E. Hunt and the Rev. C. H. Topliff a committee to prepare rules and regulations for the government of the library; \$570 was raised in the several school districts for the purposes of the library. In 1859 Mr. Charles Merriam, of Boston, donated \$1000 as a perpetual fund, the interest of which was to be used for the purchase of books. This library is now in a very flourishing condition, and but few towns in the Commonwealth will surpass the Weston Library, either as regards the choice of books or the liberal support it receives from the town and private individuals. It is now the purpose of the town to secure an eligible site for a library building.

In 1865 Mr. Charles Merriam, who had passed his early days in Weston, sent to the selectmen of the town a United States treasury note for one thousand dollars, and his letter to the selectmen is worthy of insertion here, both as regards the noble object for which the donation was to be employed, but more particularly as an incentive to others, both here and elsewhere, to follow his charitable purpose:

"March 28, 1865.

"GENTLEMEN: Enclosed I hand United States seven and three-tenths Treasury note for one thousand dollars. My object is to commence the establishment of a fund for the benefit of what I shall call the 'Silent Poor of the Town.' And I desire that the interest and income shall be paid over, not to town paupers, but to that class of *honest, temperate men* and women who work hard or are *prudent and economical*, and yet find it difficult to make both ends meet. To such, a load of wood, occasionally a few groceries or a little flour or meal, will always be of service. The judicious distribution, from year to year, of this income I leave entirely to the town, suggesting only that three or more persons, selected from the different parts of the town, would be able to represent his or her location, and thus in conference all cases would be made known. I am very respectfully,

"(SIL.) CHARLES MERRIAM."

The trustees first elected under this donation were

six in number, but in 1867 they were reduced to three, and they were chosen for three years. The distribution of the income of this fund is entirely private.

The early business and industries of Weston were extensive for so limited a population; almost every trade was to be found here, dating back from 1740 to the date of the opening of railroads. Weston, being the great thoroughfare leading to Boston from Vermont, New Hampshire and Connecticut, gave to the place an importance it otherwise would not have enjoyed. All of the activity of those early days seems strange to-day, when, to within a few years, the town was reduced down to a grocery store, a blacksmith shop and a grist-mill. Most every house was a tavern at some period; the many lines of stage-coaches, the enormous amount of teaming from back sections, all together made a business harvest little understood by the present generation. Many of the storekeepers, after the Revolution, became prominent and wealthy merchants in Boston. The earliest store of which there is any record is that of Lieutenant Jones; the account-books still preserved are dated from 1745, but there should be books of an earlier date. Weston in those early days was a central and important place, and these books of the Jones family embrace accounts of all the neighboring towns, and include Vermont and New Hampshire. He was also a banker, judging from his loans to the neighbors and the notes of hand detailed in the ledger. It was at this store Colonel Ephraim Williams purchased his outfit for the campaign on Lake George in 1755, in which expedition he was killed. Mr. Jones also contracted for supplies of beef and clothing for Washington's army on the Hudson, and provided lumber for the first bridges erected over Charles River in Watertown and Charlestown. The present house, erected in 1751, was the famous Golden Ball tavern before and after the Revolution. Here General Gage and the British officers came frequently to supper-parties. Mr. Jones was a great Tory, and in constant correspondence with the British authorities in Boston down to the battle of Concord. Mr. Jones and his tavern figures in the story of How, the British spy.

In 1782 Isaac Lamson kept a store in the centre of the town. He died in 1806, and was followed by Daniel S. Lamson, who, for many years, kept one of the most noted dry-goods stores in Middlesex County. Mr. Lamson died in 1824, and was followed in the business by Charles Merriam, who entered Mr. Lamson's employ in 1821. In 1836 Mr. Merriam formed a partnership with Mr. Henry Sales, of Boston, which latter house is well known as that of Sales, Merriam & Brewer. Mr. Merriam was followed in the Weston business by Henry W. Wellington, now of Chauncy Street, Boston. With the departure of Mr. Wellington, in 1838, came the end of this store and all important business—the days of railroads had commenced.

In 1765 Abraham Hews established a pottery, probably the first industry of its kind in New Eng-

land. The business was continued in Weston, from father to son, down to 1871, covering a period of one hundred and six years. In 1871 it was found necessary to remove, in consequence of the rapid increase in the business, and a large factory was erected in North Cambridge, at which time the name of the firm was changed to that of A. H. Hews & Co. The pay-roll of 1871 contained 15 names; that of 1889, from 85 to 100. In 1871, 800,000 pieces were required by the trade; in 1889, 7,000,000 were in demand.

It has been found difficult to fix the exact date of the establishment of the noted tannery in Weston by the Hobbs family. Josiah Hobbs came to Weston from Boston in 1730. This tannery was known throughout the county, and it was a custom in early days to locate houses and people in Weston by the distance from the tannery. As late as 1795 vessels from Maine loaded with bark for these works came up to Watertown to unload. One of the most important industries of Weston was that of Stony Brook Mills. This water-power was rendered effective by one Richard Child, in 1679; he erected a grist-mill and later a saw-mill. The grist-mill was standing down to 1840. Coolidge & Sibley bought the property in 1831, and erected a machine-shop, and also a mill for the manufacture of cotton yarns. The specialty for many years was the manufacture of cotton machinery, looms, etc. They supplied the factories of Lowell, Lawrence, Lancaster and Clinton, besides which they built extensively for New York. Here was made the first machinery for the cotton-mills of Alabama and Tennessee. They also made door locks, extension bits and other articles of steel and iron hardware. In 1859 was begun the manufacture of wood-planing machines, the Sibley dove-tails, the Sibley pencil sharpeners, for schools, now in use from Maine to Alaska. All the available portion of this valuable plant has been completely destroyed by the Cambridge water works, who have seized the plant and rendered its future usefulness as a factory impossible, besides destroying a large taxable property within the town of Weston, which privilege never should have been granted by the Legislature to a private corporation having no natural claim to the run of the springs and water-flow of the town. The organ factory in the north part of Weston, now called Kendall Green, on the line of the Fitchburg Railroad, was established by Mr. F. H. Hastings, in 1888, moving from the old Roxbury factory, on Tremont Street, which had been occupied for forty years. In the year 1827 Mr. Elias Hook began the building of organs in Salem, with his brother George. They removed to Boston as E. & G. G. Hook. In 1855, when nineteen years old, Mr. Hastings became engaged with them, and in 1865 was admitted a partner. Later the name of the firm was changed to E. & G. G. Hook & Hastings, and, in 1880, after the death of Mr. G. G. Hook, it was again changed to Hook & Hastings. In 1881 Mr. Elias Hook died, since which

time the business has been conducted by Mr. Hastings, the business dating back over sixty years. Mr. Hastings has devoted himself to the building of church organs for thirty-five years. His relations with eminent European builders, the employment of experts trained in foreign factories, the ingenuity and skill of our American workmen have enabled him to obtain and hold the highest place in his art. The work of this house is found in every part of the country, and has a world-wide reputation. Its superiority is universally recognized. The large factory at Kendall Green, Weston, is claimed to be the largest and best equipped of its kind in America, if not in the world. It has a special side-track leading from the Fitchburg Railroad; organs are loaded directly into cars in the yard, and are sent to all parts of the country without re-handling or change. Trains stop at the factory for the accommodation of workmen and visitors. The large finishing hall is eighty by forty, and thirty-five feet high. Mr. Hastings has built his factory on land which formed a part of the old Hastings homestead, and which has been in the family for four generations. He has built cottages for his workmen, and a large hall and club-house with reading-rooms all attached, for public use. The Ralph Keuney chair factory is situated near the centre of the town, where large quantities of furniture for the furnishing of schools throughout the country are made, desks of the most approved styles, and seats and chairs for school purposes. The industries of the town to-day, with the above exceptions, are confined to the needs of the inhabitants. The most prominent commercial house at the present time, in the centre of the town, is the grocery of George W. Cutting & Son, which is located upon the Lamson estate. This spot has been occupied as a place of business for one hundred and fifty years. In 1852 Mr. John Lamson, who was born in Weston in 1791, inherited this property at the death of his mother, who died at the age of ninety-five years. Mr. Lamson took down the old store and house adjoining, which had become useless from age, and erected on the site a large modern building, which was leased to Mr. Charles Johnson, the postmaster of Weston, who, with his son, B. B. Johnson, the first mayor of the city of Waltham, also kept a store. Upon the expiration of his lease the store was taken by George W. Cutting & Son, and in 1875 the widow of Mr. Lamson sold the store and land upon which it stands to the Cuttings. Since the death of Mr. Cutting, Sr., the business has been conducted by his son.

In the fall of 1860, when the clouds were thickening over the country and its Constitution, and before any overt act had been committed by the Slave States, a home guard was organized by Captain D. S. Lamson, for the purpose of drill and general preparations for future contingencies. About fifty young men responded and were regularly drilled in the manual of arms and street marching. They purchased their own

arms, which were deposited in the Town Hall. The greatest interest was taken in this organization by the inhabitants as well as by those who became members of the company. This company did not enter a regiment as a whole, but all its members enlisted in regiments as they were formed from time to time, the greater number going into the Thirty-fifth Regiment, Colonel Edward A. Wild. At a town-meeting, July 19, 1862, it was voted to pay a bounty of one hundred dollars to every man who shall enlist in the United States service for the purpose of crushing the Rebellion, till the quota of seventeen required of the town shall be furnished. In August this bounty was increased to two hundred dollars to all who enlist within ten days, and to give each accepted volunteer, now or hereafter to enlist, ten dollars for each man who may be induced to join the military service as a part of the town quota of eighteen men. Twenty-six young men enlisted, and the town voted to pay the bounty above mentioned, although the quota of the town had been exceeded by nine in excess of the number required.

Captain D. S. Lamson, of Weston, was the first of that town to tender his services to the Governor. In March, 1861, when Governor Andrew was preparing the militia of the State for active duty, and was much hampered for clerk and other duties for which there was no appropriation of funds at that time, several gentlemen of Boston, among them Colonel Henry Lee, John H. Read, Franklin H. Story, Mr. Higginson and Mr. Lamson, tendered their services gratuitously to the Governor, which services he gladly accepted. Mr. Lamson was sent by the Governor on missions to Washington, Fortress Monroe and New York, all of which service was gladly executed at his own expense and to the acceptance of the Governor.

Men who enlisted from Weston for three years' service:

D. S. Lamson, major 16th Regt. M. V.; John E. Powers, Co. H, 16th Regt. M. V.; Warren Stickney, Co. H, 16th Regt. M. V.; William G. Clark, Co. H, 16th Regt. M. V.; Henry H. Richardson, Co. H, 16th Regt. M. V.; Thomas Palmer, Co. H, 16th Regt. M. V.; Caleb W. Lincoln, Co. H, 6th Regt. M. V.; John Robinson, Co. H, 21th Regt. M. V.; Thomas Fahey, Co. H, 9th Regt. M. V.; Frank W. Bigelow, Co. H, 13th Regt. M. V.; Edward Banyan, Co. H, 5th Regt. M. V.; Andriman J. Smith, Co. H, 22d Regt. M. V.; Charles C. Field, lieutenant 39th New York Regt.; Wm. Henry Carter, Co. H, 26th Regt. M. V.; Philip J. Mayer, Jr., Co. H, Mum's Battery; Lewis Jones, Co. H, 1st Regt. Cavalry M. V.; Eben Tucker, Co. H, 1st Regt. Cavalry M. V.; John W. Drew, Co. H, 35th Regt. Cavalry, M. V.; John L. Ayer, Co. I, 35th Regt. Cavalry M. V.; Lemuel Smith, Co. I, 35th Regt. Cavalry M. V.; Charles Roberts, Co. I, 35th Regt. Cav. M. V.; Samuel Patch, Jr., Co. I, 35th Regt., promoted lieutenant Sept. 6, 1864; Henry A. Tucker, Co. I, 35th Regt.; George T. Tucker, Co. I, 35th Regt., killed July 4, 1864; Andrew Floyd, Co. I, 35th Regt.; William C. Stinson, Jr., Co. I, 35th Regt., killed Sept. 20, 1864; Frederick A. Hows, Co. I, 35th Regt., died Jan. 5, 1863; Joseph Smith, Co. I, 35th Regt.; George G. Cheney, Co. I, 35th Regt.; William Henry, Co. I, 35th Regt., killed Nov. 20, 1864; Charles G. Fisher, Co. I, 35th Regt.; Ralph A. Jones, Co. I, 35th Regt., killed Sept. 17, 1862; Andrew C. Badger, Co. I, 35th Regt.; Jabez B. Smith, Co. I, 35th Regt.; Daniel H. Adams, Co. I, 35th Regt.; D. E. Cook, Co. I, 35th Regt., company sappers and miners; James M. Fairchild, Co. I, 38th Regt., killed June 1, 1864; Setroy Britton, Co. I, 3d Rhode Island Battery; Daniel Keyes, Co. I, 1st Regt.

The nine months' men from Weston are as follows:

Edmund L. Cutter, Co. I, 41th Regt., died April 31, 1863; C. E. Cutter, Co. I, 44th Regt.; H. B. Richardson, Co. I, 44th Regt.; Albert Washburn, Co. I, 44th Regt.; George E. Rand, Co. I, 44th Regt.; Marshall L. Hows, Co. I, 44th Regt.; Edwin P. Upham, Co. I, 44th Regt.; James A. Cooper, Co. I, 44th Regt.; Francis H. Poole, Co. I, 44th Regt.; Samuel H. Colless, Co. I, 44th Regt.; George W. Rand, Co. I, 44th Regt.; George E. Floyd, Co. I, 44th Regt.; Isaac H. Cary, Co. I, 44th Regt.; William C. Roberts, Co. I, 44th Regt.; John Coughlin, Co. I, 44th Regt.; Benjamin A. Duake, Co. I, 44th Regt.; James M. Palmer, Co. I, 44th Regt.; George E. Hobbs, Co. I, 44th Regt.; Henry L. Brown, Co. I, 44th Regt.; George J. Morse, Co. C, 44th Regt.; Henry W. Doy, Co. H, 44th Regt.; Abner J. Teale, Co. H, 44d Regt.; Samuel W. Johnson, Co. H, 43d Regt.; Fuller Morton, Co. E, 43d Regt., died Jan. 6, 1863; Henry A. Whittemore, Co. E, 43d Regt.; Henry Hingsworth, Co. E, 43d Regt.; W. W. Roberts, Co. A, 43d Regt.

At a town-meeting September 27, 1862, voted to pass the following *resolve*: "That whereas, we have learned that Ralph A. Jones, one of the Volunteers, has fallen in battle, and that others are known to have been wounded, therefore, *Resolved*, That the Rev. C. N. Topliff proceed to Maryland, and recover, if possible, the body of said Jones, or any others who have since died, and attend to the wants of the wounded men suffering in any of the hospitals. Also voted, that in case of the death of any Volunteers of the Town, whose families are entitled to State aid, the same shall be continued to them by town." In October Mr. Topliff made a report of the incidents of his journey and the arrangements he had made for bringing home the body of Ralph A. Jones. A committee of three was chosen, consisting of Mr. Topliff, Dr. E. O. Hunt and A. S. Fiske, to make arrangements for the funeral of said Jones. In the November town-meeting Rev. C. H. Topliff was chosen a committee of one to bring home the bodies of our soldiers who have or may fall in battle, and render assistance to our sick and wounded soldiers. Of the thirty-three men from Weston, drafted at Concord in July, 1863, twenty-eight were exempted, one was commuted, two found substitutes and two entered the service; one of whom, Lucius A. Hill, was killed May 10, 1864.

In 1863 the whole vote of the town was cast for John A. Andrew for Governor. Sixteen men enlisted and constituted the quota of Weston under the call of the President of October 17, 1863. All these men were hired by the town. Under the additional call for 200,000 men, made the same year, were the following:

James J. O'Connell, 4th Cav.; Charles H. Benton, 59th Regt.; John Lund, 59th Regt.; James Welch, 59th Regt.; Arthur Martin, 3d Cav.; Wm. Barrey, 4th Cav.; Daniel Robinson, 59th Regt.; Charles A. Fitch, 5th Cav.; Wm. C. Roberts, 55th Regt.; Joseph Faybrun, 59th Cav.; John Robinson, re-enlisted, 24th Regt. (killed May 14, 1864); Wm. Henry Carter, re-enlisted, 26th Regt. (killed Sept. 19, 1864); Eben Tucker, re-enlisted, Independent B. & C. Cav.; William Games, U. S. Navy (died in prison, June 13, 1864).

In town-meeting, November 14, 1863, voted that a committee of six be appointed, one for each district, to assist the recruiting officer in filling the town quota of soldiers, and placed \$3200 in their hands for that purpose. In May, 1861, the town voted \$125 for each man, to aid in filling any call that the General Government has made or shall make upon this

town for soldiers for the year 1865. In June and July twelve men enlisted to fill the quota of Weston under the call of the President, July 18, 1864.

The amount the town paid for bounties during the war was \$9025, to which amount the town's people, by private subscription, raised \$5104.95. The expenses attending the drafts of 1863 and 1864 were \$3524.90, making a total of \$12,528.90. To this must be added the amount of State aid paid to the families of the soldiers in Weston, from 1862 to 1866, \$3824.16. The town also paid \$416.03 for the recovery of the bodies of George and William H. Carter and John Robinson, killed in battle. The number of men belonging to Weston who went to the War of 1861 was 126. Of these, eight were killed, three died of wounds, and one died in Andersonville prison. A memorial tablet has been erected in the town library to the memory of the dead soldiers of the town.

The Massachusetts Central Railroad, in its conception purely a speculative enterprise, has now come to maturity, on a solid basis, after twenty years of incubation. Not one of the original officers had personally any practical experience either in building or operating railroads; they went to work blindly, and began their road "nowhere" and had ended in about the same place, as regards being within the reach of business. In 1868 an act passed the Legislature incorporating the Wayland & Sudbury Railroad, which was to run from Mill Village, in Sudbury, to Stony Brook, on the Fitchburg Railroad. This was the origin of the Massachusetts Central. In 1869 the bill incorporating the Massachusetts Central passed the Legislature, superseding the previous act of the year before. The capital stock was fixed at \$6,000,000, but the company voted to issue only \$3,000,000. As the two years in which to file a location was about to expire, a special act was passed extending the time to 1874. N. C. Munson, the contractor, failed, and all the sub-contractors failed with him. For several years the road was in a comatose condition. The cost of construction, in the fall of 1878, amounted to \$2,782,932.78; there was a funded debt of \$995,000 and an unfunded debt of \$37,428.76. Work was resumed on the eastern end of the road, and in October, 1881, was opened from Boston to Hudson, twenty-eight miles; in June, 1882, to Oakdale, forty-one miles, and to Jefferson, forty-eight miles. Governor Boutwell became president in 1880, remaining such until 1882, when he was succeeded by the Hon. S. N. Aldrich, of Marlboro'. Upon the failure of Charles A. Sweet & Co. work on the road was again suspended.

In 1883 the road was sold under foreclosure to a committee of the bondholders, S. N. Aldrich, Thomas H. Perkins and Henry Woods, and in 1885 they made a contract with the Boston and Lowell Railroad to operate the Central. It was in operation under this contract for one year. In 1886 the Lowell road leased the property for ninety-nine years, the company issuing bonds to the amount of \$2,000,000.

The road has to earn \$500,000 to meet the interest on the bonded indebtedness, and there is prospect of its doing better than that. The credit for rescuing the Central road from a total wreck is due to the president, Hon. S. N. Aldrich, the assistant treasurer of the United States. This road, running through Central Massachusetts and Middlesex County, has a great and prosperous future before it. If the directors will follow in the footsteps of the Boston and Albany it can, in a few years, create a suburban population along its route, equal to that which now secures the yearly dividend of the Boston and Springfield Branch of the Albany road. Weston, through which the Central runs, can, by generous accommodation, be made the centre of a large population. The present size of Weston is 10,967 acres by actual survey, and has 155 acres in ponds. It is in general an uneven, and in some parts a broken tract of land; high cliffs, or ledges of rock are found within its limits. The town is elevated above the common level of the surrounding country and affords an extensive view of other parts. The soil is of a deep, strong loam, favorable to the growth of trees, for the beauty of which this section is noted; the hills are springy and suffer little from frost or drought; brooks and rivulets abound on every side, and for the greater part rise within the limits of the town. The character of its inhabitants would not suffer by a comparison with those of any other towns in the Commonwealth. Few towns within a radius of twenty miles of Boston have preserved the old-time characteristics, both as regards population and customs, as Weston. The names of the descendants of the men of Concord and Lexington are to-day on the voting-list of the town; property and estates have changed owners but little within the past century. The present population of the town is 1430. There were fourteen deaths in 1888, of which number six had reached the age of 70 and upwards, the oldest being 84 years. The property valuation in 1876 was \$1,629,083; in 1888 it was \$2,076,600. The town debt is \$5695.93, and the rate of taxation \$6.00,—among the lowest rates in the Commonwealth. The school appropriation was \$4000. The finances of the town are managed with great care, while its roads and public buildings and improvements are liberally provided for in the yearly appropriations.

It is among the probabilities that more interesting details concerning the past history of Weston could have been introduced in this article were the records and documents belonging to it in a proper shape and order, and made accessible to the historian. In this respect Weston is sadly in need of immediate and intelligent action. The records which should be in safes are now scattered over the town in careless indifference to its good name, and those documents in the hands of the town clerk have never been properly filed or examined in the memory of the present generation, and access to those in his hands are surrounded by such unwarrantable restrictions as to render them

of little use to the historian. It is to be hoped the State Commissioner will give this subject his earliest attention.

NORUMBEGA, THE ALLEGED FRENCH FORT ON THE CHARLES RIVER.—That it should have been the original intention of the founders, as far back as 1630, to have established the city of Boston in the southeast corner of Weston, seems to us, at this date, curious reading, to say the least of it. Winthrop's journal and Dudley's letter to the Countess of Lincoln leaves us in no doubt but that the point in Weston selected for a stockade fort or palisade was really established in Weston in 1631, as a French trading post commanding the Indian trading resort near by. Mr. Justin Winsor calls this post the abandoned Boston. Professor Horsford in his untiring researches sought a spot at the confluence of Stony Brook with Charles River, in the town of Weston, and found there a ditch and embankment, which apparently had escaped the attention of all the local antiquaries of Watertown, Waltham and Weston. This ditch, which is not far from sixteen hundred feet in length, runs parallel to the water-line of the river and brook within the angle caused by their confluence, and follows the contour line of fifty-one feet above tide-water. About midway it bends into a loop, which nearly fills the apex of the angle. Across the base of this loop is another excavation of a like kind, which seems to have completed the circuit of the knoll lying within the loop. The earth of the ditch is thrown towards the river; it is just such a ditch as would be dug in which to plant a stockade, returning the earth about the base. The work was evidently left unfinished, the stockade not being planted in the portions already excavated. We know that a few days after the arrival of Winthrop at Salem he set out on the 17th of June, 1630, for the purpose of exploring to find a convenient spot to found their town, and that they discovered such a place as "liked" or suited them "three leagues up Charles River."

At a later date, learning of the intention of the French to attack them, and finding their company so weakened by sickness that they were "unable to carry their ordnance and baggage so far" as the three leagues up the Charles, they changed their mind; the news of the French led them to take more hasty measures; they scattered about the mouth of the river, and it was probably at this time that work on the fort ceased, leaving their work incomplete. Mr. Winsor states that it is not impossible that these works at Stony Brook may be found to be this premature and abandoned Boston. It was just such an extensive circumvallation as it may have been intended some months later to establish at Cambridge. In commenting upon Dudley's "three leagues up the Charles," Dr. Palfrey says that the spot must have been somewhere in Waltham or Weston, and "most likely near the mouth of Stony Creek," hitting precisely the spot of Professor Horsford's discovery.

The grist-mill at Stony Creek, to which Professor Horsford alludes as having been freed from rates for twenty years from 1679, and to which was added a saw-mill, was in running order down to about 1850. The Brewer mill, spoken of by Drake, was not at Stony Brook, but is to-day in active operation as both a saw and grist-mill, on the farm of Harrington, formerly within the limits of Weston, but now of Lincoln. Professor Horsford has purchased a portion of the land embracing the Norumbega fort, and has erected upon it a stone tower which was dedicated in 1889 at Watertown; but why the ceremony should have been held at Watertown, and not within the town upon the land of which the tower has been erected, has not been satisfactorily explained, and is considered by the inhabitants as a slight to their time-honored town.

CHAPTER XXXIV.

WESTON—(Continued).

BIOGRAPHICAL.

ISAAC ALLEN, born in Weston, Oct. 31, 1771. After spending some years in learning a trade, he was encouraged by his minister, the Rev. Dr. Kendall, to enter the ministry. Although much opposed by his parents, he commenced to prepare for college, and was fitted by Dr. Kendall for Harvard College at the age of twenty-three, graduating with the class of 1798. His class-mates were Judge Story, the Rev. Drs. Tuckerman and Channing. After pursuing a preparatory course with Dr. Kendall he began to preach, and received a call from the town of Bolton. He was ordained March 14, 1804, Dr. Kendall preaching his ordination sermon. He remained pastor of the church in Bolton for the remainder of his life—a period of forty years. During this long period he was never prevented by indisposition from preaching but one Sunday. At the completion of his seventieth year, in 1843, he applied for a colleague, and the Rev. R. S. Eads was installed as junior pastor. Mr. Allen died March 18, 1844, at the age of seventy-four years. He never married, and at his death left all his property to his church in Bolton.

EBENEZER ALLEN in 1710 married Elizabeth Eddy. She died, and in 1712 he married Sarah Waight. He had eleven children. Ebenezer Allen, the tenth child, married Tabitha, daughter of Francis Fullam, Esq., in 1742. He was town clerk of Weston in 1721, 1735 and 1738.

CAPTAIN ALPHEUS BIGELOW, sixth child of Josiah Bigelow, of Waltham, afterwards of Weston, was baptized in 1757, and married Eunice Mixer, of Waltham, in 1783. He went to the battle of Concord in Captain Whittemore's company of artillery,

Francis Blake.

of Weston; he served through the War of the Revolution and was on picket guard at the surrender of General Burgoyne at Saratoga. Alpheus was the fourth captain of the Weston Light Infantry Company in 1797, organized in 1787.

ALPHEUS BIGELOW, eldest son of Captain Alpheus Bigelow, born in 1784; graduated at Harvard College in 1810. He married Mary A. Hubbard Townsend, of Weston, and had seven children. He studied law in the office of Isaac Fiske and Tyler Bigelow, and was admitted to the bar in 1815. He represented the town of Weston in the Legislature in 1827-28.

FRANK WINTHROP BIGELOW, son of Alpheus, born in 1833; graduated at Harvard in 1854, and studied law in the office of Senator Hoar. He entered the army in 1861 in the Thirteenth Regiment. He resides on the Bigelow homestead.

FRANCIS BLAKE was born December 25, 1850, at Needham, Mass. His birth-place was a short distance from the Weston line, and a few rods only from the line separating Needham from Newton Lower Falls, with which village are associated the recollections of his early childhood.

Mr. Blake is of the eighth generation descended from William and Agnes Blake, who came to America from Somersetshire, England, in 1639, and settled at Dorchester, in that part of the town now called Milton. This ancestor was a distinguished leader in colonial affairs, and his descendants have kept his name in honorable prominence to the present time.

Mr. Blake is a grandson of the Honorable Francis Blake, of Worcester, State Senator and for many years one of the most prominent members of the Worcester County bar, and son of Francis Blake, who engaged in business pursuits in early life, and from 1862 to 1874 served as United States appraiser at Boston. Mr. Blake's mother was Caroline Burling, daughter of George Augustus Trumbull, of Worcester, a kinsman of General Jonathan Trumbull, the original "Brother Jonathan," who was private secretary to George Washington.

Mr. Blake was educated at public schools until the year 1866, when his uncle, Commodore George Smith Blake, U.S.N., secured his appointment from the Brookline High School to the United States Coast Survey, in which service he acquired the scientific education which has led to his later successes in civil life.

Mr. Blake's twelve years of service in the Coast Survey have connected his name with many of the most important scientific achievements of the corps.

His first field work was in December, 1866, when he served as aid in a party organized for a hydrographic survey of the Su-quehanna River, near Havre de Grace, Md., and his subsequent career in the service is outlined in the following synopsis of instructions received from the superintendent:

January 8, 1867, ordered to hydrographic duty on the west coast of Florida and the north coast of Cuba.

April 1, 1867, raised one grade in the rank of aid.

June 20, 1867, ordered to astronomical duty at Harvard College Observatory.

November 29, 1867, ordered to astronomical duty in Louisiana and Texas.

August 24, 1867, raised one grade in the rank of aid.

October 31, 1868, ordered to astronomical duty at Harvard College Observatory in connection with the trans-continental longitude determinations between the Observatory and San Francisco. On this occasion, for the purpose of determining the velocity of telegraphic time signals, a metallic circuit of 7000 miles with thirteen repeaters was used; and it was found that a signal sent from Cambridge to San Francisco was received back, after traveling 7000 miles, in eight-tenths of a second.

April 29, 1869, ordered to the coast of New Jersey for astronomical and geodetic work.

May 1, 1869, raised three grades in rank of aid.

July 8, 1869, ordered to Shelbyville, Ky., to observe the total solar eclipse of August 7, 1869.

October 7, 1869, ordered to determine the astronomical latitude and longitude of Cedar Falls, Ia., and St. Louis, Mo. It was understood that the successful accomplishment of this work would be deemed ground for promotion, and on November 11, 1869, Mr. Blake was promoted to the rank of sub-assistant.

October 15, 1869, ordered to Europe for the determination of the astronomical difference of longitude between Brest, France, and Harvard College Observatory, by means of time-signals sent through the French Atlantic cable.

June 27, 1870, raised a grade in the rank of sub-assistant.

September 12, 1870, ordered to Harper's Ferry, Md., for astronomical duty at station "Maryland Heights."

November 22, 1870, detached from Coast Survey and appointed astronomer to the Darien Exploring Expedition, under the command of Commander Selfridge, U.S.N. This expedition was for the examination of the Atrato and Thyra River routes for a ship canal across the Isthmus of Darien. Mr. Blake's work included the determination of astronomical latitudes and longitudes of several points on the Gulf and Pacific coasts, and in the interior, as well as a determination of the difference of longitude between Aspinwall and Panama. In a letter dated March 9, 1871, Commander Selfridge wrote to the superintendent as follows:

"Upon the close of Mr. Blake's connection with the expedition, it gives me great pleasure to bear witness to the zeal, ability and ingenuity with which he has labored, and to recommend him to your favorable consideration."

July 1, 1871, raised a grade in rank of sub-assistant.

ant, the letter from the superintendent to the secretary, recommending his advancement, stating that—"His observations have invariably borne the severest tests in regard to accuracy."

July 3, 1871, ordered to the Shenandoah Valley, Va., for astronomical duty at stations "Clark's Mountain" and "Bull Run Mountain."

Assistant Charles O. Boutelle, at the close of the work, wrote, under date of October 30, 1871:

"The symmetrical precision of the latitude observations made by you at Maryland Heights, Clark and Bull Run stations has never been excelled in the Coast Survey. The results do you great credit, and I shall take very great pleasure in reporting upon them to the superintendent."

January 1, 1872, raised a grade in the rank of sub-assistant.

March 21, 1872, ordered to Europe for astronomical duty in connection with the third and final determination of the difference of longitude between Greenwich, Paris and Cambridge. Mr. Blake was engaged for more than a year in this great work, which was carried on under the general direction of Professor J. E. Hilgard, then assistant in charge of the Coast Survey Office, and later superintendent of the Coast Survey. Mr. Blake made all the European observations, being stationed successively at Brest, France; the Imperial Observatory, Paris; and the Royal Observatory, Greenwich. Returning to the United States, he was stationed at Cambridge and Washington for the determination of differences of personal equation.

April 1, 1873, promoted from the rank of sub-assistant to the rank of assistant.

June 9, 1873, ordered to astronomical duty at Madison and LaCrosse, Wis., and Minneapolis, Minn.

June 17, 1873, offered charge of Transit of Venus Expedition to the Southern Hemisphere, which was reluctantly declined on account of domestic ties.

November 21, 1873, ordered to astronomical duty at Savannah, Ga.

May 18, 1874, ordered to duty in the preparation for publication of the results of transatlantic longitude work. This work involved a re-discussion of the result of the transatlantic longitude determinations in 1866 and 1870, as well as an original discussion of the final determination of 1872. Mr. Blake was so engaged for more than two years, and the results of his labors are embodied in Appendix No. 18, "United States Coast Survey Report, 1874."

The finally accepted values for the difference of longitude between Harvard College Observatory and Greenwich, derived from three independent determinations, are:

	HOURS.	MIN.	SEC.
1866	1	11	30.99
1870			30.98
1872			30.98
Mean	4	14	30.98

The precision of the work will perhaps be more evident to the general reader when it is said that the above results justify the statement that the distance between London and Boston has been thrice measured, with a resulting difference in the measurements of a little more than ten feet.

Mr. Blake's observations of 1872 gave a new result for the difference of longitude between the Royal Observatory at Greenwich and the Imperial Observatory at Paris,—9 min., 20.97 sec. The previously accepted value was 9 min., 20.63 sec., which left a difference of 0.34 sec., or 111 feet, to be accounted for.

Subsequent observations by European astronomers have confirmed Mr. Blake's results, and the finally accepted value is 9 min., 20.95 sec.

It was found that the transmission time of a signal from France to America through 3000 miles of cable was a little more than one-third of a second.

June 16, 1877, ordered to represent the Coast Survey at a conference of the Commission appointed to fix the boundary line between New York and Pennsylvania.

September 11, 1877, ordered to geodetic duty in connection with a re-survey of Boston Harbor under the direction of the Massachusetts Board of Harbor Commissioners.

This was the last field work performed by Mr. Blake, whose active career in the Coast Survey closed with the following correspondence:

"WESTON, MASSACHUSETTS, 5 April, 1878.

"Sir: Private affairs not permitting me at present to discharge my official duties, I respectfully tender my resignation as an Assistant in the United States Coast Survey.

"It is impossible for me to express in official language the regret with which I thus close the twelfth year of my service.

"Very respectfully yours,

"FRANCIS BLAKE, Assistant U. S. C. S.

"To the Honorable C. P. PATTERSON,

"Superintendent U. S. Coast Survey, Washington, D. C."

"U. S. COAST SURVEY OFFICE, Washington, April 9, 1878.

"Sir: I regret very greatly to have to acknowledge the receipt of your letter of April 5th, tendering your resignation as an Assistant in the United States Coast Survey.

"I accept it with the greatest reluctance, and beg to express thus officially my sense of your high abilities and character.—abilities trained to aspire to the highest honors of scientific position, and character to inspire confidence and esteem.

"So loath am I to sever entirely your official connection with the Survey, that I must request you to allow me to retain your name upon the list of the Survey as an 'extra observer,' under which title Prof. B. Pierce, Prof. Lovering, Dr. Gould, Prof. Winlock and others had their names classed for many years. This will, of course, be merely honorary; but it gives me a 'quasi' authority to communicate with you in a semi-official way as exceptional occasion may suggest.

"Your resignation is accepted to date from April 15th.

"Yours respectfully,

"C. P. PATTERSON, Supt. Coast Survey.

"F. BLAKE, Assistant Coast Survey."

During the last two years of his service in the Coast Survey Mr. Blake had much of the time been engaged in office-work at his home in Weston.

In his leisure moments he had devoted himself to experimental physics, and in so doing had become an enthusiastic amateur mechanic; so that at the

J.M. Brown Sc.

"KEELWAYDIN."
RESIDENCE OF MR. FRANK BLAKE
WESTON, MASSACHUSETTS.

time of his resignation he found himself in possession of a well-equipped mechanical laboratory and a self-acquired ability to perform a variety of mechanical operations. It was natural, under these conditions, that what had been a pastime should become a serious pursuit in life; and in fact within barely a month of the date of his resignation Mr. Blake had begun a series of experiments, which brought forth the "Blake Transmitter," as presented to the world through the Bell Telephone Company in November, 1878.

Mr. Blake's invention was of peculiar value at that time, as the Bell Telephone Company was just beginning litigation with a rival company, which, beside being financially strong, had entered the business field with a transmitting telephone superior to the original form of Bell instrument.

The Blake Transmitter, being in turn far superior to the infringing instrument, enabled the Bell Telephone Company to hold its own in the sharp business competition which continued until, by a judicial decision, the company was assured a monopoly of the telephone business during the life of the Bell patents.

That the experimental work connected with the invention of the Blake Transmitter was most thorough and exhaustive is shown by the fact that twelve years of commercial use have not led to any substantial changes in the design or construction of the instrument. There are to-day more than 215,000 Blake Transmitters in use in the United States, and probably a larger number in all foreign countries.

Since his first invention Mr. Blake has kept up his interest in electrical research, and the records of the Patent Office show that twenty patents have been granted to him during the last twelve years.

He has been a director of the American Bell Telephone Company since November, 1878.

Mr. Blake's life in Weston began June 24, 1873, on which day he was married to Elizabeth L., daughter of Charles T. Hubbard, of whom a biographical sketch is to be found in this volume.

In the year of his marriage there was the beginning of "Keewaydin," the beautiful estate in the southeastern part of the town which has since been his home and the birth-place of his two children,—Agnes, born January 2, 1876; Benjamin Sewall, born February 14, 1877.

About six acres in land, part of the "Woodlands" estate were given his wife by her father, and on this a beautiful house, the gift of her grandfather, Benjamin Sewall, was erected by the distinguished architect Charles Follen McKim. Since that time the estate has been by purchase increased in area to about 130 acres; the house much enlarged; a magnificent brick stable built; and the grounds surrounding the home buildings made to reflect the highest art of the landscape architect and gardener.

The stable buildings are grouped around an interior

court-yard, and, in addition to ordinary stable accommodations, comprise a cottage, mechanical laboratory, experimental and photograph room, bowling alleys and a theatre seating about one hundred persons. Also a boiler-room from which the house, as well as the stable, is heated by underground pipes.

The estate is furnished with a complete system of water works, including a reservoir holding a quarter of a million gallons, with a head of 110 feet at a fountain which rises from the pond at the base of the northwestern slope of the eminence on which the house stands.

The southeastern slope, between the house and the Boston and Albany Railway, is divided by massive stone walls, more than twenty feet in height, into a series of terraces designed for fruit culture and green-houses, the whole being enclosed by a high stone wall.

To the northeast, and adjacent to the house, is a sunken garden similar to the one at Hampton Court, England.

From the upper terrace on which the house stands are magnificent views in every direction, including the valley of Charles River in the foreground and Blue Hill, Milton, eleven miles and a half distant.

With these charming surroundings, Mr. Blake and his household enjoy the healthful luxury of quiet country life.

Mr. Blake was elected:—Fellow of the American Association for the Advancement of Science, 1874. Fellow of the American Academy of Arts and Sciences, 1881. Member of the National Conference of Electricians, 1884. Member of the American Institute of Electrical Engineers, 1889. Member of the Corporation of the Massachusetts Institute of Technology, 1889.

He is a Fellow of the American Geographical Society; member of the Bostonian Society; member of the Boston Society of the Archaeological Institute of America; and has for many years been appointed by the Board of Overseers of Harvard College a member of the committee to visit the Jefferson Physical Laboratory.

He is a member of the most prominent social clubs of Boston; and his active interest in photography has led to his election for many years as vice-president of the Boston Camera Club.

Mr. Blake has always taken a lively interest in the welfare of the town of Weston and on March 24, 1890, was elected one of its three selectmen.

FREDERICK T. BUSH, born in Taunton, Mass., April 24, 1815; married Elizabeth Debois November 10, 1841. Mr. Bush was appointed United States consul at Hong Kong, China, by President Polk in 1845, which office he held for seven years, returning to America in 1852. In 1855 he established the East India house of Bush & Comstock, which continued until 1865. Mr. Bush purchased the Starr farm in Weston of Doctor Henry T. Bowditch,

where he continued to reside until his death, in 1887.

DOCTOR AMOS BANCROFT, born in Pepperell in 1767; graduated at Harvard College in 1791. He was widely known throughout Middlesex County. He came to Weston about 1795, and remained the resident physician until 1811, when he removed to Groton. He took a leading part in town affairs. Dr. Bancroft married Sally Bass, of Boston, in 1796. He had an extensive practice and at various times a number of students under his charge, among these, Doctor George C. Shattuck, who, in 1811, married Eliza Cheerer Davis, the daughter of Mrs. John Derby, of Weston. During the winter, when the roads were blocked up with snow, Dr. Bancroft traveled on snowshoes and would be absent from home several days at a time. In 1848, while walking down State Street in Boston, he was knocked down and injured so severely by a passing team that he died a few hours after. He was attended at his last moments by his former student, Doctor George C. Shattuck. He was seventy-seven years old at the time of his death.

THOMAS BIGELOW BANCROFT, son of Doctor Amos, graduated at Harvard in 1831, and studied medicine with Doctor Shattuck.

DOCTOR BENJAMIN JAMES followed Doctor Bancroft as the physician of Weston in 1812, and remained the very popular and highly esteemed practitioner of the town for over thirty-six years. In 1847 he removed to New Jersey, where he died at an advanced age. Doctor James was, for many years, town clerk, and filled, at one time and another, all the chief offices of the town. In 1814 Doctor James published a book on Dentistry, which was highly spoken of in its day.

DOCTOR EDGAR PARKER, of Framingham, came to Weston in 1865. He was assistant surgeon in the Thirtieth Massachusetts Regiment in the war of 1861.

NATHANIEL COOLIDGE, of Watertown, married Lydia Jones in 1687, and settled in Weston. His name is first on the list of the original members of the Weston Church. He was a tailor by trade, but also a large land-owner and farmer. His will designates three farms, mills and wears. He gave one-half acre of land where the first church in Weston was built, bordering on the road which then ran through what is styled the Parkhurst meadow, about in the rear of Doctor Jackson's house. He died in 1711, but gave no deed of this land to the parish during his lifetime. He had thirteen children.

In 1715, JONATHAN COOLIDGE, of Newton, his tenth child, born in 1672, conjointly with his wife, Mary, executes a deed to the church, "being moved thereto by divers good causes and considerations, but more especially that of my honored father, Nathaniel Coolidge, etc." This deed is interesting as being witnessed by Colonel Ephraim Williams, of Newton, killed at Lake George in 1755, and the founder of

Williams College in Berkshire County. Jonathan Coolidge was killed by the fall of a tree in 1730.

EPHRAIM CUTTING, born in East Sudbury in 1774; married Theodora Pratt, of Weymouth, in 1802. He had seven children and died in 1866, aged ninety-two years. By trade Mr. Cutting was a carpenter and housewright.

GEORGE WARREN CUTTING, born in Roxbury, March 24, 1805, was the second child of Ephraim. He removed to Weston in 1822 and bought out Jonathan P. Stearns' grocery business in 1830. In 1860 he was appointed postmaster of Weston, which office he held at the time of his death, a period of twenty-five years. He conducted the only grocery in Weston from 1828 to 1885, a period of fifty-seven years. He was a man highly esteemed by the community, of strict integrity and great amiability. He filled many offices of the town with universal acceptance. In 1830 he married Elizabeth Lord, of Ipswich. He had eight children and died May 13, 1885, at the age of eighty years.

GEORGE W. CUTTING, JR., third child of George W., born in Weston, November 18, 1834, succeeded his father in the business, with whom he had been in partnership for some years previous to his father's death. In 1875 George W. Cutting & Son purchased the store property in the centre of Weston of the widow of John Lamson, which property had been in the Lamson family for over one hundred and fifty years.

Mr. Cutting married Josephine M. Brown in 1865 and had six children. In 1862, upon the death of Nathan Hager, he was chosen town clerk, which office he still fills in the year 1890. Mr. Cutting has filled and is still filling many offices of trust in the town.

ALFRED LESLIE CUTTING, his second child, born January 27, 1868, has opened a grocery store on the Concord Road in Weston.

JOHN DERBY, of Salem, purchased a large tract of land in Weston in 1796 and 1805, and made Weston his summer residence. At his death General Samuel G. Derby became possessed of this estate. In early life Mr. Derby followed the sea, and at one period commanded the Sea Fencibles. The title of General he obtained in the War of 1812. He died in Weston and was buried in Salem. Eliza Cheerer Davis, the adopted daughter of John Derby, married Doctor George C. Shattuck, of Boston, in 1811.

There are few men identified with Massachusetts who have left a more brilliant record as an inventor than Ira Draper. He was a native of Dedham, Mass., and was born December 29, 1764. Mr. Draper became a resident of Weston in 1809, having purchased the Goldwaite farm, which, during the Revolution, was owned by Dr. Wheaton, who is mentioned in the story of the British spy. This farm is now that of Mr. Ripley, in the northwesterly part of Weston. At the period of his residence in Weston he was devoting his time in improving the "Power

Loom," and succeeded in a permanent invention which he styled the "Revolving Temple," in use at the present time. Mr. Draper's inventive genius covers many patents which are extremely numerous, of great value and still in universal use.

Among the most important of his inventions are the following: 1st, a threshing machine for horse-power; 2d, an endless track horse-power; 3d, the hay and straw cutter; 4th, the road scraper of the V shape; 5th, a rock-lifting machine; 6th, the potato planter; 7th, horse rackets for soft meadows; 8th, a horse-power ditching machine to cut and clear drain ditches, which was made to cut fifteen inches deep, three inches wide at top and six inches at bottom; 9th, false fellos for wheels to traverse meadow lands, etc. Mr. Draper married twice, his second wife being sister of his first. He had five children, all born in Weston.

EBENEZER DAGGETT DRAPER, born June 13, 1813. He died at West Roxbury October 20, 1887, at the age of seventy-four years.

LYDIA DRAPER, born in 1815; died at Saugus in 1847.

GEORGE DRAPER, born in 1817; died at Hopedale in 1887. He was the father of General William F. Draper, of Hopedale. Lemuel Richards Draper, born in 1823, is still living. Ira Draper removed from Weston in 1823, and died January 22, 1848. Ebenezer D. Draper inherited his father's inventive genius. He purchased the patent rights of the "Revolving Temple," and, with his brother George, purchased other patents pertaining to the manufacture of fabrics, and started successful machine-shops in Hopedale, Mass. This establishment has become well known throughout the country.

George Draper was the inventor of several important improvements in spinning frames and looms. His son, William F. Draper, now carries on the business with increasing facilities in Hopedale under the style of George Draper & Sons. The admirable portrait of Mr. Ira Draper, now in possession of his grandson, James Sumner Draper, of Wayland, represents him holding in his left hand the "Revolving Temple." Mr. Draper died at the age of eighty-three years.

DANIEL EASTABROOK fifth child of Daniel Eastabrook, of Watertown, who married the daughter of Captain Hugh Mason, of Watertown, and grandson of the Rev. Joseph Eastabrook, was born 1676, and settled in Weston in 1704, in the south part of the town. He was one of the petitioners for the incorporation of Weston in 1711.

FRANCIS FULLAM, born in Fulham, a suburb of London, England, in 1669. He was sent to America when fourteen years of age. He took an active part in the separation of the farmers from Watertown in 1695. In 1711 he was one of the petitioners for the incorporation of Weston. He commanded the Weston military company, and was guardian of the Natick

Indians. He consorted with them in their differences and sales of land. He married Sarah, daughter of Lieutenant John Livermore, by whom he had one son, Jacob, killed with Lovewell in 1725. He died in 1757, at the age of eighty-eight years.

LIEUTENANT NATHAN FISKE settled in Weston in 1673, and bought 220 acres of land of Thomas Underwood for ten pounds. He died in 1694, leaving nine children.

Nathan, the fourth child of Lieutenant Nathan, born in 1672, died in 1741, is the ancestor of that family in Weston.

NATHAN, the eldest, born in 1760, was captain of the Weston company. Thaddeus, the second son, born in 1762, was a minister and Doctor of Divinity in 1821.

ABIGAIL, the fifth child, married Isaac Lamson in 1788. Isaac Fiske, the ninth child, born in 1778, graduated at Harvard College in 1798, and studied law with Artemas Ward, Jr., of Weston.

SEWELL FISKE was captain of the Weston company.

NATHAN WELBY FISKE, born 1798, graduated at Dartmouth in 1817, and was tutor from 1818-20, and in 1823-24 was a missionary in Georgia; was a Professor of Greek and Literature at Amherst College from 1824 to 1836. He died in Jerusalem in 1847, while on a journey to the Holy Land, and was buried near the tomb of the Psalmist David.

ISAAC FISKE, the ninth child of Nathan above, born in 1778, and graduated at Harvard College in 1798, was for many years the leading lawyer of the Middlesex Circuit; for twenty-four years he was the town clerk of Weston, and filled many other offices in the town. He was prominent in church affairs, and it is due to him that the Rev. Dr. Field was settled over the church in Weston. He was appointed register of deeds for Middlesex County by Governor Brooks, which office he held for thirty years. He was removed by Governor Boutwell in 1857 for political reasons. He was a delegate from Weston to the convention for amending the Constitution of the State in 1820, and secretary of the convention in Concord in 1812 which opposed the war with England. In 1802 he married Susan Hobbs, and at her death married her sister. He had seven children.

AUGUSTUS HENRY FISKE, second son of Isaac, born in 1805, was a prominent lawyer in Boston, and for many years a partner of Benjamin Rand. In 1830 he married Miss Hannah Bradford, of Concord, and had seven children.

SARAH FISKE, his fourth child, married the Rev. Chandler Robbins.

CHARLES HENRY FISKE, son of Augustus, graduated at Harvard College in 1860; he married a daughter of the Rev. Chandler Robbins. He is a prominent lawyer in Boston, but still retains his residence in Weston, and is prominent in town affairs.

ANDREW FISKE, son of Augustus, born in 1854;

graduated at Harvard in 1875 and at the Law School in 1878; he married, in 1878, Gertrude, daughter of Professor E. N. Horsford; he studied law in the office of Judge Hoar.

GEORGE FISKE, brother of Andrew and Charles Fiske, born in 1850; graduated from Harvard in 1872; lives in Concord.

THOMAS FLAGG, born in England in 1615; married in Watertown, and had nine sons and three daughters.

JOHN FLAGG, born in 1700; married Hannah Bemis in 1724.

JOHN FLAGG, his fourth child, born in 1731, married Patience Whittemore in 1754. It was this John Flagg who kept the tavern, now residence of C. Emerson, at which General Washington passed the night in 1789. He also kept the tavern on the edge of Wayland. John, his second son, born 1762, married Lucy Curtis in 1786; they had six children; this John followed his father in the tavern; Patience Flagg, his third child, born in 1791, married Colonel Daniel S. Lamson in 1822. The sixth children were twins—John, one of the twins, married, in 1831, Abigail Hobbs. His son, John Lamson Flagg, born in 1835, died in 1874; he graduated from Harvard in 1857; he was mayor of Troy, New York, in 1866-67; representative in the Assembly from 1868 to 1871. A memoir of him was published at the time of his death. In 1889 there have been nine John Flaggs in direct descent.

JOHN MACK GOURGAS came of a noble family of Huguenot descent, who settled in Geneva, Switzerland, soon after the repeal of the "Edict of Nantes." John M. was born March 9, 1766. In 1783 he entered the counting-room of a German gentleman in London. When living in Cumberwell, a suburb of London, he formed the acquaintance of Dr. John Lettsome, through whom he became interested in inoculation for small-pox, a system then in its infancy. Mr. Gourgas came to America about 1808, and settled in Milton. While there he called together a town-meeting and introduced the subject of inoculation. In 1809, 337 persons were inoculated by order of the town authorities. It was through the efforts of Mr. Gourgas that the Legislature passed the laws of 1828. In 1822 Mr. Gourgas purchased the Hon. James Loyd estate in Weston, where he died in 1846. Francis Gourgas, the third son, entered Harvard in 1826. He edited for some years the *Concord Freeman* and was one of Governor Boutwell's Council. His brother John was a distinguished lawyer in Quincy.

ABRAHAM HEWS, of Weston, established the first pottery in New England in 1765; he had six children.

ABRAHAM, his eldest son, had twelve children.

GEORGE HEWS, the seventh child, born in 1806; married Caroline Pelletier, of Boston, in 1852; he was a member of the Handel and Haydn Society for forty-three years, and vice-president of the society for nine years. He was organist of the Rev. Dr. Lothrop's church for twenty years; he composed many

sacred hymns and other music, and was by occupation a piano-maker. He died in 1873, very highly esteemed for his many virtues. The pottery business was transmitted from father to son in Weston, from 1765 to 1871, a period of one hundred and six years. In 1871 the works were removed to North Cambridge, and a large factory was erected under the firm of A. H. Hews & Co.

HORACE HEWS, the eleventh son of Abraham, born in 1815, has been treasurer of the town for a quarter of a century, and resigned in 1889 in consequence of failing health.

ABRAHAM HEWS, father of the above children, was made the third postmaster of Weston, by appointment of James Madison in 1812, which office he filled for forty-two years, until his death in 1854. At the time of his death he was the oldest postmaster in the service, and had held the office for a longer period of time. In 1850 the Department at Washington, recognizing his long and faithful service, addressed him a letter of thanks and congratulations.

JOSIAH HOBBS, born in 1684, eldest son of Josiah Hobbs, born in England in 1649. In 1730 purchased the Cheney farm in Weston, and removed there with his family of three sons and four daughters.

NATHAN HOBBS, the youngest, born in Weston in 1730, had nine children. He died in 1779, aged ninety-four years, his wife at the age of eighty-eight years.

EBENEZER HOBBS, born in Boston in 1709, married Eunice Garfield in 1734. He was the eldest son of Josiah, and he is the ancestor of the Hobbs family in Weston. He had nine children. The greater part of the Weston estate remains in the family to this day. Isaac Hobbs, eldest son of Ebenezer, born in 1735, died in 1813. He was deacon of the Weston church and town clerk for forty years.

MATTHEW HOBBS, his sixth son, born in 1745, was at the battle of Concord in Captain Lamson's company; he joined the Weston company in 1776, which company formed part of the Third Middlesex Regiment—Colonel Eleazer Brooks—Samuel Lamson, of Weston, being the major. In 1780 he enlisted for three years or the war, and was made captain of the Weston company.

SAMUEL HOBBS, the eighth child, born in 1751, was a tanner and currier. In 1773 he was a journeyman in the employ of Simeon Pratt, of Roxbury, and joined the famous Tea Party.

EBENEZER HOBBS, second child of Isaac Hobbs, born in 1762, had eight children. Susan, the eldest, and Sophronia, the third child, married Isaac Fiske, of Weston.

EBENEZER HOBBS, the sixth child of Isaac, born in 1794, studied medicine, but later became the agent of the Waltham Mills, and in 1819 married Mary, daughter of General Samuel G. Derby.

Until the year 1867 little had been done towards developing the southeastern portion of Weston be-

yond the condition of the outlying districts of ordinary farming towns.

In 1867, attracted by the beautiful topographical features of itself and its surroundings, Mr. Charles Townsend Hubbard, of Boston, purchased the "Slack farm" for a summer residence. The estate comprises about 250 acres of land bordering on the Charles River, and is broken up in an attractive manner into meadow, upland and woodland. Mr. Hubbard named his estate "Woodlands," and devoted more than twenty years to improving and beautifying the property. Here his children reached maturity, and in due time married and established themselves in homes on his estate or in the near neighborhood.

Mr. Hubbard was born in Boston in 1817, and there gained distinction as a successful manufacturer and merchant. He died at Weston in 1887, leaving a widow and five children,—Louisa Sewell Hubbard married John Cotton Jackson; Elizabeth L. Hubbard married Francis Blake; Charlotte W. Hubbard married Benjamin Loring Young; Charles Wells Hubbard married Anne L. Swan; Ann Hubbard married Bancroft Chandler Davis. To Mr. Hubbard, in the south, to Mr. Francis H. Hastings, in the north, and to Mr. James B. Care, in the centre of the town of Weston are due, in no slight degree, the impetus given in the development and progress of the town, which in the near future is destined to become a favored spot among the suburbs of Boston.

ISAAC HOBBS, third child of Isaac, born in 1765; his third child, SAMUEL, born in 1795, married Abigail, daughter of the Rev. Dr. Kendall, of Weston. He was captain of the Weston company.

ABIGAIL HOBBS, sixth child of Isaac, born in 1801, married John Flagg; they had one son, John Lamson Flagg.

MARY ANN HOBBS, the eighth child of Isaac, born in 1805, married Nathan Hager in 1832.

CAPTAIN JOSIAH JONES, admitted a freeman April 18, 1690, was one of the original members and one of the first deacons of the church in Weston. He died in 1714. The Farmers' Company was called by the name of Lieutenant Jones' company.

JOSIAH JONES, his son, was a captain of the company; he was elected a deacon in 1714, but refused to accept the office.

ABIGAIL JONES, the only daughter of Josiah, Jr., married Colonel Williams, of Newton, father of Colonel Ephraim Williams, the founder of Williams College, killed at Fort William and Henry in 1755. Father and son removed to Weston on the father's marriage, and remained in Weston until their removal to Stockbridge.

ABIGAIL WILLIAMS, daughter of Abigail, married General Joseph Dwight, of Great Barrington, by whom she had two children.

MARY DWIGHT, daughter of Abigail, married the Hon. Theodore Sedgwick, and was the mother of Theodore, Henry and Charles Sedgwick, distin-

guished lawyers of New York; Jane and Catharine Sedgwick, eminent authoresses.

ISAAC JONES, son of Captain Josiah, born in 1728, kept a large store in Weston, and in 1752 built the tavern of the "Golden Ball" noted before and during the Revolution; he was a staunch loyalist or Tory, and brought down upon himself the denunciation of the convention of Worcester County in 1775. Jones and his tavern are mentioned in How's journal. Mr. Jones died in 1813.

LEWIS JONES, of Watertown, married Anna Stone, who came from England in the ship "Increase," in 1635. She was born in 1624. Mr. Jones died in 1684, leaving four children.

JOSIAH JONES, his eldest son, born in 1640, is the ancestor of that branch of the Jones family in Weston; he was captain of the Weston company, and one of the original members of the church. Deacon in 1709-10; he died in 1743; ten children. JAMES, his oldest child, married Sarah Moore, of Sudbury, and had eleven children.

JAMES, eldest son of James, married Abigail Garfield, in 1728; they had seven children.

LEMUEL JONES, eldest son of James, Jr., born in 1729, married Anna Stimson in 1754. They had ten children.

AMOS JONES, son of Lemuel, born in 1755, married Azubah Russell in 1779; he had nine children.

MARSHALL JONES, the fifth child, born in 1791, died in 1864. He was captain of the Weston company, town treasurer for many years and a prominent man in town affairs.

JOHN JONES, seventh child of Amos, born in 1795, died in 1864. He was, perhaps, in his day the most popular man in the town. He was captain of the Weston company, and succeeded Col. D. S. Lamson as lieutenant-colonel of the Third Middlesex Regiment. Mr. Jones was an auctioneer and executor of estates in Weston, a man in whom the community had the greatest confidence. He was killed by an iron bar while lifting a stone on his property.

CHARLES JOHNSON, of Weston, born in 1805, married Maria Wilson in 1833. He had five children. He is a direct descendant of Captain Edward Johnson, who came from England in 1632, and was one of the seven who first settled at Woburn, and was surveyor-general of the Colony and held other offices.

BYRON B. JOHNSON, the third child of Charles, born in Weston, was the first mayor of the city of Waltham. Mr. Johnson purchased the Colonel Marshall estate of the Mackey heirs in 1838. He sold it to Philip Moyer, the Boston confectioner, in 1849. Mr. Johnson was postmaster of Weston from 1856 to 1860. This family are now all residents of the city of Waltham.

REVEREND SAMUEL KENDALL, D.D., born at Sherburn in 1753. He graduated at Harvard College in 1782, and was ordained pastor over the church in Weston in 1783. He was made Doctor of Divinity by

Yale College in 1806. He married Abigail, the third child of the Rev. Samuel Woodward, in 1786. They had four children. He died in 1814, and she died in 1793. He married, in 1794, his first wife's sister Miranda, born in 1762. There were four children by this second marriage. Abigail, the fourth child, born in 1793, married Captain Samuel Hobbs in 1834 at the age of ninety years. Dr. Kendall's pastorate extended over thirty-one years. To Dr. Kendall do we owe an interesting historical address extending from the date of the incorporation of Weston, in 1712, to the centennial year 1812, in which address we are made acquainted with town affairs without which we should be ignorant, in consequence of the loss of the town records.

SAMUEL LAMSON, OR LAMBSON, as it is spelled in England and also in Reading, and once in Weston, was changed in later records to a "p." The family came from Durham County, England, and arrived at Ipswich, moving to Charlestown and then to Reading. The earliest date so far obtained is that of Samuel, of Charlestown, in 1660; the homestead is in Reading, which he gives to his son Samuel.

JOHN LAMSON, probably the son of Samuel, moved from Reading to Weston in 1709 and purchased a large tract of land in the centre of the town. He died in 1757. John was born in 1686. He died at the age of seventy-one years. He had six children and married twice.

JOHN LAMSON, born in 1724, married Elizabeth Wesson in 1759.

SAMUEL LAMSON, born in 1736, married Elizabeth Ball in 1759, and for his second wife Elizabeth Sanderson, of Waltham, in 1788. He commanded the Weston company at Concord in 1775, and was major of the Third Middlesex Regiment in 1776, lieutenant-colonel in 1783, and colonel in 1786. He was town treasurer and selectman of Weston for many years, and took an active part in all town affairs. He had seven children by his first wife and three by the second.

ISAAC LAMSON, his third child, married Abigail, daughter of Nathan Fiske, in 1788. He kept store in Weston from 1786 to 1806.

JOHN LAMSON, the ninth child of Samuel, born in 1791, married Elizabeth Turner Kendall, of Boston, in 1814. He established the mercantile house of Lane, Lamson & Co., which was the first French importing house in the United States, with houses in Boston, New York, Paris and Lyons. Mr. Lamson retired from business in 1853, and took up his residence on the old homestead in Weston, where his descendants still reside. He died in 1855.

DANIEL S. LAMSON, born in 1793, the tenth child of Samuel Lamson, married Patience, daughter of John Flagg, in 1822. He kept the dry-goods store in Weston for many years, one of the most noted in Middlesex County. He was captain of the Weston company, and when he died, in 1824, was lieutenant-

colonel of the Third Middlesex Regiment, of which his father had been colonel.

DANIEL S. LAMSON, grandson of Samuel and son of John, was born in 1828, was educated in France, passed one year at the Harvard Law School in 1852, and two years in the office of Sohler & Welch. He was admitted to the bar in 1854. Before the breaking out of the war he tendered his services to Governor Andrew to assist him at the State-House, there being no appropriation for extra clerk hire. He was sent by the Governor to New York, Washington and Fortress Monroe on public business. He organized the Home Guard of Weston before the war, and organized and drilled the Malden company and other companies. He was appointed major of the Sixteenth Regiment Massachusetts Volunteers, early in June, 1861, without having made any application for the office. The Sixteenth Regiment was virtually the old Third Middlesex Regiment, being made of nearly the same towns as in former days. The Third Regiment had only eight companies; the Sixteenth had ten companies. Major Lamson was made lieutenant-colonel in 1863, and commanded the regiment after the death of Colonel P. T. Wyman, who was killed in the battle of Charles City Cross-roads, or Glendale. Colonel Lamson was discharged for disability in the fall of 1864. He has since resided on his property—the old Lamson homestead. John Lamson, son of John, was born in 1760.

JOHN A. LAMSON, born in 1791, son of John Lamson and Hannah Ayers, was a merchant in Boston, deacon of the church, and filled many town offices—he was a man very highly esteemed.

JOSIAH QUINCY LORING, born in Boston in 1810, graduated at Cambridge College in 1829. He spent one year at the Law School. He settled upon a farm in Weston, where he died in 1862. Mr. Loring was the son of Josiah Loring, one of Boston's old-time merchants. He married Christiana W., daughter of Dr. Peter Renton, of Boston. Mr. Loring was a thorough Latin and Greek scholar, and retained his love of classic literature throughout his life. He bequeathed valuable books to Harvard College, and assisted in the founding of the public library in Weston.

ALVAN LAMSON was born at Weston, Massachusetts, November 18, 1792. He was a descendant of William Lamson (or Lambson), who came from County Durham, England, and settled at Ipswich, Massachusetts, before 1638. John Lamson, the grandfather, and John Lamson, the father of Alvan, were born in Weston, the former in 1724, and the latter in 1760.

John Lamson, the father of Alvan Lamson, was a farmer, and Alvan worked on the farm for some years during his boyhood. He early showed a love of reading and desire of learning, studying, it is said, not only in the evening, but also during his work on the farm, in the day. After availing himself of such

Alvan Lanson

Dr. Lamson was a firm believer in the doctrines of Unitarianism, as they were held in his time, and one of their most constant and earnest advocates. He was among the most prominent clergymen of the Unitarian denomination, standing high as a scholar and theologian. He wrote the article on "Unitarian Congregationalists" in Rapp's "History of all the Religious Denominations in the United States," and was the author of several of the earlier tracts published by the American Unitarian Association.

He had much taste for country life, taking great interest in agriculture and pomology, and enjoying the cultivation of his garden, and of trees and ornamental shrubs.

He was a member of the Norfolk County Agricultural Society, and delivered the annual address before it in 1857.

He was a man of strong principle and high personal character, exact in the performance of duty and conscientious to an extent which to many would seem to be extreme; always ready to give to others all that belonged to them, and more willing to sacrifice his own rights than to encroach on those of another. But though strict in his views of right, he did not condemn the ordinary relaxations of life or despise the usages of society, and had nothing of asceticism in his disposition. He enjoyed social intercourse, though somewhat reserved in manner and appearance.

He married Frances Fidelia Ward, one of the daughters of Artemas Ward, who was long Chief Justice of the Court of Common Pleas, July 14, 1825. He died, after a short illness, July 18, 1864.

DAVID WESTON LANE, born in Weston, August 20, 1846, son of David Lane and Caroline Elizabeth Lamson; married Fannie Bush, daughter of Frederick T. Bush, of Weston, December 5, 1878. He was of the firm of Lane, Lamson & Co.; has four children, and lives on the Bush estate in Weston.

HON. JAMES LLOYD, son of Doctor James Lloyd, of Boston, who was a physician in that city in 1752, was born in Boston in 1769, and graduated at Harvard College in 1787. Mr. Lloyd purchased an estate in Weston early in 1800 and built a large colonial house, where he resided in summer for many years. In 1822 he sold the property to John M. Gougeon.

MARSHALL FAMILY.—We find in the history of the Ancient and Honorable Artillery Company of Boston, under date of 1640, page 114, the following interesting account of the ancestors of the American branch of the Marshall family living in Boston and Weston.

CAPTAIN THOMAS MARSHALL lived in Lynn in 1635. He was made a freeman in 1641; represented Lynn in the General Court in the years 1659-60, '63-64 and 1668. He acquired the title of captain from Oliver Cromwell, in whose wars he was a soldier. In 1658 he was authorized by the court to "perform the ceremony of marriage, and to take testimony in civil

causes." He died December 23, 1689, leaving several children.

CAPTAIN CHRISTOPHER MARSHALL, son of Captain Thomas, was a captain in the expedition to Cape Breton in 1745.

COLONEL THOMAS MARSHALL, son of Captain Christopher, born in 1717; baptized in the old South Church in 1719; was major of the Boston Regiment in 1765; lieutenant-colonel in 1767 to 1771; captain of the Ancient and Honorable Artillery Company in 1762 and 1767. He commanded the Tenth Massachusetts Regiment in the War of the Revolution. He was a selectman of the town of Boston when it was occupied by the British troops, and was considered too dangerous a person to be allowed to leave the town and had a guard placed over him. It is related, that in a dispute with a British officer, the latter drew his sword on Marshall, who, seizing a hoe near at hand, leveled the officer with it. He commanded Castle William, now Fort Independence, when the Continental troops were being recruited for the war. In 1776 he was made colonel of a new regiment by order of the Assembly at Watertown, and Moses Gill directed him to proceed at once to Watertown to receive his commission.

Colonel Thomas Marshall moved to Weston after the war and purchased the confiscated Jones estate in 1782. He married for his third wife the widow of the Rev. Samuel Woodward, December 6, 1795.

Colonel Marshall made the address of welcome when President Washington was in Weston in October, 1789, and he presented the inhabitants of the town to the President. He died in Weston in 1800, aged eighty-three years. *The Columbian Centinel* of that year mentions his death "as a man long known and highly respected, as the sincere friend of his country, the zealous assertor and defender of its rights, liberty and laws, the upright man and the sober Christian."

CAPTAIN CHRISTOPHER MARSHALL, brother of Colonel Thomas, born March 20, 1743; commanded a company in his brother's regiment. He was a minute-man at the battle of Bunker Hill. His sister, who had died from the effects of the excitement of that period, was to be buried the day before the battle, and Captain Marshall applied to his superior officer for leave to attend the funeral; this was refused him, with the remark, "that if his own father was to be buried, he would not leave his post to attend his funeral." Captain Marshall was present at the execution of Major André, and said that there was not a dry eye in the throng of brave men who gathered around the fatal tree. He was also present at the surrender of General Burgoyne and Lord Cornwallis. Although never wounded in the many battles which he was engaged in, his coat and hat bore marks of bullets.

When Captain Marshall joined the army, in which he served seven years, he removed his family to Connecticut. After the war he returned to the city of

Thomas Marshall f. 12

Boston, and resided on State Street. Through his term of service he would send to his wife large sums of money; the depreciation of the currency was such that \$100 would barely suffice for a single day's food. Mrs. Marshall at one time paid forty dollars for a quarter of lamb, through which she could see daylight. Captain Marshall married Rachel Harris in September, 1766.

THOMAS MARSHALL, son of Christopher and Rachel Marshall; born January 18, 1781; married Sophia, daughter of the Rev. Samuel Kendall (born in 1788), on September 14, 1813; he died in 1863, aged eighty-three years. She died in Weston September 17, 1882, aged ninety-five years. Mr. Marshall was connected with the Bunker Hill Bank over thirty years and first president of the Warren Institution, holding that office for twelve years. He was highly respected by all during the many years he lived in Charlestown. It was truly said of him, "His was a beautiful life, so upright and noble, in many trials and sorrows so pleasant always." He was buried on the fiftieth anniversary of his wedding day.

JAMES F. BALDWIN MARSHALL, fourth child of Thomas and Rachel Harris; born August 8, 1818; baptized in Brattle Street Church by the Rev. John G. Palfrey. He was paymaster-general of Massachusetts in the War of 1861, and, with General Armstrong, established the Hampton School at Hampton, Va., until 1884.

CHARLES MERRIAM, born in Concord in 1803; became a resident of Weston in his youth. In 1821 he entered the dry-goods store of Colonel D. S. Lamson, and succeeded Mr. Lamson in the business in 1824. In 1828 he married Caroline Ware, of Newton. In 1833 Mr. Merriam formed the co-partnership of Sales & Merriam in Boston, the house later of the firm of Sales, Merriam & Brewer. In 1859 Mr. Merriam donated \$1000 to the Library Fund of Weston, the interest of which was for the purchase of books. In 1865 he established one of the most laudable charities ever established in a town: he gave \$1000 for the "Silent Poor of Weston." He had seven children: Charles Merriam, the second child (born in Weston October 6, 1832), is now a prominent merchant in Boston; Waldo Merriam, the fourth child, upon graduating from Harvard, became adjutant of the Sixteenth Massachusetts Regiment in 1861, and was killed at Spottsylvania May, 1864; at the time of his death he was lieutenant-colonel commanding.

HERBERT MERRIAM, the fifth child, born in 1844, purchased the Roberts farm, in Weston, in 1873, and is still a resident. Mr. Merriam died in Boston in 1865, aged sixty-two years.

BENJAMIN RAND, born in 1785, graduated at Harvard in 1808 in the class with Richard H. Dana; he was a distinguished member of the Suffolk bar, generally considered the best-read lawyer in Massachusetts, but was not considered an advocate. Charles

Sumner studied law in his office in 1834. Mr. Augustus H. Fiske became his partner and succeeded to the large and lucrative practice upon the death of Mr. Rand in 1852. He can be classed as one of Weston's greatest sons.

SAMUEL PHILLIPS SAVAGE was the son of Arthur Savage, who married Faith Phillips, in 1710, daughter of Samuel Phillips, a distinguished bookseller in Boston. The grandfather of Samuel Phillips Savage, born in 1640, was the second child of Samuel Savage, who emigrated to America from England, and married the daughter of the famous Ann Hutchinson. She had two children, and died in Weston, June 6, 1775, aged eighty-four years. The brother of Faith Phillips, who married Arthur Savage Henry Phillips, was killed in a duel on Boston Common in 1728, and lies buried in the cemetery on Boston Common. Samuel Phillips Savage was born in Weston, and was a leading man of the town for many years; he represented the town in the Provincial Congress held at Concord in 1774. He was made judge of the Court of Common Pleas of Middlesex County in 1775, president of the Massachusetts Board of War, moderator of the meetings held in the Old South Church previous to and on the night the tea was steeped in the salt water of Boston Harbor. Judge Savage's first wife was a Russell, and, second, Mary Meserve, of Weston, in 1794. He died in Weston in 1797, and lies buried in the old cemetery. The portrait of Judge Savage, by Copley, is now in possession of Mr. John R. Savage, of Philadelphia.

REV. EDMUND HAMILTON SEARS, D.D., was born at Sandisfield, a town in the mountainous country of Western Massachusetts, on the 6th of April, 1810. He was the youngest son of Joseph and Lucy (Smith) Sears, and, with his two brothers, passed his youth in hard work upon his father's farm. As a boy he was serious minded, fond of study and given to writing poetry and sermons. He found it difficult to gratify his desire for a student's life, although his parents did all in their power to help his plans, but finally when he was twenty-one years of age he entered the sophomore class at Union College, Schenectady, N. Y., where he showed marked ability, both as a writer and as a student, and was graduated in 1834. He was drawn to Cambridge, Mass., by the writings of Channing and the Wares, and there he entered the Harvard Divinity School. His class was that of 1837, which numbered also the Reverend Henry W. Bellows, D.D., and the Reverend Rufus P. Stebbins, D.D. For nearly a year Mr. Sears preached as a missionary at Toledo, O. In 1839 he was ordained as minister of the First Church in Wayland, Mass., and it was in the same year that he married Ellen, daughter of the Hon. Ebenezer Bacon, of Barnstable, Mass. In 1840 he accepted a call to the Unitarian Church at Lancaster, Mass., where his health gave way after a most happy but laborious ministry of seven years. He returned to Wayland and gradually regained his

powers of usefulness, but it had become apparent to him that his strength was not equal to the care of a large parish, and though he received numerous calls from large societies he was never able to accept them. He was settled at Wayland in 1848, and here, as at Lancaster, he was happy and successful in his work; but it was here, too, that he met with the deepest grief of his life, a grief from which he never wholly recovered. In 1853 his only daughter, Katharine, died of scarlet fever at the age of ten. She was a thoughtful, serious, yet merry and most affectionate child, and so deeply did he feel her loss that it was months before he could bring himself to record the story of her suffering and death. That story, preserved among his manuscripts, is one of rare and deeply-moving pathos. He had three younger children, all of them sons,—Francis Bacon, born in 1849; Edmund Hamilton, born in 1852, and Horace Scudder, born in 1855. His married life was exceptionally complete and happy.

Mr. Sears' ministry at Wayland continued for seventeen years. In 1865 he was installed as colleague of Rev. Dr. Joseph Field, pastor of the Unitarian Church in the adjoining town of Weston, and upon the death of Dr. Field, in 1869, he became the sole minister of the church. The ten years he spent at Weston were exceedingly pleasant and happy ones, and were enriched by one of the most delightful experiences of his life—a tour to Europe in the summer of 1873. He died at his residence in Weston on January 16, 1876, after a long and painful illness.

Mr. Sears is well known as a writer upon religious themes, and, besides many sermons and discourses, he published the following volumes: "Pictures of the Olden Time," 1853; "Regeneration," 1853; "Athanasia, or Foregleams of Immortality," 1858; "The Fourth Gospel the Heart of Christ," 1872; "Foregleams and Foreshadows of Immortality" (revised from "Athanasia"), 1873; "Sermons and Songs of the Christian Life," 1875; "Christ in the Life," 1877. Some of his lyrical pieces are well known, and are to be found in many hymnals, especially the two Christmas lyrics: "Calm on the Listening Ear of Night," and "It Came Upon the Midnight Clear."

In anti-slavery and war times he composed several stirring songs which were then often quoted, particularly the one written upon the death of John Brown. Mr. Sears was also senior editor of the *Monthly Religious Magazine* for many years, and contributed to that periodical numerous articles upon a great variety of topics. His volume "Pictures of the Olden Time" is an historical romance founded upon some old family traditions, and contained as an appendix a genealogy of the Sears family. His other works were, as their titles indicate, of a religious nature. The catholicity of his spirit is revealed in the wide circulation which his writings obtained. "More than any other man of his day," said the *New York Evening Post*, "he held convictions and made statements

which commanded the assent of considerable numbers of thoughtful and cultivated persons outside of the religious body to which he belonged."

He received the degree of D.D. from Union College in 1870.

Such is the brief and meagre record of a remarkable life and a remarkable man. For Mr. Sears was remarkable, not because his gifts were great, but because they were unique. In the elevation of his Christian character, in his piety and his unswerving loyalty to the truth as he saw it, in his courage, his honesty in the smallest things, his thrift, his shrewdness and his firm grasp upon the practical side of life, he did not differ materially from many eminent divines who have adorned the history of New England from the earliest Puritan times; but in the depth of his poetic and spiritual insight, he stands as a marked and unique figure among them. His gift of poetic utterance, though unusual, was yet very limited, and his best poems are remarkable for melody, feeling and lyrical fire rather than for richness of poetic phrase; but his insight as a poet was exceptionally profound. In was first developed in his boyhood amid the Berkshire hills he loved; it was cherished and fed at Lancaster by the elms and the clear-flowing Nashua; at Wayland by the fair river landscape that reveals itself from the high hills of the town; it was quickened by the lake scenery of England and the rugged mountains of Scotland; and finally it received its fullest and highest inspirations when applied to divine and spiritual things. Mr. Sears was like an Oriental in his readiness to apply it to such things, and was always a little impatient with the practical and prosy bent of the European mind, which he termed "our freezing Occidentalism." He was ready to see spiritual things through natural things, and grasped eagerly at the great fact revealed by Saint John, by Swedenborg, and by Wordsworth, that the outward universe is but a veil that dimly hides the Divine and Eternal Mind. And so quite naturally he loved Wordsworth more than any other poet, and found in him unfailling delight.

Yet Mr. Sears was not a visionary. His mind was severely logical. His insight divined truth, both natural and spiritual, with wonderful quickness, but he never trusted what he thus apprehended until his reason had confirmed it. Hence his religious works have a unique and peculiar character, especially the one on the Fourth Gospel. The style is fervid and poetic; the religious feeling is strong and even intense; and yet no conclusions are reached that are not logically defended and maintained.

This poetic nature that was so marked in Mr. Sears affected his character profoundly, giving to it great fineness and some limitations also. It made him sensitive, gentle, winning, so that he was beloved by the various peoples to whom he preached as a minister is seldom loved. But his sensitiveness was extreme, and though he was unusually firm, fearless and decided,

^o
Edmund H. Sears

and possessed, too, uncommon force, it prevented his character from having that robustness and completeness that belongs to men of a different mould.

Mr. Sears was in sympathy with the earlier leaders of the Unitarian movement, yet it could hardly be said that he followed them, for he reached his most cherished convictions by his own independent thinking. To him the one central idea of Christian theology was the "Logos doctrine," that "the Word was made flesh and dwelt among" us, and hence that there was in Christ the Divine nature in its fullness as well as the human. In maintaining this view he found himself out of sympathy with the newer, humanitarian school of Unitarians; but in the preface to "Sermons and Songs," the last of his works published during his life, he affirmed his loyalty to the Unitarian body and his gratitude to it for the freedom it had always allowed him.

As a citizen he was prominent and active, taking a keen interest in town affairs as well as those of the State and the Nation. Especially did he labor in behalf of education, and not only did he raise the standards of the schools, but he gave to the more intelligent young people of his different pastorates most valuable mental stimulus and help. He did not often introduce secular topics into his sermons, but in great crises, as at the passing of the Fugitive Slave Law, he did not hesitate to declare from the pulpit that when the human and the Divine law were in conflict it was the duty of all to obey the latter. After the assault upon Charles Sumner he preached a sermon entitled "Revolution or Reform," which so commended itself to the anti-slavery leaders that they had a large edition printed and many thousand copies were circulated throughout the North.

For thirty years, including the greater part of his active life, Mr. Sears was a citizen of Middlesex County, where his influence upon the intellectual and spiritual life of his time was deeply felt.

BRADYLL SMITH, son of William Smith, born in 1715, married in 1736 Mary Hager. He was captain of the Weston Company of minute-men, and made colonel of militia in 1776-77. He represented Weston in the General Court in 1775, and in 1776-77 was a delegate to the Continental Congress at Concord and Watertown; he held all the important offices in the town and church; he had eight children and died in 1779.

SAMUEL SEAVERNS, baptized in Watertown in 1686, married Rebecca Stratton in 1699; his son Samuel, born in 1706, when a boy, before going for the cows, would climb a tree and look out for Indians before venturing away from his father's house—a part of the Starr house, now of Bush heirs, was probably built by Samuel Seaverns. Dr. Starr was born in this house and married Abigail Upham in 1762. The house was repaired in 1856, and a copper coin of George II. found in the walls.

SAMUEL SEAVERNS, born in 1779, was so much op-

posed to the Boston and Worcester Railroad passing through his land, that during his life he could not be induced to enter the cars, and would turn his back on the trains as they passed along in sight. The compensation he received from the road was not considered by him as any equivalent for the intrusion upon his property.

EBENEZER STARR, M.D., born in 1768; graduated at Harvard College in 1789. He was made M.D. in 1825. He died in 1830. He was a member of the Legislature in 1815, 1817, and justice of the peace.

EPHRAIM WOOLSON, son of Thomas Woolson, of Weston, born in 1740; graduated at Harvard College in 1760. He settled in New Hampshire.

SAMUEL WOODWARD, son of the Rev. Samuel Woodward, born 1756; graduated at Harvard College in 1776. He was a surgeon in the Continental Army, and settled in Newburgh, New York. He died in 1785, leaving one son. His brother, Cyrus Woodward, born in 1761, died in 1782, while in the Sophomore class at Harvard.

SAMUEL WOODWARD, fourth child of Ebenezer and Mindwell Stone Woodward, was born in Newton in 1726; graduated at Harvard College in 1748; ordained pastor of the Weston church in 1751 by a unanimous vote of the town. In 1753 he married Abigail, daughter of the Rev. Warcham Williams, of Waltham, and had twelve children. Abigail, the third child, born in 1759, married the Rev. Samuel Kendall in 1786. Miranda, the fifth child, married Mr. Kendall for his second wife, in 1791. Mr. Woodward was a strong Liberty man throughout the Revolution, and he joined Captain Lamson's company as a private on the march to Concord, in 1775. He died October 5, 1782, having been pastor over the Weston church for thirty-one years. His death was greatly lamented. His widow married Col. Thomas Marshall in 1795.

REV. WILLIAM WILLIAMS was born in 1688, the son of the Rev. William Williams, of Hatfield. He graduated at Harvard College in 1705 and was ordained pastor over the church in Weston November 9, 1709; he married, in 1710, Hannah, daughter of the Rev. Solomon Stoddard, of Northampton. She died in 1741, leaving eight children; Lucy, his fifth child, born in 1721, married, in 1743, the Rev. Joseph Buckminster. Mr. Williams organized the church in Weston. Mr. Williams died in 1760, aged seventy-two years.

PHINEAS WHITNEY, born in 1740; graduated at Harvard College in 1759; ordained in 1762 the first settled minister in Shirley, where he remained over fifty years—his salary was £66 13s. 4d. He was trustee of Groton Academy from its foundation till his death, in 1819, in his eightieth year.

CHARLES TRAIN, son of Samuel Train, of Weston, born in 1783; graduated at Harvard College in 1805; ordained a Baptist minister in Framingham in 1811, over the united churches of Weston and Framing-

ham. They separated in 1826, Mr. Train remaining in Framingham, which position as pastor he held until 1839. He was preceptor of Framingham Academy in 1808 and afterwards a trustee. He represented the town in 1822 for six years at the General Court and was afterwards a State Senator. He was active at that early date in the cause of temperance, and it was by his active initiation that we owe our State Library. In 1833 he met with an accident which incapacitated him from active life until his death, which occurred September 17, 1849. His son, Charles R. Train, graduated from Brown University in 1837; he was a prominent lawyer, at one time district attorney and State Senator.

ARTHUR TRAIN, son of Samuel and brother of Charles, born in 1772, married Betsey, daughter of Joseph Train, of Weston, November 30, 1797.

CHAPTER XXXV.

NATICK.

BY REV. JOHN F. NORTON, A.M.

NATURAL FEATURES AND PRODUCTIONS.

THIS town is situated in the southern part of Middlesex County, seventeen miles west of Boston and twenty-three miles east of Worcester. Its boundaries, which have been repeatedly changed since 1650, when it became an Indian plantation, are somewhat irregular. On the north lies Wayland, on the northeast Weston, on the east Wellesley, on the south Sherborn, on the southeast Dover, and on the west Framingham. In shape the town forms an irregular triangle.

The name Natick is doubtless of Indian origin and signified, in the language of the aborigines, as is generally supposed, "The Hilly Place." If so, it was appropriately given to this locality, where the hills are so numerous and so prominent a feature of the landscape. These hills are by no means as long and steep as are found in the mountainous portions of our Commonwealth; still not a few of them are notable for their size and height, and, interspersed as they are between the lakes, the plains, the valleys and water-courses of the town, greatly diversify and beautify its scenery in almost every direction. Of these, Peagan Hill is the best known and the highest. This lies in the southern part of the town and commands a magnificent view of the valley of Charles River and extensive regions beyond, while from no other height in this vicinity is the general prospect so grand and imposing.

Walnut Hill, upon the southern slope of which a considerable part of the large central village of Natick is built, gives from its summit the best view of the thickly-settled portion of the town, as well as of picturesque Lake Cochituate, and of the regions at the north, including Mount Wachusett and "Grand Monadnock," the great isolated mountain of Southern New Hampshire.

Other hills of less note are found in almost every section of the town, and the drives to the summits of and among these are remarkably pleasant.

There are three plains in the town, originally named Eliot Plain, upon the banks of Charles River, in South Natick; Peagan Plain, where the central village is chiefly located, and Boden Plain, in the north-west part of the town, so named to perpetuate the memory of William Boden, Esq.

The soil of Natick is fairly good, and, fifty years ago, nearly all the people were frugal and thriving farmers. Some of the most productive farms of that period are now covered by the populous central village, particularly those of Rev. Martin Moore, Dr. John Angier, Ruel Morse, Abel Perry and Capt. David Bacon.¹ At the present time the manufacturing interests of Natick render farming a matter of secondary importance in the public estimation, but its farms are not neglected and cannot be without affecting adversely the town's prosperity. The land produces large crops of grass, of the cereal grains and of potatoes, all of which find here a remunerative market.

Much attention has been given of late years to the cultivation of fruit. The apple orchards are generally prolific, while the soil and climate seem especially adapted to the growth and perfection of pears and grapes. All kinds of pear trees grow luxuriantly and nearly every year bear heavily. Nearly all the newer varieties of grapes are found in the yards and gardens, and climbing the sides of the houses and barns of Natick, while the older varieties, like the Concord, are still valued highly and largely cultivated. The small fruits, like the strawberry and raspberry, abound here in great perfection.

The rocks and ledges of this town afford material for roughly constructed walls, but nothing sufficiently fine for ornamental and monumental purposes. The quarries of Milford and Holliston are chiefly depended upon to furnish underpinning stones for the public buildings, the business blocks and all the better class of dwelling-houses, while those of the Connecticut Valley and of Southern New Hampshire afford the finer material for the numerous and large brick structures that have been erected during the last fifteen years.

Originally Natick was covered with a heavy growth of forest trees, among which the oak, the walnut, the chestnut, the elm and the maple were conspicu-

¹ Bacon's "History," page 149.

ous. Some trees are now standing in this town that have acquired not a little notoriety, the chief of which is "the Eliot Oak," that stands a few rods east of the Unitarian Church in South Natick. This is a white oak and of great antiquity. A century ago there were three large oaks in the centre of that village, forming a triangle. Under one of these Eliot gathered the Indians together and preached to them in 1650, as we shall presently see. One of these three trees, which was a red oak, was removed, probably near the opening of the present century. The second of these trees, which grew near the site of the drinking fountain in that village, was a very large tree and considerably decayed fifty years ago. This was a red oak and was cut down May 25, 1842.

Whether the last-mentioned tree was the real Eliot Oak, or this name properly belongs to the immense and venerable tree now standing, is a question that has been much discussed, but apparently decided in favor of the latter tree, for the following reasons: The red oak is well known to be a tree of rapid growth, and it has been computed that it comes to its growth in about one hundred years, and that in one hundred additional years it may be expected to fall from decay. On the contrary, the white oak grows very slowly, and does not reach its full size in less than three hundred years, and will remain in this condition of apparently perfect or nearly perfect health for three hundred years longer, and may be expected to live nine hundred years.

The tree now standing is doubtless the real Eliot Oak, for its competitor for this honor, the second of the red oaks, could hardly have been more than a sapling two hundred years before it was removed.¹

The Charles River is the only river of Natick. This flows through the southern part of the town, and has been computed to cover in its course through Natick about one hundred acres of territory. At the rapids in South Natick it has long furnished valuable water privileges. Much of the water is taken from this river below Natick, before it reaches the ocean—as much, it is thought, as it receives from the brooks flowing into it in that part of its course. Broad's Hill divides the waters emptying into Charles River from those that reach Lake Cochituate, and these meet in the Atlantic through the channels of the Charles and Merrimac.

None of the brooks of Natick are large, but some of them, like Sawin's and Bacon's, have long furnished sites for mill purposes.

The Sawin saw-mill (the location of which was once changed because its dam injured the great meadows in Medfield) was built by John Sawin about 1720. This was a great boon to the Indians, especially after there was added to it a corn-mill. Peagan Brook, which coming from the east, and, flowing

through the central village nearly parallel with the track of the Boston and Albany Railroad, empties into Lake Cochituate near its south-eastern corner, has acquired not a little notoriety by the recent litigation between the city of Boston and citizens of Natick touching the alleged pollution of the waters of the lake through the discharge of sewers into this stream.

Lake Cochituate, a large part of which lies in Natick, and from which the city of Boston receives much of its water supply, covers about six hundred acres of territory, and, with its windings, is nearly seven miles in length. Its opposite shores, in some places, approach within a few rods of one another, and while certain parts of it are comparatively shallow, in other places the water is nearly or quite seventy feet deep. The water from this lake is conveyed through the north part of Natick in its course towards Boston, while through the south part of the town and by means of another aqueduct the supply from the Sudbury River reaches the same city. In the latter structure is a very long tunnel under the high hill northwest of South Natick village. Lake Cochituate is a very attractive sheet of water.

South of Cochituate lies Dug Pond, so named, doubtless, because of its abrupt and regular shores, giving it the appearance of having been excavated by human processes. In extent it covers not far from fifty acres. From this pond, which is deep and clear, the water supply of Natick is taken, the steam pumping machinery on its northern shore raising the water and driving it through the village into a spacious reservoir upon a high hill east of the same. The water in Dug Pond is the product of springs in it, and not of streams emptying into it from the adjoining territory. The pond is separated from Lake Cochituate by a very narrow neck of land, but the water in the former is some feet higher than that of the latter. Less public interest attaches to the other ponds in Natick, of which there are a number.

The waters of Natick formerly supplied the inhabitants of the region with various kinds of fish, which were taken in great numbers. When Rev. Mr. Eliot established the Indian Plantation at South Natick he found that the fishing interest of the aborigines around the rapids of the Charles River had become a business of considerable and acknowledged importance. Before dams were built across the Concord River, and the city of Lowell grew up around the rapids of the Merrimac, the shad and some other kinds of fish that live a part of each year in the ocean, found their way into Lake Cochituate, and were taken from it in large quantities. Animals were fed with them, as well as men, we are assured, and the ancient records of Natick show that officers were annually chosen to superintend the fisheries of the parish, a part of whose duty it was to prevent strangers and all unauthorized persons from taking fish from the lake.

Among the destructive wild animals that were found in this region two hundred and fifty years ago

¹ See the pamphlet issued by the Historical, Natural History and Library Society of South Natick, 1881, p. 56.

the bear and the wolf were the most common, but, as these had no strongholds in the sides of precipitous mountains, to which they could flee when pursued by hunters, they were easily and quickly exterminated.

Among other animals which the region produced when white families began to settle in this place, the deer, the moose, the fox, the otter and the beaver may be mentioned, and the hunting and trapping of the fur-clad portion of these had furnished for a number of years before a somewhat lucrative employment for the Indians of the Natick Plantation. Waban, the chief, who removed, with a large part of his followers, from Nonantum to Natick in 1650-51 (as we shall presently see), was an Indian trader—in other words, a dealer in furs and skins—and in the first public building erected on this ground, a portion of the second story was used for the storage of Waban's merchandise. And later, when a new meeting-house was erected for the Indians, in 1721, we learn that the workmen were "pay^d every Saturday," and for their labor "rec^d 213 Beavers." Sometimes the skins appear to have been counted in the process of trade, and sometimes sold by weight; and, certainly, the animals that furnished such quantities as we read of must have been numerous.

CHAPTER XXXVI.

NATICK—(Continued).

INDIAN SETTLEMENT, 1650-1700.¹

NATICK is a historic town, and its early history, for the space of nearly one hundred years, is almost wholly unlike that of any other town in the Commonwealth.

In the charter of the Massachusetts Colony that came to New England in the year 1630, we are told that one of the objects which it was expected would be accomplished by this movement was the physical, mental and moral elevation of the ignorant and barbarous Indians who inhabited the region. Other matters occupied the attention of the Colony for a number of years, but in 1646 an act was passed by the

General Court of Massachusetts, which was designed to promote the evangelization of the aborigines of the Commonwealth. This matter was commended particularly to the pastors and leading men in the churches that had been organized.

The man before all others to take the lead in this movement was Rev. John Eliot, the minister in Roxbury. Born of religious parents at Nasing, Essex County, England, in 1603, he had been educated at the University of Cambridge, where he was matriculated in 1619, with the reputation of being an excellent grammarian and fond of philological studies in general. His purpose at that time was to enter the Christian ministry as soon as might be, but he was a non-conformist, and non-conformity in those days subjected a man who would be a religious teacher to the most severe disabilities. Rev. Mr. Hooker, who, at a later period, was the eminent first pastor at Hartford, Ct., had recently been silenced for non-conformity. Mr. Eliot was taken into Mr. Hooker's family, and made an usher in a grammar school which the latter, had established; but, according to the historian Neal, Eliot was "not allowed to teach school in his native country."

Under these circumstances it was only natural that he should seek a refuge and home in the new world. November 3, 1631, he landed in Boston from the ship "Lyon," that brought over with him the wife and children of Governor Winthrop. Rev. John Wilson, pastor of the First Church in Boston, was at this time in England attending to the settlement of business affairs in which he was concerned, and Governor Winthrop, with two other laymen, was conducting the services of the church in the absence of the pastor. Mr. Eliot was at once invited to preach there, and so acceptable were his labors, that the people were very unwilling to give him up when, to fulfill his promise made to friends in England who were anticipating a removal to the Massachusetts Colony, he settled in Roxbury, these friends having arrived from the mother country and being ready to abide by their part of the engagement.

November 5, 1632, Mr. Eliot became the minister at Roxbury, and continued such till the time of his death, May 20, 1690. His colleagues at different times were Messrs. Welde, Danforth and Walter. Mr. Eliot was now twenty-eight years of age, and remarkably well fitted to take the lead in the great enterprise of civilizing and christianizing the Indians. It was a formidable undertaking, so low were they in ignorance and barbarism.

Anticipating his mission, as early as 1641 Mr. Eliot entered on the difficult task of learning the Indian language, particularly the Mohegan dialect, which was spoken generally by the Indians in Eastern Massachusetts, securing for aid the assistance of an Indian who could speak English, and whom he took into his family. In a few months he could converse somewhat in the Indian tongue, but some years

¹ The authorities consulted in preparing this portion of the "History of Natick" are as follows: "Life of John Eliot," by Professor C. Francis; "The White Oak and its Neighbors," by Sarah S. Jacobs—better known by the title, "Nonantum and Natick"—"Temple's History of Frammingham," very full and reliable upon the Indian history of this region; the "Histories of Natick," by William Biglow, Oliver N. Bacon, Rev. Martin Moore and Rev. S. D. Hosmer; "Manual of the First Congregational Church of Natick," by Rev. Daniel Wight, a work carefully prepared, full and reliable; Drake's "Old Indian Chronicles;" and the collections of the Massachusetts Historical Society. These authors agree substantially in all their statements of facts, and these facts will be given in this sketch without the usual references to particular authorities. Due credit will accompany all direct quotations. The Indian apostle, Eliot, was a voluminous writer, and the same may be said of his ministerial contemporaries in Boston and its vicinity.

elapsed before he could trust himself to preach a sermon to the natives. His first Indian discourse was given at Nonantum, October 28, 1646.

Nonantum was an Indian village in the northeast part of what is now the city of Newton, bordering on Watertown. Waban (*the wind*), with his wife and a company of his followers, had come to this village not long before from what is now Concord, and at the time of which we are speaking he was the chief of the Nonantum settlement. This Waban is described as "the chief minister of justice among them," and was regarded as well disposed toward the project of giving instruction in morals and religion to the Indians. His son, at Waban's suggestion, was at this time attending an English school in Dedham, but came over to Nonantum to be present at the meeting above mentioned.¹ Notice having been previously given of this gathering for a religious service, Mr. Eliot and his companions were met not far from the wigwams by Waban and other Indians, who respectfully saluted them and conducted them to the dwelling of their chief, where a considerable audience had assembled.

Mr. Eliot took his text from Ezekiel, chap. xxxvii. 9, 10, "Prophesy unto the wind," etc., and when it is remembered that "Waban" signified "wind," we may well suppose that the chief made a personal application of the entire discourse, which occupied one hour and a quarter. In the course of the sermon the ten commandments had been recited and explained, and the whole matter made as practical as possible. Then followed a series of questions and answers from both parties, and after three hours had been spent at this first religious meeting of the Massachusetts Indians the services closed. At the request of Waban and his company, the service was repeated two weeks later in the chief's wigwam, and this was followed by a third and fourth meeting, all of which seemed to leave good impressions on the minds of the Indians.

Meanwhile, under Mr. Eliot's direction, the temporal affairs of this people began to show a marked improvement. Fences were made, ditches were dug, and something like a system of good husbandry introduced. The squaws learned to spin; the markets of the English began to be supplied with brooms, baskets, berries, fowls and fish, brought in by the Indians.

About the same time, or soon after, Mr. Eliot commenced holding religious services with the Indians at Neponset, but these were attended with less to encourage him than the meetings and visible improvement in temporal matters at Nonantum afforded. He also visited the natives at Concord, and later on an Indian town was constituted and named Nashobah, where one of Eliot's followers, an Indian teacher, conducted religious worship for a time.

It may here be stated that at this stage of his mis-

sionary labors, and during some years after, Mr. Eliot preached to the Indians in so many places in the eastern part of Massachusetts, and such results followed his labors, that as many as fourteen settlements of Praying Indians are named in the histories of those times. Besides those already mentioned, Punkapoag (now Stoughton), Hassanamesit (now Grafton), Okomakamesit (now Marlborough), Magunkapuog (now partly in Ashland), and Wamesit (now Lowell) are enumerated among the Christian towns or settlements. When we speak of these Indian towns we are not to picture to ourselves anything resembling one of our modern villages, with spacious and well-kept streets, lined with neat and attractive dwellings, but rather ten or twenty huts on the banks of a pond or stream, with a single room each, and this often partly under ground for the sake of securing warmth in winter, the whole so constructed that all valuable in or about it could be taken down and removed at a few hours' notice. All that has now been stated respecting the mission of Mr. Eliot seems necessary for a full understanding of the reasons that led to the Indian settlement in Natick.

Three or four years' labor in conducting his experiment at Nonantum were sufficient to convince this thoughtful and devoted man that he was laboring under serious disadvantages in endeavoring to civilize and christianize the natives in such close proximity to the English colonists. The white population was taking possession of the entire region within ten miles of Boston, and it was easily apparent that as society was then constituted, they and the Indians could not live and prosper in the same neighborhood. To say nothing of social habits and customs, which would prevent the two races from enjoying friendly intercourse, their different views of right and wrong made friction almost inevitable. The fences that the Indians put around their small gardens and corn-fields afforded but little protection against the cattle of the English, and after loss had been sustained, adequate redress was out of the question, while, notwithstanding the strictness of their laws, it must be confessed that the evil example of some of the colonists was demoralizing. According to the old historians, the Indians of New England knew nothing of drunkenness till the English began to settle in the region. The most reliable authorities state that they had nothing that could intoxicate before the coming of the white man; but when the taste for strong liquors had been once acquired, they became passionately fond of them, and would obtain them, if possible, at any cost.

As early as 1648 Mr. Eliot sent a petition to the General Court, asking that the sale of intoxicating drinks to the Indians should in Boston be confined to a single individual, and the order of the court was as follows: "On petition of Mr. Eliot, none in Boston to sell wine to the Indians except William Phillips, on fine of twenty shillings."

These exposures and troubles at Nonantum and

¹ See Francis' "Life of Eliot," p. 18.

elsewhere led Mr. Eliot to seek a more favorable location for the founding of an Indian town which should be a model settlement for the Praying Indians, and the headquarters of more general and better-directed efforts for their education and moral improvement. With this object in view, he seems to have explored, on foot or on horseback, the region of country west and southwest of Boston for the distance of twenty or twenty-five miles before a suitable place was discovered. To his great joy such a place was at length found upon the banks of the Charles River, about seventeen miles west of Boston.

This locality he deemed very favorable for many reasons. It was at a sufficient distance from the English settlements to remove the Indians, certainly for a time, from the inconveniences and exposures to which they had been subject at Nonantum, and yet was so near Roxbury that Mr. Eliot could go back and forth without great fatigue, or making serious inroads upon his valuable time. Besides, there was a large tract of fertile meadow-land upon the banks of the Charles River, at the place selected, already cleared—either by the beavers or by the annual burning of the grass and bushes by the Indians—so that the important business of husbandry could be commenced at once.

The selection of the place for the new settlement was made in 1650, and Mr. Eliot seems to have invited the Praying Indians in all the region, and all others who were disposed to join them, to remove to the new locality. During the summer of that year he sent men to cut and cure the heavy grass on the meadows, that there might be an abundance of hay for his horse during the autumn and when the spring of 1651 should open. A considerable number of Indians from Nonantum and other places removed at once to the new settlement named "Natick" (the hilly place) for reasons already given.

Measures were immediately taken to secure for the Indians a legal title to the land they had been invited to occupy. As early as 1636 (as it appears from the "Mass. Col. Records") the General Court had granted a tract of land five miles square, on the northerly side of Charles River, to the town of Dedham, and this tract embraced most, if not all, the territory now covered by the towns of Natick and Wellesley, and a part of Sherborn. Mr. Eliot asked of Dedham 2000 acres of this land, which was given, and by the General Court set apart as "The Indian Plantation at Natick."

But this did not satisfy Mr. Eliot's ideas of strict justice, for a considerable part of this territory was already occupied by others whose claims he would not disregard. This part was "the inheritance of John Speene and his brethren and kindred," and these Indians were in possession. There is, in the office of the town clerk at Natick, a paper supposed to be in Eliot's handwriting, under date of 1650, which sets forth the mode in which this matter was satisfac-

torily settled:¹ "Because all those Lands, or a great part, at least, which belong to Natick, were the inheritance of John Speene and his brethren and kindred; therefore, we thought it right that he and all his kindred should solemnly give up their right therein before the Lord, and give the same unto the publick interest, right and possession of the Towne of Naticke. They were all very willing so to do, and therefore, on a lecture-day, publickly and solemnly, before the Lord and all the people, John Speen and all his kindred, friends and posterity, gave away all their Right and interest, which they formerly had in the Land in and about Natick, unto the public interest of the towne of Naticke, that so the praying Indians might then make a towne; and they received nothing to themselves, saving interest in their wyers, which they had before put; for Lands they would only take up lots, as others did, by the publick order and agreement of the towne, and at the same time they received a gratuity unto their good Contentment."² Following the above, and on the same page, is another similar document from another family, which the historian (Biglow) declared sixty years ago was scarcely legible. The agreements were signed by John Eliot, Waban and sixteen other Indians as witnesses. Though there is some conflict of authorities respecting the exact dates of these conveyances, there is none respecting the facts as stated above.

It having been determined that the settlement should occupy both banks of the river, a foot-bridge became necessary, since during a part of each year the stream was too deep for wading. In the autumn of 1650 this bridge was built in a substantial manner by the Indians, who, up to this time, had never accustomed themselves to such severe and protracted labor. The structure was eighty feet long and nine feet high in the middle, and built in the form of an arch. When it was completed, Mr. Eliot is said to have called the workmen together for a religious service and to praise them for their industry, zeal and success. He offered to pay them if any desired wages for their work, but all declined the offer, being fully satisfied with the part they had performed in promoting the public convenience and safety.

In the spring of 1651 the work of building was resumed, and an Indian village of considerable size appeared upon both banks of the river. Seed was sown or planted, fruit trees were set out, and soon the Indians were engaged in putting up a house in the English style for their school during the week and for religious services on the Sabbath. This house is described by Mr. Eliot and others as fifty feet long, twenty-five feet wide and twelve feet high between the joists, and two stories high. A white carpenter

¹This is probably the most ancient of the Indian records which the town of Natick has in its keeping. Some of it is deciphered with difficulty; but the most important part was copied into a substantial record-book some years since by Austin Bacon, and this the town will preserve.

²Biglow, p. 23.

was employed for a very short time to direct about the framing and raising, but otherwise the entire work was done by the Indians. They felled the trees and hewed the timber for the frame, carrying it on their shoulders to the foundation already prepared, and finished the structure, not in elegant style indeed, but in such substantial work as called forth the commendations of visitors. The lower story was fitted up for the school and for religious gatherings, while above was a spacious room for the deposit of Indian valuables and especially for the skins, etc., belonging to Waban, who was in his way a trader. Another part of the second story furnished a comfortable study for Mr. Eliot when, as was often the case, he came over from Roxbury and passed a number of days at the Plantation.

Whether this entire building was surrounded by tall trees stripped of their branches and set close together in the ground, after the manner of the early forts in New England, it seems difficult to determine; but either around it, or in close proximity to it, such a fort was constructed and made capable of defence from hostile attack. It is supposed that for a considerable period, when the weather was favorable, their religious meetings were held in the open air, for we read that the Indians constructed canopies of mats attached to poles—one for the preacher and his attendants, others for the men and women respectively, the sexes being separated according to the custom of the times in English assemblies. The building described above was the first church edifice in Natick.

A few of the Indian homes resembled somewhat small and cheaply constructed English houses, but because of the expense attending their erection and the difficulty of warming them easily and sufficiently in the winter, most preferred wigwams like those in which they were born. These were located on the banks of the river on three streets, two on the north side of the stream, and one on the south side. House lots were measured off, one being assigned to each wigwam, and soon fifty or more Indian families were established in homes which at least were deemed comfortable, and which were really a great improvement on the filthy and crowded huts of their childhood.

The Indians were encouraged in every possible way to adopt the customs of civilized life, while their intellectual and moral training received from Mr. Eliot the most constant and careful attention. With their new and spacious room for educational purposes a new era opened, and soon a large number were engaged in study and making, according to all reports, commendable progress. An Indian by the name of Monequassen, who had been for some years under training, was engaged as teacher. Governor Endicot and Rev. John Wilson, of Boston, testified at the time respecting the good qualifications of this man for his work. He could read, spell and write English as well at least as most of the English teach-

ers of that day—while all his instruction was given under the general superintendence of Mr. Eliot. As to the Sabbath services, we learn from Gookin that "upon the Lord's days, fast days and lecture days, the people assemble at the sound of a drum (for bells they yet have not) twice each day."¹

This school at Natick, Mr. Eliot plainly designed as a seminary for the higher education of the brightest and most promising among the Indian young men of his acquaintance, that such might be fitted for instructors in less favored localities; and in this respect his hopes were at least partially realized. It was early discovered by this sharp-sighted, as well as devotedly pious man, that the exhortations of the Indians in their own tongue had a remarkable effect, especially upon strangers who might be present at their religious meetings (and the presence of such was not uncommon), and so he established the custom of selecting two of the scholars for each Sabbath "to exercise," as it was termed; that is, to repeat portions of the Scriptures as he read them, to offer prayer and to give, in their own language, the substance of his discourses. Mr. Eliot himself catechised the adults when he was present on the Sabbath, as he often was, for many years, while the children were catechised by Monequassen.

The material, intellectual and religious concerns of the Plantation having been provided for by these arrangements, Mr. Eliot now directed his attention to the mode of civil government which it would be best for the Indians to adopt. Though, in a sense, they were not absolutely independent, but were subject to the laws of the English colony, it seems to have been expected on all sides that they would adopt what we may call municipal regulations of their own, and the form and scope of these became, at a very early day, a serious matter.

Under his supreme regard for the authority of the Bible, Mr. Eliot's ideas respecting the best form of civil government differed from those entertained by most of the Puritan leaders. In one of his letters to friends in England, he exclaimed, "O the blessed day in England when the Word of God shall be their Magna Charter and chief law-book, and when all lawyers must be divines to study the Scriptures."

Entertaining such views, it is not surprising that Mr. Eliot proposed to the Indians that for the fundamental law of the Natick Plantation they should adopt the Mosaic code so far as it relates to civil officers. "England," he assured them, "did flourish happily under that kind of government," alluding, as Professor Francis supposes, to King Alfred's institutions, after he had expelled the Danes from Great Britain.

There appears to have been no objection on the part of the Indians to this proposal of Mr. Eliot. August 6, 1651, a general meeting of the Praying Indians was held in Natick, but how far those who

came from the other Christian settlements participated in this election of civil rulers we are not informed. The most we know is that a ruler of a hundred, two rulers of fifties and rulers of tens were chosen after Mr. Eliot had prayed and expounded to them the eighteenth chapter of Exodus. For the ruler of one hundred, Totherswamp was selected, who was a man in the prime of life, distinguished for uncommon ability and moral worth. Waban, to whom the reader has been already introduced, was chosen one of the captains of fifties. Ten captains of tens were also elected, and these Mr. Eliot denominated *tithingmen*, after, as he informs us, the custom of the mother country, when, for a little time, a similar form of government prevailed there. Then each man was requested to name his leader among the tithingmen, and, this being done, the organization of the civil government was complete. A day was named for entering into a solemn covenant with God, which was also a day for fasting and prayer. When first the rulers and then the people had taken upon themselves the solemn vow to live according to the commands of the Most High, Mr. Eliot's heart was full of praise and thanksgiving.

To show how these rulers demeaned themselves in office, the following incident may be related: Totherswamp, or Toteswamp, as he was sometimes called, the ruler of the hundred, had sent his son, a boy of eleven years, to one of the settlements nearer Boston to purchase some supplies. The lad found in that place three of the most vicious from the Praying Indians, who were making themselves drunk upon several quarts of strong liquor which they had obtained from the English. One of these men gave the boy a little rum in a spoon, and another forced him to drink from a bottle till he was thoroughly intoxicated; then they cried out, "We will now see whether your father will punish us for drunkenness, since you are drunk as well as we." Then a fight commenced among the intoxicated Indians, and the boy did not return home till the next day. The news of their shameful proceeding reached Mr. Eliot just as he was leaving his Roxbury home to pass the Sabbath in Natick, and he was almost overwhelmed with grief, particularly as one of the offenders had been employed by him as an interpreter, and was depended upon to aid in translating the Bible into the Indian language. The rulers were wisely left to try the case. The position of Toteswamp was especially trying, but in the final decision the just magistrate, rather than the father, prevailed. His boy, he said, had often been warned against being found in the company of the wicked, so that, though grievously sinned against, he was far from being guiltless, and deserved punishment. After mature deliberation the verdict rendered was as follows: The three chief offenders should sit in the stocks a long time, and then receive thirty lashes each at the whipping-post, while the boy should sit in the stocks a little while, and then

be whipped by his father in the school-room, in the presence of the other Indian children—and this verdict, we are assured, was faithfully carried out.

In 1658, the tract of 2000 acres constituting the Natick Plantation being deemed too small, Mr. Eliot petitioned the General Court for an enlargement and readjustment of its boundaries. His petition led to the appointment of a committee "to lay out convenient bounds to Natick, out of the common lands adjoining, and also to treat with Dedham, and compound with them for such lands as lye adjoining to y^e said place, and seemed to be necessary for the Indians." This committee laid out and assigned to the Indian settlement a large tract of land lying north and west of the 2000 acres which had been donated by Dedham in 1650. But about 4000 acres of this tract were claimed by Dedham, and this town appealed to the General Court for redress. A committee was appointed in May, 1662, "to make final issue of the controversy between the town of Dedham and the Indians at Natick." About a year later this committee reported, when the General Court "judgeth it meete to grant Dedham 8000 acres of land in any convenient place or places, where it can be found free from former grants; provided Dedham accept this offer." Dedham appears to have been satisfied with the arrangement, for two years later these 8000 acres were laid out for Dedham, at Deerfield, in the valley of the Connecticut River.

The settlement appears to have prospered until 1675, and it was estimated a little before this date that the whole number of Praying Indians, chiefly in the Province of Massachusetts, amounted to 3600, of whom 300 at least belonged to the Natick community.

We come now to the sad part of this Indian history. King Philip was the son of Massasoit, with whom the Pilgrims at Plymouth made a treaty that was carefully observed for more than fifty years. Philip was ambitious, crafty and unscrupulous to the last degree. Deeming himself grievously insulted and wronged by the whites, he attempted to unite all the Indian tribes in Southern New England in an effort to exterminate the colonists; and in this attempt nearly succeeded. So general was this alliance that all the Indians in this part of the country fell under suspicion and were carefully watched. A few from the Natick Plantation were induced to join Philip, but the great body of the Praying Indians turned a deaf ear to his appeals and remained loyal to the whites. But nothing could appease the jealousy and calm the fears of the English.

Orders were soon issued for the arrest and removal of the Praying Indians of this vicinity. Captain Tom, who was among the early residents of the Natick Plantation, and one of the most respected of the converts, was seized at Grafton and taken to Boston, tried and condemned to be hung before Mr. Eliot was aware of his peril. "I went to

the prison to comfort him," wrote Mr. Eliot. "I dealt faithfully with him to confess if it were true whereof he is accepted, and for which he is condemned. I believe he saith truth." Mr. Eliot was with him at his execution: "On the ladder he lifted up his hands and said: 'I never did lift up hand against the English.' No doubt Captain Tom was innocent.

A Captain Mosely commanded the troops that were sent to seize the Praying Indians at Marlborough. Arriving in the night, the soldiers surrounded the fort, seized the Indians, tied their hands behind them, connected them together after the manner of the slave-drivers of a generation ago, and hurried them off toward Boston. In Oct., 1675, Captain Prentiss, with a company of horsemen, seized the Indians on the Natick Plantation. No resistance was offered by the two hundred men, women and children who were then living peaceably in Natick, but they collected together a part of their goods, deposited them in the carts which the military had brought, and marched under the leadership of their captors to the place now occupied by the United States Arsenal at Watertown. At that point Mr. Eliot met them and did all in his power to comfort and cheer them in their great sorrow. The tide serving, at midnight they were taken on board some barges and removed as rapidly as possible to Deer Island, in Boston Harbor.

The Court had directed the county treasurer "to take care for the provision of these Indians," so as "to prevent their perishing by any extremity;" but the winter following was terribly severe, the snow was deep, their clothing was insufficient, and from all accounts their provisions barely served to prevent starvation. When visited by Mr. Eliot and Mr. Gookin, during the month of December, 1675, they were found patient under their trials, but suffering greatly.

This whole proceeding on the part of the officials at Boston was cowardly and cruel in the extreme. Their plea that their action was taken as well for the safety of the Indians as for their own, was a subterfuge unworthy of reasonable men, and cannot be condemned too severely.

As to the Natick Indians, eight in number, who were found with Philip's warriors and taken prisoners by the English, all were condemned to die, after several trials.

"Meantime," says the old Indian chronicle, "Mr. Eliot and Captain Guggins (Gookin) pleaded so very hard for the Indians that the whole Council knew not what to do about them. They hearkened to Mr. Eliot for his Gravity, Age and Wisdom, and also for that he hath been the chief Instrument that the Lord hath made use of in Propagating the Gospel among the Heathen; and was their Teacher till the time that some Indians were brought up in the University to supply his place. But for Captain Guggins, why such

a wise Council as they should be so overhorne by him cannot be judged otherwise than because of his daily troubling them with his Impertinencies and multitudinous Speeches, insomuch that it was told him on the Bench by a very worthy Person (Captain Oliver) then present, that he ought rather to be confined among his Indians than to sit on the Bench.

"But so it was that by one and two at a time most of these eight Indians (and four were sent afterwards on the same account) were let loose by Night."

Plainly the writer of the above was influenced by strong prejudices, for Mr. Gookin, as superintendent of the Indians that acknowledged fealty to the General Court, was not only benevolent, but wise and discreet.

The Natick Indians imprisoned on Deer Island appear to have been divided into four companies in 1676, and placed under the care of Englishmen in different towns of the Province. The first company were sent to Medford to James Rammeny Marsh—twenty-five men and twenty-five women and children. The second company, we are told, "live near Natick adjoining to garison-house" of Andrew Dewin and his sons—ten men and forty women and children. The third company, "with Waban," seem to have been placed under the care of Joseph Miller and Captain Prentiss, "neare the Falls of Charles River"—twelve men and fifty women and children. The fourth company were "at Nonantum," on land belonging to John Cooms, and were employed by him and others on their farms—fifteen men and sixty women and children. Total, two hundred and thirty-seven. Besides these, about thirty were "put out to service to the English," "three were executed," "above twenty ran away."

The death of King Philip, who was shot by a treacherous Indian in August, 1676, brought to an end this most cruel and destructive war which he inaugurated, and some of the Natick Indians soon began to return to their homes; but sickness and death had greatly reduced their numbers. Mr. Eliot bore the most ample testimony to their patience, forgiving spirit and adherence to Christian principle under their sore trials. But they came back poor and disheartened. To repair the wastes occasioned by their enforced absence for a year or more was not a pleasant undertaking.

Their school and religious services were resumed, for their old friend and guide was yet among them when the feebleness and infirmities of old age would permit; but while they were in a measure prosperous during the last twenty years of the seventeenth century, they never recovered from the shock experienced through the unjust and cruel treatment received at the hands of the officials of the Province.

¹Quoted from Shattuck's Manuscript by Biglow, but greatly condensed as given above.

CHAPTER XXXVII.

NATICK.—(Continued).

1700-1800.

Anomalous Condition of the Township—Change in the Indian Government—Their Records—Population—Acts as Proprietors—Allotment of Lands—Side of the Same—Natick as a Parish—Acts of General Court Relating to it—Parish Meetings—Warning Out of Town—In the Revolutionary War—Parish Declaration Regarding Independence—Natick Soldiers—Oath of Allegiance—Town Incorporated.

DURING the early part of the period indicated above, the condition of Natick was anomalous. At the opening of the eighteenth century it was simply an Indian settlement, as it had been for fifty years. The land was owned by the Indians, and so far as it was cleared and cultivated this was done by the Indians. They claimed the fish in the lakes, ponds and streams, and, so far as municipal government was maintained, the laws were made and executed by the Indians. Their school had an Indian teacher and their Sabbath services were conducted by one of their own nationality. And yet it is plain that their contact with the whites was gradually modifying their characters and nearly all their habits and customs. After the trial of the Mosaic Code, to a greater or less extent, for nearly half a century, they were ready to substitute other officers for their captains of hundreds, fifties and tens.

Many of them had learned to write and one, at least, had become a skillful penman, as the stray leaves of their records now in the office of the town clerk of Natick attest, though the items contained in these are generally without date and largely in the Indian language. Before 1719 they were transacting their public business like any of the neighboring towns and recording their proceedings in the most methodical and legible manner.

How many there were of the Indians who regarded the Natick Plantation as their home, from 1700 to 1725, it is impossible to determine. In 1678 there were 212 "Praying Indians" in Natick, and about ninety years later there were only thirty-seven. The historian Bacon records a tradition that about the year 1700 three hundred Indians paraded at an Indian training in this place. It must not be understood that all of these belonged in Natick, for in the most prosperous days of the plantation, just before King Philip's war, it is doubtful whether the entire adult population of the place equaled this number.

If this parade ever took place, the three hundred Indian soldiers must have come largely from other Indian settlements in the region.

The Indians kept records of all their business as a plantation certainly after the year 1700, but a large part of these have perished.

Under the date of 1702 an account has been preserved of "a meeting of selectmen and principall Indians of the Town of Natick," to run certain bound-

dary lines. In 1708 a "Tything man" and constables were chosen, at which time Thomas Waban, son of the old Indian chief of Nonantum and Natick in 1650, was "Town Clerk," making his entries in the records in the best style of English town officers. In 1716 the town officers "were sworn in" as well as chosen, and this was, doubtless, a common proceeding. Later we have a "list of the hairees of the plantation or proprietary of Natick," and in this list thirty-three names are given. From 1728, in a separate record-book from the one about to be described, we have regular proprietors' records, which are made up largely of the acts of Indian committees in laying out lands, the whole being approved of and assented to by Francis Fullam, Esq. Mr. Fullam was, at that time, superintendent of such of the Indians as acknowledged fealty to the English government of the Province of Massachusetts Bay, having been appointed by the General Court. He resided in Weston, and for many years appears to have been present at most of the business meetings of the Indians, by whom he was highly esteemed.

The Indian committees for laying out lands often signed the surveys with their marks.

In 1733 Thomas Peagan, Jr., was chosen "Saxton," and by a vote of the meeting swine were permitted to go at large in the plantation.

William Robinson, of Sudbury, and Elizabeth Tom, of Natick, had their intention of marriage published June 7, 1735.

Going back a few years in the order of time, there is inserted here an Indian document of great importance. It is taken from their second book of records, and the whole entry is made in extremely beautiful handwriting, but by whom does not appear.

"At a General Town Meeting of ye Proprietors, Freeholders and Inhabitants of ye Town of Natick, Orderly Warned and Met together On Monday the 11th Day of May 1719.

"1st. In Order to ye better Stateing, Distinguishing, Knowing and Settling the Proprietors and Proprietees of ye Lands in Natick and rents of ye money of the Magunecog Lands, and also of the freeholders District from the other Inhabitants of Natick, also to order How ye Yearly Payments of ye sd Rents Shall be Recd for ye future of the Honble Trustees and paid to the Indian Propriety of Natick lands.

"2dly. To take Effectual care to prevent Stripping and Waste of Wood and Timber, Standing, Lying or Growing on ye Common and Undivided Lands in Natick or the Unnecessary Selling of ye Timber, Poles or Trees from Said Commons.

"3rdly. To Take Effectual Care that Each Person's allotment of ye Land in Natick, now Laid out and to be Laid out by Mr. Jones, Surveyor, be very Exactly & Truly Recorded, and that ye Surveyor be paid for Laying out of the Same.

FRANCIS FULLAM, ESQR., PRESENT AT SAID MEETING.

"Voted unanimously at the above Said Meeting That Abraham Speen, James Speen, Moses Speen, Josiah Speen, Isaac Speen, John Speen, Isaac Muniquasin, John Wamsamings heirs of, Capt. Thomas Waban, Thomas Peagan, Simond Ephraim, Benjamin Tray, Samuel Bowman, Saml Wills Right, Saml Onapatwin, Fannah Tabunug, Solomon Thomas in Magunecog Right, Israel Pimhamon alias Rummarsh, Samuel Abraham and also John Nesummin if he Live and Dye in ye Worke of ye Gospel Ministry in Natick, Shall be henceforward Allowed, Held, Reputed and Distinguished to be ye Only and true proprietors of Natick, to whom the Rents and the Money of the Magunecog Lands shall from Time to Time Hereafter be paid by such Person or Persons as Shall, in

behalf of the Indians, receive the Same of ye Trustees, & also the whole property or Right to all the Common and Undivided Lands in the bounds of the Town of Natick to be pd to sd Proprietors and their heirs for Ever, ye said Neesummin to have equal Share in sd Rent Money During his continuance in ye Ministry in Natick. Each Proprietor's proportion in the first Division of Lands to be as followeth."

Then follows the allotment of sixty acres of land to each of these proprietors, with the number of the page of the record-book upon which the surveys are recorded.

At the same meeting certain persons, to the number of twenty-seven, are designated to "be Known and Distinguished For Ever Hereafter," "by the name of freeholders," the same to have no right to any "Rent Money" or to any later division of land in said Natick.

To eleven of these were assigned severally sixty acres of land, to one fifty acres, and to each of the remaining fifteen, thirty acres; but upon what principle this distribution was made, we know not.

This action disposed of 2360 acres of the common land.

At the same meeting Francis Fullam, Esq., was constituted the agent of the Indians to receive and pay out their rent money, and to see that the above-mentioned allotments of land should "be very exactly recorded in the New town book."

To understand this matter of rent money, it should here be stated that the Magunkook lands lay originally beyond the western boundary of Natick, but by an exchange of territory with Sherborn, a part of them came into the possession of the Natick Indians. On the petition of Rev. Mr. Eliot, 1000 acres had been granted, soon after 1669, to this plantation, and he there established a school. Mr. Gookin speaks of "Magunkaquog as the seventh of the Old Praying Towns," and of there being "eleven families and about 55 souls" in the place. In 1715 the trustees of "The Hopkins Donation" asked of the General Court the privilege of purchasing of the Indian inhabitants of Natick "a tract of waste-land, commonly known by the name of Magunkaquog," and this petition was granted.

The territory thus acquired, with lands lying west of it, was incorporated in 1724 into a township called Hopkinton. An arrangement was made with the Indians that they should receive an annual rental for the lands which they parted with, and this was paid to their agent, and distributed by him among the Natick Indians for thirty-five years or more after the sale of the lands. The territory conveyed constitutes at this time portions of Hopkinton and Ashland.¹

The town officers appear to have been all Indians until the March meeting in 1733, when Thomas Ellis was chosen one of the tithingmen and John Sawin one of the constables. A year later (in the presence of Francis Fullam, Esq.) Thomas Peagan was chosen moderator, and David Morse town clerk, with

three Indians as selectmen. The other officers were divided about equally between the whites and the Indians.

The last clerk of the proprietors made his last entry in their records in 1787, and this informs us that, at that date, there were in Natick several small pieces of undivided land of no great value, which they desired of the General Court power to sell and liberty to divide the net proceeds among themselves. In 1764 there are said to have been in the township sixty-five white families, and it is stated that, at that time, the whites greatly outnumbered the Indians.

January 3, 1745, Natick was constituted a precinct, or parish, by the action of the General Court. By this change the responsibility for the regulation of the civil affairs of the township passed from the Indians to the whites, and the former lost what they may have deemed their citizenship. From this time onward no Indian held a town office, but considerably later, it is said, not a few of the white members of the church voted for an Indian as deacon.

1745. At this date the history of Natick as a township, as this term is generally understood, begins.

The action of the General Court by which this change was effected was as follows:

"In the House of Representatives, 3d Jan., 1745, voted that the Plantation known by the name of Natick, and lying in the County of Middlesex, be and hereby is erected into a Precinct or Parish; and the Inhabitants of Said Plantation are hereby endowed with all the Privileges, and subjected to all the Duties which the Inhabitants of other Precincts or Parishes, as such, are, by the laws of the Province, endowed with or subjected to; and whereas the said Plantation is not annexed to any township within this province, and cannot by law raise monies for laying out and maintaining their highways, for the support of their poor, and for maintaining a school; It is further voted that the Parish Assessors in sd Plantation, the Parish Constables, or Collectors, to collect all such sums as at a Parish meeting regularly warned for that purpose, shall be voted to be raised for the uses and services aforesaid, and the Parish Committee shall have the same Power in Said Precinct or Parish, with respect to the Privileges aforesaid, as the Selectmen of any town have by law in Such Town."

In this manner Natick became, for nearly all important purposes, a town under the name of a parish, and such it continued to be for the space of thirty-six years.

April 23, 1746 another act appears to have been passed, as follows:

"Whereas great part of the inhabitants of Natick are Indians and the minister there is in a great measure supported by charitable donations or funds for propagating the Gospel among the Indians and it is reasonable that the House for Public Worship should always be placed convenient for them, it is further ordered that no vote or acts of the sd Parish of Natick for altering the place of Public Worship shall be deemed valid or have any effect until they are approved by this Court."

This explains the reason why there was so much difficulty, for many years, in building a meeting-house and establishing public worship in the centre of the township, even after this part of the parish had become populous.

The General Court having provided for the first parish meeting, it was legally warned and opened by

¹ See Temple's "History," pp. 61-71.

David Morse May 12, 1746, with Ebenezer Felch as moderator.

The Parish Committee chosen consisted of Ebenezer Felch, Edward Ward, Captain John Goodenow, Lieutenant Timothy Bacon and John Coolidge. Ebenezer Felch was elected parish clerk, and, with Captain John Goodenow and Lieutenant Timothy Bacon, constituted the first Board of Assessors; John Bacon and Jonathan Carver were chosen constables, and the other offices belonging to the organization of a township were filled, including the choice of Thomas Sawin and Daniel Bacon as "deer reves."

The parish meetings, for years, were chiefly held in the meeting-house at South Natick. May 22, 1749, the building of a new meeting-house at South Natick having been previously determined upon, the parish voted "to give the Indians an equal privilege with them (selves) in a new meeting-house if they will meet with them," and the same year "two thousand pound, old Tenor," were raised "in order to the carrying on the work" of building. During nearly all of the time that Natick was a parish, movements were made to induce the Indian preachers at South Natick, Messrs. Peabody and Badger, to consent to the building of a church edifice in the centre of the town and the establishment of Christian ordinances here. Under the head "Ecclesiastical" of this historical sketch, those matters will be fully considered.

Under the date of February 15, 1749-50, we find the first of a long series of notifications regarding persons who came from time to time to Natick to reside:

"To Mr. Sumner Morse, constable of the Parish of Natick. We the committee of the S^d (Parish) of Natick being informed that Ebenezer Wilson and Jane Penneman, widow, are come to reside or dwell in this Parish, and not having been here eleven months, you are therefore hereby required in his Majesty's name forthwith to warn the above named persons forthwith to depart out of this Parish and stay no longer therein, and make return of this warrant with your doings thereon to myself as speedily as may be. By order of the Parish Committee.

"EBENEZER FELCH, Parish Clerk."

This warrant was immediately executed.

The parish records show that from 1750 to 1772 two hundred and twenty-six persons (beside "their children" in a number of instances), who had come to the parish to reside, received similar warnings to leave. In the later cases of this description the words "not permitted" are inserted in the warning, and in one instance the person named was "a Molatto Girl." From all this it would appear that in its early years the Natick parish did as some of the towns in New Hampshire, settled about the same time, were accustomed to do, viz.: they warned out every family that should come in to reside, no matter how high its standing might have been in the place from whence it came.

This proceeding, which seems to us so objectionable, was merely to comply with the law regarding strangers obtaining a residence in any particular locality, thus preventing the accumulation of paupers in any town or parish.

But whatever its purpose may have been, the whole matter must have had a disagreeable aspect, and the custom (except in special cases) seems to have been wisely discontinued after 1772.

For more than twenty years the records of the Natick parish furnish us but little more than a full and intelligible account of all that was done in the way of laying out roads, building bridges, establishing boundaries, raising and paying out money for public improvements and other matters of a similar nature.

The following from the parish records is of interest

"To the Selectmen of Natick:

"Gentlemen: These are to give Notice that I have taken in to dwell with me Abraham Parkhurst, his wife, Hannah, and five children, viz., Abraham, William, John, Hannah and Ruth, last from Waltham—under low circumstances, came to me the 13 day of Instant Sept.

"JAMES BEAL.

"Natick, Sept. 28, 1763."

This notice, recorded as it is, doubtless saved the family named from being warned out of the Parish, as Mr. Beal thus became responsible for its maintenance.

In 1774, when the oppressive acts of the British Government were awakening indignation and the spirit of resistance all over the land, this parish chose a Committee of Inspection and Correspondence "to carry into execution the agreement and association of the late respectable Continental Congress," and this important committee was composed of Captain John Coolidge, Mr. Peletiah Morse, Lieutenant William Boden, Captain Joseph Morse and Lieutenant Abel Perry. Of the doings of this committee we have no particular information, but, like similar committees all over the land, it had, in the course of a few months, all it could do in watching and reporting the movements of the Tories, and carrying into execution the plans and purposes of the Continental and Provincial Conventions.

May 12, 1775, the parish was called upon "to see if the inhabitants will provide Guns and Blankets for Soldiers that are going into the Service, that are destitute." In this case the action seems to have been in the affirmative. At the same meeting it was voted to relieve "Capt. Joseph Morse, Lieut. William Boden and Lieut. Abel Perry from being Selectmen" (or rather Parish Committee), because they were "going into the Massachusetts service," and to appoint "Lieut. Timothy Smith, Elijah Goodenow and William Bacon in their room."

Of the part borne by the people of Natick in the memorable conflict with the British, at Concord and Lexington, April 19, 1775, our knowledge is very limited. All that we know comes to us through the statements of the historian, William Biglow (1830), but as he had the facts which he gives us from eye-witnesses of, and participants in, the fight, they may be deemed reliable.

Earlier in the month intimations seem to have

reached Natick that a body of British troops were about to march upon Concord, and so the Natick soldiers were not wholly unprepared to leave at a moment's warning, and "every man," as one of the survivors expressed it, "was on that morning a minute-man." "The alarm was given early, and all marched, full of spirit and energy to meet the British. But few had an opportunity to attack them," because when the men arrived from this region, their enemies were in full retreat. "Cesar Ferret and his son John (from Natick), arrived at a house near Lexington Meeting-house, but a short time before the British soldiers reached that place on their retreat from Concord. The two discharged their muskets upon the regulars from the entry and secreted themselves under the cellar-stairs till the enemy had passed by."¹ These men escaped safely, but in the encounters of that day Captain David Bacon, of Natick, was killed.

All warrants for the parish meetings before May 20, 1776, had been issued in the name of His Majesty, the King of Great Britain, but from the date just given onward, the freemen met under the authority of the Government of Massachusetts Bay.

How many soldiers from this place participated in the battle of Bunker Hill, June 17, 1775, it is impossible to ascertain. The circumstances under which the place had been settled were such that the white population of the township at that time was small. So far as known, but one military company from Natick, and organized with Natick officers, was present at the Bunker Hill battle, but not a few soldiers from this place were connected with companies and regiments raised chiefly in the neighboring towns. Captain Baldwin, of Natick, fell at Bunker Hill, but how many others from this place met with a similar fate on that memorable day cannot be determined.

At a large parish-meeting June 20, 1776, of which Captain James Mann was moderator, the following action was taken :

"In Consequence of a Resolve of the late House of Representatives being laid before the town, setting forth their sense of the obligations which lie upon every town in this Colony, solemnly to engage to support with their lives and fortunes the Honorable Continental Congress, should said Congress, for the safety of the American Colonies, come into the measure of declaring themselves independent of the Kingdom of Great Britain; it was unanimously voted, that, in consideration of the many acts of the British Parliament, passed in diverse sessions of the same, within about thirteen years past, relating to said Colonies especially those within the two or three last years, by which every idea of moderation, justice, humanity and Christianity is entirely laid aside, and those principles and measures adopted and pursued which would disgrace the most unenlightened and uncivilized tribe of aboriginal natives, in the most interior part of this extensive continent; and also in consideration of the glaring impropriety, incapacity and fatal tendency of any State whatever, at the distance of three thousand miles, to legislate for these Colonies, which at the same time are so numerous, so knowing and so capable of legislating, or to have a negative upon those laws which they in their respective Assemblies and by their united representation in General Court shall from time to time enact and establish for themselves; and for diverse other considerations which for

brevery's sake we omit to mention—We, the inhabitants of Natick, in town-meeting assembled, do hereby declare, agreeably to the tenor of the before-mentioned Resolve, that should the Honorable Continental Congress declare these American Colonies independent of the Kingdom of Great Britain, we will, with our lives and fortunes, join with the other inhabitants of this Colony and with those of the other Colonies, in supporting them in said measure, which we look upon to be both important and necessary; and which, if we may be permitted to express an opinion, the sooner it is entered into the fewer difficulties shall we have to conflict with, and the grand objects of peace, liberty and safety will be more likely speedily to be restored and established in our once happy land.

"DANIEL MORSE, Town Clerk."

Rev. Stephen Badger was the chairman of the committee that drafted this declaration, and it will be noticed how unsparing it is in its arraignment of the blind and infatuated Government that, with an iron hand, was ruling the American Colonies. Nothing can better show how loyal to humanity, right and justice the people of Natick were in 1776.

The day before the Declaration of Independence was adopted by Congress in Philadelphia, viz.: July 3, 1776, a parish-meeting was held, of which Samuel Wells was moderator, when it was voted to give "Seven pounds as an additional sum to the bounty of seven pounds that the Colony gives to those that enlist into the Canada Expedition."

Then followed the Declaration of Independence July 4, 1776, a printed copy of which the Council of State ordered to be sent to all ministers of the Gospel within the bounds of Massachusetts, with the direction to read the same to their respective congregations "as soon as divine service is ended in the afternoon on the first Lord's Day after they shall have received it; after such publication thereof, to deliver the said Declaration to the Clerks of their several towns or districts, who are hereby required to record the same in their respective Town or District Books, therein to remain as a perpetual Memorial thereof."

This admirable arrangement was carried out, and so we have upon the ancient parish records, in plain but beautiful writing, a copy of the great declaration, page 147 and onward.

Then for the space of nearly seven years the action of the parish in its frequent meetings had respect chiefly to the raising of men and money to support the war for independence.

The following sets forth the spirit of the people of Natick during those years of trial :

At a parish meeting May 15, 1777, it was "Voted that the town grant money to pay the Charges of the Present war from the 19th day of April, 1775 (the date of the fight at Lexington), including the men that are or must be raised to compleat the Continental Army, and be assessed forthwith for the same."

To prepare clothing for its soldiers in the field called for the repeated action of the parish. May 22, 1780, the parish voted to pay to three individuals on the clothing account the sum of £235 10s.

The enlisting or hiring soldiers for the Continental Army continued till the close of the war, the treaty of peace being signed January 20, 1783. How many

¹ Biglow, page 11

soldiers Natick furnished to achieve our independence it is impossible to determine, and will be till the Revolutionary rolls, now in the possession of the State, shall have been arranged. No record is found of the deaths among the Natick soldiers during the Revolutionary War, but a considerable number must have fallen. The historian of Natick, O. N. Bacon (1856), gives us the names of a company from this place under the command of Captain James Mann, in Colonel Samuel Bullard's regiment, that marched on the alarm just before the battle of Bunker's Hill. These soldiers were paid for two days' services and allowed one penny per mile for travel, the whole bill amounting to £11. 8s. 9d. The other officers beside Captain Mann were Timothy Smith, lieutenant; Daniel Morse, ensign; and Oliver Bacon, Henry Loker, Elijah Esty and Hezekiah Broad, sergeants. The privates numbered thirty-four. Whether these men were actually in the fight June 17, 1775, is doubtful, for only a small part of the forces assembled from nearly every part of New England, were really engaged in the contest. The brief period of their service leads us to conclude that, as a company, they were not in the ranks when Washington assumed command of the army in and around Boston.

Though the document that follows is without date in the records, it probably belongs to that period of the history of Natick which we are now considering. It is entitled

"OATH OF ALLEGIANCE.

"We, the subscribers, do truly and sincerely acknowledge, profess, testify and declare, that the Commonwealth of Massachusetts is, and of right ought to be, a free, sovereign and independent State; and we do swear that we will bear true faith and allegiance to the said Commonwealth, and that we will defend the same against conspiracies and all hostile attempts whatsoever. And that we do renounce and abjure all allegiance, subjection and obedience to the King, Queen or Governor of Great Britain (as the case may be), and every other foreign power whatsoever. And that no foreign prince, person, prelate, state or potentate, hath or ought to have any jurisdiction, superiority, pre-eminence, authority, dispensing or other power, in any matter, civil, ecclesiastical or spiritual, within this Commonwealth, except the authority or power which is or may be vested by their constituents in the Congress of the United States.

"And we do further testify and declare, that no man or body of men hath or can have any right to absolve or discharge us from the obligations of this oath, declaration or affirmation.

"And that we make this acknowledgment, profession, testimony, declaration, denial, renunciation and abjuration, heartily and truly, according to the common meaning and acceptance of the foregoing words, without any equivocation, mental evasion or secret reservation whatsoever. So help us God. Hez. Broad, Thomas Broad, Joshua Fisk, Samuel Morse, Wm. Bigelow, Moses Sawin, Oliver Bacon, Samuel Morse, Jr., Thomas Sawin, Jr., William Goodenow, Aaron Smith, Eleazer Goulding; David Morse, Town Clerk; David Morse, Town Treasurer; Hezekiah Broad, Oliver Bacon, Thomas Broad, Joshua Fisk, Selectmen; Samuel Morse, Jr., Thomas Sawin, Jr., Timothy Smith, Assessors; Joseph Morse, Adam Morse, Constables."

Here are seventeen different names, and they represent most, if not all, the leading men in the township near the close of the Revolutionary War. The signatures attached to this oath upon the records are plainly all in the handwriting of the signers, and in four instances, at least, the signatures are repeated, without counting those which were given officially.

As mentioned above, no date is attached to this remarkable document. In the records it is preceded by the recorded action of the town (for it was now a town), at the annual meeting March 5, 1787, and it is followed upon the next page by the warrant calling a town-meeting for April 2, 1787. But when it was prepared, or for what purpose, we are left to conjecture. In 1778 the town had voted not to accept the new Constitution for the Commonwealth, but we know of no emergency that had arisen calling for such a solemn declaration. Possibly the fact that the township had rejected the new Constitution had awakened elsewhere the suspicion that Natick was not heartily loyal to the government of the Commonwealth, and the purpose of this oath was to remove all doubts in the community respecting this matter. The reader will notice the singular accumulation of specifications in this document, as if the subscribers would bind themselves, by their oath, beyond the possibility of the least misunderstanding of their purpose by others, as well as, on their part, of the least evasion.

May 24, 1779, the parish "Voted to send a Petition to the General Court to be incorporated into a town"; and, on the same article, it was voted for the General Court "to give the town a new name," and then appointed the selectmen, Messrs. James Mann, Elijah Bacon, Lient. Abel Perry, Samuel Perry and Elijah Esty, as a committee to present these matters to the General Court. With respect to the matter of the incorporation of the township, this committee was successful, but nothing appears to have been accomplished regarding the change of the name of the town. And why any considerable portion of the people should have desired such a change we cannot conjecture, unless the fact that, for ninety-five years, this had been an Indian plantation, and nothing more, had created a prejudice against the name in the community generally, which, it was feared, might hinder the town's prosperity. That this part of the effort failed, and the ancient name was retained, was well; for few names of towns in New England are more suggestive of varied scenery, more euphonious, or less liable to be so written as to mislead.

February 19, 1781, the town of Natick was incorporated, but no special changes in the officers or business of the township followed this event.

1786. "This was the season of Shays' rebellion, when not only every full-grown male citizen, but every school-boy, was 'a Government-man.' Then it was the fate of every barn-door fowl that was clothed in white to become a sacrifice to law and good order; for the feathers rose to the hat-crown, in the shape of a cockade, and the carcass was stowed in the knapsack of the soldier, as part of his rations. One lieutenant, one sergeant, a drum-and-fife-major, and eight or ten rank and file joined Lincoln's army and assisted in restoring peace and order."¹

¹ See Biglow's "History," pages 45-46.

"Friday, Nov. 23, 1787, made choice of Major Hezekiah Broad Delegate to represent the town of Natick in Convention, agreeable to a Resolve of the General Court."

"This," says Biglow, "was the convention which adopted the Federal Constitution. The good Major voted *against* it, but immediately acquiesced in the doings of the majority, and promised to do all in his power to defend this palladium of our liberty, safety and prosperity."

November 7, 1796, the town having been duly warned, cast votes for one elector of President and Vice-President of the United States, and one Representative in Congress, as follows: For elector, His Excellency, Samuel Adams, twenty-one votes; for Representative, H. G. Otis, twenty-seven votes.

Voting for Governor, Lieutenant-Governor and Senators, April 3, 1797, the votes cast were: For Governor—Moses Gill, twenty-five; Increase Sumner, thirteen. For Lieut.-Governor—Moses Gill, eleven; Increase Sumner, nineteen. The leading candidates for Senators were Elcazor Brooks, thirty-four; Ebenezer Bridge, thirty-six; Aaron Hill, thirty-seven.

Pursuant of an act of the General Court, the selectmen of the towns of Needham and Natick met, Oct. 23, 1797, and so changed the boundary lines of these towns, that 1656 acres of land were set off from Needham to Natick, and 404½ acres from Natick to Needham, exclusive of a pond.¹

At the close of the eighteenth century Natick was a farming-town and generally prosperous, though the volume of its business would now be pronounced exceedingly small.

CHAPTER XXXVIII.

NATICK—(Continued).

1800—1890.

Prospects of the Town more Encouraging—General Progress—Town Action Respecting the Pastors of the Church—Town Hall Erected—The Town in Suppressing the Great Rebellion—Losses in the Same—Financial Condition—The Centennial Celebration—Town Officers and Representatives in the General Court.

WHEN the nineteenth century opened Natick could hardly have been classed among the important towns of the Commonwealth, for its population numbered only six hundred and ninety-four and none of its great manufacturing establishments of the present day had been founded. The people generally were hard-working, frugal farmers, but the expense of marketing the surplus products of their farms prevented anything like a rapid and large accumulation of property. Still they were not poor. Their taxes were comparatively light, their farms were productive

and they were beginning to look forward to more prosperous days. The unhappy controversy which had so long prevailed respecting the location of their meeting-house, and the support of a Gospel minister had, in a great measure, subsided. The town had erected, what was deemed in those days, a respectable house of worship, in the centre, where the brick church now stands, at an expense of about \$1500, and had provided for the renting of the pews, while the selectmen had been authorized to hire the preaching, for church and State were still practically one in supporting religious institutions during more than twenty years after this century opened. This arrangement, which prevailed in the mother country, was adopted by both Pilgrims and Puritans as they settled New England, and few seem to have questioned its expediency and justice for the space of one hundred years.

The town owned the Natick meeting-house, and the cost of maintaining preaching in it was met by drafts upon the town treasury, so that all of the property of the town was in this manner pledged for the payment of the pastor's salary, except in the case of individuals who "signed off" or connected themselves with some other religious society. This was frequently done as time went on, and so the town records contain many certificates like the following:

"Agreeable to the law of the Commonwealth of Massachusetts, bearing date June 10, 1811, the subscribers being a special Committee chosen for the purpose, hereby certify to the Town Clerk of Natick that Mary Esty and Caroline Bacon, inhabitants of Natick and Brookline, are Members of the Religious Society in Newton called Baptist.

"Dated this 30th day of May, 1812.

"STEPHEN DANA,
"NATHAN PETTEE,
"ELIJAH COREY,
"Committee."

The words "and contributes to their support" were often inserted in the body of these certificates.

In 1797 four families had, in this manner, "signed off" to Dover, twelve to Sherborn and seventeen to Needham—thirty-three families in all.

These facts will serve to explain the action of the town at its adjourned meeting, on the 16th day of May, 1803, which was as follows:

"Voted to offer to those who have annexed themselves to other parishes for parochial duties, by virtue of an act passed June 22, 1797, to give them their choice either to accept of the new meeting-house where it now stands, free from any further expense, or to move the old meeting-house (standing at South Natick) to school house Hill, on the east of the town, and there erect it for a house of Publick Worship, with such additions and alterations as shall be thought necessary. If the last shall take effect, the new Meeting House to be appropriated to some other publick use as the town shall think proper.

"Further voted, if either should take effect, to petition the General Court to pass the same into a law. Voted that the town clerk serve those who it may concern, with copies of this vote, one copy to Capt. John Atkins, one Do to Lieut. Elijah Perry, one Ditto Ensign Thomas Sawin, requesting them to make answer to the town clerk by the first day of June next in writing, of their objections, if any they have. Otherwise this town will take their silence for consent."

But to which of the propositions made, as set forth above, the silence of the persons named was to give

¹ See "Biglow," page 46.

"concent" we are not informed. Probably it was well understood, when the propositions were made, that these individuals would do nothing about the matter, for the serious thought of disposing of their new meeting-house in this or any other manner for common purposes, the town must have been very unwilling to entertain. November 28, 1803, "the town voted to lett the pews to the first Monday in April next." Very wisely March 1, 1802, the town had "voted to keep the Parish matters separate from the town (matters) in the future."

April 2, 1804, the town "voted to provide biers for each burying-ground, and that committee appointed for fencing the burying-yard provide the same."

Also under the article in the warrant "to see if the town will provide cartridges for the soldiers," the vote was in the affirmative, and "further voted that the commanding officers of the company be a committee to make the cartridges to be put into a tight box and deposited in the powder-house, and to be reviewed annually by the Commanding Officers of the Company."

November 5, 1804, the town cast thirteen votes for each of nineteen Presidential Electors, four of whom resided in the district, now the State of Maine, viz.: in Portland, Wiscasset, Hallowell and Berwick.

Also the town cast, at the same time, fifty-one votes for each of seventeen candidates for Representatives in the Congress of the United States, four of whom belonged in the district of Maine.

At this period the town cast from 90 to 100 votes for State officers, the stronger party casting from fifty to fifty-five and the weaker from thirty to forty, with many and great variations, however.

September 12, 1805, the town "voted unanimously to join with the church in the choice of Mr. Freeman Sears for their Gospel Minister," and October 24th following, the action of the town regarding Mr. Sears' support is accompanied in the records with an "N. B." to the effect that "if Mr. Sears should be occasionally absent three or four Sabbaths in a year the town to take no advantage," which is the first provision on record for a Natick pastor's annual vacation. Later the town made provision for the entertainment of the council that should assemble for the ordination of Mr. Sears, and, in addition, chose Benjamin Marshall, Captain William Stone and Jonathan Bacon "a committee to wate on said Council."

Other facts regarding Mr. Sears' ministry, and that of his successors, will be found under the head "Ecclesiastical," in this historical sketch.

During all the earlier years of the period now under review the town was annually called together to elect a Representative to the General Court, but invariably voted, and often unanimously, not to be represented.

Recording this fact the historian (Bacon) remarks: "The fine for not sending was \$100, but it was never prosecuted; and, having its own Representative to pay, the town chose to incur the risk, and in dollars

and cents was so much the gainer." Eighty years later this whole matter is managed differently, and the town does not fail of representation, for economic reasons. And it never failed for lack of good material from which to make a selection. Such men as Eben Felch, William Goodenow, Samuel Perry, Samuel Morse, David and Jonathan Bacon, William Stone and many others that might be named, would have honored the town in any responsible position.

The town appropriations in those days were not very large. In 1806 they were as follows: For schools, \$500; for necessary town charges, \$130; for the pastor's salary, \$425; for repair of highways, \$600. "To pay ministerial charges," which in this case included expenses "for trimming the pulpit," "painting the meeting-house," and "for the expence of ordination and other ministerial charges that has arisen, \$250;" but does not include anything for the support of the poor—total, \$1905. The last-mentioned appropriation of \$250 was exceptional. Ordinarily, at that time, the annual appropriations did not exceed \$1700 or \$1800. This sum does not seem large when we compare it with the grants and appropriations for the year 1889, which amounted to \$88,340.

It may be of some interest to know that, beginning as early as 1790, a very large proportion of the warrants issued by the selectmen of Natick for town-meetings contained a full notice of the qualifications requisite to be a voter, as "being twenty-one years of age and resident in said town for the space of one year next preceding, having a freehold estate in said town of the annual income of three pounds, or any estate to the value of sixty pounds." The custom of including these matters in the warrants prevailed in Natick as late as 1821.

In the year 1807 the deacons of the church and a committee of the town leased to their pastor, Rev. Freeman Sears, land for a building lot on the corner of what is now West Central Street and Main Street, where the Edmund Walcott business block now stands, and a record of this transaction fills three pages of the town records. The whole statement is exceedingly, almost curiously, minute and formal, and is signed by Abel Perry, Jr., and William Goodenow, deacons of the church in Natick, Daniel Travis and Jonathan Bacon, committee of the town, and Freeman Sears, minister of the Gospel. It is plain that in the early part of this century the business of the town received the most careful attention.

November 7, 1808, the town chose a committee to lay out the ground for some sheds or stables near the meeting-house, "and report in twenty minutes." This was done, and the location which the town accepted was defined thus:

"The south part of the ground be sixty feet north of the Meeting-house on a perpendicular line with the back side of said meeting-house, to extend to Mr. Moses wall as far west as the westerly line of the burying-ground, and northerly the width of the

stables." This we can perhaps understand if we substitute the the word "horizontal" for perpendicular. These stables must have covered some part of the ground now occupied by the brick block of Mr. P. F. Woodbury, while north of them, where the blocks of Messrs. Rice, Morse and Winch now stand, lay the burying-ground.

The question whether "the Rev. Freeman Sears is settled here during life or only during the pleasure of him and them jointly," having been previously before the town, was finally disposed of October 16, 1809, by the unanimous adoption by the town of five resolutions, of the following import:

1. "If Mr. Sears will agree to spend his days here," the town will consider all contracts, as to salary, with him void, and make new proposals as follows:
2. The town will give him the use of the ministerial lot.
3. They will give him the use of the first pew in the meeting-house.
4. The town will pay him in the month of January each year the sum of \$100, or give him a note upon interest for that amount.
5. The town will agree to fulfil the preceding contract so long as Mr. Sears sustains the relation of a gospel minister to this church and society.

Mr. Sears' salary was provided for in 1810 and 1811, but on the 30th day of June of the latter year he died, deeply lamented, at the age of thirty-three years.

The town chose a committee "to see what expense has arisen at the funeral of Rev. Freeman Sears," but its action upon the report of that committee was not recorded. January 27, 1812, it was voted to concur with the church in the choice of Mr. Joel Wright as pastor, and in offering him an annual salary of \$425, the town agreed that "in case of sickness or old age he is unable to perform the above duties, the society to pay him \$60 annually so long as he remains our minister, if his circumstances are such that he needs it, or any part as he shall need." Mr. Wright did not accept the call.

War having been declared against Great Britain in June, 1812, the town voted November 2d of that year, "to make up the pay of the detached soldiers to \$12 per month, after they march into actual service." In 1813 the town chose as its representative in the General Court, Samuel Morse, "by a majority of three."

December 6, 1813, the town having concurred with the church in the choice of Mr. Martin Moore as its minister, offered him "a salary of \$500 and the use of the first pew in the church, so long as he remains our minister and supplies the desk." Mr. Moore accepted the call and was the pastor about nineteen years. He appears to have purchased the house erected by his predecessor, Mr. Sears, upon the spot where the Edward Walcott business block now stands. The house fronted the east and its door-yard occupied a considerable part of the ground now covered by that block. Later, when West Central Street was opened, the house was moved to the west and turned so as to front the north, and is the house now standing on West Central Street, next west of the

Edward Walcott block. Mr. Moore was quite a farmer as well as a laborious minister, and his horse and cow pasture was west and northwest of his house, upon both sides of what is now West Central Street, and including the land now used for that pleasant thoroughfare.

The pews in the meeting-house were appraised December 13, 1813, at from \$55 for No. 2, on the lower floor to \$5 for No. 22, in the galleries. This, it must be understood, was for actual sale and not for annual rent, and according to it the pews were worth at that time \$1230. This was probably about the estimated value of the meeting-house, independent of the lot upon which it stood.

During these years the care and support of the paupers of the town were awarded to the lowest bidder, as was generally the custom in the country towns of New England. Sometimes a considerable sum was paid for the support of a pauper, if we may trust the entries made upon a loose paper found in the book of records, which are as follows:

" Pauper to Mrs. Walker	\$206.
" " John Gray	25.75
John Morse at \$1.50 per week, for one year	75.30
Total	\$307.05."

Probably the first of these was an exceptional case. At the choice of Presidential electors, November 1, 1824, fifty-six votes were cast, which seem to have been divided politically into fifty-three and three, except in a single instance, when all were cast for the favorite candidate. The town voted four times for a Representative in Congress at that election before the district gave a majority vote.

Sixty years ago there remained in Natick some common or undivided land which belonged to the Indians, and this land the town took special pains to have disposed of and the proceeds devoted to some good object, as there were then no Indian claimants.

Only twenty-five votes were cast at the meeting for the choice of Presidential electors in 1828, and these were all given to one of the lists of candidates.

Nov. 1, 1830, the town chose a committee of three, viz., Rev. Martin Moore, Rev. James W. Thompson and William Farris, "to petition the Legislature in behalf of the inhabitants of said town for an alteration of its name," and instructed the committee to ask that the new name should be Eliot. Later, it would appear that this name was actually given to the post office in South Natick, for in the published "Review of the First Fourteen Years of the Historical, Natural History and Library Society of South Natick" this statement is made: "The name of the Post Office and Village having been changed to 'Eliot,' the name of the Society was, at the April Quarterly Meeting, changed correspondingly."

This meeting appears to have been held in April, 1872. William Farris, Esq., represented the town in the General Court in 1831.

From this date onward till March, 1853, Chester Adams served the town as town clerk, and all the entries in the records were made in the most convenient manner possible and in plain and beautiful handwriting. And the same may be said of all the town clerks who have succeeded him. Mr. Adams was also town treasurer for the same period, and when he declined longer service he received the thanks of the town for the faithful manner in which he had discharged his duties.

Feb. 28, 1838, a large committee of the town reported in favor of purchasing a farm as soon as possible for the home of the town paupers, and about one month later the town appointed Elijah Perry, Jr., Oren Coolidge and Samuel Fisk a committee to purchase a poor farm. In that year Edward Everett received 136 votes for Governor and Marcus Morton 52 votes, which probably indicated the relative strength of the two great political parties in Natick at that period. Nathaniel Clark was at the same time chosen Natick's Representative in the General Court. In 1839 the town voted to pay the sum of \$25 to each parish having a church bell, provided such parish would cause it to be rung from April till October each week-day at noon, and during the remainder of the year at nine o'clock in the evening.

In 1841 the matter of building a Town-House was agitated, when it was proposed to use a part of the surplus revenue received from the United States to build the same. But this proposition was defeated at first (the voters repairing to the Common to be counted) by a majority of four votes. Later this matter came before the town in various forms and with changing results, but the Town Hall was finally built. It stood near the northeast corner of what is now the Common, not far from the dwelling-house of Mr. John Kimball, whose home was near the centre of the present Common.

It was but a single story in height, and when the buildings were removed and the ground laid out for the Common, the Town Hall was moved to the east and became the Old High School house, fronting north on East Central Street. After the New High School house was erected and furnished, the old building was sold to Mr. M. W. Hayward and removed by him to Washington Street. There it was raised and made two stories high, the lower part being a blacksmith's and carriage-maker's shop and the upper fitted up for tenements.

In 1841 Natick had 205 enrolled soldiers; in 1843, 294; in 1844, 383; in 1845, 403; in 1846, 310, the members of the fire companies being exempt. In 1841 the matter of providing fire-engines for the town was agitated, but nothing effectual was done till 1844, when the town appropriated \$1700 to purchase two engines, which were built by William C. Hunneman & Co., of Boston, and brought to Natick, without charge, by the Boston and Worcester Railroad.

These gave general satisfaction. In 1845 Henry

Wilson was elected to represent the town in the General Court, receiving 177 votes, being a majority of 38 votes over 19 other candidates.

The tax on dogs, which had been \$1.25, was reduced in 1846 to one cent.

The same year (1846) the town voted "that fifteen dollars be allowed to the Methodist Episcopal Society out of the funds belonging to the estate of Timothy Smith, late of Natick, a town pauper, deceased, and that the Selectman take possession of the effects of said deceased and dispose of the same according to law, and that the town erect suitable grave-stones to the memory of said deceased."¹

In 1847, the article before the town being "to see if the town will grant leave to Henry Wilson and others to enclose a portion of the common land in South Natick and erect thereon a monument to the memory of John Eliot," the liberty asked for was granted "without apparent opposition."

In 1849 the town voted "that Jonathan Walcott, Asher Parlin and Nathan Rice be a committee to purchase the farm of John W. Perry and Alfred Bacon and wife for a pauper farm." In the same year the matter of a new cemetery was agitated, when the town voted "that as soon as land can be purchased for a new cemetery the old one shall be closed." The lot for the Dell Park Cemetery having been secured, it was consecrated July 12, 1849, by suitable religious ceremonies, performed, at the request of the committee, by Rev. Messrs. Hunt and Walton, of the Central Village, and Rev. Mr. Watson, of South Natick. Rules were established by the town respecting cutting the trees on it, laying out the grounds, selling the lots, etc.

In 1850 the enrolled militia of the town numbered 501; in 1851, 552; in 1852, 690. In that year Nathaniel Clark was elected Representative to the General Court by 233 votes. In 1851 the town appointed a committee of seventeen, with Edward Walcott as chairman, to make arrangements to celebrate the two hundredth anniversary of the settlement of Natick, but nothing later is found upon the records concerning this matter. In 1852 the selectmen were directed "to prosecute all violations of the License laws." In 1853 B. F. Ham was chosen town clerk and treasurer. In 1855 William A. Leighton was appointed agent for the sale of spirituous and intoxicating liquors in Natick, such liquors to be owned by the town and "sold for use in the arts or for medicinal or for chemical or mechanical purposes only, at the market of N. & G. D. Chamberlain, on Summer Street." In 1856 the town required the keepers of all

¹ This Mr. Smith was quite a character in his day. He was a bachelor and was often in prison, being addicted to intemperance. Having frozen his feet, they were amputated, but still he managed to go from place to place when not intoxicated. Late in life he thoroughly reformed, and was distinguished for his simple piety and devotion to temperance principles as he had been for his wickedness and vicious habits in general. After his reformation he earned in various ways his support and left some money at his death; but he had been a pauper, and so the town disposed of his estate.

dogs to put collars upon their necks, with owners' names plainly engraved thereon, and to pay license fees of two dollars each for males and five dollars for females. In the same year an appropriation of \$1000 was made for providing "reservoirs for water," in order to have a supply in case of fires.

Nathaniel Clark was again chosen to represent the town in the General Court, the votes standing—for Nathaniel Clark, 475; for Aaron Davis 2d, 110; for J. B. Walcott, 244; and for B. F. Ham, 2. In 1857 the town voted to purchase additional hose for the fire engines, and a supply of hooks, ladders, axes, etc., with suitable carriages for the same. Also an appropriation was made for a new fire-engine and new hose, the whole amounting to \$4107.

The owners of the Citizens' Library having offered to the town the books of their library, upon certain conditions (see under the head—Educational), the town voted to accept the same, granted \$300 for the Town Library, and committed the care of it to the Superintending School Committee. Later the town voted to adopt the rules for the regulation of the library reported by the School Committee. The question respecting the ownership of the lot used for many years as a cemetery, where the brick blocks of Leonard Winch, the heirs of Leonard Morse and Martin Rice now stand, when the remains of the dead buried there should have been removed, was submitted in 1858 to the decision of Hon. E. R. Hoar, of Concord, by the committees of the town, of the Congregational Parish, of the trustees of the Ministerial Fund of said parish, and by John W. Bacon, as guardian of the Natick Indians. The decision of Mr. Hoar was, that the land in question belonged to the town, for various reasons, but chiefly because the town had held the exclusive and undisputed possession of the same for thirty-seven years. In 1859 the town accepted and adopted the report of its committee, to confer with the city of Boston relative to taking water from Lake Cochituate, according to which Natick was to receive from Boston for the privilege the sum of \$3000.

During the same year there was so much dissatisfaction with the proceedings of the town's liquor agent, that the committee appointed for the purpose of investigation recommended that he be dismissed forthwith and that the agency be placed in the hands of some party who would conduct the business according to law. This recommendation was adopted by the town. The "crookedness" complained of was discovered by finding upon the books of the agency, as purchasers, the names of parties very regularly buying "who were noted as habitual drinkers." Mr. Horace N. Stockbridge was appointed the next agent, with very strict injunctions regarding the persons to whom he might sell and the records of the sales which he might make.

April 23, 1859, the town authorized the town treasurer, with the approbation of the selectmen, to fund the sum of \$15,000 of the town's debt, the notes

to be payable as follows: \$5000 in twenty years, the same amount in twenty-five years and the remaining \$5000 in thirty years, with interest at the rate of five and a half per cent., payable semi-annually.

The militia enrollment at that date contained 1431 names. At the State election in November, 1859, 714 ballots were cast.

BEGINNING OF THE GREAT REBELLION MOVEMENT.—April 3, 1854, the town had adopted the following resolutions, reported by its committee, John W. Bacon, chairman:

"WHEREAS, the bill now before Congress for the organization of the Territories of Kansas and Nebraska proposes to repeal so much of the Act of March 6, 1820, as forever prohibiting slavery north of 36° 30' in the Louisiana purchase—Be it therefore

Resolved, That the inhabitants of Natick in town-meeting assembled do solemnly protest against the passage of said bill because

"1st. It will violate the pledged faith of the nation.

"2d. Because it will allow African Slavery to enter into 480,000 square miles of territory, from which it has been excluded for thirty years.

"3d. Because it will tend to keep out of these territories the farmers, mechanics and workmen of the free States and the poor men of the slave States now oppressed and degraded by African Slavery who would rear in these territories free institutions for all.

"4th. Because it will tend to increase the influence of Slavery over the policy of the national government."

Thus early did this town commit itself to the cause of human liberty against the encroachments of slavery, in the fearful contest which the wisest and most patriotic all over the North and West foresaw was impending.

April 29, 1861, the town appropriated \$5000 to be expended under the direction of the selectmen, for the benefit of the families of such citizens of the town as may serve in the impending war.

The selectmen at that time were Willard Drury, William Edwards and C. B. Travis.

Leonard Winch, Deacon John Travis and John Cleland, Jr., were chosen a committee to consider "the wants of those citizens who may volunteer their services for the impending war." May 7, 1861, the town authorized the selectmen to pay for the uniforms of the Mechanic Rifle Company, of Natick, to the amount of \$1000. It was also voted that each volunteer soldier should be furnished with one rubber camp blanket and one pair of woolen stockings and each commissioned officer and musician with a revolver. Also the town appropriated \$500 to furnish arms, equipments and clothing to volunteers, if called into actual service. July 17, 1861, the town voted to raise the sum of \$10,000, in aid of the families of volunteers, and at the same time appropriated \$1400 to meet expenses already incurred and to carry out contracts already made with volunteers.

In 1862 the enrolled militia numbered 592. July 25, 1862, provision was made to pay \$100 bounty to each person who should enlist in the service of the United States and be mustered into the same as a part of the quota required of Natick under the call of the President for 300,000 volunteers for the war. Also voted that the town will pay to each person who shall volunteer and be mustered into the service an

additional sum of fifty dollars, making the amount of bounty offered \$150. A committee of fifteen was chosen to assist the recruiting officers in procuring the quota of volunteers. The bounty was promised within five days after the soldiers should be mustered into the United States service.

August 13, 1862, the treasurer was authorized to borrow \$16,000 for five years at six per cent. or less interest, and to pay to each volunteer who should be mustered into the service the sum of \$150, to the number of 103, this being the quota at that time required of Natick. The same bounty was offered a little later to volunteers to fill the quota for this town under a new call for 300,000 nine months' men.

November 4, 1862, the town instructed the selectmen "to pay to the families of those volunteers, residents of the town, who have been or may be killed during the present Rebellion, the same State aid which they were previously receiving, until the end of the war."

"July 15, 1863, one hundred and fifteen police officers were appointed for Natick," with the powers possessed by constables of this Commonwealth, except that of serving and executing civil process. Most of these took the oath of office.

April 21, 1864, the town voted to pay "a bounty of \$125 to each person who enlists for the town of Natick and counts upon her quota." And May 23, 1864, the town voted unanimously to "pay to each person who had been drafted into the service of the United States, or who may be drafted previous to April, 1865, the sum of \$125, when he shall satisfy the Treasurer that he has been accepted by the District Board of Enrollment."

Also it was voted "that we pay every re-enlisted man who has counted on Natick's quota, and has not received full government bounty, the sum of \$175, on his furnishing evidence that he has not received full government bounty."

Such was the action of the town of Natick when the great slave-holders' rebellion began. This took form before the world by the assault upon Fort Sumter, April 12, 1861, assumed the most fearful proportions when it appropriated the last dollar, and brought into the field the last man it could control, but was finally crushed by the overwhelming forces of the friends of constitutional government and of human freedom when General Grant captured Richmond, April 2, 1865. All that the town did in the way of voting money and giving such a firm and determined moral support to the Federal Government was honorable and absolutely necessary; but the self-denial and suffering chiefly fell to those who actually fought the battle of freedom; and to them the reader's attention will now be directed.

In 1863, while the war was in progress, the General Court of Massachusetts took measures to secure in each town and city of the Commonwealth a full record of all the soldiers and seamen that it had furnished,

or might furnish for the suppression of the Rebellion, and so we have in the town clerk's office a volume in manuscript, entitled "Rebellion Record." This book contains the name of every soldier that counted upon the several quotas furnished by Natick, with his position in the army, time of service, bounty received, previous occupation, age and experience, while in the service of the country.

The number of men in the army from Natick was 534, so that it is impracticable to give in this historical sketch even the names of them all.

From the adjutant-general's report in 1865, it appears that Natick furnished thirty commissioned officers for the army. The record of these officers, from the sergeants upward, follows, abbreviated as much as possible, in the least important particulars:

Thomas T. Nason, sergeant; 3 years; discharged by reason of sickness, January 20, 1863; served 2 years.

George H. Willis, sergeant; killed at Cedar Mountain, August 9, 1862; served 2 years, 3 months.

Perry D. Chamberlain, first lieutenant; resigned and discharged; served 7 months.

Francis Z. Jenks, second lieutenant, June 21, 1864; first lieutenant October 7, 1864; was in service through the war.

William H. Brown, sergeant, second and first lieutenant; served nearly 3 years.

I. B. S. Randall, sergeant; served nearly 1 year.

Oscar F. Morse, sergeant, second and first lieutenant, and captain; served 3 years.

Josiah S. Bacon, sergeant; wounded in lungs at Second Bull Run; served 2 years, 7 months.

Henry Wilson, colonel, United States Senator; held his commission 23 days.

Thomas Duggan, sergeant; enlisted October 1, 1861; "Deserted and came back."

William W. Pray, sergeant, second and first lieutenant, in 1863; re-enlisted and served through the war.

Albert H. Bryant, assistant surgeon 30th Regt., enlisted as private 1861; discharged May, 1862, to be contract surgeon; August 29, 1862, com. asst. surgeon; served till close of the war.

Ephraim H. Brigham, captain, recruited a company in Natick, 1862; com. August 21, 1862, and marched with ninety-nine men August 13, 1862.

Simon Mulligan, first lieutenant under Capt. Brigham, and marched at same time; Capt. Brigham served two years and was discharged for disability; Mr. Mulligan served one year and two months, and was discharged for disability.

Benning Hall, Jr., sergeant; discharged for disability and died of disease contracted in service soon after his discharge.

William D. Parlin, sergeant; discharged and promoted to capt. of Co. E, 1st U. S. C. T.

Henry F. Feltz, sergeant, second and first lieutenant and capt. June, 1865; served three years.

Charles P. Currier, sergeant; wounded May 8, 1864, at Spotsylvania Court-House and taken prisoner; leg amputated and paroled at Richmond, Va.; later, was in hospital at Annapolis; had a furlough granted Oct. 19, 1864, then reported at Readville, Mass., and was discharged.

Nathan Reed, sergeant; served during the war and was discharged June 15, 1865, for disability.

Alexander Blaney, capt.; discharged after nine months' service; was in 28th Regt., Co. G.

Ira Russell, surgeon 11th Regt.; enlisted August 27, 1861.

Harrison Harwood, Jr., first sergeant 42d Regt., Co. K; enlisted for three months; served his time and mustered out Nov., 1864.

Florence F. Buckley, second and first lieutenant; wounded June 16, 1862, and promoted to first lieutenant on the field for gallantry; wounded again at battle of Bull Run Aug. 30, 1862; taken prisoner and paroled; joined regiment again Dec. 1, 1862; promoted capt. Jan. 16, 1863; discharged for disability; re-enlisted and was again capt. of Co. C, 20th Regt.; served nearly the entire period of the war.

Augustus E. Dyer, surgeon at Portsmouth Grove Hospital and died in service.

Horace Bosmore, sergeant; was reduced to private Aug., 1861, and killed during Gen. Banks' retreat from Winchester, Va., May, 1862.

Alfred S. Hartwell, first lieutenant; com. capt. in 54th Regt.; lieutenant-col. in the 55th and col. of the same Nov., 1863; wounded at Honey Hill, 1864, and promoted brig.-gen. Dec. 1st of that year.

Charles A. Hartwell, first lieutenant. U. S. Infantry; wounded in the thigh at Gaines' Mills; taken prisoner at Savage Station; confined six months at Richmond, Va.; com. col. of 5th Infantry (colored); brev. capt. U. S. A.; major, lieutenant-col. and brig.-gen. of U. S. Volunteers, (brevetted), and was such 1866.

Leonard B. Perry, second lieutenant; then acting adjt.; later, first lieutenant; and later still, acting asst. adjt.-gen. of the post of Folly Island; annexed to the staff of Brig.-Gen. John J. Hatch, and served under him till the war ended.

Josiah A. Bean, second and first lieutenant of 55th Regt., Co. D; discharged August 1, 1865.

George Graney, 9th Regiment, Co. B; promoted to sergeant July 1, 1862.

Henry Hamilton Wilson, first lieutenant, then lieutenant-col. U. S. C. T.; then first lieutenant in regular army; died in service Dec. 24, 1866, at Austin, Texas.

William Nutt, enlisted as private, then second lieutenant in 54th Regt.; later, first lieutenant, 55th Regt.; then captain, major and lieutenant-col., and promoted col. by brevet; served through the war, and is now (1889) Judge of the District Court.

Otis M. Humphrey is credited to Natick as asst. surgeon in the 6th Regt., upon the Adjt. Gen.'s Report, 1863, but his name is not found upon the record book of Natick. The reports of this officer in 1863, were, of necessity, very imperfect.

Upon the Soldiers' Monument appear the names of eighty-nine Natick soldiers who died in the war, and since it was erected, in 1868, many more have yielded to diseases contracted in the service. From year to year numbers will die from the same cause.

Thirty-eight of the Natick soldiers, at least, were taken prisoners, quite a number of whom died from cruel treatment during their confinement. The number of the wounded was very large, and many of their wounds have proved fatal since the end of the Rebellion.

The certificate that follows is found in the report of the adjutant-general for 1865 in Public Document, No. 7:

"No crime has been committed by any returned soldier resident of Natick. Being personally acquainted with a large majority of those residing in this town, I am pleased to say that there is not one exception wherein the moral and social condition of the soldier of to-day is not fully equal to his position as citizen before entering the service. There are many cases of marked improvement. I do not hesitate to say that the general condition of the soldiers and of those dependent upon them is much better than before the war.

"C. B. TRAVIS, *Chairman of the Selectmen.*"

And now, after the lapse of twenty-five years, the appearance of the surviving members of the General Wadsworth Post 63, Grand Army of the Republic, is that of temperate, law-abiding, high-minded, industrious, useful citizens, who are honored by all the present generation, whose country they helped to save by their valor.

That such heavy drafts upon the working force and treasury of Natick, as the suppression of the great Rebellion made necessary, did not paralyze the industries and exhaust the means of the town, appears from its increasing prosperity during those years of trial.

The printed annual report of the selectmen for the year ending March, 1850, shows that the amount of

appropriations made for 1849 was \$5094, with floating accounts unsettled amounting to \$798.50. The expenditures for the year amounted to \$6454.56. In the year 1861, when the Rebellion broke out, the grants and appropriations amounted to \$16,255, and the liabilities of the town at the same time amounted to \$25,923.53. In 1862 the appropriations and liabilities were nearly the same. Up to January 1, 1862, the town had paid to the families of volunteers the sum of \$3524.33, but it was expected that nearly all of this sum would be refunded by the State. During that year the interest account paid by the town amounted to \$1767.83.

In 1867, two years after the war had ended, the grants and appropriations amounted to \$36,554.36, while the liabilities of the town, after deducting the sums due the treasurer, amounted to \$24,351.85. The orders drawn by the selectmen for the year ending February 20, 1868, amounted to \$77,485.40, while the receipts of the town had been \$80,526.12. This indicates for Natick a sound financial condition, as the town was recovering from the heavy expenses and losses occasioned by the war. The town officers received for services during the year 1867-68 the sum of \$1149.

The amounts for the year following do not vary materially from those set forth above. In 1870 the receipts of the town amounted to \$63,969.07, while the amount of orders drawn by the selectmen was \$61,067.85.

The births in the town the same year were 195, the marriages 63, and the deaths 105. In 1884 the births were 204, the marriages 80, and the deaths 155. The receipts of the town for 1884 were \$124,803.27, and the expenditures, \$125,307.22, leaving a balance against the town of \$503.95. The Water-Works account, at the same time, showed receipts (\$85,000 of which came from water bonds) of \$128,292.10, while the expenditures amounted to \$110,096.50, leaving a balance for the sinking fund of \$18,195.60. The interest paid in 1884 amounted to \$18,193.38, \$8790 of which were upon water bonds. The net indebtedness of the town, exclusive of water bonds, March 1, 1885, amounted to \$114,551.50, while, at the same time, there was due to the town the sum of \$37,551.55.

The town having voted to grant licenses for the sale of intoxicating liquors for 1884-85, the selectmen granted forty-nine licenses. The receipts for these amounted to \$4600, of which the State received one-quarter, leaving a balance for the town of \$3450. The town having directed that a part of the money received for licenses should be expended in putting in curbstones for the sidewalks, \$1982.13 were paid out for this purpose. Arrangements were made during the year 1884-85 for the town to have the use of Concert Hall and of the selectmen's room for \$600 annually from July 1, 1885. The town debt, which had been increasing during some of the preceding

years, was diminished in 1884 and 1885 to the amount of \$13,365.19.

For the year ending March 1, 1888, the births were 233, the marriages 100, and the deaths 145. No licenses for the sale of intoxicating liquors were allowed. The grants and appropriations amounted to \$81,400, while the liabilities of the town were \$126,000, which is to be reduced by amounts due the town to \$93,851.52, exclusive of the water bonds. The water notes and bonds at that time amounted to \$118,400. The amount collected for water, 1887, was \$15,520.27.

For the year ending March 1, 1889, the births were 219, the marriages 77, the deaths 162. A liquor license was granted to Washburn & Reed, druggists. The appropriations for the year amounted to \$88,340.

The 827 orders given by the selectmen amounted to \$71,385.07. The interest paid on the town debt amounted to \$11,289.18, while \$3000 were expended to reduce the debt. The town's liabilities, March 1, 1889, amounted to \$123,000, and it owed at that date \$4023.10 accrued interest on notes and bonds, making the sum total of indebtedness, \$127,023.10. At the same date, \$38,465.14 were due to the town, so that its net indebtedness amounted to \$88,557.96, exclusive of water bonds, being a reduction of about \$5,294, from the net indebtedness of the preceding year.

The valuation of the town May 1, 1888, was as follows: Personal estate, \$1,006,405.00; real estate, \$4,198,150.00; total, \$5,204,555.00. The number of polls assessed was: Males, 2627; females, 502. The tax rate was \$17.20 per \$1000, and the total amount for collection was \$99,302.47.

It is proposed here to resume the general history of this town, which was interrupted to present connectedly some account of Natick's sacrifices for the suppression of the Rebellion,—a matter concerning which but few of the present generation are as familiar as every patriot ought to be.

The project of erecting a soldiers' monument being before the town, a monument committee, consisting of E. H. Brigham, G. P. Fay, N. Reed, Simon Muligan and Willard Mann, was raised to attend to this matter, who reported, April 1, 1867, that they had put in the foundations and prepared the ground for a monument, on the Common, at the expense of \$372.97, and had contracted with Messrs. Russell, Clough & Co., of Lowell, to prepare and erect the monument. The same committee was directed to go forward and complete the same. The town's grant for the erection of such a monument was made April, 1866, and amounted to \$3500.

Nov. 6, 1866, the town instructed the selectmen to petition the Legislature to grant the town of Natick the privilege of equalizing the bounties among those who served in the war of the Rebellion.

The Library Committee reported, April 1, 1867, that the number of volumes in the library was 2563, and that thirty dollars were due for unpaid fines.

Dec. 16, 1867, the matter of building a Town-House upon the old burying-ground lot, where the brick block of Leonard Winch and the Masonic Block now stand, was agitated, and the matter was deemed so far settled, that a large building committee was appointed to conduct the work, but no actual progress was made. This project was again before the town in 1868, but was defeated. At the annual meeting in March, 1868, the subject of securing a better supply of water, and of purchasing a steam fire-engine, was brought before the town by the engineers of the Fire Department, and a committee was raised to consider the matter.

Newton Morse was chosen Representative, in 1868, by 564 votes.

At a town-meeting, April 3, 1869, a communication was received from Mrs. Sally Spaulding, dated Oct. 3, 1868, in which she offered to the town of Natick the sum of five hundred dollars, the interest of which should be annually expended at or near the time of the annual Thanksgiving, to furnish to the female inmates of the almshouse such warm and comfortable clothing as the town would not feel called upon otherwise to supply, such as warm woolen dresses, woolen hose, small shawls, etc. The donation was accepted unanimously by the town, and a vote of thanks for the same was passed. At this meeting "the blocking-up of the line of Washington Street by the Boston & Albany Railroad corporation" was condemned by an emphatic vote. A railroad station-house had been built directly across the street above mentioned, and the agitation commenced at this time did not cease until, by an act of the General Court, the corporation was compelled to remove the depot about one hundred feet to the east.

As early as 1871 the money received by the town for the license of dogs began to be appropriated to the support and increase of the town library.

In 1872 the town, upon the recommendation of its committee, voted in favor of obtaining a charter which should give the liberty to take water from Dug Pond, for extinguishing fires and for household purposes. Also, the town voted to purchase a steam fire-engine for South Natick.

Upon the article in the warrant for the meeting, "Shall any person be allowed to manufacture, sell or keep for sale, ale, porter, strong beer or lager, in this town," 382 voted yes, and 355 voted no.

At the Presidential election in 1872 the party votes stood 683 to 449 on electors-at-large.

March 25, 1873, the town unanimously accepted the act of the Legislature entitled "An Act to Supply the Town of Natick with Pure Water."

Jan. 13, 1874, the great fire occurred, which destroyed all the buildings on both sides of Main Street, except the Leach (now the Eagle) block, and all on the west side of Washington Street, south of the railroad, except the dwelling of Miss Susan Morse. West of Main Street, for a considerable distance, the

destruction was complete. Among the valuable buildings consumed were Clark's new and beautiful brick block, containing rooms for the National and Savings Banks, and the spacious Concert Hall, and the Congregational Church edifice, nearly new, and just enlarged and improved at an expense of about \$13,000, upon which was good insurance amounting to \$31,500. Two large factories of foot-wear were also consumed; all the dry-goods stores, and all the public halls in the village, including the one in the Winch Block in which the Methodist Episcopal Society was worshipping while they were erecting a new church. The loss to the town was very great, being estimated at the time at about one-fifth of the entire taxable property of Natick. But the amount of insurance, in most cases, was large, and the companies were able to meet their losses.

In 1874 the name of Railroad Avenue was changed to South Avenue. April 9, 1874, a Water Board was chosen, consisting of E. B. Saunders, James W. Morse and P. F. Woodbury for one year; Royal E. Farwell and F. C. Tucker for two years, and Calvin H. Perry and Herman Crosley for three years. And the Board was directed "to introduce water into the town as soon as convenient." The treasurer was authorized to issue water scrip, not exceeding \$80,000. Also the selectmen and the Water Board were authorized to expend \$14,500 in erecting such buildings as were necessary for an engine-house, station-house, lockup and stables. In 1874 additional water scrip was authorized to the amount of \$30,000, which was increased in 1875 by \$40,000. In 1876 the town voted salaries for town officers, as follows: The chairman of the selectmen, \$200; the other selectmen, \$175 each; each assessor, \$150; each member of the School Committee, \$125; town clerk, \$50; town treasurer, \$200.

April 6, 1868, the town chose Calvin H. Perry, Horatio Alger and Elijah Perry a committee to prepare a code of by-laws for the town, and in May of the same year this committee reported such a code in eight articles. This report having been accepted, the same committee, with the addition of the town clerk, George L. Sleeper, Esq., was requested to present a copy of the proposed by-laws to the Superior Court or a justice thereof for approval. This was done; and June 23, 1886, the code was approved by the Court sitting at Cambridge. In 1877 the town voted to issue water bonds, bearing interest at five per cent., sufficient in amount to carry water to South Natick and to the north part of the town, and ordered \$20,000 worth of the old bonds, bearing six per cent. interest, to be canceled, and the new bonds to take their place.

March 5, 1877, the town appropriated \$500 to pay for Cobb's painting of the late Vice-President, Henry Wilson, the same that now hangs in the town hall. Messrs. J. B. Fairbanks, George L. Sleeper and Alexander Blaney were made a committee to procure plans and estimates for a new high-school house.

New and additional by-laws for the town, prepared by Messrs. George L. Sleeper, J. B. Fairbanks and William Nutt, having been previously accepted by the town, were presented to, and approved by, the Superior Court at Lowell, April 20, 1877. May 3, 1877, the town voted to build a new high-school house, and appointed a building committee consisting of John B. Fairbanks, George L. Sleeper, Alexander Blaney, Josiah L. Bean and Calvin H. Perry; and in March, 1878, a final grant of \$7000 was made to finish and furnish the high-school house and to grade and fence the lot. November 8, 1880, the committee appointed on celebrating the first centennial of the incorporation of Natick, presented their report and it was accepted. From this report it appeared that the committee had organized by the choice of Hon. John W. Bacon as president, and Rev. Daniel Wight as secretary, and had recommended that the celebration should take place on the first Wednesday of June, 1881, and that the town apply to the Legislature for liberty to raise money to meet the necessary expenses of the celebration. The town thereupon voted that an executive committee of fifty-five be chosen, which shall constitute the committee of arrangements, and made provision to apply for the needed legislative act. At the annual town-meeting, 1881, the town granted \$500 for celebrating the 100th anniversary of incorporation, to be expended under the direction of the town's committee on celebration heretofore elected, and that this appropriation shall not be exceeded.

The town having voted, November 8, 1880, to celebrate the centennial of the incorporation of Natick on the 1st day of June, 1881, the committee of fifty-five in charge made all the preparations necessary for this important event. A brighter and more beautiful day than June 1st could not have been desired.

At sunrise all the church, school and engine-house bells were rung for half an hour, and a salute of thirty-nine guns was fired. This was repeated at noon and sunset. By eight o'clock the people from the outlying districts and the surrounding towns had assembled in great numbers. At 9.30 the procession was ready to move, and this presented an imposing spectacle. It moved in five divisions, with the platoon of police in front under the charge of Chief A. C. Pease. Wm. H. Wright was chief marshal, and I. K. Felch chief of staff. In the first division were the cornet band, General Wadsworth Post 63, G. A. R., and the Fire Department in full.

The second division contained the various benevolent and other societies of the town.

The third division, with the Hibernia Brass Band, was made up of the town officers, Governor Long and staff and other officers of the State.

The fourth division contained the youth and children of all the schools, many of them in costume and in barges, followed by representatives of the various trades and business of the town generally and

citizens in carriages and on foot. Young ladies from the High School, representing each of the States, and all with corresponding badges, and conveyed in a barge drawn by four horses, presented one of the most attractive features of the procession. When all had passed, the youth and children were drawn up in line in front of the Common, when J. B. Fairbanks, president of the day, introduced to them the Governor of the Commonwealth, John D. Long, who addressed them briefly, but appropriately. All repaired now to the tent which covered the northeastern section of the Common, and was furnished with seats for the large assembly. The president of the day made an appropriate address at the opening of the exercises, and then introduced the chaplain of the day, Rev. Daniel Wight, a native and resident of the town, who offered prayer. A hymn, composed for the occasion by Mr. Isaac Gale, was then sung, after which the act of the incorporation of the town was read by Hon. Henry B. Pierce, Secretary of State. The centennial address, by Hon. John W. Bacon, followed, which was full of the most deeply interesting facts appertaining to the history of Natick, and couched in the plain and easily-comprehended language for which Judge Bacon was remarkable.

A centennial song, by Mrs. Mary L. Turner, was next in order, and this was followed by the centennial poem, written and delivered by John B. Mann, Esq., a resident of Washington, D. C., but a native of Natick. This poem was entitled "The Spirit of Freedom as illustrated in a Town's History."

At the close of the exercises in the tent about 650 of the audience dined together in Concert Hall, after the divine blessing had been invoked by the chaplain; Mr. Alexander Blaney was toast-master, and Governor Long responded happily to the sentiment, "The Old Bay State." Hon. John W. Candler, member of Congress then (and now Congressman-elect) from this district, responded to the sentiment "The Congress of the United States;" Hon. Robert R. Bishop, president of the Senate of the Commonwealth, spoke for "The State Legislature;" Colonel William Nutt, chairman of the selectmen, and R. E. Farwell, Esq., chairman of the Board of Assessors, spoke for the "Town of Natick," while James McManus, Esq., responded to the toast, "Our Adopted Fellow-Citizens;" Charles Q. Tirrell, Esq., made an address for "The Ladies of Natick," in which he gave some personal history; Rev. Daniel Wight responded to the toast, "Our Free Public Libraries."

Natick was gay on this occasion with banners, streamers, flags and beautifully-arranged decorations. These last extended to all the public buildings, the most important business blocks and stores and many private residences, conspicuous among which was "The Home of Wilson," on West Central Street.

Among the relics and curiosities exhibited in Clark's North Hall were a rare copy of the old Indian Bible, translated by Rev. John Eliot, the apostle to

the Indians, printed in Cambridge in 1685, the silver service presented to the Hon. Henry Wilson by the citizens of Natick, and the original challenge sent to Mr. Wilson by Brooks, of South Carolina, to fight a duel.

In 1883 Captain Willard Drury gave to the town, in trust, the sum of \$500, on condition that the town shall apply the net annual income from the same to the care and preservation of his lot in Dell Park Cemetery, and the town accepted the trust.

In 1883 the appropriations of the town (including county and State taxes) amounted to \$79,240.33.

In 1884 the grants, including the same, were \$82,367.20. The town voted to grant licenses for the sale of intoxicating drinks, the votes standing 780 to 631. July 28th Stephen A. Sweetland was appointed one of the Board of Registrars, to fill the vacancy caused by the resignation of Willard W. Wight. In the Presidential election, 1884, the votes for Presidential electors were divided as follows: 638 for Republican candidates, and 460 for Democratic candidates. Francis Bigelow had 933 for Senator in Fourth Middlesex District. For Governor George D. Robinson had 689 votes, and Julius H. Seeley, 534.

1885. The town voted to grant licenses to sell intoxicating liquors by 690 to 678 votes. At the State election Frederick O. Prince received 671 votes, and George D. Robinson, 581. For Senator, Francis Bigelow received 805 votes, and Alexander Blaney, 528. For Representative, Justin Perry received 699, and Albert Mead 640 votes.

1886. The town voted not to grant licenses, by a vote of 853 to 687. August 20, 1886, George L. Sleeper, Esq., who had long been town clerk, having been appointed postmaster, resigned his office, and James McManus was chosen in his place, to act till the date of the annual meeting in 1887.

1887. The town voted not to license by a vote of 938 to 827. The vote for town clerk stood 911 for James McManus and 882 for Irving G. Glidden. David H. Clark was chosen Representative by a vote of 905, over David J. Murphy, who received 716 votes.

1888. The vote on the license question stood 921 to 844 against granting licenses.

Under the article "To see if the town will intrust the money granted for necessary aid to soldiers, sailors and families of the slain, to the Post of the Grand Army of the Republic located in this town to be disbursed under the direction of said Post, to such persons residing in this town as are to receive it, according to Chapter 189, of Acts of Legislature of 1855," the town voted in the affirmative.

At a special town-meeting April 26, 1888, the town was divided into two precincts, 1 and 2, for the conducting of State and National business and elections, the legal votes in Precinct No. 1 being at the time 1820, and in Precinct No. 2, 287.

The registrars of voters for 1888 and 1889 were

George L. Bartlett, S. A. Sweetland and Patrick Mahan, with James McManus, town clerk, member ex-officio. Francis Bigelow and Bernard F. Moran were wardens for Precinct No. 1, with Irving C. Glidden clerk, while in Precinct No. 2, Michael D. Sheenan and Gustavus Smith were appointed wardens, with Frank J. McCullough, clerk. Henry A. Gray and Charles Stevens were appointed supervisors of election for Precinct No. 2, by Governor Ames upon petition.

At the Presidential and State election November 6, 1888, the Democratic candidates received in Natick 968, and the Republican 859; the Prohibition ticket received 72 votes,—total 1899.

For a Representative in Congress for the Ninth District, Edward Burnett, 1008 votes; John W. Candler (who was elected), 831; and John C. Park, 54. For Governor, William E. Russell had 982 votes; Oliver Ames (who was elected), 838; and William H. Earle, 54. William L. Davenport was elected Senator in the Fourth Middlesex District. Colonel Edgar S. Dodge had 162 plurality in Natick. For Representative in the General Court, Albert Mead was elected over Patrick F. Hallinan by 27 votes, after the re-counting of the votes in Precinct No. 1.

1889. The warrant for the annual meeting contained fifty-one articles. The vote on license stood 905 to 645 against granting licenses, being a majority of 260. James McManus was re-elected town clerk by 707 votes, and Edward Clark, treasurer, by 1746 votes. For water commissioner for three years Francis Bigelow was elected, while the Board of Health was composed of Dr. W. H. Sylvester, Dr. William Richards and Isaac R. S. Randall. Among the appropriations were "For enforcing the Liquor Laws \$1000, lighting streets \$3500, sidewalks and crossings of concrete \$1500, the abutters to pay one-half of the expense for the concrete sidewalks," while \$300 were appropriated to publish a pamphlet setting forth the advantages of Natick as a place of residence and for conducting a remunerative business. The grants and appropriations amounted to \$88,270. The selectmen appointed Lyman A. Spooner superintendent of streets with a salary of \$1000. John J. Oakes was appointed one of the registrars of voters.

On the proposed amendment of the Constitution, to prohibit the manufacture and sale of intoxicating liquors to be used as a beverage, the vote of the town, which was cast April 22, 1889, stood for the amendment, 619; against the same, 786. Precinct No. 1 gave for it 592 votes to 595 against it, and Precinct No. 2 gave 27 for it and 191 against it.

May 1, 1889, the valuation of the town was

\$5,314,900, viz.: Personal estate, \$1,096,750; real estate, \$4,317,550—a gain within the year of about \$125,000. Number of polls, 2627; tax, \$77,940; rate per thousand, \$16.80.

REPRESENTATIVES IN THE GENERAL COURT.—As already noticed, the voters of Natick, for a long course of years, declined to be represented in the Legislature.

Before 1856 Samuel Morse, Moses Fisk, Abel Perry, William Farris, Chester Adams, Steadman Hartwell, Aaron Sanford, Nathaniel Clark, Henry Wilson, John Travis, John Kimball and Nathaniel Smith appear to have served the town as Representatives. Of these, Nathaniel Clark (who is now living) was repeatedly called to fill this office. Since 1876 the Representatives have been: 1876, Warren A. Bird; 1877, Noah L. Hardy; 1878 and 1879, Francis Bigelow; 1880, Edward McManus; 1881, Daniel Dorchester, D.D.; 1882, Warren A. Bird; 1883 and 1884, Alexander Blaney; 1885 and 1886, Justin Perry; 1887, David H. Clark; 1888, Albert Mead.

The dates here given refer to the time of election; the service in each case was one year later.

SELECTMEN BEGINNING WITH 1879.

1879, Calvin H. Perry, Josiah A. Bean, Alexander Blaney; 1880, the same board was elected; 1881, Daniel A. Mahony, James W. Valentine, William Nutt; 1882, Daniel A. Mahony, James W. Valentine, Aaron Wheeler; 1883, Warren A. Bird, Alexander Blaney, Joshua A. Bean; 1884, the same board was elected; 1885, Warren A. Bird, Albert Mead, Reuben Hunting; 1886, Gustavus Smith, Daniel A. Mahony, Albert Mead; 1887, Daniel A. Mahony, Albert Mead, Edgar S. Dodge; 1888, Samuel W. Mann, Edgar S. Dodge, Patrick F. Hallinan; 1889, Samuel W. Mann, Arthur F. Atwood, Frank B. Tilton.

The assessors of the town since 1879 have been as follows:

1879, Reuben Hunting, Edward McManus and Royal E. Farwell; 1880, Royal E. Farwell, Edward McManus, Reuben Hunting; 1881, Royal E. Farwell, Reuben Hunting, Patrick Pettee; 1882, the same board was elected; 1883, Reuben Hunting, Willard W. Wight, Patrick Pettee; 1884, Patrick Pettee, James W. Valentine, William J. Cronin; 1885, Patrick Pettee, James W. Valentine, Amos P. Cheney; 1886, James W. Valentine, Willard W. Wight, David Finn, Jr.; 1887 and 1888, the same; 1889, David Finn, Willard W. Wight, Daniel Coleman.

SENATORS, FOURTH MIDDLESEX DISTRICT.

Charles Q. Tirrell in 1880 and 1881; Walter N. Mason, in 1882 and 1883; Francis Bigelow, in 1884 and 1885.

In 1888 Charles Q. Tirrell was chosen one of the Presidential electors, and cast his votes for Benjamin Harrison as President, and Levi P. Morton as Vice-President, of the United States.

In examining the entire records of the town, leaf by leaf, including the Indian, for the purpose of discovering the historical information given above, the work of the compiler has been greatly facilitated by the convenient arrangement in making entries adopted by all the town clerks of later years.

CHAPTER XXXIX.

NATICK—(Continued).

ECCLESIASTICAL.

Organization of the Indian Church—Eliot's Translation of the Bible—The Praying and Instruction of the Same—Mr. Eliot's Death—Memorial Windows to Perpetuate his Memory—Pastor Takwambuit—Rev. Messrs. Pemberton and Badger Missionaries to the Natick Indians—Organization of the Congregational Church in the Centre of the Town—Sketches of its Pastors—The Baptist Church—The Methodist Episcopal Church—St. Paul's Episcopal Church—The Roman Catholic Churches—The Unitarian or Eliot Church—The John Eliot Church—The Universalist Church.

THE first minister of the Gospel who preached in Natick was Rev. John Eliot, who, we are assured, often prayed for divine direction, as he rode through the forests of this region in search of the best location for a new Indian settlement; and whoever stands on one of the hills that overlook the part of the valley of the Charles River where is now the pleasant village of South Natick, must be convinced that the prayers of the anxious man were answered. For in all this region, where excellent sites for villages abound, hardly another place combining so many advantages for the successful prosecution of his experiment, and at the same time so attractive and beautiful, could have been discovered.

The earliest gathering in Natick for religious purposes was doubtless in 1650, for during that year the site for the plantation was selected, the Indian title to the land secured, and the work of laying the foundations for the new settlement begun. But few, if any, of the Indian families that a little later built their wigwams and constituted the Indian community here, came to the place before 1651, but during the preceding year Indian men, in considerable numbers, were felling the trees and doing other preparatory work upon the Plantation. To these men, gathered together under the shade of the famous "Eliot Oak," Mr. Eliot doubtless preached the first Gospel sermon that was ever listened to in Natick. His hearers were not only respectful, but thoughtful, for, coming at the preacher's invitation from the Indian settlements, where he had occasionally held religious services, and especially from Nonantum, they were the most enlightened and religiously inclined of all the Indian population of the region, and for four years some of them had been under his instruction. That his preaching and other religious services had not been in vain Mr. Eliot was thoroughly convinced months before the Natick Plantation was founded, for many of his hearers at Nonantum abandoned their wicked habits and heathenish customs and became thoughtful, sober-minded and conscientious. Among these the chief, Waban, and his son, Waban, Jr., were conspicuous.

After the removal of the Indians to Natick and the establishment of regular religious services here, the fruits of Mr. Eliot's labor for the spiritual welfare of the Indians became more and more apparent. In a considerable number of instances the reformation

seemed real as tested by time, and thoroughly pronounced; but though for many months Mr. Eliot had regarded a number of the Indians as true converts to Christianity, with characteristic prudence he had postponed the organization of a Christian Church.

But in 1652 he believed that the time had arrived to take at least the preliminary steps for such an organization. October 13th of that year a large company met in this place for the purpose of listening to the statements and confessions of such of the Indians as might be deemed candidates for church membership. Among the visitors were a number of the pastors and lay messengers from the churches in Boston and vicinity and some of the best educated and promising from other settlements of the Praying Indians.

The early morning was spent in prayer and listening to discourses by Mr. Eliot and two of the Indian exhorters. Quite a number were ready to relate their Christian experience, but as they were slow of speech and Mr. Eliot wished to make a full record of their statements, the work of examination could not proceed rapidly. Night approached before the fifth of the candidates—the schoolmaster—could finish his confession, and it was deemed best to adjourn the meeting. The statements made on this occasion by the Indians were soon published in London, and produced a profound impression upon many of the leading philanthropists and Christians of England.

The adjourned meeting for the examination of candidates for church membership did not take place till 1654. This was held in Roxbury, and, it is supposed, in Mr. Eliot's meeting-house, July 13, 1654, and was, in most respects, similar to the former gathering in Natick. But while the examinations seemed satisfactory, Mr. Eliot advised further delay, and so great was his prudence that it was not till 1660, or eight years after the first meeting for examining candidates, that the Indian church was organized at Natick. No records are known to exist respecting the exact date of this proceeding or of the number received at that time into church fellowship. Indeed, the entire records of the Indian church of 1660 have doubtless perished. We have every reason to suppose that all the transactions just named were recorded, as well as the important matters appertaining to the growth and condition of the church during the life of Mr. Eliot, at the least; but his books of records were kept in Roxbury, and some years elapsed before any one else served as clerk of the church in Natick. All the preserved records of the Plantation during the seventeenth century are upon a few loose pieces of paper, and upon these a considerable part of the entries were made in the Indian language.

We come now to the great work in the life of the Indian apostle and first minister of the Gospel in Natick. Reference is here made to his translation of the entire Bible into the Indian language, and the printing and distribution of the same among the Indians.

From his preaching and other religious instruction Mr. Eliot hoped for good results, but for a number of years the conviction had been growing upon him that the Indians must have the written Word as well as the spoken, if permanent results were to be expected. In his preaching services only fragments of the Bible could be read or recited, while the children in the school and all the families in their wigwams needed the entire word of God before their eyes from day to day before the Gospel could be expected to control the hearts and lives of any considerable number of the population. In other words, his views upon this matter coincided exactly with those of the most intelligent of the Christian missionaries to the heathen at the present day. It was a formidable undertaking which he proposed, sufficiently so to require indomitable courage, for the difficulties to be encountered were such as probably no mortal before him had been called to meet.

The Indians had absolutely no literature, not even a scrap of a printed book or paper of any sort. The philologists of the present day, even when studying languages that have not been spoken for ages, have well-stored libraries at their command, but Mr. Eliot had nothing to begin with but the indistinctly spoken and very common words of the Indians in their ordinary conversation. And those words were of a formidable character, some of them containing between forty and fifty letters, and all bearing no conceivable analogy to the words of any other known language.

Moreover, the Indians knew nothing of the nice shades of meaning that are to be found so often in the Hebrew Bible, and in many of the modern translations thereof.

That Mr. Eliot appreciated the difficulties he would encounter when he entered upon his preparation for this work is hardly probable. But as early as 1649, a year before he selected Natick for his Indian plantation, he expressed in letters his ardent desire to translate some part of the Bible into the Indian tongue; and, two years later, he referred in a letter to his Indian assistant in the work of translation as making some progress in the undertaking, which he had no hope, he said, to see completed in his day.

With his other labors he early found that he must have assistance, if any considerable progress should be made in the translation; but this he could not obtain through lack of funds, as he had a family of five sons and one daughter to support. To what extent the English Society for Propagating the Gospel among the American Indians aided him in this emergency we know not, but certain it is that the funds for printing the New Testament in the Indian language came from that quarter. This printing was accomplished in September, 1661, and twenty copies of this part of the Bible were soon sent to England, one of which was destined for the King, Charles II., whose

"royal favor and assistance" were craved for carrying the Old Testament through the press. This last was an undertaking that required two additional years, but in 1663 it was accomplished, and, as it would appear, without any aid from the royal purse. The two Testaments were then bound together, and to the whole Bible thus completed were added a catechism and the Psalms of David in Indian verse.

This was the first Bible that was printed in New England.

What the edition cost cannot be ascertained. When it was about half done there had been paid out as one item "two hundred and thirty-seven pounds and five shillings," and it was estimated that two hundred pounds more would be needed. The press and types, with all the other necessary materials for the work, were sent over from England, and the printing was done by Samuel Green and Marmaduke Johnson. How large this edition was is uncertain, but it probably consisted of fifteen hundred copies. When the New Testament had been completed, the Indians were at once supplied with two hundred copies strongly bound in leather.

About twenty years later Mr. Eliot had the satisfaction of seeing a second edition of his great work, the New Testament portion of which was printed at Cambridge in 1680, and the Old Testament at the same place in 1685, by Samuel Green. Whether alterations and improvements had been made for this second edition we know not, but the supposition that this was the case is not improbable. To this edition belongs the Indian Bible which is kept in the safe of the town of Natick, in the town clerk's office. The rare book belongs to this town. It is, perhaps, about eight inches long, five inches wide and two or a little more inches in thickness. This Bible is a treasure, but it is supposed that no living man is able to read it. This great work of his eventful life having been accomplished, the first Gospel minister of Natick died at Roxbury, May 20, 1690, at the age of eighty-six years. He was buried in the ministers' tomb in that place, where a monument was erected to his memory. In October, 1847, a few of the citizens of Natick erected a monument to commemorate Mr. Eliot's life and work, at South Natick. It is a neat sandstone shaft, costing between two and three hundred dollars.

The Eliot Church and Society of Newton (the ancient Nonantum) have just erected and dedicated one of the most convenient and elegant church edifices in New England. This church has perpetuated in its name the memory of the apostle to the Indians as well as that of one of his sons, John Eliot, Jr., who, after assisting his father greatly in his missionary work for a considerable period, became pastor at Newton (then called Cambridge Village), more than two hundred years ago. There have been placed in the new church edifice at Newton ten memorial windows, among which one in the nave is very con-

spicuous. It represents, with singular appropriateness, Rev. John Eliot preaching to the Indians. John Eliot, Jr., is said to have been an excellent pastor and preacher, but died when comparatively young, in 1668.

Among the memorial windows just placed in Memorial Hall, Harvard University, are two (the gift of the class of 1878), in which appear, in full size and side by side, the figures of Warren and Eliot, the one in the act of presenting a musket and the other offering a Bible. Under the figure of Warren is a small panel representing him as a statesman, while under that of Eliot we see the man of God offering the Gospel to the savages.

The Natick historian, Oliver N. Bacon, has preserved for us the following extract from the speech of Hon. Edward Everett, delivered at Bloody Brook: "Since the death of Paul a nobler, truer and warmer spirit than John Eliot never lived. And taking the state of the country, the narrowness of the means, the rudeness of the age, into consideration, the history of the Christian Church does not contain an example of resolute, untiring, successful labor, superior to that of translating the entire Scriptures into the language of the native tribes of Massachusetts—a labor performed, not in the flush of youth, nor amid the luxurious abodes of academic lore, but under the constant burden of his labors as a minister and preacher, and at a time of life when the spirits begin to flag."

When he was eighty-three years of age Mr. Eliot preached to his Indian friends as often as once in two months, and as long as he was able to give them this amount of service they were adverse to any movement respecting the choice and ordination of his successor. But the matter assumed a new aspect when the aged man found the journey from and to Roxbury wearisome.

When the election of a new pastor at length took place, the choice fell upon Daniel Takawambpait, who, without doubt, was also the first choice of Mr. Eliot. He was an Indian. His name is variously spelled in the records of that time, and sometimes certainly he, himself, omitted the "b" in giving his signature, while, perhaps oftener than otherwise, he called himself simply *Daniel*, the name by which he was most generally known.

Takawambpait appears to have been one of the earliest converts to Christianity and to have enjoyed the confidence of Mr. Eliot and all the better class of the Indians, while his scholarship was so good that for years he taught the Indian School at Natick. Two of the pastors of neighboring churches, after having made the tour of the Indian settlement in 1698, reported thus: "At Natick we find a small church consisting of seven men and three women. Their pastor (ordained by that reverend and holy man of God, Mr. John Eliot, deceased) is Daniel Takawambpait, and is a person of good knowledge.

Here are fifty-seven men, fifty-one women and seventy children under 16 years of age. We find no schoolmaster here and but one child that can read."¹ This report indicates a waning interest in the religious concerns of the Natick Indians after the death of Mr. Eliot, and this impression is confirmed by a statement in Mather's "Magnolia," under date of 1693: "The Indian Church in Natick (which was the first Indian church in America) is, since blessed Eliot's death, much diminished and dwindled away. But Mr. Daniel Gookin has bestowed his pious care upon it." Mr. Gookin was a son of the Indian superintendent, Daniel Gookin, of Cambridge, and pastor at Sherborn. This was during the pastorate of Takawambpait, and from this reference to Mr. Gookin's preaching to the Natick Indians and from the interest they took in his services as indicated by a vote they passed, respecting his labors about the same time, it is plain that what he did for their spiritual good was done during some temporary illness or absence of their pastor.

This Indian minister, Takawambpait, died September 17, 1716, and his tomb-stone stands in the inner line of the sidewalk, nearly in front of the Unitarian Church in South Natick.

It should be stated in this place that the house erected by the Indians for school and religious purposes, under the superintendence of Mr. Eliot, had become very poor and unfit for use by or before the year 1698. So May 21, 1699, the Indians sent to the Governor and General Court of the Province a petition for the privilege of selling "unto John Collier, Jr., carpenter, a small nook of our Plantation," to remunerate him for building for them a new meeting-house. In this petition they speak of thirty families on the plantation, and "that we are now greatly diminished and impoverished," that "our meeting-house where we were wont constantly to meet Sabbath days and lecture days to worship God is fallen down and we are not able to build us another." And later, 1702, June 3d, the General Court received a statement from this John Collier, in which he says, "I, John Collier, have built and erected a Meeting-house for the Public worship of God amongst ye Indians of Natick, according to agreement with ye town of said Natick and also the advice and direction of the Hon'ble Lt.-Governor and ye hon'ble Mr. Danforth." The land was granted, not exceeding 200 acres, to Mr. Collier June 5, 1702. This house stood upon the site of the one erected in 1651; Daniel Takawambpait preached in this, the second meeting-house, probably twelve or thirteen years.

That another Indian, John Neesmunin, next preached to the Indian congregation at Natick we infer from the fact that at a general meeting of all the freeholders and voters of the plantation May 11, 1719, at which a list was adopted of the real pro-

¹ Higlow's "History."

prietors of Natick, the name of this Indian appears as the last on the list and against it is written, "If he shall live and die in the work of the Gospel ministry in Natick." Of his qualifications for and success as a preacher we know nothing. He may have died soon, for the next year this record appears, "The town of Natick had agreed with Josiah Shonks to imply him of preaching at Natick for six months and begin said work 19th of December, 1720, for five pounds."

The ministry of this Indian must have been short, for during the following year other and more definite arrangements were made for the religious instruction of the Indians.

About this time, 1721, another meeting-house was erected for the Indians, on the spot where the school and meeting-house was built in 1651. A part of the funds required for this purpose may have come from England.

The Board of Commissioners for Propagating the Gospel among the Indians of America took measures in the year 1721 for supplying the Natick Plantation with a better and more permanent ministry.

Oliver Peabody, who graduated at Harvard College in 1721, was requested by the Board above-named to go at once to Natick, as a missionary to the Indians. Probably without any extensive theological education, but with a good mind and a warm and devoted Christian heart, Mr. Peabody obeyed this summons, and is said to have preached his first sermon in Natick, August 6, 1721. He found, we are told, but two white families in the place, and, later, committed to writing this statement: "After my most diligent inquiry and search, I can find no records of anything referring to the former church in Natick, nor who were members of it or baptized, till my coming to town." Mr. Peabody seems to have labored faithfully in this field before he was ordained or a new church organized, for the space of eight years. "June 24, 1728, Voted that Rev. Mr. Peabody, during his continuance in the work of the ministry in Natick, have the sole use and improvement of the Ministerial Lot," of which more hereafter. And Nov. 25, 1728, "Voted that there be a contribution for y^e Rev. Mr. Peabody the last Sabbath of every month, and Lieut. Wamsquam to hold the box." Of course this was an Indian provision for the support of their ministers. And the Indian Proprietors' Records show that grants of land were made to their minister by the Indians in 1729, 1730, 1732, 1733 and 1734. The lots given to him were often of considerable size, making in the aggregate two hundred and eleven acres, but probably not very valuable, as much of the common and undivided land conveyed by the Indians in those years covered the poorer portions of Natick. But certainly his parishioners showed their good will by these gifts to their pastor. A considerable portion of Rev. Mr. Peabody's salary doubtless came from the English friends of this enterprise, just as they had

furnished the funds for printing Rev. Mr. Eliot's Indian Bible.

A committee of the Board of Commissioners visited Natick October 21, 1729, to consider particularly the religious concerns of the plantation, and by their advice a new church was organized, consisting of three Indian and five white male members. This organization took place December 3, 1729, Rev. Mr. Baxter, of Medfield, preaching the sermon. On the 17th of the same month Mr. Peabody was ordained at Cambridge, and he was permitted to report to a convention of ministers in Boston July 7, 1743, that "there have been added to our church of such as I hope shall be saved—about fifty persons of different nations—during the past two years, whose lives witness in general to the sincerity of their profession."

Meanwhile the white population of Natick was increasing with considerable rapidity, and in 1749 it appears to have outnumbered the one hundred and sixty-six Indians. The English had, at that date, fifty dwellings and the Indians forty.

Comparatively few of the white families had settled in the immediate vicinity of the Indian meeting-house, for Peagan Plain (where the central village of the town is located) was fast becoming a favorite place of residence. Besides, it is perfectly plain that the "color question" (which, in many minds, is now so difficult of solution) was beginning to affect public opinion in Natick one hundred and forty years ago. The Indians appear to have been respectable, and they certainly transacted their public business in an orderly and becoming manner, but the prejudices awakened by the matter of nationality were nearly inveterate. These statements will aid in understanding the animus of the votes that follow, which are copied from the parish records, for Natick had not as yet arrived at the dignity of a town, but was only a parish or precinct:

"January 25, 1749-50, voted to accept the Rev. Oliver Peabody as the parish minister, upon condition he will come to the centre of the parish to preach and so long as he preaches there."

The same conditions were annexed to the following: "Voted to grant Mr. Peabody £300 salary, old tenor, yearly." At a later period, when the article in the call of the parish meeting was—"To see whether they agreed to take Rev. Mr. Peabody, the Indian pastor, to be the Parish Minister, the vote stood twenty-four to six against the proposition." So this excellent man lived and died the pastor of the Indians, who loved him as a father. His death took place February 2, 1752, after a ministry of thirty-one years, during which time he baptized one hundred and ninety-one Indians and four hundred and twenty-two whites, and admitted to the church one hundred of the latter and thirty-five of the former. Two hundred and fifty-six Indians died during the same period.

From the above it is evident that, in the face of the votes of the parish, a large part of the white popula-

tion of Natick regarded Mr. Peabody as their religious teacher.

Mr. Peabody's successor in the ministry at Natick was Rev. Stephen Badger. In a letter to the corresponding secretary of the Massachusetts Historical Society, written five or six years before the close of his long pastorate, Mr. Badger said: "Immediately previous to my settling in this place a church was gathered which consisted partly of English and partly of Indians, and though some additions were soon after made of Indian professors, yet, from the causes already mentioned, a decrease gradually took place and has continued to the present time."

From this statement it has been generally supposed, and that not without reason, that the Natick Church which was gathered by Rev. Mr. Peabody was disbanded at or soon after his death, in 1752. If so, it was a very unusual proceeding for which no adequate reason can be imagined.

Mr. Badger was born in Charlestown in 1725, of humble parentage, as the Historian Biglow declares, because his name stood last of his class in the Harvard College catalogue, at a time when the names of the students of that college were arranged upon its lists "according to the real or supposed dignity of their parents."

Be this as it may, Mr. Badger graduated in 1747, and in March, 1753, he was ordained by the Commissioners for Propagating the Gospel in New England, as a missionary over the Indians in Natick.¹ From the beginning to the end of his long pastorate of about forty-six years Mr. Badger enjoyed but little peace, for the local divisions among the people of the town, especially in regard to the location of the meeting-house, which so annoyed and hindered the usefulness of his predecessor, continued and bore fruit during this entire period. The third meeting-house, which had been built chiefly for the accommodation of the Indians upon the site of their first rude building for school and religious purposes, had become unsuitable for public worship before the death of Rev. Mr. Peabody, and soon after Mr. Badger had commenced his ministry here the fourth house had been raised and partially finished upon the same locality. At an early day such progress had been made in this work that the building could be used for the Sabbath services, but it was not finished for thirteen years, or till 1767. This delay was due to the prevailing contentions. The minister appears to have given good satisfaction to the Indians, but the white inhabitants were very unwilling to acknowledge the "Indian Missionary" as their Pastor, and for a considerable period did but little for his support. Biglow asserts, in his "History," that "a large part of the white people of his (Mr. Badger's) day had adopted as many of the Indian manners and habits as the Indians had of theirs, so that a considerable number of both nations

were but half civilized, and their pastor received such treatment as must naturally be expected from such a flock." Obviously this was a harsh judgment of the case, for Mr. Badger came to Natick and continued here as "the Indian Missionary," and the white people had taken no part in his settlement.

The action of the church with regard to obtaining another minister we only know from inference, but the parish, July 6, 1756, "voted to concur with the church in their unanimous choice of the Rev. Solomon Reed to be their minister;" and to grant Rev. Mr. Reed £66 13s. 4d. as encouragement for him to settle with them, fixing his annual salary at £53 6s. 8d. in case he should accept the call. The former of these amounts, it will be understood, was intended as a gift according to the custom of the times when a pastor was called. Mr. Reed, who had been pastor of a second church in Framingham for a short time and was highly esteemed in the region, as a matter of course, declined the invitation, as the church had already its missionary pastor.

In 1762 the parish took action relative to the support of Mr. Badger that had the appearance at least of peaceful intentions, and voted £19 6s. 8d. annually for four years for "his salary." A committee chosen by the parish, consisting of Mr. William Baldwin, of Sudbury, Captain Josiah Stone, of Framingham, and Samuel Bullard, of Sherborn, appears to have labored here to settle "disputes and controversies," but with what success is uncertain, but in 1773 the town voted "to repair the meeting-house and that the selectmen see it done."

In 1778 the town voted refusing Mr. Badger as its minister and forbidding his preaching any more at the cost of the town, but very soon was found voting the money for his salary, including a considerable sum that had been withheld, with interest on the same. Later, propositions were made by both parties for the settlement of the difficulties, but all without favorable results, till July 23, 1798, the town "chose a committee to treat with Mr. Badger, and request of him in writing what objection he has to the town to have preaching in said town; if none, to manifest the same in writing; if otherwise, to join him in calling a council, and if he refuse, to call a council without him." This action seems to have brought matters to a crisis, for he closed his services in Natick in 1799, and died about four years later, viz., August 28, 1803, at the age of seventy-eight. Mr. Badger was buried at South Natick. Mr. Biglow says of him, "Like many of his distinguished contemporaries in the ministry, he was a Unitarian; but like the rest, with the exception of Dr. Mayhew, of Boston, and Dr. Howard, his successor, he thought that, though it was lawful for them to avow this sentiment, it was not expedient." This testimony plainly should be taken with considerable allowance. During the later years of Mr. Badger's ministry many Natick families connected themselves with the congregations in neighboring

¹Biglow's "History," p. 60.

towns,—thirty-three in 1797,—and at his death the church became extinct. Sixty-nine were admitted to the church during the ministry of Mr. Badger, and he is the "Parson Lothrop" who figures largely in Mrs. Stowe's "Old Town Folks." No date is given, but the Indian proprietors laid out, in their own right, land "to satisfy a purchase for the Rev. Mr. Bagger."

The fourth meeting-house seems to have become unfit for use before the close of the eighteenth century.

Anticipating what was to come, September 18, 1798, the town voted to build a new meeting-house and fixed the site of it on the ministerial lot at "the cross-roads, where the Old Pound formerly stood." The brick church of the Congregational Society now stands upon this spot. This fifth church was to have a "suitable porch in front." The edifice, for the building and finishing of which fifteen hundred dollars were raised, was commenced in June, 1799, and was forty by forty-five feet in size and two stories high. The town voted "to paint the roof of the meeting-house red and the rest white," to rent the pews, that the selectmen should hire the preaching and that "the blacks sit in the hind seats in the north part of the galleries."

In February, 1802, a new church was organized with ten male and thirteen female members, and a month later William Goodnow and Abel Perry were chosen its first deacons. April 22, 1802, a call was given by the church to Mr. Samuel Brown to become pastor, and the town concurring voted to give Mr. Brown a salary of \$300 per year, twelve cords of wood and the use of the ministerial lot, besides building a decent two-story house and barn within two years, and providing house-room for him until all this was done. But before he could answer the call, his sickness and death intervened. Three years passed and Rev. Freeman Sears was called to the pastorate, with similar proposals regarding support, "so long as he serves the town as a faithful gospel minister and supplies the desk." But such changes were subsequently made in the conditions of settlement that Mr. Sears built a house for himself on leased land, which is now the first house fronting north on West Central Street, later the home of Rev. Martin Moore.¹

Mr. Sears was a graduate of Williams College in 1804, became a licensed preacher in 1805, and was ordained pastor of this new church January 1, 1806. He is represented as a man of good intellectual attainments, of pleasing address and of consistent and unaffected piety. Once each month he heard the children of the congregation recite the Assembly's Catechism and in every good work was laborious and faithful. But pulmonary disease forced him to spend the winter of 1810-11 in Georgia, and he reached home very feeble June 10, 1811. On the 30th of

that month he died at the age of thirty-three years. He was buried in the cemetery just north of his church, where the brick blocks of Messrs. Rice, Morse and Winch now stand. In 1857 his remains were removed to a central place in Dell Park Cemetery, and in 1873 a granite monument was erected over them at the expense of the friends of true piety and genuine worth in Natick.

Nearly four years now elapsed before another pastor was settled, and in the interval a number of clergymen preached as candidate. November 18, 1813, a call to the pastorate was extended to Rev. Martin Moore, in which the town concurred, offering an annual salary of \$500 and the use of the first pew. Mr. Moore was a native of Sterling, and a graduate of Brown University in the class of 1810. His theological studies were pursued under Rev. Elisha Fiske, of Wrentham. He was ordained at Natick February 16, 1814, when he was twenty-four years old, and the ordaining council "voted that the Bishops who may be in the pulpit at the time of the consecrating prayer be requested to lay on the hands of the Presbytery." His wife was Miss Sarah Fiske, of Natick. Under the ministry of this pastor, missionary concerts were established, the first Sabbath-school in Natick was organized, with Deacon Oliver Bacon as its superintendent, the first Standing Committee of the church was appointed, the South Middlesex Conference of churches came into existence, the first Temperance Society with a Total Abstinence Pledge began its work, and many other forms of Christian usefulness were introduced. One hundred and eighty-three members were admitted to the church during his pastorate. Dismissed in 1833, Mr. Moore was a pastor at Cohasset for eight years, when he removed to Boston to become one of the editors and proprietors of the *Boston Recorder*. In this last-mentioned service he spent nearly twenty years, and died March 11, 1866, aged seventy-five years.

Rev. Erasmus D. Moore was the next pastor of the Congregational Church. Born in Winsted, Conn., educated at Amherst and Yale Colleges and Yale Theological Seminary, he was ordained here November 6, 1833. His salary was \$600 per annum. The year following the settlement of Mr. Moore, the Boston & Worcester Railroad was opened, and with a large increase of business in the town, the meeting-house became too small, and a new one was erected upon the same site. This was done in 1835, at a cost of about \$8000. Thirty-three were admitted to the church during the short pastorate of Mr. Moore, who was dismissed in 1838. Later he was settled in Kingston and Barre, and then became one of the editors of the *Boston Recorder*. Later still, viz., in 1847, he published the *Boston Reporter*, which, after two years was enlarged and became *The Congregationalist*. For six years Mr. Moore was employed in preparing the Old Colony and Bay State records for publication.

Rev. Samuel Hunt succeeded Mr. Moore as pastor.

¹ Church Manual.

Graduating at Amherst College in 1832, and studying theology at Princeton, N. J., he was ordained in Natick July 17, 1839, on a yearly salary of \$650. He was an active and useful pastor here for about eleven years, when he was installed in Franklin, where he labored for fourteen years. Later he became the superintendent of education among the freedmen, and finally the private secretary of Hon. Henry Wilson, his former parishioner and friend. "The History of the Rise and Fall of the Slave Power in America," which Mr. Wilson left unfinished at the time of his death, Mr. Hunt completed and carried through the press. In 1858 he prepared "The Puritan Hymn and Tune Book."

The next pastor of the church was Rev. Elias Nason, who was ordained May 5, 1852. His salary for the space of three years was \$900, and then raised to \$1000. Mr. Nason graduated at Brown University in 1835 and studied theology with Rev. Theodore M. Dwight in Georgia. The congregation having again outgrown the meeting-house, this was sold to a Universalist Society, which later, becoming extinct, sold the house to the Roman Catholic denomination. This, enlarged, is the Catholic Church of the present day in the centre of Natick. The Congregational Society then erected a third meeting-house upon the site of the one removed, during the years 1853-54, which was dedicated Nov. 15th of the latter year. Including the bell and organ, that edifice cost \$28,103.65. Mr. Nason remained pastor about six years and admitted to the church one hundred and twenty members. In 1858 he was dismissed and became pastor of the Mystic Church in Medford. Later he was settled in Exeter, N. H., and then removed to North Billerica, Mass. He was a voluminous writer and lectured more than one thousand times before literary and scientific associations. Mr. Nason died of Bright's disease June 17, 1887, aged seventy-six years, leaving five children, one of whom is Rev. Charles P. H. Nason, of Germantown, Pa.

Rev. Charles M. Tyler, D.D., was the next pastor. He graduated at Yale College in 1855, and studied theology at the Union Theological Seminary, New York. His first settlement was at Galesburg, Ill., and he was installed at Natick May 19, 1859, upon a salary of \$1200, which was raised to \$1600 in 1866. Mr. Tyler represented this town in the Legislature of 1862, and was the chaplain of the Twenty-second Massachusetts Regiment during "the Wilderness Campaign." His Natick pastorate continued about nine years, or until December 31, 1867, when he accepted a call to the South Congregational Church in Chicago. The changes that followed the great fire in that city in 1872 introduced him to the pastorate of the First Congregational Church in Ithaca, New York, where he is most highly respected and increasingly useful. One hundred and ninety-three were added to the Natick church under Mr. Tyler's ministry.

Rev. Jesse H. Jones succeeded Mr. Tyler, July 21,

1869, the salary offered being \$2000. He was born in Belleville, Canada, graduated at Harvard University in 1856, and at Andover Theological Seminary in 1861. During the war for the suppression of the Rebellion he was the captain of a New York company for nearly two and one-half years. During the two years of his Natick pastorate he admitted to the church twenty-eight members. Since leaving Natick Mr. Jones has preached in East and North Abington, and was a member of the Legislature in 1876. His publications have been very numerous, mostly bearing upon the great questions of human rights and progress. He now resides in North Abington.

Rev. Francis N. Peloubet, D.D., who succeeded Mr. Jones, was born in New York City, was graduated at Williams College in 1853, and at the Theological Seminary at Bangor in 1857. Before coming to Natick he had been a pastor at Lanesville, Oakham and Attleborough. His installation here took place January 17, 1872, and the salary given him was \$2500. Two years after his settlement, viz., January 13, 1874, nearly all the business portion of Natick was laid in ashes, including every hall in the place and the Congregational Church, just enlarged and improved at the cost of about \$13,000. This loss of the sanctuary rendered necessary the building of a temporary tabernacle, which, in a rough way, was made ready for religious and other purposes as soon as possible, at the cost of about \$1700. Additional land was purchased upon the east side of the old church lot, and the erection of the present beautiful brick church edifice commenced, and so far completed that the vestries could be used for public worship April 30, 1876. The bell was the gift of Mr. Leonard Morse, and Mr. Nathaniel Clark gave the valuable clock for the church tower. At the date last given the families connected with the congregation numbered 325, the church, 386, and the average attendance in the Sabbath-school was 326.

In 1875 Dr. Peloubet commenced the publication of his "Select Notes upon the International Sabbath-school Lessons," and each year since has given to the public a similar though now greatly improved volume. These "Notes" may now be found in nearly every part of the Christian and even heathen world. And to these he has added a series of Sabbath-school Question Books, which are used in large numbers. These publications demanding more time and thought than any pastor of a large church and congregation can give to such work, led Dr. Peloubet to ask a dismission from his pastoral charge in 1883.

The additions to the church under his ministry were large, as many as 142 having been received during the first five years of his pastorate, and later many more, bringing the whole number received up to 296.

In 1884 Dr. Peloubet published "Select Songs for the Sunday-school," a compilation of the best hymns and tunes for such service in the English language.

In the same year he edited a new edition of Smith's Bible Dictionary. In 1889 he attended, as a delegate from the United States, "The World's Sabbath-school Convention," in London, and took an active part in its proceedings. Mrs. Peloubet was Miss Mary Abbey Thaxter, of Bangor, Me., and they have four daughters, viz., Mary Alice, wife of Prof. L. M. Norton, of the Massachusetts Institute of Technology, Boston, residing in Auburndale; Grace Thaxter, wife of Mr. D. W. Farquhar, a Boston merchant, residing in Newton; Ernestine May, the wife of George A. Swallow, of Allston, and Harriet Louise.

Dr. Peloubet's honorary degree was conferred by the University of Eastern Tennessee, at Knoxville, in 1884.

After Dr. Peloubet's retirement from the Natick pastorate several clergymen were heard as candidates for settlement, without giving entire satisfaction, until public attention was directed to Rev. F. E. Sturgis, D.D., pastor of a Presbyterian Church in Knoxville, Tenn., who had supplied the pulpit—but not as a candidate—for two Sabbaths in 1883. With great unanimity a call was extended to Dr. Sturgis, which he accepted. The salary offered was \$2500, and additional provision was made for the removal of his family. He commenced his labors as pastor in March, 1884, and was installed 14th of May of the same year. Dr. Sturgis was born October 1, 1841, at Riverside, Kennebec Co., Maine, and fitted for college at Augusta High School; graduated at Amherst College in 1864, and from Bangor Theological Seminary in 1868. In October of the same year he was ordained at Skowhegan, Maine. Later he visited Europe and Western Asia, and after his return became pastor of a Presbyterian Church in Knoxville, Tenn., continuing such from 1876 till he removed to Natick in 1884. He married at Knoxville Miss Charlotte C. Abbott, and they have five children. His honorary degree was given by the University of East Tennessee, at Knoxville. The church and congregation are increasing constantly under the pastorate of Dr. Sturgis. January 1, 1889, the church membership amounted to 580, of whom 49 had been added in 1888. Since the opening of the year 1889, 37 have been added, and the membership is 617 now. Amount raised for benevolent purposes in the year 1888, \$8668.57. Recently \$11,050 were subscribed, during one day, for the extinguishment of the debt upon the church edifice. Practically the parish is free from debt.

The superintendent of the Sabbath-school is Mr. George A. Swallow, and Messrs. Charles H. Jones and Melvin Brock are his assistants. Mrs. William P. Bigelow has charge of the intermediate department and Mrs. W. L. Coolidge of the primary. The school is very large, the weekly enumeration repeatedly showing from 600 to 660 present.

Among the deacons in Natick have been Joseph Ephraim, an Indian, who bore this title as early as 1734 and as late as 1754. He was an intelligent and

trusted man. Ebenezer Feleh must have been the associate of Deacon Ephraim for a number of years, and was a man of large ability and great worth. Micah Whitney was a deacon as early as 1761 and as late as 1770. Nathaniel Mann and Nathaniel Chickering were among the early deacons, and so was John Jones, who died in 1802. William Bigelow, born in 1749, was not only a deacon, but the "good Deacon Badger" of Mrs. Stowe's "Old Town Folks." The deacons of the Congregational Church, since it was established in the centre of the town, have been the following: Abel Perry and William Goodenow, who were elected at the first meeting after its organization, viz., March 13, 1802. They always sat—according to the custom of the times—in front of the audience, close to the pulpit, on communion occasions. Oliver Bacon, 1822, but died after one year's service; Samuel Fiske, 1828, served till 1844, when he united with the church at Saxonville; John Travis, 1831, served till his death in 1869; Willard A. Wight, chosen in 1852, and his name is still borne upon the list of the deacons of this church. The same is true of John O. Wilson, chosen in 1852. John R. Adams, chosen in 1869, is still one of the deacons; William L. Coolidge, elected in 1869, served till 1878; George L. Bartlett was chosen January 3, 1878, and is still in office, and is treasurer of the parish; E. H. Walcott was chosen January 1, 1880; Mark B. Babb was chosen January 9, 1884; Gilbert W. Howe was chosen January 14, 1886; Messrs. Bartlett, Babb, Howe and R. H. Randall are regularly officiating deacons at the present time; Frank M. Forbush is the parish clerk; Deacon George L. Bartlett is the clerk of the church.

THE FIRST BAPTIST CHURCH.—By advice of friends of the Baptist cause, a Baptist meeting was held in South Natick, in "Eliot Hall," February 13, 1818, and this was the beginning of the large and influential Baptist organization of the present day in Natick. In October, 1818, Rev. W. H. Watson commenced serving as stated supply, and February 20, 1849, the Baptist Church was recognized, with a membership of twenty-five—eight males and seventeen females. Rev. Mr. Watson was now called to the pastorate. A legally-organized parish was formed March 19, 1849, named, at the time, "The South Natick Baptist Society," but subsequently changed to "The First Baptist Society of Natick." In 1875 this society was dissolved, the church having assumed all its work and having a legal corporate existence. In 1851, a change of locality having been deemed advisable, a lot was secured on the west side of South Main Street, in the Central Village, and a church edifice built thereon, costing about \$5000. This church was moved across the street in 1866 and placed where it now stands. In 1874 a considerable addition was made to it, to accommodate an organ presented to the church by Mr. W. D. Parlin. And now (July, 1889), the congregation having outgrown the church edifice, a large addition is being made to its seating capacity, \$10,000

having been not only subscribed, but actually raised for this purpose.

Rev. W. H. Watson served the church four and one-half years, Rev. A. S. Lyon was pastor four years, Rev. W. H. Walker about two years, Rev. G. M. P. King about nine months, Rev. Addison Parker about three years, Rev. A. E. Reynolds from 1869 to 1883; Rev. F. P. Southerland was pastor from 1884 to December, 1886, and he was succeeded by the present incumbent, Rev. Jonathan Bastow.

Mr. Bastow was born in Bradford, Yorkshire, Eng., in 1835, and began life as a collier-boy. At the age of thirteen he learned to read in a Sabbath-school. His support having been secured by an acquaintance whom he met in England, he came to this country and fitted for college in the academy at Hamilton, New York. In 1861 he graduated from Madison University at Hamilton, studied theology one year, preached in England one year, and then entered the Theological Department of his *alma mater*, from which he graduated in 1864. Mr. Bastow was pastor or acting pastor at Brockville, Ont., Faribault, Minn., at Port Chester, N. Y., and Mansfield, Ohio. Then, for twelve years, he supplied, from three to nine months each, the Baptist Churches at Washington Avenue, (Brooklyn, N. Y.), Jamaica Plains, Arlington, Brookline, Warren Avenue, (Boston), Sixteenth St., (New York), Williamsburg, N. Y., Hamilton, N. Y., and Indianapolis, Ia., receiving many commendations and large compensation. Then, after being pastor three and one-half years at Ogdensburg, N. Y., he became pastor at Natick, January, 1887, where he has been very successful—church membership, 331. The Baptist Sabbath-school began in 1848 with 21 members. It numbers now 366. The largest number ever present, June 30, 1889, was 348. Mr. James M. Forbush is superintendent; Sumner P. Annis, assistant superintendent; Mrs. F. C. Noyes, superintendent of primary department; Mrs. E. B. Bastow, superintendent of Berean class; Mrs. A. E. DeWitt secretary and treasurer.

The deacons of this church have been John J. Perry and Isaac B. Clark, chosen in 1849; Jonathan Colburn and Elijah Edwards, chosen in 1863; Dexter B. Wingate and P. F. Woodbury, chosen in 1878. The clerks have been John J. Perry, Jewett T. Woodbury, Pliny F. Woodbury and D. B. Wingate.

THE METHODIST EPISCOPAL CHURCH.—The first church of this denomination in this region appears to have been organized in Needham, near the boundaries of Natick and Weston, in 1792, and there a small meeting-house was erected in 1799.

Some of the members of this church having removed to the central part of Natick, a meeting-house was erected here in 1834. It stood upon the ground now occupied by the brick engine-house, and was dedicated July 4, 1834. In 1868 the town purchased the building, and the Methodist Society worshipped in Winch's Hall for about six years, or until the great

fire in 1874. Meanwhile, their present church edifice had been so far completed that, in about six months after the fire, its vestries could be used as a place of worship. The spacious audience-room remained unfinished for some years. The edifice was dedicated after a spirited and successful effort had been made to remove the entire amount of debt which the building and furnishing of the same had created.

This church has been very fortunate in its ministers, especially during the last ten years. Drs. Dorchester, Knowles and Gracey are all able men; and so are Messrs. Davis and Toulmin. Dr. Gracey, the present pastor, was born in Philadelphia, 1835; Studied theology in what is now Boston University; went into the army as a private; was made chaplain, and served three years. An active Temperance Republican, he represented for two years the Fourteenth Essex District in the General Court, and served with distinction. The church and congregation are increasing.

ST. PAUL'S EPISCOPAL CHURCH.—The first religious services in connection with the parish of this church were held in Centre Hall, Natick, July 16, 1871, and were conducted by Rev. J. B. Clarke, under the auspices of the Eastern District Missionary Association. Fifteen persons were present. Later Messrs. A. T. Smith, George H. Gunning, George Williams, J. P. Dean and some others were particularly active in the movements which resulted in the organization of the church and society. In 1872-73 the house of worship was erected on Wilson Street, but services were not held in it till 1875, and it was not consecrated till December 13, 1877. Rev. S. F. Fisher was the first rector, and he was succeeded in August, 1878, by Rev. B. R. Gifford, who remained till 1881. Mr. Bigelow then became rector, but his health failing he left after a few months' service. Rev. Frank S. Haraden succeeded Mr. Bigelow, and his ministry continued for the space of seven years and four months, when he removed to Hanover, Mass. During most or all of this period he had charge of the Episcopal Church in Framingham, and was very laborious in his service. Rev. Mr. Bailly is now the Rector. The communicants number about eighty, the Sabbath-school seventy-five, while forty-five families are connected with the parish. Charles Q. Tirrell, Esq., is the superintendent of the Sabbath-school. The wardens and vestrymen are Messrs. Frank E. Cummings, Charles Q. Tirrell, Dr. George J. Townsend, John M. Fiske, Walter E. Rawson, James H. Gilligan, Edward Williams and Edward S. Ramsdell.

THE ROMAN CATHOLIC CHURCHES.—The house of worship which was sold by the Congregational Parish to the Universalist Society was, upon the disbandment of the latter, in 1860, purchased by the Roman Catholic denomination, and by them greatly enlarged and improved. As it now is, the edifice has a very large seating capacity, but none too large for the numerous congregation with which it is very often crowded.

The history of this enterprise is here briefly given. The first services of which any definite date is preserved were held in South Natick during the spring of 1844. These were conducted by the late lamented George Foxcroft Haskins, the founder of the Home of the "Angel Guardian," Vernon Street, Boston. He was a convert to Catholicity in 1843, and was, for many years, resident chaplain of the old House of Reformation in South Boston. In his ministrations to the few Catholics of Natick he was succeeded by the Reverend Frs. Fitton, of East Boston, Gibson, Riordan, Doherty, Hamilton and Walsh, of Saxonville, the latter of whom has just completed his thirty-fourth year of service as Catholic rector of Natick.

Father Walsh studied his classics as well as divinity in St. John's Seminary, Waterford, Ireland, but was ordained in Worcester, Mass., in 1853.

Thirty-four years ago he had as his missionary field, Marlborough, Hudson, Hopkinton, Ashland, Assabet, Framingham, Milford, Natick and South Natick. Upon this field in 1889 sixteen Catholic clergymen are employed.

In Natick Mr. Walsh is aided in his ministerial work by Revs. John Aloysius Donnelly and Patrick Bowen Murphy, both of whom are graduates of the University of Leval, Quebec. Fr. Donnelly was born in Hingham, and graduated from the grammar-school in that place before entering Leval. Fr. Murphy passed his childhood and youth in Boston, and graduated from the Lincoln School, South Boston, under Master Clarke, and from the old English High-School, Bedford Street, Boston, under the late lamented Master Cumston.

At South Natick a spacious Catholic church edifice has been recently erected, and the large congregation there, it is understood, is served by the ministerial brethren residing in the centre of the town.

THE UNITARIAN CHURCH, OR ELIOT CHURCH.—This church is in South Natick, and stands very nearly or exactly upon the spot where the first building for school and religious purposes was erected by the Indians, under the superintendence of Rev. John Eliot, in 1651. The location is very pleasant, and this is undoubtedly the fifth meeting-house that has stood upon the same spot. The four of ancient date appear to have been erected severally in 1651, 1700, 1721 and 1749, but the last-mentioned was not finished till 1767, and was standing (but for a number of years unused) as late as 1812. The reason for the brief existence of the second and third of these meeting-houses may be found in the cheap and poor manner of their construction.

The second house was built by John Coller, Jr., and as he agreed to take his pay in "a nook of land," which was not granted to him till 1702, he possibly could not have afforded to build a more durable house. The third house was built, or partially built, by one Jebis, who was styled "a regular cheat." "What Jebis promist to do in four months is not fin-

isht in four years." "He has plac't it just as the ground was, instead of digging to the firme earth, as he ought to have done." So run the complaints and the petitions for help.

The South Congregational Parish (now the First Unitarian) of Natick was incorporated March 1, 1828, with thirty corporators, only one of whom—Lindall Perry—was known to have been living fifty years later. The house of worship was erected in 1828, and dedicated November 20th of that year. Mr. James W. Thompson was ordained as pastor February 17, 1830, and March 11th of the same year a church was gathered. The Lord's Supper was first administered to twenty-two communicants March 28, 1830. Mr. Thompson was pastor for two years, and was succeeded by Rev. Edward Palmer, whose term of service was only ten months. February 25, 1835, Rev. Ira Henry Thomas Blanchard was installed pastor for the term of five years, at the close of which period his precarious health prevented his re-engagement, and he died April 9, 1845. Early in 1843 Rev. Thomas Brattle Gannett became pastor, and remained such till April 1, 1850. From 1850 to 1852 Rev. James Thurston was pastor. The ministry of Rev. N. O. Chaffee for one year and of Rev. Edward Stowe for two years followed, as did that of Rev. William G. Babcock for three years.

Rev. Horatio Alger commenced his long pastorate in May, 1860, and was pastor until April, 1874, a period of fourteen years. Mr. Alger was closely identified with all the educational interests of Natick, faithfully serving the town as a member of the school committee and as one of the trustees of Morse Institute for fifteen years. He was also the president of the Historical, Natural History and Library Society of South Natick from the time of its organization, in 1873, till his death, November 6, 1881. At the semi-centennial of the Unitarian Church of South Natick, November 20, 1878, Mr. Alger delivered one of the two leading addresses, which was full of historical information of great value.

Rev. Joseph P. Sheafe, Jr., was Mr. Alger's successor in the ministry of this church, and was ordained September 30, 1874. Mr. Sheafe became the corresponding secretary of the Historical, Natural History and Library Society in 1877, and prepared important papers for the "Field Days" of that society in 1881-83. Mr. Sheafe was dismissed December, 1885, and was succeeded by Rev. George H. Badger, who was ordained December 22, 1886. Mr. Badger is a native of Charlestown, was born in 1852; a graduate of Williams College, 1883, and studied theology in Andover and Cambridge. The church numbers about seventy; the Sunday-school from seventy to one hundred, of which Mr. Eliot Perry is superintendent. The church edifice was renovated in 1887 and 1888.

JOHN ELIOT CHURCH, SOUTH NATICK.—This church was organized in 1859, and Rev. E. E. Strong was its first pastor. He remained pastor until 1865.

Rev. George W. Sargent was installed pastor September 27, 1865, and remained such for two years, when he removed to Racine, Wisconsin. Rev. B. F. Clarke now supplied for a few months, Rev. S. C. Strong for three years and Rev. Gorham D. Abbott for nine months. In 1873 Rev. Samuel D. Hosmer became pastor and remained such for five years. Rev. Pearse Pinch succeeded, remaining three years. Rev. George Allechin, commissioned a missionary to Japan, then preached eight months. Rev. W. A. Lamb followed for two years. March, 1884, Rev. W. D. P. Bliss was ordained pastor, but was dismissed during the year following. Rev. John Colby, the present pastor, commenced his labors in December, 1885. Mr. Colby was born in York, Maine; fitting for college in Gilmanton Academy, New Hampshire, he graduated at Dartmouth College in 1852, and from Andover Theological Seminary in 1855. Mr. Colby was pastor in Hampton, New Hampshire, at Southborough, Massachusetts, and for thirteen years at Fitzwilliam, New Hampshire, before coming to South Natick. While pastor at Fitzwilliam he was elected a member of the New Hampshire Legislature and took a prominent part in its proceedings during its session in 1885. Mr. Colby has a wife and two daughters, viz.: Annie Lavinia, a graduate of Wellesley College in 1880, and Helen King. Deacon M. V. B. Bartlett is the superintendent of the Sabbath-school. This school numbers about one hundred.

THE UNIVERSALIST CHURCH.—The First Universalist Parish of Natick was organized September 20, 1879. The pulpit was supplied by Rev. W. A. Start until March, 1880, when Rev. Albert Hammatt was settled, who continued as pastor till March, 1883, when Rev. W. N. Haywood was pastor for three years, or until April, 1886. Rev. Darius Cobb then supplied for a few months. Rev. W. H. Gould preached from November, 1887, until June, 1888, when he was settled as pastor and is such at the present time.

The church was organized in 1882 with twenty-three members. The church edifice was erected in 1887 and first occupied December 18th of that year. The cost of the land and building was \$8000.

CHAPTER XL.

NATICK—(Continued).

EDUCATIONAL.

Schools—Libraries—Morse Institute—College and University Honors.

THE custom which prevailed in the settlement of most of the towns in New England of planting the school-house by the side of the meeting-house was not strictly adhered to in the case of Natick, for here

the first school-house was the first meeting-house. This building, as already noticed, was erected by the Indians of the Natick Plantation, under the general superintendence of their guide and religious teacher, Rev. John Eliot, in the year 1651, and stood nearly or exactly upon the spot where now stands the Unitarian Church edifice in South Natick. This school-house, which was used for religious gatherings as well, was roughly built, but of suitable size, and in it assembled the first school ever taught in Natick. The pupils were all Indians and by no means all children, for not a few adult Indians of both sexes were glad to enjoy the advantages it afforded. The teacher was a young Indian by the name of Monequasan, who had been for some years under the instruction of Mr. Eliot and perhaps of some others, in anticipation of the work to which he was now called. He was a bright and intelligent young man, but after a comparatively short service sickened and died.

We have no positive information respecting the branches of study pursued in this Indian school, but only the rudiments of education were taught, as reading, spelling, writing, etc. It seems nearly certain that the instruction given was largely in the Indian language, for this was employed for many years in the religious services of the Sabbath and Mr. Eliot's translation of the Scriptures into it, at a later period, was for the common use of the Indians. Gradually, however, they acquired some knowledge of the English language and a few of them could write and compose in it, as well as, if not better than, the majority of the whites of their neighborhood. This school was suspended during King Philip's War for a considerable period, from 1675 onward; and the progress of the Indians in the matter of education greatly hindered, so much so that in 1698, while there were 110 adult Indians belonging to the Plantation and 70 children under sixteen years of age, no school-master was employed, and but one child was found that could read.

In 1679 the inhabitants of Sherborn exchanged with the Natick Indians four thousand acres of land, more or less, "giving 200 bushels of Indian graine to boot. There was also to be a lott of fifty acres sett out where the Commissioners of ye Colonies, Major Gookin and Mr. Eliot and Indian Rulers shall choose within that tract of land which Sherborn was to have of Natick, to be appropriated forever to the use of a free school for teaching the English and Indian children the English language and other sciences." This agreement was signed by Daniel Gookin and six other white men, and by Waban and four other Indians, the latter making their marks.¹

No records have been found respecting the outcome of this arrangement, but, upon the face of it, it certainly has promising features.

¹ Quoted by the Historian Biglow, and credited by him to the Sherborn Records.

At what time this Indian school was discontinued it is impossible to ascertain.

In 1731-32 Ebenezer Felch was paid six pounds "for keeping school in Natick," and in 1733 "four pounds" for a similar service. Where this school was kept we know not. There is a tradition that Mr. Felch instructed Indian children, but it is more probable that his pupils were chiefly, if not wholly, from the white families that were now settling in the town. Ebenezer (or Eben) Felch was among the ablest men of the early settlers. He seems to have been a deacon of the church, a selectman, a surveyor, and proprietors' clerk, as well as teacher, and lived, certainly during the later years of his life, in the north part of the town, upon the spot where the dwelling of Mr. Oliver H. Felch now stands.

Oct. 1, 1746, the year after Natick "was erected into a Precinct or Parish," a vote was passed "not to have a school this year," but the next year the parish "Granted forty pounds, old tenor, to be laid out in a reading and writing school." In 1760, 1764 and 1767 the parish granted £13 6s. 8d. for the support of a school, but in 1762 refused to make a grant for this purpose, possibly because an earlier grant had not been expended. The grant in 1769 was "thirteen pounds lawful money"; in 1770, twenty pounds; in 1771 and 1773, ten pounds. In 1780 £500 were granted; but this was when the currency had depreciated greatly, so that in some parts of New England ninety pounds of it were worth only one pound in silver. In 1793 fifty pounds were granted, and in 1799 \$300. In 1798 the town chose "Eliakim Morrill, Capt. Abel Perry, Timothy Morse, Ethel Jennings and Moses Fisk School Committee, each to act in his own district." From 1800 to 1819 the yearly appropriation was usually \$600, but in 1846 it was raised to \$900. In 1804, under the article "To see if the town will choose a Committee to examine their School-Masters and Mistresses," and inspect the schools, the town voted in the affirmative, and chose the selectmen a committee to examine and inspect accordingly. In those days, as well as later, the selectmen were often called upon to do what no others were willing to undertake gratuitously. In 1804 the town refused to make an appropriation "to purchase a library," but granted \$200 to build a school-house in the North District, fourteen by eighteen feet in size. It was also voted "to set up a Singing-School," and a committee of three was chosen to decide "as to the place or places of the said singing-school."

In 1805 there appears to have been five "squadrons," or school districts, laid out or suggested, viz., the South, the Centre, the West, the North and the North-Brick. This old name for school districts—squadrons, squadrions, squardeons or squarn—we frequently find in the ancient records of many of the towns of New England. It was variously spelled in the same town, and doubtless as variously pronounced.

March 16, 1807, the town "voted to choose a committee to join with Mr. Sears (the minister) in examining the School Masters and School Mistresses and inspecting the Schools." This committee consisted of Lieut. David Morse, Jonathan Bacon, Capt. David Bacon, Capt. William Stone and Ed. Hammon. This was the first instance of the town's recognizing its minister's duty to take the lead in superintending the schools. In 1812, there being no pastor of the church, the town chose for the School Committee Ezekiel Sawin for No. 1, William Perry, Jr., for No. 2, David Perry for No. 3, Abel Drury for No. 4 and Levi Felch for No. 5, and "John Bacon, Jr., John Atkins, Esq., and Thomas Sawin a committee to examine the Schools and their Instructors."

In 1814 the town appointed a committee of three in each district to examine teachers and set up and visit their respective schools, and made Rev. Martin Moore chairman of each of the five committees.

For a number of years later one person in each district was chosen annually as School Committee, but his duties were not defined by the town. Doubtless these persons gave to the schools nearly all the supervision they had, but in 1822, in addition to the choice of what was later called the Prudential Committee for each district, the town chose Calvin Shepherd, Calvin Leland, William Stone and John Bacon a committee "to visit schools," while in 1830 Rev. Martin Moore, Rev. James W. Thompson, John Travis, Deacon John Angier and Joel Pierce were appointed "to superintend schools."

In 1831 the town defined the duties of Prudential Committees thus: 1. To have their school-houses furnished with good locks and keys and to be carefully closed during vacations. 2. To search out all authors of any damages to the school-houses and to report the same to the selectmen. And then the teachers were enjoined "carefully to note breaks, cuts, scratches or damages whatever," discover, if possible, the author or authors of the same and report to the Prudential Committees.

And the selectmen were authorized to offer a reward of fifty dollars for evidence to convict such culprits when brought to trial—moreover, the teachers were required to read these regulations at the commencement of their respective schools and on the first Monday of each month afterwards.

In 1832 the several school districts, five in number, were established "by bounds and monuments," the town having previously appraised the school-houses and voted to support the same. The Sixth District was established before 1838. At that date Rev. Erasmus D. Moore, Rev. J. H. S. Blanchard and Nathan Rice constituted the Superintending School Committee. April 1, 1839, the School Committee made a detailed report to the town, the first of the kind found upon the records, and in that year they were paid for their services \$35.50. The appropriation for schools was, in 1846, increased to \$900, and in 1849, to \$1500. April

5, 1852, the committee made their report printed in pamphlet form, and the town authorized the committee to establish a High School according to law, and appropriated \$1000 for its support. This appears to have been opened without any considerable delay, under the charge of Abner Rice, A.M., the pupils having previously passed a satisfactory examination in reading, writing, spelling, geography, arithmetic through fractions, and in the elements of English grammar. Before this time High Schools had been maintained in town, on personal responsibility, by John Angier, Othniel Dinsmore, Charles Forbush, Daniel Wight, Samuel Damon, Charles Dickson and John W. Bacon.¹

The appropriations for schools increased so that in 1855 they amounted in all to \$4000, and in 1857 to \$4500, \$1500 being for the High School.

In 1858 the town voted to divide the school money one-half by the number of the schools and the other half by the number of scholars. In 1859 one member of the School Committee was chosen for three years and one for one year. June 11, 1864, the town adopted stringent regulations regarding truant children and absentees from school, and the same were approved by the Supreme Court, at Cambridge, December 12, 1865. Later school appropriations were as follows: In 1865, \$1500 for High School, \$4500 for district schools; in 1868, \$1600 for High School, \$6000 for district schools; in 1870, \$1900 for High School, \$7000 for district schools; in 1872, \$12,000 in all; in 1876, \$14,000; in 1881, \$17,000; in 1882, \$20,000; in 1888, \$25,000. In 1876 Mrs. Laura S. Fay was chosen as a member of the School Committee and Mrs. Mary C. Reynolds was chosen in 1881. In 1889 the school appropriations amounted to \$26,000, and at the same time the committee was increased by the addition of three members, according to the decision of the town in 1888. Misses Mary A. Jennings and Isabel G. Weston were chosen for three years, Mrs. Martha M. Bigelow for two years and James McManus for one year, Messrs. G. D. Tower and H. C. Mulligan holding over. The committee is therefore now composed of three lawyers, two of whom are graduates of Harvard University; Mrs. Bigelow, who has trained children in school and in her family; Miss Weston who is a regularly educated physician, and Miss Jennings, whose ability is well vouched for in this responsible position. Mr. Tower, a graduate of Union College and of Boston University Law School, has been for years chairman of the Superintending Committee.

The last report of the School Committee contains matter of great importance. An evening school was opened in the High School house under the direct charge of Mr. Holt, the master of the High School, and was continued for twenty-eight evenings. Beginning with about one hundred pupils, it soon had two

hundred and fifty. The youngest pupil was thirteen years of age and the oldest forty years. The committee speak in very high terms of Miss Sara A. Sawyer, who had been re-appointed teacher of music for all the schools in the town. The High School, under the charge of Mr. Ira W. Holt, was reported as in a very satisfactory condition. The graduating class in 1888 numbered twenty-seven, and in 1889 it numbered fifteen. At the graduating exercises of the class of 1889 John F. Kencaly gave the Salutatory Address, Miss Jennie B. Jones was the Historian of the Class, Harold W. Loker recited the Class Poem, Mary E. Quinlan gave the Class Prophecies, while the Valedictory fell to the lot of Warren D. Valentine. The public has been informed that nearly all the teachers appointed in 1888 will be retained during the year succeeding. Mr. Holt and his assistants it is expected will still carry on the work in the High School, Mr. Nelson Freeman will remain master in the Centre School, with a general supervision of the ten other schools in the same building, while George A. Tyzzar will be the master at South Natick, as heretofore, with the supervision of the six other schools in that school-house. In Natick there are 39 schools, employing 44 regular teachers and two special assistants. The teachers' wages, as reported March 1, 1889, amounted to \$19,887.62, while all other expenses involved in conducting the schools (including the cost of a new school-house \$4997.86) bring the sum total to \$22,295.25 for the school years 1888-89, leaving, of appropriations unexpended, the sum of 68 cents.

MASTERS OF THE HIGH SCHOOL AND ASSISTANT INSTRUCTORS.—The list from the beginning in 1852 is as follows:

1852-60.—Abner Rice. Assistant, Harriet N. Tolman.

1861-63.—J. M. Merrick, Jr. Assistant, Miss Tolman.

1864.—Mr. Merrick, without an assistant.

1865.—No names are found in the school reports.

1866-67.—Homer Rogers. Assistant, Miss L. L. Wight.

1868-72.—Gideon D. Tower. Assistant, 1868, Miss C. C. Godding or Miss Mary C. C. Goddard, or both; 1869-72, Miss Hattie C. Fairbanks, assistant.

1873.—James F. Colby. Miss Fairbanks, assistant.

1874-76.—George M. Smith. Assistant, Miss Fairbanks.

1877-81.—Frederic O. Baston. Miss Fairbanks, assistant; also after 1878, Miss Elizabeth P. Bigelow, assistant; 1881, Miss Katharine Bates also assistant; Mr. Baston was the first master in the new High School house, which was dedicated March, 1878.

1882-85.—E. D. Russell. Assistants, Lilla O. Davidson, Mary C. Eno; 1885, Miss Nellie F. Wilson, also assistant; 1884, the assistants were Nellie F. Wilson, Lula A. Pinkham, Nora L. Baldwin; 1885, assistants, Ada G. Gardner, Lucy S. Pierce, Hattie E. Baldwin.

1886-87.—Elmer A. Wentworth. Assistants, Hattie E. Boardman, Lucy S. Pierce, Fanny P. Owens.

1888-89.—Ira W. Holt. Assistants, Hattie E. Boardman, Mabel S. Clark, Julia A. Ellis.

Of the above-mentioned High School masters, Mr. Tower has long been identified with the interests of Natick, as a lawyer with offices in Boston and Natick, as the chairman of the School Committee for many years, and as an efficient member of the Board of Trustees of the Morse Institute.

Mr. Baston became assistant cashier of the Natick

¹ See Bacon's "History," page 120.

National Bank some seven years since, but is now the trusted treasurer of the Natick Savings Bank.

Mr. Holt, who is able and popular, remains master, with two of his valuable assistants.

The masters of the Grammar Schools, Messrs. Freeman and Tyzzer, are teachers of experience and ability in their several important departments.

"The Home School," of Natick, is an institution of more than ordinary importance. Mrs. Adelaide P. Potter is its proprietor, while Miss Nellie M. Wright, Miss Searle and Miss Gertrude Howe are teachers. The special design of the school is to fit young ladies for Wellesley College. Connected with it is a Primary Department. Music, art and elocution are taught by teachers from Boston. The students number about thirty. Special courses of study are provided for.

LIBRARIES.—These must always be an important factor in the educational institutions of any place, and in this respect few of the towns in the Commonwealth are more highly favored than Natick. Rarely has any town, or city even, two ably conducted and well appointed *Free Public Libraries*.

Earlier Libraries.—A public circulating library was established in 1808, which appears to have contained, at the first, about 100 volumes. By means of a donation by George Homer, of Boston, a library of standard religious works was established in 1817, but what finally became of it is not known.¹

The Citizens' Library was established February 10, 1847, starting with about 500 volumes. This was given to the town in 1857 and accepted by the same on these conditions:

1. The town was to expend during the first year \$800 for its enlargement, and \$100 each succeeding year, and

2. Provide a room for it and pay the salary of its librarian. It is said to have contained, at that time, 432 volumes. A room was secured for it in the High School house for a time, when it was removed to Clark's Hall. W. F. Flagg was chosen librarian and his salary was \$125 per annum. In 1864 Mr. J. B. Fairbanks was librarian and received as compensation \$100 per year.

It appears that the town made an annual appropriation to increase its library, and in 1866 this was \$299. As time went on less probably was done for its enlargement because of the prospect that the Morse Institute would soon be established.

The Morse Institute.—Miss Mary Ann Morse was the only daughter of Mr. Reuel Morse and Mary (Parker), his wife, and was born June 16, 1825. She had two brothers, who died before her, and their birth-place was on East Central Street, where the Institute building now stands. The brick house which was her home and constituted a part of her estate was removed and set on Clarendon Street, and is now occu-

pied by Dr. Sylvester. Miss Morse died June 30, 1862, having passed some of the later years of her life in the family of Dr. Ira Russell, then residing in Winchendon, but formerly a physician in Natick. Miss Morse left her entire estate to found a library in Natick for the use of all its inhabitants. Five trustees were to be appointed by the town, if the bequest should be accepted, to serve for five years, and this Board of Trust were to execute the will. When the proposal came before the town at the meeting in March, 1863, a committee was appointed, composed of John W. Bacon, Elijah Perry and John O. Wilson, to take legal advice and recommend to the town a suitable course of action regarding the whole matter. This committee reported April 6, 1863, that the will was in a legal form substantially, that the bequest was valuable and that it should be accepted by the town.

This was done and the Board of Trust was provided for by the appointment of Messrs. Willard Drury, John W. Bacon, Horatio Alger, John O. Wilson and Elisha P. Hollis. March 7, 1864, the trustees reported to the town that they had organized and had requested one of their number, Mr. Willard Drury, to settle the estate as administrator under the will, and further that the condition of the estate was such that it could not at once be applied to the founding of a public library. Four weeks later, viz., April 4, 1864, the town voted not to accept of the bequest of Mary Ann Morse, and appointed, to take such action as might relieve the town of all responsibility in the matter, a committee composed of Messrs. John W. Bacon, Nathaniel Clark and George L. Sawin. The vote upon declining to receive the bequest stood 253 to 152. The records do not state the reasons for this action, but from later reports and proceedings it would appear that many doubted the validity of the will, especially as a suit had been brought against the trustees by George W. Pierce, the guardian of Charles R. Morse, a minor. Later the town voted, 117 to 39, to request the trustees to resign their trust. But instead of doing this they appear to have taken legal measures for ascertaining their rights and the rights of the town in the matter, for March 5, 1866, they reported to the town that the equity suit brought by them for the establishment of the trust in their hands as a public charity had been decided in their favor by the Supreme Judicial Court of the Commonwealth, and that all the suits against the estate of Mary Ann Morse had been settled and abandoned—that of George W. Pierce, guardian, because the note on which it was brought was plainly a forgery. This report was accepted, and the trustees had now full liberty to go forward in the execution of their trust. This is said to have been the first decision of the highest court of the State, sustaining the validity of a bequest for establishing a library for all the people of a town as a public charity, that could not be allowed to become null because of any neglect on the part of those

¹ See Bacon's "History," page 167.

charged with the trust. At that time the estate was appraised at not far from \$17,000, with considerable debt incumbrance. In 1872 the trustees had about \$45,000 at their disposal, besides the valuable lot of land upon which a library building could be erected.

At the annual meeting March 4, 1867, the trustees of the Morse Institute reported that the administrator, with the will (of Mary Ann Morse) annexed, had made a final settlement of his accounts and turned over the estate into the hands of the trustees; that they were holding the same and applying the rents, etc., to the payment of existing debts, which, on the 1st day of April next, they expected to so far liquidate that only an incumbrance of about \$750 would remain; that there were two notes, one for one hundred dollars payable to John Kimball, and another for about \$200, payable to Mr. Eaton, of Boston, with some interest, which they (the trustees) believed to be justly due, but not legally so because the holders did not commence suits for recovery within the specified time; and they asked the town to authorize them to pay these notes, upon receiving proper indemnity from personal liability. The town voted to accept this report and to authorize the payment of these notes, under the conditions named above.

March 2, 1868, the Morse Institute trustees reported that they had paid all the claims upon the estate, except the two notes mentioned above, and the claim of Stephen Hayes for \$20, and that, excluding the lot of land, the estate was then worth \$25,000.

March 7, 1870, the trustees reported that the estate of Miss Mary Ann Morse in their hands was worth \$36,000, exclusive of the lot for building, and that they expected to remove the brick house and make contracts for the erection of the library building before the close of the year. A year later the trustees reported that they had removed the brick house and were procuring plans, etc., for the library building, that the estate was now worth \$38,000, and that as the will of Miss Morse provided that two-thirds of the same might be used in the erection of the building, they should have funds sufficient to provide an elegant and well-furnished structure. Also to have the property relieved from taxation that they had applied to the Legislature for an act of incorporation.

In 1872 the trustees reported that the securities in their possession were worth \$40,000, and that they should proceed to erect the Morse Institute building at once.

In 1873 they reported that the Institute building would doubtless be completed by June 1st. They were re-elected as trustees the second time.

At the annual meeting of the town, 1874, the trustees reported that the Institute building had been completed in July, 1873, and that the town library, by a vote of the town, had been transferred to it 6154 volumes, and that they had purchased with the funds of the Institute 2283 volumes. These, with the donations that had been received from Vice-President

Henry Wilson, made the whole number of volumes 7311. They reported moreover, that on Christmas day, 1873, the building was dedicated, and thrown open to public inspection, and that on January 1, 1874, it was opened for public use. Also that they had expended upon the building (\$27,000), and had in their hands about \$11,000, \$9000 of which would be devoted to the purchase of books, and \$2000 would constitute a reserve fund.

The town accepted the report, with the exception of one recommendation of minor importance, and appropriated for the support of the Institute \$300, and what might arise from the taxation of dogs. From time to time the town appropriation has been increased until it has reached the sum of \$800, with the annual addition of the amount raised by the taxation of dogs, which, though variable, is always nearly or quite as large as the regular appropriation.

The Morse Institute building, standing on a spacious lot at the corner of East Central and Washington Streets, is a very convenient and imposing structure, being built of pressed brick with trimmings of fine New Hampshire granite. It is two stories high, with a French roof, crowned with turrets. In the basement is the usual steam heating apparatus. On the lower floor there are a large packing-room, the janitor's room and reading-rooms furnished with files of newspapers and periodicals. Upon the second floor the library proper is found, with the reference library in a separate but adjoining room. Connected with these is a large and very pleasant room, upon the tables of which the more valuable monthly and quarterly periodicals of the day constantly attract readers. The library is now open to the public every day of the week except Sunday, from 10 to 12 A.M., from 2 to 5 P.M., and on Monday, Wednesday and Friday evenings, from seven to nine o'clock.

On the same floor is the spacious and very convenient room for delivery. The library is constantly growing through gifts and annual purchases. During the year 1888-89 it increased by 413 bound volumes, and contained at the date of the last report March, 1889, 11,735 volumes in the circulating department and 659 volumes in the reference department. The total number of bound volumes enumerated in the accession catalogue is 12,394. Total number of bound public documents is 2778, making a grand total of 15,172 bound volumes. The total circulation of books for 1888-89 was 26,094, an increase over the same of the preceding year of 5080 volumes.

The trustees, with Deacon John O. Wilson as chairman (who has been a trustee from the beginning), watch constantly over every interest of the Institute. The janitor is Mr. R. T. Nash. The list of the librarians and their assistants is as follows:

1871.—Librarian, Miss K. V. Lovejoy; assistant, Minnie M. Mann.

1875-83.—Librarian, Rev. Daniel Wight; assistant at first, Miss Minnie M. Mann; later assistants, Miss Katharine K. Wood, Miss Mira R. Partridge, Miss Carrie L. Morse, Miss Nellie L. Fox.

1884-85.—Amos P. Cheney, with Misses Wood and Partridge as assistants.

1886-88.—Miss Katharine K. Wood, with Misses Fox and Partridge, assistants.

1888-89.—Miss Nellie L. Fox, librarian, and Miss Mira R. Partridge, assistant.

The library is conducted efficiently.

Bacon Free Library, South Natick.—Oliver Bacon, Esq., of Natick, died April 3, 1868, at the age of eighty-one and a half years. By his will, after giving certain legacies to his family connections, he committed to five persons, in trust, "all the rest and residue" of his estate, both real and personal, for the founding of a library. These trustees were directed to erect in South Natick, upon a lot of land given for the purpose, a fire-proof building, costing not more than \$15,000, to be called The Bacon Free Library. The building was to be constructed in such a manner as to accommodate a large library and to furnish suitable rooms for the use of the "Historical, Natural History and Library Society of South Natick," while provision was made for the purchase, increase, maintenance and care of the library. But the will of Mr. Bacon having been made seven years before his death, two only of the trustees named in it were living in 1878; and one of these, being in Europe, declined the trust, so that a full board of trustees could not be organized till 1879. During the eighteen months following the building was erected. The ground plan is in the form of a Greek cross, and it is built of brick and stone, the latter elaborately and tastefully laid, so that the whole structure is highly ornamental. The library proper is entered directly from the main street of the village, while the rooms designed for the collections of the society named above are under and above the library, though all above ground, the building standing upon land sloping backward to the east. The collections alluded to are arranged in glazed hard-wood cabinets. The library contained, in 1879, 925 volumes, with some very ancient and valuable pamphlets. In 1884, when the library had been open nearly four years, it had increased to 3738 volumes, 939 of which belonged to the Historical, Natural History and Library Society named above. During the year 1884 426 volumes were added. A reading-table connected with the library has been generously supplied with newspapers and the most valuable of the periodicals of the day. In 1884 the librarian was H. L. Morse.

This library is constantly receiving accessions. Mrs. Adelaide Williams is librarian, and the library is open Mondays and Thursdays from 2 to 5.30 o'clock p.m. Wednesdays and Saturdays, 2 to 5.30, and from 7 to 8.30 o'clock p.m. Everything about it indicates care and general prosperity.

The Historical Natural History and Library Society of South Natick.—It was both natural and proper that an active interest in historical matters, so far as Natick is concerned, should early be developed and take form in South Natick, for this part of the township

is pre-eminently historic ground. Here Rev. John Eliot did what no other man of his age accomplished, in civilizing and Christianizing the Massachusetts Indians; and here are nearly all the localities that Mrs. Stowe has immortalized in her "Oldtown Folks." In 1870, January 26th, a few gentlemen met at the house of Rev. Horatio Alger for consultation, among whom were Messrs. Oliver Bacon, Elijah Perry, Josiah F. Leach, Austin Bacon, William Edwards, Joseph Dowe and Amos P. Cheney. Other meetings followed, and the result was the organization of the "Historical and Natural History Society of South Natick and Vicinity," with Rev. Horatio Alger as president; Rev. Gorham Abbot, LL.D., as vice-president, Joseph Dowe, recording secretary; Rev. Stephen C. Strong, secretary, and Mr. William Edwards as treasurer, with all other necessary officers. The last-mentioned, Mr. Edwards, was made Natural History Curator.

Collections of relics and specimens illustrative of natural history were now made and placed in the chambers over the store of the curator, and a course of nine lectures was given by eminent men upon historical and philosophical subjects. Among the relics collected by the society were the sounding-board of the old church, under which Rev. Oliver Peabody preached for many years to the Indians, the bridal robe and slippers worn by the bride of Rev. Mr. Badger, Mr. Peabody's successor, and some of the pottery work of the Natick Indians. But all these, with valuable collections of birds and insects, representing foreign lands as well as our own, were reduced to ashes in a disastrous fire on the morning of March 2, 1872, when the old tavern, "the Eliot House," and nearly the entire business portion of the village became a total loss. But, nothing daunted, the society kept on its course, made new collections as rapidly as possible, listened to other lectures, and, adopting a new name in part, was incorporated, April 26, 1873, as the "Historical, Natural History and Library Society of South Natick." An appropriate seal was soon procured, which represents Mr. Eliot presenting the Bible to a group of Indians beneath the branches of the ancient Eliot Oak. In the years following the society prospered and increased its collections greatly, while its library became more and more valuable. The society occupied its new rooms in the Bacon Free Library building early in December, 1880, and the work of transferring and arranging its collections occupied the time of the curator for several weeks.

A very interesting and important part of the work of this society has been accomplished through the observance of

Annual Field Days.—1881, May 2d, was such a day, when about fifty persons assembled near the grave of the Indian preacher, Daniel Takawambait, and visited in turn the site of Deacon Badger's (Deacon William Bigelow's) house, and other well known local-

ities. Mr. Elijah Perry prepared a very interesting account of a number of the farms of the region visited on this occasion. May 1, 1882, was another field day. The ancient Indian burying-ground which was first visited was minutely defined by Rev. J. F. Sheafe, Jr. (See "burying-grounds" in this historical sketch.) The same gentleman described "The Old Meeting-houses." A history of "The Old Eliakim Morrill Tavern" was given by S. B. Noyes, of Canton. "Merchants' Block" was described by Mr. William Edwards. Mr. Amos P. Cheney gave a history of "The Ebenezer Newel House." Samuel Lawton's home (the Sam Lawson of "Old Town Folks"), was described by Mr. Elijah Perry, as was "The Carver House and Family," by Mrs. Mary P. Richards. Other individuals described other places of note, among whom was Mr. Horace Mann, of Natick, who has made a study of the ancient history of this town for years, and doubtless is more familiar with it than any other person.

The third field day, May 1, 1883, was, if possible, the most interesting of all. Dr. G. J. Townsend, the president of the society after the death of the venerable Mr. Alger, presided, and a large delegation from the various historical societies of New England was present. Rev. C. A. Staples, of Lexington, and Rev. George E. Ellis, D.D., made elaborate addresses. Seth Davis, Esq., of Newton, ninety-six years old, also made appropriate remarks. Places of great historic interest were visited, and papers were read by Edwin C. Morse, Esq., Mr. Horace Mann, Rev. J. P. Sheafe, Jr., Rev. Samuel D. Hosmer, Mr. Herbert L. Morse, Mr. Amos P. Cheney and Mr. Samuel B. Noyes.

"Wellesley, the Country Seat of H. H. Hunnewell, Esq.," is the title of a very interesting paper prepared by the president of the society, Dr. G. J. Townsend. But there is no space for an outline even of these carefully prepared and instructive papers.

In its bearing upon the culture of any people the value of a day spent in this manner can hardly be overestimated.

The museum of this society is constantly receiving valuable accessions, one of the most recent being a set of table-knives and forks in a case, once the property of Thomas Hutchinson, Governor of Massachusetts in 1769, presented by Mrs. W. P. Green, of Sherborn. One of the most active and efficient members of this society is Mr. Amory L. Babcock, of Sherborn, who was appointed curator in 1874. The preparation and arrangement of the numerous articles in the museum are due to the patient and long-continued work of Mr. William Edwards and Mr. A. L. Babcock.

The library of this society has now about 1000 volumes. The librarian is Mr. Eliot Perry.

Probably but few of the people of the town, much less

of the adjoining towns, have any correct impressions respecting the variety and value of what may be seen in the museum of this society in South Natick. Mr. William Edwards, Professor of Botany in Wellesley College, a life-long student of nature, has been tireless in adding to the collections. There are birds gathered from South America, stuffed animals of various kinds, minerals, shells, stone implements, and relics taken from Indian graves, as their old burying-yard has been dug over in the progress of modern improvements.

University and College Graduates and Members.—Oliver Peabody (Harvard University 1745), Nathaniel Battelle (H. U. 1765), Ephraim Drury (H. U. 1776), William Biglow (H. U. 1794; see biographical), Robert Peteshal Farris (H. U. 1815), John Angier (H. U. 1821), Calvin E. Stowe (Bowdoin College 1824; see biographical), Charles Angier (H. U. 1827), Joseph Angier (H. U. 1829), Amos Perry (H. U. 1837), Daniel Wight (H. U. 1837; see biographical), Jonathan F. Moore (Amherst College 1840), Alexander W. Thayer (H. U. 1843), John W. Bacon (H. U. 1843; see biographical), Joseph W. Wilson (Yale University 1854), Alfred Steedman Hartwell (H. U. 1858), James McManus (H. U. 1871), Henry Thayer (H. U., Medical Dept., 1846), Louis E. Partridge (H. U., Med. Dept., 1856), Albert H. Bryant (H. U., Med. Dept., 1860), Augustus E. Dyer (H. U., Medical Dept., 1865), Gustavus A. Greenwood (H. U., Med. Dept., 1865), John Barte (H. U., Med. Dept., 1870), George Lane Sawin (H. U., Law Dept., 1860), Albert E. Ware (H. U., Dental Dept.), 1875; Frank E. McCutchins (H. U., Dental Dept., 1876), Lewis M. Norton (Massachusetts Institute of Technology; Assistant in Chemistry there two years; a member of Berlin and Göttinger Universities, Germany, two and a half years; received from the latter degree of Doctor of Philosophy on examination; is now Professor of Organic and Industrial Chemistry in Massachusetts Institute of Technology), Horace B. Gale (graduate of Massachusetts Institute of Technology, 1883; is Professor of Dynamic Engineering, Washington University, St. Louis, Missouri).

The following are recent graduates or are now members of Harvard University:

1878, Edwin Wilson Morse; 1879, Charles William Bacon; 1879, Henry Coolidge Mulligan; 1880, Nat. Maynard Brigham; 1881, William Henry Coolidge; 1882, Franklin Arthur Dakin; 1883, Louis Arthur Coolidge; 1884, George William Sawin; 1885, Charles Bertie Gleason; 1886, Irving Wetherbee Fay; 1887, Herman Timothy Coolidge (died September 30, 1889); 1888, Clarence Willard Gleason; 1889, William Reed Bigelow; 1890, Harry Fletcher Brown; 1890, Charles Nutt; 1890, Samuel Foster Swinburne; 1892, George Alexander Easton; 1892, Robert Winch Harwood; Leander Coolidge entered 1889. Arthur H. Wilde graduated from Boston University in 1887. Wilson L. Fairbanks (now of the Springfield *Republican*) graduated at Tufts College 1887. He is assistant local editor of the Springfield *Republican*. George William Sawin, graduating at Harvard in 1884, has been a teacher of mathematics in that institution since 1885. Gayle Forbush entered Institute of Technology 1888.

Graduates from Wellesley College.—1879, Ella M. Drury; 1884, Julia A. Ellis; 1884, Nellie M. Wright; 1884, Florence Bigelow; 1886, Nellie F. Tilton; 1887, Edith A. True.

Present Members.—Katharine F. Gleason, 1891; Ida E. Woods, 1893; Gertrude Bigelow, 1893.

Special Students in Wellesley College.—Mrs. Liverus Dorchester (Miss Nellie Hardy), 1881-82; Mrs. Homer Fiske (Miss Alice Bird), 1881-82; Mrs. Henry C. Mulligan (Miss Minna Rawson), 1881-82; Mrs. David W. Farquhar (Miss Grace T. Peloubet), 1884-86; Mrs. Harry True (Miss Mabel Sweetland); Mrs. Lester M. Bartlett (Miss Nettie Spooner); Miss Mary Noyes, 1887-88; Miss Etta Shattuck, 1887-88; Miss Mae E. Peck, 1887-89; Miss Nellie F. Wilson, 1887-89; entered 1889 as a special student, Miss Helen Grace Walcott.

Mary Alice Peloubet (Mrs. Lewis M. Norton) graduated at Smith College 1883. Annie L. Colby, of South Natick, Wellesley College 1880.

CHAPTER XL1.

NATICK—(Continued).

MISCELLANEOUS.

Population—Water Department—Fire Department—Natick Gas-Light Company—Natick Electric Company—Natick National Bank—Natick Fire Cents Saving Bank—Henry Wilson Co-operative Bank—Post-offices—Manufacturers—South Natick Business—Cemeteries—Lawyers—Physicians—Express Companies—Coal, Wood, Etc.—The Press—Biographical.

POPULATION.—That of the Indian plantation of Natick at different periods has already been given. It was probably the largest just before the beginning of King Philip's War, 1675. The first census was ordered by the British Government in 1764. At that time Natick contained 185 Indians, 24 negroes and mulattoes, 450 whites, total 659, of whom three were slaves; 1776, 535; 1800, 694; 1810, 760; 1820, 849; 1830, 890; 1835, about 1000; 1840, 1285; 1850, 2816; 1855, 4138; 1860, 5515; 1865 (after the war), 5220; 1870, 6404; 1875, 7419; 1880, 8565; 1885, 8460. At the present time, January 1, 1890, supposed to be about 10,000.

WATER DEPARTMENT.—In addition to notices of this already given, we add from superintendent's report, March 1, 1889, the following: Number of services in use, 1349; total cost on construction account, \$160,042.69; total cost of pumping station and pumps, \$45,856.88; cost of reservoir, \$17,554.81; service pipe, net, \$10,480.22; total cost of water works, \$232,934.60; collected 1888-89 for water rates, fines, etc. (12 months), \$19,173.40. J. W. Morse is superintendent.

FIRE DEPARTMENT.—Already noticed in part. From report March 1, 1889, it appears that one of the two steamers is considerably worn, and the hose-carriages also. The fire alarm system has been extended four additional miles and six new boxes added, so that now there are nine boxes and eleven miles of wire. During the last twelve months the alarms of fire were twenty-eight. Insurance on buildings and contents injured, \$33,200. Amount of insurance paid, \$14,757.02. Loss where there was no insurance, \$1715. Whole amount expended during the year, \$5227.85.

NATICK GAS-LIGHT COMPANY.—Riley Pebbles, president; Edward Clark, treasurer, who, with Harrison Harwood, Leonard Winch and John O. Wilson are directors. Forty stockholders, all in Massachusetts. Stock, \$20,000; dividends, eight per cent.; assessors' valuation, \$12,200; assets, \$41,874.66; liabilities, \$29,500. Gas made in 1888, 3,711,900 feet; greatest daily output, 21,900 feet; least, 3000 feet. Coal used annually, 379 tons; candle-power, 17.4. Superintendent, G. F. Macmunn.

NATICK ELECTRIC COMPANY, organized 1886; capital, \$14,800; stockholders, seven; system, Thomson-Houston; use 425 tons of coal; length of wires, 113,500 feet; 307 poles; overhead wires, 26,400 feet; thirty-six public lamps (arc), burn till 12½ o'clock,

each costing 33½ cents per night, or 88 per month; commercial incandescent lights, 450, cost \$1 per month. Assets, \$35,493.73; liabilities, \$34,226.23. President, John O. Wilson; superintendent, Henry True; treasurer, Francis Bigelow.

BANKS.—*Natick National Bank.*—The charter of this bank was granted May 14, 1873, and it commenced business July 31, 1873, in the brick block owned by Nathaniel Clark, with a capital of \$100,000. The first directors were Leonard Winch, John B. Walcott, Nathaniel Clark, Harrison Harwood, Jr., Lewis Wight and George Clark. Harrison Harwood, Sr., and Richard Hayes were directors for a number of years. The directors at the present time are Harrison Harwood, Riley Pebbles, Leonard Winch, Edward Clark, O. A. Felch and Frank H. Hayes. Leonard Winch has been president from the beginning, and has been identified with the business interests of Natick as merchant, real estate owner and banker for nearly fifty years. The first cashier was George S. Trowbridge, who held this position till his death, in September, 1886. October 1, 1886, Mr. S. W. Holmes was elected cashier, and is such now, December, 1889. Mr. Holmes had previously been clerk, book-keeper and teller of the National Bank of Orange, Mass., entering it in 1881. When he was twenty-one years old he became cashier of the Natick Bank, being at that time the youngest cashier in Massachusetts. Mr. F. O. Baston was assistant cashier from September, 1886, until May, 1889, when he resigned to become the treasurer of the Natick Five-Cents Savings Bank. Mr. Frank O. Brown and Mr. Fred. B. Washburn, both Natick young men, and educated in Natick High School, are, respectively, teller and clerk, and they, like the senior officers of the bank, have deservedly the confidence of the community.

After the great Natick fire in 1874 the bank had temporary quarters in the Harwood Block, but returned to its pleasant and commodious rooms on the second floor of Clark's new block, corner of Main and Summer Streets, as soon as the present block was completed. Fifty-eight of the ninety-two stockholders reside in Natick and these hold 730 of the 1000 shares. The first dividend was paid October 1, 1874, and ever since the bank has paid eight per cent., free from tax, annually, with the exception of one year, when it paid seven per cent. The total amount paid in dividends has been \$114,000. In 1874 the number of open accounts kept with the bank was 110, and the deposits \$60,000, while January 1, 1889, the former were 350 and the deposits \$240,000. The surplus and undivided profits of the bank amount to \$30,000. The policy of the bank, from the beginning has been to do a safe, conservative business, while fostering all the interests and meeting all the wants of the town as far as consistent with safety; and the same principle has been adopted with regard to the public generally.

Natick Five-Cents Savings Bank.—The charter of

this bank was granted in April, 1859. The corporators were Edward Walcott, Nathaniel Clark, Horace B. Morse, Willard C. Childs, Franklin Hanchett, Leonard Winch and William Edwards, with all the powers and privileges and subject to all the duties, liabilities and restrictions common in such cases. Officers of the bank were elected August 23, 1859, as follows: President, John Kimball; Vice-Presidents, Leonard Winch and John J. Perry; Trustees, Willard Drury, John W. Bacon, John O. Wilson, Dexter Washburn, J. B. Walcott, James M. Bent, James Bullard, George Jennings, G. W. Pierce; Investing Committee, B. F. Ham, Henry Coggin, John Travis, William Edwards and Edward Washburn. Nathaniel Clark was chosen treasurer September 2, 1859, and held that office till May, 1872, when his successor, James Whitney, was chosen. Mr. Whitney resigned May 1, 1889, by reason of impaired health, when Mr. Frederick O. Baston, lately assistant cashier of Natick National Bank, became treasurer. This savings bank has steadily increased in financial strength as well as popularity, its total assets amounting to more than a million dollars. The deposits, representing the accumulated savings of a great number of families, attest the general thrift and economic habits of the Natick people.

The present officers are: President, John O. Wilson; Vice-Presidents, Leonard Winch, John L. Woodman; Trustees, John O. Wilson, E. P. Hollis, J. L. Woodman, Leonard Winch, Riley Pebbles, Edward Clark, F. E. Cummings, G. W. Howe, Francis Bigelow, William Nutt, O. A. Felch, James M. Forbush, F. M. Boardman, F. H. Hayes; Investing Committee, Leonard Winch, J. L. Woodman, William Nutt, Francis Bigelow, F. H. Hayes and Frederick O. Baston.

Henry Wilson Co-Operative Bank was established in 1886, with J. R. Adams, president; E. H. Wilson, vice-president; Dr. C. W. Smith, secretary; H. H. Whitney, treasurer, and a full board of directors. M. T. Jones later became secretary. The bank has \$53,000 assets and pays six and one-half per cent. interest to about 500 members. The officers now are: President, J. R. Adams; Vice-President, G. H. Ames; Secretary, M. T. Jones; Assistant Secretary, A. P. Cheney; Treasurer, H. H. Whitney, with fifteen directors.

POST-OFFICES.¹—*Natick office* was established January 27, 1815; Martin Haynes appointed postmaster January 27, 1815; William Farris, January 15, 1818; Isaac D. Morse, January 9, 1840; Nathaniel Clark, June 22, 1841; Isaac D. Morse, June 21, 1845; John M. Seward, July 25, 1849; Calvin W. Perry, November 7, 1853; George W. Pierce, June 25, 1861; John B. Fairbanks, June 20, 1865; Mrs. Caroline Brigham, April 29, 1870; George L. Sleeper, July 3, 1886.

The South Natick post-office was established May

23, 1828. Postmasters: Lester Whitney, May 23, 1828; Ira Cleveland, June 9, 1832; Charles Adams, May 29, 1833; Moses Eames, January 9, 1840; George B. Curtis, May 25, 1841; John Gilman, Jr., June 8, 1844; Moses Eames, June 24, 1845; John Cleland, Jr., September 8, 1849; John I. Perry, April 18, 1854; William H. Wright, April 3, 1857; Isaac B. Sawyer, August 2, 1861; Gustavus Smith, December 2, 1872; William J. Cronin, April 23, 1886.

MANUFACTURES—Boots and Shoes.—The making of these is by no means a new industry in Natick, but the conditions and results of this business have greatly changed within the last half-century. Natick had, like all country towns, its shoemakers from the beginning, but until about the year 1828 these confined themselves to custom-work and repairing, and never attempted to furnish supplies for a general market. In the year just named Edward Walcott, who then resided in the west part of the town, commenced the manufacture of boots and shoes upon a larger scale than the local trade called for or would justify, and a few years later found him established in the centre of the town and employing about one hundred workmen. In 1856 Mr. Walcott is said to have put upon the market three millions of pairs.

John B. Walcott was later in this business by a few years, but, in twenty years, had made 1,099,763 pairs. In 1836 Isaac Felch began the same business, and soon employed seventy or eighty workmen, who made 50,000 or 60,000 pairs annually. Henry Wilson, beginning at the bottom and learning the trade of a shoemaker, became a manufacturer in 1838, and is said to have made—in the eleven years in which he continued this business—664,000 pairs. E. & F. Hanchett or F. Hanchett & Co. were large manufacturers, and in 1853 had one hundred and seventy-four employees, viz., one hundred and twenty males and fifty-four females.²

It is to be understood that these statements refer to a period before the introduction of labor-saving machinery, when the cutting of the leather and the finishing and packing of the goods were done in centrally located shops, while the making was all done by hand, and chiefly at the homes of the workmen. A revolution in the whole business has followed the introduction of machinery in nearly every department of the work, and the use of steam-power in driving the various machines.

One of the oldest and the largest of the modern factories is that of *J. O. Wilson & Co.* This is situated on North Avenue, and occupies the whole space between Walnut and Washington Streets. The owners are John O. Wilson and H. G. Wood. Like nearly all who succeed in this business, the senior partner first learned to make boots and shoes by hand, and was employed in this manner about twelve years. In

¹ Taken from the office of the First Assistant Postmaster-General.

² See Bacon's "History," pp. 152 and 153.

1863 this factory was established. Additions from time to time have given it its present large proportions. There are four hundred names on its pay-roll. Brogans and plow-shoes are its chief productions, though of late a finer and better kind of goods is made for the Southern market. One million of pairs are made annually, and the annual sales amount to \$1,250,000. C. H. Moulton, of Boston, makes the sales. Power is applied to all the latest improved machinery. The establishment is lighted by electricity. The junior partner, Mr. Wood, now manages the details of this large business. (For additional concerning Mr. Wilson, see Biographical.)

Riley Pebbles & Co. (owner, Riley Pebbles).—Established in 1853. Goods,—brogans, plow-shoes, Imperials, Congress, slippers, etc., and almost all kinds of foot-ware, including hob and Hungarian boots and shoes, especially "Pebbles' Seamless Balmorals;" a much greater variety of production than comes from most factories. Annual production, 290,000 pairs. Amount of annual sales, \$325,000.

Mr. Pebbles has ten salesmen almost continually on the road, each with a separate territory, and selling in all parts of the United States. On the pay-roll, 150. Wages paid annually, \$83,000. Power is applied in nearly every department, from sole-cutting to finishing. Superintendent, William S. Morey; book-keeper, Mary A. Blaney; assistant book-keeper, William F. Quinlan; clerk, William O. Cutler.

Mr. Pebbles is among the pioneer manufacturers in this part of the State, having been in business thirty-six years; was among the first to test and introduce the best labor-saving machines, quite a number of which are his own invention.

He has also made many improvements upon the inventions of others. He puts upon the market several kinds of his own patent shoes, which are more or less complicated, and the idea of furnishing soles, taps and half-soles to cobblers throughout the country came from Mr. Pebbles. He had built for himself the first "beam sole-cutting machine" that was really successful. The reputation of Mr. Pebbles in the market as the maker of goods that will stand the test of severe use is unrivaled. His Boston office, which he visits daily, is at 59 Lincoln Street.

John B. Walcott (owner), established in 1834, is by far the oldest manufacturer now doing business in Natick. Productions—brogans, and plow-shoes, and of these about 120,000 pairs annually. Annual amount of sales, \$130,000. Mr. Walcott sells the goods which he makes. His pay-roll numbers forty-eight. He paid in wages last year \$26,150. At present he does not use steam-power, but his goods are all made by hand. He lost his very valuable factory on Main Street in the great fire of 1874, and has since conducted his business in two or three localities. The site of his former factory is now occupied by one of the best business blocks of Natick, which Mr. Walcott erected in 1888 and owns.

J. W. Walcott & Co. (owners, J. W. Walcott and Francis Bigelow), established May 1, 1882. The firm manufactures men's, boys' and youths' kip, split and grain boots, brogans, ball and plow-shoes. Boston business house, 107 Sumner Street. Number of pairs annually, 250,000. On the pay-roll, 125. Superintendent, W. E. Rollins. This firm occupies the large building of a former hat factory which they have furnished with all modern machinery for making foot-wear, and to which they have recently made very extensive additions.

Felch Brothers.—Proprietors, J. F. Felch, O. A. Felch and Harry Felch. Factory in northern Felchville. Established in 1858. Production, wax and split brogans and plow-shoes, of which 300,000 pairs are made annually. Amount of annual sales, \$300,000. Mr. O. A. Felch, of this firm, goes annually or oftener into the South or Southwestern States and sells the goods made by this company. Number on pay-roll, 100. Wages paid annually, \$75,000. The owners superintend all departments. Book-keeper, J. Elmer Felch. All the employees are paid in cash every Saturday night.

J. L. Woodman.—Owner and superintendent. Established in 1850. Number on pay-roll, eighty. Goods, boots and shoes; number of pairs made last year, 147,340. Annual sales equal \$200,000; steam-power is applied to all machines. Goods consigned to Henry & Daniels. W. H. Nutt is book-keeper.

R. Best & Son.—Manufacture brogans and plow-shoes, 60,000 pairs annually. Established in 1872. On the pay-roll, twenty-five. Wages paid annually, \$12,000. Use steam-power.

A. F. Travis & Sons.,—Felchville, have suspended operations in their factory because of the sickness of the senior partner.

Richard Hayes & Sons, Summer Street.—The senior member of this firm established this business nearly fifty years ago, and it has always maintained an honorable position. Their production consists of boots, brogans and plow-shoes. On pay-roll, 125. Daily production, about 1200 pairs. Boston office, 133 Summer Street, in charge of F. H. Hayes, while E. A. Hayes superintends the factory operations.

F. L. Ward & Co.—On the old stand of Dexter Washburn. Established in 1887. Make men's, boys' and youths' shoes, balmorals; annual product from ten to twelve thousand pairs. Sales, \$15,000, are made to retailers in New England and Pennsylvania. Mr. Ward superintends and employ ten persons.

A. I. & G. W. Travis & Co.—This firm is the successor of C. B. Travis & Co. This was established in 1852, and the death of the senior partner in 1889 was followed by the organization of the firm as above named; pay-roll, fifty.

The factory has the modern improvements, is heated by steam and lighted by electricity. It is supplied throughout with automatic sprinklers to extinguish fires. The production consists of kip,

split and grain boots, brogans and plow-shoes. Boston office, 120 Summer Street. Ninety thousand pairs are made annually. Sales, \$80,000 to \$90,000. Pay of employees, \$25,000 annually.

H. H. Brown & Co.—Established four years ago. During the warm season this company manufacture boots chiefly, and heavier goods in the winter, as plow-shoes, brogans, Don Pedros, English ties, nailed and stitched downs—the last a specialty. Pay-roll, 175 to 200. Daily product, 1000 pairs. Boston office, 1135 Summer Street. The business of this company is having a healthy growth.

C. E. Johnson & Co., 1885.—Factory on Cochituate Street, 160 feet long, four stories high, with ell of forty feet. This firm has a complete establishment, with the latest machinery for the manufacture of brogans, plow-shoes, Creedmores and kip, split, grain and calf seamless "bals." for the extreme Western trade. Pay-roll, 175. Weekly product, 200 cases. Boston office, 116 Summer Street. Superintendent, Frank L. Ferrin; book-keeper, Frank Atkinson.

Sheldon Brothers.—W. R. Sheldon and Alexander Sheldon, established 1882, make men's, boys' and youth's boots and shoes, about 20,000 pairs annually. Sales, \$20,000. Pay-roll, 25. Sell chiefly to retailers. Use steam-power in nearly all departments of work.

N. Bartlett & Son.—Nathaniel Bartlett and George N. Bartlett, 1869, make brogans, hob-nail, English ball and button boots, 46,000 pairs annually. Sales, per annum, \$52,000. Pay-roll, 40. Yearly wages, \$22,250. Taxed \$145.

Clark's Brick Block.—This, which is the largest business block in Natick, or in this part of the Commonwealth, stands partly upon the site of a similar but smaller structure, which was erected in 1872, only to be burned in the great fire of 1874. That block was about 100 feet in length and three stories high, while the present structure is of the same height, but 260 feet long. The latter, as was true of its predecessor, was built and is owned by Mr. Nathaniel Clark, who, after a long and useful business life, is passing the time of old age with the respect and affection of the entire community.

The chief frontage of this block is on Main Street. The lower story, which is devoted to stores, is occupied as follows: Edward Clark, grocer; E. M. Marshall, watch-maker and jeweler; W. L. Doane, boots and shoes; Gardella & Cuneo, fruits; barber; W. F. Cleland & Co., dry-goods; C. H. Whitecomb, hats and furnishing goods; Arthur W. Palmer, ready-made clothing and tailor; James H. Frost, apothecary; Charles W. Ambrose, watch-maker and jeweler; W. F. Demeritt, tailor; W. H. Jones, boots and shoes; George L. Bartlett, dry-goods; Miss C. H. Travis, milliner; Daniels & Twitchell, druggists; Harrison L. Whipple, art-store, dealer in pictures and picture-frames—sixteen stores.

In the second story are the rooms of the Natick

National Bank and of the Five-Cents Savings Bank (elsewhere described), of O. J. Washburn, dentist, Judge Nutt's law-office and District Court-room; the offices of tax-collector, of the selectmen, of the overseers of the poor, of the assessors, of the town clerk, of the School Committee and of the chief of police; the law-offices of James McManus, I. W. Parker, C. Q. Tirrell, G. D. Tower and L. H. Wakefield; office of Dr. William Richards; rooms of John F. Dowsley, dentist; of Miss L. M. Hart, dress-maker, Palmer's sewing-room and four large rooms occupied by the Natick Citizen Printing and Editing Company. In the third story are four halls, the largest of which—Concert Hall—is more than 100 feet long and well furnished for an audience of 1200 or 1400. This the town uses for all town-hall purposes.

Erwin H. Walcott Brick Block.—Owner, Erwin H. Walcott, at the present time a non-resident. This block fronts on West Central Street. One of the largest stores in it—and the entire second story of the building as well—is occupied by Cleland, Healy & Underwood for the sale of furniture, wall-papers, curtains, and a great variety of small wares. Another store constitutes the grocery establishment of Barnacle & Allen, while the third is the druggist establishment of C. W. Perry, who, in addition to his regular business as an apothecary, is entrusted with the sale of spirituous liquors for medicinal, chemical and mechanical purposes.

The Walcott Building. Mr. J. B. Walcott, owner. This brick and stone block, upon the corner of Main and Summer Streets, was erected in 1888, upon the site of the owner's boot and shoe factory, which was consumed in the great fire of 1874. The new block is by far the most beautiful and elaborately-finished structure in Natick. The lower story on Main Street is constructed of iron and plate-glass, and on Summer street of red sandstone. The upper stories are of brick, with sandstone trimmings. The staircase to the second story is wholly of polished marble, while the flagging-stones of the two fronts are very large and costly stones from the Hudson River Valley, perfectly cut and fitted in the best possible manner. On the lower floor, at the corner, is the spacious, well-lighted and finely-decorated store of Leamy & Tilton, with a large stock of new dry-goods and small wares. On the same floor is the Bay State Clothing Store of Hastings & Lowell.

On the second floor are six rooms for offices, with a large hall. Above are the elegant quarters of the Red Men, comprising a room for the ladies of the order with ante-rooms; also the large hall for the society's gatherings, and their banqueting-hall, with tables and a kitchen and pantry, furnished with ranges and crockery. The walls throughout have been treated with fresco or beautifully-tinted paints, and the entire establishment would be deemed ornamental in any city of our land.

One of the most imposing public buildings is Odd Fellows' Hall, situated on the corner of Main and Pond Streets. This building was built and is owned by Takawambait Odd Fellows' Building Association. The following-named gentlemen constitute the directors of said association: P. G. Charles Q. Tirrell, President; P. G. Frank E. Cummings, Treasurer; P. G. William L. Doane, Secretary; P. G. William F. Demeritt, P. G. James H. Littlefield and P. G. George E. Dunton. The architect was Ernest N. Boyden, No. 35 Congress Street, Boston, Mass. The land for this building cost \$4500. The corner-stone was laid with impressive ceremonies June 17, 1887, and it was dedicated by the Grand Officers of the Grand Lodge of Massachusetts, May 23, 1888. The building is about sixty feet high and is of four stories. On Main Street it is 56½ feet, on Pond Street, 88½ feet. The first story on Main Street is of iron and plate-glass, while on Pond Street it is of brick and plate-glass. The remaining three stories are constructed of brick with Long Meadow sand-stone trimmings. Underwood Bros., of Natick, had the contract for the brick, stone and iron work, and George Brierly, of Natick, the wood-work. The cost of the building was \$28,000. The first story consists of three stores occupied as follows: On Main Street, Milton E. Smith & Co., meat and provisions,—while the corner store is leased to Miss ——— McGrath for millinery. The Pond Street store is used by Noah L. Hardy for the sale of teas and coffees. The second story: O. H. Burleigh, insurance; H. G. Sleeper, lawyer. On this floor is the Banquet Hall of Takawambait Lodge, No. 59, I. O. O. F., and is 36 feet x 44 feet, seating capacity of 300. Third and fourth stories contain Odd Fellows' Hall and ante-rooms. The hall is 42 x 53 feet and 21 feet high, containing a new feature in Odd Fellows' Halls, viz., a gallery on two sides, with chairs for about 100, which is a very convenient arrangement. The hall is frescoed in elegant style at a cost of \$600 by Strauss Bros., of Boston. It is furnished to match in solid cherry and plush, at a cost of \$3000.

The Hogan Brick Block.—This is on the west side of Main Street. George C. Howe has in it a spacious store for the sale of dry goods and furniture, with storage-room on the second floor. Timothy Burns occupies the central part of the block as a boot, shoe and rubber store, with room for custom-work and repairing in the rear. Also in this block is W. C. Maynard's barber-shop.

John M. Fiske's Brick Block.—This, which fronts on South Avenue, was erected in the winter of 1888-89, and is seventy by fifty feet and three stories in height. Fiske & Co. occupy nearly all of it for the sale of hardware, stoves, building materials, painters' supplies and everything appertaining to water, steam and gas-piping, plumbing, etc. Mr. Fiske was in the same business in Eagle Block, but in his new and commodious building has found room for an increased

stock of goods and greater facilities for his business in general. The superintendent of his sales department is Charles H. Turner, while George L. Hill superintends the business of the workshop. A portion of the lower story of this block is occupied by G. W. Howe & Co., as the Natick office of Howe & Co.'s Boston and Natick Express, which will be noticed elsewhere.

Downs' Block.—This is on the west side of South Main Street, and is owned by James Downs, baker. Of the north division, Mr. Downs occupies a considerable part of the lower floor for his bakery and business office, and all of the second story. Kennedy & Buckley (successors of Loker Brothers) have here their grocery store. In the south division Mrs. J. Kenealy has a store stocked with dry goods and fancy articles, and Mr. Soule has a confectionery and ice cream establishment. The entire second story is occupied by Elijah Edwards & Son in the manufacture of shirts of woolen, cotton and silk. Their large business will be noticed elsewhere.

The Childs Brick Block, owned by Willard Curtis Childs. At the time of the great fire in 1874, Mr. Childs was the owner of three buildings, for manufacturing purposes, on or near the site of his block, viz., one twenty-four by sixty feet, two stories high; one thirty by fifty feet, two stories high, and a third forty by sixty feet, three stories high. All of these were destroyed, and the loss equaled \$5000 above the insurance. The block now standing was erected in 1876 and 1877, and is forty by eighty feet, and three stories high, fronting on South Avenue and Washington Street. In the basement is Mr. Childs' own workshop, where there is a twenty horse-power boiler and eight horse-power engine. Mr. Childs repairs bicycles and tricycles, turns wood-work and grinds tools.

P. F. Peters has here his factory for spring-lasting hammers and shoe-jacks; and J. A. Reall has his barber-shop and bath-rooms.

In the first story H. H. Berry has his refreshment saloon, J. J. Dolan his tobacco store, Miss M. Dolan her millinery establishment, and Blanchard & Hayward their rooms for shoe-finishing and stitching. The second-story is occupied by Martin Hall's job-printing office, whence issues the *Natick Weekly Review*. C. H. Inman and Dion have their machine-shops here, and make machine pegging-awls and edge-trimmers and Dion's Riveting Machines. In the third story is Washington Opera Hall, with spacious stage, scenery, etc., seating 350, heated by steam and lighted by Lungren lamps; with ante-rooms, fire-escape, etc.

Mr. Childs has built, also, a large number of houses in the village, besides being a partner in many firms for the manufacture of foot-wear and working in the gold mines of California.

Burks' Brick Block, owned by Charles W. Burks, and occupied on the lower floor in part, and on the

second entirely, by the owner as a furniture and carpet store. Mr. Burks is one of the undertakers of Natick and much employed in conducting funerals, and is largely concerned in the care and adornment of Dell Park Cemetery.

Charles S. Oliver, fish-dealer, occupies nearly, or quite, one-half of the lower story.

Woodbury's Brick Block.—Owner, P. F. Woodbury. Erected in 1874, on the site of the block destroyed by fire in same year. Situated corner of Main and Court Streets. Lower story occupied by H. F. Chamberlain, for sale of dry and fancy goods; Marnell Brothers, as a boot and shoe store, and on Court Street by the owner, P. F. Woodbury, for the sale of furniture, carpets, beds, bedding, window-shades, etc. On the second floor are the Young Men's Christian Association rooms, well fitted up and convenient, and the rooms of Dr. Frederick Lewis, dentist. On the third floor is a spacious public hall.

Winch's Brick Block, corner of Main Street and South Avenue. Owner, Leonard Winch. The corner of the first story is occupied by the Natick post-office, George L. Sleeper, Esq., postmaster. On the same floor is located the insurance and real estate firms of J. M. Forbush & Co., an agency for the sale of sewing-machines, and the large grocery store of Gray & Young. On the second floor are found a barber's shop, the rooms of St. Patrick Benevolent Society, and the quarters of the American Brass Band. In this block "The Lasters' Union," "The Trimmers' Union," and the "Natick Cadet Band" have also established quarters; while in the basement, under the post-office, is the fruit store of Gioga Salvatore.

Masonic Brick and Marble Block.—This was erected in 1874, and belongs to the estate of the late Leonard Morse. The front is of marble, the other walls are brick. It is occupied on the lower floor by the Atlantic Tea Stores Company, Messrs. Wilde & Soule, who deal in teas, coffees and crockery; by James F. Gray, manufacturer of confectionery and keeper of fruit for sale; by Leonard P. Stone, dealer in meats and vegetables, and by Beals' Clothing and Furnishing establishment. In the second story are Mulligan's billiard-room, Finn's barber-shop, Dr. Abbott's rooms for dentistry, and Miss Mabel Morse's music-room. The third and fourth stories are wholly occupied for Masonic purposes.

Rice's Brick Block (owners, Phineas G. and Martin Rice).—Adjoining the Masonic Block is the very extensive establishment of William D. Parlin, who occupies the basement and four stories above for his hardware, stove, plumbing, gas-fitting, steam and hot-water heating business, and whose contracts for goods and work extend over all the region and largely over the entire country. Mr. Parlin has two large store-houses for materials outside, and employs thirty-five or forty men. Seven horses are used in his work.

John B. Fairbanks has his large establishment in

this block, selling fruits, stationery, newspapers and everything found in a variety store. J. E. Dewitt's art store adjoins, for the sale of pictures, picture frames, stationery and artists' supplies. Here also is the domestic and Vienna bakery of C. M. McKeechnia, with sales-room, and the "Blue Store Clothing Company's" establishment, owned by Henry Andrews. In the second story is the printing-office of George C. Fairbanks, proprietor of the *Natick Bulletin*, the shop of J. H. Gilligan, tailor, and the law-offices of Messrs. P. H. Cooney and Henry C. Mulligan. A large part of the third story is used by the Grand Army of the Republic.

Tash's Brick Block, Summer Street, is chiefly occupied by George C. Wight, dealer in salt and fresh provisions, fruits and vegetables.

Wilson House Block, F. A. Stone, owner, hotel kept by L. K. Mitchell.—The stores in it are occupied by M. C. Brigham, druggist; James Sweeney, harness-maker; A. B. Lindsay, laundry; C. H. King, fish-dealer, and Jefferson Holmes, Yankee notions.

R. H. Randall has a store for the sale of dry and fancy goods at No. 9 West Central Street.

Hooker & Hawes are funeral and furnishing undertakers and dealers in carpets and household goods, at Adams Block.

At 29 South Main Street is the well-known establishment of J. H. Washburn, jeweler. Mr. D. W. Wells, in charge, is a regularly educated optician.

Wood's Block, erected by Edward W. Wood, opposite the railroad station.—This is occupied by Mrs. R. S. Bent, milliner; Washburn & Reed, druggists; R. E. Farwell & Son, insurance and real estate business; H. W. Atherton, millinery; E. E. Everett, baker; L. A. Perry, who has a bakery and eating-house, and John B. Moyse, harness-maker.

Eagle Block, owned by R. A. Ballou and occupied by Finn Brothers, tobacco and cigars; Shattuck Brothers, groceries; W. L. Brown, boots and shoes, and T. L. Irwin, for a furniture and kitchen goods store. On the second and third stories John Palmer has a boarding-house. On the first floor William Ballou keeps tonic and temperance drinks.

Edward Walcott Block, owned by the heirs of Edward Walcott, on Main, West Central and Pond Streets.—Hamlein's eating saloon and S. B. Knowles' meat-market are in the basement. The Natick Protective Union store, groceries and meat-market, is on the first floor, as is also the boot and shoe store of Moran & Buckley. William Flynn, tailor, has quarters in this part of the block. In the second and third stories is the hotel of George Rogers, and a portion of the boot and shoe manufactory of J. B. Walcott is in the same.

SOUTH NATICK, BUSINESS, ETC.—The postmaster is William J. Cronin, appointed in 1886. He has also a harness establishment. M. B. V. Bartlett keeps fine groceries, flour, provisions, etc. James E. Cooper has succeeded Gustavus Smith as druggist.

Thomas Foy has a boot and shoe store. J. A. Smith sells dry and fancy goods. George H. Jackson has a variety store. J. W. King keeps groceries, crockery, tin goods, grain, flour, etc. George J. Ingalls has sold for seven years foot-wear and furnishing goods. H. P. A. Weigand has a grocery and variety store. Frank F. Schumann keeps vegetables and has a meat-market. Patrick F. Hallinan and Fred. Neauschafer have meat markets. The largest business block is owned by Messrs. Edwards & Clark. The South Natick manufacturers are as follows:

William F. Pfeiffer & Co. (William F. Pfeiffer, William H. Pfeiffer, Charles F. Pfeiffer) began business in 1870. Make boots and shoes—130,000 pairs annually; annual sales, \$115,000; wages annually, \$25,000; apply power to all machines; are their own superintendents. Cashier, Charles F. Pfeiffer; book-keeper, Mrs. C. F. Pfeiffer; employés, 50 in number.

John Schneider (established 1883) makes brogans, plow-shoes; specialty, Hungarian nail and hob-nailed shoes for miners; from 25,000 to 30,000 pairs annually; has 30 employés; sells all over the United States; works mostly on orders; sales, \$36,400.

E. Dowd, Jr., successor of Hopf & Bisch, makes boots and shoes, chiefly nail brogans; employs 8 men, and sells chiefly at the West. E. Dowd commenced manufacturing in 1860.

The Maltha Manufacturing Company have commenced making at South Natick a substitute for India rubber, which, it is claimed, can be produced for two and one-half or three cents per pound. The work is yet largely experimental. This is a joint stock company, Mr. Stephen M. Allen owning one-half.

The water-fall at the village is rated at 150 horse-power, and at the rapids below at 100.

OTHER MANUFACTURES.—Shirt-making is one of Natick's industries which continues to give employment to many females. This was commenced in 1861 by *W. & E. Edwards* (William and Elijah), and when the partnership was dissolved, the younger brother associated with himself his son, F. E. Edwards, under the firm-name of *E. Edwards & Son*. The production of their factory is very large, and consists of fancy and plain flannel shirts for vacation, bicycling and tennis wear. They also produce the same article in cotton and silk. In the early days of this business the work was chiefly done in the families of the town and region, without steam or gas-power, but now it is done in the factory, and an engine drives all the sewing-machines. The Edwards shirts are well known and rank high in the market.

Newell Cooper is engaged in the same business, and manufactures woolen shirts of all kinds. Production, 35,000 dozen. He uses steam-power, and employs from 30 to 50 females, who run sewing-machines. The machines in this business are all owned and kept in repair by the proprietors. Mr. Cooper has conducted this business twenty years or more.

Base-ball Factory.—Firm of H. Harwood & Sons. Established 1858 by Harrison Harwood; later as above. Different grades are made, the best covered with horse-hide; the cheaper with sheepskin. The balls are wound at the factory, the covers are put on by women at their homes. Great quantities are made, that are shipped to all the cities and larger towns of the United States and Canada. The League ball is the ball of the prominent professional clubs throughout the country. Superintendent, J. Sweetland; book-keeper, F. Wight.

CONNECTION WITH THE WORLD.—A century ago three turnpike roads, from Boston westward, passed through this town in the north, centre and south parts of the same. These were kept in fairly good repair, and stages upon them furnished the means for public conveyance.

In 1834 the Boston and Worcester Railroad (now Boston and Albany) was opened through the centre of the town, and from that time the population and business of the place have been increasing. It is understood that this railroad corporation will soon lay the third and fourth tracks through Natick, and make great and substantial improvements in and around the station. The passenger and freight business of Natick upon this road is very large.

The Saxonville Branch of the Boston and Albany Railroad connects with the main line at Natick. This is about five miles long.

The Natick and Cochituate Street Railway is between three and four miles long, and carries and brings passengers between the two villages as many as twenty times each day, except on the Sabbath, when the trips number five each way. This road, with its good equipments is a great public convenience, as from 100 to 120 of the employees in the factories of Felchville and Cochituate reside in Natick, and daily use the horse-cars. Built in 1885; cost, \$32,000; capital, \$25,000, held mostly in Natick and Cochituate; 200,000 passengers annually. President, Harrison Harwood; secretary, F. H. Hayes; treasurer, William H. Bent; superintendent, George F. Keep. These, with O. A. Felch, John O. Wilson and Charles Park, are directors.

CEMETERIES—*The Ancient Indian Burying-Ground.*—Like the English people of early times, the Indians of the Natick Plantation made a cemetery of the ground immediately adjacent to their first meeting-house. This was in South Natick, and the limits of their burying-ground appear to have been as follows: Beginning at the ancient Eliot Oak and running west, north of the Unitarian Church, to a point near the corner of the school-house yard, thence southeasterly to about the lower end of Merchants' Block, thence across the street in front of Bacon Library building, and over the green in the rear, to the south-east corner of the land enclosed, where once stood the residence of the famous "Deacon Badger," and from that point back to the Eliot Oak, taking in the

grave of the Indian preacher, Daniel Takawampait, which is the only grave that can be identified.

William Biglow, who wrote his history of Natick in 1830, tells us that within his memory the remains of Indians had been brought to this ground from the surrounding region for burial. In building the walls around the church green, many graves were disturbed, and in laying the water-pipes south of the church towards Bailey's Hotel, a long row of Indian graves was brought to light. Beads, spoons, pipes, an Indian kettle and many other relics were secured for the museum in this way. Generally, the bones were carefully re-interred.¹

A second Indian burying-ground, of smaller dimensions and plainly opened much later, is on the north side of Pond Street, in the central village. This was probably used after their old cemetery in South Natick had been chiefly given up for other purposes.

This ground on Pond Street, much neglected for many years, is now to be fenced and properly graded. Trees are to be set out, seats provided, etc. This is to be done by the Wamsquam Association, of which Amos P. Cheney is president, with a full list of officers, all of which is as it should be.

The ancient cemetery north of the Unitarian Church in South Natick was granted by the Indian proprietors, June 22, 1731, "to Mr. Peabody and his successors, and for the use of other English inhabitants." In 1830 there were ninety-two grave stones for single persons, and one, that of Rev. Mr. Badger, for seven members of his family, in that cemetery. One tomb contained then five bodies. Eighteen of the ninety-two alluded to above were over sixty years old at death.²

Before 1805 the remains of some persons had been buried where the Edward Walcott business block now stands, and possibly in the ground now covered by the "Old Fellows' Block." But burials there were doubtless discontinued when the Central Cemetery was opened north of the brick church, covering the ground now occupied by the brick blocks on the east side of Main Street. This last-mentioned burying-ground was used nearly or quite as late as 1849, when the town purchased twelve acres of land of Edward Walcott, for the Dell Park Cemetery. This was consecrated in that year, Hon. Henry Wilson having charge of the procession which was formed on the occasion. Rev. Samuel Hunt's address at that time has been preserved in Bacon's "History of Natick." When this new cemetery was opened, the remains of those who had been buried in the ground on Main Street, as well as the tombstones, were removed to it, and for nearly forty years a large part of the interments of the town have taken place there. Farther west, the Catholic cemetery has been laid out and now contains many graves and monuments.

The North Cemetery is supposed by many to be the oldest in Natick, with the exception of that in South Natick, but when it was laid out is uncertain, though it must have been before 1758. In 1830 it contained forty-three grave-stones, ten of which were for persons over sixty years of age, and a later notice refers to one of a person who was ninety-one, and another to an individual who arrived at the age of 103.

The land for the cemetery in the west part of the town was given by William Boden, Esq., and the grant was made in 1815. A monument was erected in it, in 1855, to perpetuate the memory of the donor, who was a man of respectability and great excellence of character.

LAWYERS.—William Biglow wrote in 1830 thus: "But one of this class of citizens has ever attempted to gain a residence in this town; and he remained but a short time."

The historian here had reference to *Ira Cleveland, Esq.*, who, finding but little encouragement to be a lawyer in Natick, soon removed to Dedham. *John W. Bacon*, born in Natick in 1818 and graduating at Harvard College in 1843, commenced the practice of law in this place in 1846, and continued it until he was appointed one of the judges of the Superior Court. He was as a lawyer what he was as a judge, an inflexible supporter of everything that is right and elevating in the community. (See under the head, Biographical.)

Benjamin F. Ham, a native of Farmington, New Hampshire, opened a law-office in Natick about 1853. He studied law with John W. Bacon and was admitted to the bar in 1852. Mr. Ham was chosen town clerk to succeed Chester Adams, Esq., when the latter retired from that position after twenty-seven years of faithful service.

Oliver N. Bacon, the historian, was a teacher for some years, studied law with John W. Bacon and Lyman Mason, of Boston, and opened a law-office in Natick about 1856.

George Lane Sawin, born in Southboro', January 15, 1837, graduated from the Law School in Cambridge in 1860, and received from that institution the degree of LL.B. in 1867. He was a partner of Judge Bacon from 1860 to 1865. Mr. Sawin was an able lawyer and did much business. He died at Washington October 31, 1867. Had been a member of the State Senate one year and of the Lower House three years before his death. Among the Natick lawyers of the present generation Walter N. Mason was very prominent and ranked high in his profession, not only here, but in Boston, where he had an office. Mr. Mason was capable of doing a great amount of business and had a large practice. He was elected Senator from the Fourth Middlesex District for the Legislatures of 1883 and 1884.

Charles Q. Tirrell was born in Sharon, Massachusetts, December 10, 1844. His father was a physician in Weymouth. He entered Dartmouth College in

¹ See also the report of the Historical Society, 1880, p. 10.

² See also the report of the Historical Society, 1880, p. 10.

1862 and graduated in 1866. Taught an Academy and High School for three years. Was a member of the School Committee of Weymouth four years. Was a Republican member of the Legislature from Weymouth in 1872; served on the Probate and Chancery Committee. Removed to Natick in 1873, and in that year married Miss Mary E. Hollis, of this place. Was Senator for the Fourth Middlesex District in the Legislature of 1881, serving on Committee on Public Health, Prisons, etc. A year later he was re-elected to the same office and was a member of the Committee on Judiciary and Public Health and chairman of the Joint Committee on the Liquor Laws. In 1884 he received a large complimentary vote for Congress in the Republican Convention, and in 1888 was the Presidential elector from the Ninth Congressional District, casting his vote for Benjamin Harrison. Mr. Tirrell studied law with Richard H. Dana, Esq., and was admitted to the bar, in 1870, and has offices in Boston and Natick. He has one child, Arthur H. Tirrell, born June 4, 1881.

William Nutt was born August 5, 1836, in Topsham, Vermont, studied law with Walter N. Mason, Esq., in Natick, and was admitted to the bar August, 1868. His office is in Natick. Was Representative from Natick in the General Court in 1871 and 1872. Was chairman of the Natick selectmen in 1874, 1876 and 1881. Served in the war for suppressing the Rebellion; was corporal and sergeant Company I, Second Massachusetts Regiment, lieutenant in Fifty-fourth Regiment Massachusetts Volunteers, then captain, major and lieutenant-colonel in Fifty-fifth Regiment Massachusetts Volunteers and made colonel of volunteers by brevet. Colonel Nutt was appointed Justice of the District Court in May, 1886, and a large business is transacted in his court, particularly in the trial of liquor cases. He is often the moderator of town meetings and the trusted executor or administrator in the settlement of estates. Judge Nutt married Miss Abbie P. Puffer, and their children are William H., Charles, George, Henry, Nellie A., Julia M. and Matilda E.

Patrick Henry Conney was born in Stockbridge, Massachusetts, December 20, 1845; was educated in New York Schools, Natick High School (graduating in 1866) and in the West Newton English and Classical School (Allen Brothers, proprietors); studied law with Bacon & Sawin and John W. Bacon; was admitted to the Suffolk bar November 1, 1868. Established in Natick January 1, 1869. Has a Boston office at 23 Court Street. Was a member of the Natick School Committee from 1880 for three years. In 1884 was appointed assistant district attorney for the Northern District of Massachusetts—a State office—is now district attorney. Was nominated by the Republicans for Representative in 1881 and defeated by three votes. Is unmarried.

Harrison G. Sleeper was born in New Sharon, Maine, in 1837, and educated in Boston Public

Schools, including English High School. Studied law and was admitted to the bar at Lowell in 1862. Practiced law in Frederick, Maryland, from 1865 to 1876, and served on the Public School Board there for eight years. Was a lawyer in Portland, Maine, from 1876 to 1883, when he removed to Natick. Mr. Sleeper married Miss Sarah F. Prescott, of Deerfield, N. H. They have two sons,—Henry G. Sleeper, born July 9, 1865, and Arthur P. Sleeper, born Sept. 21, 1875. Mr. Sleeper's law-office is in Odd Fellows' Block, Natick.

William A. Knowlton was born in Nashville, Tenn., June 24, 1855, and was three months old when brought to Natick, where he has since resided. Was educated in Natick Public Schools, including the High School and Phillips Academy, Andover, from which he graduated. Then went to Amherst College and to Boston University Law School, from the latter of which he graduated in 1881, and was at once admitted to the bar. Immediately Mr. Knowlton began to practice law in Natick and Boston, and is engaged in the same at the present time. In 1888 he was elected by the town as one of the trustees of Morse Institute. The maiden-name of his wife was Elizabeth J. Burks, and they have one child, born Oct. 31, 1888, named Harold W. Knowlton.

Frank M. Forbush, counselor-at-law, Natick and Boston, was born at Natick, Sept. 20, 1858, was educated in the public schools of Natick and the English High School of Boston, and is secretary of his class (75) of that school. Entered the Law School of Boston University in 1881, taking the studies of three years in one year. Was admitted to the bar of Middlesex County Sept. 13, 1882. Commenced practice at once in Boston and Natick. Nov. 1, 1882, he married Miss Annie Louise Mead. They have one child, Walter Alfred Forbush, born Oct. 11, 1886. In 1886 Mr. Forbush organized in Natick "The Henry Wilson Co-operative Bank," of which he has been from the first the attorney. In "The Royal Arcanum" and "Home Circle" (fraternal benefit societies) he has held office. His Boston office is at No. 5 Tremont Street, Room 63.

Henry Coolidge Mulligan was born in Natick March 6, 1854, and educated at the Adams Academy at Quincy and Harvard University, graduating from the college and the Law School. Was admitted to the bar in Boston, Jan. 14, 1883. Has law offices in Boston and Natick. Has been a member of the Natick School Committee since 1884, and one of the Trustees of Morse Institute since 1885. Mr. Mulligan married, Dec. 22, 1886, Miss Minna Rawson, of Worcester, and has a son, Ralph Coolidge, born March 15, 1888.

James McManus, a lawyer in Natick, was born in Ireland August 20, 1847. Came to the United States when a child. Was educated in the public schools and at Harvard University, graduating in 1871. Admitted to the bar in 1873. Practiced in Natick. Is

town clerk, and has been since 1886. Has served as trustee of Morse Institute, and is a member of the School Committee.

Messrs. G. L. Sleeper, C. B. Feleh, G. D. Tower, I. W. Parker and L. H. Wakefield are also Natick lawyers.

PHYSICIANS.—Of the Indian doctors, male and female, the name of Joshua Bran alone survives. Those whose names follow were among the earlier physicians in Natick: Isaac Morrill, came 1771; Asa Adams, 1782; Alexander Thayer, 1813; John Angier, 1817; Stephen H. Spaulding, 1823; John Hoyt, 1840; Adino B. Hall, 1849; Ira Russell, 1853. Dr. Russell, who has recently died at his home in Wintchendon, was greatly respected by the present generation.

Dr. George J. Townsend is the oldest of the Natick physicians. He resides at South Natick, but he has patients in all parts of the town. He was born in 1820, and graduated at Harvard University in 1842.¹

Dr. William Richards has had much experience as a physician. Born in Hillsdale, N. Y., educated at Kinderhook Academy, University of Pennsylvania, Albany Medical College and in Long Island Hospital; he practiced in Cummington fifteen years. He was then nine years in Brockton, and came to Natick in 1879. Has been selectman, overseer of the poor, assessor, and is now a member of the Natick Board of Health. Is a Fellow of the Massachusetts Medical Society. Mrs. Richards was Miss Martha A. Brown, of Berkshire County, Mass.

Dr. Samuel K. Harriman was born in Prospect, Maine, educated under private tutors till fitted for Yale College, took his undergraduate medical course at Bucksport and Winterport, Maine, then was a member of Pennsylvania University, and took degrees in medicine in Philadelphia and Jefferson Medical Colleges. Later pursued special studies at the latter institution 1881-83, after he had practiced three years in Philadelphia, and the same length of time in Natick. Dr. Harriman is at the present time unmarried, having buried all his family.

Dr. Edgar S. Dodge was born in Enfield, N. H., was educated in the public schools, at Union Academy, in Canaan, N. H., and at the Harvard and Dartmouth Medical Colleges, graduating at the latter in 1876. Was resident physician at the hospital on Rainsford Island, Boston Harbor, and then pursued medical studies in Europe. Settled in Natick 1879, and has had here a lucrative practice. In 1885 was on the Board of Health, and in 1887 and 1888 was on the Board of Selectmen. In 1880 Dr. Dodge married Miss Alice Louise Churchill, who was born in Abington, Mass. They have two children—Florence Louise and Raymond Churchill.

A. Francis Story, M.D., was born in Essex, Mass., educated in Salem High School, Brown High School,

Newburyport, in the Boston University School of Medicine, St. Bartholomew Hospital, London, England, and the Rotunda Hospital, Dublin, Ireland. Graduated from Boston University in 1882, and from Rotunda Hospital in 1883. Commenced practice in Natick October 1, 1883. Dr. Story's specialty is treating heart and lung diseases, and he has a large practice. Married Elizabeth Flora Howard, and they have no children.

Doctors Sylvester, Wright, Cook, Smith, Manual, Keating, Cochran and Weston are physicians in Natick, but have furnished no items of personal or professional history.

EXPRESS COMPANIES.—*Howe & Co's Natick, Cohituate and Boston Express* was established about thirty-five years ago, and performs an important part in the business operations of Natick. The proprietors are G. W. Howe and J. B. Messinger. Their Boston offices are at 91 Kilby Street and 34 Court Square. The Natick office is in Fiske's Brick Block. They employ five or six teams for their Natick work, and about the same number in Boston. On an average this company sends to and brings from Boston a full car-load of goods each day in the week, except the Sabbath.

The Adams Express Company does a large and constantly increasing business in Natick. The local agent is H. G. Wight.

The American Express Company has an important office in this town, reaching all the communities at the North and Northwest, even to the Pacific Ocean. William H. Pond is the Natick agent.

Bailey's Express communicates with Boston daily from South Natick, taking the Boston and Albany Railroad at Wellesley. The proprietor is Almond Bailey, of Bailey's Hotel, South Natick. This express company loads a car each day to and from Boston.

COAL, WOOD, ETC.—*Robinson & Jones* sell annually—Coal, 6190 tons; hay, 450 tons; straw, 75 tons; fertilizers, 40 tons; wood, 600 cords.

Warren A. Bird is a dealer in coal and wood.

The Union Lumber Company deals largely in wood and coal.

NATICK FRATERNITIES.—These are social, educational and benevolent, and most of them secure to the members aid in sickness and a fixed allowance to families at the death of members. The *Natick Citizen* enumerates forty-seven of these societies (without including those connected with the churches), with 4858 members, and concludes that they raise and expend not far from \$4000 per month.

On Church Street is the "People's Laundry." Proprietor, Daniel A. Mahoney. Also E. M. Reed's furniture store and W. B. Fletcher's drug store.

The old tavern of South Natick, built during the Revolutionary War by Deacon Eliakim Morrill, the "Uncle Eliakim" of "Old Town Folks," was burned in 1872, and under one of its corner-stones its owner,

¹ See Bacon's "History," page 137.

Mr. Goen Bailey, found seventeen pieces of copper money bearing dates from 1696 to 1775. These are all French or English coins, bearing the names of Louis the XV. of France, and of the first, second and third of the Georges of England. Mr. Almond Bailey, proprietor of Bailey's Hotel, has these coins in charge and will show them.

THE PRESS.—*The Natick Bulletin.*—The predecessors of this paper were as follows: In 1856 the *Natick Observer*, E. E. Fisher, proprietor, started with 300 subscribers. Then edited and published by George O. Willard, then by G. W. & D. B. Ryder. No paper during the Civil War. In 1865 came the *Natick Times*, under Washington Clapp, continued till 1869, when, under W. W. Hemenway the name was changed to *Natick Bulletin*. Later Hemenway & Mayhew published it. It was burned out in 1874. Then Cook & Sons, of Milford, took it and conducted it till 1880, when Horace L. Welles became owner. In 1882 it passed into the hands of its present editor and proprietor, Mr. George C. Fairbanks, since which period its subscription list has been greatly enlarged, in eight months from 600 to 1200, and a large job printing establishment built up, printing at one time, besides the *Bulletin*, *The Cochituate Enterprise*, *The Saroville News* and *Sherborn Mirror*. The form of the *Bulletin* was changed to a quarto in 1885. The aim of this paper is to promote and strengthen every good cause, as the business of Natick and vicinity, education, temperance, general morality and virtue. In politics the *Bulletin* is independent, with Republican proclivities. Mr. Horace Mann has contributed to it, from time to time, many valuable articles upon the early history of this town.

Natick Citizen.—In the autumn of 1878 a number of the leading men in Natick, not feeling satisfied with the newspaper purporting to be published in this town, but really owned and printed by parties in Milford, called a meeting and decided that the interests of Natick demanded a new paper, which should represent more largely and vigorously the business and general welfare of the town. They also became responsible to the amount of \$500, should such a paper fail to be a paying investment during its first year. With this guarantee Messrs. Ryder & Morse commenced the publication of the *Natick Citizen* in December, 1878. From the beginning the enterprise was a success, and at the end of the year no part of the \$500 was called for. In June, 1882, the firm of Ryder & Morse was dissolved, Mr. Ryder removing to California and Mr. Edwin C. Morse becoming judge of the District Court. A stock company was then formed to continue the publication of the paper, with a capital of \$5000, and Mr. Erwin H. Walcott as its editor. After three years' service family afflictions led Mr. Walcott to retire from this position, and the office was leased for a term of years by Mr. Charles D. Howard, who had enjoyed twenty years' experience in journalism as the publisher of the *Peabody Press* and the *Salem Evening*

Post. With Mr. Howard, his son, Mr. William T. Howard, is connected, and the *Citizen* is published by Messrs. Charles D. Howard & Son, the former of whom is editor. During the past four years this office has done a large book, job and newspaper business at one time printing every week no less than five distinct newspapers. It occupies four rooms in the second story of Clark's Block and its employees number ten to twelve. Its equipment is excellent, and it bids fair to become the largest printing establishment between Boston and Worcester. The *Natick Citizen* may be called independent with Republican proclivities, and is a strong advocate of temperance, education, morality and all that can advance the public welfare. It is issued every Wednesday.

Natick Weekly Review, proprietor and editor, Mr. Martin Hall. Independent with Democratic proclivities. First issue, January 1, 1887. Mr. Hall removed his office to Childs' Block, May 1, 1889. The paper, which has been printed at the office of the *Natick Citizen*, will be issued from the proprietor's new office in future in connection with a job printing business. Mr. Hall prints by steam on a Campbell oscillating press.

MEAT MARKETS.—The meat-markets of Natick and of many of the adjacent towns are supplied by *The Natick Beef Company*, who are receivers of *Swift's Chicago Dressed Beef*, etc., which comes in the refrigerator cars of the company direct from Chicago. The refrigerator here takes in at once fifty tons of ice.

BIOGRAPHICAL.—*William Biglow* (Bigelow) graduated from Harvard College, 1794. Was a teacher in Salem, and master of the Boston Public Latin School; was a writer of books and pamphlets; was a poet of no mean abilities, and published brief but reliable histories of Sherborn and Natick, the latter in 1830. He died suddenly in Boston, January 12, 1844.

Calvin E. Stowe.—Born in Natick, April 26, 1802, graduate of Bowdoin College and Andover Theological Seminary, was a Professor of Ancient Languages in Dartmouth College, of Sacred Literature in Lane Seminary, Cincinnati, Ohio, and held the same place in Andover Theological Seminary. He traveled extensively in Europe, was a voluminous writer and translator, a ripe scholar, and a man of note because of his own abilities and acquirements, but known all over the world as the husband of Mrs. Harriet Beecher Stowe, the author of "Uncle Tom's Cabin," "Old Town Folks," and other popular books.

Judge John W. Bacon.—Born in Natick, 1818, graduating at Harvard University in 1843; was long a conspicuous figure in this community as a teacher, lawyer and especially as judge of the Superior Court. At different times he held some of the most important town offices, and was one of the citizens who did a most important work in establishing the Morse Institute, of the trustees of which he was a prominent member for fifteen years. Judge Bacon died very suddenly while holding court at Taunton,

March 21, 1888. The members of the bar in Natick presented, through their chairman, Hon. C. Q. Tirrell, to the town, in town-meeting assembled, a series of resolutions, setting forth the character and noble work of Mr. Bacon as an estimable citizen, able lawyer and just and enlightened judge, which the town ordered to be placed in full upon their records.

Henry Wilson.—A native of Farmington, N. H., came to Natick, December, 1833. He learned the shoemaker's trade, and was soon a manufacturer of boots and shoes, employing more than 100 men. He continued this business about eleven and a half years, but during all this period was laying up a store of practical knowledge. In 1840 he was a politician engaged in the Presidential campaign; in 1841 a Representative in the General Court; in 1841 a State Senator; in 1855 a Senator in Congress; in 1861 a colonel in the United States service, and the Vice-President of the United States upon the second election of General U. S. Grant to the Presidency. Mr. Wilson was deeply interested in the moral and religious prosperity of Natick, as well as in crushing the slave power that had long ruled our country. He died suddenly at Washington, November 22, 1875. President Grant at once announced his death to the country, setting forth his high character and eminent services, and giving the usual directions to the several departments of government for honoring his memory. His funeral took place in Natick (where his remains rest), December 1, 1875, in the presence of a great assembly.

John O. Wilson.—Senior partner in the firm of J. O. Wilson & Co., has long taken a prominent part in the industrial, educational, moral and religious as well as financial affairs of Natick. Mr. Wilson is a native of Hopkinton, came to Natick in 1839, learned the trade of a shoemaker and followed it twelve years. Then he commenced as a manufacturer and is now at the head of the largest boot and shoe factory in Natick, employing 100 persons and selling goods amounting to \$1,250,000 annually. For thirty-eight years he has been one of the deacons of the Congregational Church, is the only one of the original trustees of Morse Institute now in office, and is president of the board; is the president of the Natick Savings Bank and of the Natick Electric Company, and one of the directors of the Natick Gas Company.

Daniel Wight.—Born in Natick, has been an oecumenian since September 18, 1888. Early a teacher, he fitted for college in Phillips Academy, and graduated from Harvard University in 1837, and from Andover Theological Seminary in 1840; was ordained pastor in Scituate, Mass., September 28, 1842, where he remained for sixteen years. Later he was pastor at Boylston three years, missionary to the Seneca Indians, N. Y., one year, pastor of Second Church, Ashburnham, 1863-71, after which he returned to his native town, where he now resides, engaged in literary and other helpful work of various kinds. Was

librarian of Morse Institute, 1875-83. Mr. Wight is the author of the impressive picture, "Progress of Bunyan's Pilgrim from the City of Destruction to the Heavenly City." The London *Morning Advertiser* speaks of this as "a remarkable work of art," and gives an outline of the entire composition, embracing at least one hundred subjects. The picture has been admired by thousands on both sides of the Atlantic. There were 6000 copies and 800 proofs printed, after which Mr. Wight presented the plates (considerably worn) to "the Congregational Publication Society," with 100 of the proofs. The plates were afterwards sold (with the full consent of Mr. Wight) for the sum of \$450, to be removed to one of the Western States.

Harrison Harwood.—Was born in North Brookfield Oct. 18, 1814, and was the son of George W. and Annie Biscoe Harwood, of Spencer, Mass. His grandfather was a major in the Revolutionary War.

The pecuniary circumstances of the family prevented young Harwood from obtaining a collegiate education, but in Westminster Academy, which deservedly held a high rank among the institutions of learning in Worcester County, he made great proficiency in his studies.

At the age of nineteen he was a popular and successful teacher, and three years later was engaged in business in Adrian, Michigan. At the age of twenty-five he returned to New England, and after having lived for a short time in Oakham, and for a longer period in Fitchburg, he finally settled in Winchendon and soon became one of her most enterprising citizens. In that place he built a fine Town Hall, a large business block, his own pleasant home and a number of other private residences, besides originating and establishing the business of manufacturing rattan baskets. Later, he re-engaged in business in Adrian, but in 1858 settled permanently in Natick.

Here he erected a factory for the manufacture of base-balls, which soon became the foremost of its kind in the country. His three sons were admitted as partners in this enterprise, and the firm "Harwood & Sons" built up a large and lucrative business that continues to give employment to many of the people of Natick.

Ten years after he came to this place Mr. Harwood erected his elegant residence on Walnut Hill, and to his taste and liberality in making improvements is due, in no small degree, the great beauty of that part of the town. His good judgment and large business experience fitted him for faithful and efficient service as one of the selectmen of Natick in 1871, '72 and '73. In the first of these years he was chosen one of the county commissioners of Middlesex County by a large majority, receiving for this office 910 of the 919 votes cast in Natick. Re-elected in 1874, 1877 and 1880, he had, at the time of his death, entered upon the twelfth year of his service in this capacity, and for about seven years had been the chairman of the board.

H. Hammond

Mr. Harwood was also one of the projectors of the Natick National Bank and, for a number of years, one of its directors.

In an enterprising and growing town like Natick the calls upon the public spirit and liberality of its leading citizens will always be numerous, and these were met most cheerfully by Mr. Harwood.

But while his industry, ability, gentlemanly bearing and rare judgment eminently fitted him to be a useful and trusted public servant, the same and other qualities of mind and heart made him especially respected and beloved in the domestic circle. His home was his delight. His wife was Miss Adeline Greenwood, of Winchendon. As a husband and a father Mr. Harwood seemed to live largely to promote the comfort and welfare of his family, but for this reason he never overlooked the claims of his neighbors and acquaintances upon his hospitality, and this he dispensed generously. He delighted in the culture of fruit and the adornment of his grounds and those connected with the elegant residences of his sons, all of which are in close proximity.

For two years Mr. Harwood was feeble and, at times, a great but uncomplaining sufferer. He died Aug. 27, 1882, leaving a widow, three sons and one daughter.

Though for a considerable part of his business life a servant of the public, and as such unsparing in his efforts to faithfully and promptly discharge all the duties of the offices to which he was elected, Mr. Harwood was, more than most husbands and fathers, a domestic man, and for this reason his death, at the age of sixty-eight years, was a heavy blow to his family. His married life had covered forty-two years, and his home, as we have seen, was his delight. He was a confiding and loving husband and a trusted father.

To distinguish, in his case, between inherited characteristics and those acquired by a long and diversified business experience, might be difficult, but it is not too much to say that his parents were persons of strong practical common sense and their son was like them. He encountered at times great difficulties and experienced great disappointments in his business career, but these seemed only to make him more persevering and to bring out new and more effective resources for the work before him. Whatever seemed to him the right and best thing to do, he generally found the means of accomplishing.

Mrs. Harwood (formerly Miss Adeline Greenwood), is the daughter of Henry and Sally Woodbury Greenwood, of Winchendon.

They were married May 21, 1840. Her father was a farmer. She and her daughter have for their home the beautiful dwelling-house, with pleasant surroundings, that was erected by the deceased husband and father.

The three sons have families as follows:

Henry G. married, December 24, 1865, Miss Isa-

bella Simonds Bryant, of Templeton, Massachusetts. They have one son, born January 22, 1870, Augustus Bryant Harwood. Harrison married, May, 1868, Miss Sarah Jane Winch, of Natick. Their children are Robert W. and Blanche G. Frank W. married, October 3, 1876, Miss Jennie M. Wheaton, who was born in Boston, but resided at Wellesley Hills. Their children are Albert W., born July 25, 1880, and Lelia W., born August 30, 1884.

It should be added that the business inaugurated in Natick by Mr. Harwood (now, June, 1890, controlled entirely by Mr. Harrison Harwood) has given to the family, if not great wealth as this phrase is now generally understood, at least a competence, while the factory has furnished profitable employment to very many in the town of limited means. A very large part of the hard work involved in the manufacture of base-balls can be conveniently done at the homes of the employes, and as leisure can be secured from domestic employments.

The covering of the regulation base-ball (and this is a very important item in its manufacture) must be sewed on by hand. As the best leather only will suffice for this covering, this firm built, some years since, in Natick, a tannery for the production of the best material for ball-covers.

An electric motor has recently been introduced into this factory.

The subject of this sketch was of medium height, compactly and symmetrically built, with dark and penetrating eyes and an attractive countenance.

Edward Walcott was born in Danvers, Mass., May 3, 1810, and was the son of John and Rebecca Newell Walcott, and the eldest of thirteen children, of whom two died in infancy. It was an industrious, laborious, pious family. John Walcott was a farmer and could give to most of his children only such educational advantages as were afforded seventy-five years ago by the public schools. The youngest daughter, however, would have graduated at Mt. Holyoke Seminary had she lived five weeks longer.

The subject of this sketch inherited from his father what may be termed an easy temper coupled with good judgment, and from his mother ambition, hopefulness, foresight and perseverance.

Probably without any definite and settled plan for his life's work he came to Natick when a youth of seventeen or eighteen years, and found a home in the family of Captain William Stone, who lived in the west part of Natick, and whose daughter Elizabeth he married about six years later, or December 25, 1831. Having gained some knowledge respecting the making of shoes, he invested the little money he had been able to save in the stock and implements necessary for this work. This was in 1828, which, as nearly as can be ascertained, was the date of the founding of Natick's great industry—the manufacture of foot-wear.

Lacking a more convenient stand for cutting his leather, young Walcott placed two barrels under some

shade-trees, and upon a wide board laid upon them commenced his work. When the stock first purchased had been used he took his goods to Boston and received for them additional stock and a little money. Though gradually enlarging his business, it was conducted for a number of years in this manner, when Mr. Walcott found himself able to remove to larger and more convenient quarters. Having purchased of Rev. Martin Moore his estate which covered the chief part of what is now West Central Street, with much of the land on both sides of it, and extending from Main Street west to the extreme boundary of Dell Park Cemetery, he moved the parsonage (built by Rev. Freeman Sears) from the corner where the Edward Walcott business block now stands west, and, turning it so as to have it face the north, made it into a comfortable home for himself. This is the house next west of the Edward Walcott block, on the south side of West Central Street. The house next west of this, and fronting north on the same street, was Mr. Walcott's Shoe Factory, in which for many years the cutting and packing was done. At that time no machinery was employed in the manufacture of boots and shoes, and the making of them was chiefly done at the homes of the workmen in this and the neighboring towns, even twenty or thirty miles distant. In 1856 the historian of Natick, Oliver N. Bacon, reported Mr. Walcott as employing about 100 men, and as having manufactured not far from three million pairs of shoes. But this business did not engross all the attention of Mr. Walcott, for, anticipating the wants of the growing village, he was instrumental in the laying out of new streets, and in reclaiming the swampy lands between the Boston and Albany Railroad and the Saxonville Branch, and converting them into good building lots. Spring Street was laid out and built up by Mr. Walcott.

Later he built the Edward Walcott Block, which is still owned by his surviving family, and also erected for himself the spacious and costly residence on West Central Street, now owned and occupied by Mr. Charles W. Gleason. It may safely be asserted that no other man ever built so many houses in Natick as Mr. Walcott, while to his forethought and taste the town is indebted for the long rows of noble shade-trees that add so much to the beauty and comfort of the homes on West Central Street, and awaken at once the admiration of strangers. With an unusual share of public spirit he was a leader in making improvements, and for a number of years was the largest tax-payer in Natick. He was not ambitious for office, but the town found in him a capable and faithful servant, while for a considerable period he was one of the directors of Newton and Framingham Banks. Happy in his domestic life, his home was his delightful retreat, while his numerous cares were perplexing and the gravest responsibilities pressed heavily upon him. Among Mr. Walcott's early associates in Natick were Captain George Herring, B. Mann and Henry

Wilson. With the latter he was especially intimate, as both were early anti-slavery men from the depths of their souls. "The Underground Railroad," which carried so many bondmen from hard servitude to freedom, had an opening into Mr. Walcott's house, and many an escaping slave found help and protection there and was sent on his way rejoicing.

During the war for the suppression of the Rebellion he was for two years a paymaster in the service of the Government, and stationed mostly at Washington.

By his marriage to Elizabeth Stone, Mr. Walcott had five children, one of whom died in infancy; three sons and a daughter survive him. The eldest of these, Albert, resides in Washington, and is employed in one of the Government departments. The second son resides in Oakland, Cal., and does business in San Francisco. The third son is John W. Walcott, who is, as his father was, a manufacturer of foot-wear in Natick.

The daughter is Mrs. Nichols, a widow, whose home is with her stepmother in the pleasant dwelling where Mr. Walcott spent his last years and died.

His second wife was Mrs. Hannah P. Henry, and they were married December 19, 1850.

When a young man Mr. Walcott was rather slightly built, but as years increased he became a stout man, weighing 180 pounds. His habits were those of the courteous and refined gentleman.

In 1832 he became a member of the Congregational Church, which he always supported with his money and influence.

In politics he was a consistent Republican, though not an ardent partisan.

His last sickness was of about three weeks' duration. It was a case of apoplexy, and he died April 7, 1876.

The interment was in Dell Park Cemetery, which, twenty-seven years before, he had conveyed to the town for burial purposes.

Willard Drury.—The most remote ancestor of Captain Drury, of whom the family in America has any reliable information, was Hugh Drury, whose name appears upon the records of Sudbury in 1641. The year following this date he purchased an estate in that town, but, selling the same four years later, he removed to Boston. There he became a member of the First Church, in 1654, and owned one-half of the Castle Tavern estate, besides lands near the Mill Bridge. He was a house carpenter by trade. Mr. Drury died in July, 1689, and was buried with his wife, Lydia, in the Chapel burying-ground.

The subject of this sketch was of the eighth generation from Hugh, as follows: Hugh¹; as above John²; born in Sudbury May 2, 1646; Thomas³, born August 10, 1668; Caleb⁴, born October 5, 1688; Caleb⁵, born May 22, 1713; Caleb⁶ (time of birth unknown); Abel⁷, married, December 1, 1803, Nabby Broad, of Natick. Willard was a son of Abel, and was born April 18,

Willard Doring

Leonard Mearns

1806, in the house now belonging to the estate of Edmund W. Wood, a little west of the Waban Rose green-houses, for that was the home of Abel Drury, his father.

Willard Drury was the younger of two children, both sons, his brother Otis having been born November 26, 1804. Mr. Otis Drury lived in Boston, and was in business there. He died October 2, 1883. Captain Willard Drury lived in the house in which he was born forty-seven years. In childhood and youth he attended the public schools of the town, and for a time was a student in Leicester Academy. Arriving at manhood, he became a teacher, though devoting himself chiefly to farming.

In early, as well as in mature life, he was distinguished for his industry, earnestness, perseverance and fidelity to trusts. Whatever he was expected to do he found means of accomplishing, provided it was right. Difficulties that would dishearten most men only served to make him more resolute, and to call into requisition new and more effective resources for overcoming them. No other man ever detested shams more heartily than did Mr. Drury, while he had what amounted to a genuine reverence for what was real, true, just and right. These characteristics he retained to the last, and never did they serve him and his fellow-townsmen better than during the last twenty-five years of his life. His mother was a very capable and strong-minded woman, in the best sense of this much-abused term, and her son Willard inherited most of her best qualities of mind and of heart.

Mr. Drury cared little for official distinction, but when called to office he was faithful in meeting all its responsibilities. It is doubtless within the bounds of truth to say that more than to any other person or persons the town of Natick owes to Mr. Drury one of its most beneficent and valuable institutions. Reference is here made to The Morse Institute, the general history of which will be found in its place in this sketch of Natick. It may properly be stated here, however, that, after the town had voted to accept the gift of Miss Mary Ann Morse for the founding of a library, Mr. Drury was the first named of the five trustees appointed by the town to take charge of the property and to carry into execution the will of Miss Morse respecting the same. After the trustees had been legally organized, and had entered upon their work, such difficulties and complications appeared that a vote was carried in a town-meeting to refuse the offer of Miss Morse, and to annul the act appointing a Board of Trust. It is understood that a part of the trustees favored this last-mentioned proceeding, and were indisposed to make any additional efforts to save the property for the town, but the majority persevered and brought about the appointment of Mr. Drury as administrator of the estate of Miss Morse with the will annexed. At once he entered upon the difficult work before him with great earnestness, and for some years managed the

whole matter with so much care and skill that, while the claims against the estate were satisfied, the property increased rapidly and largely in value; so that before 1872 the trustees could report to the town that the estate was substantially settled, and a large fund was ready for building purposes and the purchase of a library.

With less resolution, courage and skill in management on the part of Mr. Drury and his associates (of whom in this matter he was the acknowledged leader) the Morse Institute, with its large and valuable free library, reading-rooms, etc., would never have been established. Probably few, if any, of the multitudes who enjoy from week to week the benefits of this institution have any adequate idea of the narrowness of the margin between success and failure in this case, or of the amount of life-consuming anxiety and labor that was involved in saving this treasure for the town of Natick.

Mr. Drury's first wife was Miss Louisa Haynes, who was born April 22, 1805, and died August 26, 1849. Their only child, Abigail, became the wife of Mr. Isaac M. Fellows September 5, 1854. Mr. and Mrs. Fellows have a pleasant home on West Central Street.

June 1, 1853, Mr. Drury married Miss Roxa Broad, of Natick. She was born February 13, 1823, and died October 5, 1875. Their only child, Ella M., was born August 16, 1856. She was a member of the first class that graduated at Wellesley College. As an instructor in microscopy she spends a portion of each year in Boston, and devoted to the same specially she is a member of the faculty of instruction of Martha's Vineyard Summer Institute, the sessions of which open each year in the month of July and continue a number of weeks.

In 1853 Mr. Drury sold the house in which he was born and had hitherto lived, with all the land connected with it on the north side of the street (now "the Waban Rose" property), to Mr. William Henry Howard, and built for himself a new house on the south side of the street. This, standing upon eighteen acres of reserved land, was ever afterwards his home. It is the well-known place now occupied by Mr. Browning.

In stature Mr. Drury was tall and large, and till he was injured by lifting a burden too heavy, in the later years of his life, he was strong and had great powers of endurance. His parents became members of the Congregational Church in 1808, and he united with the same Nov., 1866.

Mr. Drury's last sickness, of a few weeks' duration, brought with it much suffering, and he died of cystitis (inflammation about the bladder) July 13, 1882. By will he left funds to the town of Natick to secure care for his burial lot in Dell Park Cemetery.

Leonard Morse,¹ belonged to one of the ancient

¹ This family name was, and is, variously spelled, in different, and

families, certainly of America, if not of England, and one of the most numerous. Reliable records trace his descent from Samuel Morse, who was born in England in 1585, and came to America with his wife, Elizabeth, and, at least, three sons, and settled in Dedham, Mass., in 1637.

Samuel Morse was not one of the "Pilgrim Fathers," but a staunch Puritan.

The subject of this sketch was of the ninth generation from Samuel the immigrant. The names of these ancestors, with those of their wives, are here given.

Samuel¹, wife Elizabeth; Daniel², wife Lydia; Daniel³, wife Elizabeth Barbour; Daniel⁴, wife Susannah Holbrook; Obadiah⁵, wife Mary Walker; Daniel⁶, wife Hannah Eames; Henry⁷, wife Eunice Dowse; George⁸, wife Abigail Underwood. LEONARD⁹ was born at Sherborn, Mass., Jan. 27, 1817. He had two brothers, George, born Oct. 13, 1821, and John W., born Jan. 21, 1829, and a sister, Eleanor C., who was born Oct. 17, 1819.

The father of this family was a farmer, and removed from Sherborn to Little South, now Southville Natick. Mr. Leonard Morse, like many other Natick men when laying the foundations of their prosperity, learned in youth the trade of a shoemaker, and not content to be simply a workman in that business, he established a shoe factory upon the east side of South Main Street, nearly opposite the dwelling-house of Mr. Dexter Washburn. This was before the introduction of machinery in the manufacture of footwear. All the work was done by hand, and it was a slow way to make a fortune. It is certain Mr. Morse did not acquire any considerable portion of his wealth in this manner, but he gained what was then more valuable,—a knowledge of men and skill and shrewdness in business.

The exact date of his withdrawing from this, which is the chief industry of Natick, is uncertain, but the time came when he turned his attention to investments in real estate and the loaning of money, and this was his business during all of the latter part of his life. For many years he always had funds to loan in almost any amount on good security, and doubtless did vastly more in this branch of business than any other capitalist in Natick. Rarely did his good judgment fail him in making his numerous investments.

Among his valuable possessions in real estate was the lot upon the east side of Main Street, next south of the block which contains the post-office. After the great fire, Jan. 13, 1874, had swept off all the cheaper buildings which had previously covered both sides of Main Street in that part of the village, Mr. Morse erected upon the lot just named the Masonic Block. This is built of brick, with a marble front, and is three stories in height, with stores upon the lower floor, business offices and rooms upon the second floor, while above are the spacious and convenient quarters occupied by the Masonic Fraternity. This is one of two or three ornamental blocks in Natick, and no other is more conveniently located for business purposes.

May 1, 1842, Mr. Morse married Miss Mary Ann Stone, daughter of Mr. Gilbert and Mrs. Eunice Underwood Stone, of Hopkinton, Mass. They had no children. Mrs. Morse survives her husband and retains their pleasant home on North Main Street, corner of Mechanic Street.

For two years before his death the health of Mr. Morse had been gradually failing, but he was confined to his house three weeks only. His death occurred April 27, 1888, and the immediate cause of it was apoplexy. His age was seventy-one years and three months, and he was buried in his lot in Dell Park Cemetery. Mr. Morse always took a deep interest in whatever affected the growth or prosperity of Natick.

Captain Daniel Morse, of the fourth generation from Samuel, of Dedham, was a man of note in the early history of this town. Born in 1694, he married, in 1719, Hannah Dyer, a daughter of his step-mother, and died January 7, 1773. He was the captain of the first military company raised in Natick, and when the plantation was to be erected into a parish, in 1746, he was authorized by the General Court to call the first meeting. His intellectual ability and undaunted courage fitted him to be a successful leader among the white settlers and the resident Indians.

Samuel O. Daniels was born in Framingham November 10, 1814. He came to Natick when a young man, and after having rendered himself familiar with the business of a druggist, opened, on Main Street, a druggist's store, on his own account. In the great fire in 1871, which consumed nearly the entire central portion of the village, Mr. Daniels was one of the sufferers; but when Clark's Block was rebuilt he opened a new and very attractive druggist establishment in that block, at the corner of Main and Summer Streets, and directly under the Natick National Bank. In this business he continued till the time of his death.

From his interest in scientific pursuits, especially in chemistry, it was natural that he should be among the first of the citizens of Natick to consider the advisability of introducing electric lights as one of the

It is a curious coincidence that the names Morse, Moss, Mours, Morise and Mors come from the same origin, and to these possibly Mays may be added. It is supported with good reason, that the name was spelled at an early date *Mors*, the Latin for death, as it was spelled by the Faculty of Medicine in the University of Padua, nearly a century before the name of this family. The fact that the name, in its original meaning of the word some branches of the family, was written with a double *s*, while some omitted the double *s*, is also a curious coincidence. The first mention of the Morse family for more than a century is in the "Genealogical History of Edward III. has been," in Deacon Annals of the town of Framingham, 1687. Of the numbers of the family at that time, the Deacon says: "The name of Morse, published forty years ago, and contained in the Deacon's Annals, of the family has, according to its completeness, been increased both by marriage and deaths. It is nearly certain that the several heads of these divisions had a common ancestor."

institutions of the town. As the result of inquiries and deliberations upon this matter, in which Mr. Daniels took a leading part, six gentlemen of Natick formed a syndicate for the purpose of establishing here an electric plant and lighting the streets and business establishments of the town by electricity. Of this syndicate Mr. Daniels was president and general manager, and Hon. Francis Bigelow was treasurer. A large building was erected on Summer Street and furnished with the appliances for generating electricity, and the business thus projected was prosecuted with good success. But not many months elapsed before it was deemed best to dissolve the syndicate and to organize and carry on the work as a regular corporation. For this purpose a charter was obtained from Maine, and the Natick Electric Company was organized, with Deacon J. B. Wilson as president, Hon. Francis Bigelow as treasurer, and Mr. Daniels as Manager. This was in 1886, and seventeen stockholders constituted the company, with a capital stock of \$11,800. The system adopted was the Thomson-Houston, and, in 1889, there were thirty-six public and four hundred and fifty commercial lamps in use. Since the date just mentioned the number of both kinds has considerably increased, the town appropriating each year a larger sum for are lights, and maintaining them in all the larger centres of business, while the incandescent are found year by year in a greater number of factories, stores and offices. Business has been greatly facilitated by these movements, and the same may be said of the comfort of the people and the security of their property.

Recently, the company, of which Mr. Daniels was, for a time, general manager, has sold its entire effects to a new electric corporation, which is building, in the northwest part of the village, new and greatly enlarged works for the generating machinery. As the result of these changes, and the founding of a new and costly electrical plant, the running of electric cars through the village of Natick, and a new and easy connection with Boston, are among the anticipations of the near future. Of this entire electric enterprise Mr. Daniels should have the credit of being one of the foremost and persevering originators. In the midst of his work he died very suddenly of apoplexy, March 28, 1888, at the age of forty-three years.

CHAPTER XLII.

TOWNSEND.

BY LETHAMER B. SAWHILL, F.

DESCRIPTIVE.

THE TOWN of Townsend is situated in the northwest angle of the county, in latitude $42^{\circ} 38'$ north, and longitude $4^{\circ} 19'$ very nearly east from Washing-

ton, on the northern margin of the State, adjoining New Hampshire. It is forty miles northwesterly from Boston, thirty-two miles northerly from Worcester, and fifty-six miles southerly from Concord, New Hampshire. In 1792 the selectmen of Townsend, in company with the selectmen of the seven adjoining towns, each in their turn, caused an accurate survey of the town and a plan thereof to be made. The several boundaries of the town since that date have remained unaltered in the least particular. According to that survey it is bounded as follows :

"Beginning at the northeast corner and running south 1° west on Pepperell line 300 rods to Groton old corner; thence south 11° west on Pepperell line 880 rods to the northwest corner of Groton; thence south 14° west on Groton line, 270 rods to the northwest corner of Shirley; thence south 14° west on Shirley line, 500 rods to the northwest corner of Lunenburg; thence south $62\frac{1}{2}^{\circ}$ west, 1880 rods to the northeast corner of Lunenburg, in the east line of Ashby; thence north 3° east by Ashby line, 150 rods to the northeast corner of Ashby; thence south $82\frac{1}{2}^{\circ}$ east by the State line and Mason south line, 110 rods to the southeast corner of Mason; thence by the State line and the south line of Brookline, 700 rods to the point of beginning, and contains by estimation 19,271 acres."

The town contains a trifle more than five and one-half miles square, or thirty and one-ninth square miles. The surface of the town, except that portion near the river, is greatly diversified with hills and valleys. On the banks of the Squamicook, through the entire length of the town, there are areas of level sandy plains. Some of these, that are only slightly elevated above the natural surface of the river, are fertile and afford good remuneration to the husbandman for his labor. The rocks are ferruginous gneiss, Merrimaeschist, sienite and St. John's group. There are ledges which afford large quantities of stone for building purposes; some of them can be split and worked to good advantage, and only a small portion of iron, which is one of their constituent parts, prevents a much more extensive use of them. On the east side of the Nissequassick Hill a vein of plumbago crops out, which has never been investigated, and nothing is known in regard to its quality or value. The borders of the town, except at the southeastern part, are hilly. The principal hills are Nissequassick Hill, West Hill, Barker Hill, Battery Hill and Bayberry Hill.

NISSEQUASSICK HILL embraces the northeastern part of the town, from the Harbor to the State line, the northern slope extending into New Hampshire. Since the settlement of the town this hill has been more densely populated than any other portion thereof, except the villages. It contains some rough ledges and broken crags on its eastern brow, except which, it has few ravines or abrupt elevations; and its soil, although somewhat rocky, is both arable and productive. It is a graceful elevation, and has many standpoints of scenic beauty. Many charming prospects, worthy of an ascent to behold, may be seen from its summit. The Monadnock, the Watatic, the Wachusett and the bold elevations at the north, including Jo English Hill, together with the mountains of New Ipswich, Peterborough and Lyndeborough, in New

Hampshire, are distinctly visible and stand out in bold relief, resembling turrets in the sky belonging to the walls of some ethereal world. The farm-buildings situated on the summit of this hill are in plain sight of portions of several towns situated at the west and northwest.

WISE HILL, situated west and nearly opposite the hill just described, and of about the same elevation, lies also in the northern part of the town, extending farther into New Hampshire. It, however, does not, take up so much of the territory of the town as Nissequassick Hill. It contains, ledgy, waste lands, in which are wild ravines and swamps, caused by rocky barriers, which impede the natural course of the rivulets. Two or three farms on its summit constitute all the soil on this hill suitable for cultivation; and it is generally covered with a growth of young forest trees of different sizes and ages, for which purpose it is best adapted. Closing up to this hill on the west, comes

BARKER HILL is sometimes called "Walker Hill," it being the place of residence at one time of Deacon Samuel Walker. The eastern brow of this hill contains some good soil, on which are two or three well-cultivated farms. The balance of its territory is quite rough and ledgy and is the largest tract of uninhabited land in Townsend. Some parts of this hill are covered by a nice growth of chestnut timber.

BATTERY HILL is a name applied to a part of an unbroken spur of the Turkey Hills which extend from Pearl Hill, in Fitchburg, north to New Ipswich, New Hampshire, bordering the whole western line of the town. The name was applied to that part of this range over which passes the old county road from West Townsend to Ashby, extending, perhaps, a mile both north and south of this thoroughfare. It was so called from a garrison-house which stood on its eastern slope in the town of Ashby, on which a cannon was placed by the settlers to give an alarm in case of the incursions of Indians. A few farms on this hill, at the west and northwest of Ash Swamp, are of excellent quality, the soil containing just enough argillaceous matter to prevent the cultivated fields from being washed by heavy rains, and to hold moisture during the drouths of summer. Some heavy crops of grass have been taken off from these farms.

BAVBERRY Hill, in the southwest part of the town, has nearly half of its territory in Lunenburg. On the north and west sides of this hill its ascent is quite steep, and the approaches to it are somewhat difficult. Two or three hundred acres on its top are comparatively level. The land here is rocky, cold and backward in the spring. Formerly there were several farmers who produced large and valuable crops of peaches on this hill, but for the last few years there has been a small amount of this fruit sent to market from this town. There is a standpoint on the summit of this hill from which a prospect of panoramic beauty may be seen, having the three villages of Townsend

in the foreground situated about equidistant in an elongated basin, widening from the northwest to the southeast and shut in by these hills, dotted with white dwellings, pastures, fields and forests. Five brooks which drain parts of Mason, Ashby, New Ipswich, Fitchburg and Lunenburg converge into Ash Swamp, situated in the west part of the town.

SQUANICOOK RIVER is the product of these streams, and it takes its course through Townsend from northwest to southeast, turning to the right on leaving the town and in its onward course forms the boundary line between Groton and Shirley till it empties into the Nashua. It is the largest tributary to that river, and has furnished motive-power which has been utilized, since 1734, at several places in this town.

WORDEN POND, a small sheet of clear water, situated in the southwest part of the town, near Ashby line, is the only natural pond worthy of notice. It has no visible outlet, and the probability is that it has some subterranean connection with Pearl Hill Brook, whereby it becomes replenished, while other streams, during a drouth, afford a small flow of water. It is considerably frequented in early winter for fishing through the ice.

As a farming town, Townsend is inferior to Lunenburg and some other towns in Worcester County, but compared with the other joining towns, it is naturally as good and better than some of them. The farms have been neglected, so that agriculture is not a branch of industry of which the people are particularly proud. Too much attention has been given to the cooeping business, to the detriment of good cows, cleanly cultivated fields and well-filled barns; yet its inhabitants regard their lines as having "fallen in pleasant places, and that they have a goodly heritage." The situation of the town is comparatively favorable for genial climatic influences. The first precursor of winter, in earnest, is seen in the powdered crests of the hills at the west and northwest, on the mornings which follow the cold Thanksgiving rain-storms. Snow appears in that direction, occasionally, two or three weeks before it is seen on Townsend soil. Certain changes in the air are noticeable in traveling to the northwest from Boston. In spring, vegetation at Concord, a little outside of the ocean air, is different from that at the tide-water. Commencing at the hills bordering on Townsend on the west, another atmospheric change is noticeable; while at the distance of twenty-five miles farther at the northwest there is considerable difference in the climate. At the same time the extremes of heat and cold are greater on the plains here than either on our own hills or those at the northwest. The cold waves of air, following up the Nashua and Squanicook to the Harbor Pond, cause that locality and its surroundings to be the coldest of any part of Townsend.

The provincial Governor assumed the responsibility of giving names to towns and counties, which were generally called for one of his intimate friends or

some person of rank or of the nobility. The Governor named this town in honor of Viscount Charles Townshend, His Majesty's Secretary of War, and his contemporary. About 1780 the town clerk and others began to spell Townshend by omitting the *h* and giving it its present orthography. Thence till about 1800 the custom was to spell the word both ways, since which time the correct method of spelling has been abandoned, perhaps contrary to the principles of good taste or justice. The town has three postal centres, known as Townsend Harbor, Townsend and West Townsend, each situated about two miles from the other and clustering on both banks of the Squanicook. The Peterborough and Shirley Railroad, a branch of the Fitchburg Railroad (completed in 1849), passes through the town, touching the three villages daily with three regular passenger trains each way.

The first paper title to any land in Townsend was made on the 6th day of September, 1676, which conveyed to William Hathorn a mile square, of which the following is a copy :

"Layd out to the Worthth William Hathorn, Esq., six hundred and forty acres of land, more or less, lying in the Wilderness on the north of Groton river, at a place called by the Indians, Wistequassuck, on the west side of sayd hill. It begins at a great Hemlock tree standing on the west side of the sayd hill marked with H, and runs north and by east three hundred and twenty pole, to a maple tree marked with H ; from thence it runs West and by north three hundred and twenty pole to a stake and stones ; from thence it runs south & by west three hundred and twenty pole to a great pine in a little swamp, marked with H ; from thence it runs east & by south to the first hemlock. All the lines are run & the trees are well marked. It containes a mile square and is layd exactly square, as may be easily demonstrated by y^e platform inserted underneath & is on file.

"JONATHAN DANFORTH, Surveyor.

"The court allows & approves of this returne, so it interferes not with former grants."

William Hathorn was a magistrate in Salem when the Quakers commenced their eccentric and indecent proceedings "against the peace and dignity" of the Colony ; and a captain of the Salem militia during the Indian war, afterwards promoted to the rank of major. He was a deputy to the General Court two or three times, Speaker in 1661, and a man of prominence. "Hathorn's farm," so-called, was situated on the western slope of what was formerly known as Wallace Hill, including the meadows at its base, and was undoubtedly selected from the unbroken wilderness on account of the spontaneous growth of grass which this meadow produced. The Indian name in this grant has been found spelled quite differently in different records. In both the town and the proprietors' records the word is almost invariably Nissequassick. This word translated signifies the two pine place (*nissi*, two ; *coos*, pines ; and *ick*, a locative particle). This word has never been applied to any other locality. There is no evidence showing that the Indians ever made Townsend a permanent place of abode. There might have been two large or peculiarly situated pines on this hill which served them as a guide in their journeys from Lancaster to Dun-

stable, where the Nashua River joins the Merrimack, which was one of their favorite fishing-grounds.

In 1702 the Colony of Massachusetts Bay commenced issuing paper money to pay debts which accumulated from the expense of the Indian wars and other causes. The inflation of the currency, together with a strong passion and greed for landed estates, brought to the surface a class of speculators who were anxious to have new towns granted and surveyed.

In 1719 a certain number of men, the most prominent of whom belonged to Concord, petitioned the General Court for the grant of two towns at the "Westerly side of Groton." This was soon after Groton had been re-surveyed by Samuel Danforth, who established the northwest corner of Groton on the easterly side of "Wistequaset Hill," thereby giving to Groton the gore of land between the north line of that town and the south line of old Dunstable, having the east lines of Lunenburg and Townsend as they now are for its western boundary. By this survey Groton obtained large portions of land which are now included within the limits of the townships of Pepperell and Shirley. On the 7th of December, 1719, the General Court made the following grant which is of great importance, for it is not only the foundation of the municipal rights of the town, but it is the base upon which rest the titles to all the real estate in Townsend except Hathorn's mile square. It is here given entire from an exact copy of the colonial records :

"*Ann^o Regni Regis Georgii Mayne Britannia^e S^c etc.* At a grant and General Court or Assembly for his Majesty's Province of the Massachusetts Bay, in New England, began and held at Boston, upon Wednesday, the twenty-seventh of May, 1719, and continued by Prorogation to Wednesday, the fourth of November, 1719, and then met, being their second session."

"Monday, December 7, 1719.

"In the house of Representatives, the vote for granting two new towns was brought down from the board with Amendments, which were read and agreed to. And the said vote is as follows, viz. : *Voted*, That two new towns, each containing a quantity of land not exceeding six miles square, be laid out in as regular Forms as Land will allow ; to be settled in a defensible manner on the Westerly side of Groton West line, and that William Tailor, Samuel Thaxter, Francis Fullam, Esqrs., Capt. John Shipley and Mr. Benjamin Whittemore be a committee fully empowered to allot and grant out the land contained in each of the said towns (a lot not to exceed Two hundred and fifty acres), to such persons, and only such as will effectually settle the same within the space of three years next ensuing the laying out and granting such by the Committee, who are instructed to admit eighty families or persons in each town at least who shall pay to the said Committee for the use of the Province, the sum of five pounds for each allotment, which shall be granted and allotted as aforesaid ; and that each person to whom such lot or lots shall be granted or laid out, shall be obliged to build a good Dwelling House thereon, and inhabit it, and also to break up and fence in three acres of land at the least, within the term of three years ; and that there be laid out and reserved for the first settled minister a good, convenient lot ; also a Lot for the school, and a ministerial lot and a Lot for Harvard College, of two hundred and fifty acres each ; and the Settlers be obliged to build a good, convenient House for the worship of God, in each of the said Towns, within the term of four years ; and to pay the charges of the necessary surveys, and the Committee for their service in and about the premises ; and that the Committee give public notice of the time and place when and where they will meet to grant allotments.

"Consented to

SAML. SHUTE."

The townships of Lunenburg and Townsend, by this order or grant of the General Court, were called into existence from the "countrie land" of the Province and from a territory previously called Turkey Hills. From the date of the grant till each of these towns was surveyed and received its respective charter, Lunenburg was called Turkey Hills, and Townsend was called The North Town, sometimes Turkey Hills North Town. The committee named in the grant called their first meeting at the inn of Jonathan Hobart, of Concord, on the 14th of May, 1720, when seventy-two of the eighty shares in North Town were taken up, some subscribers paying the five pounds, others paying only a part, and others nothing at that time. Twenty-four of these seventy-two shareholders belonged to Concord. At a subsequent meeting the other eight shares were taken, but the names of those who took them do not appear on the manuscript record of Francis Fullam, the clerk of the committee. This manuscript is preserved in Harvard College Library. It was impossible for the original proprietors of the town to conform to the strict letter of the grant. The Indian war of those days delayed the settlement of the town for some time and men hesitated to leave the older settlements for fear of Indian incursions. The "convenient house for the worship of God" was not built (in part) till 1730. It was a rude, cheap house and the only one in town that was built of sawed lumber. Only a few of the men who met at Concord with the committee to subscribe for an eightieth part of the town in 1719 ever saw the town, the settlement was so long delayed. The first birth in Townsend was in 1728, during which year a few families came here from Chelmsford, Groton and Woburn. Some men from Groton, who had land here, came up and cleared the land in the fall of the year for two or three years previous and returned home and spent the winter. The petitioners of the North Town for a charter, in 1732, signed by the settlers of the North Town, represented "that the town was completely filled with inhabitants," when probably there were less than two hundred people in town. One of the conditions in all land grants was, "Provided it doth not interfere with any former grant." Dunstable received its charter in 1673, or about fifty years before any man except Major Hathorn owned any Townsend soil. The North Town men found their east line, bounded on Groton, running north 17½ east from Lunenburg corner, was less than six miles long; so they interferred with a former grant by pushing their northeast corner up into Dunstable, fearing that they would not get their six miles square, as was promised by the act of 1719. They desired and expected their east line, running northerly from Lunenburg northeast corner, to continue "north seventeen and one half degrees east," after reaching Groton northwest corner, and penetrate the town of Dunstable in that direction. This created a bitter controversy between the two towns, the settlement of which has

never been explained and no one knows much about it from the fact that the Dunstable records of that period are lost. In 1732 the General Court settled the matter *partly* in the charter for Townsend by dividing the territory claimed by Townsend between the two towns; but until the Province line was established, in 1741, as will be seen by the charter, Townsend had no northeast corner.

CHARTER OF TOWNSEND.

"Whereas the northerly part of Turkey Hills, so-called, is completely filled with inhabitants, and who are now about settling a learned and orthodox minister among them, and have addressed this court that they may be set off a district and separate town, and be vested with all the powers and privileges of a town; Be it therefore enacted by his excellency the governor, council and representatives in General Court assembled, and by the authority of the same,—

"That the northerly part of Turkey Hills, as hereafter bounded and described, be and hereby is set off and constituted a separate township by the name of Townshend, the bounds of said township to be as followeth, *viz.*: Beginning at a heap of stones at the northwest corner of Lunenburg; so running east thirty-two degrees and one-half south, three thousand and fifty rods, to a heap of stones in Groton line; then bounded on Groton line, north seventeen degrees and an half east one thousand four hundred and forty rods to a heap of stones at Groton northwest corner; from thence running due north, leaving eighty acres out of the plan to the town of Dunstable; then running from Dunstable west line on province land, west thirty-one degrees and an half north two thousand two hundred and forty rods, to a tree marked; then running south, thirty-six degrees west to the northwest corner of Lunenburg, where the bounds first began, one thousand nine hundred and twenty rods. Provided, That nothing herein contained be construed to effect the rights of the proprietors of the land called Hathorn's farm, and the inhabitants of the said lands, as before described and bounded; be and hereby are vested with the powers, privileges and immunities that the inhabitants of any of the towns of this province are or ought to be vested with. Provided, That the said town of Townshend do, within the space of two years from the publication of this act, procure and settle a learned orthodox minister of good conversation, and make provision for his comfortable and honorable support. In the House of Representatives, June 29, 1732, ordered that Mr. Joseph Stevens, one of the principal inhabitants of the town of Townshend, be and hereby is fully empowered to assemble and convene the inhabitants of said town to chose town officers to stand until the anniversary meeting in March next, any law, usage or custom to the contrary notwithstanding.

"Sent up for concurrence,

"J. QUINCY, *Speaker.*

"In council June 30, 1732, Received and concurred,

"J. WOLLARD, *Secretary.*

"June 30, 1732, consented to

J. BELCHER."

From the grant it appears that Townsend acquired, in 1732, about forty-two square miles of land instead of thirty-six, as contemplated by the act of 1719. Perhaps this liberality is traceable to the fact that some of the members of the General Court were part owners of the North Town and assisted in making the survey of the town. Its northeast and southwest lines were parallel, the northeast line being somewhat shorter than the southwest line. The southwest corner of Dunstable was about two miles farther west than a line drawn due north from Groton northwest corner, so that the northeast line of Townsend must have been more than nine miles long, and the southwest line more than nine miles and one-half. Probably it was the intention of the General Court that the proprietors of Townsend and Dunstable should agree upon a point for a northeast corner of Townsend which was to be legalized at a future period.

The running of the Province line, in 1741, settled

many disputes about land titles, and certainly was a great benefit to New Hampshire, which received a fresh impetus in civilization by acquiring from Massachusetts twenty-eight townships which were chartered by that Province, besides large tract of land never incorporated into towns. Dunstable (then in Middlesex County) was severed in twain, the larger and more eligible part being left in New Hampshire. Townsend lost about one-third of its territory by this line but found a northeast corner of the town located considerably south of the point for which it contended. Parts of Brookline, Mason and New Ipswich, in New Hampshire, were then taken from Townsend. The proprietors of Townsend felt much uneasiness, on account of their loss of land caused by this new line. Jasher Wyman, who was clerk of the proprietors, not only lost his land, a part of which was under cultivation, but his improvements, including a mill which stood near the spot where the mill situated nearest to the State line in Brookline now stands. Colonel William Lawrence, of Groton, lost about four hundred acres of non-resident land, and John Farrar was forced away from his home by a writ of ejectment.

Jonas Clark and John Stevens were also losers. These lands are now in Brookline. These losers of land petitioned the General Court at different times for grants of land to make themselves whole, and the court responded favorably, and granted tracts of land at three different times, none of which were ever any benefit to the proprietors. The fourth grant was made in 1785, when a township marked No. 114, on Rufus Putnam's plan of a set of towns in the extreme east part of Lincoln County (now Washington), in the district of Maine, was granted to the proprietors. The Townsend people never received any profit from this grant, and the township itself (which is now Charlotte) was not settled till 1810, or about sixty years after the lands in Townsend were lost.

The town of Ashby was chartered in 1767. It was taken from Fitchburg, Ashburnham and Townsend, the last-named town contributing more than one-half of the territory to make the new town. The only alterations in the boundary-lines of Townsend since it was chartered were caused by the establishing of the Province line in 1741, and the creating of the town of Ashby in 1767.

There were, at first, two divisions of land out, running northerly from the river, by the line of Groton, across the east end of the town. In 1733 a third division was made which extended nearly two miles west from Groton line. The east end of the "House Lots" abutted on a "six rod way, running nearly north and south," which is now the road leading over Nissequassick Hill. The west end of the second division also abutted on this road, which was the longest and widest highway laid out by the proprietors, now in use. The proprietors made ample reservations for roads. Almost every

deed closed with these words: "There is also an allowance for a way whenever the town shall think it necessary." No matter how rugged and precipitous, marshy or ledgy, whether the land was on Rattlesnake Hill or the rough peaks which are now in Northern Ashby, that ubiquitous "allowance for a way" was sure to be present. The road entering the northeast corner of the town, running nearly south for a short distance, then turning easterly and running about half-way from the State line to the harbor, to the point where one road turns toward Pepperell and another westerly, was *the road* between the first and second divisions then laid out. No original proprietor, according to the terms of the court's committee, could hold more than 200 acres in one body, although he had a right to one-eighth of all the land in the town. Lots in these divisions contained about fifty acres, and are designated in the proprietors' records as "original house lots." There were more than 100 lots in these three divisions, and was it determined by lot or chance where each man's lot should be located, nothing could be more fair than this method. After this drawing, when the fourth and fifth divisions were laid out, the second fifty acres or more would be exchanged by these men with each other, so that their lands would become more in one body. Sometimes, if a proprietor were not present at a drawing, a committee, composed of men of their number and choice, and sometimes a committee appointed by the General Court, would designate the lot. At this distance from that period, not much being a matter of record, it cannot be expected that the precise location of the lands and houses of many of the first settlers can be designated; and if it were practicable, from the necessity of the case, any description that would be quite intelligible to people now living would perhaps be obscure and without meaning to the future men and women of Townsend. Some of the first settlers are worthy of particular notice.

JASHER WYMAN, the first clerk of the proprietors, and who filled that office for more than twenty years, was a man of more than ordinary ability. His spelling and language in the records are excellent, and his penmanship good. He came from Woburn. When he lost his property and land in New Hampshire he moved back to one of his lots in Townsend, where he died September 19, 1757.

Captain John Stevens came from Groton, and was an innholder. Some of the regularly called meetings of the proprietors were held at his public-house. He was a justice of the peace, a land surveyor and the owner of more acres of land than any other person in this vicinity.

EPHRAIM SAWTELL came from Groton, and his house and land were on the north side of the Harbor Pond, his house-lot extending northerly to land of Jeremiah Ball. He was strictly puritanical in his

views and acts. He was moderator of several of the proprietors' meetings, and lost considerable by the Province line of 1711.

TIMOTHY HEALD lived in the south part of the town, on the road leading from the first bridge above the Harbor Pond, near the top of the hill, where a traveler first begins to lose sight of the Harbor, going towards "South Row." Tradition informs us that he was a disciple of Nimrod, and that he was noted for his destruction of wild beasts. He lived in a garrison-house, the cellar of which can be seen at the present time.

JOSEPH STEVENS, who was empowered by the act of incorporation to call the first meeting of the proprietors, was a man of considerable wealth and of strict integrity. He lived on the second lot on the road leading from Jeremiah Ball's house, northeasterly, at the base of the hill, near Pepperell line.

JOHN WALLACE, his brothers and nephews were of Scotch-Irish descent. They settled on Nissequasick Hill, which was for a long time known as Wallace Hill. At one time there were five or six families by this name in Townsend, but at present there is not a voter in town descended from the original settler by the name of Wallace. John Wallace bought his farm from Thomas Phillips in 1734, which was situated on the east end of Hathorn's farm, abutting on "the six-rod way." They were coopers, and introduced this branch of industry into this town. This business has, from that time to the present, brought more money into Townsend than all other industries added together. For some reason unknown to the writer, Joseph Stevens waived his right of calling the first meeting of the proprietors after the incorporation of the town, and this duty devolved on Benjamin Precott, Esq., of Groton, who, in His Majesty's name, required and commanded John Stevens to "notify the proprietors of Townsend to meet at the Publick Meeting-House on the last Monday in July," for the choice of town officers and other purposes, which was accordingly done.

DANIEL TAYLOR lived in the south part of the town. He owned a large quantity of land and was a slave-owner, and besides he had much personal property.

ISAAC SPAULDING came from Chelmsford at an early date and lived on the south side of the Harbor Pond. He was a man of influence and the first deacon of the church in Townsend and one of the selectmen several times. Our limits forbid anything further concerning the settlers and founders of this town, quite a number of whom were military men, some holding commissions under the King, and again under the Commonwealth after independence was obtained.

Something of an incomprehensible character comes down to us from these bold and intrepid men. They appear almost within the environment of romance, rather than human beings struggling for homes where

they could enjoy "freedom to worship God." Some barrier, always overcome, generally interposed between them and success. A wilderness was displaced, and in its stead Ceres and Pomona smiled in the sunlight. A savage foe lurked around their cabins and garrisons, but "the anointed children of education were too powerful for the tribes of the ignorant;" and when, after a long time, they began to enjoy the fruits of their labors, and hymns of gratitude ascended from their altars, their King taxed them beyond their endurance and compelled them to draw the sword. Then came "the tug of war," in which they were *again* victorious. Would that the photographer's art could reach back and give us the forms and features of these brave men. But, like the knights of olden times,

" Their swords are rust,
Their bones are dust,
Their souls, we trust,
Are with the just."

ECCLIASTICAL AFFAIRS.—Agreeably to the conditions of the charter of the town, the settlers, soon as possible, placed themselves within the sound of the gospel and ordained a "learned orthodox minister of good conversation." Their house of worship had been built three or four years before they were able to settle a minister. Before they had a minister they were accustomed to go to Groton, on the Sabbath, to hear Rev. Mr. Trowbridge, traveling through the woods on horseback, by couples (man and wife), and crossing the Nashua River at "stony fording-place," where the bridge now is on the main road between Pepperell and Groton. Frequently men went on foot the same route and for the same purpose.

At a town-meeting in March, 1734, "voted to choose a committee of three to purchiss a lot for the minister." Presumably this minister was the Rev. Phinehas Hemenway, who was preaching as a candidate, for he was ordained on the third Wednesday of the following October. His house stood on the east side of the road, nearly a quarter of a mile northerly from where the meeting-house stood on the hill.

Rev. Phinehas Hemenway was born in Framingham, April 26, 1706. His father, Joshua Hemenway, came from Roxbury, where he received a superior education for the time. He was town school-master the same year that his son Phinehas was born, and a man of decided convictions and an earnest worker in the church. Phinehas, the son, grew up under the influence of such a home, and was graduated at Harvard College in 1730. No traditions as to his person or character are preserved in the family. He was the first native born son of Framingham to graduate at college, and was elected master of the grammar school in that town at the close of his senior year, for which he received the annual salary of £50. He married Mrs. Sarah Stevens, of Marlborough, May 8, 1739, who survived him, and, in October, 1761, she married Daniel Taylor, of Concord. He died May 20, 1760. The church book of records kept by him is consider-

ably mutilated, but it contains everything from his pen that has been preserved. It contains the church covenant, which is the only piece of literature whereby we can judge of his scholarship. The church was organized with sixteen male members, whose names were as follows: Phineas Hemenway, Joseph Stevens, William Clark, Nathaniel Taylor, Daniel Taylor, Joseph Baldwin, John Stevens, James McDonald, John Wallis, Samuel Manning, Jacob Baldwin, Samuel Clark, John Slown, Benjamin Taylor, Isaac Spalding, Jeremiah Ball.

Soon after the organization of the church, some of the wives of these men, and others of the same sex, were received into the church. Of this number we find "On March 11, 1739, Sarah Hemenway, ye wife of ye Rev. Phineas Hemenway, having received a letter of dismission from ye church of Southboro', was received into our church fellowship and communion."

During Mr. Hemenway's pastorate, which covered a period of more than twenty-six years, the church increased in numbers from sixteen to seventy-nine. The church book of records contains (or rather contained, for some part of it is gone) a full account of the names of the church members, the baptisms administered and the marriages performed by the pastors, together with some examples of church discipline. The book gives an idea of the state of society as well as the fidelity with which our fathers adhered to their church covenant. Then the black and white races were amicably associated together.

"On December 14, 1735, was baptized Andrew Notgrass, a servant child of William and Eunice Clark."

"On May 19, 1745, Ama, a negro servant of Mr. Benjamin Brooks, was received into full communion with the church of Christ in Townshend."

The second minister was Rev. Samuel Dix, a native of Reading, born March 23, 1736; was graduated at Harvard College in 1758; ordained March 4, 1761, died November 12, 1797, in the thirty-sixth year of his pastorate. Mr. Dix was admirably adapted to the sacred calling which he espoused. He was dignified without coldness or arrogance, cheerful without levity, and strictly courteous and condescending in his deportment. He gave his undivided attention to his pastoral duties and, with the exception of one or two patriotic sermons delivered during the early part of the Revolutionary War, he labored faithfully for "a crown incorruptable," both for himself and the people committed to his charge. He was an excellent classical scholar, and as a writer he would lose nothing by comparison with his contemporaries in the ministry or those who succeeded him in the church in Townsend.

Rev. David Palmer, the third pastor, was born June 26, 1768, at Windham, Connecticut; graduated at Dartmouth College, 1799; was preceptor of New Ipswich Academy, 1798; ordained third pastor in Townsend, January 1, 1800; married Chloe Kinsley, of his native town, 1794, and died at Townsend, February

15, 1849, aged eighty-one years. This New Year's day, when Mr. Palmer was ordained, was a complete holiday for Townsend. A great company assembled from this and the adjoining towns to witness the ceremonies, and after the exercises closed the citizens generally opened their houses to their friends and visitors and welcomed them to tables well filled with substantial edibles "for the stomach's sake," when the coveted grog and tempting toddy were passed around. This was the last festival of the kind in which *all* our people participated, for long before Mr. Palmer left the church militant, and before his successor was ordained it was *my church, my minister, my mode of baptism*, and sectarianism began to unfurl the banner of discord. The town and church made a judicious choice for their third spiritual adviser. Mr. Palmer was decidedly a popular man in all social relations, and his influence as a townsman was felt particularly by the children and youth of the town. During most of his pastorate it was the custom, among their other duties, for the ministers to examine the teachers, and, in part, to superintend the schools. The teachers and scholars were always glad to receive a visit from him. Besides, he was a practical educator outside of the pulpit. About twenty young men fitted for college with him, some of whom will be noticed further along in this work. He was a successful pastor. During his ministry two hundred and fifty members were added to the church, sixty-two of that number having joined in 1826. He was dismissed in July, 1830, after a pastorate of thirty and one-half years. As a compliment to his integrity and from motives of benevolence and respect, he was elected by the town a representative to the General Court in 1833 and 1834. Mr. Palmer lost his position as minister through the influence of two or three men of wealth, who wanted a pastor that *would* or *could* better combat the Unitarians and their doctrines.

In 1829 there was a disagreement between the Orthodox and the Unitarians in regard to the use of the meeting-house, both parties wanting it at the same time. A majority of the town, in sympathy with the Unitarians, gave the use of it to them more Sabbaths during the year than was agreeable to the Orthodox. This was resented to such an extent by the Orthodox that, on one Sabbath morning when a man of the Unitarian faith came to preach after the congregation had assembled, they left the house in a body and never used it afterward. After the Orthodox seceded from the town's meeting-house the Unitarians had occasional preaching in it for a year or more.

Rev. Warren Burton supplied the pulpit part of the year 1831. He was the author of "The District School as it was," one of the most graphic and faithful pictures of that institution. He was learned, eloquent and witty, and "truths divine came mended from his tongue." For the next three years the services at this meeting-house alternated between the Unitarians and the Universalists.

In 1836 Rev. Ezekiel L. Bascom preached here and gathered a church consisting of twenty five members. Mr. Bascom was a man of attractive personality and a fluent speaker. He was formerly settled in Ashby. For six years he held the office of Grand Chaplain of the Grand Lodge of Masons in Massachusetts. Soon after the organization of the Unitarian Church the Rev. Linus H. Shaw received a call to settle, which he accepted, and he was ordained December 21, 1836. There was a drenching rain during all that day, and for this reason there was not a large audience in attendance. The exercises were very interesting, as some of the best talent in the denomination took a part. Rev. Andrew P. Peabody, of Portsmouth, delivered the sermon, and the charge to the pastor was given by Rev. Charles Belbidge, D.D., of Pepperell, who is still among the living.

Mr. Shaw was a good scholar, and his sermons were well written, but as an extemporaneous speaker he failed. This was the cause of his short pastorate of about two years.

From this time till 1852, when the First Parish sold their meeting-house to the Methodist society, the Unitarians had no settled minister. Occasionally the Universalists, as well as the Unitarians, occupied the house, and once in a while the Restorationists, and then the Methodists, would have preaching in it. In 1853 the Unitarians built the house of worship which now stands at the Harbor, and the Rev. Stillman Barber preached for them about two years, after which time no money was collected for the support of preaching by the Unitarians. Mr. Barber left, and all interest in the denomination melted away like an April snow-wreath.

In 1852 the Rev. Samuel Topper and his associates founded the Methodist Episcopal society here, in conformity to the provisions of the statute of the Commonwealth. This church and society has had a large number of pastors, of different grades of ability, who have, most of them, passed their biennial term of service here, and are now either located in other fields of labor or have joined "the silent majority." In 1876 this church received sixty-eight new members, the result of a revival conducted by L. D. Johnson, the evangelist.

The Universalist Restorationists formed a society, in 1818, at West Townsend, and Rev. John Pierce, a young man of good abilities, was employed as their minister. He was a native of Lunenburg, and he began preaching when he was quite young. This young man was a good speaker, but he died soon after the Universalists became attached to him, and was much lamented. With much promptness the brick church building now at West Townsend was built in 1818. Some of the Ashby people belonged to this denomination and attended meeting here regularly. The building was dedicated Jan. 25, 1849. Rev. Stillman Clark, of East Jaffrey, N. H., preached the sermon, which was well received by a large audi-

ence. There never was a Universalist Church here, which worshiped in this building, but, in its stead, the Universalist Restoration Society. Rev. Stillman Clark was the first minister, and he was succeeded by Rev. Varnum Lincoln for about two years, when Mr. Clark returned and preached for about a year. They were both much respected, and both were members of the School Committee. Mr. Clark was a member, for Townsend, of the Massachusetts Constitutional Convention in 1853.

In 1853 this society employed a man by the name of R. J. Chapman, who remained here for nearly two years before the wolf in sheep's clothing was discovered.

In June, 1855, Rev. C. C. Clark was settled as pastor over this Restorationist society, and this engagement continued for four years, when he went to Pennsylvania, and remained there till 1863, when he returned, and was again employed as preacher till about the last of 1865. Since the close of Mr. Clark's connection with this society the Universalists have had no preaching, but at present (and for a few years past) Rev. George S. Shaw (Unitarian), of Ashby, preaches here every Sabbath afternoon.

The Baptists commenced here in 1827, with Rev. Benjamin Dean as minister, although they had a society here as early as 1818. Members of the churches in New Ipswich and Mason, N. H., and Harvard met and formed themselves into a society, which was afterward formed into a church, consisting of Asa Baldwin, Joseph Walker, Solomon Stevens, Joseph Simonds, Levi Ball, Susanna Holt, Chloe Ball, Elizabeth Stevens, Unity Manning, Lucy Ball, Chloe Stevens and Almira Stevens. At the commencement of the present century there were two or three families in Townsend of the Baptist faith. These people were obliged, by law, to pay a tax annually for the support of the town's minister, besides being under a moral obligation to contribute towards Baptist preaching in the towns from whence they came. At the annual town-meeting, in March, 1805, the following article was put in the warrant: "To see if the town will consider the Baptists, in regard to their paying taxes towards the meeting-house and leveling the Common." The tax for moving and finishing the meeting-house on the Common was assessed this year. On this article the town voted to abate the tax set against Joseph Walker to a certain extent. The town also considered the Baptists inasmuch as to grant them the use of the meeting-house a certain number of Sabbaths during quite a number of years. Usually their meetings were (previous to 1834) held in what was known as the Battery School-house, where they had services part of the time, but not constant preaching.

The church record for May 20, 1833, shows the following: "Chose Rev. Caleb Brown our pastor." This gentleman was here until the summer of 1835. The Baptist meeting-house having been dedicated during

the early part of the previous winter, and the church being increased some in numbers, so that the surroundings and circumstances began to be more favorable to this denomination, an effort was made to secure the services of some one distinguished in the Baptist denomination for a pastor.

In June of this year the church gave Rev. James Barnaby, pastor of the Second Baptist Church in Lowell, an invitation to settle with them at the annual salary of five hundred dollars. There is nothing in the church records concerning his installation here, but the time of his coming is recorded—"Sept. 28, 1835, Mr. Barnaby removed among us and entered on his labors." A large number, comparatively, attended the meetings during Mr. Barnaby's pastorate, but there was no special revival. In 1836 the church contained thirty-seven members.

After the short pastorate of about two years, for certain reasons, he asked his dismission, which was rather reluctantly granted, both pastor and church being much attached to each other. He was dismissed October 8, 1837, when he moved to Harwich, where he was installed over the oldest Baptist Church in that part of the State, and where he remained till his death.

Rev. Oren Tracy was the next minister. He came from Newport, New Hampshire, and commenced his labors February 3, 1838. There was a very pleasant intercourse between Mr. Tracy and this church and people. A Baptist Church in Fitchburg, being favorably impressed by Mr. Tracy, gave him a call with an offer of a larger salary, when, "his duty" pointing in that direction, he asked his dismission in January, 1841, and soon departed for that place.

In the spring of 1841 the church gave a call to Rev. Charles W. Redding, who was regularly installed soon after. He remained till July, 1844, when the society "voted that the pastoral connection between Rev. Mr. Redding and the church and society be dissolved." The cause of this act is unknown to the writer. He was a good writer and well polished in his manners.

Rev. William C. Richards was his successor for two or three years, when the services of Rev. Caleb Blood were secured for about two years. He was grand-son of his name-sake, who was a distinguished man in the Baptist denomination.

Rev. F. G. Brown, Rev. Lester Williams and Rev. E. A. Battell supplied the pulpit, each one about the same length of time, from 1850 to 1860.

Rev. George W. Ryan entered upon the labors of pastor of this church in 1860. Mr. Ryan took considerable interest in education, and served on the School Committee, in which office he was well received. The Baptist pulpit has been supplied at different times by the theological students at Newton for months at a time.

Rev. Willard P. Upham was pastor from 1867 to 1872. He was for a long time associated with the Cherokee Indians as missionary and teacher, and

afterwards as pastor of the church connected with that intelligent tribe. He had considerable experience also at other places at the west. His pastorate here was the longest of any person in the ministry who labored with the Baptists. He was an exceptional preacher, a diligent student and a social gentleman. He was an invalid for some time before his death, which occurred in 1877.

Rev. Oren K. Hunt, a graduate of Newton Theological Seminary, was installed pastor of this church in June, 1874, and he remained until the spring of 1877, when he was followed by Rev. William R. Thompson, who preached very acceptably for this church and congregation for three or four years.

Rev. Benoni F. Kellogg, following Mr. Thompson, was the next pastor, and he remained about three years, and was succeeded by Rev. Charles W. Williams, the present pastor.

The early records of the Baptist Church are so meagre and incomplete that it is impossible to give as many facts and dates as are desirable. From its beginning to the present time this church has been the recipient of pecuniary aid from "The Domestic Baptist Missionary Society of Massachusetts." No difficulties have ever disturbed this church, and there has invariably been extreme unanimity among the church members, its friends and its patrons.

On the 8th of February, 1830, the church, which left the town's meeting-house with Mr. Palmer, assumed the name of "The Orthodox Congregational Church of Christ in Townsend."

The first pastor of this church was Rev. William M. Rogers, who was ordained February 16, 1831. This young man was an Englishman by birth, and his father fell at the battle of Waterloo. His name was Kettell, which was changed by an act of the Legislature to Rogers, the name of one of his uncles, who gave him quite a sum of money. He was a man of much discretion—had a winning address—knew just when he had said enough and was a popular preacher. He was dismissed in July, 1835, at his own request, and afterward he settled with a church in Boston, where he died in 1851.

Rev. Columbus Shumway was the second pastor. He was installed January 6, 1836, and in every particular he was an honorable man and a respectable preacher. Mr. Shumway must have been placed in a delicate position, and experienced all the embarrassments of being the successor of a first-class man. Undoubtedly too much was expected of him. The notice of his dismission, tendered to him March 28, 1837, was a surprise to him, from the fact that up to that moment everything on the surface indicated unanimity and satisfaction.

Rev. David Stowell, who was installed June 28, 1837, as the third pastor, was a man of good intellectual abilities, on account of which he was selected to fill this position. There were some irregularities in his conduct during the latter part of his pastorate,

which caused both him and the church considerable excitement and trouble. He was dismissed by order of an ecclesiastical council, August 15, 1843.

Rev. Luther H. Shelden, the fourth pastor of this church, was a very active man, prompt to an appointment, and always prepared for any pastoral work to which duty called him. He took an interest in the cause of education, in temperance reform, and in the abolition of slavery, and "he spoke right out in meeting" on each of these subjects. He was ordained here August 15, 1844, and continued a successful pastorate until March 7, 1856. In proof that he has taken good care of himself, it may be noticed that he is now (1890) alive at the age of seventy-five, and preaches a part of the time with the same force of his early years.

Several candidates then entered the field for promotion to the pastorate, and April 28, 1858, Rev. Elisha W. Cook was installed. This Cook did not "dispense the bread of life" or flavor his morals with an "extract" that pleased this church, and he was dismissed October 12, 1859.

Rev. Moses Patten was ordained June 7, 1860. He was not a fluent speaker or a man calculated to give a first-class sermon, but he was of amiable and exemplary character and much respected by his people. Dismissed April 27, 1863.

On the 27th of August, 1863, the church instructed its committee to employ Rev. John C. Hutchinson as their acting pastor. He was an interesting speaker, quite original, and sometimes eloquent. He was interested in his calling and gave his whole attention to it. He was dismissed July 22, 1866.

Rev. George Williams was installed pastor of this church May 1, 1867; dismissed February 1, 1869.

Rev. George H. Morss succeeded Mr. Williams June 17, 1869. He remained till April 10, 1873, when he was dismissed.

September 29, 1873, the church invited Rev. Henry C. Fay to become their acting pastor. He was a live preacher, a close student, and had much force of character. He was dismissed September 12, 1876.

Rev. Albert F. Newton was ordained as pastor of this church September 5, 1877. Mr. Newton's pastorate of about four years was passed very pleasantly and profitably with this church, till he was "called" to a church in Marlborough, with which he is now in service.

Meeting-Houses.—The first frame building made in Townsend was the meeting-house, which was built about 1729, or nearly at the same time that the house of worship was built in Lunenburg, which was in 1728. There is no record of this building in regard to the time when it was built. Lunenburg raised £200 (\$88.88) for building and finishing its first meeting-house. From records concerning the cost of the house in Townsend, it appears that the first meeting-house in this town cost much less. It stood on the hill nearly a mile from the Common at the centre of

the town on the west side of the road leading over the hill. It was a very ordinary building, and it was continually altered and repaired as long as it was used as a place of worship. But the settlers, owing to their poverty, made it answer their purpose for forty years.

In 1770 the town commenced to build the second meeting-house, concerning the location of which there was a long wrangle, which was finally settled by a reference to three men, each coming from three joining towns. This house was located within a few feet of where the first meeting-house stood. There is no doubt but that these referees selected this spot on account of the beautiful and picturesque prospect from this standpoint. Large portions of the towns of Lunenburg and Groton, at the south and southeast, with the towers, landscapes and white farm-houses of these old towns, together with the hills and mountain slopes, at the west and northwest, dotted over with fields and forests, all presenting a charming panorama, caused this location to have peculiar attractions for our ancestors. This hill, in a deed written one hundred years ago, conveying some land on its eastern slope, is called "Mount Grace." This meeting-house was finished so much that it was occupied during the latter part of 1771. Among the list of baptisms by Rev. Mr. Dix, this is recorded, October 27, 1771: "Baptized Gaus, son of Eleazor Spaulding, in y^e new meeting-house." This edifice was a great improvement on the house for which it was substituted. Although it was never finished where it was first built, it was clapboarded, and the windows, door frames and the doors were painted on the outside the same year that it was built. This edifice was the town's meeting-house. Within its consecrated walls the followers of the Master worshiped, the citizens devised plans to meet all the wants of the town, in its corporate capacity, the training-band assembled to listen to the reading of the militia law; here the "Committee of Safety" held consultations, the selectmen discussed their duties, and the smouldering patriotism of an oppressed people burst into a flame. After this house had stood about twenty-five years, there began to be considerable dissatisfaction concerning its location so far from the centre of the town; besides, the building needed some repairs. The expense of maintaining a road over the ledges and steep grades of Meeting-house Hill was an objection which had an influence with many; besides, in dry seasons there was no water to be had at or near the summit of this hill.

In March, 1799, the town chose a committee "to find the centre of the town and say where this meeting-house ought to stand." This committee of sixteen citizens soon after reported, recommending the spot where this same house now stands for the location of their meeting-house. There was for a long time much disagreement about what should be done, some wanting a new house, others wanting this house removed and enlarged when put up; but finally it

was agreed to remove it, set up and renovate it without any addition except a belfry. Two brothers, Moses and Aaron Warren, took the contract to move and set up this house, where it now stands, which was done in 1804. Zaccheus, Hezekiah and Levi Richardson were the carpenters and stone-masons employed by these Warrens in finishing this edifice. After this house was finished there was great satisfaction in regard to its location and the manner in which it was done, and desiring to make it more easy of access, August 28, 1804, the town raised \$300 to be expended in leveling the Common.

In May, 1852, after sectarianism had done its work, Charles Powers and others, in the interest of the Methodists, bought this house from the Unitarians, turned the west end of the same to the south and fitted it up into two flats, in its present style. Since that time the Methodists have rented the lower part of it to the town for a town hall, and occupied the upper part as an auditorium, in which they have enjoyed an uninterrupted preaching of the Gospel to the present time. It has been judged that the tower on this edifice has good architectural proportions, and is as well adapted to the main building as anything of the kind in this vicinity.

The Orthodox Congregational meeting-house was completed and dedicated in June, 1830. Some of the men who seceded from the town's meeting-house, just previous to that time, possessing a good amount of wealth, and not lacking either in enterprise or will, were determined to have a first-class church edifice. With much unanimity this society agreed, both on the location of this house and the manner in which it was to be built. This fourth meeting-house in Townsend is made of brick, and in every particular is much superior to any church building ever erected in town, and it reflects credit upon the taste and good judgment of the men who designed the same and furnished the money with which it was erected. The clock in the tower of this church was presented by Deacon Joel Adams and Samuel Adams, his son. This edifice was subjected to a thorough renovation in 1884, at an expense of about \$5000. An entire set of stained glass windows was substituted, the seating arrangement was altered, a place for the organ and choir was located on the ground floor, at the south side of the pulpit, the auditorium was elegantly frescoed and the building was nicely painted both inside and outside.

During the summer of 1879 the iron fence around a part of the Common was put up, the ground plowed and enriched, shrubbery was set out, flowers were cultivated and the park at the central village was brought into existence. About \$1500 were raised by subscription to pay for the fence and the labor in setting it in position. Alfred M. Adams and William P. Taylor, living directly opposite this park, contributed the most liberally towards defraying the expense of this improvement.

The fifth meeting-house was erected at West Townsend, by the Baptists, in 1834. It is a commodious structure, sixty-four feet long, forty-five feet wide, with posts twenty-four feet in height. This house is a *fac-simile* of a church building that was in Fitchburg, which so favorably impressed the building committee in regard to its proportions and convenience, that it became the model for their meeting-house. In 1873 it was thoroughly repaired, painted and frescoed, and a new pulpit, new chandelier and side-lights on the walls were put in. The Warren family has done much for the Baptists. Levi Warren gave the land on which the meeting-house stands and about one-third of the money required to build this house; Moses gave the bell which was hung in the tower when the edifice was completed; Charles gave the clock on the tower and the one inside hanging in front of the gallery; and others, including Ralph, Aaron and Dorman, have contributed liberally to assist this denomination.

WAR OF THE REVOLUTION.—In September, 1768, the selectmen of Townsend received a letter from the selectmen of Boston requesting them to call a town-meeting, and then to take into consideration the critical condition of government affairs, and to choose an agent to come to Boston, to express there the views, wishes and determination of the people of Townsend on this important subject. A town-meeting was accordingly called expressly for this purpose; when "Put to vote to see if the town would comply with the town of Boston in sending a man to join with them in the convention proposed to be held in Faneuil Hall, and it was unanimously complied with. Unanimously voted and chose Lieut. Amos Whitney as a committeeman to join with the convention as aforesaid."

It will be recollected that the five years which preceded the time of this action of the town of Boston, were exciting times for the Colony. Commerce had come to a stand-still by the operation of the "Stamp Act" and the "Sugar Act." The operation of both of these obnoxious measures was defeated by non-importation and smuggling. In 1766 the Stamp Act was repealed, to the great joy of the people, and importation of goods was greater than before. Everything was prosperous for a short time, but in 1768 the obnoxious "Revenue Act" was passed, which threw a cloud over the enterprise and chilled the prosperity of the whole people. It was at this juncture that the town of Boston consulted the other towns in this Province in regard to asserting their rights and maintaining their liberties.

The firm resistance with which the projects of the British Government were received, served to strengthen the ministry to carry their points at all hazards. Troops were stationed in Boston to intimidate and overawe the inhabitants and acts more severe were passed by Parliament. The colonists saw that they must either yield with abject submission or

gain their rights by a resort to arms, and they did not hesitate between the alternatives. Thus their decision was arrived at with the greatest deliberation and a count of the cost. The people of Boston were foremost in resisting the unjust measures of the mother country, and they were nobly seconded by the inhabitants of other towns. Every man in the Province was consulted upon this all-absorbing subject, that they might know what they could rely upon in case of open rebellion against the government of Great Britain.

In January, 1773, another letter and a printed pamphlet was received from the town of Boston, requesting the inhabitants of the town of Townsend to pass such resolves concerning their rights and privileges as free members of society, as they *were willing to die in maintaining*. These resolves the Bostonians requested might be sent in the form of a report, to their Committee of Correspondence. The town responded to this suggestion in an appropriate manner, as will be seen in the following extract from the record:
